The area itself was mountainous because geologically it had formed from a large land mass that slammed into what is now Laos and much like India moving fast from South East Africa slammed into South East Asia and formed the Himalaya

Mountains, this mass, the Kontum Massif, slammed into that part of Asia and lifted up mountains which were very rugged. It's called the Annamite Chain. And it was so rugged, in fact, that there's very few passes that allow people to east and west. And one of those just happened to be in the Khe Sanh area. It was called the D'Ai Lao Pass. There were two other major passes to the north, the Mu Gia and one other one [Ban Karai Pass]; they were quite a ways further up north.

It was through this area that in the 1870s, French explorers like Dr. Jules Harmand, a physician in the French Army, had explored this area. And there was a Captain Malglaive who surveyed the area.

Kurtz: Did they survey it like Wisconsin was surveyed in a general survey?

Stubbe: Well, it was surveyed geologically.

Kurtz: But did they have the grid system with townships and stuff.

Stubbe: At that point, I don't think no. Their maps at that point do not show grids. I think that probably came in the World War II era.

Kurtz: OK.

Stubbe: But anyway—in fact one of the books I donated to the [Wisconsin Veterans Museum] library is a thing called Mission Pavie which describes Malglaive's explorations. But what they explored later became Route 9, which connects Savannakhet in western Laos all the way to Dong Ha in [eastern] Vietnam.

Kurtz: Was this road paved?

Stubbe: Well, no. It was more or less a dirt road, two lane. To call it a national highway—it was more like a country road to some private residence. There were ruts and so on. But there were a lot of rivers and sharply precipitous cliffs which came right up to the road, either sharply rising or sharply falling. And there were like 31 bridges between Khe Sanh Combat Base and the nearest support logistic base to the east which would be Ca Lu where Route 9 moves northward rather than its normal east-west. It goes up north for awhile and then it goes east again, past the Rock Pile, Razorback area, to Cam Lo.

It was a very rugged area which our patrols in the area found it very difficult to move through, and also very densely vegetated with grass about six feet tall [and] razor-sharp edges filled with bacteria that caused sores on people's arms, bamboo thickets, raging streams. In fact, a couple of our people that I know of, drowned in [it, the Rao Quan River]. But it was a very pristinely beautiful area. There were local inhabitants called the Bru, B-R-U, sometimes spelled B-R-O-U—spelling is a hard thing because they didn't have a written language. It's pronounced "BRO-U," with a rolling "R" there. These people—there were like 31 tribes in South Vietnam of Mountain tribesmen, each of which had a different language, [all] non-tonal as opposed to the Vietnamese which is tonal. By that, I mean, the meaning of a word depends on the tone of the voice. For example, in Vietnamese, "dau" can mean "head" or it can mean "pain." The Bru were very primitive people of a different racial stock than the Vietnamese. The Vietnamese had migrated from southern China maybe two thousand years prior, but the Bru people and the other tribesmen had come from Polynesia and were muscular, stocky. But the main thing that we remember is that they were so friendly and so naïve. For example I went with the Marine patrol into one of the Bru villages and left my camera—I was so fascinated by a couple of them making crossbows, which is what they used to hunt, and I left my camera on a tree stump, and I mentioned that to one of the Marines, and they said, "O Chaplain, you don't have to worry because these people haven't even learned to steal yet." And that's true. They were just very happy people. The shadow side of all of this was that they lived in deep fear all the time because religiously they were what we call "animists." They believed that the spirits of the departed controlled their lives, and if they didn't sacrifice to them, they would be afflicted with illnesses. So a lot of them, as poor as they were, would throw rice around to feed the spirits when they could have fed their children. And since they were, in fact, always in poor health—I think it was something like 60% or more of their children died because of malaria, which is prevalent in the area or intestinal parasites or whatever, they always felt that their ancestors were not happy with them, and so they sacrificed more. But basically they were very friendly people.

When the siege started on January 21st [1968], we had three or four of our reconnaissance teams were out, and although we were surrounded by North Vietnamese, the Bru people kept them, moving them sort of like through safe houses until they got back to us. They were very loyal to us. And some of our Army people with the Studies and Observation Group, SOG, used

them. The soldiers described how their sense was so uncanny of enemy presence. They could smell, they could detect, from sounds, whatever. They knew when other people were in the area. And they were just very loyal to our Army—.

Kurtz: Do you know what happened to them after we left?

Stubbe: Yes, indeed. Unfortunately—very tragically, like a Greek tragedy, there was a racial antipathy between the Vietnamese and the Mountain tribesmen, and for good reason. Early accounts show how the Vietnamese would avoid venturing into the hills starting at Ca Lu and that area going westward because they thought that the mountain tribesmen would poison them. And of course the Vietnamese had pushed these mountain tribesmen into the hills when they moved down from China, and the mountain tribesmen had a lingering historical, very negative impression, of Vietnamese.

So when the siege started, the man in charge of all of I Corps, General Xuan Lam, X-U-A-N and then capital L-A-M, a Lieutenant General, was the Vietnamese in charge of I Corps and when the siege started, he permitted the evacuation of approximately 1200 Vietnamese who occupied Khe Sanh village in the planes that were bringing us ammunition because our ammo dump was almost without ammunition; instead of flying the planes back empty, they loaded them up with these Vietnamese. But he said that the Bru, the mountain tribesmen, of which were about 12,000 of them could not leave, because, as he explained, there was no place in Vietnam for them. This is not by hearsay; this is by message traffic from the 26th Marines who realized that they had a problem on their hands that they couldn't evacuate the Bru because they were afraid of human shield kind of things—the North Vietnamese pushing them ahead, and since the SOG unit at Khe Sanh, which was part of our Combat Base, had Bru soldiers he didn't think that the Bru would fire on their own people. So they had to devise all sorts of strategies. For example, they would fire tear gas into them, to try to scatter them, if that happened, if the North Vietnamese pushed them ahead of their assault. Or, they would fire over their heads to try to scare them and scatter them. And then as a last resort, would have to fire into them. Fortunately, that never happened. But unfortunately, because they had to remain and because the North Vietnamese adopted the tactic of hugging us, creeping closer and closer through a trench network, a typical siege network, these Bru were caught in cross-fires, and when they finally did get evacuated in late March, the few that did—eventually ended up in a refugee village at a place called Mai Loc which is just south of Cam Lo on Route 558. I visited there a few times. There were approximately four to six thousand there. Now these included not only the Bru that we knew at Khe Sanh and the villages around Khe Sanh, but also Bru that had still been in the hills. So the 6,000 would not have been included in the original 12,000. So well over 6,000 Bru were killed.

And by that time, Khe Sanh, with all the bombardment—I'll get to that later on—had become a moonscape and all the beauty was just erased.

But now getting back to the tribes—this is significant. The setting of the place. I've talked about the mountains and the passes and Route 9. There were some strategic hills, just like at Dien Bien Phu which was surrounded by hill outposts that acted as early warning or observation to detect enemy encroaching, we had some hills, notably three. Just to the north of us there was a high hill range at the western end of which was a hill called Hill 950. Hills were called by numbers because of meters above sea-level, so Hill 950 was 950 meters above sea-level. Actually, it wasn't! We found that out because we tried to fire 105 artillery support to explode on the north slope of Hill 950 and found that it impacted on the [south] slope! It couldn't go over the crest of the hill. So back in September, October of '67, a group of engineers from the 2nd Topographic Company of Camp LeJeune arrived at Khe Sanh to do a survey, however they do that, I guess with radio beams, and they determined that Hill 950 was really Hill 963, so it was a little bit higher than 950! That's just a little humorous aside.

The other hills were Hill 861, which was visible from the combat base, and Hill 881-South which was a little bit further west. These hills, 861 and 881, were prominent in the news back in April, May of '67 when there was a tremendous battle there. At that time we only had one Marine company guarding Khe Sanh Combat Base, Bravo, 1/9, and they had sent out a patrol out to the base of Hill 861 to determine if indeed there were enemy in the area that had been reported by other people, namely Army SOG people training, Marine recon teams, and so on. They ran into an ambush and that triggered off what they called the Battle of the Hills. That was on, I believe, the 24th of April of '67, and they brought in a while regiment, the Third Marine Regiment. The battle raged until about the 10th of May of '67, not all that long, but it was very costly—costly in the sense that we would assault hills and take tremendous casualties, like on the 30th of April we lost, I don't' know, maybe 50, 60 killed—I don't remember the exact number.

Kurtz: It's in that book?

Stubbe: It's in that book, yes

Kurtz: And what was the name of the book?

Stubbe: *Battalion of Kings*, and it's on the 30th of April that the main assault of Hill 881—and so what would happen is that they withdrew and they couldn't retrieve all the men who were killed. That was an anathema for the Marines: to leave dead people on the battlefield. But it became a common thing—maybe half a dozen times it happened at Khe Sanh through the succeeding months where we had to leave dead people—for a while at least. Then they dropped 2,000-pound bombs on H ill 881-South. And apparently there were caves underneath, like a hospital. And in succeeding months, Marines would dig trenches and bunkers and suddenly dig into an opening of a collapsed area where many North Vietnamese bodies were rotting, and the stench was unbearable.

The caves, by the way, had formed because we had so much rain in the area. We had two big monsoons where we had, like, seven inches a day. Having lived in Wisconsin and gone to college and seminary in Minnesota where obviously the temperatures are cold in the winter, nevertheless I'd say I never felt colder than I did at Khe Sanh during the monsoons because you could never get dry and the temperatures would be around in the 40s because of the elevation. Anyway, these rains had formed numerous caves in that area.

Kurtz: Were they like the geological caves in Wisconsin?

Stubbe: Yeah, limestone caves. Because when this land mass crashed into what is now Laos, it lifted up sea beds which formed these limestone caves. And then there was another hill called 881-North which was, maybe 3,000 meters to the north.

After the Battle of the Hills, 1st Battalion, 26th Marines, and an abbreviated staff of 26th Marines Regiment occupied Khe Sanh. We put a company of Marines, about 250 [men] on each of 861 and 881 [South] and maintained that all the way until we left Khe Sanh in July of '68.

So these were two major hills, and [hill] 950. We also occasionally had other outposts.

There were some other significant hills. 471 is right at the junction of Route 9 and the road that leads to Khe Sanh Combat Base. And this was significant because this was one of the major objectives of the North Vietnamese who occupied it right from the beginning, because from it you can see Khe Sanh village, Lang Vei, and Khe Sanh Combat Base and 950 and 861, and we didn't occupy it at the beginning of the siege because we had a reconnaissance team out two days before the siege called NURSE, and it was just to the west of 471, and it was surrounded. And Colonel Lownds, who was the senior Commander of the area realized that that was an untenable, indefensible position, and sort of gave it to the enemy, and we just blasted it with air and artillery continuously.

Then there was Khe Sanh village, which was about three miles south of Khe Sanh Combat Base. It was mainly Vietnamese.

Kurtz: Were there any French?

Stubbe: Yes, there were. It was originally developed because there was a French planter, Eugene Poilane, who had gone there around 1918. He had come to Saigon as part of World War I, and when it finished he settled in what became Khe Sanh area, and was a botanical fellow. He started a coffee plantation. He also was a botanical explorer and walked, believe it or not to what was the border with China and collected specimens and sent them back to Saigon. He was an amazing person. He had about nine kids, five of which were born in his 60s, one of which was Felix Poilane, who's mother gave birth to him at Khe Sanh alone because her husband, Eugene, was out collecting botanical specimens. He realized that the Bru weren't reliable or capable of doing the coffee plantation work, so he imported Vietnamese which was very odd that the Vietnamese would come into that area, but they did. And eventually there were about 1200 Vietnamese in Khe Sanh village.

There was also a position about 500 meters to the east which we called "The Old French Fort."

Stubbe: Huong Hoa, which I believe is Vietnamese for "beautiful flower." "Khe Sanh," by the way, is Vietnamese. "Khe" is Vietnamese for "stream," and "san"—it should be pronounced "schan," because it's S-A-N-H, and "san," which would be X-A-N means "green." "Schan"—I'm not sure what that means right now. But the Marines mispronounced it as "Khe San" and everyone else pronounced it as "Khe San;" it should be pronounced as "Khe Schan." But "Khe Sanh" literally means "green stream."

Kurtz: Was there a green stream?

Stubbe: There was a green stream, and it was full of arsenic as a matter of fact. [According to] a geology report of the 1930s indicated it was full of arsenic, probably because of the volcanic [activity]. But it became sort of a metaphor in my mind, anyway of the stream of green uniformed people—both North Vietnamese and Americans wore green uniforms and streamed into the area.

By the way, I think I should mention that Khe Sanh sat on top of an extinct volcano. And that's why the soil was red. It was weathered—what we call "laterite" soil. The highest geographical point, quite a ways to the north, was a mountain called "Tiger Tooth," or "Dong Voi Mep." I think it was, like 1371—I may be wrong. It was part of this geological movement of land masses. It moved southward, and as it moved about 10,000 years ago there's an arc of five volcanoes that formed, one of which was Khe Sanh. Another one is Gio Linh, which people recognize.

Kurtz: Was Tiger Tooth a volcano too?

Stubbe: No, it was a big granite mountain that crashed into this area and caused these eruptions of these five volcanoes. The other one, close to the Lao border is called A Dua Ap. And there were two others with odd names that no one would recognize.

This is sort of interesting because before the siege the Marines realized their water source was outside the combat base at the Rao Quan River to the north of us and that we were very vulnerable to loss of water if the North Vietnamese ever decided to either poison it or restrict our little pipeline that went out there to collect the water. So they thought of drilling wells. They weren't familiar with the fact that we sat on an extinct volcano! Obviously they couldn't of dug a well to find water underneath us; they'd find lava! So that is geologically significant. It was another metaphor—that the place was formed in violence—the clash of these land masses and then the volcano—that the place was born in violence. And I guess despite however beautiful the area was, people would still kind of feel: there's something not right about this place. In fact, the name on the tactical map lists the place as "Xom Cham," "Xom" is the word for "village" and the Chams were violent, sea pirates that lived along the coastline to the east, which developed an artistic phase. There was a Cham Museum in DaNang which had these sculptures like from India, big sculptures. And possibly, when the Vietnamese conquered them, they moved further into the hills. Most of them moved southward. But it's possible there was a village of Chams on what became the Khe Sanh airstrip. At least it's indicated on the map as "Xom Cham," which would also indicate that it was a place of violent people.

Kurtz: Why don't we talk about the Special Forces camp, Lang Vei.

Stubbe: OK. Lang Vei. Originally the Special Forces occupied Khe Sanh in 1962, the summer, because General Taylor from the Kennedy administration, early Johnson administration, had sent a team consisting General Taylor to scope out the situation, and he determined that Vietnam could not be held unless we plugged up what he called the "porous border." By "porous" he meant that although there were these tremendous mountains of the Annamite Chain, there were these passes, such as the one near Khe Sanh, the D'Ai Lao, that unless we could plug those up, the North Vietnamese would just come down Laos, which they did in the Ho Chi Minh Trail network later on—which was formed by a thing called "Group 558," which is designated such because it was started in May of '58, 5/58—just an interesting historical aside, trivia matter here.

Kurtz: But it wasn't in Vietnam in '58?

Stubbe: No, no. But Khe Sanh was one of the first legs that it went into. So, General Maxwell Taylor determined that the porous border had to be plugged or Vietnam could not be held. Because of that they sent Special Forces over, which were then part of the CIA, and the Special Forces arrived in Khe Sanh in the summer of '62 and occupied the Old French Fort position. And around, I believe 1964—I may be wrong about that, but it's in my *Battalion of Kings* book, a Vietnamese engineering outfit upgraded the old Khe Sanh—what eventually became Khe Sanh Combat Base, and placed pierced steel plate, PSP, matting, which is steel with big, maybe 2 ½, 3-inch holes, and then the Special Forces moved to that place and built several concrete bunkers which the Marines later on always referred to as old French bunkers, such as the 26th Marines' operational center, the Command Operations Center they always said was an old French bunker but it really wasn't; it was an old Special Forces bunker. And the Special Forces stayed there until October, November, '66, when General Westmoreland thought that the North Vietnamese were gathering in considerable strength and might have an influx in that area, which they did later in '72, but the Marines thought otherwise and didn't want to go to Khe Sanh. But to comply with General

Westmoreland's wishes, they sent a battalion up to Khe Sanh in the last part of October of '/66, which was battalion 1/3, First Battalion, Third Marine Regiment. Lieutenant Colonel Peter Wickwire was the Commander at the time.

The Special Forces and the Marines—it was like "oil and water;" they didn't tell each other what they were doing. It came to a head in December of '66 when the Marines said: Tell us what you're doing, patrols, and they said, No, we can't; we're secret, top secret. And the Marines said, We saw a Vietnamese unit outside our wires and we didn't fire on them because we thought they were yours, and the Special Forces said: No, they weren't ours. And the Marines said: In the future, if we see any indigenous people in the area, we will fire on them. And the Special Forces said: Well, we can't live under those circumstances. So they moved out to an old ARVN base called Lang Vei with the stipulation that the structures they had built on Khe Sanh Camp would be maintained and not be demolished by the Marines, because they fully intended to come back, to return to that area. They thought the Marines would only be there for a short while. But in fact, the Special Forces went out to Lang Vei and the ARVN which were there at the time displaced to the Old French Fort. I think it was the 2nd ARVN Regiment, if I'm not mistaken; it's in *Battalion of Kings* also. The Army built up the place. It was a Detachment A-101 in '66 and starting of '67. And a major thing happened in early '67 in March, the village of Lang Vei was accidentally struck by Air Force planes which bombed and created mass casualties. The explanation—I won't go into—why that happened is explained in the *Battalion of Kings* book in that section on that date.

Several of our Marine recon teams also experienced major contacts in late January and February of '67. The accidental bombing of Lang Vei village became the occasion for the sending of a MACV Advisory Team to Khe Sanh village. A fellow by the name of Major Whitenack arrived with three other Army personnel. There was a Sergeant First Class Perry, a Sergeant First Class Humphrey, and I can't recall the fourth person. Perry was the medic, and they operated in Khe Sanh village at the District Headquarters, there.

Also about that time there was a small American 2-man group called the Joint Technical Advisory Detachment, which was part of some Military Intelligence Group—512 or something like that. They would use "turned-around" North Vietnamese to do very deep, long-range reconnaissance of the area.

Then about the same time also there was a Marine unit called Combined Action Company OSCAR which formed, and their headquarters also was in Khe Sanh village. They consisted of 47 (I guess) Marines arranged into three platoons, CAPs, Combined Action Platoons, two of which were at Khe Sanh village, one at the western edge, one at the District Headquarters, and the Third Platoon was just outside Khe Sanh Combat Base.

The Special Forces at Lang Vei during the Battle of the Hills on the 4th of May were overrun, probably as a diversionary force to draw attention away from the battles in the hills. The Commanding Officer and the Executive Officer [were killed]. What happened was: the North Vietnamese had sent three or four agents posing as Vietnamese recruits for their indigenous force, and on the 4th of May had bayoneted or killed by knife the sentries guarding the perimeter of Lang Vei and then permitted an invasion force to overrun the place. There were several American survivors, including Bill STEPTOE, who survived who since has died, but who described for me the whole scenario, also in the *Battalion of Kings* book. The Special Forces remained at Lang Vei. In fact they upgraded—they realized that area of Lang Vei was probably not as defensible as it should be, and so established a new Camp Lang Vei about 2,000 meters further west. And I remember visiting the place while they were constructing it in November of '67, and the Commanding Officer at the time—his name was Frank Willoughby described for me, proudly, how there was going to be an inner perimeter in which no Vietnamese were allowed, just Americans, to prevent a repetition of that 4th of May incident.

Kurtz: Did you have any thoughts about that: we were there to help the Vietnamese and we couldn't let them in our—.

Stubbe: Yes, we were there to help them, and this became an issue, quite frankly, a big issue later on, too. But no. I think it was just a matter—we just—even the Army people who worked with them. Special Forces, of course, is a 12-man team, typically to develop a regimental-size indigenous force. The camp really belonged to the Vietnamese; it was not am American—Lang Vei was not an American Special Forces camp. Some people mistake it was. It was a Vietnamese camp, and the Americans were there as advisors. So they developed this new camp Lang Vei, and they spent over a million dollars developing this new camp. Captain Willoughby, in addition to the inner perimeter and outer perimeter, had cleared a huge field of fire, sloping over a click—over a thousand meters, and he proudly said, "We can take over a regiment assaulting us." He had no qualms about the fact that it was a completely defensible position. Of course, they didn't think of tanks, which is what happened.

So they developed that place and they kept the old Lang Vei. It was just there. It was further east.

So the area at the opening of the siege: we had Lang Vei, the new Lang Vei, we had an old Lang Vei. They were reinforced with a Mobile Support Group. We had Khe Sanh village. We had Hill 881-South, Hill 861, Hill 950, of course Khe Sanh

Combat Base itself. We had the Marine Combined Action Company OSCAR, which was mainly in Khe Sanh village but had one platoon just outside the main gate of the Khe Sanh Combat Base. As the siege started, we also had not only 26th Marine Regiment—. Now I have to say, 26th Marine Regiment staff was only half of a staff because MACV had a ceiling on how many Marines could be in Vietnam. So we had a unit called 9th Marine Amphibious Brigade, 9th MAB, in Okinawa, and 26th Marine Regiment was in Okinawa—at least half of it was. And then 26th Marine Regiment (Forward) was at Khe Sanh. And the Commanding Officer of 26th Marine Regiment was at Khe Sanh with the Executive Officer. But he had no Sergeant Major. The Sergeant Major was on Okinawa. And indeed half of the staff was on Okinawa as the Siege began. We also, as the Siege began, had the 1st Battalion, 26th Marines which had been there since the end of the Battle of the Hills. They arrived in May of '67. And then around early June of '67 there were some major contacts, Hill 950 was almost overrun and there were some other major contacts, so they brought in 3rd Battalion, 26th Marines, which arrived in early June of '67, and were there until about August, maybe September, '67, when they left to go to Con Thien as part of Operation KINGFISHER, leaving only 1st Battalion, 26th Marines. At that time I was the only Chaplain there; the 3/26 Chaplain, John McElroy, had left, and then they brought in a Chaplain to replace him who was there at Khe Sanh, part of Sub Unit 5 of 3rd Marine Division [Walt Driscoll].

So starting in September, when the monsoons came, 1st Battalion, 26th Marines, was the only battalion, the only infantry unit, there. And then signals intelligence started to pick up indications that the North Vietnamese were moving in again. And I remember I was on Hill 881-South on Marine Corps Birthday, 10 November of '67 and Colonel Lownds landed and got us all together, and I'll never forget his words; it will stick with me forever. He said, "You all soon will be in the American history books." Not too many people commented on that or caught it, but I certainly did. I wrote it in my diary. And indeed, signals intelligence—he didn't say that, obviously; that was Top Secret—had determined that we would be a target. So it became [a problem of] how do we reinforce without letting the North Vietnamese know we're reinforcing. Colonel Lownds mentioned that in his Debrief at FMFPAC.

So they brought 3/26 back to Khe Sanh in mid-December of '67 and as the Siege opened, 3/26 companies defended Hill 881-South—INDIA Company was up there, and then Hill 861 was defended by KILO Company. These two companies relieved 1/26 companies which then went back to the Combat Base to man the perimeter itself.

Kurtz: So there were two battalions at the start of—?

Stubbe: Well, actually one more battalion arrived about the 16th of January. The siege started on the 21st. On the 16th or 17th of January, 2/26, arrived. So it was the first time since Iwo Jima in World War II that the 26th Marine Regiment was together with all battalions in combat, minus half of its staff.

Kurtz: Was that good or bad, not having the other half of the staff?

Stubbe: Well, it was very bad, actually because we didn't have all the operations people, the intelligence people, logistics people that we should have had. But 3rd Marine Division, General Tompkins—his full name is Rathvon McClure Tompkins—sent up an augmentation of 3rd Marine Division officers to augment the abbreviated 26th Marines staff. In fact, they sent up just the right people. They sent up really top notch people who I can comment on later.

Kurtz: Was that the Third Marine Division?

Stubbe: Third Marine Division, yes. They became known as Sub Unit Three, these people that came up. As a Chaplain I have to say—these are matters of faith, I guess—in other words, I'm seeing things that I cannot prove, but which to me are very evident. The fact that just the right people arrived there, and they were such a small group of people, surrounded by 40,000 North Vietnamese, to me—and the fact that we took so few casualties throughout the siege—I mean, they were significant—more significant than the official amount. Still, we took less than we probably should have.

Kurtz: So there were two Chaplains there?

Stubbe: At that time each battalion had a Chaplain. Now 3/26, the headquarters was—.

Kurtz: When the tape ran out, you were talking about the west side defenses of the combat base.

Stubbe: Yes. I was talking, basically, about the Chaplains and the units. 3/26 Headquarters was—and 2/26 Headquarters, both of them were on the western edge of the perimeter which was known as the "Red Sector." In that area was also the 1st Provisional 155 millimeter howitzers, and I guess that was about it. The rest of 3/26: LIMA Company was also with them, protecting their battalion headquarters, I guess. And INDIA Company, Bill Dabney [Commanding], who is the brother-in-law of "Chesty" Puller, was on Hill 881-South. And Captain Jasper was on H ill 861 with KILO Company. And on the 20th of January, the day before the siege began, Bill Dabney had sent India Company northwards to Hill 881-North, suspecting that there were enemy there and ran into a huge contact there in which he lost two of his platoon commanders, both of which received Navy Crosses for their heroism—Lieutenant Brindley and Lieutenant Thomas, and that's discussed fully in the *Battalion of Kings* book. While this was happening, a North Vietnamese Lieutenant, named Tonc, T-O-N-C, who was with the 14th Anti-Aircraft Artillery Company, surrendered on the base and disclosed the entire battle plan of the North Vietnamese for Khe Sanh Combat Base. And also at the same time, John Miller, the Wycliffe Bible Translator in Khe Sanh Village, who had left in early January because he was told by Colonel Lownds that the North Vietnamese were coming, and he said, "Well, I have a conference to attend in Saigon anyway, so he went with his wife and family—they sent their kids there. But he came back up [to Khe Sanh Combat Base] on the 20th of January to get his Bru helper who helped with the translation, to rescue him, and Colonel Lownds was very angry with him for doing that. But he managed to get back to Saigon with his Bru helper. And Lieutenant Tonc was disclosing what the North Vietnamese planned to do. Basically what they planned to do was hit the western edge of the combat base so that the Marines would focus there, but this was a diversion, and the main force would come up from the Khe Sanh village area, Route 9, and overrun the base. That was their main battle plan. So Colonel Lownds told Captain Dabney to cease his assault of Hill 881-North and couldn't disclose over the radio why, and the Marines were very unhappy because they had gained the momentum, and they felt they could take Hill 881-North. Nevertheless, they came back.

But while they were doing this, Lieutenant Colonel Alderman, who was the Commanding Officer of 3/26, had sent two platoons of MIKE Company to Hill 881-South to man the perimeter while INDIA Company was in the assault. And when INDIA Company returned to 881-South, these two platoons of MIKE Company manned the perimeter of the western portion of Hill 881. Hill 881-South had a main position and then there was a little trail, and then there was a western section. We called it "the finger," but it was more than a finger. It was half as large as the main part, and that's where these two platoons of MIKE Company manned. And the other platoon was with LIMA Company on the Combat Base.

Kurtz: How many MIKE Company personnel were at Khe Sanh? [Kurtz may here be confusing a "MIKE Company" of Special Forces, which is a different organization]

Stubbe: It was the whole company.

Kurtz: OK, and what is a MIKE Company?

Stubbe: Yeah, a battalion is about 1200 Marines, a letter company is about 250 Marines.

Kurtz: This was MIKE Company of Marines?

Stubbe: O, yes, yes. I might say that unlike the Army, the Marines are very simple about how they designate units. Each battalion had four line companies, or infantry companies. And the 1st Battalion was always A, B, C, and D [Companies], ALFA, BRAVO, CHARLIE, and DELTA. The Second Battalion was always E, F, G, and H—ECHO, FOX, GOLF, and HOTEL. The Third battalion was always I, L, K, and M—they skipped JULIETTE—it was too feminine for the Marines. Now the 3rd Division had 3rd Marine Regiment, 4th Marine Regiment, and 9th Marine Regiment. That's where it gets more like the Army—odd numbers they picked out of nowhere. The 1st Marine Division had 1st Marines, 5th Marines, and 7th Marines. We always call them "Marines," and it's Marine Regiment. Each Marine Company is divided into platoons of about 50 or so [men], and then there's a Weapons Platoon of battalion which has 106 recoilless [rifles], 3.5-inch rockets, and .50 caliber machineguns, and these are distributed among the platoons. That's the organizational structure. So MIKE Company is a company of Marines, not like "MIKE FORCE" with Special Forces, which is—

Kurtz: OK, that's what I wanted to clarify, that you were not talking about the Mike Force people.

Stubbe: Correct. And then 2/26: the rear was in the western perimeter, but their main CP and all their companies were at a hill position guarding a valley approach from the northwest of Khe Sanh, and they were at a Hill 552, except for one company, ECHO Company, which moved out towards Hill 861—there was a little knob. From Hill 861 you couldn't look directly at 552, there was an obstruction of a little knob of a hill, and so ECHO Company occupied this little knob and it was designated Hill 861-ALFA, and that was ECHO Company, Captain Breeding was the CO.

So that's sort of the situation at the time.

Kurtz: Were there any aircraft—.

Stubbe: O, I wanted to say also that we had very few underground bunkers and trenches built, and the reason for that is that we were just emerging from the monsoons which had struck us the beginning of September. They were supposed to last into January, but fortunately didn't. The monsoon rains had washed out any underground bunkers on the base and on the hills, and trenches, so everything was built above ground. And so when the siege started and we had another force—we had another company, maybe 250 of reporters that suddenly descended upon us—criticized the Marines for not digging in, and very unjustly, because although we had tried to, we couldn't. And that was one of the situations that we really hadn't hardened our defenses..

Kurtz: Was this perimeter—did it include the whole airfield?

Stubbe: Yes. Well, actually it was even more. The northern part of the perimeter, north of the airstrip, known as the Blue Sector, was not as quite well developed, and there the trench was only, probably, three foot deep. I know, because I was all over the base, and that was one area where there were snipers from that hill range to the north and our water point was out of that area. So running in that area—sometimes in that area there was mortars and snipers and it didn't feel too safe. But they rapidly developed—. Also in that Blue Sector was an Army unit consisting of quad 50s and what we called "Dusters." Dusters were (for me) an odd unit: they fired Naval 40 millimeter ammunition, which were Navy guns which were on Navy ships as anti-aircraft, but it was interesting to me because it was Naval munitions and guns, mounted on Army vehicles, on a Marine Corps base. And they were mainly anti-aircraft because we were afraid the North Vietnamese would fly down MIGs. And they had been there since the Battle of the Hills. I think they arrived in May of '67. And the Quad-50s are four .50 caliber machineguns. They were in what we called the Blue Sector. The western area was LIMA Company, a platoon of MIKE Company, 1st Provisional 155s, and the CP of 3/26 and the rear of 2/26, was known as the Red Sector. Then moving southwards is the main entrance to the Combat Base, outside of which was CAP OSCAR-3, and then moving eastward was what we called FOB-3 perimeter, which was almost like a separate camp, manned by the Army FOB-3 plus the Marine CAC when it evacuated from Khe Sanh village when the battle opened. I say it's a separate perimeter because we had Marine guns pointed into—our perimeter continued, known as the Gray Sector and the Gray Alfa Sector moving eastward, manned by Bravo, 1/26, and then moving northwards around the end of the perimeter towards the end of the airstrip, continued Bravo.

The 37th ARVN Ranger Battalion arrived the end of January, and they had another line just east of our Bravo, our Gray Sector, so we actually had like two perimeters. Again, it was distrust of the indigenous people that we had them separate. In fact, our perimeter could fire at them and could fire into FOB-3 because they had a huge amount—they had the Bru who had been in Khe Sanh Village, they had the Vietnamese CIDG, they had Cambodians and some of the Special Forces were very angry that we had guns pointed into their camp. But Colonel Lownds had determined, from the example of Lang Vei being overrun the 4th of May that you just can't trust local, indigenous people, so we had guns pointed into their camp. And then later on, on the 7th of February, when Lang Vei got overrun, along with their refugees, the Vietnamese, we had a huge amount of Laotians. I must backtrack—it's hard to know where to pick up these things and where to end with them. But on the 25th of January, a position known as Ban Houei Sane, which was just inside of Laos, and which was the site of the Royal Laotian Battalion known as BV-33, [for] which 26th Marines had responsibility to provide artillery support—which we never were able to but we had that responsibility—anyway, they were overrun by tanks on the 25th of January, which should have indicated to Lang Vei that tanks are in the area. The Air Force reported it to them. And when they were overrun—they were not just military; they were sort of like a National Guard: they had their wives and children and pigs and everything else with them. So they moved eastward to Lang Vei—took refuge at Lang Vei. So when Lang Vei was overrun on the 7th of February we had all these Laotians that were suddenly outside our gate at Khe Sanh Combat Base, and the FOB-3 soldiers wanted to let them in to evacuate them, and Ambassador Sullivan, who was in Vientienne, Laos, was like a bird on a hot tin roof: he was just so excited, agitated, that there were Laotians inside South Vietnam, that all these huge amount of news reporters would find that out, because Laos is supposed to be neutral, and having an armed force there [in Vietnam] just was—. So he sent this

message, which was an impossible directive: evacuate all these Laotians without letting the news media know they were there. How do you send in planes, with all these news media, with all these strange people with different uniforms? But they did effect that by evacuating them from FOB-3, which was a Top Secret base that news reporters were not allowed on, and sent them to DaNang and then from DaNang they went to Vietienne. There's some interesting stories about that whole thing, but that's all in *Battalion of Kings*.

So anyway, Colonel Lownds had made the decision not to allow them on the Combat Base, to evacuate them, because he didn't know if there were any assassins, intelligence agents, whatever.

Colonel Lownds made an awful lot of very painful decisions—as I look at it—I mean, he never told me. I talked with him many times—now he can't. I've met with him. I've talked with him, but he's very shy, he's very low key. He was then [during the siege] too. In fact, news reporters said, "This is like Dien Bien Phu," and he said, "Dien Bien Phu? What was that?" And they took it at face value that he was an oaf, that he was stupid, that we had incompetence there, when in fact he had thoroughly studied Dien Bien Phu. He even had a book [on that battle] near his cot in the bunker. But he was that kind of person. He was like Socrates: "Beauty? Well, tell me about beauty. I don't know anything about beauty—or truth." That's the way he was. But anyway, as I look back at it, he had to made some terribly painful decisions. One of which was not to reinforce Khe Sanh Village when it was being attacked and to evacuate the District Headquarters, the seat of government—the first seat of government to fall in South Vietnam, of tremendous propaganda value to the North Vietnamese. One of which was not to reinforce Lang Vei when it fell, which existing plans called for him to send one infantry company to them. He didn't do it. Another was not to admit refugee civilians onto the base for evacuation. Another was probably not to request reinforcements during the siege—which would have fallen right into the North Vietnamese plan of creating a situation in which they wanted reinforcements to come in so that they could kill the reinforcements.

Kurtz: Was that a good decision: not to bring reinforcements in?

Stubbe: O, very good, an excellent decision. In fact, I've had some of the North Vietnamese histories translated and they lament—they criticize themselves as to why their strategy of luring Americans failed. Some of our more liberal historians like my co-author, John Prados, in fact say, "O, we played into their hands: we did reinforce I Corps." Well, we may have reinforced I Corps, but we didn't reinforce Khe Sanh Combat Base. The point was not to reinforce, but to send in reinforcements which would be annihilated, and that was their main plan. That is why they attacked Khe Sanh Village, that is why they attacked Lang Vei, that was why they attacked recon teams—we would send in reinforcements and then they would try to get the people who were reinforcing, kill them off. It was always one of their main strategies, to cripple and then not really kill—like a man is out there shot, they don't kill him, they just let him out wounded, hoping that people would go out there trying to rescue him. They knew our psyche, that we will try to rescue people, whereas they wouldn't. But the main thing was to get the reinforcements. They plainly talk about this in some of their histories, that their plan was to draw-in US forces so that they could annihilate them. And we didn't fall into that trap. And they lament later on, or they try to analyze why that didn't happen.

Kurtz: Was that a positive or a negative morale factor for the people who were at Khe Sanh, that there were not reinforcements coming in?

Stubbe: It was negative. Well, it was negative and it was positive. It was negative in the sense—as I was walking around, a lot of the men—it was a common thing—"when are they going to relieve us? When are they going to send in more people?" We felt so isolated, especially when we knew tanks were—we were against tanks, we were against 40,000 people. We didn't know about electronic sensors. We didn't know about COFRAM munitions. These were all Top Secret. We just didn't know about that. We didn't know about signals intelligence. They didn't tell us. But on the other hand, it was sort of a source of pride. Even some of the reporters would say, "Well, they decided not to reinforce Khe Sanh, but General Giap didn't realize there were Marines there!" That [sort of thing].

Kurtz: Did they get replacements for casualties?

Stubbe: Yes, and they all arrived by helicopter basically.

Kurtz: In your mind was there adequate people there to do the job on the ground?

Stubbe: Well, we held. I think that was the main thing. Our strategy—General Tompkins' strategy—was a "set piece" battle. We would hold. We would adopt the North Vietnamese tactic of drawing in North Vietnamese, hold them, sort of like flies to flypaper—that's my metaphor—and then saturate the area with massive B-52 bombs and annihilate them. Westmoreland said: We will make a stand at Khe Sanh, rather than abandon it when we knew they were coming, because that way, all these forces that were coming wouldn't end up in the populated, eastern areas—Quang Tri, Dong Ha, which would be much more difficult to deal with, but we could put them in a relatively unpopulated area—Westmoreland called it "unpopulated"—he disregards the Bru—and hit them with these bombs. Now, in fact, we on the combat base thought we had it rough, and we did. There were people getting wounded. We evacuated 2500 wounded people, and Marines don't always evacuate people; if you get a broken arm, you don't get evacuated.

Kurtz: Out of how many Marines was there?

Stubbe: Well, there was probably less than 6,000, but that includes the hill outposts. On the base itself, maybe 4500.

Kurtz: So more than half the people there got evacuated?

Stubbe: Yeah, and got replaced. But we received—the base itself, the airstrip, not the hill outposts—was about half a mile wide and a mile and a half long, and we received an average of 300, 400 rounds a day of mainly rockets and artillery, a few mortars, a few recoilless rifles, and a high of 1300 rounds in one day. We were really plastered.

Kurtz: How effective were these rounds? What kind of casualties were you taking?

Stubbe: We evacuated 2500—that's in a statement by the head of the medical detachment [who] wrote an article about that and quoted that number. Officially there were 205 killed. By "officially" I mean in the 26th Marines Regiment After Action Report of the battle. And also in testimony before Congress, Colonel Lownds used that figure when they had a Sub-Committee that was trying to evaluate these sensors in November of 1971, and he quotes 205. However, if you count the official documents of the After Action Reports of the subordinate units. I'm talking about the battalions: 1/26, 2/26, 3/26, the artillery battalion 1/13, which had three batteries, Alfa, Bravo, and Charlie—that's the main units. And then we had all sorts of assorted units: we had a company of engineers, we had a company of recon, a company of Shore Party—who moved supplies, we had logistics people, we had medical people, we had air people, fuel people—we had all sorts of other people. If you count all of these casualties, as I have, by name, I come up with somewhere around 475 killed. Now even the official—getting back to the battalions—if you count all of them, you end up with about 260 or something like that. And the only way that I can explain discrepancy between the regiment and then if you could all the. [subordinate] battalions, is that it's possible they might not have included 1/9—

Kurtz: You were saying they might not have counted the casualties from 1/9. Were they actually at Khe Sanh?

Stubbe: Yes. They were in a position called "The Rock Quarry" which was a few hundred meters from the Red Sector, the western sector of Khe Sanh Combat Base, near FOB-3 in the Red Sector. We called it "the rock quarry" because that's where we blasted rock which was used by the SeaBees to refurbish the airstrip during the monsoons when portions of it washed out and they pulled up the air matting, put down this rock, and covered it with asphalt, and put down the air matting again. The rock acted as a drainage. Anyway, the rock quarry was manned by 1/9—which originally had intended to go to Hill 471, but because of the contact with that recon team NURSE, Colonel Lownds put them at the rock quarry, which was another approach to the base itself, which made good sense. And 1/9 lost sixty or so people killed, and so if you subtract that from the 260 or so, you arrive at about the 205 official. So military—at least in the Marine Corps, there's a thing called ADCON and OPCON: ADCON refers to administrative control and OPCON is operational control, and it may be that although 1/9 was under operational control, they may have considered 1/9 as ADCON to 9th Marine Regiment, rather than 26th Marine Regiment, and therefore the casualties, they thought, would be carried by 9th Marine Regiment rather than 26th Marine Regiment. I don't think—a more jaded or a more liberal historian might say, O, they're trying to cover up, make the casualties less, make it seem like it was less a horrible thing for us than it was. I really don't think so. I think it's simply a matter of accounting. They wouldn't count, for example, Marines that died after being evacuated but who had been wounded. They didn't count, for example, when a plane crashed on the 6th of March and all 47 [aboard] were killed while it was landing. They didn't count all the Army people—FOB-3 people—that got killed. And so on. It's a matter of who they count, and the [date of] the end of an

operation. Officially, SCOTLAND, which was the operation of the siege, ended the 31st of March, then it became Operation PEGASUS for 14 days, the first 14 days of April. For those of us who were still there, the battle was still raging, so for us who were there, to say that the Khe Sanh Siege ends was rather—.

Kurtz: What was your typical duty day like during the siege?

Stubbe: During the siege—the first day of the siege was a Sunday. It seemed like they always attacked on Sundays—several other times they were—.

Kurtz: Didn't they like your sermons, Ray?

Stubbe: They didn't like my sermons at all. They didn't want me to talk. They tried to silence me!

Kurtz: They weren't successful.

Stubbe: They were not successful. But I must say, on that day I just sort of wandered the base. I didn't hold any services that I recall. I helped dig out people. I helped carry dead people. But then after that it got into a thing where because of that ridge line to the north of us which we assumed had numerous spotters, that the word came out at briefings that we couldn't assemble more than six, seven people in a group at any one time for any reason because they would call in mortars. They had the whole base pretty well plotted.

Kurtz: That was anywhere on the base you couldn't have—?

Stubbe: Yes. That involved moving of supplies, it involves moving of casualties, no matter what. I mean, they just didn't want any groupings. Which to some degree affects Vietnam veterans generally, even those who were not at Khe Sanh. I mean, a lot of times, Vietnam veterans do not like crowds, and I think it gets to that point that one mortar round can get so many people, or be attacked. You like to be dispersed.

But anyway, so I couldn't hold normal church services; I'll put it that way. So I adopted this method of just hopping around from bunker to bunker, trench to trench, and sometimes in the open gathering five people, half a dozen, trying to prevent more from adding themselves to our group, saying: If there's more, I'll get to you later on. And I developed a very short worship service—probably the kind that everyone likes; it was probably less than ten minutes. I had an opening prayer of a sentence or two. I had a scripture lesson—if I recall at the time—I used the same one: it was Jesus calming the seas. And then I had a sermon which consisted of maybe one or two sentences, mainly about how we find ourselves in chaotic situations, destructive desperation, and uncertainties like the sea, and how God is nevertheless with us, and within this we can experience peace. That was my sermon. And then I would have a full communion service. I would have the blessing of the wine and wafers. I had a little chalice—a home visitation chalice that I would fill. Oddly enough, one time I would bless it, and I'm of the opinion I got to bless it all the time, and I was hoping they would take just a little sip, and I recall going to a recon unit, and the first one drank the whole thing. So I had to bless the whole bottle and then poured it. And then I had a short prayer and then the blessing. And that was it. And that was all within ten minutes. And then I'd stay with them and see how they were doing and listen to them.

Kurtz: I have a couple of questions about the service and then I want to go to what you were talking about. Did you change your message through the time of the siege?

Stubbe: Basically not, no, because it was all different people. It was so many different places. I had enough to do 15 or more of these a day, and I could do this for several weeks and not go back to the same place. But I would revisit places. Sometimes I would just have a short prayer without communion and without scripture. And sometimes it was just really bad, I would just hug the people or just be there. Sometimes we just wouldn't say anything but we would just be there with each other and then I'd go off to another.

Kurtz: What would the infantrymen say to you?

Stubbe: Well, it was mainly a joking kind of thing. They'd say—we'd have a rocket that would explode 15 feet away, which is pretty close, and they'd say: Gee, those are poor gunners! They don't know how to hit anything! That kind of thing. Or one guy would talk about how they were in a trench and they had buried a 55-gallon drum to act as their urinal and covered it with screen. And they were on top of the trench one time and they had incoming and they all jumped into the trench. And this one was jumping into the trench and at the last minute he realized he was going to jump into that drum of urine, quickly spread his legs and landed with one planted on either end! Things like that. Or they would talk—like a supply fellow talked about how he took refuge in a culvert along the road, and it was wet, full of water, while his friend, driving a forklift took refuge between two pallets of 155 ammunition. They joked about that, and then the one who was in the culvert emerged and he was covered from head to crotch and then one leg—one half of him was all red and the other was all green. And then they were laughing about that. Or they'd talk of acts of heroism, what they did, just sort of matter-of-factly. Like a corpsman at C Med would talk about how he was in a trench with casualties and a helicopter landed, and this one Marine just ran out to the helicopter with the Corpsman with his evacuation tag describing his wounds and date and stuff running after him trying to attach this tag. And then the Corpsman ran back to the trench and he's all out of breath and he'd say, "My casualty out-ran me!" And the casualty had a wounded leg! Or a recon fellow told how the scout dog ran into the helicopter and ran right up the ramp and through the helicopter and right in between the two pilots and was there and his handler went in to try to get him, and the dog snarled and couldn't do anything, and the dog left with the pilots, and the recon Marine said: That dog was smarter than any of us! That kind of thing. It was sort of a—. Or, one would describe a heroism thing, like one Marine told me one time how a pallet was being air-dropped, a heavy pallet, and because of the noise of the plane this Marine couldn't hear the other Marine shouting to get out of the way, and he ran like a football tackle and got him out of the way and he himself got crushed and killed, saving the other fellow. One time I stayed overnight in the trench in the perimeter. We were told: We were definitely going to be overrun, and my bunker was in the medical area, above ground, and it's safer to be underground, so there was a bunker near us in the CHARLIE Med area, which was the bunker that housed the 106 recoilless gun crew. And I stayed there, overnight. And I remember how nervous they all were. They had like two on and two off, manning the trench, and they all wanted to stay in the bunker, which at that time was an above-ground bunker, well, half above and somewhat below, maybe three foot below and the rest was above. But they all seemed like they wanted to be in the bunker all the time. It was like their womb. It was warm. They had a little candle. They were making coffee, I remember, in their little C-ration cups heated with C-4 explosive, which by the way makes very good heating, and even the ones who were on watch would come in and go out, and not realizing—I kept telling them that the trench out there is safer than the bunker because the bunker makes a target, and if we get hit, the whole thing's going to collapse and we're all going to get killed, whereas the trench is much safer. But anyway they were all in there. I stayed overnight there, and they kept coming and going. And one of them had a little 45 record player, and they were playing the Credence Clearwater version of "I Heard it on the Grapevine," which is a real nervous kind of thing. They played it over and over again, and I didn't get any sleep. But what impressed me was how nervous and full of energy. They must have been fearful. They didn't say they were fearful or act like they were fearful, except that they kept coming into the bunker and going out—their actions betrayed their fear.

And the reason I mention all of this is because two or three days later that particular bunker did take a direct hit and I think it was three people I had known there were all killed, one of which I saw in the trench reading a little Lutheran prayer book that I had distributed, literature. I came up from behind; he didn't know I was there. He was reading this prayer book, and I was just so impressed with this Marine reading this prayer book. One of the Marines—I helped—the C Med people and I rushed down there after it was hit, after the incoming let up, and I remember helping carry out one of the men who had no head. It was just strings coming out of where his neck was, and it was—very devastating. I had no feeling then. We were all numb.

The men—The North Vietnamese in their histories talk about how demoralized we were. That was how they thought we were; they had no way of knowing, but they thought that all their incoming was making us very fearful and trembling and all that kind of stuff, which really wasn't [the case]. We're talking about 19, 20 year-olds who had this battlefield "gallows humor" that kept their sanity—that, and the fact—I think that most of us had already accepted the fact that we were going to die. No one said that. No one said that! But, as I look back at it, we acted that way. What I mean by that is that if someone were wounded out there, during incoming it was a common thing—just very common—for someone to run out during the incoming and drag him back to a trench or to a bunker, knowing full well that they could get killed or wounded in the process. But it wasn't even a consideration. I think once you pass this awareness, the conclusion, that you're going to die anyway, then you're free to do.

Kurtz: And almost you feel you might be better off if you died.

Stubbe: Yeah, almost—but we don't even think those things, we just—at that point we were just acting, we weren't thinking, we weren't talking about how we were feeling. But people would do odd things. For example, the area behind the mess hall that had all the food provisions was surrounded by barbed wire, all above ground, of course—no place to run for cover. And one day a fellow named Jack Corbett, who was with 81s of 1/26, weapons group there—as I was walking around suddenly came to me with a jar, a glass jar that was probably 18 inches high, maybe six, seven inches wide, filled with maraschino cherries, clear glass. And he gave me this thing. And I said, What's this? And he said, Well, it's for you. And I said: Well, I can't eat all these cherries! It's ridiculous. And he said, Well, give them out to the troops. Which I did. I saw him in a reunion in 1988, at Tampa, the first time we ever got together. They were honoring Khe Sanh, the 20th anniversary of the siege and General Westmoreland was the speaker, and Jack Corbett came up to me. He had a great big, bushy beard, and said, Do you remember me? I said: No. He said: Well, I'm Jack Corbett. You don't remember the name? I said: No. There were so many thousands! And he said: I'm the one that gave you that jar of maraschino cherries. I said: I know you! He said: I'm the cherry man. I said: I remember the incident perfectly. And he had gone into this area behind the messhall where there was no place for cover and he got this for me. And I said: Why did you do this? And he said: You looked so tired and haggard and I said I need to do something for the Chaplain. He risked his life—but he didn't think of risking his life—but we do strange things. When once you know you're going to die, you just do. And so he did. And I might say [that] I myself did exactly the same thing in the same area, went into the mess hall food supply area one time, to get an onion, because with my C-rations I wanted to have a little flavor with a raw onion. So I risked my life for an onion. I mean, I could have lost my life over an onion. But we did strange things. There's a famous picture of me holding church services in the northern, Blue Sector, of people bowed down [one with] "Chicago, Ill." In fact, I think the [Wisconsin Veterans] Museum is going to do a diorama of that in May or so. And it only struck me about five years ago—I looked at that picture. And there's a fellow named G. K. Chesterton, a Catholic fellow who wrote mysteries and literature about a century or so ago. He made a statement one time: Look at something long enough until it becomes strange to you, and then you're seeing it for the first time. I looked at that picture, and I "saw it for the first time!" I mean I'd seen it—that picture had been in many magazines and publications. It had been in *Life* magazine—Swanson's version of it, and the Marine version had been in many books and newspapers. Anyway, I saw it for the first time. I suddenly saw that I didn't have a helmet, and neither did any of the other guys. And the word—we were into the siege—it was the 28th of January or someplace around there—maybe a week into the siege, and about two weeks before the siege, the word had already gone out that no one could be walking around the combat base without a helmet on and their flak vest. So here I am, even into the siege, with all this incoming and walking around—running around, I should say—and there I am without a helmet. And it suddenly caught me that I was without a helmet, and I said: The only reason I was without a helmet was because in a church you take off your hat.

Kurtz: You had your helmet with you?

Stubbe: O, of course!

Kurtz: OK, so you weren't walking, so you weren't disobeying orders.

Stubbe: Exactly! But I was without my helmet. And then what really got me was: what if an incoming round had got one of those men, who probably took off their helmets because they saw me take off mine—and if they got a head wound or got killed, I mean the guilt that I would have had for the rest of my life over the loss of their life! Because all of them don't have helmets either! Which is—it's a snapshot in time of battle, the reality of battle, but yet it shows us without helmets, which is not the way it should be. There's something wrong there. It's very wrong. But it was the way it was. So we were without helmets. So there's another strange thing. There were many, many strange things that happened during the battle there.

For example, our water point was outside the—.

Kurtz: Was it ever played with by the North Vietnamese?

Stubbe: No, no, and we wonder why—I mean, oral history tapes, debriefs of Colonel Lownds and his operations officer shortly after the siege when they were being debriefed by the Fleet Marine Force, Pacific, in Hawaii and other places, would claim that as a great mystery. I sort of think that maybe they didn't do that because (a) they didn't think of it, (b) they might of used the same water because downstream they used the same water, obviously. And I think those are the reasons they probably didn't do it. But in any event, the water point was outside our wires. We did send out a patrol out there to examine it right after the siege began and the patrol lost one man. But, again, there was a pump out there and it was pumped on to the

base into a large rubber, like a silo, tanks. And because it was rubber, it was punctured many times by incoming, and so there were times we would go three, four days without water, which is very critical, because the human body can only go three or four days without water. And on Hill 950 they were without water for over ten days, and sent out a patrol to a little stream between 950 and 1015. Believe it or not, way on top of the mountain there were streams. There's an old geologic statement about Germany: if you want to get water, go up into the mountains. There was a spring up there, and they sent out a patrol, and the terrain there is so steep that you move around there by grabbing the top of one tree, chinny down the trunk, and then hit the top of the next tree, and chinny down that. That's how sharp the slopes are. And they went down there and there's a fellow named Corporal Birch who was killed while they were trying to do that. Fortunately the skies cleared and they were able to bring some water to 950. But we had actually considered mounting a platoon from Khe Sanh Combat Base to climb [to] Hill 950, with all that sharp—with water—just go get them water. But fortunately we didn't—3/26 S-4 had devised a method of using old 155 canisters, filling them with plastic bladders that was used in milk dispensers throughout Vietnam—filling that with water, putting them in 155 canisters and dropping them on the hills. There were all sorts of ingenious—people were really—like I say, We had just the right people. We had so few people. We had a Target Intelligence Officer, Mirza Baig, a Pakistani fellow whose father had established the Pakistani embassies in Canada and America, and whose grandfather—an illustrious family. Mirza himself was educated in Britain at [their] best schools and was a genius, and with the 3rd Marine Division G-2, was sent up there to Khe Sanh to augment our S-2 (because we had that abbreviated staff) and within a week, by observing electronic sensors, signals intelligence, and knowing how the North Vietnamese moved—their tactics—he had studied them. He had also ordered from the CIA all the things about Dien Bien Phu, about the tactics and everything else. He was just an amazing person, Baig was; he was only a Marine Captain. But within 7 to 10 days he had already plotted the artillery headquarters of the North Vietnamese and destroyed them. One place had—I don't know—secondary explosions for many hours later. He knew how they moved and what they did. People like that saved us. He himself by the way—we had just been seeded with these electronic sensors that were supposed to go along the Ho Chi Minh Trail in Laos and they diverted them: we were getting readings from them that would just indicate readings, a contact, a noise, a seismic reading from a truck moving nearby. Then we would get messages from their headquarters, which was in Thailand, at NKP, and we just—

Kurtz: We ran out of tape. We were talking about sensors. So could you continue with that, Ray, please.

Stubbe: These electronic sensors were—it was a very expensive project, I think over a billion dollars. And later on they [the Congress] had hearings on that and Colonel Lownds and some of those people testified about how effective they were at Khe Sanh. They were very effective.

But this fellow, Mirza Baig—we used to call him "Harry Baig"—he had a Boy Scout pack. He was very unconventional. He was a Pakistani Muslim. The Marines used to kid him about eating pork, and he'd say: Allah give special dispensation! And he always talked about "Infidels," and he had an odd accent, British trained. But anyway, without any manuals or anything else, on his own, he figured out how to read these electronic sensor reports, which had been going back to NKP, and then NKP would issue a message many hours later, and by that time, whoever was in the area was long since gone, and it was history. So he had them give us "real time" readings where we could read the sensors—at the bunkers he could get the readings. Now the sensors were of two types. There was a seismic type which would detect vibrations such as trucks moving, even troops moving. And then were the acoustic sensors which could actually pick up conversations. So he at first assumed that the sensors gave the location, like the seismic ones, of the target. In fact, these were the locations of the sensors, not the target. Then, with his knowledge of the North Vietnamese moved, in columns, in squads, he was fully familiar with North Vietnamese tactics of movement, he could determine how groups were moving, where they were moving, where their rear was, and all that kind of thing. So he, on his own, developed the methods of interpreting all the results of these sensor reports. And in fact, there were several times, one of which was the 29th of February—it was leap year that year—we had a regimental-size North Vietnamese unit approaching Khe Sanh Combat Base according to their old plan doing their major assault from the east, from Khe Sanh Village, from Route 9, and that whole regiment was coming up, and our sensors picked that up and we fired COFRAM, Controlled Fragmentation.

Kurtz: That's a type of ammunition.

Stubbe: M444—it's a 105 (also in other forms too). It sends out ping-pong size mini-grenades which in turn explode. It's an area clearing device. And in fact, we decimated that whole regiment, except for maybe ten or twelve North Vietnamese which managed to get to the lines of the 37th ARVN Rangers and then were killed there. So that particular sensor reading saved us. And there were sensors around the hills which also gave advanced warnings at different times for them. At one

time, when 881-South was probably going to be attacked on the 5th of February, 1968, and we sent out massive air-strikes which decimated that force. [*break in tape*] Picked up a large unit, maybe a regiment going to attack Hill 881-South and decimated them. The defenders of 881-South, Captain Dabney and his people were not even aware of this happening. This was on the 5th of February. Mirza Baig, testifying in this Congress Hearing in November of '71, he and Colonel Lownds and our Intelligence Officer, Jerry Hudson, were the three that testified on the effect of the sensors at Khe Sanh. He mentioned this, that to his self-criticism that part of the tactic that the North Vietnamese would also attack Hill 861, and at their jubilation in the command bunker at having gotten the movement sounds stopped coming toward 881-South, he hadn't to continue to think about 861, and in fact, Hill 861-Alfa, Captain Breeding, was attacked by a major assault, penetrating half of his position, almost overrunning it, but the Marines valiantly fought back and recaptured the position.

The conclusion of that Battlefield Sub-Committee—the report of that is in the collection that I donated to the [Wisconsin Veterans] Museum, concluded that these saved us. These were so effective. But it wasn't only the sensors that saved us, it was people like Captain Baig who could read and could interpret and use "real time". People like that—we seemed to have just the right people there. Like I say, as a Chaplain—maybe because of my perspective, I look at the G-1, the Personnel of Division sending people: we had just the right people at Khe Sanh. We had the heroic—people who didn't crack. We had hardly no one cracked up. I did see maybe two or three, which means that there were probably a few others. But there were very few. But we had people who—we had surgeons, who weren't qualified to do open heart surgery, but who did. These were like residents, who did amazing surgical feats. We had four doctors there. We had Mirza Baig. We had Colonel Lownds. We had our battalion commander. We had Earle Breeding, who valiantly fought off that assault on 861-Alfa. We had Bill Dabney—we had all these people—and the troopers in the field—the people who would go out and rescue people who were wounded and who didn't crack up. We had just the right people, and we all made it out of there, and I can't help but feel the hand of God in this. I say that openly, unashamedly. Despite our 475 killed and 2500 wounded, with 40,000 surrounding us, in a sense it's a miracle that any of us made it back alive. That any of us! We very well could have—with tanks against us, with everything else—isolation, fog in the morning, resupply rather tenuous, we were in a very difficult position and yet we emerged from it.

Kurtz: Well, let's just talk about a couple more things, and then I think, as we said before, we want to go into some detail on the air operations, the resupply, living conditions, and all of that. What was your view of how replacements were treated?

Stubbe: OK. We saw quite a few replacements, some of which, very sadly, died as they were arriving. I personally didn't see this, but I heard many instances where Marines would tell me they went to the airstrip when a plane was hit or a position near them was hit or even if their position was hit, and a Marine with stateside utilities, perfectly green, unstained, maybe even stateside boots, not the jungle boots, was killed. And these are people that hadn't been there a day—or less—had just arrived or maybe were just arriving. But for those who did arrive—you talk with veterans now, Vietnam of all services I think, and they will talk about how wary they were of "newbies"—newly arriving people, because they really didn't know how to behave in the field, they weren't aware of booby traps or how to look for enemy. There was always apprehension of new people, that they weren't fully assimilated into the situation.

But in our situation, which was a static battlefield situation, these people, new people, were immediately taken in, and oddly enough, for landing in sheer chaos, which must have been a psychically shocking thing—to land in all this devastation: no buildings, and incoming, and grubby people and smelly people, they fit right in. And basically what we were doing at the time, the daily activity of almost everyone, was filling sandbags, digging deeper trenches, digging bunkers that could not go underground now that the monsoons had let up, moving supplies, moving casualties—that was what most Marines did at this time. Senior Marines, Staff Sergeants and above, would be out, seeing how their people were, bring out all their supplies. We hardly got any mail, in or out. Like I say, water—we'd go without food maybe every three days—water every three days, food maybe one C-ration a day—we're supposed to get three, especially with all the stress and movement, we were burning up calories like you wouldn't believe. I might say I went from about 185 when I arrived and I think I was 137 when I left Khe Sanh.

Kurtz: And what are you today?

Stubbe: I'm back in the 180s.

Kurtz: How was the morale?

Stubbe: O, the morale, yes, OK, the morale was very, very good. As I mentioned before, a lot of the guys just joked around. They shared things. In addition to this heroic thing and joking thing, because we were so low on food and water, if someone were completely out of water, someone in the same bunker would give them their last drops of water. Or, we were so low on C-rations, they would share or give their last bits of C-ration. They would share their love letters from their girl friends. All this sort of thing. That's the kind of way these people were, like one recon Marine told me, one time—recon had lost so many people there during the siege, many more than they did out in the field and the reason was that recon was sandwiched between the airstrip and the regimental command bunker which were the main bulls-eye target, so they took over 70% casualties of their unit, which was a little over a hundred men—about 70% killed or wounded. But I remember Kevin Macaulay, who was a radioman there, telling me that the men he knew there—he says, "We're all richer for having known them, and we're better people." His statement is so true.

Kurtz: What was your experience in dealing with the feelings of people who were wounded before they were evacuated?

Stubbe: Yeah, there again, most of the wounded I saw, like at C-Med, maintained a real humor about that. I remember a fellow named Slaugenhaupt, who was with the Shore Party unit there, and he was on a stretcher moaning and groaning, he kept saying, "O, I lost everything! I lost everything!" I came up to him and said, "O, what did you lose?" Because a lot of the guys, because of incoming mortars hitting bunkers would lose photographs of their girl friend or family, or they'd lose their camera or record player—if they happened to have one—there were very few who did, or they would lose their clothes (which they had very few; what we had usually stayed on and rotted on us). So I thought maybe he'd lost his clothes or pictures or whatever else, and said, "Well, what did you lose?" Trying to talk to him—he didn't look that badly wounded. In fact I think it was him that I asked, "Well, where did they get you?" And he said, "O don't worry, Chaplain, they just got me in the ass!" So I said, "Well, what did you lose?" And he said, "Well, you know all those peanut butters and jellies that we get in our C-rations?" He said, "You know how we always save those things and don't eat them at the time, we put them aside?" He said, "I had a whole wooden ammo box full of C-ration peanut butters and jellies and the incoming round got all my peanut butters and jellies!" I said, "Well, what are you worrying about; you're leaving this place!" "O, I lost everything; I lost everything!" It was so funny; you couldn't help but laugh.

Sometimes it got serious. There was a fellow on a stretcher—I remember he asked me to say the 91st Psalm with him. And this is the first time I said the 91st Psalm that it had this particular meaning for me. The 91st Psalm—some people sing that now at Catholic funerals. It's "On Eagle's Wings." It's very familiar. If you go to a Catholic funeral you'll probably hear it. But it's "He who dwells in the shelter of the Most High will abide under the shadow of the Almighty. He will cover you with his wings and under his wings you shall find shelter. You shall not fear for the arrow that flies by day and the pestilence that walketh in noon day. A thousand shall fall at your side and ten thousand at your right hand." I started reading that—he asked me to read that to him, and it ends with "you shall not fear; I am with you." A very positive statement. But I started to think about the "arrow that flies by day" and I thought wow, those are the rockets. And "A thousand shall fall at thy side:" those are our friendly casualties, and "ten thousand at thy right hand," those are the enemy. And that Psalm took on—. And many years later I learned that that Psalm probably deals with the situation where the Babylonians.... [*note: this is incorrect; the Psalm is number 46*]. But anyway, he asked me to say the Psalm and hold his hand, so it was a very touching moment. There were some very tender times. But generally when people were wounded they had a humor about them.

There was one that a fellow related to me—I didn't see this myself, but I can believe it happened, where the Catholic Chaplain was giving Last Rites to a wounded fellow at C Med, and he sort of woke up, and said [*very loudly*], "Why are you doing this? I'm not going to die! Get away from me!" And with a few choice "f" words and other words, "I'm not dying!" and then he did. He just fell down and was dead. So there was that kind of determination. Determination, humor, youthfulness—those were the kind of things [I remember].

Kurtz: OK. Were there any people that you experienced that said, "Why am I here?"

Stubbe: No, no. I never did get that-p—. That kind of philosophical pondering—what do I want to say?—that human aspect of looking back, looking at yourself in that situation, a transcendent escape, a transcendent self-examination, looking at the situation and looking at oneself—which we all do—one of our human aspects of what we do—was not present. We were so much in the "now". By the way, that can obviously be a very good thing, especially if you're in a bad situation, but it can also be a very dampering thing if you're in a good situation, like if you're dancing with a girlfriend or you're seeing something beautiful and you say, "O, is this beautiful," or "O, is this a wonderful time," you're no longer in the situation; you're looking at

it from a distance. And that's what I'm doing now, what most Vietnam vets do, we can look at things from a distance of time and it's not probably as emotionally destructive or powerful. But at that time, I don't remember people reflecting.

Kurtz: Did you or the people there have any idea about what the rest of the world view of what was happening at Khe Sanh?

Stubbe: No. We really didn't, because like I say, we didn't get too much mail coming in.

Kurtz: Did you get *Stars & Stripes* ever?

Stubbe: Yes, We got that and also a thing called *Sea Tiger* which is a III MAF—III MAF being the senior Marine headquarters, in DaNang. We received their newspaper.

Kurtz: Did you get Armed Forces radio?

Stubbe: Some people did. Some people who had radios. And there were also MARS calls, where people could call home.

Kurtz: MARS is telephone service with ham radios.

Stubbe: Yes, you had to say "over" all the time.

Kurtz: Did the North Vietnamese throw any propaganda at you—with loud speakers?

Stubbe: Yes they did. Oddly enough—not with loud speakers, but with mortar shells with leaflets. And there were two instances of that, both of which happened after I left. They were both in March. They were by mortar shells that exploded and distributed leaflets.

Kurtz: Did they have any impact on anybody.

Stubbe: No. They were a humorous thing. I have some of them—I donated them. One was with Bertram Russell quotations.

Kurtz: What were the living conditions like?

Stubbe: Well—a few people did have showers. I found this out many years later—had buried showers in the trenches. But I would way that 99% of us lived in the same uniform.

Kurtz: For the whole siege?

Stubbe: For the whole siege, yeah. They were torn. They were full of sweat and oily—oils from our foreheads and everything else, crotches rotting out, covered with blood—sometimes I think they made them green because red doesn't show up except as a dark spot. In some cases, men reported after having left that the cloth actually became part of their skin because of the skin growing into the cloth. I didn't experience or see that myself. But I do know that when I left and went to Quang Tri—and I took baths in a little aluminum mount-out box—which I donated to the [Wisconsin Veterans] Museum, and I would say that for at least a month later on, when I would dry myself off with a towel, it looked like I was wiping another area of my body after defecation because the brown—was such a fine pigment that it would actually get inside the skin, and the skin maybe went over it—I don't know—but it kept rubbing off for weeks and weeks later on.

Kurtz: Where did you sleep? And how well did you sleep?

Stubbe: I slept in my bunker, in C Med, which was above ground, except for that one time that I was on the line—O, and there was another time when I slept in a below-ground bunker in C Med, but those were the only two times. And I think I just "zonked out."

Kurtz: And how long were you able to sleep?

Stubbe: It's hard to say. I don't know. I think I slept most of the night. It's hard to say when I went to sleep or when I woke up. I think I slept pretty soundly. The sounds of the incoming—because they kept plastering us at night—didn't really wake me up or anything.

Kurtz: Well, I think we're kind of at the end of the rope right here. I'm assuming we can come back one more time to talk about a few things.

Stubbe: Sure.

Kurtz: We're just going to wind her down right now.

Kurtz: We are continuing with our interview with Chaplain Ray Stubbe. Ray, it's a beautiful day, a lot warmer than the last time, and where we'd like to go today [*Note: Interview was conducted on 26 April 2006*] is to discuss some of the memorable people that were involved in the siege in Vietnam, the Marines or anybody else and also maybe just talk a little bit about the civilians that you met in the village. So why don't you start, and if you say something that's interesting, I'll ask you about it, but I'm sure that everything's going to be interesting. So go ahead.

Stubbe: Well, actually, when I think about Vietnam, it's the people that I think about more than the place. It's for that reason probably, I haven't returned to Vietnam as many have, because the people aren't there. I see them at reunions. I talk with them over the phone, or write letters back and forth, but really the people who were there—. [*interrupted by a telephone call; break in tape*].

We were talking about people. Like I say—the people who were there—when I think of Khe Sanh, the first thing I think of are the people who were there. Obviously the second thing would be the beauty, the coolness, that was the Garden of Eden aspect. And then maybe the third thing are the events and so on. But mainly, it's the people. We didn't have all that many people there, but we had just the right people. I'm talking about doctors, corpsmen, Privates, Lance Corporals, who were courageous—people who would dash out during incoming to drag in a buddy or give their last drops of water or food—was a common thing. I was all over the base and I would see these all the time. Or, leaders who knew what was happening and had a good grasp and who took care of their men. So, we had just the right people. As a Chaplain, I would have to say: This is not an accident. I see that, but everyone else might say: Well, it just happened that way, but for me, we had just the right people there. And then there were certain individuals that just stick out.

Kurtz: Could you share your views on a few of those individuals?

Stubbe: Yes. Well, the good Colonel, David Edward Lownds, for example. I didn't really get to know him all that well because he was one level above my Commanding Officer. My immediate Commanding Officer was Lieutenant Colonel James B. Wilkinson, who had command of the 1st Battalion, 26th Marines, or 1/26. But I did see Colonel Lownds quite frequently because I did go to the regimental briefings in the evening when I was on the base. And he was always one of these people that was very unassuming. He was not one that flaunted military orders or control around. He was very soft-spoken, had a good sense of humor about him all the time. I remember at one briefing he mentioned he went down to Phu Bai, which was where the Third Marine Division was at the time. This was probably around August, September of '67. And he would always remark about his time there as "The wonderful land of Buy!" And he went on in his comments: "They even had sidewalks!" They had these wooden pallet board walks. And he said, "They has flushing toilets!" He couldn't get over that. It was just amazing. And he said: "And they have air-conditioning in their hooches, but they'll never get it as cold as we have it at Khe Sanh here." And he always had that sense of humor about him, always. He was interested in the local people, in the local Bru tribe. He dressed up as Santa Claus, I remember, to give out gifts to the kids. He remarked in a debriefing he gave at the end of his tour—I remember listening to that tape—and he'd say how he visited in the Bru villages and came across this young boy that had carved out a wooden replica of a Huey in the sky, and it was amazingly detailed and proportioned, and he made the comment how these kids that are almost in the stone age, if they had had the proper education what marvelous contributions they might have made to society. He had a real heart for people, and he would also be the kind of person that would take walks by himself off the base, all around the surrounding area, much to the dismay of the intelligence officer, the S-2, and

also the Special Forces people who knew that he could have been captured or whatever. But he had been an Intelligence Officer, S-2, earlier in his career of a regiment, I think it was the 4th Marines, back in the 1950s, and so he had a need to know personally the area and how long it would take to get from one place to another and where likely ambushes would be.

Kurtz: When did he stop taking talks?

Stubbe: I guess, maybe the monsoons came in and it became very difficult to get out, around November. I remember him coming up on Hill 881-South on Marine Corps Birthday [10 November 1967]. The hill was socked in with fog. It was a miserable time, a lot of rain. It was cold. And somehow his chopper made it through. But what I remember about it is that our Colonel, our battalion Colonel, Colonel Wilkinson had us at attention in a formation, and then Colonel Lownds came up and had everyone stand at east and form an informal circle around him. And he said—this is November 10th, Marine Corps Birthday—and I remember he said at the time—and I put it in my diary so I know that this is accurate—he said, "You will all soon be in the American history books." And I remember at the time I thought this was very ominous, because people had been warning in the past—we had elections, we had monsoons, we had geographically close to Laos—there were many things. People had warned that we were going to be attacked. And it was sort of like yelling "Wolf!" After awhile we started disregarding these warnings—those of us who had been there for awhile. But when he said that—"You will all soon be in the American history books"—I took that as a real indication that things were not going to be too good in the future.

But he was always very sly. I remember during the initial part of the siege, we became besieged by "incoming" reporters, and they were all over the place. And Colonel Lownds had many things, obviously, on his mind to do, without giving time to talk with reporters. And he was always like Socrates. People would say, "Do you see this like Dien Bien Phu?" And he would say something—this is quoted in the news articles—he would say, "Tell me about that. I don't know much about Dien Bien Phu." And then—if you were to be in his bunker where he slept, you'd see Jules Roy book on Dien Bien Phu and a few other studies—the Third Marine Division had done a study on the similarities between Khe Sanh and Dien Bien Phu a whole year before, when they first sent up Marines. In September of '66 they sent up battalion 1/3, 1st Battalion, 3rd Marines, with Lieutenant Colonel Peter Wickwire, and at that time they did a very detailed study, about 30, 40 pages long on comparison of Khe Sanh and Dien Bien Phu, long before MACV did their study. But he knew. But he just wouldn't let it on that he knew. He was just very coy about those kind of things.

He was also a kind of person that, prior to coming to Khe Sanh, he had been with some nuclear command in New Mexico, a Defense Nuclear facility or something.

Kurtz: Does that mean anything in your mind, because had been some talk about using nuclear at Khe Sanh.

Stubbe: Right. But what I was going to say was that when he first—just before the siege erupted—he told me this later on—they had stockpiled a kind of munition there called COFRAM, C-O-F-R-A-M. I think I talked about that before, but just briefly, it's controlled fragmentation, or M444, or also known as "Firecracker." And these were classified Top Secret at the time, and were to be used—if they couldn't use nuclear weapons, as sort of a last measure weapon to destroy the hoards of Red Chinese like they had in Korea from overrunning places. It was an ultimate weapon. And what it was is basically bombs or artillery rounds that would send off little bomblets, ping pong size, which were like mini-grenades which would then explode over a larger area. It was an area device that would make a large area full of tens of thousands of pieces of shrapnel. It was first fired when the Special Forces camp at Lang Vei was being overrun by tanks. That was the first time it was ever fired in war. But anyway, Colonel Lownds was appraised of the fact they were stock-piling this COFRAM, and they wanted him to fill out something like 20 pages of documents for a security clearance for COFRAM. He said, Well, I just came from the Defense Nuclear facility and I have all these clearances, and they said, no, you need one for COFRAM also. And he said, I'm not about to fill out all these forms. I'm the Commanding Officer of this base and I will do as I see fit. They needed to stockpile them there and they needed it there, so they did. But he was that kind—he could be obstreperous, is what I'm getting at, with higher commands. And he was, by himself, the sole commander there. So he was a complex personality. He did a lot of things on his own. During the Siege, General Tompkins, the Third Marine Division Commander, came up almost daily, but I talked with Tompkins before he died, and Tompkins said he always let Colonel Lownds—Colonel Lownds was the commander there. He was just there to advise or to help or to bring assets that the Colonel probably couldn't get on his own, like B52s. So the good Colonel—and he had a handlebar moustache—that his wife forced him to shave off when he came home. And he himself—I saw his wife at a reunion, Jeanne—he only attended one of our reunions. That was at St. Louis. And his wife mentioned, while the Colonel was there during the siege that one of their children was at school, and their teacher—I think it was a daughter—this daughter's teacher sharply criticized, "Well, your father's one of these war mongers that kills children." And Jeanne didn't

know about this until many, many years later on. So even the Colonel's family was not exempt from the harassment that a lot of other Marines had as far as family members.

He was the kind of person who would be all over the base, checking on people. One of the Marines told me later on that he came into their area and saw that the Marine was wearing a shirt that had "Lownds" on it. This Marine told me, in fact, that he had gone to the regimental area where the Colonel had put out his laundry to dry, and had taken his shirt, because he needed it. Supplies for the Marines were just so scarce. And all the Colonel said was, "Well, I hope you didn't take my sox as well. Good work, Marine," and walked off. That's just the way he was. He didn't create any problems. He was all in favor of the trooper.

There were times—other Marines told me how he—during incoming come to the rescue of another Marine or help dig out or whatever and he just wouldn't run for cover himself. He was the kind of a person that was just one of the troops, so to speak.

Kurtz: Did he feel that he had enough men and equipment there? Did he ever express the need, the desire, to have more?

Stubbe: During the siege—I must say to my say to my self-criticism that I didn't go into the command bunker during the siege at all. I did go to our battalion command bunker quite frequently. Maybe I might have gone in once. But everything was so busy, and they were so involved in radios and so many things happening, I just didn't feel that I could do anything. It wasn't a time to just chat with people, see how they were doing. That was just impossible to do, so I didn't go there. So I quite frankly don't know how he was during the siege. I'm speaking mainly before the siege or what others have told me.

Kurtz: So now did he have nightly briefings during the siege?

Stubbe: No. I'm sure he must have had briefings as things happened. But before the siege it was always the evening, and then our battalion briefing was in the morning.

O, for example, just before the siege [at] one of the evening briefings, he said: Well, we've built up all our defenses. We have all our concertina out. We have fields of fire. We've got our supplies. He ticked off all the things about preparing our position for a battle. And he said: But now we need to concentrate on camouflage and deception. He said: So what I want you to do—. He had, at these evening briefings he had our battalion CO, but he had all the support companies, like supply, communications, recon, Seabees, medical, and all these different people. That's who attended these briefings, and I was there as the Chaplain—because I covered the whole base, not just my own battalion. And then, of course, his own staff officers. And then sometimes FOB-3, the Army Special Forces, would sent a representative. The Air Force had a representative. At this particular briefing he said we have to concentrate on deception. So he said: "Everyone knows where the regimental bunker is by all the antennas. I want you to set up false antennas throughout the base and build false bunkers"—as if we didn't have enough work to do to build our own bunkers—because we had a ridge line to the north of us where we just knew that there were enemy spotters that could call in mortars and so on. And he said: "Everyone will know where the regiment is, so I want to create more targets." Interestingly, my own Colonel, Colonel Wilkinson, at the morning briefing the morning after—also had a sense of humor—and he said "Well, the good Colonel said"—(we always called him "the good Colonel")—the good Colonel said we should do all these things." He said: "That will mean that instead of the regiment receiving fifty incoming rounds, the whole base will receive a thousand!" And that was to prove very prophetic, not because we erected all these—because we didn't have that much time: this was maybe three or four days before the siege erupted—so we didn't erect a lot of false antennas or false bunkers, but we did get the incoming, nevertheless.

But anyway, the people in charge there had this sense of humor. Colonel Lownds was that way. He was very soft-spoken, humorous, had the trooper in mind, knew all the terrain from having personally—one time the S-4 who was there, [Lieutenant] Colonel Freddie McEwan, (later became the CO of 1/26 after [Lieutenant] Colonel Wilkinson left—told me that just the two of them were out on a walk, down Route 9, and wanted to cross the river, and the two of them just crossed the river, swam across the river.

There was one time at Christmas, I remember, the S-2, Harper Bohr, was a Captain, I believe at the time, alter made Major. He and I walked, just the two of us—we're talking late December, after Christmas, late December of '67, at which time some of our recon teams were making contact close to the base with people getting killed, and also he was the S-2 so he knew from radio intercepts that the enemy was creeping up. I didn't know; he didn't share that, but I learned later on. So he must have known all these things. But his wife had sent him some things to give to the kids in Khe Sanh village—he was

going to give them to the missionary who was down there, John and Carolyn Miller—talk about two interesting people. So Harper Bohr and I walked down. It was a nice, sunny day, like it is now.

Kurtz: How far was this walk?

Stubbe: About three miles.

Kurtz: Three miles, and was it a road that you went?

Stubbe: No, no. We went through the Bru villages and up hill 471 which later became a huge battle scene, and then through another Bru village at the foot of Hill 471, called Brech, which is a Bru word for a thorny vine, and then walked into Khe Sanh village and visited the Millers, gave them the gifts, and then John Miller and the two of us walked back to the base. And Harper tells me to this day that the hairs on the back of his neck and the back of his spine just tingles when he thinks about how we could have been taken as POWs or whatever. He didn't even—he wasn't armed. John Miller was "tail end Charlie;" Harper was point, and I was in the center, and we just walked back through the hills to the base.

Kurtz: I assume you were not armed either?

Stubbe: Of course not, neither was John Miller. We had that sense, though—it was such a beautiful area, deceptively beautiful, like it was the Garden of Eden. And it was so peaceful. Peaceful, not only in the sense of a lack of turmoil and war—we had the sense of peace—our definition of peace is so shallow in the American language: we only think of the lack of war, or maybe lack of sound.

Kurtz: Was there any aircraft above you at all?

Stubbe: No. But what I'm getting at with peace—has a sense in the Hebrew language of "shalom" has a sense of blessing, of the opportunity for life to grow, it's a sense of the presence of God, of blessing. And that's what—when I say that Khe Sanh was "peaceful" that's what I really mean. It's not only the sense of a lack of war, but also a sense of the positive thing of abundance of life, of growth, of everything being so good. So that's what I mean by "peace." Anyway, there was this sense, and because of that we would do things like that.

Anyway, maybe that's enough about Colonel Lownds, but I'll get to Harper Bohr. Harper Bohr and I met when we came in country, the same day. We were at DaNang the same time.

Kurtz: How do you spell his name?

Stubbe: B-O-H-R, Danish fellow. Interestingly enough, he and his successor, a fellow by the name of Jerry Hudson, who was the S-2 during the siege, and also Earle Breeding, who was the Commanding Officer of Company E of 2/26, and he was on Hill 861-Alfa during the siege—those three Captains had been enlisted Sergeants under then Major Lownds when he was the S-2, like I say, I think of 4th Marine Regiment in the early 1950s, and they were now at Khe Sanh with him.

Earle Breeding tells me that when 2/26 arrived, and the officers all gathered in the bunker—they arrived on the 17th of January of '68, which was 4 days before the Siege, which erupted on the 21st. They were all in this bunker and Colonel Lownds was briefing them and the other officers were briefing them and then Colonel Lownds looked out and said, "And we will hold and we will win, won't we Captain Breeding?" And Breeding tells me that all the other officers of his battalion looked at him like "Who are you?" But Lownds had a good memory for that—something about Lownds again.

But anyway, Harper Bohr was one of the S-2 Scouts of Major Lownds at the time. And Harper Bohr had also been with Second Force Recon Company and was really into the recon business. He was one of the few Marines that had the gold jump wings.

Kurtz: What are gold jump wings?

Stubbe: Gold jump wings—you get the silver jump wings for five jumps, like everyone does—all services. And the Marine Corps says that if you do five more jumps, you get the gold wings, and usually only those in Force Recon, as opposed to

battalion recon, were able to go to Jump School to get—to get the extra five jumps later. (Anyway, I can get into Force Recon later on if you want).

Anyway, Harper Bohr—I met him in DaNang. I think I mentioned this in one of my prior tapes, but I'll just briefly say it: it got to be late and I was able to get out on a plane and get to Phu Bai and he decided to stay through the night and get the next Marine plane out—I took an Air Force plane. And then I met him in Khe Sanh about a week or so later when I arrived and I was surprised to see him there. He said that right after I left, within five minutes DaNang had taken this huge rocket attack which destroyed all sorts of planes, and he was telling how terrible it was, how exciting and how terrible and how frightening, and he said: You got out just in time. I endured that. He shared with me that at one time he was thinking of getting out of the Marine Corps and becoming a Lutheran minister. He was a very kind person, like Colonel Lownds and especially like my [Lieutenant] Colonel Wilkinson—just kindly people. Maybe I saw it that way. Maybe they reacted to me that way as a Chaplain; I am sure they were firm as Marines would be, when they needed to be firm. But Harper Bohr was a kindly person. Right before the Siege he left and became the Executive Officer of 3rd Recon Battalion at Quang Tri, and I got to see him down there later on and we had numerous chats.

Kurtz: Do you have an explanation why—obviously these are career Marines that you're describing as having a kind side, but yet Marines are—

Stubbe: We were talking about how Marines were kindly and yet Marines. I have the feeling—I mean I have no way of knowing; I'm just speculating off the top of my head. But I find—I've been boxing lately, and I haven't had much to do with athletic people, athletes in the past, high school, college, I was one of these "nerds," I wasn't a "jock." But I would say that athletes, generally speaking—there are some exceptions—are kind of mild people themselves, especially boxers. I've read this in fiction about boxers, have that tendency to be nice people. Maybe they've had some sense knocked into them; maybe they've had the evil knocked out of them. I don't know. After a good workout—anyone who does a lot of running or bicycling or whatever will know that all these endorphins, the pleasurable chemicals in the brain, and you just feel kind of weak, like a wet blotter, and you take a shower and you're just so relaxed and at peace. And I think Marines, having to go through such tough training and being tough, hand-to-hand combat, exercises and all that kind of thing—because of that also have that milder side of them come out because they don't have to prove themselves anymore. They can just be who they are. And I remember remarking about it at the time, so it's not just a reflection of an old codger who's about to turn 68. But I really felt this at the time that people who have gone through so much have a disposition that is much more tolerant of other people, and certainly of others who have gone through the same thing. So that generally, Marines are characters; they really are. Like recon people: you'd find people that would do things that you would not think they would do—mimic playing a flute or just having a lot of fun. And their comrades, not just simply putting up with it, but they themselves also doing funny antics. So these people were—and mainly enlisted troops were this way, too. And this helped them get through the siege—this sense of humor. I'd be in a bunker during a rocket attack—which is a very frightening thing—it's not only the explosions, but they make this screeching sound as they're flying in past you. It goes so fast and so loud. And these guys in the bunker would say: "Oh! These NVA are sure piss-poor aerial spotters to call in rounds—that one only landed ten feet away!" Which is pretty close! But they would just make jokes about it.

Or they'd tell me about one guy jumping in a trench—and they were digging this trench deeper and deeper because they didn't want to be outside to take a piss, you know. They put a 55-gallon drum out there with screening over it to keep the flies out, and that was what they called their "piss tube" or "pisser." So while they're filling sandbags they have this incoming and everyone jumps in the trench, and this one guy tells me: O, I just jumped in. At the last second I saw that I was going to fall right into this drum of piss and I just spread my legs at the last moment and planted one on either side of it! That kind of thing.

Or the Corpsman, right after the siege began—I think I've mentioned some of these things before, but I'll mention them again because they are so funny. This Corpsman—I'm still in the bunker, and [during the] initial attack, and the ammo dump is still cooking off, and we had this one casualty come in and a chopper had come in to take out casualties. And this one guy who had a wounded leg ran out to the chopper, and this Corpsman is running after him to put this medevac tag on him. And the Corpsman comes running back, panting, and says: "I couldn't get him! I couldn't get him! My casualty outran me!" He'd gotten in the chopper and couldn't put the tag on him and the chopper went off. The Doctor said: That's OK; they'll find out what's wrong with him when he lands. And here's the Marine with the wounded leg outrunning the Corpsman: he was motivated to get out of there!

Or, the Marine on the stretcher coming into C Med moaning and groaning. His name was SLAUGENHAUPT. I'll never forget it.. He's moaning and groaning on the stretcher saying: "I lost everything! I lost everything!" And I said, "What did you

loose?" I thought he'd lost his photographs that got burnt or maybe his clothing, or maybe he was fortunate enough to have a camera, or some of the guys were fortunate enough to have a 45 record players—very few, but some did, or a cassette player—people sent cassettes home—they weren't cassettes, they were reel-to-reel, 3-inch tape things. We called them "taped letters." The Post Office even had a special rate for these things. You could send them back and forth. The people who sent them out could send them free and the people sending them back—I think the rate was six cents. So anyway I said: "Is it any of this stuff?" He said, "No, No, Chaplain." In the C Rations we always had these little peanut butters and jellies, and he said: "I was saving all of these in a wooden ammo box and I had a huge stockpile of these things, and a round came in and it just destroyed all my goodies, all the things I saved up, all my treasures. O, I lost everything! I lost everything!" And he's moaning and groaning. He had sort of a smile on his face.

Another one came in and I said, "What happened to you?" And he said: "Oh, I'm OK, Chaplain, they just got me in the ass!"

Things like that: this is the way they were. This is the way the ordinary Marines were. I'm suddenly moving from Harper Bohr to ordinary Marines.

Kurtz: O, that's fine.

Stubbe: That's the kind of people we had. Getting back to Bohr—one of the briefings we had just before the siege erupted, it was kind of foggy, and I remember him saying, "O, maybe it's tonight, because the conditions are just so good for an attack." So obviously he was thinking of that. Harper had a thing, just like Colonel Lownds did about the local people, the children. He was just a very thoughtful person. He was at every one of my worship services [on the base] that I had.

Kurtz: Did he have to go down for his job into the village? Is that how he got to know the Bru?

Stubbe: Perhaps. During the week, I was normally out on the hill, spend a night and then go out on a patrol with a platoon, then go to the next hill, and in the evening, hold a worship service. I did this with the three hills: 950, 861, 881-South, and then for awhile we had a bridge site to the east of the base from which we sent patrols eastward down Route 9, and then I'd also go down to the Special Forces camp at Lang Vei and stay overnight there. And I'd also stay overnight at the CAP compound just outside the base. CAP is Combined Action Platoon, which is one of the three platoons of CAC, Combined Action Company, OSCAR, which was the only CAC unit in Vietnam that had Montagnards and Marines. A CAP would be maybe 12 or 14 Marines and maybe about 30 local people, and they would live together and train together and form a self-defense unit for that Bru village. All the rest of the Marine CACs were Vietnamese and Marines. But there were three of them at Khe Sanh. One of them was right outside the Combat Base and there was one in the village [of Khe Sanh] itself and then there was one on the western edge of the village.

Kurtz: How big was the village?

Stubbe: The village—well there were about 1200 Vietnamese in the village. In fact, that's what the census showed. It wasn't that large, but it was large enough. I'd say maybe about two to three city blocks long and all the Vietnamese were in that village; they weren't any other place. Whereas the Montagnards were not in the village: they were in little hamlets surrounding. There were probably eight or nine thousand Bru tribesmen.

I'd stay overnight at CAP OSCAR-3 on Sunday night. Normally I'd have church services Sunday three times on the base itself: one at the regimental mess hall, one at our battalion mess hall and one for the artillery people at the artillery headquarters on the western edge of the combat base, and then I'd go out to CAP OSCAR-3 for the evening. I'd hold services for them. There were only like ten, twelve men there. This was my R&R, so to speak, my weekly R&R after trudging the hills during the week. We'd play canasta there. I just enjoyed being out with the guys there. I still correspond with some of them.

Getting back to the people—I've talked about Colonel Lownds, Harper Bohr. I also met [Lieutenant] Colonel Wilkinson—James Bascom Wilkinson—.

Kurtz: Was he related to the guy that was with Aaron Burr, that General Wilkinson that—?

[Interview of 26 April 2006:]

Stubbe: He may be. He was from the South. I don't know. I met him at Camp Pendleton prior to going over, and he and I were in Staging [Battalion] together, although we didn't meet during the day. I think we only met once or twice, because I was separated from everyone else as a Chaplain and escorted around by a Sergeant Major who took me to different firing ranges and different places to learn about customs of the Vietnamese and everything like that.

Kurtz: Why were you segregated?

Stubbe: Well, they used to put Chaplains in with the Corpsmen as part of Field Medical Service School, but then they decided that was really oriented towards medical procedures and Chaplains really didn't need to know all of that. So I was one of the first ones—they were going to have a separate Chaplains Program where we would learn the customs of the Vietnamese and that sort of thing and get a little flavor of what the Marines did. In my particular case, I got more than a "flavor," because they would be doing, like, an exercise of a POW escaping and living on rice and that kind of thing. Or, they'd go through the infiltration course with barbed wire with live ammo going off over the head. And I went through that with them because I decided I needed to know what the Marines—how their life was. I just really knew that I had nothing to say to them unless I knew who they were, what they were facing, their fears, their joys, their whatever. So I decided I needed to do that and did. So anyway I met Colonel Wilkinson there, and he introduced himself, and then I saw him again at Khe Sanh when I arrived. He, again, was a real Southern gentlemen. In fact, some of the other officers now always refer to him as "Gentleman Jim."

He was a kind of—at a particular time I was due to go out to a hill, to Hill 881, I believe—I was going to hold church services. And the Marine choppers were not flying. But someone came to my bunker and said: "Hurry up, hurry up, get out to the other side of the airstrip, because the chopper is going to 881-South." I had this big metal ammo box full of little hymnals, Bibles, wine and wafers and everything else to take out there, plus my own change of sox and that kind of thing, C rations, and I was by myself—I didn't have an enlisted clerk. So I ran out there. It was dusty and hot—not really hot, but hot enough. It was early morning. There were no clouds and the sun was beating down. And I ran across the airstrip, panting, really exhausted at that time. And I sat there for about four hours, and I was just steaming. At the time went on I just became more and more angry. And no one had come, and it came time to eat lunch, and I just went over to eat lunch, and I went over to our little bunker where Colonel Wilkinson was at. It was a very small bunker: only he and the Sergeant Major could fit in there. But he was alone at the time. I walked down there. It was real small. I walked down there, just steaming, and I was about to vent my anger at having been told to be at this place. The Regiment had told me there was going to be an airplane—could he [Wilkinson] do something about getting me out to 881 and that kind of thing. Anyway I walked down the stairwell into there and upon seeing me, he said: "O Chaplain, isn't it a beautiful day! How good to see you!" He was just so full of positive—ebullience, you know—just overflowing with goodness, and he defused all my anger. I've used that as an example at times: it didn't stuff my anger, but it just got absorbed into something greater and positive. And so sure enough, I had my lunch. I didn't get angry. I told him what happened in a matter-of-fact way, and sure enough, after lunch I got out to 881. But that's the kind of person he was. And all during the siege, I know, he would be out with the troops, seeing how people were. He was just a very–. He later became the Executive Officer of Fourth Marine Regiment after the siege and was involved in some operations in the Khe Sanh area called ROBIN SOUTH and ROBIN NORTH in May and June of '68, and then he got out. He had like 18, 19 years' service, and he got out. And he told me at the time it was because his wife was having a series of heart attacks at the stress of him being over there. He got out of the Marine Corps without retiring—I'm sure he stayed in the Marine Reserve and retired. But that's just the kind of person he was. He had real integrity. And the next time I saw him was right after Vietnam I was assigned to the Recruit Depot at Parris Island [South Carolina], and he was at Hilton Head Island working for Merrill Lynch. Just being at Hilton Head Island says enough. He already was making good money. And we met and had a very enjoyable time together at lunch and then I kept track of him only through Christmas cards, basically. But he rose to become a national Vice President in Merrill Lynch, and then that was very stressful, and he eventually took a lesser job to become managing, I think, at Memphis, and then at Savannah. I think he became in charge of the Savannah—he was getting ready to retire. And then he retired back at Hilton Head. And his wife died and he remarried. And he's just a mild, unassuming person. I remember one time one of our Khe Sanh vets who became a millionaire through construction, and a very angry personality—so I won't mention his name—but he became like a burr, a thistle. And at that time our Khe Sanh vet group had—I'm talking about maybe ten years ago—had a fellow who had a mobile PX that went all over the country, a big truck, and sold all sorts of hats and T-shirts and everything else. I think he was just going through PTSD. He just needed to move around. He had a separate account. His books weren't all that good. And he also became involved in helping, assisting our reunions. And of course when you have a reunion, you always get "comp" rooms, and he would give them out to needy vets who really couldn't afford. Well, anyway, this fellow who became a millionaire just became incensed at the sloppy book

work, and who paid for this van, and who paid for the materials, and where was the money going, and who were getting these comp rooms, and why wasn't the organization getting the money? And he was actually going to sue not only this fellow but everyone who was on the Board of Directors and this Colonel Wilkinson was on the Board of Directors at the time along with the City Attorney of San Diego and some other people. And myself, too. For incompetence. And he was going to bring suit in like thirty different states, because we were all in different states, and because he had the money to do it. And he was at one of our reunions and he had these big legal-size folders with everyone's name prominently on them. And he put these all on the table with everyone—really intimidating. Because he had private investigators research everyone's finances and everything else. And just to bring it to the end of the story, nobody got sued. He just sort of disappeared. Things were dropped. But he told me he was going to go after Colonel Wilkinson. We had a break from the Board of Directors, and he showed me this thing. My name was there too, on a folder. And he opened up Wilkinson's and said: "I'm going after him because he's only worth fifty thousand dollars. And I said, "O, you'd better be careful because he was the Vice President of Merrill Lynch and he owns property on Hilton Head." "Well no, he's only worth fifty thousand. That's what his property is worth. He has this huge mortgage." So a few years later I saw the good Colonel and I talked with him and I mentioned this. And he sort of, "Well, you know, I had this mortgage for income tax purposes—and worth?: How about a little over three million." Very quietly, unassumingly. But Wilkinson—he was a man of real integrity, a real Southern gentleman, really cared for his troops, really grieved because he lost his Sergeant Major there, who had been a survivor of Corregidor in World War II, would have served anywhere [for his twilight cruise], Sergeant Major Gaynor, and Gaynor was hit by a round and died enroute while he was being medevaced. Colonel Wilkinson took that very, very hard.

Kurtz: Why don't you tell us about the guy you wrote the little pamphlet about.

Stubbe: Yeah, Major Baig. I never knew him during the siege. I only learned of him afterwards, because of several things. One was that he had written a very detailed, like twelve-page, single-spaced report of his activities during the siege. This report was done in connection with a book that came out by the Marine Corps by Moyers Shore, called *The Battle of Khe Sanh*. It came out in 1969. There was a sense of immediacy at the time to get it out and General Westmoreland was about to become Chief of Staff of the Army, and who knows what else—there were political reasons, I'm sure. Cushman was going to become head of the CIA or something like that. Because that book came out when it did, there were still some things that were classified that couldn't be mentioned, like the electronic sensors, the term "Arc Light" for B-52 strikes, and so on. So none of that is in that book. And it's only about 120 pages. Moyers Shore, by the way, was killed shortly after that in a plane accident off of Hawaii. He was a pilot. And his father had been an intelligence officer during World War II.

In the process of writing that book, they had solicited comments from Westmoreland from General Davidson, his J-2, from General Anderson who was head of Marine Air, from Walt, from Cushman—you name it—all the Generals who were involved, General Tolson, who led Operation PEGASUS, an Army General, a whole bunch of Colonels, Lieutenant Colonels, Majors, and Captain Baig, Major Baig at the time, wrote this report.

He was also mentioned frequently to me by other officers who knew him at the time. And so I decided—

Kurtz: And how did they mention this guy?

Stubbe: Very, very favorably. They mentioned him as—two things that stand out. One was that he was a genius, an absolute genius. His ability to hold many, many facts in his brain at the same time and come to rational conclusions amazed everyone. For example, there's a book that came out by Michael Archer called *A Patch of Ground* which is currently on sale which is based on his experiences as an enlisted communicator with the Regiment at Khe Sanh and also at the Khe Sanh village before the Siege. He knew Baig and he remarks in there how Baig was able, within the first week that he was there, to target and destroy major North Vietnamese ammo dumps and artillery headquarters

Stubbe: Targeting these North Vietnamese positions within a week of his arrival. And this just absolutely amazed this Michael Archer who wrote about this in his book.

Baig was mentioned by other people. For example, we had two different Army Liaison officers there, liaison for the 175 tubes out at Camp Carroll. There was a Doug Meredith and Swearengen: one succeeded the other. And both of them as well as our S-2 at the time, Jerry Hudson, who was a Captain and—at least those three people remember MIRZA MUNIR BAIG vividly and in the highest terms as a brilliant mind, a brilliant tactician. He came to us through Third Marine Division as a way of augmenting the regimental staff. You have to remember the 26th Marine Regimental staff was only half of a regimental staff. For example, Colonel Lownds didn't have a Sergeant Major the whole time he was there. Was a 26th Marines Forward,

which was at Khe Sanh and there was a 26th Marines rear which was at Okinawa, and 26th Marines regiment itself was a unit of 9th Marine Amphibious Brigade, 9th MAB—this is a little technical, but it's important. It doesn't get into the history books, but it explains a lot, whereas all the other Marines in Vietnam were part of Third Marine Amphibious Force, or III MAF, there were certain units, like our artillery unit, 1/13, First Battalion, 13th Marines, which was 9th MAB also. Occasionally before the Siege we would get inspectors from Okinawa who would arrive the end of one month and stay through the first of the next month to see how things were and do their inspections, but their timing was such that they could deduct two months on their income tax for "combat exclusion." I think for enlisted it was 100% of their pay; for officers it was up to five hundred a month that they could deduct, and also there were some other benefits, and also they would earn their Vietnam ribbon for having spent one minute in country.

Kurtz: Plus get their Combat Pay, too!

Stubbe: And Combat Pay—that's it. They'd also get Combat Pay. So it was always amazing to me. They did this several times while I was there—the end of one month, the beginning of the next month. It was so obvious, but if they got to be there anyway, why not take advantage of—I don't look at this very negatively; I think they're just using their brains. But anyway, 26th Marines had a reduced staff when the siege began, and that's why Mirza Munir Baig was sent down there to augment the intelligence staff along with a Major Robert Coolidge, who was the Special Intelligence Officer, who dealt with signals intelligence. Major Coolidge was only there a few days and then left, and Major Baig took over everything—well, I can't say took over everything. What he became was the Target Intelligence Officer, TIO, which is not a normal billet for a regiment. He was just such an amazing person. I'm talking from what I learned later. For example, there was a Major George Quamo, who was at FOB-3, doing a thing called "Special Projects." His Project was to develop a guerrilla force in Laos which would operate near the Red Chinese border, independently of everything, sort of an "Independent Regiment" like the British had, but it never got off, never got into its final stages. Major Quamo was frequently in Laos, and supplied Major Baig and Jerry Hudson with information about where different gathering, rally points, storage points, command headquarters, would be. He wouldn't say directly, "This is where it's at," but he'd say, "If you strike this area, you will undoubtedly get productive results." And this was very unusual for him to do because FOB-3 reported to its headquarters at DaNang and then to its headquarters in Saigon, and 26th Marines would then get a message back summarizing all the intelligence, but it would always be several days later which by that time was history, so Major Quamo took it on his own to put in a land line between his bunker to Major Baig so that he could get him all the intelligence that he was gathering. For example, he had translators that were on the North Vietnamese radio net and translated all that was happening on their radio nets, and would send that all to Major Baig. So Baig would find out who was talking to who, how often—do what they call a "pattern intelligence," which is one of the things that signals intelligence people do, so you can determine the command structure and find out from where they are talking so you can get locations, and that kind of thing.

I'm getting diverted here, but Baig had this ability to get all this information from people and encourage them to give him this information. Baig was also a person who had personal quirks. He was a Pakistani. He was kind of short. He had a Boy Scout pack that he had got through Sears & Roebuck. One of his uncles was very high in Sears Roebuck hierarchy. And I learned later on from an Army fellow whose last name was CESAR. He was out of MACV as a Science Consultant. He was at Khe Sanh a few times and he told me. And then there's an Army Major named Ford who contacted me one time. He did a very good book, scholarly book on Tet. He might be out now. He was in DESERT STORM in Iraq. He had contacted me a long time ago. He used to work for the National Security Agency, and managed to get declassified about an inch of documents and mentions in his book, quotes a fellow named George Allen, who worked at the CIA as SAVA, Special Assistant Vietnam Affairs—very high in the CIA. He used to brief the President. And through Ford, I managed to contact this George Allen and had several conversations with him, which are on those tapes which I donated to the Wisconsin Veterans Museum (which you might want to look up—very interesting conversations) because George Allen tells of his Navy time on (I think) Tinian, where he had to mop up all these dead Japanese bodies, and he went through a terrible things himself. Normally you hear only of these people in terms of their office and what they do, like at the CIA—you don't get their backgrounds, which are very interesting sometimes, at least worthy of a good footnote. Anyway, he put me in touch with George Allen, and George Allen was the one who told me that Baig afterwards, came to the CIA to brief him and an Army Major—he couldn't remember the Major's name, or maybe he didn't want to remember it—just the three of them. And he said: Here was this Marine Major standing apomb, just in his uniform, without any notes, and for about three or four hours held them enwrapped with his analysis of the Battle of Khe Sanh. And he said: "I'm a briefer. I brief the President. I know what briefings are about. But Baig was just so professional and did things so well. And he said: He's the one who asked me to send him all of what we had on Dien Bien

Phu—the maps and the unit dispositions and how the North Vietnamese tactics were and everything while he was at Khe Sanh.

And immediately it's clicking in my mind: How is this Marine Captain—how does he know who to contact, or how could he contact someone in the CIA with all this chain of command in between? But George Allen thought he was such a terrific young officer who was destined to become a General. So that was my conversation with George Allen, which, like I say, whoever might use this in the future might want to look up those tapes, which are there. And also I transcribed them, so they are written out.

So anyway, Baig was somebody who had connections. His father had been the one to establish the Pakistani embassies in Washington, D.C., and Toronto. His grandfather had worked with Prime Minister Asquith and had gotten some commendations from the King of England, and his great-grandfather, I believe, was in command of a fort at a place called Bijapur in India, which was a hereditary thing, so it was in the family, and then the British, of course, took it over.

Mirza has a brother who later became one of the officers of the World Bank. I talked with him also, and there's a tape of a conversation with him. But the main thing about all this research about him was that I was able to contact his mother, maybe six or several years ago, and she was living in England in her 90s. And he sent me hand-written letters which were just absolutely amazing about their family background and about what she remembered about the young Mirza and the war years in World War II, and they had a friend, DeWeldon, whose the one who did the Marine Corps Monument, the Iwo Jima Monument in D.C. And Mirza had to get special permission to get in the Marine Corps. He wanted to become a Marine. Even though he had already gone through Cambridge. He graduated from Cambridge, and then he went to the school of economics in Toronto, was it McGill? Just a very phenomenal education, very prominent education, academic credentials. But he wanted to get in the Marine Corps. But DeWeldon prevailed on the Presidential staff, or whatever to get him to enlist in the Marine Corps. So he enlisted in the Marine Corps and while was in boot camp they sent him off to OCS.

So he had connections, he had these personal quirks—the Marines would kid him while he was in the bunker that he would be eating pork and beans or something like that. He was a Muslim. They'd say, "Muslims can't eat pork, can they?" And he's say, "Allah give special dispensation—to kill all the infidels!" And then he'd look over and say, "Of course, you're all infidels, too!" That kind of thing. He was just apparently just a jovial, witty, very happy person with a huge brain, mental capacity.

Prior to coming to Khe Sanh, I found some of his papers in the Marine archives—I'm sure they're his papers because they talk about things that he was involved with. He had been at Dong Ha mapping out—he had some agents planted in North Vietnam that were giving him information about the North Vietnamese moving down towards Dong Ha. [*These are in the 3rd Marine Division, Messages, Etc., file*]. So he had a good grasp—I think it was Hudson who told me, or it might have been Swearengen or Meredith—one of those three told me that he had studied North Vietnamese tactics so much that he knew, like their route of march, how long it would take them to move from one point to another, how they would move, what kind of formations they would move in, and how they would place their people and their headquarters and how they would rotate. He had studied that so thoroughly so that when he got to Khe Sanh, with the reports that he got, he could determine where the targets were.

He had one target that had secondary explosions for something—I can't remember off hand—like twenty hours. He also—at this time there were these things called electronic sensors, Project 792 for the Dyemarker positions, and there was an operation MUD RIVER which was going into Laos to lay these sensors. And there was a General Alfred STARBIRD who was with the Defense Communications Program Group, DCPG, with the Department of Defense, who was in charge of that, who came out to Khe Sanh as a matter of fact. I saw him, a 4-star General, just before the Siege. And they diverted these sensors from Laos, from MUD RIVER, to be seeded around Khe Sanh. And unfortunately, the program was so new and so secret that no one knew how to read these things. They would send their readings—the planes that would go overhead and pick up the data—would beam that over to NKP in Thailand. Again, the reports would come back several days later, and of course the people are moving—it's so fluid. So the information was of no use. So Baig demanded that he would get the raw data himself. Well it started coming in, and he was getting this data from the sensors. And at first he assumed that when he got a sensing, that that was where the target was, but then all he was doing was destroying the sensors. But then he realized that, no, the sensors are picking up—there were two kinds of sensors: one that picked up seismic things like trucks, tanks, artillery pieces, trucks, things that would be moving, and then there were sensors that would pick up voice conversations. So he assumed these were the targets. Then he realized these weren't the targets, that they were picking up from some distance. So he had to get patterns. He didn't know how they were seeded. He figured that all out, and then he figured out how he could get the intelligence out of the data, out of the information, how he could get useful information as to where the troops were, where the real targets were. And he figured that all out by himself, on his own, without any other staff people, Air Force people of whatever trying to tell him. He figured that all out himself. And from then on in, he was directing all the attacks. He

was also the one that would—with the others—I don't want to short-change anyone else here—we had the Fire Support Coordination Center, which was also near the Regiment with a Lieutenant Colonel Hennelly, who in charge of that, and Baig was technically attached to that, although they're all part of the Regiment, but anyway they all determined—like Colonel Lownds says: 26th Marines determined over 90 percent of the B52 Arc Light strikes what the targets would be. These were not determined by MACV; the Regiment would send down,I MACV would approve it and then they would send them up.

The reason I mention all these things is that people like Baig, Lownds, Hennelly, and others, are never sometimes mentioned in the history of the Battle of Khe Sanh, and yet they were the ones—and on the other side, too, Lieutenant General Hai, who had the Front Headquarters there—you hear of Giap and you hear of Westmoreland, but you don't hear of Hai and you don't hear of Lownds. You hear of Lownds sometimes, but you certainly don't hear of his staff members, and yet these are the ones who did all the thinking and all the planning and all the strategy and everything else. It really bothers me, quite frankly, that the real heroes aren't mentioned.

Kurtz: Well, let's—.

Stubbe: I can talk about the missionaries.

Kurtz: That's what I wanted to do. I'd like you to talk a little bit about the missionaries and the Frenchman as you said. OK, go ahead.

Stubbe: Well, when I got there, there was a Frenchman. His name was FELIX POILANE. In France, there's a bread, which is very famous, called a "Poilane." The *Smithsonian* did an article about that maybe three or four years ago, no relation to the family, however. This is a slight background. The first one who settled at Khe Sanh was his father. His father's name was EUGENE POILANE. He had been down at Saigon at the end of World War I, came up to what was to become Khe Sanh after 1918, and arrived there as a botanical explorer, and on his own, he would walk all the way up to the Red Chinese border—it wasn't the Red Chinese border then—all over the area and collecting botanical specimens and sending them down to Saigon. There were several species that were named after him. He was assassinated in 1964 while traveling along Route 9 towards Quang Tri and Dong Ha. He was an amazing person. He had several wives in succession. He had like five children born to him after he was 60. Obviously [he was] a rugged person, with a huge white beard—I saw a picture of him one time. And because of him, Khe Sanh village came into being because he also, in addition to exploring, he planted various fruit trees and coffee trees, to see what could take hold and grow in the Khe Sanh area because that area with the laterite soil is exceedingly fertile. So he tried all kinds of fruit trees and there was, in fact, an experimental plantation just northwest of the Khe Sanh Combat Base that some Marines ventured into, but they didn't know what it was, but they knew it was something different. But he's the one who planted the original coffee—there's three different kinds of coffee beans that were grown up there, there was Robiston, and Cheri, and then another one that I can't remember. But anyway, he needed laborers, and the Bru people were not suitable because they were just so savage at the time, not violently savage, but just stupidly savage, I guess, and the language was completely different, and they lived by themselves up in the hills. So he imported Vietnamese, and it's because of that—these Vietnamese laborers are what eventually formed Khe Sanh village.

Kurtz: Was there any intermarriage between the Vietnamese and the Bru?

Stubbe: No, no. The Vietnamese and the Mountain tribesmen generally are just so racially—it's much worse than it is here, like the South a hundred years ago. They actually feared each other. The Vietnamese lived in the coastal areas, and they looked at the hills as a place where they would die, and probably did, because the Bru—or the other mountain tribesmen, would poison them. And on the other hand, the mountain tribesmen looked on the Vietnamese as being warriors—which they were: they were always involved in wars.

So anyway, he formed this Khe Sanh village. Felix, his son, was born at Khe Sanh, and he was also, later, to die at Khe Sanh, on the base.

Kurtz: I'm going to turn the tape.

Kurtz: You mentioned that Felix was born in the Khe Sanh area and died on the base.

Stubbe: That's correct. He was born there. He was living there when the Viet Minh came through at the end of World War II, and his wife mentioned to me, Madeleine Pollane, that they took refuge at Lao Bao Prison at that time—or he did and was injured in his leg. He went back to France and that's where he married Madeleine and brought her back to Khe Sanh. O, I might mention too that when Felix was born his father, Eugene, was out collecting [botanical] specimens, and so his mother gave birth to him alone. It was very primitive conditions there.

Now Felix, when I got there in July '67, there was Felix, Madeleine, and they had two [children], a little boy and a little girl. The boy's name was Jean Marie, and I can't recall the girl's name. They had a yellow concrete structure that was on a roadway that led from the base to the village, which was actually their own road, and we used it as Marines. We had a separate road that ran parallel, but we never used that road; we only used the Pollane road. I visited them only once—because of the language thing; I didn't speak French. But the time I did visit them we had some pilots with us and he [Felix] had a pet deer in a little enclosure. I have a picture of that amongst the pictures I sent down there [to the Veterans Museum in Madison]. They invited me in, and at the time there were some German visitors. I don't know who they were or what they were, but they were visiting and they invited me in and I remember I had some crème de menthe in water; it was really diluted. You could barely tell there was crème de menthe in it. But it was so nice. They were gracious. I don't know much else about them, except that I kept in touch with Madeleine through the years, not just Christmas cards but correspondence, and she sent me a long, long essay about her time there and how life was and all that stuff. That's all in the records I sent over [to the Veterans Museum].

There was another Frenchman named Father Poncet, who was sent up there as a missionary to the Bru. And I remember him during the monsoons. He came on the base asking me if I had any wafers for the communion. At that time we had wafers in a can that you had to open like a tin can which was because of humidity and bugs. But the thing was he was on a bicycle and I remember he was just so emaciated, and he looked so weak and so malnourished, and I remember having a case of C rations in my bunker for convenience so I didn't have to walk down the muddy road to the messhall in all the rain and the cold, but I could just eat in my bunker. I gave that to him because he just needed that.

I remember one of the Marines from the CAC in the village there—he was Catholic and went when Father Poncet said Mass. For Confession, he had a piece of cardboard, and on one side he had all the common sins, and the guy would just point to each sin and indicate with his fingers how many times, and then he'd turn over the card and on the other side were all the penances, and Father Poncet would point to the penances and indicate with his fingers how many times. That's how they communicated that part of thing.

There was also an Episcopalian Vietnamese missionary up there who had a little chapel built. His name was Pastor Loc. And I remember visiting him one time in the village and he had the little kids out there and they were singing "Jesus Loves Me, This I Know, for the Bible tells me so." They sang it in English, then they sang it in Bru, and then they sang it in Vietnamese. I told Pastor Loc, "I can understand English," and although I couldn't understand the Bru it was non-tonal. But I said "I can't understand why you have them sing that song in Vietnamese because in Vietnamese the words have meaning according to what tone they're said—seven different levels of tone, so singing tones according to a Western musical form gives meaningless words. And he said, "O, well I have them do that because their music isn't music!" So he was probably more stern. I don't know his character at all, quite frankly. He was there.

Pastor Loc, when the siege started, he went down to DaNang, and he had like a mental breakdown, but he's still there probably—I heard about ten years ago that he was still there and OK.

Father Poncet, however, went down to Hue City for refuge during the siege and was killed there by the North Vietnamese during one of the battles there.

Felix came back on the 13th of April '68 because he had heard that Khe Sanh—that the relief had taken place. The Army had come up on the 8th of April, I believe it was, and the people on the base were now scouring the area. They weren't taking any incoming, so basically it was a safe place to be. So Felix decided to come back and see how his coffee trees and house had withstood the battle. Actually his house was completely demolished because it had become a headquarters or communications site for a North Vietnamese unit, and our artillery and air strikes completely demolished the place. And I'm sure that his coffee trees were basically demolished, although even today there are coffee trees there which have been nourished and brought back to life. I guess the airstrip itself has been turned into a coffee plantation right now as I speak.

In any event he came back to look and the plane he was in, the tip of the wing crashed into a disabled vehicle or some concertina—I can't remember—and sort of crashed while it was landing. Felix was the only person killed. There were some other injuries, but I guess Felix—I had heard he was decapitated, but that really can't be because when Madeleine wrote me this long essay she mentioned that they brought the body down and there was this little tricklet of blood coming out of his head, so obviously he wasn't decapitated. But in any event, he died on the base. And he was born there [at Khe Sanh] back in the 1920s.

Kurtz: What about the Millers?

Stubbe: The Millers had arrived there in 1962. the first time the Army Special Forces came there. [*The tape says 1963, but it should be 1962*]. And they originally—the Millers belonged to a group called the Wycliffe Bible Translators, which are a group that are determined to go to different tribal areas throughout the world which have no written language and give them a language, listen to the sounds—each language has peculiar sounds—and develop a written language for those sounds and words and then teach the young children to read, so they become literate for the first time, and also to translate the Bible in that native language. And so they're in Africa, South America, and all over the place, and they had quite a few in Vietnam at the time. And the Millers were one of these people. They arrived at Khe Sanh and they—the Wycliffe people don't give any salary; all these missionaries are dependent on individual donors. They also don't remain in an area, like a missionary would, for more than ten years usually. They do what they're supposed to do and then they move on to another place. All of which really impressed me very much. Here were people really involved in their work. They weren't dependent on their salary. They didn't develop their own church, their own kingdom. Also, they listened before speaking. So they initially located in a Bru village and they were there basically to just listen, to pick up the language, right from the beginning. And they lived in the primitive conditions, unlike other missionaries, too, which usually live in one place and then go to wherever they are doing their missionary work, and then go back and live in their home, which is close by, but is in another place. But these people live in the huts that everyone else lived in. They did leave briefly in 1964 when they told me there was some indication the North Vietnamese were moving into the area. The Special Forces, in fact, did have a major battle there where they killed off almost a whole regiment of North Vietnamese—one of the early battles of Khe Sanh that never gets talked about. Anyway, they left for awhile and then came back. And just before I got there there's this large concrete house just north of the village and to the south of this village called Breh and south of Hill 471, there was a concrete house there that belonged to the Poilanes, and I guess they gave it or rented it or whatever to the Millers and the Marines and the Special Forces and the Seabees all refurbished it without cost to the Millers—put in windows and that kind of thing. The Millers, by this time, had three children or so. And so that's where they operated out of. When I first got there, they weren't there for the first month or two. They were at a conference, I guess. And there were two ladies, Nancy Costello and Eugenia Johnston, and they were both from Australia. They were there to do illustrations for these primers for teaching children, like they'd show a pig or a flute or whatever, and they'd have the road underneath, and these young children would be in classes and learning how to speak and write their language. And they were there when I first got there.

I'll never forget—it's one of the most traumatic—I just arrived there and I went down to the village and I saw these two young ladies. They were in the Miller's house, and while I was there—I think it was a Bru mother brought in her child, and the child looked dead already. The eyes were open. I remember one of the ladies gave it an injection in its rear end. It must have been penicillin or something, caused a big bump there, and then within two or three minutes the child was dead—definitely dead. And the mother was just wailing. And these two missionaries told me they don't trust the American medicine—that they should have brought the child in earlier when they could have done something, but they trust their medicine man and then when all else fails, they come in—too late.

So anyway—soon after I got there the Millers came and I came to know them. They were just such wonderful, wonderful people. In fact, Harper Bohr that I was talking about before, when he and I went down to see the Millers, he told me later on that if Jesus Christ were alive today walking the earth, he could see him as John Miller. Not saintly in the sense of being so pious, but just so genuinely Christian and full of joy and love and peace and everything else, just a wonderful person.

They had me down to eat one time, and I remember they had this salad and they had a salad dressing on it and I said: "Gee, that tastes good. What is that?" And she said, "Well, eat it first, and then we'll talk about the stuff later on." So I ate it, and she said, "You were asking about the salad dressing?" And I said, "Yeah." And she said, "Well, that's called nuoc mom." And I said, "O, what's nuoc mom?" And she said, "Well, it's fish oil." And she said that one of the things about living in this area is that people have a tendency to lack salt and because of that they become dehydrated and very weak, especially in the mountains. Along the coastal areas, they can eat fish, they get the fish oils and they get the natural salt—sea salt, but in the mountains, salt becomes almost like gold. So she said, "What this is—." Fortunately I'd eaten it. But she said, "It's made by putting fish in a barrel of water and after about six months you scrape off the oil that's on the top, and that's nuoc mom."

Kurtz: How could you not smell it?

Stubbe: It smells fishy.

Kurtz: I mean, it smells awful! If you've ever been where they make this stuff.

Stubbe: t wasn't that much.

Kurtz: O, OK. It's got a horrible smell.

Stubbe: That was that. They left about the first week of January of '68. Colonel Lownds called them in and said things are getting really bad; you need to leave. They said, "Well, we have a conference anyway that's scheduled in Saigon, so that's a good excuse to leave." So they left. And on the 20th of January, a Saturday afternoon. It was bright and sunny , and INDIA Company, 3/26, had already got into a big battle going up to Hill 881-North, and Lieutenant TONC had already surrendered and gave all the battle plans and that we were soon to be hit. So all of this was going on, and all of a sudden John Miller appeared and went down in the command bunker to see Colonel Lownds and Colonel Lownds was very angry—not vocally angry, but John Miller told me that he was angry. He said: "I got you out of here!" And John Miller had come back because he wanted to get his Bru helper that helped him translate. What they do is they have a person called an "Informant." They said they had to change that later on in Vietnam because it sounded like a spy. But what they have—they call them "informants"—when they translate what they'll do is they translate into Bru and then they'll speak it in Bru to the informant and ask "Does this make sense? or is this something that shouldn't be said?" For example, as an aside, this one seminary student had studied in Strausburg [Germany] for a year and knew French very well, and he was up in Canada and sat in an airplane, and it was kind of cold, and a woman came in, and in perfect French said, "Madame, et vous foi?" But in Canada, Quebec, "foi" has a primary meaning of being frigid, so he was really saying, "Are you frigid?" And this woman got very angry with him, and he couldn't understand why; it was because the language was different. So anyway they had these informants, and John Miller came up to get his Bru helper, and he did get out. But he lost basically all of his books. I happened to have his Greek-English Lexicon because I was doing work in the Greek New Testament myself at that time. Also, another Chaplain up there at the time, Hampton, was teaching his young assistant Greek. So later on when I got to Quang Tri, I still had that lexicon, Arndt and Gingrich. And John Miller said, "Do you still have it?" And I said, "Yeah." And he said, "I'd like it back." I said, "Sure, no problem. Take it. It's yours." But he lost everything else.

And then, later on, they went to a place called Ban Me Thuot in the Central Highlands and they were captured and spent about a year as prisoners with the North Vietnamese. Carolyn Miller wrote a book called *Captured* which is among the books that I donated [to the Wisconsin Veterans Museum] which talks about that whole experience. There was also a Wycliffe Bible translator named Hank Blood that I met in Quang Tri while trying to get back to Khe Sanh during the siege when I was medevaced. He was a real tall, British-like person with white hair, very ramrod straight [in posture], and he told me about how he had almost been captured once and how he escaped, how the Lord helped him. But he told me one thing that I've used in many sermons. He said, "Never think of the greatness of your problems; always think of the greatness of your God." I've used that in many, many times. And then I found out later on that he was killed, sometime around the time the Millers were captured.

But the Millers right now have risen, still work for Wycliffe Bible Translators and are regional coordinators for all of South-East Asia. They work out of Bangkok and attend lots of conferences and they're involved in translating some of the languages in Laos which are related to the Bru. They told me that there's sort of an arc that runs from Khe Sanh all the way to Chaing Mai [in Thailand] which are little pockets of people that are separated by terrain, but they all have a similar language. And I talked with Carolyn on the phone one time and asked, "Were they ever together?" And she said, "Yes, at one time they had a kingdom, and then their king was killed, and then they all separated, scattered."

Kurtz: Very fascinating.

Stubbe: Yeah, some of that early history—I wish I had talked more with the Poilanes.

Kurtz: In the book that you wrote with John Prados, there's a chapter—is that your research that was in there?

Stubbe: All of that book is [based on] my research except where he talks about Westmoreland, MACV, or Washington, and Johnson—but everything else is all my research.

Kurtz: That's another interview. Now the last person I'd like to ask you about today is Oliver North. What do you know about him?

Stubbe: OK. I was in Okinawa in '73, '74, with Third Marine Division at Camp Hansen. When I first got up there, there's a place called the Northern Training Area, NTA, where infantry Marines are sent to learn river crossing techniques, rappelling down cliffs, rappelling out of choppers, night navigation using compass and stars and so on, things like that, survival. When I first got up there, there was some officer in charge—I can't remember his name [*it was MacDonald*] but then, later on, Oliver North came up there to replace him. He was a Captain. And I remember being up there in November of '73 when it was Marine Corps Birthday, and Oliver North had a huge birthday cake that he had scent up there and the Division Band up there—and I say this because it was a very primitive place. There were about twenty Marines up there. It was very detached. It took maybe two or three hours to travel up there by road, which was winding and difficult to get to, and there were very primitive living conditions up there. But Oliver really took care of his men. Like I say, he got the cake, he got the band. I could tell the men just really admired him deeply. He was a very humble kind of person, just very down to earth.

He had one Marine up there named GOLIGHTLY, and Golightly was a Southern Baptist and wanted to be baptized. And there was a river up there at the base of the hill, Shin Gawa River. And I told this Marine, "You're Baptist and I'm Lutheran, and they might not accept your baptism as valid, and in any event, even if I were Baptist, they'd probably want to re-baptize you anyway." He said, "I want to be baptized." So we went down to the river. It was cold, and he was in a white T-shirt and I was in regular Marine utilities. And we went into the river and I submerged him because that's what he wanted. I did my baptism by submersion. And then we all ran up right away into the showers and took a hot shower. But Ollie North was the one that had put him with me. He really took care of his men. He wrote me a note later on expressing his appreciation for that.

Then about three or four years ago, he suddenly called me—or, actually a lady called me from New York, and said that they wanted to do a video interview, and I said I didn't like to travel and wouldn't come out to New York. She said, "Well, I'll come out to see you. It's 'Ollie North with War Stories'." I said, "OK, if you come out here, that's fine."

They arrived here in two limousines. I live at the end of a court in the suburbs here and all the neighbors who saw him coming out and knew who he was, and they saw these limousines, and later on they said, "What's happening?" But he came in here, and I've been interviewed by several for television and different things, the Weather Station, the History Channel, and other people have interviewed me for one reason or another—I don't know why, but they do—and he's the only one that put makeup on my face, I guess so I didn't glare and shine. He was asking me questions, and one time I looked at him—I was sort of looking off into space—when someone asks me a question, I just sort of get into it, 'into the zone,' so to speak. And I happened to look at him, and there were gigantic tears—.

Kurtz: ... [*fragment of another interview*]. I've finally decided to another tape, and when the tape snapped off you talked about Oliver North coming here and what a relatively nice person he was. Do you have any views about how controversial he became after he left the Marine Corps?

Stubbe: No, quite frankly no. I just always remember him—of course, people are so multi-sided. What the public sees about a person and the images they form and so on is not always the way things really area. And I always remember Ollie—and I spent hours and hours with him as a Marine Captain, and he really cared for his troops, and I hear that from other people who have known him from that time. He just seemed like a very genuine person with convictions. I have very good feelings about him. And what he might of done later, I don't know—we probably will know fifty years from now as we declassify things, but sometimes people aren't always able to say everything either, what they do and why they do it. I must say, though, that when he first contacted me—or, when he was going through these troubles, I wrote him, because I have this picture of him, smiling with this Marine Corps Birthday. And I had this fantasy of putting him up in my attic or something as a refuge, like in World War II with the Jewish people, like the *Diary of Anne Frank*, and I thought, well, I'll put him up for awhile, keep him safe. I never told him that.

Kurtz: Well, is there anything about Vietnam that we haven't discussed that would be useful.

Stubbe: Well, I think Vietnam—there is no "Vietnam Experience." I think it's hard, it would be very difficult for anybody to put it in a few words, which really must be difficult for those teaching American history in high school. I don't know what they say about us. Vietnam was just so multi-faceted, just like the people I mentioned. I mean you had the coastal areas which were hot and cultured, like Hue City had a golden throne and beautiful porcelain vases and everything else in the Citadel and people dressed in very brilliant clothes, and then you have these very primitive mountain tribesmen living in an area which is very cold and full of animals and wild life, and then you have the different kinds of service. You have the people who served in

infantry who were always in the mud, maybe spending six, eight weeks without a shower, without any hot food for months and months, and then you have people who were living the rear areas with supplies maybe getting drunk every night. We had a Chaplain at Khe Sanh who arrived there right after I did, John McElroy, who mentioned that when he came in he reported to a place called Red Beach, which is where all the supplies are, at a place called FLC, which is Force Logistic Command. And he went there because he had a friend who was a senior Chaplain there. And he went into this plywood hut where this Chaplain was, and there was music playing Mozart or something like that, and a "washy-washy woman" was washing his clothes, uniforms and hanging them up. And he gave John McElroy a glass of scotch or something with ice cubes, and after awhile he said, "O, I have to go off and play a tennis match that I'm scheduled for. You can stay here and enjoy for awhile." And then he said, "Vietnam really isn't so bad once you get used to it." Of course, he was referring just probably to the separation from family—which is a big thing for anybody. But John McElroy was telling me this after he had stayed at Khe Sanh one night in a bunker along which there were rats crawling around in the upper rafters or ceiling so to speak—overhead, and one had lost its footing and fallen right unto his bare chest. It was hot and just had his bare chest. And it went "squeak, squeak, squeak!" It landed right on his chest, woke him up. He went straight up and said, "Shit!" Then he told me the story about Red Beach, and he said, "Vietnam really isn't so bad once you get used to it." But the thing is, it's many things to many people, and everyone has different experiences. I think that those who flew helicopters, for example, in our support would come into a combat area where all hell is breaking loose and just pandemonium and sheer terror and horror and excitement, and the adrenalin must be rushing and wondering, "Am I going to get out alive?" and "Am I going to rescue this person," or whatever, and then go back to where the air bases are, and usually they're air-conditioned and you have nice hot food and you're going back and forth and back and forth, which for those who are stuck, like the infantry, like where I was at Khe Sanh where I was, you become sort of numb, and you just go on automatic, and you don't even think of how bad things are. It's just what is, and you never think of how things could be better. But for those who go in and out and in and out, I just think it must have been more difficult, even though they didn't have to put up with all the stuff we did, they had to put up with the *realization* that it was bad. And then there were different times: people got there in the early 60s as opposed to the early 70s. By that time, more disillusionment, more anti-war, more non-acceptance by home—do I have a home to go back to?—more marijuana and drug use, whereas in the early parts, that was unheard of, and you had—like where I was, there were no local women where the men could go out at night, whereas at DaNang and those places, they'd go through mine fields and everything else just to get to the "skivvy shacks" as we called them. So Vietnam is many things, depending on what time, what kind of unit, where you were, and it covered over seven years. So it's going to be—for those who try to make a general survey of Vietnam, it's going to be very difficult to do.

But I was going to say that after I left Khe Sanh, I went to Quang Tri for four months. I met Harper Bohr there and some recon people. I did a Memorial Service for 1/26, which relocated from Khe Sanh to a place called Wunder Beach, and that's spelled W-U-N-D-E-R, oddly enough. It was an old Army logistics site. And I conducted a Memorial Service in an old, bombed out building. And I remember the Adjutant read all the names of the people from 1/26 who were killed—I think it was about 180 or so, very many. And I remember the Commanding Officer, [Lieutenant] Colonel McEwan, who had been the S-4 of Regiment before the siege, remarking that this will always be with us; we will never forget it—words to that effect. After that, I came home for thirty days on extension leave and my mom said I looked like a scarecrow because I had lost so much weight. I'd gone from 180s to 120 something. She was almost in tears, she told me later on. She told me that I talked in my sleep; I had no awareness of that—was thrashing around and that sort of thing. I did get to talk with a company called Amron in Waukesha which were making the grenades that we used—these M33 grenades, and I was talking about COFRAM munitions and I remember afterwards we had a little luncheon and the President of the company came to me and said, "O, how can you talk about it? That's all Top Secret!" I said, "O, it isn't anymore!"

Kurtz & Stubbe: [*laughs*]

Stubbe: But for them it was. He was amazed that I talked about it. I remember going to see the Bishop of my church and his opening words to me were, "How can you spend any time at all with such immoral people?" Meaning the Marines. And that just took me by complete surprise. But that was the temperament of the time. I wanted to tell him—in fact it was in my mind at the time, I remember—I wanted to tell him, "What about all the immoral people in college and seminary?" Because I remember—I had just come from that, too—before going to Vietnam. I had a good awareness there.

So anyway, then I went to DaNang and the main thing there—I won't go into all the details there—but there's one thing that happened: I think it was the 20th of August. At DaNang there's a group of hills called the Marble Mountains which rise out of the earth almost straight up, at least one of them does. And I remember taking—had an enlisted assistant, a clerk who was in the Navy, called a Yeoman, and he had just come off a ship. His name was Dick Straubel. He lived in Kaukauna until just

recently; now he lives in Florida. And I had heard that in the Marble Mountains (which are made of marble) that there were carved Buddha and some statuary that were many hundreds of years old that was very interesting, and I'd never seen it before. And I told him, "Well, let's go down there. We'll take our own little day off and go down there." He said "Fine." So I had my own little vehicle—because my job was to visit some of the small little facilities of the Naval Support Activity like Camp Carter, which was where our Shore Party and security forces where, and Bridge Ramp and Ferry Landing which were our logistic places, and Covered Storage—a lot of logistic things where there'd be only ten people, and I was to go from one place to another. So I had a vehicle, and we went down to Marble Mountain and the Marine unit at the place at the time was Third LVTs, which refers to AMTRACs, Amphibious Tractors, Landing Vehicle Tracked, LVT. And I checked in with their intelligence officer and asked, "Is it alright to walk around in these hills?" I thought it was only prudent to do, to see if there's any enemy activity. And he said, "O, there's nothing to worry about. We haven't had any problems at all."

So Dick Straubel and I walked around, and we saw some people carving little statues and ash trays and whatever out of marble in a little village at the foot of Marble Mountain. And then I started walking up a path and pretty soon a little Vietnamese boy about seven or so started falling and he was whistling. He just wanted to follow, and I said "OK." And he just followed us. And we saw, indeed, some very beautiful and interesting statues. And I remember there were some unusual things. I remember seeing a Vietnamese soldier, or a man in a uniform; I'm not sure what he was, now. But kissing a young Vietnamese girl, sitting on some stone stairs. And I had been taught that Vietnamese don't show affection in public, and I remember it registered in my mind at the time that this was something unusual here. And then we continued walking, and we came into an area which was like a crater, into the side of crater. Or, let me put it this way, I walked in, and all above me was open, but it was like inside a volcanic crater, and in there was a reclining Buddha on one side and some other Buddha statues carved into the side of this crater, and then there was like another little cave that went off, and I started walking in there and saw just a lot of old, rusting tin cans, like it had been a garbage dump. And at that point this little boy started whistling just very, very loudly. At the time, again, I thought this is very, very unusual, but I wasn't afraid and I didn't think anything other than that it was very unusual. I thought "What is he doing?" And then he ran off; he wasn't with us anymore. And I looked inside this cave and thought, "Well there's nothing in here to see," so I walked right out again. Then we continued about two or three hours, walking all through the place. Then we went back to our base which was called Camp Tien Sha, which is on the opposite end of DaNang. There's like an area of DaNang and then there's a little peninsula that goes north and south, and the Marble Mountains are at the south part of that peninsula and where I was stationed at the north part of that peninsula where there's another large mountain, like this peninsula's throwing a big football, and that was called Monkey Mountain, and the camp was called Tien Sha. So I was there. And I remember that night there were all sorts of flares in the air and that kind of thing, and then the word came out the next morning that at this foot of the Marble Mountain where we were, there was an Army Special Forces Headquarters for all the SOG units in I Corps, and that had been overrun, and in fact some of the people who were at Khe Sanh who went down there and made it out safely out of Khe Sanh were killed, including the Sergeant Major, Sergeant Major Pegram, and there was a senior Medic who was killed and quite a few others.

So I went down there again to the Marble Mountain, curious to see what was happening. The battle was over. And all at once while I'm down there, we started receiving 105 rounds, which we found later on were from ARVN artillery, not accurately being fired. They were probably supposed to be fired south, and were being fired north—who knows? They were impacting and making a ringing sound. The 105 is just a terrible sound, and there were no bunkers or trenches or anything. There was just sand in that area and here's Straubel, who has just come off a ship, never been in battle or anything. He's just absolutely shocked by this whole thing, and I'm still a little numb from Khe Sanh but realizing this is not a good place to be in. So I said, "Let's make a run for the vehicle and get out of here." So we did, and got out of there, and got just north of the Marble Mountain, just about a block or two, and he made the remark, he said: "It's interesting how in Vietnam you can go from sheer terror to where everyone's just walking like nothing's happening in a flick of an instant."

And I found out later on that the people who attacked this Army Special Forces camp Headquarters for the SOG called CCN, Command and Control North, about sixty to eighty North Vietnamese soldiers or whoever they were, were in that Marble Mountain while I was walking through there the afternoon before! And that Dick Straubel and I could very easily have been killed or captured during that time, and probably they were in that cave where the tin cans were and that's maybe why that little kid was whistling loudly and then ran off—to warn them. But obviously they were not about to trigger-off their presence before they did their attack, so they didn't do anything to us. But nevertheless, it's one of those instances where we just came that close.

Another incident that happened on New Year's Eve: I was going to the Officers' Club in the main part of DaNang, which is called the Stone Elephant: they had hard drinks for 35 cents each, I remember, and we were going there. There was a big bridge between the peninsula area and the main part of DaNang, and we were stopped right at the end of the bridge because

there was a Vietnamese convoy from the main part of DaNang and then they were going to go south. So we were right there. And off to the right side is sort of like a cliff, like twelve feet, and off to the right is the road where these trucks are driving like fifty, sixty miles per hour, going as fast as they can. I don't know why they were doing that, but they were going fast. And this was early in the evening and there were all sorts of Vietnamese people crowded all over the place.

About six vehicles passed me, and all at once there's this one that's coming fast, and then comes slower and slower and then veers into my lane, like it's going to crash into me. Well, this bridge is like three blocks long, and this vehicle is coming slower and slower and I wondered, "Is it going to crash into me or isn't it?" Because I couldn't back up because there were Vietnamese behind me. I couldn't jump off to the side or either way, and I had another Chaplain with me at the time. We're just sitting in this jeep. This truck comes more and more, like a juggernaut, just advances on me—directly in front of me. And it did crash into me! But at the time of impact it was maybe only going five miles per hour, but nevertheless crashed and caused damage and I couldn't drive. And all at once there's this Marine running down the bridge with his rifle saying, "I had to shoot him! I had to shoot him! He wouldn't stop! He wouldn't stop when I challenged him!" So they opened the driver's side of the thing and this dead Vietnamese flops out with a round right through his skull.! And all these Vietnamese are going [*makes chaotic noise*]. And this other Chaplain and I are the only Americans other than this one Marine who ran down. O my God! So pretty soon there are some MPs came and, but we had to stay there and make statements, and never got to the club for supper, or to celebrate New Year's Eve. But that was another one of those funny incidents—not "funny" but "peculiar." So Vietnam still was always a dangerous place, even in a rear area.

After that I stayed in the service, went to [Marine Corps Recruit Depot at] Parris Island for a year and a half, started writing about Khe Sanh at that point. I needed to get it out of my system, it seemed. And on the basis of diaries and clippings and all that—.

Kurtz: Now they were your diaries?

Stubbe: Yes. I donated them to the Veterans Museum [in Madison]. Fortunately—I kept them daily, too.

Kurtz: How difficult was it keeping a diary in the conditions at Khe Sanh?

Stubbe: Not bad. I usually wrote in the evenings, when things were quiet. Of if we were out on an operation, like three, four days, obviously I didn't, but then I would write in everything as soon as I got back. I had a sense that this was historic, I really did. From the very first day I arrived there, I felt: This is something that is different. I need to write this down. I hadn't kept diaries up to that point. I said I need to keep a record of what's happening here because this is historic. And I didn't know why, but I felt it was. So I wrote this all down in 1970 and then I did it on weekends and on evenings. They had a typewriter there and I used that. So that was Parris Island. I could say many things about Parris Island, but I won't get into that—funny things with Marines, funny things that happened.

But anyway then I went on a brand new ship called the USS SHREVEPORT which was just being commissioned in Bremerton, Washington. It was a brand new ship and I was part of the original crew. And we left there and went south, pulled into San Francisco and into Acapulco and then went through the Panama Canal and pulled into New Orleans where some people from Shreveport came down, then went around the Gulf and pulled into Mayport, Florida, where I met the USS NOA, which was a destroyer, hull number 841, which I had served two years enlisted after high school, and [it] was being decommissioned and then we pulled into Norfolk. I was on there for two years.

After that—I left there because it was going on to the Mediterranean and I was due for orders, but the Navy ran out of money to transfer so I ended up in Little Creek Naval Amphibious Base in Norfolk, and got interested in working out physically with the SEAL team because [the Chaplains at] Little Creek didn't have very much for me to do, and because of that I got to go to the Army Jump School at Fort Benning.

Then from there, when the money became available, I went out to Okinawa for a year, '73 to '74; that's where I met Ollie North. I was there for one year. And from there I went to Camp Pendleton for two years and had a variety of experiences there. Started getting interested in Force Recon—did some writing there. Also was continuing to re-write the Khe Sanh experiences, gathering more information—official information.

Kurtz: Were people contacting you that you knew at Khe Sanh?

Stubbe: No. Well, at that point I had kept in touch with 12, 13, 14 people mainly through Christmas cards and occasionally through other letters. Most of these were from the recon company, but there was also [Lieutenant] Colonel

Wilkinson, Colonel Lownds, Major Bohr, and I can't think of who else, but there were about 12 to 14 people I kept in touch with.

Then after Pendleton, I was sent to the USS IWO JIMA (LPH-2) and we did a variety of operations on that. Okinawa and IWO JIMA were places that the command didn't seem to appreciate Chaplains generally, and I felt very alone and maybe some of my Vietnam memories were coming back more and more, because I was re-writing about Khe Sanh all the time. I also had a fairly major surgery at that time.

Then after that I went to Great Lakes Naval Training Center which I really liked because it was close to home, maybe only 45 miles away. I could come home on weekends. I worked there as a Supervisory Chaplain, I worked retreats, I was the Chaplain of the Chapel for awhile. There was a senior Chaplain who arrived who knew me—I didn't know him at all—and I had orders to go to Bahrein Island in the Middle East, and he said: "Would you rather stay here at Great Lakes?" And I said: "O yes, definitely!" He said, "Well, I want you as my Administrative Assistant to do budgets and that kind of thing." And I said: Fine. So I ended up staying at Great Lakes for about six years, which was very, very unusual, but I was getting to retire anyway.

And then about my last year, my grandma died and my only cousin, who was 26, and that left my parents and my uncle. That's the only family I had at that time. And they were dedicating the Vietnam Memorial in Washington. A lot of it was on television, and for some reason it just started flooding back at me very badly, all these memories, and I was wondering whether there was anybody left from Khe Sanh other than these twelve or so that I had kept in touch with.

Kurtz: What year was the Vietnam Memorial dedicated?

Stubbe: I don't know, but I'm talking about '83, '84, in that time frame. My grandma died July 4th in '83, my cousin the same day, about half an hour apart. Grandma was in her 90s; we expected her to die. And my cousin had a brain tumor and we expected him to die. But we didn't expect them so soon. My uncle at the time lost his only child and his mother, and four months later, lost his wife. So he really had a very bad time. He was a World War II veteran from Burma. He's still with us.

So anyway I started getting all these nightmares and dreams and everything else. I went to the Dispensary and I told them about that and they said you need to see the "shrink." So I saw the "shrink"—he was a Navy Captain, and he said, "Well, I don't know why you're having problems with war. War is normal human behavior and you go to it and you come back and then you forget about it, and that's it." And that's what he told me. And then he went on leave. And he had an assistant Navy psychiatrist, who—.

Stubbe: I'm going into all of this because it has cast me in a very poor light—maybe it's human light; it makes me real, I guess—it explains, nevertheless, why certain things happened afterwards.

So I was—at the time we didn't know very much about what they now call Post Traumatic Stress Disorder, but I found out that there's this thing called the Stress Unit. So they sent me there as an outpatient, to go to one of their evening sessions. And I remember there was this psychiatrist there who had established this unit maybe a year earlier, and his name was "Skip" Shelton, a very intense but very competent psychiatrist, just with a real heart for Vietnam veterans. And I'll never forget, at the end of the session—he could just "read me," I don't know—he could read anybody, I think. He said: "Yeah, Ray, this is the best of all possible worlds, isn't it?" A quote from Voltaire, *Candide*, Doctor Pangloss. And he kept repeating it, and I got angrier and angrier. He hit a nerve, and I don't know how he hit it or why he knew that that would hit it, but he did. Because I'm not usually a person who gets very angry. But I started getting very angry and I sort of lost it, and in fact, I did loose it. And that was at the end of the session, and he said: "OK, come back next week." And I remember getting into my car and somehow I arrived at the Bachelor Officers' Quarters on Great Lakes maybe about an hour or so later. It only takes about ten minutes [to] drive. And I don't know where I was in the mean time or how I got there. And I knew immediately then that there's something definitely wrong. So I went back to this psychiatrist and he got me into the program and I spent three or four months there as an in-patient. And I was still on active duty. And they told me that I could retire on twenty years sometime about April to June of '84, that I could retire. And I got out of that Stress Unit around January of '84, and I thought: I only got three months to go and I can retire and in the meantime the Chaplains put me in an administrative thing to do schedules and whatever, do paperwork. So I was doing that and my orders came in to retire.

And then a message came in saying: We have miscalculated your time. In order to do 20, you now have to serve until December of '84, so I had to serve 6, 7 months more. And the senior Chaplains didn't know what to do with me, and I was just sort of a "basket case" then, quite frankly. So I took leave and went to the Vietnam Memorial in DC by myself—which was a bad thing to do, because then it really came back to me. So I came back and was just in a really bad way and I went back to the Stress Unit and said: This is not working out. So they readmitted me and kept me there for like three months more. So I was there a total of six, seven months inpatient. At that time the senior psychiatrist was really up in arms because I had used

up a lot of their funds because they had to pay the VA for me to be there. And he was going to give me a Medical Board and wanted me to become a patient at the Navy Hospital. I told him, "I can manage now. After all this time, I can handle myself. I know what to do, what to avoid to trigger things off." He said, "OK, if you promise not to go back there as an inpatient, we'll keep you until you retire." So that's what happened.

But anyway, while I was in there as an inpatient, we had a thing called Goals Group and in there we were to determine what we want to do when we get out. And I was the only active duty person at the time. And I'm sure when I first got there they were wondering: What is a Chaplain doing here? Or an officer? But anyway, my goals—I formulated them at the time were two: I was going to form a group, a network, of those who were at Khe Sanh, first of all find out if there were any alive—and I wasn't alone in that, by the way. There's a news article that came out towards the end of the siege in which the Executive Officer of the Recon Company was quoted. It was an article by John Wheeler, Associated Press, in which this officer, his name was Pappy Schlack who was enlisted before he became an officer. He was what they call a "Mustang." He was quoted in this article as saying: "When I get out, I'm going to open a bar, and when it gets more than three deep of people that say they were at Khe Sanh, I'll know someone's lying." So I wasn't alone in the fact of "Is anyone still alive?" So anyway, I wanted to form this group.

And the second goal was to get this book that I had on Khe Sanh published somehow, or somehow get a story about Khe Sanh done. Because while Khe Sanh had occupied the majority of the news in the United States while it was happening, right after it happened, it became conveniently and rapidly forgotten. And I remember reading in the Marine magazine that's designed for enlisted called the *Leatherneck* that there was an article on a new type of Navy ship called a LHA and there were going to be five, and I believe the first was the TARAWA, and there was a BELLEAU WOOD; they were all going to be named after battles. And the fifth one was going to be named USS KHE SANH. And they mentioned that in the article. And then, of course as it happened, LHA-5 was not named USS KHE SANH; it was named after some other battle. There is a ship named after Hue City, but there's no ship named after Khe Sanh. I remember while I was at Parris Island, the Drill Instructors were told not to mention Khe Sanh or not to emphasize it. I think the Marines felt—either of two things, either they had lost it because they abandoned it, or that the other services might have had a major part, like the Air Force with the B52s or the Army coming in to relieve, or whatever. But none of those take away the glory of Khe Sanh, not the glory, but the immensity of the sacrifice and the courage of the people who were there, and somehow I had it in my craw that Khe Sanh should not be forgotten, and that's why I wanted this book to be published.

And so the way that I did this was that I immediately started writing these people I had kept in touch with and asking them if they knew any others that had been at Khe Sanh. And then I put an ad in *Navy Times* and the *Leatherneck*, and eventually I did start to get responses.

And then about this time, in '84, I believe it was, I was still on active duty, but I got leave to go to a ticker tape parade in New York City that was in honor of Vietnam veterans. It was organized by two people, one of which was JAMES HEBRON who was a Khe Sanh veteran, not of the siege. He left right before the siege. He was with BRAVO Company, 1/26. And while I was there—he had managed to get a banner made that said "KHE SANH". And somehow a whole bunch of us, maybe thirty, forty, maybe even more, fifty, Khe Sanh veterans rallied. We saw this banner and we just went there. And we got it together. I got all their names and addresses and everything. And then, after I got out, the Third Marine Division Association—I think it was '88, was having its reunion at Tampa, Florida—it was going to be the 20th anniversary of the Battle at Khe Sanh, and they invited General Westmoreland to be the main speaker. And Colonel Lownds, who lived at Naples, Florida, who only lived a short ways away, didn't attend. I learned later on—not from him, but from others—I had heard he did not attend because Westmoreland did attend. He must have had something there about Westmoreland.

But anyway, while I was there they were honoring Khe Sanh and obviously there were many, many more people that we got in touch with, so we were putting out a newsletter, which was mainly a listing of people, a network for people to get in touch with each other, so we rapidly went from 12 or 13 to 30, then 60, and then 100. We got to 300. So that's how all that started.

And while we were at Tampa in '88, we all got together in a small room and I remember I addressed the group and I said: "Now I think we should organize, and I'll take care of getting us organized, if that's what you want." And they all agreed that's what they wanted. And Earle Breeding passed around his Marine utility cover to get a collection, and he immediately became our first Treasurer because of that.

And I went back here and saw a law firm, Padway & Padway here in Milwaukee, and we became incorporated as a Wisconsin Incorporation, Nonprofit, Non-stock, and the date of that is September 1, 1988.

Our Khe Sanh veteran group met annually as part of the Third Marine Division Association. We let them do all the arranging for rooms and everything else, and we would meet like one afternoon during the reunion as a group. This lasted about five, six years until we decided we were large enough—we were getting like 70, 80 of our own people. We wanted to

have our own reunion. So we broke off. Because at that time Third Marine Division Association was mainly World War II, which didn't want much to do with us, and also, for example, if we would meet on a Saturday afternoon they would suddenly have a parade or something to go to that really interfered. They made our guys make a decision. So we really didn't feel welcomed, and we started meeting separately. And since then—about that time, I withdrew from active leadership. I knew that if a group were to succeed it had to develop its own leadership, and quite frankly I was working on the book at that time and was caring for my ailing parents and I was doing church work. There were a lot of things going on. So others stepped forward, and the group is very solid. We have over 3,000 members now, and they still meet annually, and we still put out a first-class magazine that's a good quality magazine. And the book was published. Unfortunately the book was published. It's called a "Marc Jaffe" book. It's published by Houghton Mifflin. Marc Jaffe was a World War II veteran, and from what I heard from John Prados, Houghton Mifflin was trying to get rid of him and they gave him this one book as his project for the year, and didn't do any publicity at all, which John Prados thought was very unusual and very detrimental to it. They only had a printing of 5,000 copies, did no publicity, there were no talk shows, there was no advertisements, there was nothing. It didn't sell obviously well, then. I bought up a whole bunch of them and gave them out for free to quite a few of our Khe Sanh vets. The book became "remaindered," which meant that I could buy more for about $2.00 apiece, which I did, and I remember seeing a whole stack in Barnes & Noble one time. Then it was out of print for a long time. Then it came back as a paperback by Dell, and there were a couple minor revisions of some incidents there. Then about two years ago the Naval Institute Press wanted to reprint the original one, not the one with the revisions, but take the plates—it had to be the same content on each page, and it came out as a quality paperback. So that's the history of that book.

Kurtz: The casualty book?

Stubbe: OK, the casualty book—I had come out with a smaller casualty—well, first I came out with just a listing back in the late 80s, like two pages of a letter that would be folded over into four pages, something like that. It was just a listing of people and their location on the Wall. Then about '90, '91, I came out with a book called *The Final Formation* which was a little bit more detailed about the casualties that I knew about, maybe where they were, what was happening. But it was very abbreviated. It was about 200 pages long. I had just gotten my computer. It was the first thing I did on my computer. and it was really a learning process. I did that and paid for it by myself and it was sold by our Khe Sanh group—given to some and sold. After that I received innumerable comments of people saying you should have added this or added that of whatever else. So I kept all of these in a big box with the idea that eventually I would rewrite it. In the meantime, also, families of those killed would—that I came in contact with—said that they received very little information about their son or their husband or their uncle, that when people called on them, they learned very little. In fact, sometimes maybe they were told false things, or just were not able to understand. So anyway, I decided when I redo this I've got to put in some background information so people will understand the bigger picture as to why a unit was involved, or why an incident occurred, or that kind of thing, and also to cover the whole breadth of the Khe Sanh battlefield from beginning to end, not just the siege, but through the time the Army was there in '71, '72 era. So I embarked on this and put together all my records pertaining to—I made folders for each day of an incident, and started putting everything in these folders and went through all my files, which are extensive—I'm talking of over well over 100,000 pages of files, of official documents, of interviews, of award citations, of whatever—anything that pertained to the day of the casualty of why an incident occurred. In some cases, these folders might be two inches thick; in some cases only one page, but I had something. So I started to organize it, and then I solicited more comments. I said: "I'm going to come out with this, please send me more," and people did. So I got memoirs, and poems, and letters written home from Vietnam, and all sorts of things, and I just started writing, and going on and on and on. By that time I was living alone, and I had no other obligations. So that's what I did. I just devoted day and night for a little over a year, weekends, doing nothing but writing this book. I finally finished it. I found out that I could get it printed by the same people that put out our [Khe Sanh] magazine, for well under what I thought it would cost. I think we finally got the cost per book was like seven dollars. It was over 400 pages long. Which is very interesting to me that we could do that. And there was a lady in London who had made a painting that she called "Khe Sanh." She had a friend who was a correspondent who was there, and she said I could use her painting for the cover, which I did.

So anyway we got that done. It got finished in May, and our Khe Sanh reunion was going to be in early July. I wanted to get it ready for the reunion to save a lot of postage—to get it to them. And so because of that I really didn't proof read it as much as I should; there are quite a few typographical errors, places where the computer—I can't say it was always my fault, but the computer would sometimes do things, like for example, instead of "the" I would have "t9he," or somehow a number would enter a word or instead of "too" I would have "to0." It would just get in there; I don't know how. So there were a few times those got in there and I could have polished it up more, but I just didn't have time. I thought there would be a thousand

copies printed. I paid for that myself; I donated the $7500.00 or whatever it was, but they could only print 850 copies, and then our veteran group had to put in a thousand dollars, too, because of preparing pages for printing. So I got a few hundred copies and sent them off to families of next of kin and people who had made major contributions and also libraries and archives. It was printed on acid free paper, mainly so these people would never be forgotten. Then the remainder went on sale at our reunion as a way of making some money for our organization. I think there's still a few copies left that they still sell. But for the most part it's all gone. And again, I've received maybe a box full of additional things on some people I didn't have much information on. And I plan to come out with a small supplement that will include some more information. But I'm sort of through with that.

The only other project I have is a book that I might come out with that will be the North Vietnamese history of the battlefield, and that's based on some books that a fellow named Robert DeStatte, who was with General Vessey in Hanoi, sent me. I didn't know him from Adam, but he knew I was interested in Khe Sanh and he sent me these books of history that the North Vietnamese had come out with on Khe Sanh. And some of them are even classified Secret by the North Vietnamese. And I had them in my safe. It was like a treasure that I couldn't read; it was very frustrating. And I made several attempts—Vietnamese here in Milwaukee, Vietnamese veterans, through other people I knew. And a lot of people said: "We can do this," and then they never did. Finally a fellow named Sedgwick Tourison, who had been a document translator for Lieutenant General Davidson on the MACV staff—I contacted him one day because he had written a book on agents and it was very interesting, a good book. And I said: "Are you writing any more books?" And he said: No. And he went on; we had a long conversation on Tonkin and all the background on that. He had been privy to a lot of military documentation and I thought: This was so interesting, I could listen to him for hours. And he was doing translating work for Vietnamese here in the states in the D.C. area for legal and hospital for people who couldn't speak English that well, pro bono kind of work. He had worked at the Pentagon. He said to me: "Did DeStatte ever translate any of those books he sent you?" I said: "No; I'm very frustrated. I would like to." He said: "Well, make some Xerox copies of the pages you want. I can do it over the phone. I can translate it as I read it, and you can record it on cassette and I'll transcribe it. So we did that for a little over a year, once a week—three, four hundred pages with tables! It's very detailed and very interesting. None of this is available in English. And I thought, well, how interesting that our Khe Sanh guys would be the first to read it. So that's been done for a little over a year, and all I want to do with it—I plan to do what he did it but with some footnotes where I think they're in error. And I thought I'd do it before the academics get a hold of it to make money or assign it to their own bias or to use it to make academic credentials. I just want to do it for the guys, so they can find the other side of the story. And in some cases if a guy is wounded on a certain day, he can figure out what unit fired at him and where it came from and what the plans were of the North Vietnamese. Of course, in some areas they are definitely way off, but in many cases they're probably way on and they supply some missing information—like when our platoon went out and got decimated, they talk about what that all was and who fired on Captain Pipes—they even have the name of the Vietnamese who fired on him, and all this sort of stuff. It's all there. So Tourison said I should publish commercially through the Naval Institute. Then I'd have to revise and edit; my interest is just to get it out to the guys. I don't know when I'm going to do that, but that's the other thing I plan to do.

And then after that, as Bob Brewster says, I still have some stuff—in fact, I still have all the documents that I microfilmed, the 105,000 pages in 30, 40 boxes which I plan to use for this book. But once I get through with all of that, then you all can have everything. But right now you do have everything. You have the microfilms. If that were lost, it still wouldn't be all lost. After a few other years, you'll have everything if you want.

So that's how the book came out, the organization. And I'm sort of in the background now, and that's fine. I feel really in the background because in the last decade or so the internet has really taken over, and I'm not on the internet, and we do have a Khe Sanh web page. A few years ago they sent me all the pages, three or four hundred pages. There was a lot of interesting stuff and a lot of stuff that was nothing. And since then I haven't received anything, and I'm sure the guys are talking back and—

[*end of tape and all interviews*]

APPENDICES

NATIONALLY BROADCAST TELEVISION PROGRAMS IN WHICH I APPEARED OR WAS INTERVIEWED:

- "Vietnam: A Soldier's Story" aired on The Learning Channel, Sep 6, 1998,
- "War Stories with Oliver North: Khe Sanh," aired on Fox News, Oct 28, 2001,

- "Atmospheres: War and Weather," aired on The Weather Channel, March 3, 2002,
- "R. Lee Ermey's Mail Call: Back to Vietnam," aired 11 November 2005, on The History Channel.
- "Inside the Vietnam War," aired 18 February 2008, on the National Geographic Channel.
- "Wisconsin Vietnam War Stories: Our Veterans Remember," by Wisconsin Public Television. [My part is on Disc 1, Part 2, Chapter 4, 17:30-24:55, with the NSA, DaNang portion at 23:57-24:55].
- "LZ LAMBEAU TRIBUTE May 22, 2010," by Wisconsin Public Television. [My prayer in the stadium before 35,000 is in Chapter 10, 42:00 - 45:55]

MISCELLANEOUS INTERVIEWS

1991

22 Jan: Interview by Paula Pouda of Milwaukee Journal Sentinel

1992

06 Mar: Interview by Steve Paulson, WHAD

1993

23 Feb: Interviewed at home by Mike Bartley (TV channel 6, Milwaukee); broadcast

1998

23 Jan: Interview by Bob Kurson of Chicago Sun Times

2001

24 Aug: 1030-1730: interview at home for Fox News by Ollie North. Two large vans with TV staff and equipment arrived from Chicago, Ms. Ayse Wieting of Fox News from New York City, and Ollie North here, for interview for TV program. (Aired Sunday, 28 Oct 2001, on FOX NEWS "War Stories with Oliver North: Khe Sanh").

07 Nov: Interviewed on Khe Sanh at home, and aired this date on 6 PM news, Channel 58, WDJT.

07 Nov: Two interviews this date: Rob Golub of the Racine County newspaper, The Journal Times (with photographer), and a lady from Channel 12 (WISN), Milwaukee, WI.

09 Nov: Interviewed by Bob Bach of radio WUWM (FM 89.7).

2002

In TV documentary, "A Time for Honor," produced by Calian Films, Effingham, Il. Interviews in Chapter 4 and at end of program, in DVD format.

03 Mar: Interviews appear in TV program, The Weather Channel, program: "Atmospheres: War and Weather."

2005

29 Apr: On WHAD (FM 90.7) 0900-1000, Kathleen Dunn's program (with Joe Campbell) on 30th anniversary of the end of the Vietnam War.

20 Jun: Interviewed at home with professional recording equipment for display in new Marine Corps Museum, Quantico.

15 Aug: Received copy of Drez, Ronald J. and Brinkley, Douglas, Voices of Courage, The Battle for Khe Sanh, Vietnam, New York & Boston: Bulfinch Press, 2005. My photos appear on pp. 7, 16, 20, 30, 31, 33, 35, 46, 56, 105, 122, 132, 135, 136, 142, 156, 173; the 2 audio CDs are "courtesy of Ray W. Stubbe [credited on p. 186], I am mentioned on pp. 56 and 180 and pictured on pp. 56 and 132. My interviews are quoted on pp. 97, 98, 99, 100, 107, 108, 143 (3 times), 153, and 167.

11 Nov: Appeared in television program, The History Channel, "R. Lee Ermey's Vietnam, Mail Call," program titled, "Back to Vietnam," at 8PM. Appearances at 0:55:47, 0:56:02, 0:57:58, and 0:59:21.

05 Dec: Interviewed by James Kurtz of Wisconsin Veterans Museum, oral history archives collection. (Plans to do several additional tapes.)

2006

15 Feb: Second interview by Mr. James Kurtz of the Wisconsin Veterans Museum, covering the siege. Interview was about 3 hours.

06 Mar: Interviewed by Mr. Martin Hintz of M Magazine concerning Khe Sanh. Am due to be in the May, 2006, issue. Mr. Nathan Harmann came to my house on 09 Mar to take photographs for the issue.

26 Apr: Interviewed (third time) by Mr. James Kurtz of the Wisconsin Veterans Museum (covered post-Khe Sanh period).

2007

10 July: Interviewed by Judy Cole for National Geographic and filmed for TV program to be released early next year by two cameramen from Taylor Production Center who transformed my living room into a TV studio with yards of cords, large TV camera, lights, etc. Interview focused on siege battle at Khe Sanh.

2008

18 Feb, National Geographic Society Channel (Channel 69 in Milwaukee) has a 3-hour special on Vietnam which includes photo of me conducting services at Khe Sanh and also a very brief interview (in which I mention the man on the stretcher with the open abdominal area) about an hour into the program.

29 May Interviewed for three and a half hours by MIK DERKS of Wisconsin Public Television, Madison, for a large program to air in 2010, "Wisconsin War Stories." Interview at Holiday Inn, New Berlin. Derks' phone: (608) 924-3473. I brought various photos. (They scanned, on the spot, the personal ones, and I lent them the copy of my collection of Khe Sanh photos).

11 Nov Interviewed in the afternoon by Renira Pachuta of News Graphic (PO Box 47, Cedarburg WI 53012). Renira, home (262) 377-0186, work (262) 387-4864, for article on my talk next week. Asked about what a chaplain did, about Khe Sanh, etc.

2009

12 Jan - Completed watching the Dirks DVD interviews. It's apparent that I was becoming quite weakened emotionally by the interview and got emotional at the end, pausing to hold back tears! The interview had been very draining.

2010

25 May: My interview appeared on Channel 10 tonight, part of "Wisconsin Vietnam Stories"

2012

02 Aug 0811: Called by NEW YORK CALL (Michael WELT, 212-560-9770), and gave an interview concerning Khe Sanh for about an hour. Later wrote him and sent him various documents. He works with KEN BURNS programs. Address: MICHAEL WELT, Florentine Films, 875 6th Ave., STE 1101, NY NY 10001.

A SELECTION OF WRITINGS PERTAINING TO VIETNAM

1967

"A Letter from Viet Nam," Peace Lutheran Church, Byron, Il, *The Peace Pipe* 1:3 (Dec 1, 1967). [Copy of a letter I wrote to Rev. Robert Wurtz].

1969

"Power Based on Flowers Withers in the Heat," MCRD, Parris Island, SC, *The Boot* 28:21 (Friday, Aug. 1, 1969), p. 2.

"Huss That Doesn't Cut," MCRD, Parris Island, *The Boot* 27:43 (Oct 24, 1969), p. 2

"Birthday at Khe Sanh," MCRD, Parris Island, SC, *The Boot* 27:45 (Nov. 7, 1969), p. 3.

"Marine Corps Anniversary," Beaufort, SC, *Sea Islander* 3:9.

1970

"The Time is Double Time," MCRD, Parris Island, SC, *The Boot* 18:2 (Jan. 6, 1970), p. 2.

"Chaplain Column," MCRD, Parris Island, SC., *The Boot* 28:17 (Fri., May 1, 1970). PAGE ?

"Why Am I Here?" MCRD, Parris Island, SC, *The Boot* (Aug. 7, 1970).

1973

"Birthday at Khe Sanh," Third Marine Division, *Oki Marine* 5:19 (Nov., 9, 1973).

1978

"Chaplain's Corner," Naval Training Center, Great Lakes, Il., *Bulletin* 43:35 (Sep. 1, 1978), p. 6

1979

"And You'll Never Swim Alone," Naval Training Center, Great Lakes, Il., *Bulletin* 44:27 (Jul. 6, 1979), p. 12.

Prayer on Flag Day, 14 June 1979 reprinted in Naval Training Center, Great Lakes, Il., *Bulletin* 44:25 (Jun 22, 1979) p. 10.

1980

"Would You Believe," Naval Training Center, Great Lakes, Il., *Bulletin* 45:33 (Aug. 22, 1980), p. 8.

1983

"Life is Relationship," Naval Training Center, Great Lakes, Il., *Bulletin* 50:6 (Feb. 11, 1983), p. 16.

"Vietnam Vet Help," Naval Training Center, Great Lakes, Il., *Bulletin* 58:40 (Oct., 7, 1983), p. 20.

(No by-line, but I wrote it), "People Under Stress," Naval Training Center, Great Lakes, Il, *Bulletin* 58:41 (Oct. 14, 1983), p. 40.

"Chaplain's Corner," Naval Training Center, Great Lakes, Il., *Bulletin* 58:43 (Oct. 28, 1983), p. 9.

1985

"A Suggested Reading List on Vietnam Veterans and Post-Traumatic Stress Disorder, in Kelly, William E.,M.D., ed., *Post-Traumatic Stress Disorder and the War Veteran Patient*, New York: Brunner/Mazel Publishers, 1985, pp. 293-322. (Brunner/Mazel Psychosocial Stress Series).

1992

"Khe Sanh—Remember Each Man," Lombard, Il.: *Veterans Voice of America* 5:6 (Jan., 1992) p. 9.`

1993

"A Large Battle in a Small Place: Khe Sanh in Vietnam," U.S. Marine Corps Historical Center, Washington, D.C.: *Fortitudine* 22:4 (Spring, 1993) pp. 23-26.

Reprint of *Valley of Decision* in paperback edition. New York: Bantam Doubleday Dell Publishing Group, Inc., January, 1993. [Contains several revised pages, notably of the 9 February 1968 battle by A/1/9].

1994

1996

The Final Formation, Those Who Died Because of Khe Sanh, 1995. [210 pages; published 12 March 1996].

Letters (of 18 Jan 1968, 20 Jan 1968, and 21 Jan 1968), printed in Stevens, Michael E., ed., *Voices from Vietnam*, Madison, Wisconsin: Center for Documentary History, State Historical Society of Wisconsin, 1996, pp. 141-145; SSGT John Reid's photograph of me leading worship on 28 Jan 1968 printed on p. 143.]

[Wrote most of and edited]: Khe Sanh Veterans, Inc., *Khe Sanh Veteran*, Issue No. 37 (Fall, 1996).

"War is Obviously Immoral,´ Wauwatosa, Wi., *News Times* 98:47 (Nov., 21, 1996) pp. 1, 13.

1997

[Wrote most of and edited]: Khe Sanh Veterans, Inc., *Khe Sanh Veteran*, Issues No. 38 (Special, 1997) and No. 39 (May, 1997), special issue on 1967 Hill Battles at Khe Sanh, and No. 40 (Fall, 1997).

Poems, "The Soul Mate" and "Time Warp" published in Whitmarsh, Barb, ed., *Incoming IV*, Aurora, Missouri, [1997], pp. 71 and 88.

1998

[Wrote most of and edited]: Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 41 (Spring, 1998).

"Why Vietnam Poetry," in K. L. Bye, *Tarnished Glory*, Circle Pines, Mn.: Turtle Run Publishing, 1998, p. 7.

1999

[Wrote most of and edited]: Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 44 (Summer, 1999).

"Ray Stubbe," in Ron Steinman, *The Soldiers' Story, Vietnam in Their Own Words*, New York: TV Books, 1999, pp. 93-98. [Biog. on p. 365].

2001

Letter (of Jan. 21, 1968) in Carroll, Andrew, ed., *War Letters, Extraordinary Correspondence from American Wars*, New York: Washington Square Press, 2001, pp. 406-408. [Mr. Carroll had received over 10,000 letters and selected 200 for this book. In a hand-written note in a book Mr. Carroll sent me: "To Chaplain Ray Stubbe—You are a real hero in my book (literally), and it is an honor to have you included. Thank you very much."]

[Excerpts from Carroll's book, *War Letters*], Milwaukee Wisconsin, Journal Sentinel Aug. 26, 2001, p. 2E.

2002

Letter to the Editor, *VFW magazine* 89:5 (Jan., 2002) p. 6. [Notes erroneous official count of 205 KIA at Khe Sanh].

"Chaplain's Corner," The Retired Officers Association, Greater Milwaukee Chapter, Substitute Newsletter, [distributed May, 2002].

Khe Sanh and the Mongol Prince, a monograph, published Jul 16, 2002. [Submitted to *Journal of Military History* but rejected for publication].

"No Safe Place at Khe Sanh," Vietnam Veterans of America, *Veteran* 23:2 (Mar/Apr 2003), p. 14. [A commentary on a photo by Robert Ellison, part of a series by Catherine Leroy].

"Mom's White Hair," Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 57 (WSinter, 2003/04), p. 55. [A poem].

"Ray's Corner," Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 56 (Fall, 2003), pp. 6-8. [Copy of letter written to Mr. John Pessoni, and photograph in room with plaques].

2004

"Mom's White Hair" in Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 57 (Winter 2003/04) p. 55. [A poem].

"Memories of Past Reunions," [Comments at Khe Sanh Veterans reunion, 1990, Nashville, Tn.], Khe Sanh Veterans, Inc., *Red Clay*, Issue #58 (Spring, 2004), pp. 45-46.

Photographs in Khe Sanh Veterans, Inc., *Red Clay*, Issue #58 (Spring, 2004), P. 39 (of ontos), p. 23 (conducting worship on bunker being built at Lang Vei), pp. 28-29 (colored photos of scenes of Hill 861.

[Numerous quotations in]: Floyd, LtCol W.C., *Green Ghosts*, New York, iUniverse, Inc., 2004. [Floyd's hand-written note inside the book: "To Chaplain Ray Stubbe. Ray, I thank you for allowing me to use so much of your research and writing. As you browse through the contents of "Green Ghosts" you will wonder why you are not listed as co-author, but without your thoughts and insight I would not have been able to do justice to the chronicle of these men in combat. Thanks for your service to our country and your love of the Marines whose life you touched. You are a true American hero and more importantly a "real man of God." Semper fi, Bill Floyd."]. [Excerpts from my Aarugha are on pp. 7-9, 10-11, 12, 13-14, 22-23, 38-39, 50-51, 80, 87-88].

Photographs in Khe Sanh Veterans, Inc., *Red Clay*, Issue #59 (Fall, 2004), pp. 32-33 (scenes of Hills 881 South, 950, 471, and CAC OSCAR).

Photograph of Hill 950 scene, in LtCol James B. Wilkinson, " 'All is Calm, All is Bright' For the Last Time at Khe Sanh," Marine Corps Association, *Leatherneck* 87:12 (Dec., 2004) pp. 18-19.

2005

"Khe Sanh," in Catherine Leroy, *Under Fire, Great Photographers and Writers in Vietnam*, New York: Random House, 2005, p. 67.

"Khe Sanh's trenches mirror the war's gash into my soul. Struck within its networks, then and now, images of men I came to know as their chaplain during the six months prior to the siege continue to explode within me.

"At Khe Sanh, we dug deeper and deeper. Deadly incoming–up to 1,600 rounds a day–instantly leveled all aboveground structures and sculpted moonscape devastation. Two craters outside the Battalion Aid Station were so deep, I could stand in them and my head would be below the surrounding surface. We all know" there is no safe place in Khe Sanh.

"Since groups larger than six were prohibited (one round might kill everyone), worship services were small in size and frequent in number: a short prayer, a two-sentence sermon, a reading from the Bible, Communion, and a blessing: all within ten minutes–were repeated from trench to trench a dozen times daily. Sometimes, since the incoming was so intense, all I could do to communicate God's love was to hug. Once, I was alone and my prayers reduced to babblings as I bounced from the shock of explosions of nearby land mines. I held the hand of one painfully wounded man who asked me to say the Ninety-first Psalm, and prayed with another who shared his joy over a wrestling scholarship and his imminent departure. A few days later, he was killed. I stayed overnight with a 106mm recoilless rifle squad. We shared coffee and conversation. The next day, I pulled out and carried a headless Marine from the rubble after that position took a direct hit.

"Khe Sanh was alive with death. Another chaplain, Father Brett, was killed when one of the Khe Sanh trenches took a direct hit. At Graves Registration, I prayed over the corpse of a man I had just baptized a few days earlier.

""My bunker was crowded with wounded waiting through the night to be evacuated. I slept atop a field desk. Nearby, a Marine I knew well, Rick, dabbed his head with a roll of toilet paper. The floor below was filled with his bloody, crumpled papers. I was startled to see him the next day digging deeper trenches in the recon area. "That wasn't my blood," he explained, "It was the blood from others in the trench that were killed."

Letter (written Feb. 5, 1968, at Khe Sanh, Vietnam, printed in) Andrew Carroll, Behind the Lines, New York: Scribner, 2005, pp. 192-194.

Various of my photographs taken at Khe Sanh (in black and white version) appeared in Ronald J. Drez and Douglas Brinkley, Voices of Courage: The Battle for Khe Sanh, Vietnam, New York: Bulfinch Press, 2005: p. 7 (welcome to Khe Sanh), p. 16 (scene while on patrol, in river), p. 20 (hill facing 861), p. 30 (Fr. McElroy on Hill 950), p. 31 (Hill 950), p. 33 (conducting worship on hill 950), p. 35 (recon team on airstrip), p. 46 (C/1/26 bridge site), p. 56 (personal in parachute gear while on Okinawa), p. 105 (CAC O HQ), p. 122 (CH-53 in air), p. 132 (conducting worship on TOC being built at Lang Vei), p. 135 (aerial

of old Lang Vei), p. 136 (Capt Willoughby at Lang Vei), p. 142 (CH-54 sky crane over Khe Sanh carrying vehicle), p. 156 (recon team on airstrip), p. 175 (aerial of Hill 861 and surrounding hills). Photo credits are listed on p. 186.

Battalion of Kings, Wauwatosa, Wisconsin, 2005. (469 pages, 4023 footnotes, chronicles casualties on the battlefield of Khe Sanh, Vietnam, printed May, 2005].

Ray's Corner: Presentation to Wisconsin State Veterans Museum on Donation of Khe Sanh Materials, 10 November 2005," Khe Sanh Veterans, Inc., Red Clay, Issue No. 63 (Winter, 2005), pp. 55-61.

[Various poems published in] Khe Sanh Veterans, Inc., The Khe Sanh Veterans Book of Poetry, 2005. [Poems I wrote are: "Incoming on the Battlefield," pp. 141-144, "Determination," p. 144, "Mom's White Hair," pp. 145-146, "Three Movements," pp. 146-147, "Persistence," pp. 147-148, "The Gallery," pp. 148-149, "Veterans Day," pp. 149-151, "Time Warp," p. 151, "The Soul Mate," pp., 151-152.]

2007

Book review of A Long Healing Come Slowly. Khe Sanh Veterans, Inc., *Red Clay*, No. 68 (Spring, 2007), pp. 56-57.

Letters written in Vietnam printed in: Carroll, Andrew, ed., *Grace Under Fire, Letters of Faith in Times of War*, New York: Doubleday, 2007, pp. 93-101, and Colorado Springs, Co.: WaterBrook Press, 2007, pp. 95-103. [Letters of Aug 16, 1967, to Rev. Charles E. Witt; Nov. 25, 1967, to Ellen and Jim Kuehl; Jan. 20, 1968, to parents; and Jan. 21, 1968, to parents]. [Book promulgated in March, 2007].

[Quoted in:] Andrew Carroll, "Why They Pray," *The Wall Street Journal* 249:56 (Mar. 9, 2007), p. W11. [Quote from letter of Nov. 25, 1967, to Ellen and Jim Kuehl: "You would be amazed at the faith expressed here. There are evidences of genuine and deep prayer life, of reading and knowing the Bible backwards and forwards, of sacrificial concern for others." Carroll seized the term "sacrificial concern for others."]

19 Nov Gave presentation to 100+ chaplains at Naval Training Center, Great Lakes

2011:

15 Mar Gave presentation to Wauwatosa Retired Men's Club on my combat experiences in Vietnam
25 May Gave presentation to about 100 psychiatrists, psychologists, and social workers at Matusek Auditorium, VA, Milwaukee, on my combat experiences as a chaplain in Vietnam and PTSD.
30 May Gave presentation at Longfellow Middle School assembly (several hundred present) on Khe Sanh (Photo in Wauwatosa *NOW* newspaper, 02 Jun)
14 Jun Gave invocation at Flag Day event, Marcus Center for the Performing Arts, Milwaukee, WI
27 Jun Presentation to group of Iraq/Afghanistan vets at Domiciliary 43, VA, Milwaukee
23 Jul Gave Invocation at Dedication ceremonies, Veterans Quest, 117th and Greenfield
05 Aug Gave presentation to group of teachers, Brookfield, WI
05 Aug Gave prayer at national meeting of Parents of Murdered Children, Radisson Hotel, Milwaukee (over 200 present)
28 Aug Presentation to group of Iraq/Afghanistan vets at Domiciliary 43, VA, Milwaukee
22 Oct Gave Invocation and Benediction prayers at 20th Anniversary of the Dedication of the Vietnam Memorial, Veterans Park, Milwaukee, WI (about 100 present)
09 No v Gave presentation to Shorewood Senior Center on combat experiences as a chaplain
11 Nov Gave Invocation and talk at Veterans Day ceremony, Miller Coors Brewing Co., Milwaukee WI

2012

06 FEB Presentation to Iraq and Afghanistan veterans, Bldg. 43, VA, Milwaukee
14 JUN Prayer at Milwaukee Flag Day event, Performing Arts Center, Milwaukee
20 JUL Presentation to teachers, Elmbrook Church.
02 AUG 1-hour telephone interview with MICHAEL WELT, New York (212-560-9770)
17 AUG Prayer at veterans event, traveling Vietnam Wall, Sunnyview Expo Center, Oshkosh
27 SEP Presentation to "Youngtimers," Boy Scouts of America, Milwaukee Headquarters
11 NOV Prayer at gathering on grounds of Froedert Hospital for recently discovered Civil War veteran (Hermann Borghart) buried there
11 NOV Prayer, annual Veterans Day Banquet, War Memorial Bldg, Milwaukee
12 NOV Prayer for a gathering (about 300) at annual Veterans Day event, Miller Coors

2013

14 Jun: Gave prayer at Flag Day event, Peck Pavillion, PAC, Milwaukee
29 Jun John Prados asks me to write article for American Legion magazine
19 Jul Presentation to teachers on Khe Sanh at MATC, Oak Creek with Joe Campbell
11 Nov Veterans Day. 1100: At Miller Coors to give Invocation and Table Grace, 1530: Gave main address for event at Lutheran Home (mainly WW II vets), 1800: Gave Table Grace for Veterans Day Banquet at War Memorial, Milwaukee.

MISCELLANEOUS WRITINGS AND QUOTATIONS INCLUDED IN BOOKS AND NEWS ARTICLES [A SELECTION]

1966

"Pastor in Naval Reserve Commissioned Lieutenant," Community Newspapers, Inc., Oak Creek *Pictorial*, No. 521 (10 March 1966), p. 16.

[Photograph of swearing in, and the following:

"An Oak Creek pastor, the Rev. Ray W. Stubbe, recently was commissioned a Lieutenant, j.g., in the chaplain corps of the U.S. naval reserve.

"He is the pastor of All Saints Lutheran church. He drills on Tuesday evenings with the group command at the naval and marine corps reserve training center.

"The navy is not new to the Rev. Mr. Stubbe, who has accumulated a total of nine years of service. He enlisted as a seaman recruit just after entering his senior year at a Milwaukee high school.

"Following graduation, he spent two years active service aboard the Destroyer NOA 9DD841) which took him to Greece, Lebanon, Italy, Cuba, and the Virgin islands.

" 'I knew before I enlisted in the navy reserve that I would be entering the seminary but I didn't want to be different from other men or privileged; I think all seminary students and clergymen should be liable to the draft,' commented Pastor Stubbe.

"He continued his active naval reserve participation while attending At. Olaf college, Northfield, Minn. He spent a summer with naval intelligence and was commissioned an ensign after entering the seminary.

"Pastor Stubbe intends to serve his 18 years active duty in the navy after earning his Ph.D. degree. He will then teach philosophy and theology sometime in the future.

"He is presently engaged in organizing a congregation that meets in the community room of the Oak Creek Marine National bank. It is under the auspices of the board of American missions of the Lutheran Church of America."]

1967

"God Alive for Marines," Milwaukee, WI: *Sentinel*, Nov. 25, 1967, Part 3, p. 7.

"God is far from dead in the 1st battalion, 26th marines, according to the chaplain, Lt. Ray William Stubbe.

"Chaplain Stubbe sends regular reports on his activities in letters to his parents, Mr. and Mrs. Clarence Stubbe, 2422 N. 60th St.

"Lutherans in Oak Creek remember the chaplain as Pastor Ray Stubbe, who organized All Saints Lutheran church. In July he left for chaplaincy duty. Although a navy chaplain, he is serving with a marine unit.

"He grew up in Redeemer Lutheran church and frequently comments on its bulletin, which he receives.

"Chaplain Stubbe said the men 'are deeply religious, on the whole, not because they're scared but, I feel, genuinely so.

" 'Many read their Bibles daily. Many wear, or want to wear crosses (openly, since many don't wear shirts). Some have the cross on their battle helmets.

" 'Many come up to me with religious questions—many others with deep problems.'

" 'Today is Sunday. We had a larger attendance than usual at our morning worship, despite the rain and the mud. The pulpit was made by the men in one of the units here who presented it to me one evening out of appreciation for visiting them and taking a personal interest in them. They said I was the first chaplain to take the time to do that.'

"In another letter he explained that many chapel services employ stacked boxes for the pulpit.

"One letter expressed concern about the situation in Milwaukee during the riots. It contained a newspaper clipping showing a picture of Father James E. Groppi and commandos of the youth council of the National Association for the Advancement of Colored People.

"The story predicted that the open housing marches would continue.

"After reading about the riots he asked if the house of former Mayor Frank Zeidler was all right.

"If the old custom of inviting the minister to dinner has died in the United States, it is alive in Vietnam. Chaplain Stubbe wrote of a ceremonial dinner in a Vietnamese home in which he was a guest.

" 'The homes are built of stilts, to protect from the rains and have thatched roofs,' he wrote. 'They are very small inside.

" 'The occasion was a worship ceremony and sacrificial meal. He (the host) threw little pieces of bamboo and talked with his ancestors... He rotated a platter of rice six times one way and eight times the other way.

" 'He said the six times stood for six bad dreams he had that the gods would take away from him, and the eight times stood for eight good dreams the gods would fulfill for him.

" 'The meal consisted of rice prepared several different ways, and the sacrificial pig. The latter, fortunately, was cooked. But—over all the pieces of meat was poured fresh blood. You're expected to eat everything placed in front of you or you deeply insult the natives.

" 'Fortunately, the two marines were with me and they ate the bloodied pig!'

"The sacrificial pig, he wrote, cost the host $15, and he earns about $30 per month.

" 'What a tithe offering—50%!'

"At the end of the ceremony the man said, 'Gods don't help. Doctor's medicine does.'

"If Pastor Stubbe ever was a 'desk clergyman,' Chaplain Stubbe is not now a stationary officer. His letters tell of going on patrols with units, and of numerous trips by helicopter, and on foot.

"One letter, however, added news of a different experience:

" 'You'll never guess what you son's doing now! Going on patrols was not enough; eating local dishes was not enough. Now he's going through exercises with the reconnaissance units here.

" 'There are small groups of men who blacken and camouflage their faces and go out for a walk, living and sleeping in the jungle.

" 'Well, today I got all wet, going through river crossing drills. Tomorrow I will be 'repelling' from a helicopter. This is going down a rope, like going down a cliff on a mountain, by jumping off the cliff, having a rope about your torso through which another rope runs. Only, in this case, there is no cliff.

" 'The chopper goes up 100 feet or so, and we fall down on the rope, catching ourselves periodically to brake the rate of descent.

" 'When this happens, you bounce up and down 10 feet or so. You're in a lying down position on the descent. Sounds like a lot of fun, doesn't it?'

"Between church services, patrols, reconnaissance workouts, counseling marines, etc., Chaplain Stubbe finds time to read.

"He repeatedly asks for his books from his theological library—'The Fourth Gospel' 'Consummatum Est,' 'History and Tradition in the Fourth Gospel,' his Greek New Testament, and books of Scripture explanation.

"But he also requested several comic strips and newspaper clippings—specifically from The Milwaukee Sentinel's religion news section."

(Photo and article), Evangelical Lutheran Church of the Redeemer, Milwaukee, WI., *Tidings* 39:4 (Dec 30, 1967).

Photo of conducting worship on Hill 950 at Khe Sanh and a short article:

"The above picture was sent to us by Chaplain Ray Stubbe, who is serving with the Third Marines in Viet Nam. It pictures the conducting of a worship service on top of Hill 950, overlooking the Khe Sanh mountains in the background. The pews and altar are made of C-ration boxes.

"Chaplain Stubbe reports a sincere desire on the part of the men when he serves for the spiritual ministry which he has to offer.

"Perhaps those who serve in such uncertain circumstances are even more appreciative of the Word, which represents the one thing of permanence that they know. Although the war in Viet Nam is an unpopular war with the American people, and generally speaking not a well understood war, these men deserve our support in any way that we can give it. They also deserve our best efforts in helping to achieve a world of peace and security. Let us support them daily in our prayers."

1968

"Viet Chaplain Finds Atheists in Foxholes," Chicago *Tribune*, Feb 14, 1968.

'Saying Not True'

" 'KHE SANH, Vietnam. Feb 13 (AP)—The proportion of atheists in foxholes is the same as that found on any peaceful street in the United States, a chaplain ministering to the much shelled marines at this encircled combat base finds.

" 'I know the old saying that there are no atheists in foxholes,' said Chaplain Ray Stubbe of Milwaukee. 'Maybe that was true once, but it isn't now. Perhaps the world has changed, I don't know.'

"The 5,000 marines defending Khe Sanh already have suffered more than 10 per cent casualties, and the leathernecks know the battle is just beginning.

" 'The shelling isn't bringing in any more men,' the 29-year-old Lutheran said. 'I am getting the normal calls from men with family problems and I talked with one conscientious objector. Their religious attitude hasn't changed much, but those who already were moderately religious tend to be more so. When the incoming artillery begins exploding they say they pray and pray hard.'

"Making religious sense out of the shellfire and North Vietnamese siege is difficult for many marines. Blind luck often seems to determine who lives and dies.

"The Rev. Stubbe, who daily walks thru the Marine lines to give services at bunkers, quotes St. Matthew's account of the great storm that threatened Christ and his disciples.

"Jesus calmed the storm and asked his fearful disciples: 'Why are you afraid? Have you no faith?'

"The chaplain tells the men: 'In this situation we feel things are in turmoil, but we know we can pray to a God who is strong and who can control things.'

"The Rev. Stubbe requested duty in Viet Nam and tries to live as close to his men as possible. He was nearly killed twice in one day by rockets as he walked thru the base to hold services.

"But he finds his work highly satisfying.

" 'I am a chaplain with them all week, in their moments of pain and their moments of joy,' he said."

"Red Shells Don't Dent Atheists at Khe Sanh, Chaplain Finds," Milwaukee *Journal*, Feb. 17, 1968, p. 5.

"A Milwaukee chaplain estimates that the proportion of atheists in foxholes is the same as that found on any peaceful street in the United States.

" 'I know the old saying that there are no atheists in foxholes,' said Chaplain Ray Stubbe, who organized All Saints Lutheran church in Oak Creek in 1966. 'Maybe that was true once, but it isn't now. Perhaps the world has changed. I don't know.'

"The 5,000 marines defending Khe Sanh already have suffered heavy casualties, and the marines say the battle is just beginning. The base has been hit by up to 1,5000 North Vietnamese shells in one night.

" 'The shelling isn't bringing in any more men. I am getting the normal calls from men with family problems, and I talked with one conscientious objector. Their religious attitude hasn't changed much,' the 29 year old Lutheran chaplain said.

" 'But those who already were moderately religious tend to be more so. When the incoming artillery begins exploding, they say they pray and pray hard.'

"Making religious sense out of the shell fire and North Vietnamese siege is difficult for many marines. Blind luck often seems to determine who lives and dies.

"Chaplain Stubbe, who daily walks through the marine lines to give bunker services, quotes St. Matthew's description of the great storm that threatened Christ and His disciples.

"Jesus calmed the storm and asked his fearful disciples: 'Why are you afraid? Have you no faith?'

"Chaplain Stubbe tells his men: 'In this situation we feel things are in turmoil, but we know we can pray to a God who is strong and who can control things.'

"The chaplain requested Vietnam duty and tries to live as close to his men as possible. He was nearly killed twice in one day by rockets as he walked through the base to hold services.

"But he said his work in Vietnam was highly satisfying.

" 'I am a chaplain with them all week, in their moments of pain and their moments of joy. This is not a one day a week job out here.

" 'And here there is no congregation or denominational competition. I am able to be interested in a person as a person. It is a more total ministry.'

"Chaplain Stubbe has been in Khe Sanh for seven months and is his battalion's only Protestant chaplain.

"His parents are Mr. and Mrs. Clarence Stubbe, 2422 N. 60th St."

(Photograph by SSGT John A. Reid of worship at Khe Sanh Combat Base during siege battle, 28 Jan 1968), III MAF, *Sea Tiger* 4:7 (Feb 16, 1968), p. 10.

Sider, Don, "Khe Sanh: Ready to Fight," *Time*, 91:6 (Feb. 16, 1968), p. 38.

[*Contains the paragraph*]:

"The dash for cover is part of every man's routine. 'It's a modus vivendi,*' says Protestant Chaplain Ray Stubbe, 29. 'The men run for shelter, but they don't cringe when they get there.' Except for an occasional case of what the corpsmen call 'acute environmental reaction' (shell shock), the Marines at Khe Sanh are taking their ordeal with considerable composure..."*

GySgt Tom Bartlett, "He Thought of God Often," III MAF, DaNang, *Sea Tiger* 5:1 (Jan 2, 1969), p. 2.

[*Includes paragraph: "At Khe Sanh, Chaplain Ray Stubbe tended the spiritual needs of the Leathernecks. He, like the Marines, endured artillery and rocket attacks which pounded the base."*]

"Chaplains Travel I Corps," U.S. Naval Support Activity, DaNang, *The White Elephant News*, 3:1 (Jan 10, 1969), p. 3.

[*Article and 2 photographs of worship services on Marble Mountain, DaNang, Vietnam, by PH1 Rus Elder*].

"Climbing 350-feet straight up the side of Marble Mountain, making an altar of sand bags or riding boats on the rivers near the DMZ, Naval Support Activity (NSA), DaNang chaplains have become 'circuit riding' ministers.

"Two such men are LT Merlon Howe and LT Ray Stubbe ...

"Chaplain Ray Stubbe has the same philosophy as Chaplain Howe but carries it to greater heights, like climbing Marble Mountain's Crow's Nest to hold Christmas Services for the Navy, Army and Marine personnel on observation duty there.

"In addition to Crow's Nest he visited an outlying Marine Combined Action Group (CAG), climbed up a smaller mountain to ALPHA-6 Marines and visited the Naval Hospital.

" 'Most of these men could not attend services if I didn't climb up to them,' said Chaplain Stubbe, regularly assigned to Camp Carter.

" 'I've made the climb to Crow's Nest about three times in my four months at NSA,' the chaplain said. 'It may cause sore legs and back but it is very rewarding when you see the smiles on top.'

"Stationed with the Marines at Khe Sanh for several months before coming to NSA, Chaplain Stubbe believes a chaplain's willingness to live and work under the same adverse conditions as the men he serves bring them closer together.

" 'At an outpost like Khe Sanh you can mingle and talk informally, learning what they talk about, what concerns them and you can share these thoughts, anxieties or privations. Then in your preaching and counsel you know the conditions—you know what you are talking about and you can bring them a message that really applies to the condition.'.."

(Photograph and caption concerning worship atop Crow's Nest, DaNang, Vietnam), Milwaukee *Journal*, Sat., Feb. 1, 1969, p. 4.

[*Caption*]:

"ATOP THE 'CROWS NEST' – Navy Chaplain Ray Stubbe of Milwaukee conducted religious services atop Marble mountain near the city of Da Nang, South Vietnam. The outpost, called the 'Crows Nest,' is a remote observation post guarding infiltration routes into Vietnam's second largest city. Stubbe, whose parents are Mr. and Mrs. Clarence Stubbe, 2422 N. 60th St., Organized All Saints Lutheran church in Oak Creek in 1966. Stubbe has been in South Vietnam over 16 months."

"Vietnam Chaplain Climbs to 'Crow's Nest' to Hold Services," Lutheran Church in America, *The Lutheran*, 7:7 (April 2, 1969), pp. 35-36.

[*Three photographs by PH1 Rus Elder and article on worship services*] *Marble Mountain, DaNang :"MARBLE MOUNTAIN is a 350-foot high promontory south of DaNang, in Vietnam. Soldiers stationed there on observation duty call it the 'crow's nest,' for it's a high and lonely spot, away from everybody.*

"The first time Navy Chaplain Ray Stubbe made the climb up the mountain, GI's were amazed. But they're getting used to it. Their visitor stops around every now and then, and he's always warmly received.

" 'Every time I go up there I lose five pounds,' Chaplain Stubbe says. 'It gives me sore legs and a sore back, but it's worth it when I see the smiles at the top and hear the men say 'Welcome aboard, chaplain.'"

"Ray Stubbe, one of the 150-odd Lutheran Church in America chaplains on military duty, hails from Milwaukee. He's a graduate of Northwestern Theological Seminary and a member of the LCA's Wisconsin Upper Michigan Synod. Presently assigned to the Naval Support Activity at DaNang, he has been in Vietnam about 18 months—eight of them with the Marines at Quang Tri and Khe Sanh during the siege.

" 'During the heavy fighting there,' he recalls, 'I found while moving from one position to another that the men who have the roughest spots enjoy a chaplain's visit most.'

"It was this observation that motivated Chaplain Stubbe to seek out the Army, Navy and Marine personnel in out-of-the-way, inaccessible places. Normally, the chaplain is assigned to Camp Carter, a Navy security camp. But in addition to serving the men there—as well as at two boat ramps and the giant public works center on Tien Sha Peninsula—he makes it his duty to see that the men in such difficult places as Marble Mountain are not neglected.

" 'These men are not my responsibility as an NSA chaplain,' he explains. 'In fact, they're really assigned to no one, since there just aren't enough chaplains around to reach every small unit. But I felt someone should provide for them.'

"Circuit-riding preachers a century ago conducted somewhat similar ministries, and some of Chaplain Stubbe's friends call him a modern-day circuit rider. Actually, he's more a mountain climber—at least when he visits the 'crow's nest,' for it's not only a long, and difficult climb up, but a dangerous descent later by rope, down the sheer marble wall to the valley below.

"Ray Stubbe gets 100 per cent attendance at his services in these out-of-the-way places practically every time. It's not hard to see why."

"Today's Navy: Chaplains in Vietnam," U. S. Dept. of the Navy, *All Hands*, No. 628 (May, 1969), p. 34.

[*Photograph of holding worship on Crow's Nest in Da Nang, Vietnam and story, both by Photographer's Mate 1st Class Rus Elder*].

" 'Noah built an altar to the Lord,' according to the Bible, and Navy chaplains in Vietnam are still building them—from boxes, rocks, sandbags, and whatever else happens to be handy.

"Take Lieutenants Merlen Howe and Ray Stubbe, for example. They are latter day circuit riders who make the rounds in the Da Nang area to conduct religious services wherever there are men to listen...

"Chaplain Stubbe also rides and walks the same kind of circuit, but sometimes reaches greater heights when he calls on a Marine Combined Action Group 350 feet up on Marble Mountain, more familiarly known as the Crow's Nest. He also scales a lesser prominence called Alpha Six to visit the Marines there.

"His more conventional duties include serving the religious needs of the men at Camp Carter, the large public works complex near Da Nang.

"The chaplains feel they can get much closer to those they serve by working the way they do in Vietnam. It is an atmosphere which lends itself to informal talk, hence a greater ability to share the men's thoughts, anxieties and privations.

"When the chaplains aren't delivering sermons, they have extension requests to screen, emergency messages to deliver, help to give to men in trouble, and guide service to provide for those seeking to find their faith—much more than delivering religious messages at a specified time."

"Bronze Star Medal," Beaufort, S.C., *Sea Islander* 2:24 (June 20, 1969), pp. 1-2.

[*Photo of Maj Gen O. F. Peatross pinning a Bronze Star Medal at ceremony at MCDR, Parris Island, S.C. and article*]

" 'With complete disregard for his own safety, he boldly exposed himself to hostile fire on numerous occasions as he moved across hazardous terrain to reach isolated combat outposts to provide a ministry to men in combat with the enemy.'

"These actions, in the Republic of Vietnam, of U.S. Navy Lieutenant Ray W. Stubbe, a Depot Chaplain, were responsible for his receiving the Bronze Star Medal with Combat 'V'.

"During a ceremony at Parris Island, Major General O.F. Peatross, Depot commanding general, presented the combat decoration and commended the chaplain for a mission 'well done.'

"Serving a chaplain with the First Battalion, Twenty-sixth Marines and subsequently with the Third Marine Division, Lt. Stubbe traveled extensively throughout his command's area of responsibility to provide worship services, religious counseling, and to enhance the spiritual and moral welfare of Marines in his unit.

"When Lt. Stubbe collapsed from a severe illness and fever, he was hospitalized, but was released from the hospital early, at his own request, in order to return to the Marines besieged at the Khe Sanh combat base."

"Cited for Action," Savannah, GA, Savannah *Morning News*, June 11, 1969.

[*Photo of Bronze Star Medal being pinned on with caption*]

"PARRIS ISLAND, S.C.—Lt. Ray W. Stubbs, a Depot Navy chaplain, was awarded the Bronze Star medal with combat 'V' by Maj. Gen. O. F. Peatross. Depot commanding general, this week. The chaplain was cited for actions in the Republic of Vietnam."]

"To Provide a Ministry," MCRD, Parris Island, SC, *The Boot*, Friday, June 13, 1969.

" 'With complete disregard for his own safety, he boldly exposed himself to hostile fire on numerous occasions as he moved across hazardous terrain to reach isolated combat outposts to provide a ministry to men in contact with the enemy.'

"These actions, in the Republic of Vietnam, of U.S. Navy Lieutenant Ray W. Stubbe, a Depot chaplain, were responsible for his receiving the Bronze Star Medal with Combat 'V.'

"During a ceremony here June 9, Major General O. F. Peatross, Depot commanding general, presented the combat decoration and commended the chaplain for a mission 'well done.'

"Serving as a Chaplain with the First Battalion, Twenty-sixth Marines and subsequently with the Third Marine Division, Lt. Stubbe traveled extensively throughout his command's area of responsibility to provide worship services, religious counsel, and to enhance the spiritual and moral welfare of Marines in his unit.

"When Lt. Stubbe collapsed from a severe illness and fever, he was hospitalized, but released from the hospital early, at his own request, in order to return to the Marines besieged at the Khe Sanh combat base."

"Presented Former Pastor Medal for Vietnam Service," Oak Creek, WI, *Pictorial* (June 19, 1969).

[*Photo of Bronze Star Medal presentation by MG Peatross and article*]

"The first pastor of All Saints Lutheran church, Navy Lt, Ray W. Stubbe, has been awarded the bronze star medal with combat 'V' for his service as chaplain in Vietnam.

"The decoration was presented during a ceremony last Monday at Parris Island, S.C. by Maj. Gen. O. F. Peatross who commended the chaplain for a mission 'well done.'

" 'With complete disregard for his own safety, he boldly exposed himself to hostile fire on numerous occasions as he moved across hazardous terrain to reach isolated combat outposts to provide a ministry to men in contact with the enemy.'

"The chaplain provided worship services and religious counseling while serving the 1st battalion, 26th marines and subsequently with the 3rd marine division.

Lt. Stubbe was hospitalized when he collapsed from severe illness and fever. He was released early at his own request to return to the marines besieged at Khe Sanh combat base. At one time he held 50 services in two days.

"The Rev. Mr. Stubbe organized All Saints Lutheran church following his ordination. Services are still being held in the community room of Oak Creek Marine National bank while a church is being completed on S. Howell ave.

"The pastor resigned to return to his studies in Chicago. He had entered the navy when 17 and remained a member of the navy reserves while studying for the ministry. When he returned to active duty, he was assigned to Vietnam.

"Chaplain Stubbe will visit his parents, Mr. and Mrs. Clarence Stubbe, in Milwaukee for two weeks beginning Aug. 20."

"Marines Award Chaplain Medal," Milwaukee, Wi., *Journal*, June 19, 1969.

"Navy Lt. Ray W. Stubbe, a Milwaukee chaplain formerly assigned to the 3rd marine division in Vietnam, has received the bronze star for moving 'across hazardous terrain to reach isolated combat outposts to provide a ministry to men in contact with the enemy.'

"He collapsed from a severe illness and fever and was hospitalized, but was released early at his request to return to the marines besieged at Khe Sanh, a marine corps spokesman said. He received the medal at Parris Island, S.C.

"He is the son of Mr. and Mrs. Clarence A. Stubbe, 2422 N. 60th St."

"On Sunday, November 15th (at both worship services) we will be privileged to hear Chaplain Ray W. Stubbe as our guest preacher. Ray is the son of Mr. and Mrs. Clarence Stubbe.

"He is a Navy Chaplain and has served for a year and a half in Viet Nam, having been in the Khe San region at the height of the fighting. He is now enroute from Parris Island, North Carolina, where he has been serving as a chaplain with the U. S. Marines, and will leave home on November 16th to go to Seattle where he is to be assigned to a new ship, the U.S.S. Shreveport (LPD12).

"The ship will be in Seattle until April (after it has been commissioned in December) and then be out of Norfolk. He will be chaplain for the crew of 450 men, and the ship will ultimately carry up to 900 U.S. Marines.

"Ray has been given recognition for his chaplaincy service, and we know that he is a good chaplain and spiritual leader for his men. Before entering the Navy Chaplaincy, Ray organized All Saints Lutheran Church in Oak Creek and attended graduate school at the University of Chicago.

"He was ordained at Redeemer Church in 1965, following his graduation from St. Olaf College in Northfield, Minnesota and Northwestern Lutheran Theological Seminary in Minneapolis.

"We are pleased to welcome Ray to our pulpit, and we know that you will want to take the opportunity to wish him well in his new assignment."

[*Caption reads*]

"BAPTIZING a soldier in Okinawa's Shin-Kawa River is Navy Chaplain Ray W. Stubbe of the Wisconsin-Upper Michigan Synod. Though not usual, immersion is a permissible Lutheran practice. Stubbe was mission developer of All Saints Church, Oak Creek, Wis., prior to entering the service."

"People Problem Solver is 'Leapin' Deacon'," Third Marine Division, *Oki Marine* 5:29 (Jun 25, 1974), p. 2.

[*Photo in parachute gear and article*]

" 'I wish all Marines could be parachutists,' said slim and energetic Chaplain Ray Stubbe, 'because it would eliminate so many of our people problems.'

"Now practicing his office at 3dMarDiv's 3d Service Bn., Chaplain Stubbe, also known as 'The Leapin' Deacon,' is one of only five Navy-Marine Corps chaplains who wear the gold wings of a parachutist.

" 'When people are jumping together,' he explained, ;'there is no distinction between race, rank or anything else. Grunts experience this sort of thing in the field. When people have a common experience, face a common danger together, it helps draw them together.'

"The Chaplain recently authored an article for the October issue of the Marine Corps Gazette recommending the re-establishment of parachute units within the Corps.

" 'I think Marines are better suited than any other service for parachute units,' he said, 'since Marines don't depend on large quantities of equipment and supplies, and because they seem to operate better on the squad level.'

"His own parachute experience goes back to November 1972 when he completed the Basic Airborne training at Fort Benning, Ga., and later continued jumping with Navy SEAL Team Two to earn his gold wings. Since arriving on Okinawa last March, he has jumped with Marines from the Force Recon platoon and with U.S. Army Special Forces units.

" 'I find this activity helps in my ministry,' he noted, 'by forcing me to keep in good physical shape and by literally bringing me "down to earth" in sharing the lives of men in action. It's like the sign I saw at the B Co., 3d Recon Bn., office at Khe Sanh, 'To really live, you must almost die.'

"Chaplain Stubbe is also the 'adopted' chaplain for the Northern Training Area, which he visits twice a month. The rappelling and tactical instructors of the NTA even awarded the Chaplain one of their distinguishing red shirts and made him an honorary instructor.

"On his last visit, December 23, the Chaplain conducted a baptismal service in what he termed 'a very cold stream!' The Marine he baptized, PFC Gary S. Golightly, of 7th Comm Bn., was a Baptist and therefore required baptism by immersion. Making their way to the nearest stream by means of a rope hung over the cliff, the Lutheran Chaplain complied with the Marine's wishes, wading into the icy stream up to his middle to perform the rites.

"Chaplain Stubbe believes in living the motto of parachutists: 'All the way—and then some.'"

"Leapin' Deacon'," Controls Corp. of America, *Contact* 18:2 (Mar/Apr, 1974), p. 10. (Head photo and article).

"Chaplain Ray Stubbe, son of Clarence Stubbe, tool designer at H&A Milwaukee, is the type of man who loves to 'jump right into the thick of things.' Known as 'The Leapin' Deacon,' Chaplain Stubbe is one of only five Navy-Marine Corps chaplains who wear the gold wings of a parachutist.

"Wishing all Marines were parachutists, he stated, '..it would eliminate so many people problems.'

" 'When people are jumping together,' he explained, 'there is no distinction between race, rank or anything else..

"When people face a common danger together, it helps draw them together.'

"Chaplain Stubbe's experience goes back to November 1972 when he completed Basic Airborne training at Fort Benning, Ga., later continuing with Navy Seal Team II to earn his gold wings. Since his arrival in Okinawa, last March, he has jumped with the Marines from Force Recon platoon and with the U.S. Army Special Forces Units.

"The Chaplain finds his activities help in his ministry by forcing him to keep in good physical condition and by literally bringing him 'down to earth in sharing the lives of the men in action.'

"As adopted chaplain for Okinawa's Northern Training Area, Chaplain Stubbe has been awarded the title of 'honorary instructor.' On a recent visit to the NTA, Chaplain Stubbe performed a baptism by immersion in what he termed 'a very cold stream.'

"Making their way to the nearest stream, the Lutheran chaplain and a Marine climbed down a rope hung over a cliff to the frigid stream where the rites were performed.

"Chaplain Stubbe truly believes in living the parachutist's motto, 'All the way—and then some!' "

Frank P. Zeidler, "An Unusual Chaplaincy," in Evangelical Lutheran Church of the Redeemer, Milwaukee Wi., *"Celebrating the Past—Anticipating the Future," Eighty-Fifth Anniversary, 1890-1975,"* 1975, p. 19.

'The historical documents of the church shed some light on the interesting career as a Navy chaplain of Ray William Stubbe, now Lieutenant Commander R. W. Stubbe.

"At the time of the 75th anniversary Mr. Stubbe was directed toward work in a Mission Church at Oak Creek, Wisconsin. He was ordained on June 6, 1965, at Redeemer. In June, 1967, he was installed as a navy chaplain, and was assigned to the Third Marine Division in Vietnam. Here he underwent one of the most terrifying experiences of the Vietnam war. He was the chaplain for the marines at Khe Sanh when that area was under a long and deadly siege by the North Vietnamese. He survived this experience and left Vietnam after 18 months. He subsequently received a decoration for heroism. He has written a privately circulated manuscript on the religious and theological significance of his experience. Lt. Commander Stubbe has had assignments to several different tours of duty since and is a frequent visitor of his home church."

"The Bride Wore Hospital White," Waukegan, Il., The *News-Sun* 81:221 (Friday, Sep. 18, 1981), No. 221.

[*Picture of conducting wedding while bride was in hospital bed. Caption reads*]
"After spending six months planning her wedding, Pamela Thompson of Zion found she couldn't walk down the aisle. In fact, due to a painful blood clot in her leg, she couldn't walk at all. That didn't stop her though. On Thursday, Thompson married Clifton Schwartz of Zion while sitting in her bed at St. Therese Hospital, Waukegan. She was dressed in white—her hospital gown. The new Mrs. Schwartz will be spending another week at St. Therese while doctors try to dissolve the clot. The unusual ceremony took place at about 5 p.m. with Chaplain Raymond Stubbe of the Great Lakes Naval Base officiating. The groom is a petty officer third class at the base. 'We decided to go ahead with the wedding,' the bride said. 'What would you do? We had this all planned. I have a caterer, a hall and everything else for Saturday. We had to cancel, but we've rescheduled everything for Oct. 24.' The couple will renew vows that day and proceed with the festivities. Will the bride finally be able to walk down the aisle? 'I'd better be,' she answered."

"What Qualities Father Mulcahy and Chaplain Ray Stubbe Have in Common," Naval Training Center, Great Lakes, Il., *Bulletin* 47:45 (Friday, Nov. 19, 1982), p. 8.

[*Picture of holding worship at Khe Sanh during siege, 28 Jan 1968, By SSGT John A. Reid, CREDO picture (with beard), and article*]

*"What do Ray Stubbe, CHC, and the M*A*S*H* character, Father Mulcahy have in common?*

"Bibles and boxing could start the list. While the affable and compassionate Father Mulcahy served in Korea, Chaplain Stubbe served in Vietnam, winning a Bronze Star for holding 20 to 30 prayer services daily, going from bunker to bunker. Both have experienced the ironies and pain of war.

"Perhaps Chaplain Stubbe's most painful memory is the Battle at Khe Sanh where he saw many of his close friends killed. 'I carried a dear friend of mine out of a battle area. He had been decapitated,' Chaplain Stubbe recalled. 'I baptized another young man and three days later, I found his name on a body bag. Another young man I worked with, ironically a conscientious objector, won a Navy Cross posthumously. I had him working in the medical triage area and he would shield others' bodies with his. He got hit in the heart by shrapnel. He died when an infection set in after surgery.'

"While he is proud of being one of the 47 chaplains (out of 800 who served in Vietnam) to receive a Bronze Star, he said that his practice of going to the people hurt him in Washington. He was passed over for a promotion.

" 'I was told that the military people in Washington thought I had a death wish or something,' he explained. 'I guess because I went out to the bunkers where the men and the fighting was, they thought I was trying to be a Marine. But I still wouldn't do it any other way.'

"Even in his peacetime assignments such as his shore duty here, he goes among the people. Having been at Great Lakes since 1978, he is proud of the things he's accomplished here.

"While he was the supervisory chaplain for Service School Command, he succeeded in establishing chaplain's offices in the various schools.

" 'We had been located in one office and things became very congested. When I first came, we were counseling about 200 people a day. Then, word got around that we would talk to anyone—whether they be homosexual or if they beat their wife,' he explained. 'Pretty soon, we were talking with 600 a day and felt that we could do better if we were spread around a little more.'

"He was also the Director of the CREDO program for five months earlier this year. He managed during that time to change the way the CREDO program operated.

" 'Most CREDOs at other bases have everyone sitting around listening to music and relating to it. We do things differently now,' he said.

"People who come down and visit the CREDO office in the basement of Bldg. 3, can relax, study, listen to music or just talk. He holds group sessions where students will draw their family or childhood. They cut things out of newspaper and attach them to large grocery bags to express how they feel about life. He also asks them to write something positive about each person in the group. Then the cards are sorted and distributed.

" 'Everybody then gets a little packet of warm fuzzy strokes,' Chaplain Stubbe said. 'We're trying to build self images here. That's one of the major problems I see here at Great Lakes.'

"He said that loneliness and isolation are a problem for students here and CREDO 'has always been the place where people are "put together:"—with themselves (made whole), with each other, and whether conscious of it or not, put together with God.'

"He is personally bothered by some students' enthusiasm about going to war. 'I served on a ship with a detachment of Marines during another crisis in Lebanon. At the time we were evacuating our embassy. I prayed over the ship's loud speaker. As it turned out, the Marines didn't have to land. The following day, I had privates to lieutenants coming up to me and ask why I had to pray like that because it meant they couldn't go and fight, he said.

" 'I went to my cabin and cried that day—it really depressed me. I think there's something about people's childhoods where they aren't raised with a good self-image. Some of these people think that if they can go to war and fight, they'll become heroes,' he continued.

"Explaining that his attitude upon war was greatly affected by his experiences in Vietnam, Chaplain Stubbe said, 'I'm not anti-military, I guess I'm anti-war. When you've seen the pain and mutilation of a war like Vietnam, you want to try to do everything you can to keep others from suffering that way.'

"His sense of compassion runs high as he goes where the people are. He eats in the enlisted mess hall for all his meals. He'd stay onboard ship when assigned to one that was docked so he could be there for the enlisted people who wanted to talk in the evenings. When he was first assigned to RTC here, he was the first chaplain to make regular visits to the recruits' barracks.

"By doing this, he feels that he's established 'whole ministry' for himself and others. 'If they won't come to me, I'll go to them,' he said. 'I guess you could say that I communicate God's love with action, not just words.'

"His life is full and rewarding. He teaches Bible studies in several Lutheran churches in the community, teaches confirmation classes to young people and adults. He performs weddings and he is active in counseling with CREDO. Chaplain Stubbe will be assigned here until 1984 when he plans to retire and return to his native Milwaukee.

"Featuring Chaplain Stubbe is part of acknowledging the 207th anniversary celebrated Thursday of the establishment of the Navy's Chaplain Corps."

"Events at the Center, Library Gets 410 book collection," U.S. Marine Corps Historical Center, Washington, D.C., *Fortitudine* 11:2 & 3 (Winter, 1982), p. 29.

"The Historical Center's Reference Library recently received a 410-volume military history collection from LCdr Ray W. Stubbe, ChC, USNR. The collection is devoted primarily to the Marine Corps and includes general histories and some quite rare regimental histories. Among the most significant titles are: a first edition of Clyde H. Metcalf's A History of the United States Marine Corps, (New York, 1939); a fine copy of the first printing of John W. Thomason, Jr.'s Salt Wind and Gobi Dust, New York, 1934; and a considerable rarity, Robert W. Neeseis' Our Many Sided Navy (Yale University Press, 1914).

"The majority of the collection has been retained at the Center. However, several duplicate sets and volumes have been sent to other base general libraries to fill up their military history holdings."

"Events at the Center, 'Aarugha' Manuscript Donated," U.S. Marine Corps Historical Center, Washington, D.C., *Fortitudine* 11:2 & 3 (Winter, 1982), p. 30.

"Five copies of Aarugha, a manuscript history of Marine reconnaissance units with emphasis on the 1st Force Reconnaissance Company and Vietnam were recently donated to the Center by LCdr Ray W. Stubbe, ChC, USNR. The highly readable, well-footnoted manuscript is the produce of almost seven years of research, hundreds of interviews, and over 300 hours of writing and typing. Aarugha is available from the Historical Center's library on interlibrary loan."

[Enlarged photograph of worship service at Khe Sanh during siege taken 28 Jan 1968 by SSGT John A. Reid plus personal story of my post-traumatic stress disorder]

"The Vietnam War officially ended for the United States in 1975. But for thousands of Vietnam veterans and families of Vietnam veterans the horrors of the war may never end. The Vietnam War is not over for Commander Ray W. Stubbe, CHC.

"Commander Stubbe served in Vietnam from June 1967 through January 1969. He suffers from Post Traumatic Stress Disorder. on Tuesday Chaplain Stubbe was released from the Veterans Administration Hospital PTSD Unit in Bldg. 135 where he has been a patient for the past eight months.

"According to Stubbe, PTSD is often communicable—particularly to family members and loved ones—and is a killer. Many veterans with severe PTSD commit suicide or die a violent death. They are often killed in shootouts, barroom brawls, and one car accidents.

"Of the 2.8 million veterans who served in Vietnam, an estimated 140,000 have died since leaving the service. Of these, more Vietnam vets have died by committing suicide than the 57,000 who died in the war itself.

"Those who live often try to cope through compulsive overwork, alcohol or drugs. Chaplain Stubbe attempted to escape PTSD by working late hours. instead of finding relief, Stubbe experienced intense migraine headaches, headaches which he began having after returning from Vietnam. Eventually one migraine headache lasted five consecutive days and was intensified by nausea.

"Common symptoms of Post Traumatic Stress Disorder include recalling traumatic events in dreams and flashbacks.

"Commander Stubbe recalls a recent dream: 'I am returning to my bunker and am surprised to find it occupied by another person. Suddenly, I recognize him and uncontrollably hug him and with tears and say, "Your body is warm, you are alive! I thought you were dead!' And then, after a pause, "But where are all the rest?" And then I wake up uncontrollably crying.'

"The chaplain is also the victim of frequent flashbacks. One day he was in the sauna of Gym 500 just before it closed. He was relaxing after a good workout of running and boxing. There was a muffled, faint 'boom.'

" 'The next thing I knew I was on the floor. I thought a rocket had been fired and I had about seven seconds to take cover before it exploded. I later realized it was just a basketball hitting the hoop,' he recalls...."

[Remainder of article deals with various symptoms of PTSD].

Vietnam War Newsletter 6:64 (June, 1984), p. 12.

[Note I had developed a bibliography of 675 entries on PTSD, was at Khe Sanh, and am presently working on a book about the siege at Khe Sanh]

1985

Cimons, Marlene, "War Experiences Haunt Many Vietnam Veterans," Los Angeles, Ca., *Times* (Apr. 30, 1985), pp. 1, 11. (Paragraphs on Stubbe on p. 12.

"The Rev. Ray Stubbe, an ordained minister who is no longer active in a particular church, remembers Vietnam as a country of extremes. 'Sandy places and tortuous mountains,' he said. 'Beauty and ugliness. Terror and peace. You'd get mortared, and then everything would be normal.'

"Stubbe went on active duty in the Navy chaplain corps in 1967 and immediately was sent to Khe Sanh...

"On January 21, 1968, he said, 'All of a sudden, we found ourselves surrounded by 40,000 of the enemy, North Vietnamese regulars. We took heavy artillery and rockets. We took 1,600 rounds a day of heavy artillery, a round that would leave a crater so big that you could stand in it with your head below the surface.'

"It went on for months.

" 'I lost a lot of very close friends,' Stubbe said. 'I'd go from bunker to bunker to see how the people were and have a prayer with them. After a while, we became oblivious to everything. Numb.'

"For Stubbe, the 'revulsion, fear and tears and the anger' he repressed in Vietnam led to a severely troubled readjustment, plagued by nightmares, migraine headaches and 'withdrawing from people almost from the time I got home.'

" 'I kept dreaming of the bunkers, of people who were dead and their coming back to life. I'd wonder where the rest of them were. I'd see the goriness of it, the blood and the people shot up. I talked to doctors who said people come back and everything's OK. Well, it's not true. It's a big myth.'

"Stubbe, now 47 and living in Milwaukee, finally received help from an in-patient psychiatric stress disorder program at the VA Medical Center in North Chicago. 'The memories are still there, but I know what they are and I can deal with them now,' he said.

" 'In a sense, those were very good days. It sounds funny after all I've said, but we all got very close to each other, even though we didn't always know each other's names. There was a sharing of the basics of life. Here, people are roles and masks and functions. There, people were people. There were no organs, pews or stained glass but it was much more meaningful and intimate than it has ever been for me since."

"Lieutenant Ray W. Stubbe (Lutheran) was with 1st Battalion, 26th Marines for eight months from July 1967 until February of 1968 and, with his battalion, experienced some of the worst shelling of the war. His memories of the siege are especially sensitive. Writing to a worried father of a Marine, wounded at the Khe Sanh Combat Base in February, he spoke about the quality of the Marines and concluded: 'This bravery is something those who have not been to Khe Sanh under fire can perhaps never adequately comprehend or appreciate.'" [Letter to Mr. Royston L. Jones, 8 April 1968, p. 2. [p. 162]

"... Under some of the most intensely beleaguered conditions of that war, the chaplain became very close to his men, as the men often did to each other, and the conditions were rarely usual. Chaplain Stubbe wrote: 'During the siege, the recon Marines were especially hurt—over 75 percent of the Company became casualties because of the incoming rounds. The Company was sandwiched between the airstrip and the regimental headquarters—as well as being near the ammo dump. One night my bunker was so full of casualties that couldn't be evacuated, that I slept atop a 3'x3' field desk, the doctor slept on the deck inside with his feet outside the "door" and five Marines fell asleep sitting up on my rack..'" [p. 163]

[".. Chaplain Stubbe, without a clerk at the beginning of the battle, had PFC Jonathan Nathaniel Spicer transferred to him, since the man had applied for conscientious objector status. Chaplain Stubbe had him work in the C Med area as a stretcher bearer, the area where both Chaplains Driscoll and Stubbe 'lived' at night. Spicer, a mild-mannered and caring person, frequently threw himself over the bodies of casualties during incoming, and during one evacuation of wounded, was fatally wounded himself, dying several days later after having been evacuated. This Marine, although a conscientious objector, was awarded the Navy Cross for his heroism."

Gorenstein, Nathan, "Viet vets revive the memories," Wilmington, De., *Morning News* 108:160 (Oct. 13, 1987) p. 1.

"He was a Marine who didn't want to fire his gun, but who ended up at Khe Sanh anyway. So to save him from a court-martial, Ray Stubbe made him his assistant—the chaplain's clerk.

"So the Marine turned into a stretcher bearer, there in Vietnam. 'He became a lion,' Stubbe recalled, shelte3ring wounded comrades with his own body, until on March 8, 1968, a shell landed too close at that hilltop base, and the Marine received a Navy Cross. After he died.

"And Stubbe, the chaplain, still wonders. If he had kept his own counsel, maybe the Marine would have only faced some time in the brig, and still be alive.

" 'I think about it all the time,' Stubbe said of his service in Vietnam, and confesses to be, in a manner, traumatized by his memories. 'We've got to make sense of it. It's sort of like shrapnel of the soul.'

"So on Monday, Stubbe told a symposium sponsored by the local Vietnam Veterans Memorial Institute, 'We have a purpose here, to portray what really happened.. to these people who cared for each other.. And that must never be forgotten.'"

Stockwell, David B., *Tanks in the Wire, The First Use Of Enemy Armor in Vietnam*, Canton, Ohio: Daring Books, 1989. Back dust cover contains comments on the book: *"Dave Stockwell's book presents an essential perspective to the Khe Sanh battlefield that must be read by all who would seek to understand what happened there. His presentation, letting the participants speak for themselves, conveys the understanding of that important battlefield as experienced by some of the crucial participants. His presentation blends and balances both the tactical as well as the personal of warfare. I was very impressed by the book. I believe it to be a valuable addition to a clearer understanding of Vietnam in general and Khe Sanh in particular at a time when such an understanding is imperative vis-à-vis the many distorted images of that war are so rampant."*

Tom Bartlett, "Books Reviewed," Marine Corps Association, *Leatherneck* 72:11 (Nov., 1989) p. 98. [Review of *Inside Force Recon*].

"Ray Stubbe is neither stranger nor friend. We've met, and I remain in awe of his accomplishments. He has been places I've only read about and accomplished deeds beyond my comprehension. We first met in DaNang in early 1968. He was dirty, needing a shave, shower and sedative. He was very nervous. He smelled. He wore no rank, but appeared too old to be a private. He wore no weapons. He had a story he wanted told. He offered a rough draft on a cruddy sheet of paper. The story was, indeed, rough. But it contained all the facts, so we edited and printed it in the Sea Tiger, newspaper of the III MAF. By the time I realized who the smelly grunt was, he was gone. Back to Khe Sanh where he served as chaplain to the Marines. He was a naval officer. That's Ray Stubbe, a Lutheran minister. Though he has long since hung up his cammies, he still writes of 'his' Marines. He authored an extensive bibliography on PTSD and the monograph 'Khe Sanh Bibliography,' published by the History and Museums Division, HQMC. He is presently working on a history of Khe Sanh, 1962-1968.... The two authors, soldier and sailor, have done the Marines a favor with their joint effort on force recon. Stubbe, the perfectionist when it

comes to dedication and research, poured over all available documents in the archives, and interviewed many of the participants to obtain the pertinent facts... "

"Stubbe Heads Khe Sanh Vets, Chicago Meeting Adopts Bylaws," Third Marine Division Association, *Caltrap* 35:5 (Oct.-Nov., 1989), p. 23.

"Forty-one members of the Khe Sanh Veterans, Inc., met 13 July during the 35th Annual Reunion of the 3d Marine Division Association, to adopt Bylaws and elect officers for 1989-90. Ray Stubbe will fill two billets, President and Chaplain, as will John Kahany who will serve as Vice-President and Secretary. Ernie Husted will continue as Editor of 'The Khe Sanh Vet' newsletter; Earle G. Breeding will continue as Treasurer; and Jack Kilbright was named Sergeant-at-Arms for the group that was organized during the Association's 1988 Tampa Reunion at which the 20th anniversary of the Battle for the Khe Sanh Combat Base was commemorated. Fred Swets opened the meeting with the Pledge of Allegiance to the Flag followed by the reading of the 91st Psalm by Ray Stubbe...."

Tom Mueller, "Holiday isn't first far from home for US troops," Milwaukee, Wi., *Sentinel* (Dec. 28, 1989), Part 1, p. 5.

"Ray W. Stubbe, who was a Navy chaplain at Khe Sanh in the Vietnam War, said he feels for the troops in Panama this Christmas.

" 'It gets to the point of tears to see young people.. have to go out to slay the dragons of the world,' said Stubbe, 51, now assistant pastor at Redeemer Lutheran Church in Milwaukee. 'There's a chill that war is still happening. You worry about the people.'...

"Stubbe spent Christmas 1967 preaching to his flock—the Marines near Khe Sanh in South Vietnam, a month before the bloody siege of that city began.

"Stubbe said Air Force observation planes were flying around blaring Christmas carols and he went to various outposts held by small groups of troops.

"He said his Christmas message was that 'we were there as sort of shepherds of local tribes people to protect them. It is to you that the announcement comes of the birth of the Savior.'

"Stubbe told them that 'God was with us and concerned about us and we were the shepherds.'

"There was scattered fighting of small arms fire and grenades on Christmas, he said, but 'in spite of all this tension in the air.. it was alike a spiritual odor' at the services."

1991

Paula A. Poda, "Looking back: The horror does not go away for combat veterans," Milwaukee, Wi., *Sentinel*, Wed., Jan 16, 1991, part 1, p. 6.

"Years after battle, images of terror remain.

" 'Vietnam was a lot of boredom punctuated with moments of sheer terror,' said the Rev. Ray W. Stubbe, who served 18 months as a Navy chaplain with the Marines.

" 'You can be talking with someone, and all at once they fall into your arms dead. Or you can be talking with someone and .. in 15 minutes, they're suddenly dead. It's very shocking.'

" ' And yet one is in such a numbed state, there is no time to express the shock or grief at the time.'

"Stubbe, 52, an assistant pastor at Redeemer Lutheran Church, 631 N. 19th St., was a chaplain at the Marine base in Khe Sanh during an engagement that pitted about 6,000 Marines against 20,000 to 40,.000 North Vietnamese troops during a 77-day siege.

"The deaths of local residents and war's effects on the country where it is waged often are overlooked, he said.

" 'You look at a moonscape afterward. The area where we were was a jungle. It was lush. There were tigers and all sorts of animal life.

" 'And it was all destroyed, in addition to the human life. There was nothing.'

"The pumped-up energy of young men eager to fire their first shots—which veterans say undoubtedly exists in the Persian Gulf as war scars—soon diminishes.

...

"Stubbe talked about Jonathan Spicer, of Florida, a conscientious objector, who had been beaten up when he refused to pick up his rifle and clean it.

"After the incident, Stubbe had Spicer transferred from his old unit to become Stubbe's assistant, working as a stretcher bearer.

"Spicer told Stubbe, 'I don't care what happens to me, I just don'g want to hurt anyone else.'

"When the area was being shelled and Spicer was with a wounded soldier, he often shielded the soldier's body with his own.

"Spicer did that for about seven weeks before he died.

"Mortar exploded as Spicer was helping load a helicopter with wounded men, and shrapnel pierced the pericardium sac around his heart. He lived for about two weeks, but developed an infection and died.

"Spicer was awarded the Navy Cross for extraordinary heroI8sm in action.

" 'I always felt if I hadn't intervened he might still be alive,' Stubbe said. 'I had a lot of guilt until I talked that out.'

"Battle forces moral decisions.

"Once, Stubbe saw a spotter airplane crash on a runway. Sometime later, he heard about conversations near the crash site.

"The pilot, pinned in the plane by a seat, was screaming to be shot because he didn't want to die in flames, and pleading that someone tell his wife how much he loved her.

"Two men were trying frantically to get him out while a crew was approaching to put out the fire, but it was clear there was not enough time to save him.

"One Marine was about to shoot the pilot to put him out of his agony. Another Marine said he should not shoot because if the flames were extinguished, the man who shot could be convicted of murder.

"The pilot died in the fire."

Jeff Linkous, "Khe Sanh veteran recalls terror of sustained air bombing," Asbury Park, NY,: *Asbury Park Press*, Jan., 27, 1991, p. A6. [Quotes James Schemelia and Ray Stubbe].

... "Stubbe, now an assistant pastor at a Lutheran church in Milwaukee, has written a book about Khe Sanh that is being prepared for publication by Houghton Mifflin Co. The book, tentatively titled 'Valley of Decision,' is based on more than 20 years of research about Khe Sanh and the Vietnam War....

"Stubbe said that at times, U.S. B-52s were brought in as close to Marine positions as safely possible. At Khe Sanh, the safe distance of 3 kilometers for close air support gave way to 1 kilometer. On one occasion, the U.S. planes bombed as close as 800 meters, he said."

Paula A. Poda, "Technology not perfect, vet warns," Milwaukee, Wi., *Sentinel*, Monday, March 28, 1991, Part 2, p. 15.

"The Rev. Ray W. Stubbe, who was a Navy chaplain at the Marine base in Khe Sanh during a bloody 77-day siege, said he is concerned about the US public's confidence in military technology and air power employed by the anti-Iraq coalition in the Persian Gulf.

"Iraqi Scud missiles that have caused death, injuries and extensive property damage in Israel demonstrate that defense systems are not infallible, Stubbe said.

" 'I think it's a false confidence,' said Stubbe, a chaplain at Redeemer Lutheran Church, 631 N. 19th St. and veteran of the Vietnam War.

" 'The reason I say that is because when I was in Khe Sanh in Vietnam, we dropped 96,000 tons of bombs and that was like in a five-mile radius .. during two months. It was more tonnage than was dropped in the whole Pacific (region) in '42 and '43.'

"Bombs were dropped in 23,803 sorties during Khe Sanh. A daily average of 41 B-52 strikes made the ground tremble, he said.

" 'It was like a continuous earthquake. And it still didn't stop them at all.'

"About 40,000 North Vietnamese troops were killed during that engagement in 1968, he said,

" 'What interests me is that right to the very end.. the North Vietnamese were still able to blast us with artillery and still assemble considerable amounts of soldiers and units. So our air power .. even though it was devastating, it never really silenced the enemy presence.'

"In fact, more US troops were killed and wounded in the two months after the battle than during it, Stubbe said."]

"Marine Corps Memorial Service Planned," Wisconsin Memorial Park, Brookfield, Wi., *Words for Life* (May, 1991) p. 2.

[*Notes Memorial Day ceremony at the cemetery on May 26, 1991, at 9:30 a.m. an*] *"..we will hear from a prominent guest speaker, the Rev. Raymond Stubbe, author and Assistant Pastor at Redeemer Lutheran Church. He will speak about the 'Gold Star Mothers'."*

B.H. Norton, *Force Recon Diary, 1969*, New York: Ivy Books, 1991. [*Notes in "Acknowledgements"*] *"I am forever grateful to my friend, the Reverend Ray W. Stubbe (Cmdr USN ret.) for his encouragement and personal involvement in getting me to write this account of the superb officers and brave men of the 3d Force Recon Company, in Vietnam, during 1969 and 1970."*

Tom Mueller, "Veterans want peace, predict war," Milwaukee, Wi., *Sentinel*, Tuesday, May 28, 1991, Part 1, p. 6.

"Ray W. Stubbe, 52, of Wauwatosa, a chaplain in Vietnam and now assistant pastor of Redeemer Lutheran Church in Milwaukee, said in 1989 that the world should not get carried away with euphoria and should keep developing peace ideas 'and not get swept into another thing like Munich (in 1938, the year he was born) and Vietnam.'

"Stubbe still warns against complacency and in the wake of the new war says, 'I don't feel that the world is much safer ... I don't feel everything has become good. I still feel we need to work on that.'

"He said that, just as Hussein did, other dictators will continue to make blatant miscalculations and start wars."

[*Begins with*] *"A blow-by-blow overview of the Khe Sanh siege, which, more than 20 years after, still ranks among the Vietnam War's most controversial episodes." After a summary of the book, the review concludes: "Pending declassification of archives or the emergence of yet-unknown sources, Prados and Stubbe provide as well-rounded a briefing as is available on a bitterly debated campaign. The engrossing text (marred only by a patent reluctance to trust the motives of military brass and their civilian masters) includes 64 photos.. plus 16 helpful maps. "*

[Book review], *Publishers Weekly*, Sep. 27, 1991, pp. 50-51.

"Here is the definitive history of Khe Sanh, built on interviews, documentary research and the personal experience of one of the authors."

[Book review], *Library Journal*, S.M. 23,888.

"Khe Sanh exemplifies many of the confusing aspects of the Vietnam War. It is difficult to imagine a more detailed account of Khe Sanh being written, at least until Vietnam opens its archives, and all American material on the subject is declassified... This book does for Khe Sanh what Gordon Prange's At Dawn We Slept did for Pearl Harbor."

[Book review], American Library Association, *Booklist*.

"Prados and Stubbe have written what deserves to be regarded as the definitive account of the most important pitched battle of the U.S. war in Vietnam. Besides the 1968 siege, the authors provide illuminating commentary on earlier battles in the Khe Sanh area, the village of Khe Sanh itself, and the people who lived there."

"Your Neighbors," Wauwatosa, Wi., *News Times*, Wednesday, Nov. 27, 1991, Section 2.

"Wauwatosa resident the Rev. Ray Stubbe's two-decade compilation of notes, letters, diaries and eye-witness accounts forms the major part of an upcoming book, 'Valley of Decision,' which documents the battle of Khe Sanh during the Vietnam War. It will be published by Houghton Mifflin on Dec. 16.

"In summer 1967, Stubbe was assigned to the post of Lutheran chaplain at the Khe Sanh combat base in Vietnam. He was involved in many missions through fall and into the winter.

"He now is a retired lieutenant commander of the U.S. Navy and currently is the assistant pastor of Redeemer Lutheran Church."

Ken Penn, "Khe Sanh Vets Gather in Winter to Share the Warmth," Veterans for America, Lombard, Il., *Veterans' Voice* 5:5 (Dec., 1991) p. 12.

[*Following a paragraph on the siege battle at Khe Sanh*]

"Years later retired Navy Chaplain Ray Stubbe realized there was a need. Try to locate veterans from this and the surrounding battles. After the war, Chaplain Stubbe kept in contact with over 100 Khe Sanh veterans that he knew when he was the Chaplain for the 26th Marines. These veterans had similar problems and posed similar questions: 'Last time I saw my best friend was when I carried him (he carried me) to the chopper, is he still alive? Why did he die and I survived? How can I

find him? To help answer these questions and to help the Khe Sanh survivors, Chaplain Stubbe started the Khe Sanh Vets Organization."

[Succeeding paragraphs describe Khe Sanh Vets, Inc., organization.]

1992

[Book review], Institute of East Asia Studies, *Indochina Chronology* 11:1 (Jan.- Mar., 1992), pp. 20-21.

"Full scale account of this most famous Vietnam War battle. Front slope perspective, much detail, many maps, photos, graphics. About possible use of The Bomb at Khe Sanh.."

"Alumn Notes," Luther-Northwestern Seminary, *Story* 8:2 (Spring, 1992) p. 23.

"Ray W. Stubbe, '65, is co-author of Valley of Decision, (Houghton-Mifflin) about one of the major battles of the Vietnam War, Khe Sanh. Stubbe was serving as a chaplain at Khe Sanh at the time of the battle."

Floyd Nagler, "Floyd's World," Third Recon. Association, RVN, *Harborsite* Premier Issue (Feb., 1992), p. 6.

"Rev. Ray Stubbe (Khe Sanh chaplain) has a new book out called 'Valley of Decision, The Siege of Khe Sanh.' It's a wonderful example of how the human element, derived from hundreds of personal interviews, created an historical book that rivals works by Bernard Fall. Co-author John Prados coupled his incredible policy and tactics research with Ray's 'view from the bunkers' as seen by the grunts and Recon men that experienced the Hill fights of 66-67 and the siege of 67-68. It's a must read book for any Recon Marine or Corpsman that served in the I Corps area in Nam."

Norton, B. H., *Force Recon Diary, 1970*, New York: Ivy Books, 1992.

[*In the Prologue*]

"In July 1975, I was introduced to Ray Stubbe when he visited our rifle battalion, wearing the uniform of a United States Navy lieutenant commander in the chaplain corps. Besides wearing several rows of ribbons on his chest and the embroidered gold cross on his sleeves, he wore the gold jump wings, insignia of an advanced Navy parachutist.

"Chaplain Stubbe had come to 3d Battalion, 1st Marines, at Camp Pendleton, California, to interview our commanding officer, Col. Alex Lee. The chaplain was writing a historical account on the specialized and Force-level reconnaissance units of the United States Marine Corps, from 1900 to 1974, and Lt. Col Alex Lee had recently played a major role in that history as the commanding officer of 3d Force Reconnaissance Company in 1969-70.

"After interviewing our battalion CO, Ray was pointed in the direction of my platoon's squad bay, and it was there that we began to talk about life in a Force Recon company. Our talk lasted for three days, and by the time that Ray departed, I felt that I had bored him with enough information about my experiences with 3d Force Recon and 1st Force Recon to last him a lifetime. I wished him well and asked him to someday send me a copy of his book whenever it became available.

"It was not until 1981 that I finally got to read a draft copy of Ray Stubbe's original, 318-page history. He had submitted it to the director of the Marine Corps's Historical Division, and it had sat there for almost six years!

"In July 1989, I received a small, brown package in the mail, and I was quite pleased to find that it contained a signed copy of Ray's book, Inside Force Recon. When I finished reading the book, I fired off a fast thank-you note to Ray, who had since retired from active duty, and mentioned to him my surprise at the differences between his original draft and what had been edited into book form. I mentioned that someday I would like to read an account by someone who had actually been in the 'bush' with a Force Recon team. To date, no one had attempted this. Ray's response to my note was simple: 'Why not write one, yourself? You were there.'

"I took his challenge on as a new mission..." [pp. xi – xii]

[Book review], Harry W. Hayes, ed., Geneva, Switzerland, *International Review, A Critical Analysis of World Events* 13:26 (March/May, 1992), p. 19.

"Valley of Decision, by Ray W. Stubbe and John Prados is certainly one of the best books yet published on the Vietnam War and the men who fought it. Focused on the battle of Khe Sanh, Ray Stubbe, the renowned 'Chaplain of Khe Sanh,' created an original manuscript of over 2,000 pages, single spaced, reduced print! Personal notes, letters, diaries, and eyewitness accounts collected over two decades. A book not to be missed! Semper Fi, Ray!"

[Note] in St. Olaf College, Northfield, Mn., Alumnus (Mar/Apr 1992) p. 36.

[*Lists me as co-author of Valley of Decision*]

Frederick Downs, "Book World: Keys to a Bungled Battle," *The Washington Post*, (Monday, April 6, 1992) p. B2. [Extensive book review]

"... Historians will appreciate the 91 pages of notes, bibliography and index. John Prados and Ray W. Stubbe have done an extraordinary amount of well-documented research. At times there is an overabundance of detail from the research for the general reader, but these sections will be of interest to serious students of the conflict. The discovery by the authors of Marine Corps debriefings of men in the field opened up a wonderful source and added immeasurably to the book...

"The story of Khe Sanh is the story of the war in Vietnam. Here is a book that, in describing the siege, points out all the frustration, good intentions, confusion, duplicity, bad and good tactics, military and political decisions, and intrigue, including abandonment of allies, distrust between allies, distrust between services, loss of credibility, unclear mission goals and, at the last, a pullout from the area that was the pattern for so much of the war..."

Col. Ken D. Jordan, "Where the Guns Sounded Daily," *Marine Corps Gazette* 76:4 (April, 1992), pp. 105-106.

"...Ray Stubbe and John Prados have solved this problem, writing what I feel to be one of the most compelling if not comprehensive volumes on Khe Sanh. Valley of Decision covers the history of Khe Sanh from 1961 to well after the siege, drawing on the personal, often emotional, experiences of Stubbe, a former chaplain serving with the Marines at Khe Sanh.

"Stubbe's active contribution is presented in the narrative voice, thus he becomes a character in the book, notwithstanding his personal involvement in a specific event. It is in these areas where the text reads like a novel...

"If you have time for nothing else, read the last chapter, 'Then Is Now.' Unless I miss my guess, you'll find you really haven't topped off yet on Khe Sanh; it's an interesting approach to a war story."

[Book review], Current Reviews for Academic Libraries, *Choice* 29:8 (April, 1992), pp. 1294, 1295.

""This fine volume, the most complete account now available of the controversial battle, its origins and aftermath, is a good blend of documentary research and personal experience drawn from oral interviews. Prados, an authority on intelligence and clandestine activity, and Stubbe, whose extensive diary as Navy chaplain during the siege and his indefatigable interviews establish him as a student of the Khe Sanh experience, provide a balanced interpretation... Good bibliography, photographs, and maps.."

Thomas J. Cutler, "Notable Naval Books of 1991," *U.S. Naval Institute Proceedings* 118/5/1,071 (May, 1992) p. 236.

"Another aspect of the Vietnam War is studied in Valley of Decision: The Siege of Khe Sanh, a joint effort by professional historian and author John Prados and a veteran of the campaign, Ray W. Stubbe. The result is a comprehensive account that effectively b lends the documentary with the personal narrative to tell the whole story of this central battle as it was conducted by the Marines on the scene and from the White House."

"Old Business," Wisconsin Vietnam Veterans, Chapter One, *Meeting Minutes*, April 12, 1992, p. 1.

"Chaplain status (Wayne Erdman) Our bylaws are ambiguous as to whether he (in this case, Ray Stubbe) is elected or appointed. Motion made, seconded and passed that Ray be appointed to that office for as long as he wants it. This will be taken to the State Board and a bylaws clarification will be made."

Marc Leepson, [book review], Vietnam Veterans of America, *The Veteran* (May/June, 1992), p. 16.

"It's rare when one book can accurately claim that it contains the 'definitive account' of an important complex part of the Vietnam War. But that's the case in John Prados' and Ray W. Stubbe's Valley of Decision (Houghton Mifflin, 531 pp. $29.95), a detailed, massively researched study of the famous siege of Khe Sanh. Prados and Stubbe complement each other well... Stubbe, a retired Navy chaplain who was at Khe Sanh, provided the book's human element, putting together a group of witnesses.

"The result of Prados' and Stubbe's efforts is what, in fact, can only be described as the definitive account of the Khe Sanh siege. What other Vietnam War military history contains the following: excerpts from a NVA soldier's diary, a history of the Bru Montagnard tribe that inhabited the Khe Sanh valley, a complete rundown on the 1965 Khe Sanh Special Forces camp, incisive analysis of behind-the-scenes planning in Washington, and a smooth narrative of in-coOuntry military matters..?"

"Chaplin Ray Stubbe in for Life," Wisconsin's Vietnam Vets, Inc., *Newsletter* 7:6 (June, 1992) p. 4.

"Chaplin Ray Stubbe will be the chaplin for CHAPTER I for life or until he decides to resign his position. This was voted on and passed at the last meeting by the membership. Congratulations Ray your ours for life."

Arthur L. Kohloff, [book review], *Vietnam* 5:1 (June, 1992) pp. 52-53.

"... Prados and Stubbe's collaboration is an ideal one for this subject...

"Ray Stubbe, retired from the U.S. Navy, was the chaplain for the 1st Battalion, 26th Marines, at Khe Sanh. Arriving there in the summer of 1967, Stubbe stayed with the unit throughout the siege. He held religious services for all Marines,

including those manning the all-important outlying hills. Stubbe kept a diary and recorded the events as they happened. According to co-author Prados, 'It was the real story of Khe Sanh.'

"With the merger of both Prados' and Stubbe's exhaustive research, Valley of Decision has to be the most comprehensive book on Khe Sanh to date. Both men have uncovered forgotten events that will certainly be eye-openers for Vietnam War history buffs..."

Robert A. Lynn, [book review], *Military* 9:2 (July, 1992) pp. 44-45.

"Prados and Stubbe's collaboration is an ideal one for this subject. John Prados, a highly respected historian, deals with the larger picture concerning Khe Sanh... Ray Stubbe, retired from the U.S. Navy, was the chaplain for the 1st Battalion, 26th Marines, at Khe Sanh. Arriving there in the summer of 1967, Stubbe stayed with the unit throughout the siege. He held religious services for all Marines, including those manning the all-important outlying hills. Stubbe kept a diary and recorded the events as they happened. According to co-author Prados, 'It was the real story of Khe Sanh.' With the merger of both Prados' and Stubbe's exhaustive research, Valley of Decision has to be the most comprehensive book on Khe Sanh to date. Both men have uncovered forgotten events that will certainly be eye-openers for Vietnam War history buffs..."

Col. William H. Dabney, [book review], U.S. Naval Institute, *Proceedings* 118/9/1,075 (Sep., 1992) pp. 112-113.

Chaplain Stubbe was a participant in the siege; John Prados is a historian. Their collaboration has produced a balanced, accurate, and eminently readable history of a long-running battle that in its conduct, no less than in its outcome, typifies the frustrations of the Vietnam War... It is unlikely to be surpassed unless and until there is unrestricted access to Hanoi's archives."

[Book review], Third Recon Association, *Harborsite*, Issue #2 (Oct., 1992) p. 11.

"Ray Stubbe, the renowned Chaplain of Khe Sanh, has spent most of his life since the debacle called the 'Siege of Khe Sanh' occurred, researching what happened there and why! Stubbe is also the founder of the Khe Sanh Vets, Inc. His vow to write a definitive book on Khe Sanh became a reality after over 20 years of research.. [and] teaming up with historian John Prados. The book was compiled from over 50,000 pages of documentation gathered by Ray through personal interviews, notes, letters, diaries, and eyewitness accounts from those that were there... It is the most far reaching history of Khe Sanh experience written. It has a manner and style that will enable all to finally understand the full impact of the war's most controversial engagement.."

Ken Cope, "I Remember," in Third Marine Division Association, *Two Score and Ten*, Paducah, KY: Turner Publishing Co., 1992, p. 231.

"I remember running back from the command post bunker and diving into a slit trench as a rocket hit above our heads ... the straps from our packs digging into our shoulders 'till they were numb ... blood in our boots ... and the Reverend Stubbe pronouncing over the dead."

[*SSGT John Reid's photo of the 28 Jan 1968 worship service appears on p. 218.*]

1993

Spector, Ronald H., *After Tet, The Bloodiest Year in Vietnam*, New York: The Free Press, 1993.

"I relied heavily on the extensive material at the Marine Corps Historical Center collected over more than twenty years by Reverend Ray W. Stubbe, the former chaplain at Khe Sanh, a mine of information and a fitting memorial to those who served there."[p. xii.]

[p. xii]:*"The Reverend Ray W. Stubbe, former chaplain at Khe Sanh, kindly allowed me access to his immense collection of material accumulated over two decades concerning the siege of Khe Sanh. Some of this material has since been incorporated into Valley of Decision: The Siege of Khe Sanh, by John Prados and Ray W. Stubbe, published in 1991."*

Page 125: *"Marine chaplain Ray Stubbe noted that at one point Khe Sanh's celebrated rat population suddenly disappeared, not for any lack of garbage and C rations at the combat base, but 'because all the enemy bodies and body parts strewn so close to the combat base made better food.'"* (Ref: *Chaplain at Khe Sanh*, p. 714).

Page 129: *"Chaplain Stubbe wrote in his diary: 'Was it all worth it? Six transit Gloria mundi.'* [*Chaplain at Khe* Sanh, p. 756]. *Chaplain Stubbe's misgivings were mild indeed compared with the reaction of General William Westmoreland when he learned of plans for 'Retrograde.'"*

Douglas Porch, [book review], Society for Military History, *The Journal of Military History*, 57:1 (Jan., 1993) pp. 180-181.

[*"..Prados and Stubbe have produced an impressive account of the siege... Perhaps the final link between Dien Bien Phu and Khe Sanh is that Prados and Stubbe have replicated in quality Fall's study of that earlier battle, in a book which is surely destined to become the classic account of the siege of Khe Sanh."*]

Book review in Parameters, U.S. Army War College Quarterly 23:1 (Spring, 1993) pp. 120-121.

"..With the emotional sweep of a novelist, Stubbe carries the reader through to the apogee and denouement of the fighting. The buildup of fire on the base and the increasingly debilitating existence of the besieged are sympathetically described. Stubbe does not discuss the concomitant debilitation of personal and unit discipline and order among the Marines, a condition which many military visitors to Khe Sanh observed. I am sure that there were few Marines who 'openly wept' when ordered to Khe Sanh, but those who did would likely have sought a chaplain like Stubbe. Stubbe accepts uncritically the opinions of the interviewees, providing a 'chaplainesque' view of the daily miseries and tribulations of the Marines subject to the siege..."

Harris, Richard G., "Khe Sanh," *American History Illustrated* 28:1 (March/April, 1993), pp. 38 and 73.

[*p. 38] "Recommended reading: Valley of Decision: The Siege of Khe Sanh by John Prados and Ray W. Stubbe (Houghton Mifflin Company, 1991) is a definitive account of Khe Sanh operations, including events both before and after the 1968 siege. (Coauthor Stubbe served as a chaplain at the combat base)."*

[p. 73] "More than one thousand veterans of Khe Sanh have formed their own organization, which meets annually and publishes a newsletter. For information contact Rev. Ray W. Stubbe, President Emeritus, Khe Sanh Veterans, Inc., 8766 Parkview Court, Wauwatosa, Wisconsin 53226."

[Review note], Institute of East Asia Studies, *Indochina Chronology* 12:3 (July-September, 1993), p. 29.

" 'A Large Battle in a Small Place: Khe Sanh in Vietnam,' by Rev. Ray Stubbe (ex-Navy chaplain, Khe Sanh veteran), Fortitudine, Spring, 1993. A graphically written description of this all important battle of the Vietnam War about which more nonsense has been written than all others combined. One of the most persistent fiction that the battle never actually came off there was no 'closing.' However, Khe Sanh was not a 13th century siege battle. It was a multi-dimensional far-ranging late 20th century battle, the enormity of which is indicated by the box of statistics that accompanies the article. With map. Recommended."

1994

[Note], "One chaplain's treasure becomes the Chaplain Corps treasure!" U.S. Navy Chief of Chaplains, *Currents* 3:8 (June, 1994) p. 5.

"For years it has been claimed that Chaplain Ray Stubbe could be seen poking through trash bins looking for treasures. Fact is, he was often successful. His recent, extremely generous, donation to the Chaplain Corps Archives is proof. Just recently, Chaplain Stubbe sent eight boxes of materials, books, papers, magazines, as his personal contribution to the preservation of Chaplain Corps history.

" 'Thank you!' doesn't say enough. We are deeply indebted to his willingness to part with numerous books written by or about chaplains. Some of them date back to the 19th century, early 20th century, and WW I. Some gems include....

"These items will be stored in the CHC Archives for reference, with careful attention to their preservation and safe keeping. Chaplains are welcome to stop by and take a look at and make use of our new holdings. Again, we thank Chaplain Stubbe, and request of others in the Chaplain Corps who have found and filed treasures, to remember the Archives when you get ready to carve a path through your storage areas! The CHC Archives are located at the CRB [Chaplain Resource Board]."

1995

Leepson, Marc, "The Broad Brushtrokes Of Ron Zaczek's Word Processor," Vietnam Veterans of America, *The VVA Veteran*, 15:1 (January, 1995) p. 21.

[*Includes paragraph*]

"One memorable letter came from Ray Stubbe, a retired Navy chaplain and the co-author of a book about the Battle of Khe Sanh in which both he and Zaczek took part. 'He recognized my name because of research he is doing about Khe Sanh,' Zaczek said. Stubbe and Zaczek corresponded about a bloody incident in which Zaczek helped evacuate three men from a firefight on a hill near Khe Sanh. 'I assumed one of the guys who was bathed in blood had died, but I never wanted to know,' Zaczek said. 'Stubbe told me their names and that all three guys lived.'"

Joe Williams, "Memorial Day's meaning not lost on vet," Milwaukee, Wi., *Journal Sentinel*, Sunday, May 28, 1995, pp. 1B-2B.

... "The Rev. Ray Stubbe, of Wauwatosa, is part of a shrinking group of patriots who 'will spend Memorial Day doing what Americans did when the holiday originated in 1868—honoring those who offered their lives in exchange for freedom.

" 'Our culture is so caught up in business and entertainment—and lately violence—that we tend to forget the really important things like friendship and loyalty,' said Stubbe, 56, a chaplain in the Vietnam War and assistant pastor at Redeemer Lutheran Church in Milwaukee.

" 'Memorial Day gives us an opportunity to reflect.'

"On Monday, Stubbe plans to join other veterans at ceremonies at Wisconsin Memorial Park...

" 'I think when you are in the service, you just participate in the ceremony,' he said. 'There has to be some distance to appreciate the opportunity to reflect.'

"On Memorial Day, Stubbe reflects about people such as Jonathan Nathaniel Spicer, a young conscientious objector from Florida who had been shuffled through the military bureaucracy for several weeks before landing with Stubbe in Khe Sanh, surrounded by 40,000 North Vietnamese soldiers.

" 'He was so against the war, he wouldn't take up his rifle,' Stubbe said.

"Spicer was transferred to Stubbe's command to help with passive combat tasks such as carrying stretchers and supplies. He wouldn't touch a weapon, but when push came to shove, he more than held his own with his new work, Stubbe said. [p. 2B]

" 'When incoming (wounded) would arrive, he would go out and lay by their sides and cover them with his own body,' Stubbe said. 'When the helicopters would get there, he became a tiger, ordering others to carry stretchers.'

"Spicer arrived in Khe Sanh sometime around Jan. 21, 1968. On March 8, he took a load of shrapnel in his heart.

"A group of young but determined doctors performed open-heart surgery and were able to give Spicer two more weeks of life before he died.

" 'He always told me, "I don't care what happens to me. I just don't want to hurt anybody else,"' Stubbe said. 'They gave him a Navy Cross, which I always thought was pretty impressive for a conscientious objector.'

"Stubbe's Memorial Day thoughts also turn to Frank Kennedy, a young man who was able to transport more than 1,000 pounds of blood by helicopter after the base's landing lights were blown out.

"He thinks of John Hinson, a non-swimmer who drowned after diving into a river to rescue others, and of the young chaplain assistant who was learning Greek so that he could be ordained, but who didn't leave Vietnam alive.

" 'As a chaplain, people shared their lives with me—their friends, families, hopes and fears. And then they would get killed,' Stubbe said.

"Stubbe's Memorial Day thoughts turn to young people such as Hinson, Spicer, Kennedy and so many others who followed to their deaths President John F. Kennedy's challenge to ask what they could do for their country.

" 'There were just so many, and they are the ones I think of on Memorial Day,' Stubbe said..."]

1996

Marc Leepson, "Books in Review," Vietnam Veterans of America, *The VVA Veteran* 16:11 (Oct./Nov., 1996), p. 37.

"Ray W. Stubbe, a retired Navy chaplain, served with the U.S. Marines in Vietnam, most notably at Khe Sanh. Stubbe and John Prados co-wrote Valley of Decision (1992), an excellent, detailed account of that battle. The Final Formation (Khe Sanh Vets, 210 pp. $12. paper) is Stubbe's latest effort to give a full picture of the memorable battle. This book, being sold as a fundraiser for Khe Sanh Veterans, Inc., contains a detailed, annotated listing of all the casualties in the general Khe Sanh battlefield. To order, write: 8766 Park Viet Ct., Wauwatosa, WI 53226."

Robin Holzhauer, "One Voice: 'War is obviously immoral'," Wauwatosa, Wi., *News-Times* 98:47 (Thursday, Nov. 21, 1996), pp. 1, 13.

"Maybe sometime this will all end. If the people back there could see all the suffering that the men go through, the 'hawks' would be less 'hawkish' and the doves would be more realistic (and focus their attention on the predicament of the fighting man, not on the immorality of war). War is obviously immoral."—Ray Stubbe.

"Ray Stubbe's desire for it all to end Jan 20, 1968, was not fulfilled. In fact, things soon got worse for Stubbe and the people assigned to a military base at Khe Sanh in Vietnam, near the Laos border.

"One day later, one of the biggest battles of the war would begin when North Vietnamese troops surrounded the base and shelled it almost daily for three months.

"Stubbe had served in the Navy from 1956 to 1958 and remained in the reserved until 1967, when the Navy reactivated his tour and sent him to Vietnam to serve as a chaplain. He stayed in the country until January 1969.

[p. 13]

"When the 40,000 North Vietnamese troops surrounded the base, it surprised the men, although they later found out people on higher ground [sic, should be "higher levels (of command)"] saw the troops amassing but did not tell them. The battle got so bad the command staff considered using small nuclear weapons, Stubbe said, but eventually decided not to.

"The casualties of the three month siege were high. 475 Americans were killed and another 2,000 were evacuated for medical purposes, and 6,000 to 8,000 Bru, the mountain tribe who livged in the area, and up to 20,000 North Vietnamese killed.

" 'And then, right after the battle, we abandoned the place so it's always been very ambiguous if we won or not,' Stubbe said.

" What so many fail to see is that man is not naturally good, and will not naturally do the right thing, and that the choices before men today are not black and white but of different shades of gray. [direct quote from a letter I wrote]

"After fighting in Vietnam, many people came back to America believing in the evilness of man, but Stubbe does not fall into that group. Instead, he went into the war believing 'man is not naturally good,' but, because of his experiences at Khe Sanh during the battle, his philosophy changed.

" 'What I observed was how people would care for each other,' he said. 'there was evgeryday heroism. A lot of people dashed out and rescued people who were wounded. That happened all the time. I suppose what happens in battle is you realize you're going to die at some time and you might as well help each other while you're there.'

"All supplies had to be flown into the base since the North Vietnamese had surrounded the area, Stubbe said. The base itself was about one to 1.5 miles long, so pilots flying in supplies sometimes missed the drop zone. Water came from a creek that began outside the base so the men never knew if it would be cut off or poisoned by their enemies.

"But as the battle continued, people would share their last drops of water and final tins of food, not knowing if another supply would come. Almost every day there would be shelling, not only from the enemy, but from American B-52 bombers sent in to clear away North Vietnamese. Eventually, the planes flew within one half mile of the base, shaking the earth when the bombs dropped.

"As chaplain Stubbe held four-minute services, including a prayer, a qui ck sermon, and communion, with a few people at a time. Large groups could not gather because the lookouts for the North Vietnamese would watch and a large group would become a target for bombers.

" 'I can't say people are basically bad anymore,' Stubbe said. 'I tend to see the goodness of people now. I would say people are basically good now, but they're covered in layers of mud other people splashed on them. I still think we live in a world of grays.'

"While many people believe God deserts in times of war, Stubbe disagrees.

" 'A lot of Vets say, Where was God in the war?' he said. 'Especially in Vietnam. They said he was AWOL—absent without leave. I respond that God was there in these actions I saw.

"Stubbe said he knows of eight men stationed with him at Khe Sanh who became priests or ministers because of their experience in Vietnam. [This has subsequently been increased to about two dozen]

"Well, perhaps that's the way this war is. It's ugly, it's painful, excruciatingly so, but maybe that's the only way new life can come to these people who have lived under terror for 40 years. [direct quote from a letter]

"The people Stubbe came into contact with fit the description of being fearful of the communist government, especially at Khe Sanh. There, mountain tribes people lived, people who were considered a different racial class than the Vietnamese. As such, they were discriminated against and could not leave the area during the fighting.

"Often, modern movies portray the majority of Vietnamese residents as resentful of the American presence but that was not the case, Stubbe said. Many people looked to the Americans as protectors and hoped their situation would improve after the war. In the end though, Stubbe feels Americans abandoned people who needed them most.

" 'We did abandon these people, ,which makes it (the war) all the sadder,' he said. 'We could not evacuate them and later we just abandoned them.'

"Movies, and even the media during the war, have given a distorted image of what Vietnam was like. Soldiers get portrayed as poor, angry drug abusers who treated new recruits badly. Vietnam was complex, Stubbe said, and certainly there was anger, especially during the end of the war, bcut a myth has grown up that has clouded the issue.

" 'You get these movies that are sensational—that's just not an accurate summation,' he said. 'That's not the way things were. There are a lot of false images of Vietnam. the popular movies are all made by people who weren't in Vietnam—(Oliver) Stone, (Francis Ford) Coppola—they weren't; even there.'

"Stubbe said he never saw any drug abuse and often saw more veteran soldiers taking newer people under their wing. This is part of the reason Stubbe sees the book 'Voices from Vietnam' as important. People who fought, lived and worked in Vietnam during the war need to leave a record so people know what really happened.

" 'I think this will help inform and preserve,' he said.

"Stubbe remained in Vietnam for 18 months and remained on active duty in the Navy until 1985. In 1991, he co-authored 'Valley of Decision,' an account of his experiences during the siege of Khe Sanh. He currently lives in Wauwatosa, volunteers as a pastor at a Milwaukee church and works with a veterans' group comprised of people stationed at Khe Sanh."

Herb Richardson, "With Faith and Devotion," *Leatherneck* 80:4 (April, 1997), pp. 14-18.

[*Three photographs: Leading worship on Hill 950, the Reid photo of 28 Jan 1968, and conducting worship at the DaNang POW camp on Christmas Day, 1968, plus an article on chaplains in general, including these paragraphs on p. 15*]

"Ray Stubbe is a reverend in Wauwatosa, Wis., today. He was chaplain for members of the 1st Bn. 26th Marine Regiment during early 1968.

"That's when the unit was being hammered day and night by NVA rockets and artillery at Khe Sanh Combat Base, near the Demilitarized Zone.

"Stubbe understood the need for small, frequent services.

"In a letter to former Leatherneck magazine managing editor, the late Tom Bartlett, Stubbe wrote, 'The remarkable thing was not only the number of worship services but the fact of the one minute sermon!' In many ways, I felt that just being with the men in their bunker or in their trench communicated far more than words ever would! I had been told not to gather more than three or four at a time since NVA forward observers on the ridge overlooking the base might very well regard that as a lucrative target and decided to provide background percussive music to our worship.'

"Stubbe said sometimes there were too many Marines at one time, but the service would be over so fast that enemy observers would have problems calling in ordnance.

"Stubbe's services lasted from five to seven minutes. There would be a prayer of invocation, often stressing that, 'Wherever two or three are gathered' and 'Lo I am with you always.'

"A reading of scripture would follow. A one-minute sermon came after that, followed by words of institution, distribution with wafers and wine in a common cup and Aaronic Benediction.

"From a reporting period of Jan. 28 through Feb 10, 1968, Stubbe covered that besieged airstrip in Northern I Corps, where death, destruction and misery rained down in torrents. He ministered in the bunkers and foxholes, tuned in and ready to react to calls of 'incoming' as he walked in the shadows of that valley of death.

"He conducted 53 total worship services along the way.

"Attendance was 435.

"Stubbe also conducted eight counseling cases while he was resting.

"Rest was a hard thing to find at times.

"Stubbe wrote, 'One night my bunker was so full of casualties that couldn't be evacuated, that I slept atop a 3 foot x 3 foot field desk, the doctor slept on the deck inside with his feet outside the "door" and five Marines fell asleep sitting up on my rack.'

"Like the other chaplains assigned to the Marines, he was following his duty 'to bring men to God and God to men.'

[..Mention of Father Brett and Alexander Chin, his assistant]

"Stubbe had Private First Class Jonathan Nathaniel Spicer transferred to help him out because Spicer was a mild-mannered, caring, papers-filled conscientious objector.

"Spicer also worked as a stretcher bearer with a habit of throwing his body over the wounded when there was incoming,.

"He was killed by incoming ordnance while evacuating casualties.

"Notch up a Navy Cross for the conscientious objector.

TSgt Henry D. O'Hara, Letter to the Editor, " 'Misfit' For Religious Services>'," *Leatherneck* 80:7 (July, 1977) p. 55.

[*Objects to photo showing me conducting Christmas services at the DaNang POW compound that was included in the Richardson article on chaplains*]

"On page 18 (April 1997) the picture you say is of Marines attending church services. Are you sure they are U.S. Marines?

"They are, for sure, a bunch of misfits, and whoever was in charge should have been court-martialed.

"Look at the photo and see some dummy and a clown wearing cowboy hats and not clothed from the waist up, and look at their shoes or what they are wearing.

"I usually give my copy (of Leatherneck) to a recreation hall, but not this issue. It goes in the trash, as I am ashamed of this photo you people saw fit to print."

[*The Editor asked me to respond. This was the Editor's comment:*

"The photo was taken at the DaNang POW compound, just north of Marble Mountain, Vietnam, on Christmas Eve 1968. Chaplain Ray Stubbe said: 'It was indeed a motly crew of Marines, some were off duty, and some were not. The theme (of the service) was of the shepherds and how they were grubby, dirty, looked down on and received the message of the birth of Christ from the angels.'—Sound Off Ed."

Jack Shulimson, LtCol Leonard A. Blaisol, Charles R. Smith, and Capt David A. Dawson, *U.S. Marines in Vietnam, The Defining Year, 1968*, Washington, D.C.: History and Museums Division, Headquarters, U.S. Marine Corps, 1997.

[*I am cited in footnotes on pp. 58, 59, 61, 65, 263, 276, 283, 327, 486, and listed as a reviewer of the draft manuscript on p. 763*

p. 58: "Former Navy chaplain Ray W. Stubbe, noted authority on Khe Sanh and its environs, observed that this census did not include the approximately 12,000 Montagnard tribesmen who lived in "some half dozen villes" in the immediate Khe Sanh area. LCdr Ray W. Stubbe, CHC, USN, Comments on draft chapter, dtd 23Oc94 (Vietnam Comments File), hereinafter Stubbe Comments."

p. 59: "Chaplain Stubbe noted the sharp contrast between the houses in Khe Sanh Village made of concrete and wood where the ethnic Vietnamese lived and the homes of the Bru made of bamboo and with grass roofs and on stilts in the surrounding "villes," Stubbe comments."

p. 61: "One authority on the battle of Khe Sanh, Chaplain Stubbe, commented that he was not sure why the guns were sent in the first place. His supposition was that they would be used to support FOB-3 operations in Laos. He was certain, however, that the guns would have made excellent targets for the North Vietnamese when they attacked the base. Stubbe comments."

p. 65: "Chaplain Stubbe recalled that the "People Sniffers" were bringing back hundreds of contacts. He remembered in the 26th Marines command post, "the map with the little red dots on the plastic overlay, and everyone wondering if this might not be an error–the detections of the ammonia from the urine of packs of monkeys." Stubbe also observed that the Marines also realized that radio pattern analysis could err when the NVA put out false transmitters, "broadcasting as though they were a Hq thus drawing airstrikes on a lone transmitter in the hills rather than a NVA Hq..." Notwithstanding these flaws, Stubbe contended eventually "together and coordinated, the intelligence was of great significance." Stubbe comments."

p. 263: "According to Prados and Stubbe, Captain Clarke was out on an early morning patrol just before the enemy onslaught on the 21st, but "miraculously got back to the perimeter and under cover" to help coordinate the defense. John Prados and Ray W. Stubbe, Valley of Decision, The Siege of Khe Sanh (Boston: Houghton Mifflin Co., 1991), p. 258."

p. 276: "Most Marines agreed with General Cushman and would accept the statement of Navy Chaplain Ray W. Stubbe, who has written and researched extensively on the subject of Khe Sanh, that an entire NVA regiment "waited to ambush any rescue force." LCdr Ray W. Stubbe, Comments on draft, dtd 23Oct94 (Vietnam Comments File."

p. 283: "Prados and Stubbe quote Captain Dabney about the possible firing of a Soviet FROG (Free Rocket Over Ground) missile, but found no other evidence of the NVA employing ground to ground missiles during the Khe Sanh campaign,. Prados and Stubbe, *Valley of Decision*, p. 392."

p. 327: "Ray W. Stubbe, who has done extensive research in this area, has provided the following figures based on his findings: He found the number of Marines killed for Operation Scotland to be 274 as opposed to 205. He cautions, however, that there are differences between the figures given in the command chronologies and those in the after-action reports and that none of the totals really jibe. Lieutenant Commander Stubbe gives as the best total for Operation Scotland and Pegasus, not including Lang Vei, as 560, including specialized Marine, Army and Air Force units. He gives a total of 219 KIA (Army and South Vietnamese) for Lang Vei. Chaplain Stubbe explained that there were many reasons for the discrepancies including staff officers frequently engaged with an on-going operation, "while still attempting to write reports on a previous operation,." He also observed that for most troops, "the entire period from the beginning of the siege until their departure is, for them, their Khe Sanh battle." Dates of the beginnings and endings of the various operations are as artificial and abstract as the border of Laos and Vietnam. It is the difference between "lived" battles and "officially recorded battles." LCdr Ray W. Stubbe, USN, Comments on draft, dtd 23Oct and 25Oct94 (Vietnam Comments File)."

p. 486: "Navy Lieutenant Commander Ray W. Stubbe, who has researched and written extensively on Khe Sanh, commented "the US Air Force's count of secondary explosions" at Khe Sanh, by which MACV determined through their complex mathematical formulae just how many NVA were killed, is grossly faulted since many of the "secondary explosions" they counted were actually conjointly-fired artillery missions: What they counted as a secondary explosion being, actually, a "friendly explosion." LCdr Ray W. Stubbe, USN, Comments on draft, 25Oct94 (Vietnam Comments File)."].

William R. Phillips, *Night of the Silver Stars*, Annapolis, Md.: U.S. Naval Institute Press, 1997.

[*I am mentioned on p. 114*] *"Authors John Prados and Ray Stubbe, in* Valley of Decision, *tell about Wilkinson sending Alpha Company of the First Battalion, 26th Marines, on the practice run. In their book, Capt. John W. Raymond commanded Alpha Company, which went through the bush, avoided both roads and trails, and accomplished the feat in nineteen h ours. Wilkinson today remembers the practice run exactly as Prado [sic.] and Stubbe described it.."*

1998

Joanne Weintraub, "Soldiers tell their story of Vietnam," Milwaukee, Wi., *Journal Sentinel* 116:327 (Thursday, Oct. 8, 1998), pp. E1, E4.

[*Large colored photo of conducting worship on Hill 950, face shot, and photo of Khe Sanh sign in Khe Sanh village, plus large article*]

"The first time U.S. Navy Lt Ray Stubbe saw Khe Sanh, he thought it was paradise: a place of soaring hills and silken mists, as green as Eden and, from the air, as peaceful.

"When even the illusion of peace gave way, Khe Sanh would never be the same. Neither would Stubbe, nor any of the thousands of other Marines who endured a pitiless 77-day siege there.

"Many of those men, including Stubbe, now a Wauwatosa resident and a Lutheran pastor in Milwaukee, recall their experiences of 30 years ago in 'Vietnam: The Soldiers' Story' (8 p.m., Sunday Tuesday, TLC), a six-hour cable special to be shown over three nights next week.

...

"Stubbe, then a 29 year-old chaplain serving with the Marines, arrived at the South Vietnam hill post in the summer of 1967. What had looked so heavenly from the air was something else at ground level, those green slopes hiding rats, fleas, razor-edged elephant grass and dank mud that dried into clinging red dust.

"Just a few miles from both the North Vietnamese and Laotian borders, Khe Sanh's hills hid something else, too: Viet Cong troops who had been making increasing frequent and deadly raids on the Americans and South Vietnamese. [sic., should be North Vietnamese soldiers, not Viet Cong]

"In January '68, a few months after Stubbe's arrival, these surreptitious raids became an [p. E4] all-out attack, an assault by North Vietnamese rockets, mortars, artillery and sniper fire, met by American B-52 bombers, that would not let up for more than two months.

"Surrounded by tens of thousands of hostile troops, accessible only by air, Khe Sanh received only sporadic deliveries of food, water and other supplies. Stubbe remembers how the men would spread plastic sheets on the ground at night, then lick off the morning dew.

"But religious services went on. The Lutheran chaplain from Milwaukee became the master of the two-sentence sermon, often serving communion to three or four or a dozen men on the battlefield—without his helmet, because he couldn't get used to wearing one while conducting services, Stubbe recalls with a guilty laugh.

"Later, when the Marines awarded him a Bronze Star for his serviced at Khe Sanh, he would be cited for the bravery and 'exceptional compassion' that repeatedly exposed him to hostile fire so he could minister to those who needed him most.

"The Marine base at Khe Sanh drew Viet Cong attacks 'like flypaper,' in Stubbe's words. It would soon become clear that the North Vietnamese had ravages the green hills less for the area's strategic importance than as a diversion, enabling Hanoi to prepare for the even bloodier Tet Offensive that year.

"But Khe Sanh was bloody enough...

"Veteran after veteran interviewed for the program says Khe Sanh was a life-changing event. Stubbe, who at 60 has lived as many years after the siege as before it, says he is still trying to come to terms with his own transformation.

"Following his 1965 ordination, Stubbe founded All Saints Lutheran Church in Oak Creek and entered a doctoral program at the University of Chicago.

"But as the war gathered weight, the young clergyman, though neither a hawk nor a dove, decided his own religious and ethical responsibility was to rejoin the military—he had served a decade before, between his graduation from Washington High School and his enrollment in Minnesota's St. Olaf College—and minister to U.S. troops.

"He never completed the doctoral program. Instead, Stubbe stayed on in Vietnam until '69, then continued with the Navy until retiring in 1985.

"He now serves as a substitute pastor at Redeemer Lutheran Church in downtown Milwaukee, but his other ministry remains Khe Sanh.

"Stubbe has collected voluminous reminiscences, diary entries and letters about the siege and the months surrounding it, many of which appear in a 1991 book, 'Valley of Decision,' which Stubbe co-wrote with historian John Prados.

"In 1989, he founded an association of Khe Sanh vets, a group which now has a membership of about 2,500 and publishes a magazine.

"He calls the Marines who endured the siege with him 'the finest men I know' and still marvels at their willingness to risk their lives for each other, even when some of them—Stubbe among them—questioned the morality of the U.S. position in Vietnam.

"Stubbe has also done years of research on the Americans who died at Khe Sanh, producing as historian Prados writes, something like a verbal equivalent of the Vietnam memorial wall.

"So Stubbe found a cause and a community—now a scattered community, but from the evidence of the articles in the Khe Sanh magazine, one to which its members are passionately devoted.

"And, of course, there were things he lost. Not just friends, many of them younger than himself, but, says Stubbe, who never married, some of his ability to draw as close to others as he might like.

" 'We were sure we were going to die,' Stubbe says. 'And that changes you permanently.'

"One thing hasn't changed in 30 years. Asked whether he believes the U.S. position in Vietnam was morally defensible, he says: 'You know, I still]can't tell you. I'm still in the woods on that.']

" 'Vietnam: The Soldier's Story'," Evangelical Lutheran Church of the Redeemer, Milwaukee, Wi., *Tidings* 69:18 (Nov. 1, 1998) p. 11.

[*Announces the TV program and the newspaper article, concluding with the paragraph:*
"The interview paints a richly deserved tribute to Ray for all that he has done and all that he is. A copy of the article is in the church office. If you would like a photocopy mailed out to you, please give us a call. We have many reasons to take pride and give thanks for the life and ministry of Ray Stubbe. We are richly blessed."]

1999

"Marine Corps Service Begins Memorial Weekend Observances," Wisconsin Memorial Park, Wi., *The Park's WordsForLife* (Spring, 1999), p. 2

"On Sunday, May 30, at 9:30 a.m., the Badger Detachment of the Marine Corps League and Badger Unit of the Marine Corps League Auxiliary conduct one of the largest Memorial weekend observances at the Park. 500 to 700 people will be in attendance in Liberty Court of the Gardens of Eternal Life.

"The guest speaker for this year's observance will be Ray Stubbe, a chaplain during the Vietnam War, 1976 [sic, should be 1967]-1985. Rev. Stubbe will be joined by the Cudworth Chorus..."

Fred Buning, "Letting Soldiers Talk, Recollections of the horror and perils that were Vietnam," (New York), *Newsday*, Tue., Aug. 31, 1999, Section B, pp. 1, 7, 10.

[*Quoted on p. 10*]

"The Rev. Ray Stubbe, a Lutheran minister who served as a Navy chaplain in Vietnam during the 1968 Khe Sanh siege, voiced similar thoughts in 'The Soldier's Story.'

" 'You don't want to leave your buddies,' Stubbe is quoted as saying. 'It's like being welded almost, in the heat of the battle... You don't want to abandon it.'

"But the world intruded at last. Tours of duty ended. The men came home and went separate ways, and many retreated into their own thoughts, Stubbe said. Still, they never forgot one another. 'They were maybe the most marvelous people, as a group, I've ever met, I've ever been with,' Stubbe said.

"From his home in suburban Milwaukee, Stubbe, 61, who is retired from the Navy but still preaches in a local church, said he hears from many of the vets. 'They call me all the time,' said Stubbe, who wrote a book 'Valley of Decision: A History of Khe Sanh,' and founded a national organization for survivors of the siege. 'They will have grief dealing with friends who died.'

"Stubbe says veterans need to talk—to one another, to the important people in their lives and, in a way, to the nation.

" 'It breaks the spell,' he said. 'If you can externalize by talking about it, then you are not in it. Your wounds enable others to deal with theirs.'"

2001

Beth Laski, "Zwick enlisted for 'Khe Sanh'; Hanks on team," *The Hollywood Reporter* Vol. 367, No. 27 (March 22, 2001) pp. 1 and 48.

"Multihyphenate Edward Zwick, up for an Oscar on Sunday for producing 'Traffic,' is in negotiations to direct Fox 2000's drama 'Khe Sanh,' being scripted by William Broyles Jr. and produced by Tom Hanks, about how a priest's faith is challenged by his experiences at that besieged outpost during the Vietnam war.

"In has not yet been determined whether Hanks, also in the running for an Oscar for his starring turn in [p. 48] 'Cast Away,' will star in the project. The story is told through the eyes of then 30-year-old Ray Stubbe, who served as a Navy Chaplain for the 1st Battalion, 26th Marine Regiment at Khe Sanh from July 1967 through most of the 2 ½ month siege that ended in spring 1968. The siege of Khe Sanh was one of the most bitterly fought battles of the war. 'Khe Sanh' is currently a working title for the project.

"Fox optioned the feature film rights to the 1,500-page diary Stubbe kept during his time in Vietnam when he held as many as a dozen prayer sessions daily. Stubbe spent most of his term of service in the midst of the action, counseling soldiers and witnessing the death and destruction.

"Broyles has been working on the project for the past several years, and Zwick is the most recent addition to the team that has included Hanks. Broyles met with Stubbe at Stubbe's home in Wauwatosa, Wis., and has completed several drafts of the script..."

Geeta Sharma Jensen, "Letters from hell tell heroes' stories," Milwaukee, Wi., *Journal Sentinel*, Sun, Aug. 26, 2001, p. 2E: "Wisconsin War Letters.:

" Vietnam War: Ray W. Stubbe, who now lives in Wauwatosa, was a 29 year-old chaplain with the Navy reserve at the Marine base in Khe Sanh when Communist forces blitzed the base in January 1968. The attack on Jan. 21 was the beginning

of a 75-day siege that would leave hundreds of Americans dead. But Stubbe didn't know that when, on Jan 21, he wrote his parents in Wisconsin:

'Dear Folks:

'First, I'm OK, not even a scratch. The casualties have been comparatively small. So don't worry.

'I feel I'm needed here. I give every waking moment to these men. They are basically good men, but not particularly religious as such, although I'm quite sure many prayed today! Yet I love them all, and give my daily life for them, and I do it not for personal satisfaction or companionship ore a sense of personal accomplishment, but because I feel this is God's will'."

Rob Golub: "Vietnam War chaplain to be subject of movie," Racine, Wis., *The Journal Times* Vol. 144, No. 313 (Fri., Nov. 9, 2001), p. 1. Large colored photograph beside altar made from 105mm ammo boxes and article:

" The screen writer for 'Planet of the Apes' and 'Cast Away' is crafting a new script for a movie about a heroic Wauwatosa pastor who counseled soldiers in the Vietnam War. Tom Hanks could play the pastor.

"The pastor is Ray Stubbe, who by coincidence will lead interfaith prayer services on Veterans Day at Memorial Hall. With thoughts of Sept. 11, Racinians are invited to bring their American flags to Memorial Hall at 10:30 a.m. Sunday, so that Stubbe can lead a joint blessing of the flags.

"Screenwriter William Broyles Jr. has reported to Stubbe in recent months that he is reworking the script. Broyles, an accomplished Hollywood screenwriter, has been working with Stubbe for years on the script for 'Khe Sanh.' The Hollywood Reporter, a trade paper, has reported 'Khe Sanh' might even star its producer, Tom Hanks.

"Despite this flurry of Hollywood activity, Stubbe lives a relatively normal li8fe in Wauwatosa.

"Stubbe is a retired 63-year-old pastor, but he's a superhero in the eyes of some who knew him at the American military base in Khe Sanh, Vietnam. He served as a Navy chaplain at the outpost, where he was a twinkle of humanity in a place of fear and darkness.

" 'He was very inspiring without saying a lot of words,' said Richard Bryant of Kenosha, a former Marine who served with Stubbe. 'He made you want to be a little bit better than you were.'...

"In the siege of Khe Sanh, enemy troops surrounded a vastly outnumbered contingent of a few thousand American soldiers. Enemy rockets and bombs leveled the buildings on base, most especially when an ammunition depot was hit.

"So thousands of American 18- and 19-year-olds hid in trenches for weeks, with bombs constantly [p. 11A] falling from the sky, and the threat of invasion ever-present. They went without fresh water or sleep for days, waiting in the mud for death.

"Soldiers were ordered to avoid getting into groups of more than five or so. Groups of people were easy targets for the North Vietnamese Army. It presented Stubbe with a problem. How could he lead prayer services without grouping soldiers?

"The solution: Go to the soldiers in the trenches. Stubbe could have stayed in a foxhole or a bunker, said Bryant, and no one would have blamed him.

"Bryant, 52, seems 19 again when he remembers Stubbe's words at the prayer sessions: 'We were doing our duties. We were defending freedom. He would tell us how proud he was of us.'

" 'I'd be very, very, very short,' remembered Stubbe during an interview at his Wauwatosa home. 'I'd give maybe a two-sentence commentary about how God is with us. I had (Holy) Communion.'

"Hollywood may want a movie about a pastor whose faith is challenged by living in an outpost under siege. Stubbe's true story, however, is different.

" 'I can't say that my faith was really questioned,' he said. 'People were caring for each other, they were sharing their last drops of water.'

"In any case, he said, 'I think of God as present in suffering.'

"In that sense, his faith was strengthened, he said, though in 1968 he didn't really have much time to think about it.

" 'I felt like I was sort of like a robot,' he said.

"Stubbe sees a disturbing parallel between the siege of Khe Sanh and life in America since Sept. 11.

" 'We realize there's no safe place,' he said. 'Those of us who were in battle, especially Vietnam, understand—the uncertainties, the helplessness.

" 'It's something we have lived with and don't usually talk about because no one really understood.' Now, he said, American civilians have some level of understanding.

"Stubbe has poured memories of the siege into an unused bedroom in his house. The room has become a tribute, with plaques and maps.

"Most striking may be the recreation of the makeshift altar he used before the siege. The altar is made of four stacked rifle boxes and a camouflaged parachute for a tablecloth. He used the bottom half of a rocket-shaped mortar shell for a candle stick.

"The siege of Khe Sanh, which started in January 1968, finally relented in March of that year. Highly targeted American bombing from the air helped drive the enemy back.

"It's all history now, and it's history with a record. Stubbe kept day-by-day diaries at Khe Sanh, which he rewrote into thousands of typed pages. It's the basis for a book he co-wrote, 'Valley of Decision,' and for the first-draft motion picture script Broyles gave him.

"Stubbe, who also founded the first Khe Sanh veterans' association, wants recognition for the men of Khe Sanh.

"He hopes that in the movie he'll be a narrative device, using him to show the viewer what it was like for the grunts. He's doing it for the soldiers. More than 30 years after the siege of Khe Sanh, Stubbe's mission continues."

"Ceremonies planned for Veterans Day," Racine County, Wisconsin, *The Journal Times*, Vol. 144, No. 314 (Sat., Nov. 10, 2001), p. 1D:

... *"The Rev. Ray Stubbe, who was a Navy chaplain during the Vietnam War, will lead the Veterans Day service. During the war, he offered communion to Christians on troop ships. Stubbe will be joined by the Olympia Brown Unitarian Church Choir, Mayor Jim Smith, and Racine County Executive Jean Jacobson. Flag projects from Giese Elementary School and Park High School will be displayed in the hall. Flag label pins and booklets with patriotic statements will be distributed. The event is sponsored by the Racine Area Veteran's Council and The Journal Times."*

Tenuta, Marci Laehr, "A day to honor gains new meaning," Racine County, Wisconsin, *The Journal Times*, Monday, Nov. 12, 2001, p. 1.

"Thoughts of the Sept. 11 terrorist attacks brought significantly larger crowds to Sunday's Veterans Day events than those of recent years.

"Ceremonies held around Racine County were crowded with hundreds of people to honor those who have served in the U.S. military and to pray for those currently involved in combat.

"On Sunday morning at Memorial Hall in Racine, the Racine Area Veterans Council held a special prayer service and flag blessing ceremony . Rev. Ray Stubbe, a ELCA Lutheran pastor who was a Navy chaplain during the Vietnam War, led the service.

"Local residents were asked to bring in American flags to be blessed on Veterans Day.

" 'Blessing something or someone is not just saying nice words,' Stubbe said, 'It is giving a thing or a person a force. It is making that person or thing a vehicle of the Lord's presence, so that life and growth of life in all its fullness emanates and radiates outwards.'

"Stubbe asked all those who had brought flags to hold them high above their heads. He said red is the color of blood, of life, of passion, and of warmth.

" 'Increase our love of people, our passion for the gift of life, our readiness to sacrifice, as we recall those who have made the red of this flag a reminder of their sacrifice to our nation and those beyond our nation to give freedom, life, and blessing,' he said.

"White, Stubbe said, is the presence of all colors without spot or blemish.

" 'Keep us aware that we are one people of many colors and backgrounds,' he said. 'Remind us to work to cleanse our nation of destructive, life-robbing forces that would blemish and stain our people, and to keep ourselves pure so we are strong for the sake of all others.

"Finally, he said that blue stood for loyalty, the sea and sky, for hope and is the background of the stars.

" 'As we have experienced the loyalty in which we all depend on each other in desperate battles, may the sight of this starry blue field remind us that we, as individual stars, are joined together in a mighty constellation.' Stubbe said. 'May it remind us to be faithful, and true and loyal.'

At the ceremony, Mayor Jim Smith and Racine County Executive Jean Jacobson extended their thanks to local veterans..."

National Conference of Viet Nam Veteran Ministers, *NCVNVM Membership News* 11:4 (Mar. 1, 2001), p. 7. [*Reprint of the article by Rob Golue of the Racine Journal Times*].

Jurate Kazickas, *et al*, Gloria Emerson, Intro., *War Torn, Stories of War from the Women Reporters Who Covered Vietnam*, New York: Random House, 2002, p. 136.

"I once asked Reverend Ray Stubbe, the Lutheran chaplain of Khe Sanh and a military historian, if the men who lost their lives in Vietnam had died in vain.

" 'I don't think Vietnam was worth fighting for, but I cannot bring myself to say their deaths were meaningless. War is not about divisions and battalions of men. It is made up of squads and recon teams and your buddies in the bunker,' Reverend Stubbe said. 'These men did not die for Vietnam or Washington. They died for their friends—trying to save each other or giving of themselves to prevent others from dying. These deaths were not meaningless because the men died for each other.' "

2003

Edward E. Murphy, *The Hill Fights, The First Battle of Khe Sanh*, New York: The Ballantine Publishing Group, Random House, 2003, p. vii, "Acknowledgments."

"The Rev. Ray Stubbe, of Wauwatosa, Wisconsin, was a Navy chaplain with the 26th Marines during the Khe Sanh siege in 1968. Since that time he has devoted untold thousands of hours to research that battle and other events relating to Khe Sanh and has earned a well-deserved reputation as the authority on the subject. His hard work resulted in the publication of the definitive Valley of Decision, which not only covers the siege but also provides considerable background material on the United States military's involvement at Khe Sanh, including the Hill Fights. Ray is also the founder of the Khe Sanh Veterans Association, a veterans group with an annual meeting open to anyone who ever served in and around Khe Sanh. From the first time I contacted Ray about my project, he unselfishly provided every bit of help and assistance I needed. He supported my efforts and encouraged Hill Fights veterans to respond to my request for interviews. Ray routinely provided documents from his archives that even the Marine Corps Historical Center could not. When I needed a photograph, Ray provided it. He devoted some of his rare spare time to reviewing the manuscript and helping me over rough spots. Without his support, help, and encouragement, I could not have written this book."

2004

Note on front cover of book: Michael Archer, *A Patch of Ground, Khe Sanh Remembered*, Central Point, Or.: Hellgate Press, 2004.

"Preserves a part of history that might have been forgotten had Michael Archer not written it down. It captures the feelings, characters and events in a superb manner." Ray W. Stubbe, Chaplain of the 1st Battalion, 26th Marine Regiment at Khe Sanh and co-author of Valley of Decision: The Siege of Khe Sanh and Inside Force Recon.

[Numerous quotations in]: Floyd, LtCol W.C., *Green Ghosts*, New York, iUniverse, Inc., 2004. [Floyd's hand-written note inside the book]: *"To Chaplain Ray Stubbe. Ray, I thank you for allowing me to use so much of your research and writing. As you browse through the contents of "Green Ghosts" you will wonder why you are not listed as co-author, but without your thoughts and insight I would not have been able to do justice to the chronicle of these men in combat. Thanks for your service to our country and your love of the Marines whose life you touched. You are a true American hero and more importantly a "real man of God." Semper fi, Bill Floyd."*]. [Excerpts from my *Aarugha* are on pp. 7-9, 10-11, 12, 13-14, 22-23, 38-39, 50-51, 80, 87-88].

2005

"After the Fall: Vietnam 30 Years Later," large colored photograph by Jack Orton showing heavy bag work at Duke Roufus Gym, on front page of: Milwaukee, Wi., *Journal Sentinel* Sat., April 30, 2005, p. 1.

Meg Jones, "Battles still fresh for vets," Milwaukee, Wi., *Journal Sentinel* , Vol. 123, No. 166 (Sat., April 30, 2005), p. 1A, 15A [Quotes on p. 15A]:

"For Ray Stubbe, a Navy chaplain who survived the siege of Khe Sanh, the war hasn't ended.

" 'I think you'll find I'm not alone. Some of these things are permanently there. They color our relationships with other people, how we see events, how we value things,' said Stubbe, a retired Lutheran minister who lives in Wauwatosa.

...

"Battlefield communion

"Stubbe didn't fight the war, but he saw up close the devastation it left on the beautiful land and Vietnamese people. Stubbe, who grew up in Milwaukee, volunteered to go on active duty as a Navy chaplain, knowing he would most likely get s hipped to Vietnam. He arrived in 1967, was attached to a Marine unit and stayed until January 1969.

"During the siege of Khe Sanh, ,which lasted more than two months, Stubbe ran to trenches and bunkers to minister to his Marines, performing 25 to 30 abbreviated services each day. Having a single service didn't work, since the Marines were told not to gather in groups of more than five or six to provide less of a target to the mortars, bombs and bullets that rained down on the base.

" 'During the battle I would do a whole service in like seven minutes. I would get it down to a couple of sentences and communion,' said Stubbe, who carried a small communion set with him that contained a small chalice and wine he had blessed. One time one of the Marines, inste3ad of taking a sip of wine, drank the whole cup of spirits, Stubbe said.

"One of the Marines on the base at Khe Sanh refused to use his rifle because he didn't want to hurt anyone. Stubbe told the man's commander he could work as a stretcher bearer, and the Marine ended up carrying litters with wounded and

dying men as artillery fire landed around them. Even when others were taking cover in trenches, the man stayed with the stretchers, sometimes lying over the wounded to protect them.

"One day the Marine stretcher be3arer was hit with shrapnel that pierced his heart. He died a couple of weeks later.

" 'I got to know him. I talked to him a lot. I thought in some sense I was responsible (for his death) for a long time,' Stubbe said. 'I thought, had I not intervened, they might have shipped him to the rear. Because I intruded he died.'

"It took many years for Stubbe to come to come to grips with the man's death and realize that he wasn't to blame.

"It hurts Stubbe to talk about the war and its effect on him. Since he's a minister, he said, sometimes people ask him where God was in the war. But his reply is always the same – the love he saw, when soldiers gave others their last drop of water or a hug in the midst of battle, the courage he saw, when soldiers risked their lives for their comrades, meant to him that God was present on the battlefield.

" 'There are so many positives and negatives,' Stubbe said. 'I learned a lot about myself and about other people. I learned the value of things that almost everyone takes for granted, a beautiful day, the peace, the quiet. Even bad things turn out to be blessings."

Jacquelyn Brown, *The Look*, Bloomington, Indiana: Authorhouse, 2005, p. ix, "Dedications."

"To my dear friend, Chaplain Ray W. Stubbe, who was stationed on the Khe Sanh Combat Base during the Tet Offensive in 1968. My heartfelt gratitude goes out to you for your unyielding encouragement, belief in the integrity and credibility of this story, and your patience and willingness to communicate with me for over a year. Without you, I could not have written The Look. Though I may never meet you, I owe you a debt of gratitude that I can never repay. Thank you for being my friend, and thank you for drafting me as an honorary member of the Khe Sanh Veteran's Association."

"Khe Sanh," in Catherine Leroy, *Under Fire, Great Photographers and Writers in Vietnam*, New York: Random House, 2005, p. 67. [Contains an essay, "Khe Sanh" which I wrote, commenting on photograph by Robert Ellison of a trench in the Bravo Co., 3d Recon area of Khe Sanh during the siege]

"Khe Sanh's trenches mirror the war's gash into my soul. Struck within its networks, then and now, images of men I came to know as their chaplain during the six months prior to the siege continue to explode within me.

"At Khe Sanh, we dug deeper and deeper. Deadly incoming–up to 1,600 rounds a day–instantly leveled all aboveground structures and sculpted moonscape devastation. Two craters outside the Battalion Aid Station were so deep, I could stand in them and my head would be below the surrounding surface. We all know" there is no safe place in Khe Sanh.

"Since groups larger than six were prohibited (one round might kill everyone), worship services were small in size and frequent in number: a short prayer, a two-sentence sermon, a reading from the Bible, Communion, and a blessing: all within ten minutes–were repeated from trench to trench a dozen times daily. Sometimes, since the incoming was so intense, all I could do to communicate God's love was to hug. Once, I was alone and my prayers reduced to babblings as I bounced from the shock of explosions of nearby land mines. I held the hand of one painfully wounded man who asked me to say the Ninety-first Psalm, and prayed with another who shared his joy over a wrestling scholarship and his imminent departure. A few days later, he was killed. I stayed overnight with a 106mm recoilless rifle squad. We shared coffee and conversation. The next day, I pulled out and carried a headless Marine from the rubble after that position took a direct hit.

"Khe Sanh was alive with death. Another chaplain, Father Brett, was killed when one of the Khe Sanh trenches took a direct hit. At Graves Registration, I prayed over the corpse of a man I had just baptized a few days earlier.

""My bunker was crowded with wounded waiting through the night to be evacuated. I slept atop a field desk. Nearby, a Marine I knew well, Rick, dabbed his head with a roll of toilet paper. The floor below was filled with his bloody, crumpled papers. I was startled to see him the next day digging deeper trenches in the recon area. "That wasn't my blood," he explained, "It was the blood from others in the trench that were killed."

Ronald J. Drez and Douglas Brinkley, *Voices of Courage: The Battle for Khe Sanh, Vietnam*, New York: Bulfinch Press, 2005, p. 180, "Acknowledgments:"

"The only other person doing any research on Khe Sanh was Chaplain Ray Stubbe, chaplain of Khe Sanh, who was present for the entire battle of 1968... I joined with Chaplain Stubbe and began an independent, individual research of the veterans who fought there both in 1967 during the Hill Fights, and in 1968 during the encirclement... Stubbe and I became friends and in the end shared our research, and that archive is the basis for this book.."

Letter from General James L. Jones, USMC, 05 October 2005, reprinted in Khe Sanh Veterans, Inc., *Red Clay*, Issue #63 (Winter, 2005), p. 29.

"Dear Chaplain Ray Stubbe,

"Thank you for your thoughtfulness in sending me the book, Battalion of Kings: A Tribute to our Fallen Brothers who died because of the Battlefield of Khe Sanh, Vietnam. I was delighted to receive such a fine historical book of our forces in support of their nation. Thank you also for the honor of mentioning my involvement as a First Lieutenant and the brief sketch about my father. I look forward to reading it at my earliest opportunity. This is an excellent resource and will be a valuable part of my library.

"Thank you for thinking of me, as well as for all that you have done on behalf of the Corps. I wish you continued success."

Tom Eichler, "Our Khe Sanh Archives Find a Permanent Home," Khe Sanh Veterans, Inc., *Red Clay*, Issue #63 (Winter, 2005) P. 18.

"With the publication of Battalion of Kings, Chaplain Ray William Stubbe has donated all of his Khe Sanh records and memorabilia, to the Wisconsin State Veterans Museum in Madison, Wisconsin. This includes some 475 books pertaining to what happened at Khe Sanh, about 90 linear feet of files, five boxes of microfilms, over 2,000 cassettes of interviews, several thousand still photographs, several dozen FHS tapes, and a room-full of artifacts sent home from Khe Sanh. The Wisconsin State Veterans Museum includes holdings dating from the Revolutionary War but is especially strong in materiakls dating from the Civil War to the present. There on staff are about half a dozen librarians, a like number of archivists, and a curator. (Read Ray's Speech on Pages 55-61).

"The hundreds of Khe Sanh vets who contributed memoirs, diaries, letters of information, photographs, artifacts, etc,., to Chaplain Stubbe may now rest assured that these are safe from damage or destruction by fire, water, theft, or consignment to a land-fill (should Ray suddenly die or become seriously ill and someone had to clean out his house). These materials will not be immediately open to the public, thus guarding privacy concerns, but will be preserved for future historians many decades from now, who wish to gain an accurate picture of our Khe Sanh experience. This collection is undoubtedly the most complete collection of information concerning Khe Sanh that exists, including not only personal accounts, but official documentation from the Department of Defense, all branches of the military service, CIA, DIA, NSA, and the President Johnson Presidential library. About 110,000 pages of documentation pertaining to Khe Sanh have been microfilmed on archival film which should last at least 300 years under suitable climate control, and sets of these films have been deposited with various archives.

"Chaplain Stubbe plans to prepare two more books: a collection of quality photographs from Khe Sanh, the other being a collection of translations of official (and in many cases, classified Secret) histories of what happened at Khe Sanh which have been recently translated, including numerous tactical maps, tables, and details that provide 'the other side' of what happened at Khe Sanh.

"The 40th anniversary of the siege battle at Khe Sanh will happen in about two years (2008), a time traditionally for doing special commemorative events (as with the D-Day 40th anniversary). Then, just a decade later—and for us who are getting older, ten years passes very quickly!—we wikll have the 50th anniversary. Since it takes several years of 'lead time' to get some things done, the time to plan is NOW. (Possible suggestions might be a performance of special symphonic musical works which have been written specifically to honor Khe Sanh veterans, a smaller one by Randy Cross and Symphony No. 6 by Weresow, the father of a Khe Sanh vet; the issuance of a special US postage stamp, the writing of a commemorative book, a Confessional resolution and perhaps proclamation by the various state governments, a special reunion which would have high-profile dignitaries as part of the program, TV programs, etc.)."

Anonymous, "Khe Sanh Remembered, Stubbe Tells of Siege, Service," Wisconsin Veterans Museum Foundation, *The Bugle* Vol. 11, No. 8 (Dec., 2005), p. 1.

"On November 10, Reverend Ray Stubbe spoke at the Wisconsin Veterans Museum about his experiences as a Navy chaplain with the 1st Battalion, 26th Marines at Khe Sanh before and during the siege. Stubbe had a number of close calls during the siege as he moved between bunkers and trench lines ministering and performing services for troops as NVA shells rained down upon them. As a front line chaplain, he walked patrols and spent time at the various hill outposts surrounding the Khe Sanh fire base. Stubbe served two tours in the I Corps region of Vietnam. He founded the Khe Sanh Veterans Association and co-authored several books on the siege of Khe Sanh, including the authoritative Valley of Decision, and a book on Marine Force Recon. Prior to the lecture, Stubbe received a commendation from WDVA Secretary John Scocos, honoring him for service to his country and also for donating his archives and artifacts to the WVM.

"In his own words, Stubbe's research about Khe Sanh began in 1970 as an attempt 'to make sense of what I had experienced, trying to find some meaning.' He began by typing his daily Vietnam diary. Over the next two decades he added material from military archives throughout the country and from conversations with thousands of Khe Sanh veterans. His final re-write, completed in 1989, was 1,106 pages of extensive research.

"Stubbe's manuscript collection is of national significance and will be used by future military historians as they interpret the siege of Khe Sanh and its meaning. The collection consists of his diaries, correspondence, oral history interviews, published books and periodicals, records of the Khe Sanh Veterans Association, Inc. (an organization Stubbe founded), maps, and research files."

Jim Dalton, "Memoirs," Khe Sanh Veterans, Inc., *Red Clay*, Issue No. 67 (Winter, 2006), p. 50:

"..I became convinced that Tweedy wasn't going to make it, that he needed a priest. Just as I was about to run off half-cocked, I noticed someone hustling toward the hospital. To my complete amazement, I spotted a cross on his collar. It was a Chaplain. I told him about Tweedy in a rush of words, begging for him to help the guy. He didn't hesitate. Giving my shoulder a quick, comforting squeeze, the Padre said, 'Don't worry, son, I'll see to him,' then hustled through the door into Charlie Med...

"When I recently saw my first copy of Red Clay ever, I had quite a shock. I recognized a face I had only seen once 38 years ago. It was [the] Padre I had met outside Charlie Med on that awful 15th of April day in 1968. The name under the picture identified him as the Rev. Ray Stubbe. I have since written to Padre Stubbe, thanking him for the comfort he gave me and my dying buddy so long ago. Someday, soon, I'd like to shake his hand."

"Within minutes of landing at Da Nang, his first taste of the war was seeing an officer treating his own bloody leg wound. 'I thought, "Welcome to Vietnam," ' Stubbe recalls.

"He eventually went on Marine combat patrols around Khe Sanh, barely survived a debilitating fever that still impacts his health, enrolled in jump school and trained with the Special Forces. And although he no longer heads the group he established, Stubbe still keeps in close contact with his wartime acquaintances. 'It's veterans helping veterans,' he says."]

Marc Leepson, "Books in Review," Vietnam Veterans of America, *VVA Veteran*, 26:2 (May/June, 2006), p. 34.

"Chaplain Ray W. Stubbe, who served at Khe Sanh and co-wrote (with John Prados) the seminal book on the experience, Valley of Decision (1991), has put together Battalion of Kings (Khe Sanh Veterans, Inc., 469 pp. paper), a tribute to the Marines who fell at Khe Sanh. The heart of the book is a long list of individual and personalized tributes (including poems, memoirs, and letters) for each of the Americans who perished. The book has been sent gratis to military archives, libraries, the families of those who were killed at Khe Sanh, and to those who made significant contributions to the research that went into compiling this impressive volume. For more information contact Khe Sanh Veterans at TEIC1448@aol.com."

Martin Hinz, "Of life & death," Evangelical Lutheran Church in America, *The Lutheran*, Vol. 19, No. 8 (August, 2006) p. 44.

"The Wisconsin Veterans Museum in Madison is bringing back ghostly memories for retired Navy chaplain Ray Stubbe. A life-size diorama, part of an exhibit titled 'In the Belly of the Dragon: Life and Death in I Corps,' includes the retired ELCA pastor's cross, helmet and boots still caked in Vietnam's mud.

"Life is quieter these days for Stubbe, who lives in Wauwatosa, Wis., where he attends St. Matthew's Lutheran Church. But in early 1968, he was ducking rockets and sniper bullets during the siege at Khe Sanh. An acclaimed photo by Life photographer Dick Swanson shows Stubbe leading three Marines in prayer. That scene is re-created in the exhibit, which will continue through 2007.

"Stubbe also donated 150 boxes of files, thousands of photos, 2,000 cassettes of taped interviews and numerous other military artifacts to the museum. (http://museum,dva.state.wi.us). 'It was a great relief for me to know that all that information will now be safe,' he said.

"Stubbe, who served two tours in the I Corps region, founded the 3,000-member Khe Sanh Veterans Association in the mid-1980s. 'People could find buddies that they hadn't seen for 25 years. It was a healing process, the gathering of the lost sheep,' he said.

" 'The experience of war developed a real sense of how much we are connected to each other,' Stubbe added. But many of the troops went to Vietnam with a Sunday-school faith, one not related to issues of life-and-death.

" 'When they came back, the vets felt left out,' he said, indicating that churches didn't know how to deal with the challenges of isolation and shame that many felt. As they aged, most gradually reconciled themselves to this but retained the desire to stay in touch with each other.

"Stubbe joined the Navy Reserve in 1956, while in high school, and was on active duty for several years before attending St. Olaf College, Northfield, Minn. A graduate of the former Northwestern Seminary, Minneapolis, he became a chaplain in 1967, serving until 1985 when he retired as a lieutenant commander.

" 'Many of my vets had asked, "where was God?" when they witnessed the terrible things going on around them,' Stubbe said. 'I'd answer: "Remember how people cared for each other, risking their lives? Where the action of God is, God is present. He works through people and in those mysterious ways." ' "

"Courses and Mini-courses for Adults, Fall 2006 – Spring 2007" [brochure], St. Matthew's Evangelical Lutheran Church, Wauwatosa, Wi.

"Sep 17, Faith on the Frontlines. Pastor Ray W. Stubbe, former Navy Chaplain (1967 – 1985) who served two tours in Vietnam, addresses the devastation of intense, prolonged battle and discernment of God's presence in it. Chaplain Stubbe was featured in the August edition of The Lutheran magazine, and a life-size diorama of him leading worship is scheduled to be on display at the Wisconsin Veterans Museum in Madison. Instructor: Pastor Ray W. Stubbe."

"Vietnam Veteran Tag for Navy Chaplain Ray Stubbe.

"Found by Katherine Bryja, design editor

"Location Veterans Park right off the War Memorial Center

"Date found About 8 a.m. Aug 14

"The object's story. This type of thing tears at my heart because it's likely a memento that someone valued, but it also feels uncomfortably commercial. I remember visiting the Vietnam Memorial in Washington years ago and marveling at the dozens of vets selling dog tags and mini-POW flags. The people who passed by without purchasing anything sweat beads of guilt. Maybe the little tag I found was actually on the keychain of a friend of Ray Stubbe's, but I bet it was given away or sold to someone passing by a veteran on the street."][*Note: Mr. Joel Paplham later told me that he had made this item.*

"In the Belly of the Dragon: Life & Death in I Corps," Wisconsin Dept. of Veterans Affairs, *Forward Veterans*, Vol. 1, No. 3 (Oct., 2006), p. 7.

"A new 1,000 square foot exhibit highlights the experience of Wisconsin veterans in Vietnam. 'In the Belly of the Dragon: Life and Death in I Corps,' opened on September 23, and makes use of newly received artifacts and interactive components.

"The exhibit was professionally designed by Museum curators Bill Brewster and Jeff Kollath. Brewster and Kollath also spearheaded the collecting of major donations of Vietnam War artifacts. Some came in as single pieces, while others were received in truck load quantities. Rev. Ray Stubbe of Wauwatosa, for example, provided an enormous collection of Vietnam materials that focused on his participation at the battle of Khe Sanh in 1968. The Stubbe collection is one of the largest collections that the Museum has ever received, and is of national significance.

" 'In the Belly of the Dragon: Life and Death in I Corps' will be on display until Spring 2008. Admission is free and open to the public from 9AM to 4:30PM, Monday through Saturday, for more information call (608) 267-1799."

"Mail Call, Khe Sanh: Counting KIA," Veterans of Foreign Wars, *VFW* Vol. 94 Vol. 94, No. 4 (Dec., 2006), p. 6.

"Re: 'Three Deadliest Days at Khe Sanh' (October) by Al Hemingway. During the siege of Khe Sanh itself (Jan. 20 – March 31, 19658), 402 Americans were killed. The Marine battalions alone sustained 274 KIA: 1/26=96, 1/9=72, 2/26=42, 3/26=46 and 1/13=18. If all supporting unit casualties (from all services) are included, the total is 402 KIA.

"When allied indigenous and enemy casualties are factored in, the siege battle of Khe Sanh is undoubtedly the most costly in terms of loss of human life for the entire Vietnam War."

2007

"Chapter Affairs," Southeastern Wisconsin Chapter, MOAA, *Newsletter*. Vol. 25, No. 1 (Jan., 2007), p. 3.

"Chaplain Ray Stubbe, LCDR, USN-Ret will be our speaker at the February 11 luncheon meeting at Klemmers. He served on Active Duty with the U.S. Navy for 21 years. His first assignment was aboard the Destroyer USS NOAH, and later he was assigned as a Chaplain with Marine detachments in Vietnam. He served there with the Marines at the Battle of Khe Sanh in 1968. He has provided an enormous collection of Vietnam materials that focus on the war in Vietnam. These war artifices have been donated to the Veterans Museum in Madison. The Stubbe collection is one of the largest collections that the Museum has ever received and is of national significance. These war artifacts are part of the display 'In the Belly of the Dragon: Life and Death in I Corps'."

Carroll, Andrew, "Why They Pray," The *Wall Street Journal* 249:56 (March 9, 2007), p. W11.

[*Contains a print of the Swanson photo of worship on 28 Jan 1968, and includes the following in the accompanying article*]

...

"This presence becomes even more visible inj the life and death context of war, where all that is frivolous and superficial is shorn away to reveal what is truly meaningful and lasting. Lt. Ray Stubbe, a young Navy chaplain serving in Vietnam in 1967-68, often reflected on this theme in his correspondence with friends in Wisconsin. 'People benefit spiritually,' he wrote in one letter, when they 'face the loss of all the trivia of modern day society.' After describing a litany of nightmarish hardships that his Marines had to endure, he noted: 'You would be amazed at the faith expressed here. There are evidences of genuine and deep prayer life, of reading and knowing the Bible backwards and forwards, of sacrificial concern for others.'

"These two words, 'sacrificial concern,' represent the heart of the matter. Countless soldiers have demonstrated their faith by risking their lives for their comrades in arms. (Ray Stubbe himself often came close to dying when he flew by helicopter through hostile territory to minister at Marine bases in the remote mountains of Khe Sanh.)...

Peter Brush, "Re-counting the Casualties at Khe Sanh," *Vietnam*, Vol. 20, No. 1 (June, 2007).

[*Large but cropped Swanson photo of the 28 Jan 1968 worship service appears on p. 37. The article includes, on p. 34*]

"According to Ray Stubbe, a U.S. Navy chaplain during the siege and since then the most significant Khe Sanh historian, the 205 figure is taken only from the records of the 26th Marine Regiment. Stubbe examined the command chro9nologies of the 1st and 2nd battalions, 26th Marines, plus the after-action reports of the 3rd Battalion, 26th Marines; 1st Battalion, 9th Marines; 1st Battalion, 13th Marines; and more than one dozen other units, all present at Khe Sanh under 26th Marine operational control. These combined sources report a total of 354 KIA. Unlike the official figures, Stubbe's database of Khe Sanh casualties includes verifiable names and dates of death."

John Prados, "Khe Sanh: The Other Side of the Hill," Vietnam Veterans of America: *The Veteran* 27:4 (July/August, 2007) 23-26, 45. On p. 45:

"The author wishes to acknowledge the continuing efforts of Ray W. Stubbe and the Khe Sanh Veterans Association to document the history of their crucial battle, which included compiling most of the histories used here, as well as the work of Sedgwick Tourison, Robert DeStatte, and Merle Pribbenow, who did the English translations of the histories and documents I used. Most of these histories may be found at the U.S. Army Center of Military History."

Note on back cover of book: Robert J. Topmiller, *Red Clay on My Boots*, Minneapolis, Mn.: Kirk House Publishers, 2007. [Distributed in August, 2007].

[*Note on back cover*]

"Dr. Robert Topmiller, known as 'Doc' by those of us who served with him at Khe Sanh during the famous siege battle there in early 1968, has provided one of the most valuable contributions towards understanding what happened. Bringing the tools of a professional historian and his own personal experience to his book, he provides the reader with the reality of battle. His poignant insights and recounting of numerous incidents not otherwise in print are most helpful to those who want to touch the reality of what happened at Khe Sanh and learn. The book provides background for some of the events, and describes contemporary consequences of what transpired. For those who served, Topmiller provides insights that contribute towards healing: 'Doc' was, after all, a medical corpsman treating the wounds of warriors then, as he now does through this remarkable book."

"Vietnam, Khe Sanh Library Truly a 'Triumph of Faith'," Libraries of Vietnam, Laos and Cambodia, *Columns*, Vol. 2, No. 1 (Nov., 2007), pp. 1, 4.

.."The Khe Sanh library project has the support of Chaplain Ray Stubbe, who served as a U.S. Navy chaplain at Khe Sanh from July 1967 through most of the siege that ended in the spring of 1968. Chaplain Stubbe is the author of the books, 'Battalion of Kings,' a comprehensive account of all the military operations at Khe Sanh during the siege, and 'The Secret Official History of the North Vietnamese Army of the Siege at Khe Sanh, Vietnam, Spring 1968,' as well as the founder of the Khe Sanh Veterans Association.

" 'St. Gregory's admonition that "what is not assumed is not healed"—that is, what we do not confront and address cannot heal—has always touched me, and it embodies the real need for us to record and enshrine the sacrifices of those who fought in the name of faith in God and the triumphant fundamental goodness in man, even in the face of war,' he wrote.

" 'This is more than just a building housing books, computers and learning resources. It will be a monument to the true legacy of America, a legacy of hope and peace for all time to come between the peoples of Vietnam and America. Americans rebuilding to the wake of war and breaking the cycle of vengeance is nothing new—it is part of our heritage unparalleled in the recorded history of the nations of the world.'

"Chaplain Stubbe kept a meticulous diary during the siege. That diary has been optioned for a feature film, possibly starring Tom Hanks, who also will produce it.

"A photo of Chaplain Stubbe conducting a service during the siege hangs in the Vietnamese War Museum in Hanoi, along with a legend that he and the other men pictured were killed in the action. Chaplain Stubbe, along with three of the four Marines pictured, survived the war, and he has since devoted his life to helping veterans and chronicling the history of the battle.

" 'Transforming otherwise very negative experiences of the horrors of war into something life-enriching and blessing for a far-extending future brings a sense of the goodness that remains despite the ruins and shambles of lives, effects of war with which we are all too familiar,' he wrote."

[*Reprinted in Wisconsin State Council, Vietnam Veterans of America, The Badger Veteran, Vol. 16, No. 1 (Spring, 2008), p. 12.*]

Laura Ingraham, *Power to the People*, Washington, D.C.: Regnery Publishing, Inc., 2007, p. 312.

"In a letter written during the Vietnam War, Lieutenant Ray Stubbe, a young navy chaplain, noted that we tend to derive the greatest spiritual benefit when we 'face the loss of all the trivia of modern day society.' He chronicled the harsh experience of his Marines and then added: 'You would be amazed at the faith expressed here. There are evidences of genuine and deep prayer life, of reading and knowing the Bible backwards and forwards, of sacrificial concern for others.' Sacrificial concern—this is not a phrase we hear enough about today, outside of the great contributions of our military to the cause of freedom and security. Yet this is the animating spirit that made martyrs of the holy and compelled a great generation to face powerful foes in Europe and the Pacific. We must seek to cultivate a sense of sacrificial concern in the republic. This basic virtue will ensure the strength of America and her goodness."

[Announcement in brochure], "Vietnam: Life & Death at Khe Sanh," Wauwatosa School District Recreation Dept., *Fall 2008 Activity Guide*, p. 13.

"In 1968, Rev. Ray Stubbe was a chaplain in Vietnam, dodging rockets and sniper bullets during the siege of Khe Sanh. He will share his experiences, highlighting the reality of the battle, its effect on participants, their families and the local people, plus the lingering significance of that battle in veterans today. Course Number 05."

Renira Pachuta, "Khe Sanh remembered," Ozaukee County, Wisconsin, *News Graphic*, Vol. 126, No. 91 (Nov. 13, 2008), pp. A1 and B3.

[*Page A1: "Khe Sanh recalled," Swanson photo of 28 Jan 1958 and: "Vietnam changed the life of Ray Stubbe, who served as a chaplain during the Vietnam War."*

[*Page B3 also reproduces the Swanson photo along with a photo of working out on a heavy bag at the Duke Roufus Gym by Jack Orton appearing in the Milwaukee, Wi., Journal Sentinel, 30 Mar 2005, and contains article:*

"In 1967, when Ray Stubbe informed fellow students he was going to Vietnam to serve as a chaplain, he was in a PhD program at the University of Chicago, one of the top theological grad schools in the nation. The students' reaction was one of horror, remembers Stubbe, and their words are engraved in his memory to this day. They said, 'How can you go to Vietnam and be the church's endorsement of a corrupt Saigon regime?' to which he replied, 'I am going there to help people, not to make a political statement,.'

"What some of them may not have realized was that Stubbe had already served as an enlisted man. After graduating from high school in 1956, he'd spent two years on active duty on a Navy destroyer, before heading for college and then seminary.

"Vietnam seemed the next logical step in Stubbe's life's journey. The Navy was asking for chaplains, he recalls. 'Having been enlisted, I had a real feel for feelings that the young Marines would have, because I had been one of them. I knew of the separation, the helplessness, the bewilderment, the excitement.' The period, between the ages of 18 and 21, is a very tumultuous time in most people's lives, he points out. The human brain isn't even fully developed then.

"Stubbe spent the next eight months in Khe Sanh as a Navy chaplain with the 1st Battalion, 26th Marines, and his time there included the 77-day siege, from January to March 1968, often referred to as 'the deadliest and most intense battle of the Vietnam War, one of the most controversialk battles within a controversial war.'

"While in Khe Sanh, Stubbe did what chaplains of all faiths do—he led worship services and Bible study, counseled those with problems and grieved with them if there'd been a death in the family. 'It was a sharing of life,' he explains, thinking back almost 40 years. 'I looked on my duties as just living with the people, listening to their concerns and their problems, hearing of their hopes and dreams, showing my concern for them.'

"Sometimes when asked by the young soldiers where God was in all of this horror and destruction, Stubbe would remind them of the time they had shared their last drop of water or their last morsel of bread, how they had dashed out in the middle of explosions to rescue a fellow soldier, and how through all this they had maintained humor and concern for each other. 'This was evidence of life in the midst of death, bravery in the midst of fear. This indicated the presence of God,' he says.

"When he first arrived in Khe Sanh in July, 1967, conditions were not unpleasant. 'Life was even tranquil,' Stubbe recalls. 'I sometimes thought of it as the Garden of Eden—pristine and beautiful, cooler than the rest of Vietnam because of the higher elevation.' Of course, soldiers still had to go out on patrol at all times, and were not able to shower for six weeks in a row. There was no electricity, so when it got dark, everyone made do with a candle, if they were lucky enough to have one. But there were not many casualties to begin with, and the soldiers, mostly young kids, were basically happy.

"Two months later, the so-called 'honeymoon' was over. In September the monsoons came—dropping as many as seven inches of rain in one day, day after day, for three months on end with no let-up. 'You couldn't get dry,' says Stubbe, adding, 'I never felt colder in my life than I did over there in the rainy season.' Heavy cloud cover resulted in reconnaissance aircraft being unable to detect enemy troops, the airstrip was totally washed away and no supplies could be flown in. 'We were cut off from the rest of the world,' remembers Stubbe. 'We were very vulnerable and things were very uncertain. In addition, there were all sorts of rumors flying around, including one everyone had heard—psychic Jeanne Dixon had predicted 1200 would die in Khe Sanh.

"Living in a bunker he built himself, Stubbe spent the days during the siege hopping from bunker to bunker, trench to trench. Advised not to gather more than seven in a group because of the likelihood of enemy attacks, he got in the habit of conducting little seven-minute services, complete with scripture lesson, communion, blessing and a three-sentence sermon. He says, 'All of us were quite numb emotionally, and sometimes we would just hug one another. Yes, even hardened Marines would hug each other. I saw the human side of people there.'

"Stubbe, who served two tours in the I Corps region of Vietnam, is considered by many the foremost Khe Sanh historian. In addition to co-authoring several books on the siege, and numerous articles, he has been the subject of frequent television interviews and, in the early 1980s, about the time he was getting ready to retire out of the chaplain corps, he founded Khe Sanh Veterans, Inc.

" 'My grandmother died,' he explains. 'It was a traumatic time—the death of my career and a death in my family. I started remembering, and I began wondering who was still alive from my time in Khe Sanh.' Stubbe began calling around. From the dozen or so Marines he'd kept in touch with via Christmas cards, others emerged. The number grew rapidly to 300, then to 500, and now remains pretty constant at 3,000.

" 'The organization is basically to preserve the memory of Khe Sanh,' says Stubbe, adding, there's an annual reunion and the group puts out a magazine four times a year. one unintended positive that came out of this, he says, is that people have found lost buddies they thought were dead. And sometimes it is someone who can make statements in support of them to the Veterans Administration and verify their claims. 'It is so satisfying,' emphasizes Stubbe, 'not just for me but all the good people who were there and who now continue to support each other emotionally and with statements, with understanding and with their life. The whole is greater than the part, so they say.' "

2010

"Member of St. Matthew's honored for his service," St. Matthew's Evangelical Lutheran Church, *The Voice of St. Matthew's* 79:2 (Feb 7, 2010) p. 12. [Has photo of worship atop Crow's Nest, DaNang, and the Gill photo with cross and a note]: *"Cross tangible symbol of the presence of God; Enlisted men take comfort, gain strength through prayer in the battlefield. Pastor Ray Stubbe served as Chaplain to the Navy during the Vietnam War. Recently in preparation for the publication of a book as well as a Vietnam veterans celebration at Lambeau Field in Green Bay, Pastor Stubbe was asked to be photographed with an object from his time of service that held special meaning for him. The cross he holds was used several times during worship and prayer in Vietnam with the enlisted men he served. James Gill of Wisconsin Public Television took the photo. The photo on the right shows one of the times that Pastor Stubbe used the cross, Christmas Day of 1968 in DaNang, atop one of the Marble Mountains."*

Jim Stingl, "Vets appreciate belated thank you," Milwaukee, Wi., *Journal Sentinel* Wed., 17 Feb 2010, p. 3B:

"Two vets who appear in the 'Wisconsin Vietnam War Stories' documentary were at the Harley museum. Ray Stubbe, a chaplain who now lives in Wauwatosa, said there's unfinished business for many vietnam soldiers. Psychological wounds have festered over the years. 'We're older now and most of us have become more isolated. An event like this brings people together,' he said."

Mentioned in various places in a special issue of the Green Bay, Wisconsin, *Green Bay Press-Gazette* doe LZ Lambeau, May, 2010. Listed on p. 5 as one of those interviewed for Vietnam War Stories. Listed on p. 6 as leading an ecumenical worship service at 10AM, Saturday, May 23. Photo on p. 10.

Photo (taken by Gill, with cross) in St. Matthew's Evangelical Lutheran Church, *The Voice*, 79:6 (May 16, 2010), p. 17. Notes I will celebrate the 45th anniversary of my ordination with a sermon at three worship services on Sunday, June 6.

2012

"Pebbles in My Boots!" review article by Rev. Dr. Mark A. Jumper, in Military Chaplains Association United States of America: *The Military Chaplain* 84:4 (Winter, 2011) p. 16.

Dedication, in Prados, John, ed.: *In Country, Remembering the Vietnam War*, London: Ivan R. Dee, 2012, p. v.

Writing included in front of book by John Douglas Foster,. *Heroes From the Wall*, Bloomington, Indiana: Zlibris Corp., 2012, pp. 4-5:

"When the author John Douglas Foster was wounded while serving in Vietnam during Tet '68, he received more than a piece of metal in his body; haunting memories of comrades opened his soul in a quest to learn more about those who didn't return. Far more important than mere names on a monument are the lives of those who died. Memorials to those who die in war need to confront us with real, living persons, with dreams and plans, hobbies and interests, connections to others, who might say something or do something that lingers forever in our heart and soul.

"Foster's book provides an opportunity to grasp truly great individuals, not just numbers and statistics, not just names.

"For those who fight the battles, their fallen brothers and sisters forever live in them. This book helps ensure that they will never be forgotten by future generations who didn't know them on the battlefield. Their quirks of personality, playful antics, heroic actions, compassion and care for others, their caring and sharing with their comrades, tender concern for their family, affirmation of life while engulfed in places of death, and so much more, captivate our attention. Though dead, they vividly live.

"It is common for those who fight in war to say that they were never closer to another person than those with whom they fought, and that in combat they lived with the best men as a group they ever have known. We, too, are privileged to meet some of these through this book.

"We learn of their roots in places like the war-ravaged lands of Finland, the poverty of a large family in New York. We learn how they fell in love and married, just before going to war and dying. We hear of their premonitions of dying. We learn of heroism that contains great fears, like the greater sky shadowed with dark clouds. We read deeply moving and perceptive words by a Sergeant written of his Lieutenant. We learn of a grown woman who learns of a father killed in Vietnam–eventually verifying this through DNA and subsequently brought into a large caring family who related to her a father she never knew, his passion for music and making people laugh. We learn of a nurse, one of eight on the Vietnam Memorial Wall. We learn of a Chaplain whose love for Marines he served moved him to lay down his life for them. We learn of a POW's captivity and ordeal. We learn so much more, and the war becomes more than statistics, tactics, results of winning or losing, but becomes a tapestry woven with individual threads of its participants. We learn of the true cost of war and we learn of the true humanity hidden beneath all the mud, gore, hardness, and ugliness we confront in war.

"Mr. Foster's book not only gives us a monument of lives, he provides us with a legacy for future generations to grasp with a better understanding of the Vietnam War."–Rev. Ray W. Stubbe, US Navy Chaplain, Siege at Khe Sanh, 1968.

Picture and note in *The High Ground* (Winter, 2012, p. 10:

"September 8, 2012, LCDR Ray Stubbe received a surprise Meditation Stone from his fellow Vietnam Veterans. Ray Stubbe was a chaplain during the Vietnam War and continues to be a comfort to many friends, family and veterans. Thank you, LCDR Stubbe for your service and dedication."

Meg Jones, "30 years ago, 3 state Marines died in Beirut; terror era began." [Contains paragraph on p. 5A that reads:]

"Ray Stubbe was a Navy chaplain at naval Station Great lakes in northern Illinois when he drove to his hometown to preside over Gander's service at a Milwaukee funeral home. Not long after Gander died, Stubbe who served 19 months in Vietnam, began experiencing the effects of post-traumatic stress, which landed him in a VA hospital for six months.

"'It hit me emotionally,' Stubbe said of Gander's death."

"The 106 mm Bunker, The Khe Sanh Memories of Chaplain Ray Stubbe," in John Prados, "The Siege of Khe Sanh," *The American Legion Magazine* 175:3 (September, 2013) pp. 20-28. [My writing is on p. 26 with the Swanson photograph. The writing consists of diary entries for 07 and 23 February 1968)]

CORRECTIONS TO VOLUMES 1 AND 2 OF *PEBBLES*:

FORWARD

The present volume is he last in the *Pebbles in My Boots* collection, a series of various essays, presentations, poems, prayers, conversations, and other items which, like pebbles in one's boot, eyelash in an eye, sliver in a finger, seed in a tooth, demand attention. An effort has been made to preserve the history of our experience at Khe Sanh—how our experiences there touched our life emotionally and spiritually—as well as physically, through historical accounts, chronologies, listing of terms and vocabulary, biographical sketches, and other documentation. As the footnotes attest, this essay (like others in the Pebbles series) is based on extensive reference to archival sources not readily available today plus inputs from others who directly experienced Khe Sanh. Having served at Khe Sanh some seven months—before and during the siege battle (July '67 – March 68), most of these writings also reflect personal experience.

The first essay focuses on one infantry company's experience at Khe Sanh, B/1/26, culminating in the fated patrol of 25 February 1968, initially referred to as the "lost" patrol and then the "ghost" patrol. In order to understand why this patrol did what it did, an extensive background is provided, including earlier accounts of some of the individuals involved, an understanding of being lured into ambushes, and the larger picture.

This significant patrol has become the subject of a first class documentary film by Ken and Betty Rodgers; it is also the focus of a course for new Marine Corps officers at The Basic School, Quantico, Va. Additionally, a recent translation by Mr. Merle Pribbenow providing the Vietnamese account of that battle now enables a presentation of "both" sides. It seemed urgent to provide a detailed account of that patrol.

The next section presents resources for a biography of David E. Lownds. The siege battle of Khe Sanh was not the result of Generals Westmoreland and Giap, as portrayed in much subsequent writing, but of Colonel Lownds and LtGen Tran Quy Hai and their staffs, as this essay reveals.

Lastly, as with other volumes in the *Pebbles* series, there is a selection of miscellaneous letters, presentations, prayers, and documents—some from many years ago, but most from the past three years which are present-day echoes of Vietnam.

TWENTY-SIXTH MARINES (REINFORCED)
THIRD MARINE DIVISION (REINFORCED)

For service as set forth in the following

CITATION

For extraordinary heroism in action against North Vietnamese Army forces during the battle for Khe Sanh in the Republic of Vietnam from 20 January to 1 April 1968. Throughout this period, the 26th Marines (Reinforced) was assigned the mission of holding the vital Khe Sanh Combat Base and positions on Hills 881, 861-A, 558 and 950, which dominated strategic enemy approach routes into Northern I Corps. The 26th Marines was opposed by numerically superior forces—two North Vietnamese Army divisions, strongly reinforced with artillery, tank, anti-aircraft artillery and rocket units. The enemy, deployed to take advantage of short lines of communications, rugged mountainous terrain, jungle, and adverse weather conditions, was determined to destroy the Khe Sanh Combat Base in conjunction with large scale offensive operations in the two northern provinces of the Republic of Vietnam. The 26th Marines, occupying a small but critical area, was daily subjected to hundreds of rounds of intensive artillery, mortar and rocket fire. In addition, fierce ground attacks were conducted by the enemy in an effort to penetrate the friendly positions. Despite overwhelming odds, the 26th Marines remained resolute and determined, maintaining the integrity of its positions and inflicting heavy losses on the enemy. When monsoon weather greatly reduced air support and compounded the problems of aerial resupply, the men of the 26th Marines stood defiantly firm, sustained by their own professional esprit and high sense of duty. Through their indomitable will, staunch endurance, and resolute courage, the 26th Marines and supporting units held the Khe Sanh Combat Base. The actions of the 26th Marines contributed substantially to the failure of the Viet Cong and North Vietnamese Army winter/spring offensive. The enemy forces were denied the military and psychological victory they so desperately sought. By their gallant fighting spirit and their countless individual acts of heroism, the men of the 26th Marines (Reinforced) established a record of illustrious courage and determination in keeping with the highest traditions of the Marine Corps and the United States Naval Service. –

LYNDON B. JOHNSON

THE PATROL OF 25 FEB 1968 – BRAVO COMPANY, 1/26, AT KHE SANH

PROLOGUE

"The battlefield is a dirty and ugly place. All the most sophisticated instruments of destruction one can devise won't change the supreme demands of courage, sacrifice, professional skill and dedication which Marines of each and every generation have met on the fields of battle." – Colonel David E. Lownds[1]

"I don't think the kids were given enough praise. I don't think the general overall situation was properly covered. I don't believe that the American people were properly informed as to the reasons we were there and the job that we were doing and the tremendous ability that was shown by all the people there at Khe Sanh" – Captain Kenneth W. Pipes.[2]

The attached essay focuses on the patrol by Platoon B-3 of Bravo Company, First Battalion, Twenty-Sixth Marine Regiment on 25 February 1968 during the siege battle at Khe Sanh, Vietnam. In order to understand what happened on this patrol, the larger setting of it must be provided: what Bravo Company experienced at Khe Sanh prior to that incident, North Vietnamese strategy of luring in support troops so they could be killed, the prohibiting by Gen Tompkins of patrols beyond 500 meters of the perimeter, the experiences of the battle for Khe Sanh Ville and Lang Vei, for example. We are given details which helpfully explain much.

NOTE CONCERNING SOURCES INDICATED IN FOOTNOTES

The term "tape" refers to Oral History Tapes made by a team from HQMC, mainly interviewing participants in an operation or battle, usually on the battlefield itself or shortly thereafter. These were made for training Marines ordered to Vietnam duty. They were deposited in the Historical Division, HQMC, (later in the National Archives).

During the 1980s, all oral history tapes pertaining to Khe Sanh were transcribed by the author and a copy was deposited in the Oral History Section of the Historical Center of the US Marine Corps. All tape transcriptions as well as letters and transcriptions of conversations, copies of all official documents available from USMC, USN, USA, DOD, CIA, NSA, etc., indicated in the footnotes, are in the archives of the Wisconsin Veterans Museum, 30 W. Mifflin St, Madison, Wisconsin 53703.

Sets of microfilm reels of the approximately 120,000 pages of documents have also been sent to the following: Eisenhower Center, University of New Orleans; U.S. Army Military History Institute, Carlisle Barracks; Headquarters, PA, USAF Historical Research Center, Maxwell AFB; Marine Corps Research Center, J.C. Breckinridge Library, Quantico, VA; U.S. Army Command & General Staff College, Combined Arms Research Library, Ft. Leavenworth, KS; Naval War College, Newport, RI; Dept. of the Army, The Center of Military History, Washington, DC; and the State Historical Society of Wisconsin, Madison, WI.

Much of the description of places, incidents, and people, is based on personal experience while serving at Khe Sanh (July, 1967 – March, 1968, and subsequent weekly visits of a day or more at Khe Sanh in March and April, 1968).

A NOTE ON SOURCES

All documents noted in the footnotes are available in hard copy and microfilm at the archives of the Veterans Museum, 30 W. Mifflin St, Madison WI 53073. Microfilm copies of all documentation indicated (and Khe Sanh generally– over 120,000 pages of documents) have been deposited at: The Vietnam Archive of Texas Tech University, the Marine Corps Historical Center, the archives of the USAF and USN, and other libraries.

NOTE ON UNIT DESIGNATIONS

B/1/26 - refers to Company B of First Battalion, Twenty-Sixth Marine Regiment

B-3 - refers to Third Platoon of Company B

PART I: THE SETTING OF THE PATROL OF 25 FEB 1968

1. Prologue: Seven Months at Khe Sanh

Bravo Company of First Battalion, Twenty-Sixth Marine Regiment, arrived at Khe Sanh 1430H, 12 May 1967, as Battalion 1/26 relieved the Marines of 2/3, 3/3, and 3/9 involved in the Battle of the Hills (24 April 1967 – 09 May 1967, taking Hills 861, 881-South, and 881-North).[3] Echoes of the desperate and devastating Battle of the Hills continued to shroud the area; despite the almost Garden of Eden Paradise setting of beauty and primitive innocence reflected in the geography and the primitive Montagnard tribe that inhabited the area, the Brou, an uncanny awareness of impending violence lingered. Although we were unaware of it at the time, Khe Sanh sat atop an ancient volcano—the reason for the red laterite clay which afforded abundant nutrients for coffee growing–, and the tactical map indicated the airstrip as "Xom Cham" (or "village of Chams) indicating that the ancient pirates and warriors known as the Chams, active in the 7th Century in Quang Tri Province until they were defeated by the Vietnamese. There were incidents of tigers massacring the Brou. In general, there was a lurking awareness, a shadow side to all the majestic beauty of Khe Sanh that made one sense that at any moment all hell would break loose.

07 June 1967

[3] Results of the Battle of the Hills: 168 friendly KIA, 436 WIA. NVA losses were 824 KIA (C) and another 549 KIA (P), 5 POWs and 1 rallier. [3rd Mar, AAR, KHE SANH]. Artillery fired over 24,000 rounds in support of the operation. Total ordnance dropped in direct support was over 3,000,000 pounds of explosives, not including TPQ-10 or Arc Light missions. (Totals: 611,500 pounds napalm, 3,218,500 pounds of explosives, 1230 250-pound bombs, 3318 500-pound bombs, 380 750-pound bombs, 247 1,000-pound bombs, 387 2,000-pound bombs, and 1170 air SOTRIEs [*Ibid.*, pp. 3, 5]

Significant numbers of NVA remained in the Khe Sanh area following the Battle of the Hills.[4] Bravo Company, 1/26, had just relieved Alpha Company, 1/26, defending Hill 881S, when they departed on 07 June 1967 on a two-platoon size patrol to the same location (XD759444) where 2/Lt John M. Kaheny's 3rd Platoon of A/1/26 had made contact on 21 May and lost two 19 year-old Marines.[5] B Co was to become engaged in a 4-hour battle about 2,000 meters west-northwest of Hill 881-S (at XD 759443) with an estimated two companies of NVA at 1320 resulting in 18 USMC KIA, 16 USMC WIA, and 66 NVA KIA.[6]

All patrols had been using the same route, over a land bridge.[7] During the preceding night, leaders of the patrol expressed their apprehensions. 2/Lt Guy Pete "..told everyone they were going to get hit."[8] The first fire team leader, 1st Squad, 1st Platoon, Gene Weresow, along with Cpl Crooks, told their Lieutenant "..we didn't like the path of this patrol as we ran this same ground several days in a row. We had misgivings about this and the Lieutenant told us these are the orders and we go... I was always of the opinion that someone knew they were waiting for us and let us walk right into that ambush. Wanted to see some action."[9] Lt John Kaheny, "I always suspected that the higher-ups knew that there were large numbers of NVA hanging around just outside 105mm range (11,000 meters) from KSCB and that we were sent out to bait them into range."[10] "Nobody would pay attention to what we were telling them."[11]

At 1105H, the patrol received approximately 15-20 rounds of automatic rifle fire from Hill 881-North (XD775456) during a helicopter landing. The Marines responded with 81mm mortars and 106mm recoilless rifle fire, silencing the enemy—then.[12] A few hours later (at 1320H) the patrol, now at XD760445 (just west and a little north of Hill 881-South) went on line, in a 180 formation as their LOD (Line of Departure) and, as an assault squad moved through this LOD,[13] all received 20-30 rounds of incoming fire followed by an assault from their west by approximately 30-40 NVA,[14] from XD756443.[15] The NVA had the position zeroed-in: "In 10 or 15 seconds the majority of the patrol was decimated. Bravo Company almost did not exist after that. Guys were killed pretty quickly because they mortared us. We were in soft covers. It happened so fast; everybody was killed or wounded within a matter of ten seconds."[16] The Company Commander of B/1/26 Capt James P. B. Connell, Jr., seeing the company was greatly outnumbered and were taking heavy casualties, rallied and led the headquarters section to a relatively safe position in a nearby crater on the reverse slope.[17] In the initial burst of enemy mortars, a machinegun crew in front of the company CP was hit and LCPL Edward C. McFadden, a company radio operator, removed his radio and moved under the NVA fire to the machinegun position where he opened up fire on the assaulting NVA, only 10 meters from his position, stopping their advance and undoubtedly saving many Marine lives.[18]

The enemy mortars were only a prelude to an assault by an estimated force of two companies of NVA soldiers, fighting from bunkered positions.

As the enemy force attempted to overrun the CP group with an assault by grenades, Capt Connell calmly remained in an exposed position in order to call in helicopter gunships and artillery missions on the enemy force.[19]

Denny Bowers, a radioman in Lt McDonald's platoon, suddenly found himself alone. All those in front of him as well as those behind him had been killed, and in this precarious position, his M-16 jammed! John Joseph Chase grabbed a rifle and ran across the fire-swept area to give it to Bowers only to be killed in a burst of automatic rifle fire. Miraculously, Bowers escaped this skirmish with only a second Purple Heart.[20] The Marines had walked into a carefully prepared NVA ambush.[21]

[20] Conversation with Denny Bowers, 01 January 1987.

The mortars streaked right over the top of Tom Steinhardt's fire team which didn't get hit. "We sprayed that area and then we started fighting our way up to the top of that ridge. By the time I got up there I was the only one left in the fire-team. Dutch took an AK [round] through the throat."[22] "Everything happened in slow motion,. I've never been in combat but it wasn't in slow motion."[23]

Most of Eugene Weresow's squad was KIA; there were 2 WIA.. They were on the left flank as the mortars and small arms fire rained upon them. "Most of the platoon fell back to the right side and I was stuck on the left side of the knoll with a wounded Marine and NVA running all over the place."[24]

The Marine patrol returned fire and moved to the reverse slope as artillery, 81mm mortars, and gunships struck the NVA.[25] LCPL Kenneth Ray Keefer, a 3.5" gunner, ran to 2/Lt Dennis E. McDonald asking for targets, and moved through the fire to the right of Staff Sergeant Robert Otis Ward of the Second Platoon. (SSGT Ward had led a squad into a forward position from which he could return fire and throw grenades on the advancing enemy and provide covering fire to protect the CP of the patrol). Along with three other Marines, SSGT Ward held this forward position, dodging grenades thrown from less than 20 meters along with small arms fire. During later evacuation of casualties, LCPL Keefer, was mortally wounded while returning to assist other wounded.[26]

LCPL Phillip Brian McGuire was acting radio operator for SSGT Ward when he saw two Marines hit and go down in an area dangerously exposed to the enemy fire. LCPL McGuire maneuvered across the fire-swept terrain to assist the two wounded Marines and move them to a place of relative safety.

He remained with them and, while delivering a heavy volume of covering fire, killed three enemy soldiers. When a corpsman arrived to administer first aid, he began to move to his original position, but after proceeding only a short distance learned that SSGT Ward was nearly depleted of ammunition and fearlessly returned to the two wounded Marines to obtain their hand grenades and ammunition. While carrying them to his platoon sergeant, he killed another enemy soldier, and then resumed his duties as radio operator.[27]

Meanwhile, two other squads wee also assaulting the enemy position.

Sgt Raymond Couture repeatedly assaulted enemy positions and continued to do so although painfully wounded in his face, forcing the enemy to flee positions from which they had been delivering small arms fire and throwing grenades upon the platoon.[28]

Sgt Peter Ronald Chapin, after first immediately directing his squad to cover in bomb craters during the initial mortar attack, enabling them to escape injuries, then ordered his squad to assault back up the hill, the crest of which was occupied by the North Vietnamese. During the course of the assault, Sgt Chapin repeatedly exposed himself to enemy fire so that all the men in his squad could see and hear him. He moved his squad up the hill 10 meters at a time until they were within hand grenade range. He and the squad then exchanged grenades with the enemy for about four minutes until the squad gained fire superiority.[29]

HN Gregory Paul Vercruysse, a newly-arrived Corpsman, replacement for Al Winney had arrived as the patrol was departing and begged to accompany it. Winney said, "No, stick around and meet the guys and I'll take this patrol." He replied, "No, I'm here; I want to get my feet wet, let me go." Winney spoke with the Lieutenant who said, "Hey, he's right, let him go." Vercruysse was the first casualty Winney located. "He was trying to get a cigarette wrapper and go ahead and tape

---

[21] John Kaheny recalls a visit by Col Padley (CO, 26th Marines) and LtCol Newton (CO, 1/26) to Hill 881-South just after this incident, saying the action resulted from a chance encounter between patrols. Lieutenant Guy Pete spoke up and said, "Don't you remember two weeks ago [May 21st when we took two KIA] when Alpha-3 almost got cut off just past where Bravo got ambushed. They were waiting for us today." Kaheny recalls, "Soon after that Guy was transferred to recon!" [email from John Kaheny, Khe Sanh Message Board, June 2002, posted 11 June 2002]. Guy Pete: "It was not a chance contact; it was an ambush." [email from Guy Pete, Khe Sanh Message Board, June 2002, posted 13 June 2002].

[22] Comments by Tom Steinhardt at Khe Sanh reunion, 20 July 1990; Conversation with Tom Steinhardt, 7 October 1990. He could not further identify "Dutch," except to note that he had about 20-30 days left to do in his Vietnam tour of duty and was the fire-team leader. "They took him out to the hospital ship, but he didn't make it. He died of wounds was the word I got."

[23] Comments of Mr. Denny Bowers to the author, 01Jan87.

[24] Letter from Eugene Weresow, 19 December 1996.

[25] INTSUM #26, cited.

[26] Statement of 2/Lt Dennis E. McDonald in SSM file of LCPL Kenneth Ray Keefer. The 4th Endorsement on the recommendation by Commander in Chief, U.S. Pacific Fleet, recommended the Bronze Star Medal with "V" instead of the Silver Star Medal. [FF1-1, 1650, Ser 102/5845, 22 Sep 1967].

[27] BSM file on LCPL Phillip Brian McGuire.

[28] BSM file on Sgt Raymond Donat Couture.

[29] BSM file on Sgt Peter Ronald Chapin.

up his own sucking chest wound when I got to him. Harvey [DeMaagd, the 1/26 Battalion Surgeon] opened his chest and apparently cut one of his major vessels and he ensanguanated and died. He did everything he could—with a flashlight and a number Ten blade, what more can you do?"[30]

Corpsman Winney's best friend, LCPL Robert Francis Enderby, was also KIA this day. "We had plans of spending time together after we got home. He really wanted to see the Adirondack Mountains of upstate New York, my home, some friends, and do some fishing. Bob was our 60mm mortar man, and he was killed by a NVA mortar. I had just left him and he was covering my butt while I tried to get to 2 wounded Marines on our left flank. Someone started yelling 'Corpsman' behind me. I went to them and found a mortally wounded Marine with much of his face gone. I cut a tracheotomy and attempted to resuscitate him when I read his dog tags and realized it was Bob. Over the months with Bob in combat it seemed whenever we had wounded that Bob was always assisting me in carrying them to a medevac chopper. That afternoon I carried Bob by myself with eyes free of tears and a heart full of hate and remorse."[31]

CPL Edward Francis Furlong had joined the 26th Marines as it formed at Camp Pendleton, assigned then to I/3/26. Another Marine in the same company, Gregg Reed, couldn't stand him: "We're both from Irish Catholic families. He was a typical New Yorker. The next thing I know we're best buddies. The day I was transferred, I'll never forget: he gave me a religious medal. And I remember when I spoke to his mother I said, 'Mrs. Furlong, would you like me to send that to you?' And she: 'Absolutely not. He gave that to you.'"[32]

Lt Guy Pete, watching the entire action from Hill 881-South, went to the 105mm howitzer crew on the western finger of Hill 881-South to ask if they could shoot direct fire. He had them load Willy Peter rounds to identify where the rounds hit and fired until the Company Commander, Capt Connell, called cease fire: the rounds, he thought, were too close.[33] Eugene Weresow, however, credits this fire with saving their hide: "You are right they were close. I was on the left flank all alone at that point and those suckers went right over my head. The NVA got spooked and took off. Otherwise my name may be on that list."[34]

In addition to the artillery, A-1 Skyraiders dropped two 2,000-pound bombs on masses of the NVA. "The bombs looked bigger than the plane; I'd never seen a bomb that big. I don't see how they got in the air!"[35]

2/Lt John Kaheny had been searching with his platoon the area where Ibanez was lost[36] when he got the word to return to KSCB immediately due to the Hill 950 situation. "We were at the airstrip and all of a sudden everything changed." They received word of Bravo Company's contact. "My Company Commander and Company Gunny, Norm Centers and Gunny Parrish, got on a helicopter and went out to 881-South and picked up Guy Pete's Platoon. Guy Pete was there [on Hill 881-South] because Centers took what was left of his platoon to run the medevacs and air strikes. 2/Lt Doug Sykes, the B/1/26 XO was also there, unable to communicate with the patrol due to dead radiomen. John Kaheny, upon arriving with his platoon said, "We got to do something. I got a platoon. I'm going out." "So we took off and went out as the NVA were still making their hat down the slopes of the hills."[37] A-3 departed 881-South, led by John Kaheny, at 1415H.[38]

Upon linking up, a HLZ was established and casualties medevaced as ALFA-6 (1/Lt Norman Centers) directed fixed wing; the NVA broke contact and withdrew to the west at 1640H. ALFA-6 (CO, A1/26) directed gunships and fixed wing (2 F-8 Crusaders and 2 A-4 Skyhawks) on the enemy force as it attempted to set up mortars. 7 H-34 helicopters in flights of two then completed the evacuation of casualties.[39] John Kaheny moved B-3 under fire to Hill 821 (XD763443) to cover return of the patrol.[40] Casualties: 18 KIA, 16 WIA.[41] NVA strength was estimated to include a company at XD756439 and another

company to the north of Hill 821 (XD760445).[42] Although still exposed in .50 caliber machinegun fire, Capt Connell assisted in the medical evacuation of the casualties. With the company gunnery Sergeant seriously wounded and unable to perform his duties, SSGT Ward supervised the evacuation while exposed to heavy automatic weapons fire in the LZ. LCPL Keefer had assisted one Marine aboard the medevac chopper and was returning to assist another waiting wounded when he was killed by the enemy fire coming into the medevac LZ.[43]

At about 1500H, three 34s were diverted on an emergency medevac to evacuate 27 wounded and 18 KIAs from Hill 800, XD 760442, so the Marines could return to Hill 881S located 1500 meters southeast of the zone. All three aircraft made three trips into the Landing Zone.[44]

Upon return, the Marines were greeted by visiting Generals. One, in starched utilities came up and said, "I understand you really did a fine job out there, Marine." PFC Tom Steinhardt, not realizing it was a Brigadier General, said, "If you really think so, why don't you tell it to the dead!"[45] He notes that they were going to put him in for a Silver Star Medal; he said, "Yeah, big deal! What about the dead Marines and the wounded Marines?" "I was pretty upset."[46] Eugene Weresow recalls a LtGen who said, "Good show, Marine." "At that point I was so disgusted all I could say was something like 'yeah, sure!'... The next morning I was sent down to KSCB to identify the bodies of most of first squad. I remember praying for them, but did not expect what I saw. Some had half a head missing. Others had limbs blown off. God, what a bad scene!"[47]

LINGERING DEATH

Marines on Hill 881-South, digging bunkers or deeper trenches during the following months, occasionally unearthed a M-16, AK-47, a human skull, or simply and suddenly were engulfed in a belch from the earth of odor of decayed human bodies. SFC James Perry, the Medic of MACV Advisory Team #4 in Khe Sanh village, noted, "They found later that they [the NVA] had a hospital and mess-hall and some other things under both those mountains, and the blasting just caved-in the roof. Most were buried hundreds inside. They estimated that as high as three or four thousand might have been in that complex network of tunnels inside those mountains."[48]

On Wednesday, 02 August 1967, Captain John Raymond, the CO of A/1/26 on Hill 881-South at the time, mentioned a visit by Major General Louis Metzger, CG of Third Marine Division a few days earlier, in which he discovered several human skulls the Marines had put on stakes which they had dug-up while digging bunkers and trenches. "The General looked at Colonel Padley; Padley looked at Wilkinson, Wilkinson looked at me. There was no place for me to look but up in the air. I think I lost some points there."[49]

THE BIG GUNS THAT DIDN'T ARRIVE

On Friday, 21 July 1967, a convoy of the large 175mm guns together with trucks filled with ammunition, C-4 explosives, claymore mines, and other ordnance, was moving west on Route 9 towards Khe Sanh Combat Base.[50]

First Platoon of B/1/26 (B-1) was patrolling eastward on either side of Route 9 when at 1035H the point squad made contact with an estimated NVA platoon supported by a heavy weapons platoon. The Marines received an estimated 45 rounds of 82mm mortar fire and 5 rounds of 57mm recoilless rifle fire together with small arms and semi-automatic fire.[51] The Marines of B-1 had prematurely sprung a NVA ambush that had been laid from XD 943423 to XD 967432 along Route 9,

[50] Comments of LtCol James B. Wilkinson at 1/26 Staff Briefing, 22Jul67, in author's diary. Perhaps the 175s were being pre-positioned before the start of the monsoon season as part of the EL PASO operation. EL PASO was a plan to launch from Khe Sanh along Route 9 into Laos to sever the Ho Chi Minh Trail. (There is a discussion of EL PASO in John M. Collins, *Military Geography for Professionals and the Public*, Washington, D.C.: National Defense University Press, 1998, Chapter 12, "Operation Plan EL PASO," pp. 367-385. EL PASO was shelved due to the approach of NVA units in December, 1967, to prepare to lay siege to Khe Sanh. A later operation, LAMSOM 719, was launched from Khe Sanh in early 1971.].
[51] 26MAR 211215Z/Jul67, ON ARDMORE SITREP #19.

consisting of 2000 meters of anti-personnel mines, 82mm mortars, .50 caliber machineguns, and NVA claymore-type mines. Meanwhile, the 175mm guns had made it as far as Ca Lu; when the contact began, they promptly returned to Camp Carroll.[52]

The initial burst of enemy small arms, machineguns, and rockets had caused several casualties in the point squad of B-1, led by Cpl Terry G. Henderson. With calm efficiency, led his squad until they gained fire superiority, threw grenades at suspected enemy positions, called in artillery support, all while keeping control of his men. When two of his men were pinned down, he doubled back and around towards the enemy gun position and led the men to a safer area.[53]

LCPL Charles Richardson, grenadier for the First Squad moving as point, found himself pinned down. When his 40mm grenade ammunition was nearly depleted and an enemy machinegun position continued to pour our devastating fire, he quickly gathered several fragmentation grenades from companions and maneuvered to within grenade range of the machinegun emplacement. With complete disregard for his own safety, he exposed himself to the intense enemy fire and threw grenades at the enemy position; however it withstood his relentless attack.

When this failed, LCPL Richardson, while under intense automatic weapons fire and with a large number of enemy grenades falling around him, moved in an uncovered and unprotected position where he fired a Light Antitank Assault Weapon ["LAW"] into the position, destroying it.[54]

By 1125H, B-1 reported the heaviest enemy fire was coming from Hill 247 (XD 951432). At 1225H, B-1 sighted approximately 15 NVA soldiers crossing the river at XD 947425. Friendly casualties included three Marines killed: PFC W. A. Pollard, PFC R. E. Wilson, and SGT J. Castillo, and six wounded. Meanwhile, the Battalion Commander and Company B(-) began moving to establish contact with B-1 at XD 940426. Contact was established at 1505H and B/1/26 commenced a sweep towards the last known enemy position (XD 948428).[55]

The 81s section—Sgt Jose Castillo, Gilbert Wall, and his radioman, Bruce Jones—accompanied Lt Ben Long's platoon. (Gilbert Wall was wounded in this action, evacuated for two months, and then returned to Khe Sanh in time for the 25 Feb 68 Jacques patrol)

> Joe Castillo was the Sergeant, who had extended his tour. He was the 81s Forward Observer, and he was teaching Gilbert how to be a Forward Observer. Castillo—he's from Fresno, California, and he had already been done with his first tour and he had extended and he had just come off of leave. In fact, we picked him up not more than 3, 4 days after he had come back from his extended leave.
>
> We were walking down the road. We had a couple people out [as] flank along the river and I think very few flankers on the high ground coming off that road on Route 9. That was very rough terrain. Long finally did call in his flankers.
>
> We were in the middle by Weapons Platoon. And Lt Long and his CP group was ahead of us, and then Joe and myself, and Gilbert were the 81s Forward Observer team. We were supporting arms for them, and then behind us was Weapons, because I know 60s came up, the M60s came up. And I remember seeing them drop rounds and then finally a guy got up there with a tube and he didn't even use his tripod; he just dropped is base and started dropping rounds, and was shooting towards the bridge. And somebody was yelling back to him which way to adjust.
>
> We had fired a spotter round, a WILLY PETER, and we had gone up to find out where the round went because we couldn't see it on the bend of the road. And when we came around the bend in the road, they shot all three of us.
>
> Joe was shot twice in the chest and he died immediately. We were crouched along some rocks. And Gilbert was shot through the top of the shoulder. It went through his shoulder, then hit his left lung. It collapsed his left lung, and went out the side. They took him out of country, and he went to Japan for two months.
>
> I got shot through the throat. Gilbert and I talked about it. We think it might have been a RPG round; it might have been a rifle grenade. It wasn't a rocket or anything because it was too quiet.
>
> We got hit, the entire right side of us, with shrapnel, and I got right shoulder, right face, neck, and I was blind in both eyes when they pulled me out of the field. And they took me into Charlie Med there."[56]

As a result of the Co B patrol contact of 211030H, a battalion minus operation, consisting of the Battalion Command Group and Companies B/1/26 and C(-)/1/26, along Route 9 from XD 9140 to XD 9143 to XD 9440 to XD 9443, was conducted 21 – 29 July 1967.[57] A Company-size position was established at the "bridge site" manned by C/1/26.

[56] Comments of Bruce Jones to the author, 25Feb89; Comments of Gilbert Wall to the author, 13May89.

The NVA at the ambush site had no identification; there were no letters or photographs. The enemy force had completed construction of 25 bunkers and were in the process of constructing 75 more.. There were five rucksacks of new equipment, including extended rations. The Commanding Officer of 1/26, LtCol James B. Wilkinson, briefing his staff on 22 July 1967, made the evaluation that the enemy were not there to capture the 175s; they probably were unaware they were coming. Rather, they were preparing positions so that during the monsoon they could sever the road as a supply route, at which time they might begin moving three battalions against 881, 861, or try to take the combat base itself, or conduct small, commando-type terror attacks with satchel charges. He noted that much 782-type gear, rifles, and ammunition, had been hastily abandoned because of SPOOKY[58], and then concluded his briefing, "Now, let's see all of the men in church tomorrow!"[59]

During Friday, 21 July 1967, as I walked through the trenches on the combat base, many of the Marines mentioned Jeanne Dixon's prophecy of 1200 deaths here at Khe Sanh and were asking me about her. All I knew was that she was popular back "in the world" for having predicted Kennedy's assassination and several other events before they occurred.[60]

An indication of unreality happened at 2300 on Wednesday, 26 July 1967 when ALFA Relay on top of Hill 950 took a direct hit from our own artillery causing a bunker to collapse and two non-serious wounded Marines. The Marines had called arty to fire on the north slope of the hill, but the arty on the combat base is oriented only to strike the south slope, and the hill was higher than indicated in the tactical maps. The map indicates it as 950, but the hill is actually 963.29 meters high, determined by a later survey by the 2nd Topographic Company.[61]

TARZAN

When I visited Hill 861, "D" Co had departed; "B" Co. now mans the position. Worship at 1415 was attended by forty. Lance Corporal Stephen Wiese of 1st Platoon asked for a pocket Bible. A very large bug landed on the back of my neck which I brushed off. Suddenly there was a burning sensation on my neck accompanied by an odor like varnish or turpentine. A "ring of steel" was fired by the 105mm artillery battery on the combat base on the perimeter of the outpost as a "final protective fire" in the event the enemy attempts to assault the hill. Shrapnel was flying all over; one of the Marines said that there's always the possibility of a short round that might explode in the position.[62]

On another visit (Thursday, 24 August 1967), several of the men asked me about creation *versus* evolution or the difference between Roman Catholics and Protestants. I think they are trying to trap or test me or don't know what to talk about with a Chaplain. While I always answer their questions, I also indicate that religion is really not a matter of argument or discussion, but of how one lives.

Resupply of food from the base included loaves of freshly baked bread. One Marine, Cpl Ken Claire, the one who screams "Tarzan" yells, walked off with a loaf savagely chewing off a hunk with his teeth. He was thoroughly enjoying himself. He is so very human. Although he never attends my worship services, I always look him up when visiting B Co.

I held worship services near "the old rugged cross," erected by a 1/26 company in memory of the Marines who died here during the Battle of the Hills which started on this very hill. There were 25 in attendance. One platoon of the company is patrolling the area until noon tomorrow. B-2 returned around noon, completely drenched—either from sweat or rain. One Marine told me that most of the men have only one set of utilities. They are worn during the day and the men sleep in them at night. They are worn until they literally rot off. They hardly ever get dry during the monsoon season. The men joke about it. Morale couldn't be higher despite such adverse conditions.

2. "You will be in our American History Books"

Hazy, rainy, cold, damp, gusts of wind and generally harsh weather conditions blanketed the most remote American position in South Vietnam, Hill 881-South at Khe Sanh, Vietnam, on 10 November 1967. It was also the 192nd anniversary of the Marine Corps. At 0900, sounds of a helicopter could be heard circling the hill several times, apparently seeking an opening in the cloud cover to land. Eventually, the pilot's balls directed the chopper through the soup, and it parked on the LZ,

something I've never seen choppers do here in the past several months. The base commander, Col David E. Lownds emerged along with LtCol James B. Wilkinson, CO of 1/26, and the Major who was CO of our artillery, 1/13[63].

B-3, Third Platoon, led by 2/Lt Donald Jacques, was patrolling the nearby area[64] on the daily patrol in this miserable weather which made miserable conditions for the Marines—muddy slopes made slick by man-high elephant grass, leeches that tended to attach to any bare skin of arms (and occasionally find their way to crawl up a penis), a shrouding density of vegetation making detection of any lurking enemy almost impossible to detect with the consequent apprehension that all hell could break loose as fast as flicking a light switch, rotting clothes in which each Marine lived and slept, torn from bristling thorns and falls while patrolling, and no opportunity to clean up or take a shower for six weeks at a time–created an almost animal-like living condition.

The remainder of B/1/26, the cannoncockers of the 105s from C/1/13, the visiting Chaplain, and others formed a U-shaped formation and stood at attention. The Company Gunny presented the Captain; Chaplain Stubbe said a prayer focusing on self-giving service of those who have gone before us; the words of LeJeune and the Commandant's message were read. The latter included: "Although fighting his country's battles is a Marine's profession, it is not his preoccupation. It is not for him to make war, but to keep the peace." LtCol Wilkinson then made a few remarks, noting that this position had deep significance for the NVA who will probably attempt to take it over in the near future, but we will stand firm.

Colonel Lownds then broke up the formation into an informal group, and in his normal, dry humor noted that he and a man he served with in World War II had always celebrated Marine Corps Birthday together, but he doubted that this man would be with him at Khe Sanh today. He then said, "You will all be remembered in our American history books."

Although we had heard warnings of imminent NVA attacks at Khe Sanh during the five months I had already been at Khe Sanh—the national elections, the coming monsoons, increased discoveries of enemy presence in the Khe Sanh area, reports from agent nets of JTAD[65] and other intelligence including "people sniffers" that patrolled the area.[66] An APD mission flown on 30 October 1967, made well over a hundred detections; the S-2's acetate overlay of the 1:50,000 tactical map of our TAOR used in the evening regiment briefing was so covered with red dots it appeared as though the map had a loathsome disease.

One day earlier, 09 November 1967, I was warmly greeted by Captain Bruce Greene, the new CO of B/1/26, and had a turkey loaf C-ration with cocoa in a newly-erected supply tent just north of the LZ. Several flights of CH-53 helicopters—the big ones—were removing the 105 howitzers on this hill and bringing in two new 105s, shaking the tent and blowing over a shitter into the trench, spreading its contents all over the place. "The shit hit the fan!"

As this continued, I began walking the position and noticed a new hooch, small and with an odd roof near the LZ, and peered inside. A Marine holding a manual which had spots like bars of music over the pages, sitting beside a large metal box with compass degrees on top and a revolving, diamond-shaped antenna was shouting, but the noise of the choppers made it impossible to hear what he was saying. He was visibly shocked that I was there. Eventually, I heard him warn that the tent was a restricted area, that I couldn't be there. He was part of a detachment from the First Radio Company of III MAF in DaNang.

I later learned that this group of Marines had arrived at Khe Sanh to monitor NVA radio transmissions. They are able to determine the location of enemy units and through a "pattern analysis," to determine headquarters and the chain of command by who contacts who how many times.

Continuing around the hill position, I learned that the sentry dogs which accompanied patrols from 881S departed around 31 October. I was told the patrols were too arduous for them.

I then returned to the LZ—the bald top of the hill—which, by the way, is not the red clay of the combat base but is a yellowish-tan shade—a Huey was arriving with several "Code fours and code fives and code sixes" (or something like that). It

[65] Joint Technical Advisory Detachment. (For detailed discussion of the JTAD at Khe Sanh, see Stubbe: *Pebbles in My Boots*, Vol. 2, 01 Oct 2011, pp. 11-16).

[66] Slang for the Airborne Personnel Detector (APD) an EM-2 modified E-63 [described with photographs in LtGen John H. Hay, *Tactical and Materiel Innovations*, Wash, D.C.: Dept. of the Army, 1974, pp. 80-81][, the APD was first used in the Khe Sanh area during October, 1967. The device was mounted in a UH-1E and detected the presence of human beings through an ammonia sensor. The aircraft flies at approx. 50 ft. AGL and the APD gathers and registers the air samples. It is "..effective in locating enemy harbor sites and determining infiltration routes that could not be otherwise observed because of the heavy canopy." [26MAR ComdC Oct67, Encl (1), p. 7] It registered the "odor of strangeness." It could also register packs of frolicking monkeys moving through the jungle, and therefore had to be compared with other intelligence sources.

amounted to four Generals, including General Starbird,[67] an elderly-looking gent, the General in charge of I Corps, and some others I didn't recognize. They walked with Captain Greene to the northern side of the LZ (the wall of dirt-filled wooden ammo boxes) and faced north towards 881-N, pointing north several times. I am sure with the radio unit, the increased activity in our area—including deaths of our recon Marines patrolling close to our base, and now four Generals, that something must be brewing.[68]

How did Colonel Lownds know of the approaching enemy?

3. The Approach of Deimos: Menacing Moon of Mars[69]

The North Vietnamese Army[70] had not been inactive during what had been assumed to be a relatively peaceful time. Following the Battle of the Hills in April-May, 1967, it is likely that one regiment remained in the Khe Sanh area to maintain various fortifications in useable condition—foxholes, entrenchments, bunkers, weapons emplacements, and large strong points. These were not only maintained; they were developed in depth.[71]

> From about mid-July 1967 to 1 January 1968, numerous sightings by air and ground forces tend to confirm information received from other sources that at least one enemy battalion is operating Southwest of Hill 881S. It appears that the enemy is taking pains to avoid contact unless entry is made against infiltration routes or base camp areas. Increasing numbers of bunkers, fighting holes, and trenches give credence to the belief that the enemy is currently marking time in this area and preparing for future large scale operations. Hill 557 (XD 768414) has long been considered a meeting point for the infiltration routes through the areas. The area around Hill 557 contains numerous transient type harbor sites ... Khe Sanh Combat Base can expect harassing attacks by mortars and/or rockets at any time. This is particularly valid in that the 8th battalion of the 29th Regiment appears to have moved back into that area.[72]

The NVA spent long months to prepare the battlefield. "The enemy first prepares the battlefield: He's very meticulous in this. He spends a lot of time moving up his supplies and burying them, or hiding them. And then he moves the troops in."[73] That this was being accomplished at Khe Sanh was evident from roadrunner reports. These involved indigenous personnel who were dressed and armed as NVA "guides" at the various supply points who directed NVA troops and porters where to go. Working for us, they were in a unique position to determine the extent of infiltration as well as substitute small arms munitions and mortar rounds that were specially made to explode upon firing, thus causing distrust of the supply system by the NVA trooper, and therefore help disrupt the NVA supply train] and aerial photography which noted increased truck traffic bringing in supplies to this area after the first of November, 1967.[74] The CIA concluded: "Communist forces probably began stockpiling of weapons, ammunition, and equipment possibly by mid-November or earlier."[75]

---

[67] General Starbird was head of the DCPG, Defense Communications Planning Group, a CIA-funded component f the Department of Defense formed to develop electronic sensors as part of the "McNamara Line." Col. Franklin N. Pippin (Chief, Evaluation Branch, J-3, MACV) reported in his Top Secret Debrief at FMFPAC: "They have nothing to do with defense communications .. That's just a name. It was Joint Task Force 768 under General Starbird [USMC Tape #2907]. For additional information on sensors, see: van Saaveren, Jacob, *History of Task Force Alfa, 1 October 1967 – 30 April 1968*, USAF, 1969; U.S. Senate: *Hearings* .. 1971, cited; Comments of LtCol Edward J. A. Castagna, Tape #2770; Shore, Moyers, *Battle for Khe Sanh*, original manuscript p. 86; Debrief of Col Kenneth J. Houghton, Tape #2528; and "This SCAMP Plays Havoc with the Enemy Scamps," *Pacific Stars *& Stripes*, Fri, 14 Sep 1973, p. 7.

[75] *Ibid.*, p. 8

There were other indications. During the fall of 1967, an increasing number of documents and reports obtained by allied intelligence in the I Corps Tactical Zone indicated a possible large-scale offensive was about to be directed against cities and major military installations.[76]

In early November, 1967, the 9th Regiment, 304th NVA Division, departed Tho Xuan of Thanh Hoa Province, North Viet Nam; the 24th Regiment, 304th Division, had departed Cong Chinh, Nong Cong, of Thanh Hoa Province, North Viet Nam, and the 66th Regiment, 304th Division arrived at Dong Trai, of Thanh Hoa Province.[77] The 304th NVA Division was one of the two NVA Divisions that were later to lay siege to Khe Sanh in late January, 1968. In addition, beginning 15 October, North Vietnamese Army trucks were detected "swarming southward in bumper-to-bumper convoys" through eastern Laos. Increased truck traffic was noted beginning after the first of November, 1967, and the CIA concluded that stockpiling of weapons, ammunition, and equipment in preparation of the Khe Sanh battlefield began by mid-November or earlier.[78] American intelligence agents had penetrated into several NVA headquarters even far across the Ben Hai River.[79] It is not unlikely, therefore, that Col Lownds was in possession of some very high-level and very highly classified "far beyond Top Secret" intelligence that indicated plans the NVA had for Khe Sanh even at this time. The National Security Agency (NSA) was later to testify: "NSA began to report the movement of elements of two NVA divisions and three NVA regiments toward South Vietnam. The first report of the movement of any of these elements was made in mid-November 967 ... Reporting ... continued until the units arrived in South Vietnam or staging areas in the DMZ and Laos in late 1967 or early 1968."[80]

By December, 1967, it was obvious that the North Vietnamese Army was planning a major assault against Khe Sanh.

About this time, Khe Sanh began to be a focus of attention at the White House. Dr. Walt W. Rostow, President Johnson's National Security Advisor, recalls: "Khe Sanh began to come into our minds acutely towards the end of November and early December [1967]. What started our thinking hard about the whole region were the attacks at Loc Ninh [29 Oct – 03 Nov 67] and Dak To [3 – 22 Nov 67]." [81]

> Why were they doing it? Well, they obviously, it seemed to us, [wanted] to draw our forces away from the coastal cities.
>
> Then we began to get accumulating data of all kinds: Prisoner-of-War comments; diaries of men that had been killed, and the lectures they'd been given by their political cadres—all manner of intelligence that they planned a major, maximum effort to be decisive.
>
> And that intelligence built up to the point where .. I took the initiative of asking Saigon to get me an evaluation what is your latest portrait of that offensive that's coming, and what is your view of the possibility of a serious negotiation when it fails? That is the way I put the question.
>
> I remember the 8th of December, it arrived. I turned it over to the CIA and the intelligence community to get their comments, and by the 15th of December I had sent it up to President Johnson with my comments.
>
> [It was] early in December, when the whole picture of the coming offensive was shaping up in our minds, that the importance of Khe Sanh emerged. It was clear they were moving big forces in. There were two divisions coming down the Ho Chi Minh Trail aiming for Khe Sanh. There were considerable forces there. There were forces quite close to Khe Sanh that could be brought to bear along the parallel. Our attention was fastened on it because it was such an obvious analogy to Dien Bien Phu. And it was easy to see that they might want to have a melodrama there of overrunning this garrison ... And I remember telling President Johnson once, reminding him of something that Marx said when he was speaking to Napoleon III: 'History never repeats itself exactly; the first time it comes around as tragedy, the next time as farce.[82]

It was about this time that Dr. Rostow had the famous "sand- box" 3-dimension contour map of the Khe Sanh area constructed so that President Johnson could better comprehend the significance of the constant flow of information concerning the region.[83]

[83] *Ibid.* For more information on the sand-box see: Brugioni, Dino A., "The President, Khe Sanh, and the 26th Marines," Leatherneck 69:9 (Sep, 1986) 22-25. Mr. George Allen (who was the SAVA, Special Assistant for Vietnamese Affairs) of the

Meanwhile in Quang Tri, the Province Senior Advisor (PSA), Robert Brewer (who was also the senior CIA man in the area), was watching the melodrama unfold from a different perspective.

Back in August or September, 1967, a high-ranking defector came to the attention of Mr. Brewer, a veteran of the WW II Battle of the Bulge and the Special Operations Branch of the Far East Command during the Korean War. Brewer tasked Capt Warren Milberg, USAF, of the Special Branch (Vietnam's FBI) to investigate this defector, and within a few days, the defector was unmasked as a Moscow-trained, long-range penetration agent, identified as "X-1."[84]

While not thoroughly trustworthy, X-1 did provide a copy of "Resolution 13," an incredible document. In 1918, Ho Chi Minh had issued Resolution #1; only eleven others had been promulgated the intervening fifty years! In Resolution #12, issued about 1960, Ho Chi Minh opted for military struggle rather than political means to conquer South Viet Nam.

> All of us that knew something about this kept wondering when the next shoe was going to drop .. when Resolution 13 was going to come. About September, 1967, a defector walked in with Resolution 13 ... What I did with it was try to read through it and figure out what it meant because it's written in Communist umbrella language. It doesn't really say, 'There will be an attack at Tet,' but it does give you the feeling that something is big behind this particular document. Eventually [this defector] was able to secure the update of Resolution 13. That came in November, 1967.
>
> It was quite specific. And it even mentioned Khe Sanh, and it mentioned all of the Communist military districts in the northern fourth of the country. And we had to say: This could be a plant; they may be trying to provoke us to do something. It may not be true at all, but the thing to do is to take all of the possible indicators that might say that this is true and list them on the wall, and start checking them off as events unfolded.
>
> And I must say that we received every indication that we had expected to receive through those three months. It was a textbook problem. If you had a military intelligence course somewhere you could take this and see how to use indicators towards a possibility, a hypothesis.
>
> We said that if the enemy were going to make a massive attack like this, they would not only rely on low level spies or not rely on local spies but they would send down intelligence officers of considerable rank from North Vietnam to check out their targets.[85]
>
> Another indication: we knew from the past that if the Communists attack, their favorite tactic was to punch a hole in the line and then take reserves held out in an assembly area somewhere, and drive them through that hole. This was the way the North Vietnamese had attacked over and over again. And so we looked for signs that assembly areas were going to be used. We knew which areas had been used in the past, so we kept our eye on those. And sure enough, the assembly areas that were most commonly used began to be booby-trapped again. We said: Here it comes! It's got to be happening because they wouldn't be going through all that trouble just to fool us."[86]

Khe Sanh was also the focus of attention at Saigon. By late November, 1967, Gen Westmoreland assembled his operations staff: LtGen John Chaisson, USMC, LtGen Wil Pearson (MACV J-3), and MajGen Phillip Davidson (MACV J-2).

> And he said: I'd like for you people to draw up a 'war game' and through the device of a war game, to try to figure out what this guy is likely to do, or at least to come up with the various options.
>
> My recollection is that we prepared this 'war game' and that – I think, maybe 'war game' is a little misleading term [since] I don't recollect that there was eve any particular playing out of the scenario. But at any rate we drew the thing up, and we briefed General Westmoreland, and I think all the other principal Saigon actors sometime in November, I'm sure; I'm pretty sure of it.

CIA at the time, noted: "I urged the Agency people, the people from the National Photo Interpretation Center [NPUIC] to build a terrain model of the Khe Sanh plateau. And they did. And they briefed LBJ, and it was retained at the White House. I told them that we had done that at Dien Bien Phu so we could brief the Army staff at the Pentagon—but the Chairman at the Joint Chiefs of Staff stole it from us! If this thing [at Khe Sanh] develops as I suspect it's going to, there's going to be need of one for the Khe Sanh area, so get with it. They did." [Conversation with Mr. George Allen, 25 Sep 1994]. Mr. Allen, a Navy radioman during WW II, helped to bury over a thousand Marine KIA at Tarawa. "We were sent ashore a couple of days because they needed laborers to clean u the battlefield and get all the bodies underground, both friendly and enemy. ...It was "one square mile and 5700 bodies, the size of the Pentagon with parking lots." [Conversation with Mr. George Allen, 21 July 2000].

[85] This happened when a NVA Captain was killed in one of the most pacified, prosperous districts in Quang Tri Province

[86] Transcription of video intv of Mr. Robert Brewer by John Wright, 05Feb89

Anyway, he then says: Well, I think we ought to take this up to DaNang and put this on for General Cushman and the key people at III MAF and get their input. Because, my recollection again is that the outcomes of the scenario was that the enemy would make the major effort at the two northern provinces and would make a secondary effort around Saigon and in the Central Highlands and perhaps along the coast, at Binh Dinh, Quang Ngai, which is always hot country.

So I do remember, very distinctly, taking it up – with some trepidation, I might add – up to DaNang, up to III MAF, and we put it on for General Cushman [who] was there and my old friend, Kenny Houghton was there, and the bulk of the Marine brass there.

The briefing concluded that the main effort would be focused against the two northern provinces, and went well. LtGen Cushman remarked: "I think this makes a lot of sense."[87]

But just where in Northern I Corps would the attack be focused? At this meeting, attended by Generals Cushman, Davidson, as well as the new III MAF -2, Col Kenneth Houghton, and specialists—corporals and sergeants, the argument raged all day. Both Major Generals Tompkins and Metzger argued the attack would be directed against Camp Carroll. Eventually the Pattern Analysis of Signal traffic made by the Radio Company Marines of Maj Alfred M. Gray, Jr., and advocated at this meeting by Col Kenneth Houghton, prevailed. Cushman heeded their analysis as did Gen Davidson and because of this the decision was made to fortify Khe Sanh for the impending attack.[88] "We argued all day long in Phu Bai, and we won. We were the ones who said it might come at Khe Sanh. And it's an interesting story why. And we came back that night, and that's when General Cushman made the decision to reinforce Khe Sanh with three battalions. It was based on Marine intelligence."[89]

The NVA battle plan was code-named TCK-TKN ("Tong Cong Kich, Tong Khoi Nghia" translated as "General Attacks, General Uprisings") said to have been devised by Gen Vo Nguyen Giap in the fall of 1967.[90] Phase III of TCK-TKN was to be grand-scale battle with a decisive victory. The place he chose for this was Khe Sanh. The MACV J-2, Phillip B. Davidson, notes that this explains the large force which subsequently encircled Khe Sanh—not to draw American troops from populated areas, but to attack and neutralize Khe Sanh as a "decisive victory." It is sheer stupidity to assume the NVA attracted Americans to Khe Sanh. Davidson writes: no military leader in his right mind would use 32,000 to 40,000 men to divert 6,000, especially when they were so desperately needed in Quang Tri City and Hue.[91]

Meanwhile, on Khe Sanh Combat Base, Colonel Lownds, at the evening staff brief on 17 November 1967, LtCol James B. Wilkinson mentioned that a Scout Sniper on Hill 881-S had fired six rounds and missed a 300-pound deer. A Grunt from B/1/26 shot and killed it. Wilkinson continued, "But I don't know what weapon he used; he might have used a 106 or a 105 on direct fire!" Then Colonel Lownds spoke of setting up a defensive position, assigning priorities, dig in positions, clear fields of fire, set up concertina, and camouflage. He continued: we have to concentrate on the latter and build false hooches, camouflage those we have on the base. "It's easy to see where the COC is, and frankly, I don't want to be a target!" The next morning, at the 1/26 staff brief, LtCol Wilkinson, noting Col Lownds' comments the previous evening, said, "The enemy can accurately hit the COC by adjusting on its antennas. That was the experience at Dien Bien Phu. So, instead of taking 500 rounds on the COC, the whole base will take 1000 rounds!" All were laughing, but the statement was to prove prophetic.

During December, 1967, increased contact with the enemy , signals intelligence, captured documents, agent reports, reports from ralliers, marked increase of traffic along the Ho Chi Minh and Santa Fe Trail networks—all this offered ample evidence of the enemy's intentions at this juncture. The ability to employ long-range artillery, safely emplaced in Co Roc Mountain, Laos, where our troops could not neutralize them, which had a range sufficient to reach us, while our artillery could not reach them,[92] eventually made fighting there impossible anyway, and Khe Sanh was eventually abandoned. But for now, Khe Sanh needed to be fortified: (1) it would block an influx of large numbers of troops together with tanks that would have an

[91] Davidson, *Vietnam at War, The History: 1946-1975*, Novato: Presidio Press, 1988, p. 444

[92] The Soviet 152mm gun-howitzer weighs over 17,000 pounds and is capable of firing four rounds per minute at a range of 17,260 meters, about 10.5 miles [FMFPAC 250308Z/Jan68, SITREP #1031; DIA Intelligence Summary 25-68, 25Jan68, p. A-5]. The range of the 130mm field gun was even greater, firing a 74-pound round about 31,000 meters. The Marines' largest artillery at Khe Sanh was the 155mm, with a range of 14,955 meters. The 175mm guns at Camp Carroll, with a range of 32,800 meters, reached just short of Camp Lang Vei, and those at Camp Rock Pile, just short of the Laos border. (It may be of interest to note the max range of the other weapons: 122mm rocket—11,000 meters, 140mm rocket—10,000 meters, the 106mm RR—7,000 meters Max and 10,976 meters effective, the 4.2"—6,000 meters).

unimpeded route into the populated areas to the east; (2) it would, like "fly-paper," attract the mass large numbers of NVA troops so they could be annihilated by supporting arms. A third reason for Khe Sanh: as a launch pad for recon into Laos through the small prop planes of TIGERHOUND and the patrols from SIG, was no longer a reason by after the siege erupted.

The local commander, Colonel Lownds, could summarized December, 1967: "The most significant development during the month was the marked increase in enemy activity."[93]

Contact was made on numerous occasions; sniper fire was prevalent in the vicinity of Hill 881S during the first part of the month; probing or attempted probes of static defensive positions on Hills 861 and 950 occurred on three occasions; infantry patrols made contact with enemy forces on three occasions, usually brief encounters at extremely close range, probably an accidental encounter.[94]

Patrols from the reconnaissance unit at Khe Sanh made numerous sightings, one of over 40 NVA. They also made contact with the enemy 9 times during their 30 patrols, each averaging 3.33 days and an average of 7.7 men per patrol. There were numerous trails, huts, and fortified positions observed by these patrols. During the month, two recon Marines were killed and one died of wounds, two were wounded and one Navy corpsman was wounded.[95]

Activity from the adjacent Laos LOC[96] networks reflected a marked increase. Greater use of the Ho Chi Minh Trail was observed to occur during December. Trucks were found moving supplies that in previous years were carried by sea or through Cambodia.[97] During November, 1967, pilots reported sightings of about 2,500 trucks on the trail, about three times the number spotted during the corresponding period in 1966.[98]

Ensign Kux, Officer in Charge of the Seabee detachment here, wrote I his diary: "Tactically things are looking bad. I expect we'll get hit soon—and hit hard. The anniversary of the beginning of the Siege of Dien Bien Phu is approaching, and things aren't too much different now than they were then. I'm getting somewhat concerned." [99]

One Marine PFC simply wrote, "We are supposed to get overrun."[100] Another Marine wrote:

> I think all hell is going to break loose around Khe Sanh. there has been a big build up in an area west of hill 881S where the Marines had that big battle last spring. I think there will be an operation to take Hill 918 and this will be even bloodier than 881, 881N, and 861. We took close to 1000 casualties then and now because of the weather jets won't be able to fly. It will be the individual grunt who has to take that h ill and I am glad I am in Recon because as soon as the grunts move in our job is done. We found the gooks on 918 and now it is the infantry's job to take it. I am glad I am sitting on this hill [Hill 950] for it will be a costly battle ... I was on top of it once and saw the fortifications the gooks have on it. We were there for three minutes and then all hell broke loose and we had to fight our way off. Like I said it will be costly.[101]

During November, 1967, the strength of the 9th NVA Regiment was increased from 2,838 to 2,857 and in December to 2,917.[102]

Even the Brou Montagnards at Khe Sanh seemed to sense the approach of the terror and horror. At about 0300H at CAP O-3 (just outside KSCB), all the Brou on the perimeter began firing into the dense fog that blanketed us for the night. Roberts, one of the Marines there, violently got up in the total darkness of his bunker, put on his trousers backwards in his haste, and rushed out, as did the marines from the other bunkers, assuming we were under attack. The Brou said that they had seen their evil god, the one who devours people, "*Panoah*," prowling near their compound, and they fired to scare it away.[103]

FMFPAC now indicates the enemy capability of attacking Khe Sanh/Lang Vei area with the equivalent of one reinforced regiment

A document obtained 01 December 1967 written by Nguyen Thanh Van, a Political Officer, described missions for units in the Route 9 area:

(1) To operate along Route 9 in order to down enemy [i.e., American] troops and enable the Tri-Thien and Military Region V HQ to launch a large scale offensive;

[103] Author's Diary, 03Dec67

(2) Attack [American] supply basis and installations along Route 9.

(3) Apply pressure on Con Thien.[104]

Pressure on Con Thien meant drawing troops away from Khe Sanh, where the real battle would be fought, according to the general enemy strategy known much earlier.[105]

By December, 1967, the CIA concluded:

> Recent enemy combat actions, the movement of possibly two additional divisions from North Vietnam, and several pieces of evidence from agents, interrogations, and documents combine to indicate that the VC/NVA are undertaking something very much like an all-out punch during the 1967-1968 Winter-Spring offensive.
>
> The enemy is again escalating the war. He is raising his stakes in the gamble that he can win essentially what he wants in the next few months. By rallying his battle-wearied forces in a high pitch for an all-out effort based on promises of decisive achievement in the next few months, the enemy is risking a catastrophic let down if he fails. He is in effect shooting the works.
>
> ...
>
> The Communist Vietnamese, North and South, are hurting badly from the accumulated drain of the past two years. They are losing healthy young men at the rate of about 180,000 a year from their population base of about 22 million. They face the loss of a generation. The economic and psychological drain is also severe."

The enemy cannot sustain continued losses of this magnitude, the CIA memo noted, and concluded: the enemy will ".. use their still formidable assets boldly in a fierce attack that will give the impression of great strength and possibly win them a partial victory ('decisive victory' in their terms) which will end.." the war.[106]

FMFPAC's estimate of the enemy situation at the beginning of 1968 was similar:

> That the enemy would plan a major offensive in the western DMZ region was logical. After 18 months of defeat in northern Quang Tri province, his need for a victory has intensified, and the Marines' combat base at Khe Sanh would appear, to him, to offer some hope of military advantage. Deriving his main strength from relatively secure routes of march in nearby NVN and Laos, he is able to infiltrate large numbers of troops, along with heavy weapons and supply support, into the area proximate to Khe Sanh without fear of envelopment by US ground manpower elements. And a victory at Khe Sanh would accrue additional benefit to the enemy as, situated astride a major infiltration corridor, the outpost further impedes invasion efforts already made difficult by the strong point obstacle subsystem construction in the eastern DMZ area.[107]

SIGINT

Signals Intelligence, SIGINT, is as old as World War I.[108] Interception of Russian messages containing the tactical plans of their field forces contributed to the German victory at the Battle of Tannenberg in 1914. On another occasion during World War I, the British sent decoy messages causing a German zeppelin enroute to Africa to return to Germany.

During World War II, the Germans used both airborne and ground radio direction finding equipment to track down partisan forces in occupied areas such as Norway. The French apparently used some form of this technique during their struggle in Vietnam. A captured VC document called for radio discipline to counter detection techniques such as the French had used against them. In 1961, the Army experimented with Aerial Radio Direction Finding in Vietnam and by 1 Jan 66 had 15 aircraft to satisfy a weekly requirement of 240 hours of coverage of enemy operations, using on the "aural null" technique: when an enemy signal is detected, the pilot maneuvers his aircraft until he obtains an aural null (he hears nothing on that aircraft heading). The aural null means that the aircraft is heading directly toward or away from the enemy transmitter. The aircraft's heading can be plotted as a line of position (LOP). The crew repeats this aural null procedure until several widely spread LOPs are obtained. The LOPs cross at a common point, or fix, which is the location of the enemy transmitter.

Improved equipment later introduced. The AN/ALR-34, obtained the Phase Angle Discrimination (PAD), angle measurements on an incoming radio signal, in one second. This equipment established the direction of the enemy signal

and, as a result of computing through a complex process, the time of arrival of the target signal at the three antennas on the aircraft wings and nose. By late 1966, the C-47 was equipped with ARDF[109] with side angle calibration, which made it possible to fix enemy transmitters in any direction without turning the aircraft, reducing the possibility of compromise and enabling a fix in only short bursts. The AN/ALR-34 locks on the target, and then the Doppler data on the position of the aircraft and the C-12 compass (giving an instant readout of aircraft heading within a tenth of a degree), are integrated and displayed on paper tape—all in a process taking less than one second after a lock-on.

So significant was the work of EC-47s and their ARDF during the Siege battle at Khe Sanh that 90% of the total B-52 strikes were targeted through ARDF data.

Brigadier General George J. Keegan, Jr., Director of Intelligence of 7th Air Force (and later Director of the Defense Intelligence Agency), wrote: "On 21 January 1968, MACV had become so overextended in the ground war, that Gen Westmoreland assigned General Momyer a principal role in the defense of Khe Sanh...To meet this problem, General Keegan interrupted all his normal functions at 7AF to mobilize an intelligence exploitation effort....The Air Force thoroughly reconnoitered I Corps using special sensors plus ARDF data supplied by Army analysts. The reconnaissance effort produced 2000 targets around Khe Sanh...The result of all this was that the Air Force showed it could do 'in two weeks what had not been done in two years.'...The experience at Khe Sanh, where 7AF integrated all sources of intelligence with a massive targeting program, showed how much more influence the Air Force could have on the conduct of the ground operations.""[110]

By 29 January, the I Corps TOC[111] sent URS[112] in their SPARS Reports listing 32 FRED locations, two FRED locations changed to Regimental CPs, and four FRED locations to read FRANK.[113]

The 8th Radio Research Field Station at Phu Bai (USM-808), the largest intercept site in Southeast Asia, controlled 30 mobile units known as Direct Support Units (DSU), was a detachment of Marines from 1st Radio Battalion, located on the Combat Base and, at least before the Siege, in a small tent just off the LZ on Hill 881-South.

Of course, it's always possible to set up transmitters in remote hills someplace and transmit, making it appear as though the lone transmitter is actually a headquarters. In a memo of 27 Feb 68, David Y. McMahis, White House Liaison Officer of the National Security Agency, prepared a report[114]: "Here is the evidence on which NSA bases its conclusion that the North Vietnamese are not 'spoofing' us with their communications."[115]

Signals intelligence[116] activities of the National Security Agency had been operating ARDF[117] at Khe Sanh during the Battle of the Hills, reporting "a considerable increase of terminals in the vicinity of Khe Sanh,"[118] was now indicating an

[116] Signals Intelligence, SIGINT, operated in South Vietnam to cover all aspects of NVA and VC communications and make their results available to the intelligence community. "The objective of this SIGINT reporting and support effort is to present information that is both accurate and timely, to assist in the execution and planning of military operations in Vietnam, and, of course, to aid in a threat assessment... field stations located in Vietnam are charged with timely collection, processing, analysis and reporting on specific targets ... the stations involved are USM-803 at Phu Bai, USM-604 at Pleiku, and USM-626 at Bien Hoa ... There are approximately 30 mobile or semi-mobile units known as Direct Support Units (DSU) ... The results of this extensive collection .. flow back to NSA which is responsible for examining the SIGINT technical and information base; for immediate consolidation and summary reporting in the Southeast Asia Daily SIINBT Summary.."[NSA, SECRET SAVIN document of 20 August 1968, "SIGINT Operations in Vietnam."]

[117] The ARDF (Aerial Radio Direction Finder) was mounted in a EC-47 aircraft which appears as a AC-47 gunship (known as "SPOOKY") which is equipped with three 7.62mm Gatling-type guns that fire 6,000 rounds a minute. The similarity of the two aircraft ensured the enemy kept his head down!. In the initial days of the Khe Sanh siege battle, ARDF indicated 2000 targets around Khe Sanh and 890% of all B-52 strikes at Khe Sanh were targeted through ARDF data. [Hurley, Alfred E., "Interview with Brigadier General George J. Keegan, Director of Intelligence, 7AF, on 14 July 1968," Exhibit #7 of Supporting Documents in CHECO Report #74, The EC-47 in Southeast Asia, 20 Sep 1968.). The ARDF is an AN/ALR-34, ARDF, KY-38 radio, Bendix Doppler Computer CPA-24 (AN/APN-179) C-12 Compass, etc. By 01 Jan 1968, EC-47 aircraft were consistently flying more than 900 sorties each month. [See Porter, Melvin F., *The EC-47 in SEA April 1968-July 1970*, , HQ PACAF, Directorate, Tactical Evaluation, CHECO Div., 12 Sep 1970; Burch, LtCol Robert M., *Tactical Electronic Warfare Operations in*

ominous threat to Khe Sanh. In addition, since 1964, we had cracked the codes used by the North Vietnamese, communicating with their agents in South Vietnam, but this information was kept by command levels higher than the Division[119]

In February, 1966, the Central Military Party Committee issued a directive formally establishing the Tri-Thien Military Region which was removed from Military Region V, and in June of 1966, they issued directives establishing the Highway 9 Front.[120] In June, 1967, the Party Central Committee[121] "..met to evaluate our victories and the enemy's defeats in the battlefield and concluded: victories over the past two years have opened a new opportunity." They noted the 1968 American Presidential election was an event that could be used for them and they resolved to "secure a decisive victory in a relatively short period of time. If we want this we have to attack the Americans and defeat them militarily."[122] In July, 1967, the Politburo met and decided to launch a General Offensive and Uprising [the Tet Offensive].[123] In October, 1967, the Tri-Thien Party Committee received directions to prepare for the 1968 Spring General Offensive and Uprising.[124] Order No. 1016/KH, Subject: Tactical Plan in Support of Plan "X" was issued in October 1967.[125] At the end of October, 1967, B5 (the NVA tactical area of northern Quang Tri Province) and the High Command's forces prepared to enter the battlefield by road construction, organizing reserve depots and development of roads capable of conveying
motor transport.[126] Artillery preparations for the battlefield began on the 20th of October 1967.[127]

On 15 November 1967, the lead elements of the Front Rear Services[128] reached Commo Liaison Station 53.[129] On 19 November 1967, directives arrived from the Politburo together with orders from the Joint High Command regarding the

SEA, 1962-1968, HQ PACAF, Directorate, Tactical Evaluation, CHECO Division, 10 February 1969; and Hurley, Alfred F., *The EC-47 in Southeast Asia*, HQ PACAF, Directorate, Tactical Evaluation, CHECO Division, 20 September 1968. Gunnery Sergeant George Bailey, the NCOIC of the detachment from 1st Radio Company, III MAF, at Khe Sanh, noted their small group was able to develop a good list of targets as well as chart the NVAs Order of Battle Mirza Baig, the 26th Marines Target Intelligence Officer, continuously and effectively destroyed all these targets, leaving Gunny Bailey to exclaim: "You're destroying all my carefully obtained, analyzed, and plotted targets! You're putting me out of business!" . [Comments of GySgt George Bailey to the author, 7 July 2001].

[118] NSA, Daily Tactical SIGINT Summary, SECRET SAVIN, Retrospective Analysis of 24 Apr – 12 May 1967 Khe Sanh Battle Part 1, NSA 150615Z/Dec67 (In release of documents to CPT Ronnie R. Ford, USA, Ser MDR 95-0059, 16 Jun 1998). (Note: SAVIN is a SCI classification. Other cryptonyms—relating either to a level of classification or how that information is being collected [comments of Sedgwick Tourison, 15 Oct 2002] include LARUM, SPOKE, TRINE, and UMBRA).

[119] Comments by Sedgwick Tourison, 15 October 2002, while translating official North Vietnamese documents discussing the military history of Khe Sanh, commented: "I know the CIA officer who ran that project said that they were getting a tremendous amount of information out of that intercept effort. The problem was that the Administration did not want to believe what was coming out of it, because the view that the Security Services provided of the war did not fit the view of the war as seen in Washington. Also, this was a very highly compartmented operation. Very few people even knew about it, and to what extent maybe Johnson was briefed on it or other people in CIA probably the Director, I'm sure, was aware of it, but to what extent information coming out of that was given the type of distribution that might make it credible is probably something that we won't know for years and years and years." General Offensive and Uprising (the "Tet Offensive") throughout the south and the historic mission of the Tri-Thien Hue Battlefield in this new phase.[130]

B5-T8

The NVA headquarters controlling all operations at Khe Sanh (as well as all of I Corps) was established on 6 December 1967 as a Front Headquarters with the secret designation, "B5-T8," commanded by Major General Tran Quy Hai, Assistant Chief of Staff, PAVN General Staff, and Political Commissar Comrade Le Quang Dao, Deputy Director of the General Political Directorate for the PAVN.[131] The presence of NVA in this area had been reported by JTAD in October, 1967, placing a 800-man NVA battalion at XD 687547, armed with two 122mm rocket launchers, 1 82mm mortars, 3 60mm mortars, and other armament.[132] The NVA Front Headquarters is indicated on a CIA map[133] 9 miles west of the DMZ. U.S. tactical maps indicate numerous fortified hill positions in karst[134] formation in the general area from N/S grid line 37 to 58 and E/W grid line 63 to 67[135]

The forces operating in the Highway 9 area all came under the command of the Highway 9—Khe Sanh Campaign Headquarters[136] (B5-T8, located in Laos at Sap Lit, XD6266, a little west of the western edge of the DMZ).[137] From the 25th to the 30th of December 1967, the lead elements of the 325th Infantry Division entered the battlefield.[138] On 28 December 1967, the Campaign Party Committee met for the first time to discuss and to ratify the campaign order. The Khe Sanh area is to be the principle area; the eastern Quang Tri Province area is an important area.[139]

The B5 Front Committee met on 31 December 1967 to assign missions: (1) to destroy a significant amount of American-RVNAF manpower, primarily American. When conditions permit, break through the enemy defense line on Highway 9 and expand down into the Tri-Thien-Hue Region; (2) draw in and in down as many American-RVNAF forces as possible and continue to destroy them; and (3) Coordinate closely with other theaters in the South, create favorable conditions for a popular uprising.. primarily in Hue City and liberate the rural areas in the lowlands. The highway 9 Front was to be divided into two battlefields with the western (Khe Sanh) area the primary sector and the responsibility of the 325th and 304th Divisions.[140]

Deep in the bowels of the large concrete, fortified bunkers of FOB-3 that has been constructed in November, 1967, in the communications section of the TOC, four North Vietnamese Chieu Hois monitored radio traffic of NVA units on the Khe Sanh battlefield. They, along with a small group of Marines who analyzed North Vietnamese signal intercepts concluded by

November, 1967, that Khe Sanh would be attacked. At the time, the Commanding General of 3rd Marine Division, General Westmoreland's J-2 (LtGen Philip Davidson), the Central Intelligence Agency, the Defense Intelligence Agency, and the National Security Agency, all had concluded that the impending North Vietnamese battle would focus on Camp Carroll. On Thanksgiving Day, 1967, an intercepted message indicated the 29th Regiment "was down by the river and have linked up with the 304th Division." Major Alfred M. Gray, Jr.'s Marines of the Radio Company of III MAF analyzed the 1967 Hill Battles in terms of patterns of radio intercepts and concluded that the attack would be against Khe Sanh.[141] In late 1967, the Daily NSA Southeast Asia SIGINT summary noted: "..during the past week, SIGINT has revealed a concentration of PAVN radio terminals immediately west of khe Sanh—in the vicinity of the Laotian-Quang Tri Province border.[142] "General Westmoreland sent everybody, regardless of rank, and from any Service who had studied this matter to Phu Bai. They argued all day long. About ten minutes to five on the 27th (of November, 1967) this little group of Marines won the argument. Colonel Houghton, G-2 of III Marine Amphibious Force, went back to DaNang, saw [Lieutenant] General Cushman at about ten o'clock in the evening, and that's when he made the decision to reinforce Khe Sanh with four battalions."[143] However, caution in reinforcement of Khe Sanh needed to be observed lest the NVA observe that we knew of their intentions. Thus, the sudden, abrupt arrival of 3/26 on 13 Dec 1967, with no advance warning for KSCB to provide increased mess facilities, tents and bunkering materials, etc., and the rather late, but still timely, arrival of 2/26 on 17 January, reinforced Khe Sanh, but not in a way to disclose our awareness of the NVA intentions and still served the function of drawing-in the NVA forces to attack a lucrative target so that, in fact, we could fix them in place and annihilate large numbers through B-52 strikes and hold large numbers of NVA in place that otherwise might have needed to be fought in urban areas.

General Gray states, "we knew all about Tet except for the hour.. we knew the whole plan," and that Tet destroyed the VC infrastructure in the South: "It was all over. It broke their back. There was no more leadership."[144] In response to the criticism of those who regard Tet as an intelligence failure on our part, General Gray quips, "Everyone who should have known knew it was coming; it was no surprise at all."[145]

*

This NVA Front Headquarters was targeted and struck by 36 sorties of B-52s in the morning and 9 at night on 30 January 1968, producing 85 secondary explosions and numerous cave-ins,[146] greatly disrupting the enemy's plans."[147] Bruce E. Jones of the MACV Intelligence Section known as CICV (Combined Intelligence Center Vietnam) notes this strike was based on signals intelligence, SPARS (Special Aerial and Radio Sources), striking a honeycombed cave area of a major NVA headquarters.[148]

Some staff at Khe Sanh initially felt—hoped—the strike may have killed Giap. It didn't, of course, but it probably caught many other headquarters types. This particular B-52 strike did not escape White House scrutiny. In a memo by Walt W. Rostow to the President of 7:50am, 30 Jan 1968, he reports: "Herewith Westy reports an extremely successful use of intelligence to identify and attack with B-52s the new, recently established senior headquarters west of the DMZ. (Some of our best analysts suspect Gen. Giap may have taken personal command at this installation). Westy believes the attack may 'at least delay' the major offensive in Northern I Corps."[149]

---

[141] National Security Agency msg 140615Z/Dec67 [source of message not declassified], SECRET SAVIN, Part 1 of a 2 part message: "In retrospect, indicators of the alignment of forces within DMZ area/Khe Sanh area was apparent. However, unit identification was not revealed until SIGINT could be collated with collateral material which became available during and after the Khe Sanh battle. Patterns noted prior to April/May Khe Sanh [1967] offensive.. form basis for analysis of present and future intelligence indicators concerning this area." The message giving Part II: The first indications of one of the divisions involved at Khe Sanh was in late October, 1967, by the loss in communications of one of its battalions on 30 Oct 1967 and two terminals of regimental echelon on 31 October and 10 November. On 12 November a communications watch facility was first observed, suspected of serving the Division. The Division was deploying in radio silence [one of the NVA's tactics prior to an attack] and there was a split in Division headquarters. Aerial Radio Direction Finding (ARDF) located 8 separate radio terminals just to the west of Khe Sanh.

The strike, however, went unknown to the American public. Gen. Westmoreland sent the following to General Wheeler (CJCS) on 01 Feb:

> Any public statement about successful B-52 attack on the major enemy headquarters would certainly compromise the source of the information, enemy corrective action could diminish our intelligence effort country-wide. No valid cover story can be developed. We have no ground reconnaissance resources which could be admitted to be in that area. While photographic interpretation could confirm a possible logistic complex, it could not support identification of a major headquarters.. It should also be pointed out that any such statement would be an admission of our [two lines not declassified]. Additionally, approval for the strike was granted by American Ambassador, Vientiane upon condition that no publicity would be given to the strike.[150]

Some elements of the headquarters were back in communication with Hanoi after 38 hours of silence."[151]

An account of the B-52 strike on B5-T8 was printed in The People's Army newspaper:[152]

> On the 29th Day f the Lunar Month [two days before Tet] enemy reconnaissance aircraft circled many times over the area where the headquarters command post was located. On Tet morning, the first day of Lunar New Year, the atmosphere was still completely still. The General Staff and the General Political Department sent a Tet message by cable down from the North to the Khe Sanh Front.
>
> Suddenly a tremendous roar, the sound of aircraft was heard. B-52s began carpet-bombing the area. During the day wave after wave of aircraft savagely bombed the area. The telephone lines were all cut. The command post lost all communications. All the food that had been prepared to celebrate Tet disappeared during the bombing raids. Luckily, a number of freshly cooked Tet cakes had already been taken into the cave. The bombing was so ferocious throughout the day that no one dared to leave the cave.
>
> The Front Command Group held a conference and concluded that the campaign headquarters command post had been found by the enemy because of our lack of combat experience – the trails and the above-ground telephone lines all led directly back to the command bunker. The Front Headquarters gave an order to move to a different location. General Dao, General Tran Quy Hai, and the personnel accompanying them laid hiding in a string of B-52 bomb craters for many long hours. Falling rocks dislodged by bombs hitting the mountain injured many personnel. Hoa, General Dao's bodyguard, pushed the general into a crevice in the rocks and lay on top of him. Hoa was injured by a rock that crashed down on him. The able-bodied helped the injured to walk as the entire group felt their way forward through the dark night. They did not use their flashlights because they were afraid of being spotted. The entire group stumbled forward down the valley. General Tran Quy Hai said to Dao, 'It seems as if we have taken a wrong turn.'
>
> The bombing still had not ended, but the bomb explosions sounded as if they were farther away. Dao said to Tran Quy Hai, 'Perhaps we should tell everyone to find a place to take cover.'
>
> Bombs dropped by the B-52s had devastated this entire part of the jungle. Trees and bushes were all uprooted, the sides of the mountains had collapsed in massive landslides, and rocks were scattered everywhere. The group found a place along the mountainside where there was a rock dome with a small cave, and they crawled inside to hide. A few of the members of the group had managed to bring their Tet cakes and they shared these with the others.
>
> Suddenly the light of a flashlight shined in at them. One of the bodyguards who was standing watch shouted, 'Halt! Who goes there?' 'Ba Bui,' was the reply.
>
> Dao was overjoyed and hugged General Cao Van Khanh (who was also Ba Vui), the Deputy Commander of the Khe Sanh Front. Khanh had escaped through the area of the B-52 bomb craters, but when he could not find Dao

[151] Westmoreland 010010Z/Feb68 to Gen Wheeler, CJCS, in LBJ Library, National Security File, Vietnam Country File, Container #92, #52.

[152] Nguyet Tu, "Tet Chien Truong," ("Tet on the Battlefield"), *Quan Doi Nhan Dan* [People's Army], 21 January 2006, translated by Merle Pribbenow. Merle Pribbenow notes: "In the standard Chinese Lunar New Year calendar the first day of the 1968 Lunar New Year was 31 January 1968, however, that year the North Vietnamese claimed that their astrologers had recalculated the date of the actual Lunar New Year and declared 30 January 1968 as the date on which North Vietnam would celebrate the Tet Lunar New Year. (I suspect that the real reason they changed the date was to enable their troops to celebrate the Tet Lunar New Year one day before they launched their offensive on the day that South Vietnam was celebrating the Tet Lunar New Year)." [Merle Pribbenow, letter to Rev. Ray W. Stubbe, 04 Sep 2016].

and the Front Headquarters staff, he had turned back to look for them. 'Why have you turned on that bright flashlight? Aren't you afraid that the enemy will spot us?' Dao asked.

Khanh smiled and said, 'It's because of my experience in evading the 'old lady' observation aircraft during the war against the French, brother. Back then they flew very low. But now, the B-52s just bomb target coordinates marked out ahead of time on a map. They are blind and they fly so high that they cannot see anything down here. We can turn on our flashlights and use them to keep us from getting lost.'

The entire group continued its march forward. Dao kept the morale of the others up by telling them funny stories. For the entire previous day they each only eaten a small piece of Tet cake, and everyone was so hungry that they were shivering. Suddenly a private opened up his pack and said, 'Commanders, I would like to invite you to eat some toasted rice.'

The words 'toasted rice' filled everyone with joy. This private had taken leftover rice from many previous meals, dried it in the sun, and toasted it to save, just in case. He never suspected that it would suddenly become such a precious commodity. Fortunately he had not lost his pack during the B-52s bombing strike. The package of toasted rice was only enough to fill a regular bowl, and it had to be shared among many people. Each person got only a handful of toasted rice.

Dao saw one of the young privates who had just recovered from an illness. Dao quietly split his portion in two and gave half of it to the young private.

The next day the group finally found the spot where the alternate command post was located and was able to reestablish contact with the units based along Route 9. Although the entire group was hungry and tired, they were all filled with joy when they received a message from the Central Military Party Committee informing them that on the night of the 30th Day of the Lunar Month [Tet Eve] and the first day of the Tet Lunar New Year, our General Offensive had exploded victoriously throughout South Vietnam.

4. Sunday, 21 January 1968[153]

On Saturday, 20 January 1968, INDIA Company, 3/26, patrolled towards Hill 881-North as the result of a contact made on 18 January by BARKWOOD, a 8-man recon team which was inserted on 881-North the previous day with I-3 providing security. BARKWOOD had made contact and required assistance. As INDIA Company approached 881-North, they came under intense combat, killing four Marines, including two Platoon Commanders.[154]

Also on the 20th, Lt Lathang Dong walked up the positions manned by B/1/26 waving a white flag and surrendered.[155] Lt Dong, CO of the 14th Anti-Aircraft Company, 95C Regiment, 325C Division, provided detailed information of the disposition of attacking NVA forces as well as the general battle plan. Lt Dong had 14 years' service and wasn't promoted to Captain.[156]

As a result, Colonel Lownds ordered Captain Dabney to abort the patrol and return INDIA Company to 881-South. At the evening regiment staff brief, Colonel Lownds mentioned that representatives from III MAF and MACV were on base to assess when the attack would begin on KSCB. The III MAF rep was Col Kenneth Houghton (G-2); the MACV rep was LtGen Philip Davidson (J-2). General Davidson informed Lownds Khe Sanh was surrounded by two NVA divisions with additional divisions in supporting distance.[157] Actually, with three divisions at Khe Sanh, the NVA wasn't merely preparing to strike KSCB in order to lure in other forces which they could then attack and annihilate; the NVA obviously intended to overrun KSCB.[158] Plans were being staffed at higher headquarters to dispatch a fourth infantry battalion to Khe Sanh. The J-4 of MACV noted that 2/26's arrival required 28 sorties, equating to seven C-130 aircraft dedicated for one day and that the logistic requirements for KSCB would significantly increase.[159]

[159] For logistical requirements at Khe Sanh, see MACV J-4 memo, Khe Sanh Airlift, 20Jan68 and McLaughlin, BGEN Burl, "Khe Sanh: Keeping an Outpost Alive," in *Air University Review* (Nov-Dec68) 68.

Khe Sanh Combat Base received a mortar and rocket attack at 0500H , along with an attack on the District Headquarters and CAC OSCAR in Khe Sanh village, Hill 861, and Recon Team NURSE[160]. Officially between 0500H and 0530H, the KSCB received approximately 100 rounds of 82 mm mortar and 60 122 mm rounds.[161] Destruction was extensive, suddenly changing the combat base into a shambles. All who were on the combat base couldn't help but be affected psychologically by sudden shriek of the 122mm rockets[162] which reminded one of the cries of the Valkyries[163], so poignantly captured in Wagner's opera, Die Walküre (played in the movie *Apocalypse Now!* during a helicopter assault) .

Also, of some concern were the 82 mm mortars with delayed fuse.[164]

Much of the base's ammunition had fortunately been re-staged prior to this attack. Nevertheless, the supply on the base was critical. The boxed-in fires in support of recon team NURSE, in addition to those fired in support of the District Headquarters in Khe Sanh village, the fires in support of Hill 861 as it was being attacked, and the loss of ammunition in the dump, made LtCol Hennelly (CO, 1/13) very uneasy. He only felt confident with a reserve of 20,000 rounds and he had considerably less than 5,000.[165]

While personnel casualties were relatively light, damage to physical objects—equipment, buildings, ammunition, aircraft, etc., was indeed extensive. The damage ranged from $3,298,862.97 worth of ammunition destroyed in the ammo dump due to enemy incoming this morning[166] to the comment of Jack Corbett of the 1/26 81s who had lent Jeff Culpepper a guitar; Culpepper was a Marine in Co B/1/26, the unit that had received most of the cooked-off ammunition. Jeff came to Jack later in the day saying, "I'm alive, but your guitar is blown to bits."[167]

Effects of the attack were concentrated on the eastern portion of the combat base in positions occupied by B/1/26 (The GRAY Sector) and the 105mm artillery battery "C" of 1/13 due to the main ammo dump being hit and exploding, strewing ordnance throughout the area.

A tent near the B/1/26 CP bunker[168] housed the corpsman, supply and radio operators of B/1/26. When the incoming struck, all dashed out of the tent. LPCL Steven Hellwig apparently remembered he had forgotten something and returned to the tent as all the others made it safely to the trench. An artillery round landed very close and just cut him in half; he didn't know what hit him.

Immediately there was the attempt to make order out of the confusion—do this and do that—and then the ammo dump began cooking off and the tear gas started pouring into the trench. (This was the CS from the various types of CS grenades as well as the large containers of CS powder that were used to spread over a large area via special dispensers).

The Marines, most of who were without gas masks, began using wet towels over their faces. Tom Quigley was doing fine until a supply sergeant decided to change towels.

> When he took the one away that I was using to give me a fresh one, and then I got a full intake of that stuff in my nose and eyes and ears, and my throat, and I was burning. And they said, 'Get him out in the trench line.' and I thought, 'Kick my side; I'm not going out there!' Everything in the world was flying. But we had no choice.
>
> And I started crawling out of the bunker and went out. And I had a .45 at my hip and I got caught up in that comm wire that was lying all around the base camp, tied up around my holster. And I couldn't get out of it, and I had to finally roll over on my side, unbuckle my own belt, slide out from under it, Marines running down the road and I yelled at them. And ten that's when these guys took me inside the ammo bunker. They were sitting inside the ammo bunker for the 81s. They said, 'Get on in here.' So I went on in there. There was about six, eight guys in

[161] 26MAR 211540Z/Jan68, OPN SCOTLAND SITREP #327. At 1250H, KSCB received three 122 mm rockets and three 82 mm mortars. Four additional mortars were received at 1505H.

[162] For the technically minded, the rocket projectile is 1.93 meters (6.2 ft.) long, weighs 45 KG (102 lb.) with fuse, and has a range of 11,000 meters. [MACV, CICV, "VC/NVA Rocket Artillery Pictorial Study," ST67-082, 14Sep67, p. 2].

[163] In Scandinavian mythology, Valkyries were each of Odin's twelve handmaidens who hovered over battlefields and conducted the fallen warriors of their choice to Valhalla. [*OED*].

[164] A report from the DIA [Defense Intelligence Agency] of 09 December 1967 stated that a recently captured document in South Vietnam described delayed action fuses for 82 mm mortar projectiles which cause them to detonate from 2 ½ to 8 hours after impact. The ammo id intended primarily for use against rear area installations. The delay is achieved by use of an acidic solution which corrodes the firing pin arrester. The solution is contained in a glass tube which breaks jupon firing or impact. Four color codes on the round indicate the amount of delay: yellow-2.5 hours, red-3.5 hours, blue-5 hours, and violet-8 hours. The delay times are subject to a 20% variation [FMFPAC 160259Z/Dec67, SITREP #991].

[167] Comments of Mr. Jack Corbett to the author, 050ct86

[168] This section is from Stubbe, *Khe Sanh*, (unpublished MS, basis for *Valley of Decision*), pp. 355-358.

there. So we was sitting on 250 rounds of 81 mortars. I didn't care much for that, but it still was better than being out there.

We stayed there till about daylight. Rounds kept landing all around us—enemy mortars, and a lot of them had delayed fuses, and they weren't going off, and just laying in the pits. Finally someone said, 'Well, we'd better get the hell out of here.' So we got out of there and that's when we got in the trench lines.[169]

A large secondary explosion resulted when the ammo dump was hit. Fragments of exploded ordnance as well as pieces of sensitized ordnance were scattered over a wide area. Some of the rounds exploded on contact, some minutes or hours later; it was always an uncertain matter upon encountering one of these objects. Some ordnance, such as the 40mm HE rounds of the M-79 are armed after rotating 14 times, and must be carefully picked up without rotating or jarring the round and laid down the same way. The eastern area of the combat base was so strewn with unexploded and exploded ordnance and fragments, there wasn't an area of a six-inch square that didn't contain something—from large 155mm rounds to small pieces of fleshettes from the BEEHIVE round or small cylindrical metal pieces from the canister 90mm rounds.[170]

Staff Sergeant Gus Alvarado, Jr., a Platoon Sergeant of B/1/26, constantly exposed himself to the shrapnel while attempting to clear away the pieces of unexploded ordnance and moved through the lines to ensure his men were observing and remaining alert for a possible ground assault. While doing this, SSGT Alvarado was constantly being knocked down by concussions of exploding ordnance, and was wounded in his knee by shrapnel, but he continued his care for his men and concern for the safety of all.[171]

There were, of course, many others who disregarded their own safety amid the shower or ordnance pieces that covered the area, the trenches, the tops of firing positions and bunkers, like hailstones of fiery metal.

LCPL Kenneth William Claire, a squad leader in Lt Jacques' platoon– the one who screamed Tarzan calls while on the hills, ignored the heavy volume of fire and continuously moved along his unit's trench line from one position to another, encouraging his men and assisting in the treatment of casualties. On numerous occasions, he disregarded his own safety and fearlessly removed unexploded artillery and mortar rounds from his company's trench line, carrying them to positions where they presented little danger to his men. He was telling his men, 'Don't be in the trench like sissies—with your face down; they're probably coming to overrun us!'[172]

James Kirk was probably one of the first casualties of the attack on the combat base. His bunker directly faced the ammunition dump; he lost his right leg, a traumatic amputation. Corporal Ken Claire suddenly appeared as Kirk was screaming—not from the pain, but knowing something very bad had just happened. Claire had Doc Cicala patch him up, and then fetched two 'Remington Raider' types (0414 clerks) to carry him to the medical facilities. They were scared and at first reluctant, perhaps in shock, but Cpl Claire screamed at them, and they carried Kirk to the medical area. Despite his 'hard' and atavistic exterior, Ken Claire cared deeply for his men. Kirk was probably the oldest man there at 19; most every other Marine had just turned 18.[173]

During this time, a Listening Post was returning. PFC Tretiakoff fell and became hung-up on the defensive barbed wire as he was returning through the gate. LCPL Claire immediately dashed from his covered position and fearlessly ran across thirty meters of fire-swept terrain to bring PFC Tretiakoff back to the safety of the trench line despite the air being filled with a large volume of streaking pieces of shrapnel.[174]

SSGT George McClelland, a Platoon Sergeant in B/1/26, was another leader who cared for his men's safety. He also completely disregarded his own safety and unhesitatingly moved into the open area to remove unexploded and partially burned-off rounds to a safe area, while also encouraging his men and alerting them to the possibility of a ground assault.[175]

Cpl James W. Chance, an Antitank Assault Section Leader of B/1/26, immediately picked up an unexploded 155mm artillery round that had flown from the exploding ammunition dump and landed inside the B/1/26 Command Post bunker. Ignoring the danger of possible explosion, he carried it outside the emplacement. Later, a 105mm artillery round landed inside the CP. Again he disregarded his own safety and fearlessly removed the ordnance from the command bunker. He also aided a Marine who had no gas mask.[176]

[118] BSM file on Cpl James W. Chance.

PFC John F. West was in the Fire Direction Center/CP bunker. The air was filled with ordnance fragments of all kinds, from 155mm rounds to small arms glowing hot and quite frequently exploding in the immediate area. On three different occasions he completely disregarded his own safety and extinguished fires from the exploding rounds. On another occasion, he left the bunker to remove a burning illumination round from the entrance of the FDC/CP bunker. When communications from the FDC/CP were knocked out, PFC West was one of three Marines who crawled from gun pit to gun pit to relay elevation and deflection information to enable the guns to continue accurate counter-mortar fired.[177]

Second Platoon of Co B/1/26, manning the eastern-most portion of the base perimeter, bore the brunt of the exploding ASP [Ammunition Supply Point]. And it was, indeed, a 'venomous' asp sting as explosions from the ammo dump continued showering ordnance for some five hours. The command post of Co B and the command post of 2nd Platoon were located within thirty meters of the ASP #1, and during the dark early morning hours of 21 January, Capt Pipes displaced his CP three times because the exploding ammunition made his position untenable.[178]

1/Lt John William Dillon, Platoon Commander of B-2, moved about his position despite the hail of razor-sharp, white-hot splinters of shrapnel metal and exploding ordnance that filled the air and covered the ground. The Marines of Second Platoon held their position throughout the entire ordeal:

> ..men were hit in the legs, body and head with unexploded 155, 105, 106, 81 mortars, 3.5 rockets, etc., that were blown out of the dump. All the while, CS gas was so heavy that even gas masks were marginally effective. Through all of this hell, the Second Platoon remained in position .. and retained the ability to fire the FPL[179]

The 60mm mortar crew, only fifteen meters from the dump, had to move their position with their mortar tube and seek cover in a nearby trench. When the Marines received a fire mission a few moments later, they were unable to fire due to a lack of ammunition at their new position. 2/Lt Dillon instantly and unhesitatingly left his covered position, and along with two other Marines, PFC Charles D. Bowers and LCPL Robert J. McDonald, III, exposed himself to the intense fire, fearlessly ran 25 meters across the hazardous area to the platoon's ammo bunker. Although knocked down and wounded by the exploding ordnance, he continued his determined efforts and reached the bunker. Ignoring his painful injuries and the enemy rounds impacting around him, he picked up several rounds of 60mm mortar ammo and carried them to the crew.

One of the Marines of the Co B/1/26 60mm mortar squad, Edward I. Prendergast, Jr., recalls the attack:

> One of the rockets hit right behind us and started secondary explosions galore. Never had I felt the ground shake or heard so much metal fly by. After about 15 minutes of praying and shitting we moved forward into 2nd Platoon's trench line. Lt Dillon advised me that he had a L.P. and an ambush out in front of our position. We had to keep our heads down with all the explosions and I thought for sure they would attack any second with all the confusion. Hot rounds were landing in the trenches. They were whole artillery and 105 rounds still glowing red. We took our shirts off and from both sides of the round we picked them up and threw them from the trench. This went on for hours, everyone protecting everyone else.[180]

A bunker containing two Marines from the ONTOS received a direct hit and they emerged from their bunker in a state of shock. One of the Marines ran between the double strands of wire and came under fire from friendly lines. 2/Lt Dillon, with complete disregard for his personal safety, dashed from the cover of the trench line through 35 meters of heavy shrapnel, knocked down several times as he ran, to lead the Marine to the safety of the trench.[181]

Cpl John R. Taylor, Right Guide for Second Platoon, B/1/26, was told by 2/Lt Dillon "..to move up and down the trench and make sure we were connected up, make sure nobody got excited and got up, make sure everybody was down, keep people up watching for the sappers coming in to us if they were to come, which they didn't.."

The Marines were, of course, completely alert to the dangers, as Cpl Hightower, a Squad Leader in Second Platoon, put it: "..we just always on the alert and everything, expecting anything at any time, cause you never know what's going on."

Capt Pipes described his Marines that early morning, most of whom were newly-arrived in Vietnam:

> The men: I just can't say enough about them. They stayed in their positions. In certain areas of the lines, ordnance was within the trench-line one to three foot deep, and the men stayed in their positions, manned their guns, the 60 mortar crews continued to fire at predestinated defensive fires, and actually in all truthfulness, the sway the kids

[181] BSM file on 1/Lt John William Dillon

worked and continued to operate throughout the last three weeks or so is enough to bring tears to your eyes; they're really a great bunch of young men.[182]

The 81mm platoon in its entirety was also located near the dump, but continued to return counter-mortar fire throughout the attack. On three occasions the 81mm Fire Direction Center was hit and partially destroyed by the exploding ammunition dump and enemy fire. All lights and communications were knocked out as a result of the murderous incoming fire and exploding ammunition from the dump.

Gunnery Sergeant James Allen Morris, the Assistant Platoon Commander of the 81mm Mortar platoon, 1/26, was twice blown from his position at the plotting board in the FDC, but paying little or no attention, he returned to the board and coordinated, plotted, and fired up to three combat missions at a time, enabling his platoon to suppress murderous incoming 82mm and 60mm mortar fire. On his knees with a candle for light, his calm determined professional bearing inspired and encouraged all in the FDC. In a calm, methodic and inspiring manner, he organized a system of messengers to carry missions to the guns, employed a damage control team to continue to plot and clear missions and direct extremely accurate counter-mortar fire, and offered encouragement and guidance to the mortar crewmen. Capt Kenneth pipes observed him move from position to position during the heavy enemy barrages to offer encouragement, provide guidance, and calm the Marines.[183]

An Artillery Forward Observer with B/1/26, "Hank" [1/Lt Marion Henry] Norman, departed the relative safety of his CP bunker and attempted to detect the enemy firing sites. Although knocked to the ground on several occasions by the concussions from the enemy rounds exploding nearby, he repeatedly made skillful crater analyses and relayed the information to the firing batteries. Electing to remain in his exposed position, and disregarding the exploding main ammunition supply point less than fifty meters away, he courageously directed and adjusted counter-fire against the enemy firing sites until all the hostile weapons positions that he could locate were silenced.[184]

*

The rest of the combat base was now, suddenly [185] a shambles.

COL Lownds walked around the base to make a personal assessment of the damage even as rounds were still cooking off.[186] What he saw was grim. The airstrip TACAN was down (although it was repaired later in the day), one UH-1E was destroyed; two more were damaged. Two CH-46s (ET31 and ET41) received substantial damage, ET31 being struck by a rocket from the UH-1E that had received the direct hit. The rocket passed through the aircraft, below and through both engines, but did not detonate. One H-34 was damaged. One CH-53 was damaged. All MACTU-62 living spaces were destroyed.[187] All the weather equipment at KSCB was destroyed.[188] A flavor of the situation is reflected in a telephone conversation: "A pilot from MAG-36 attempted to get into Hill 881 and could not because they were under mortar attack. Went to Khe Sanh. The tower was inoperative. No navigation aids. The field was heavily cratered. The only radio contact he could make was with CommO 26th Mar."[189]

Approximately 15% of all CBMU-301 equipment received minor damage; one grader received extensive damage. The hooch containing most of the Seabee special services gear and most of the clothing and personal gear of the First Squad received a direct hit and burned to the ground, destroying all contents.[190]

Almost everything that was above-ground from the communications section was devastated. Like the rest of the base's defenders, Maj John A. Shepherd's comm section Marines were in desperate need of bunkering materials which were, by now, as precious as gold. Only a few days earlier on Thursday, 18 January, one man was injured when a telephone pole, fashioned from 155 mm canisters, broke at the factory weld. (The "specs" for these containers evidently did not include their suitability for usage as telephone poles!) Everyone on the base complains at the lack of materials so we can adequately protect ourselves; many claim the Corps values equipment more than persons, and perpetuates itself by turning money back to Congress saying it can get the job done more cost-effectively than the Army. The result is always dead and injured Marines.[191]

[191] Author's Diary entry, 18Jan68.

"It's not only my section, but the whole base was not getting the bunkering material and the logistic support required to harden this base. Therefore the initial attack on the base by artillery and rockets did a great amount of damage to my communication lines within the base."[192]

"The majority of all wire lines were destroyed, and it became fearfully realized that the regimental comm center, a log-constructed bunker with a small amount of perforated air matting and sand bags for overhead, was a risk to life and equipment. Nobody wanted to go in there to work. It was not safe. Maj Shepherd requested four large CONEX boxes which were received in early February. Up to that point, the communications personnel worked in grossly inadequate bunkers.[193]

Project TIGERHOUND evacuated KSCB on 21 January under the supervision of Maj Milton Hartentower, site commander (01-21Jan68).[194] Majs Hartentower and Richard Keskinen remained at Khe Sanh after the evacuation to function as Air Liaison Officer to the 26th Marine Regiment.[195]

Another casualty was the club system. Col Wilkinson was one of those who cared deeply for his men. It was in his eyes; anyone could see it. And it was in his actions, even to the remaining beer stock:

> ..we did have some beer up there on January 21st, and what Colonel Wilkinson did was to condemn it all, put it in a secured area, put a guard around it, and issued out the cans at one can peer man every other day. And as I recall, up until the time I left in mid-February, we were still getting that one can of beer every other day and it was certainly great for our morale.
>
> This of course contrasts sharply with what the Air Force had been doing up there. On January 1st, just before the Siege began they had gotten caught I believe by Colonel Lownds himself, selling liquor to the Marines at $65.00 a bottle, that being one's Combat Pay. But the Air Force did leave pretty early in the siege. We didn't know that they had left till one morning I was going about my rounds checking the welfare of everyone in that Command :Post area, and when a rocket came in the nearest place to hide was the Air Force bunker. The Air Force, of course, had built wonderful bunkers up there .. which far exceeded anything the Marines had. When I went inside I found that they had all gone. They'd left. I went back and reported this to Colonel Wilkinson, and eventually the Regiment took it over for use as a medical facility.[196]

*

Battery C, 1/13, located at XD 85184154, within 200 meters of the ASP #1, received such damage that three of its howitzers were temporarily displaced to the Battery A position.[197]

Sunny, clear skies enabled massive air support. Marine fixed wing pilots flew 72 attack sorties in support of troops at Khe Sanh,[198] and helicopters of HMM-362 medically evacuated 44 wounded.[199] Airstrikes began in full force about 0900H on the 21st. They were as spectacular to the Marines on the Combat Base as a 4th of July Fireworks, especially the bright orange plumes of napalm in close-in strikes and the white spikes of white phosphorus bombs exploding just outside the wires.

Maj Darrell L. Guttormson, Operations Officer of VMA-311, Lt John Hawkins and Col Leonard from the Wing, scram bled from the Chu Lai hot pad about 0900H and initially were assigned to proceed to the Channel 69 Hue/Phu Bai area. Two of the three aircraft were carrying ten DELTA-ONE bombs (250-pound snake-eye bombs); the other aircraft was carrying DELTA-NINEs (500-pound napalm bombs).

After checking in with PLUTOCRAT TWO and waiting for a TACA to direct the flights in on the area, PLUTOCRAT TWO informed them of a priority mission in the "ONE ZERO NINE TACAN RADIAL TWO FOUR ZERO AT ABOUT 24 MILES" AREA—Khe Sanh. The Khe Sanh TACAN, Channel 85, was down, and as the three jets arrived at Khe Sanh they were met by FINGERPRINT FI VE THREE. "We were the first flight in that day, and in the words of FINGERPRINT FIVE THREE, he had Gooks all over the place."

While approaching the area they were given the general pre-strike brief: run and heading, target elevation, friendly situation. The strike was an area just south of the Khe Sanh Village.

---

[192] Comments of Maj John A. Shepherd, Tape #2521.
[193] *Ibid.*
[194] Although the three O2A aircraft and one O-1 aircraft received battle damage on 21 January, they were successfully evacuated by Capts Joseph Johnson, Griffith Scarborough, and 1/Lt Barton Switzer.
[195] "History of 20th Tactical Air Support Squadron, Jan-Mar68," Tab T, 20th TASS, in Vol. II, Quarterly History, 504th TASG, Jan-Mar68, App 6, p. 29
[196] Taped comments of Mr. John M. Kaheny to the author, 30Nov86
[197] 1/13 ComdC Jan68, Encl (1) p. 7
[198] FMFPAC 230411Z/Jan68, SITREP #1029
[199] HMM-362 ComdC Jan68, Encl (1) p. 4

The air support mission assigned to FMA-311 continued through the night with TPQ-10 strikes and secured 0200H on the 22nd, with every pilot of FMA-211 flying at least two missions that day at Khe Sanh, for a total of 54 sorties. The intensity of the commitment meant that some of the Group pilots assisted in order to meet the TPQ-10 night flight requirements. Such support involved not only the striking and bombing aircraft themselves, however:

> A word should be said about the ground personnel of 311. There were people loading bombs who were normally office workers and office 'Pinkies, I guess you'd call them, but when the missions came and the requirement was there, these people were grabbing—I'd see two people grabbing a 250-pound bomb and load it on the aircraft as they were being refueled, thus giving a rapid turn-around of our aircraft. The entire officer and enlisted members of 311 turned-to in this manner.[200]

Maj Guttormson participated in another airstrike on the 21st, an "acetone delivery" of DELTA-29s (1,000-pound semi-armor piercing bomb with a chemical fuse).

> To do this we dropped the centerline tank from the A-4s, a procedure which normally requires 24 hours notice in order to deliver chemical fuse bombs, however, 311 did this operation within 30 minutes. We dropped the centerline tanks which were fully loaded. Loaded 1000-pound bombs on Stations 2, 3, and 4 of the forward aircraft. After the aircraft were started, the bombs were fused. The flight up to the Khe Sanh area with this ordnance load necessitated climbing to a high altitude due to the fact that we did not have the centerline tanks, and upon reaching the target area, we had to request priority over the other flights that were in the area in order to deliver our ordnance and exit the area as quickly as possible in order to get back with just internal fuel ... We delivered the six 1000-pound bombs and two runs each aircraft and depositing them on this hill which the FAC had indicated was honey-combed with bunkers and automatic weapons. These chemical fuses were set for a variety of time limits between 12 and 36 h ours. These were delivered in the afternoon of the 21st approximately 1500.[201]

Capt Ronald M. D'Amora (VMFAW-533) recalls the evening TPQ strikes as a wild mêlée up in the air, with about three F-4, two A-6, and three A-4 aircraft, all in the pattern at the same time, with everybody running in, dropping their ordnance. BDA was over 100 confirmed North Vietnamese Army soldiers killed. "When we got back over here to Chu Lai we found it was pretty good killing 100 North Vietnamese Army troops, and I guess it was some kind of record for the Group. Capt Greenwald and myself felt pretty good about it, and we're really happy we can help the troops down there at Khe Sanh."[202]

At 1545H, an A4D "Skyhawk" (WL-4), callsign "HELLBORNE 519-1," was hit by small arms during a strafing run at XD 819408 and crashed. Capt Bobby G. Downing safely ejected and, while his wingman attempted to ward off the advancing enemy troops, was safely rescued by a UH-1E helicopter ten minutes after his ejection. His was the 225th plane lost to enemy action in South Viet Nam.[203]

The defensive posture on the ground at Khe Sanh was tenuous at best. Although there were under 6,000 men at Khe Sanh, this included the manning of the hill outposts. There were far less than that number on the combat base itself. Battalion 1/26 held about 80% of the perimeter with less than three rifle companies. H&S/1/26, commanded by 1/Lt Ross A. Brown, manned a portion of the perimeter as well as internal security posts. Co C/1/26 (CP at XD 849419) manned the perimeter north of the airstrip, the BLUE Sector, and Co B/1/26 (CP at XD 849415) manned the perimeter east and south of the combat base, the GRAY and GRAY-ALFA Sectors, until they tied in with the FOB-3 perimeter. The western perimeter, the RED Sector, was manned by Co L/3/26 (XD 835420).

The base perimeter did not extend around the eastern end of the runway. There was a 60-ft. gap, the width of the runway, between the lines manned by C/1/26 and B/1/26. Each night, the Marines of 1/26 rigged a new type of barbed wire called "German tape" across this gap. German tape contained razor sharp pieces of metal which made it difficult to breach. In addition, two ONTOS, each loaded with BEEHIVE rounds, covered the eastern end of the runway. Inside the KSCB, HQ 26th Marines CP was at XD 849417, Co A/1/26 at XD 849415, and Co D/1/26 at XD 848416.

The outposts were manned as follows: Hill 558 complex was manned by 2/26 (CP at XD 820451) and its companies F/2/26 (XD 820450), G/2/26 (CP at XD 822441), and H/2/26 (CP at XD 823445). Hill 861-A (XD 805445) was manned by Co E/2/26. Hill 861 (XD 803443) was manned by Co K/3/26 reinforced with two platoons of Co A/1/26 and two 4.2" mortars of W/1/13. Hill 881S (XD 777438) was manned by Co I/3/26 and two platoons of Co M/3/26 (the latter on the on

Downing, Tape #2836; FMAW 211610H/Jan68, Resume of Telephone Call, in III MAF COC J&F 21/22Jan68 #165; Aircraft Mishap in III MAF COC J&F 21/22Jan68 #179; NY *Times* 22Jan68 p. 1; "Bombs Pound Enemy Force," III MAF: *Sea Tiger* 4:5 (02Feb68) 1; 26MAR 211540/Jan68, OPN SCOTLAND SITREP #327

the western finger of 881S), plus three 105 mm howitzers of C/1/13. Hill 950 (XD 844456) was manned by Second Platoon of Co A/1/26.

With the arrival of Battery B, 1/13, during the afternoon (OPCON 26MAR at 1800H), friendly fire support consisted of 46 artillery pieces. Battalion 1/13, in direct support, was composed of three 105 mm howitzer batteries (A, B, and C, 1/13) for a total of 18 tubes (range: 11,000 meters), one 4.2-inch mortar battery (W/1/123) of 6 tubes (range: 6,000 meters), and one Provisional Battery ("P" Battery) of 155 mm towed howitzers of 6 tubes (range: 15,000 meters). In addition, general support was provided by 16 175 mm guns of the U. S. Army's 2nd Battalion, 94th Artillery (12 at Camp Carroll, 4 at Thon Son Lam (the "Rock Pile"), range: 32,800 meters). There were also five 90 mm tanks, two ONTOS Platoons (10 vehicles) and with additional single 106s, a total of 92 106 mm recoilless rifles.[204]

Headquarters Battery and Battery A, 1/13, was located at XD 844418; Batteries B and C, 1/13 were located at XD 852416; W/1/13 was located at XD 846416; and First Provisional 155 Howitzer Battery, 3/12, was located at XDF 841418.

*

It is not easy to approach the darkness of the approaching night. Everyone realized just how very vulnerable we were just at this point—our ammunition stocks virtually destroyed, artillery badly damaged, bunkers grossly inadequate, communications lines down. We all know that if the hoards of thousands and thousands of enemy troops assaulted us now the fight would indeed by bloody, but we would hold: "In the early stages of the battle we fully expected a major ground attack at KSC B. There was no serious doubt that we could stop anything the NVA could try. I realized that if the enemy wanted to pay a severe toll he could mount a human wave assault along one or more parts of the perimeter, but that with the vast fire support available to us, coupled with the magnificent young men of my command, KSCB would not fall."[205]

At 1345H, BLACKBUD (1/26) radioed all his companies: "Ensure all troops are prepared for a long night ground attack is possible at any time."[206]

As of 1830H, KSCB, Hill 881S, Hill 861, and CAC in Khe Sanh Village were all receiving sporadic mortar and sniper fire. At 1930H, 3/26 in the KSCB RED Sector (XD 838417) received one incoming mortar round. The Marines returned mortar fire resulting in two secondary explosions.[207]

Col Lownds, INTRIGUE-6 ACTUAL, sent a message that from 1935 to 2035H, enemy soldiers were attempting to reconnoiter the wire of the south side of the combat base. During this period, the mortar fire on the combat base ceased.[208]

At 2109H, enemy units attempted to penetrate the wire in the western portion of the combat base perimeter. Co L/3/26, assigned to that portion of the perimeter, killed at least 25 NVA soldiers before the enemy unit withdrew. Additional light probes of the wire during the night cost the enemy soldiers another 14 killed.[209]

As nightfall approached, so did an emergency resupply mission. The USAF 311th Squadron at DaNang was advised of the "Tactical Emergency" request for ammunition, and in the late afternoon of 21 January directed six C-123 aircraft from other missions and loaded them with ammunition at DaNang.[210]

At twilight, the base shrouded by low clouds, only 1,800 feet of the 3,900-foot long airstrip usable and all the airstrip landing lights destroyed by the incoming, six sorties of C-123 Provider aircraft from the 834th Air Division's 315th Air Commando Wing (315 ACW) delivered nearly 26 tons (52,000 pounds) of ammunition to Khe Sanh.[211]

> As the Providers started on final approaches, they encountered intense .30 and .50 caliber ground fire from the high ridges, and on landing mortar rounds followed them down the already potholed runway. Pilots landed their aircraft and took off again by the light of Marine artillery flares as the six mission sorties went into Khe Sanh where they delivered ammunition critically needed for the camp's night defense.[212]

The Khe Sanh runway was the mouth trough which Khe Sanh defenders breathed and ate. It was essential for its life. Later on air-drops could supply most supplies, but the airstrip remained essential for landing replacement personnel, evacuating the dead and wounded, landing mail, certain sensitive munitions, and medical and surgical supplies.

[212] *Ibid.*, pp. 5-6.

The latter was especially apparent during the night of 21 January. III MAF G-3 (air) requested First Marine Air Wing (FMAW) to provide a helo life of 8500 pounds of whole blood for FLC to Khe Sanh. At 2200H the evening of 21 January 1968, Capt Frank James Kennedy and his co-pilot, 1/Lt Paul H. Ellis, departed Marble Mountain, DaNang, on DIMMER 9-0 (a CH-53 aircraft), on mission" LUMINOUS 51," to transport a load of whole blood, morphine, and other medically essential items to Khe Sanh.

Two CH-53 helicopters were dispatched to LZ-23, arriving approximately 2200H. One aircraft was loaded with the blood, the other with medical supplies. Due to existing weather at Khe Sanh (1/4-mi visibility and fog), the aircraft loaded with the medical supplies returned to FMAW, and DIMMER 9-0, carrying the whole blood, diverted to Quang Tri as advised by the HDC.[213]

Enroute Khe Sanh, they were informed by the DASC, PLUTOCRAT 2, that weather at Khe Sanh was below IFR approach minimums, and they were to proceed to Quang Tri and wait for a break in the weather.

On touchdown, after a GCA into Quang Tri, they discovered that no facilities were on hand in which to store the precious cargo of whole blood. Because it was imperative that the perishable cargo reach its destination unspoiled, they departed Quang Tri rather than wait for the weather to break.

The Hue Approach Control was contacted and Capt Kennedy received clearance direct to Khe Sanh VFR on top. They were unable to receive navigational information—a positive lock-on with the TACAN—from either Dong Ha or Phu Bai, and only intermittent lock-on with the Quang Tri TACAN, forcing him to navigate by dead reckoning above a thick cloud layer that obscured the hazardous terrain features.

When he arrived at Khe Sanh, repeated attempts were made on VHF and FM to contact ground personnel. Eventually contact was made. The Khe Sanh tower operator stated that due to bad weather and the fact they had been under attack by enemy mortar fire throughout the evening, the medical supplies were not expected until the following day.

The GCA controller vectored an initial approach fix, but at GCA minimums, Capt Kennedy still didn't have the field in sight, so he requested and was cleared for an extended low approach down the runway in an effort to break out of the cloud cover. This proved futile, and Capt Kennedy executed a missed approach and climbed to VFR on top.

Realizing that low fuel state would permit only one m ore approach, Capt Kennedy conferred with the tower and GCA operations and established a system where the tower operator would notify the GCA controller when a break in the clouds was approaching. The GCA controller gave the CH-53 step-down altitudes to set them up for the approach.

There was no break over the field, but there appeared to be a clear area off their starboard side. Under radar surveillance, Capt Kennedy flew to the area, identified their position, and advised the tower to stand by with an Aldis Lamp to orient them over the field. Using an auto-rotating approach with a 270-degree spiral, they descended beneath the cloud layer and broke out over the perimeter of the base. Landing was approximately 0130H. The tower operator then flashed a green signal from the Aldis Lamp which was the plane's only ground reference.

The cargo was off-loaded, and as they taxied to the runway to take-off, there was a bright flash in front of the plane. "It looked like they were walking rockets right into our cockpit. They hit all around us. We got out safely, to return to Marble Mountain."

Through persistent, untiring effort and unflinching diligence, Capt Kennedy was able to deliver his valuable cargo.[214]

*

PFC Jeff Culpepper (B-3/1/26, 2367117, WIA 13 Feb & 30 Mar) managed to find enough light, time, and presence of mind, to write the following letter home tonight:

> The Day after
>
> On Jan 21 at 5:00 AM I became a man. It all started on the 20th when we had B-52 air strikes about 7000 meters away. One NVA didn't like the idea so he gave himself up. He told the Colonel that they knew where everything was, 2 artillery batteries, the air strip, etc., and that we would get hit at dawn. We did! At 5:00 I woke up to rockets coming in. Mom I swear I have never heard anything so spine tingling as those rockets. We took off into the trench and there we sat for about 4 hours. They dropped mortars & rockets in for about 2 hours straight and they were hitting about 100 – 200 meters behind me in the ammo dump. About 9000 rounds in the dump! Also all around us. I laid face down shaking for about half an hour. Then we had to get up and watch to see if they were crawling to the wire. There is about 1 million pieces of shrapnel flying around., big, small, hot, etc. By the grace of God & a small miracle all I got was a few buns. Pieces were sticking in the trench all around me. A buddy of mine had his foot blown off. Another hit in the foot also. A couple others were burned with white phosphorus.

---

[213] Helicopter Direction Center

[214] DFC file on Capt Frank James Kennedy; "Copter's Blood Run Draws Rocket Fire," III MAF: *Sea Tiger* 4:6 (09Feb68) 7

The CP tent took a direct hit. And the Company radioman was killed. Two guys from 2 Plt got hit with dud mortar rounds. That afternoon I went around Khe Sanh. It has been leveled. Everything destroyed. The ammo dump kept us down for 2 hours. We got gas from our rounds white phos-smoke etc. Then the sun came up at about 7 o'clock but we couldn't see because of the smoke.. Yesterday I was going after C-rations and I went by Graves Registration 3 dead Marines lying outside. Bloody & mangled. Something I'll never forget. Then while I was carrying C's they drop in more mortars. Gas! I almost choked to death. They also shot down a phantom jet right outside our perimeter. The pilot parachuted out. Last night I went on a LP outside the wire. Never again they'll have to drag me. Last night B-52 strikes almost wiped out a battalion of them. They would have hit us last night. But we messed them up. So now all we do is wait. B-52's and jets are in the air constantly. They want Khe Sanh by the 29th. So they started early. They have a Division out there. The odds are 4 NVA to 7 Marines but we like it that way. They are going to have a battle on their hands. No shit. I am ready. The Lord is with me. Just pray. If he saw me through the mortars he'll see me through all the way. I am seriously thinking about the seminary now! I'll write when I can but there is a war going on now. Jeff.

Casualties for 21 JAN: 15 USMC KIA and 55 wounded. The enemy lost 262 killed including 106 killed by Marine airstrikes[215] At 2259, L/3/26 manning the RED Sector of KSCB, observed an unknown size enemy unit outside their wire. The Marines fired, killing 25 NVA soldiers.[216]

Hill 881S was generally untouched on the 21st, probably because their patrolling had confused the enemy forces assembled on 881N. Capt Dabney later opined: "I believe that the Co I recon-in-force to 881 North on the 20th ran into the NVA battalion that was designed to attack us that night. We could not destroy it, but we found and fixed it in the subsequent fire fight and hit it with supporting arms. Although we may not have decimated the battalion, we probably discouraged it."[217]

Hill 881S did not escape some enemy activity. At 1300H, Co M/3/26, manning the western finger of 881S, received sniper rounds and reported some flashes coming from XD 770447. At 1345H, Co I/3/26 received small arms sniper fire from XD 770447 (Lang Ru'on, one of the proposed sites for the Project DYEMARKER Strong Point Obstacle System, SPOS). No further sniper fire was received from this position after fixed wing strikes were un on it. At 1400H, Co I/3/26 received two rounds 82 mm mortar fire from the south at a range of 2000 to 2500 meters, beloved to be bracketing rounds.[218]

As the evening began, at 1930H, Co I/3/26 reported heavy movement to their north and were preparing for an anticipated attack against their position on 881S. Nothing materialized. At 2259H, Co I/3/26 received mortar fire, and at 2330H, received one enemy illumination round over their position.[219]

The hill outposts were vital to the defense of the KSCB. "Not only did the Marine units on those summits deny the North Vietnamese a vantage point from which to fire down the throats of the base defenders, they also served as the eyes for the rest of the regiment .. situated on the valley floor .. relatively blind to enemy activity."[220]

Two days later, 23 January, along with ammunition, 4,000 pounds of body bags were flown into Khe Sanh Combat Base.[221] 200,000 pounds of ordnance were flown into Khe Sanh on 23 January. News accounts emphasize that at Khe Sanh, we are now facing "the largest and best-equipped military force that North Vietnam has ever concentrated on a single battleground."[222]

N-DAY

N-Day (the equivalent of our D-Day) for the launch of the siege of Khe Sanh, was advanced from the end of January to 21 January by Colonel General Van Tien Dung during a meeting of the Current Affairs Committee of the Central Military party Committee. The attack "..must lure enemy forces [i.e., American and South Vietnamese] out to Route 9 before the moment that all of South Vietnam launched the wave of large operations in order to create conditions that would enable our other

battlefields to launch the general offensive-general insurrection."[223] Further, "..it would not be good for the overall plan if the Route 9-Northern Quang Tri Front were to delay launching its wave of operations because the Route 9-Northern Quang Tri Front's goal was not just to annihilate a portion of the enemy forces currently in the area and pin the rest down; the Front also had to lure more American and puppet forces out to Route 9 and pin them down there."[224]

This sudden advance of N-Day, however, resulted in a frenzied transportation effort by the NVA.[225] "At the start of the supply movement units did not all begin at the same point in time and there was a difference in the starting points/time of two to three days. Furthermore, the units involved in transportation [support] were only involved until 15 January 1968 when they had to stop in order to deploy for combat. Therefore the quantity of materiel which remained on the round-trip segments amounted to 121 tons [that had not been moved completely]."[226]

The PAVN official history of the Khe Sanh battle notes as one of the lessons learned from a failure:

> First, there was insufficient time to prepare the battlefield, and therefore many forces could not be employed, particularly many combat support forces, such as there being no need for the mechanized vehicles; there was no reserve ammunition, and for these reasons even if one had wanted to concentrate forces, it could not have been accomplished.[227]

This history notes that one of the objectives of the attack was to draw-in forces, particularly to western Highway 9, in order to create favorable conditions for attacks elsewhere, and create conditions for other battlefields to attack the cities at the beginning of February, 1968, particularly in the coordinated combined combat in the Hue Front during Phase 1.

> The high point of the Tet 1968 was the General Offensive and Uprising but it wasn't until April, 1968, that the enemy finally sent forces to relieve Khe Sanh.
>
> The reasons for the slowness drawing the enemy out to Khe Sanh was that we had made note of the enemy's old practices, but had not seen their new method of operations. We continued to believe that: wherever our main forces appeared, the enemy would move in, in response immediately into that area such as during 1965-1966 and early 1967. Therefore, our intention was to avoid large scale attacks conducting only some attacks on small positions, surrounding them, waiting for reinforcements to come, and then attacking the reinforcing forces.
>
> Our intentions were not appropriate to the objective situation at that period of time after the enemy had been defeated in two strategic counter-attacks that was no longer as fiery as before. Conversely, at this period of time, in order to send in forces in relief, they had to be more cautious. In particular after we had opened fire in the cities, it became increasingly difficult to draw the enemy out.
>
> From the developments on the Highway 9-Khe Sanh battlefield and in the other campaigns we saw that: in order actively draw in enemy reinforcements we had to attack strongly to the point that the enemy sensed a dangerous condition so that if they did not send in reinforcements then those on site would be eliminated. Specifically during the Highway 9-Khe Sanh campaign if we had attacked continuously the positions on the perimeter and after that had encircled and laid siege to the base at Ta Con immediately then certainly the enemy would have sent in reinforcements early, responding earlier...[228]

The history notes, as a principle failure of their attack:

> The preparatory time was short at time that the tactical formation of that period of time had little tactical capability during a time of rapid preparation. ... During the Highway 9-Khe Sanh Campaign for many different reasons the divisions all had very little time to prepare. Therefore at the start of the campaign [p. 67] many units

attacked with few results. The 325th Division attacked at the correct time but was unsuccessful in its raid on Hill 832 [Hill 861 in American parlance].."[229]

Luring in forces was a well-known NVA tactic on all scales from wounding a man on patrol or a small recon team, but not killing them, in order to kill the larger amount of those who came to rescue. Indeed, an appreciation of this tactic avoided disastrous results in the sending of a relief force to assist the Huong Hoa District Headquarters and CAC OSCAR in Khe Sanh Village on 21 January 1968 as well as those trapped at Lang Vei when the NVA attacked with tanks on 07 February 1968. It was one of the chief considerations in not sending a reinforcing unit to the platoon on 25 February 1968 and perhaps also the reason for General Rathvon McClure Tompkins' directive against any patrols beyond close-in wire checks.

*

KHE SANH VILLAGE

When the District Headquarters for Huong Hoa Province in Khe Sanh village (which also contained the CO and a platoon of CAC OSCAR), was attacked on 21 January (along with Hill 861, Recon Team NURSE, and Khe Sanh Combat Base), a decision to reinforce that position with "D" Company, 1/26, was made, which departed Khe Sanh Combat Base around 1100H. Helicopters had previously attempted to reinforce the outpost, but received too much small arms fire. As DELTA Company approached, Captain Stamper, the CO of CAC OSCAR[230], got on BLACKBUD DELTA's PUSH[231] warning that it appeared that every house contained a bunker inside, that every bunker was manned by NVA, and that the reinforcing unit should exercise extreme caution, but that when they arrived, the Marines of CAC OSCAR would help them inside the perimeter and suggested they man the perimeter.[232] As a result, INTRIGUE[233] reported that D/1/26 could not pursue their rescue attempt at this time. . LtCol James B. Wilkinson had, with Col. Lownds' approval, recalled them.

> Regiment told me to send a company down into the village. It was Lieutenant [Walt] Chapman because he was the company that was not in the perimeter. He got up on the high ground [of Hill 471] and had a Vietnamese scout with him. They checked out the village and detected heavy VC in the village. At that time I immediately halted him where he was. I said, 'Don't go; don't pursue.' I contacted Colonel Lownds and said, 'Col Lownds, I recommend that we not send Lt. Chapman and his company any further than they are. I feel it's a trap in waiting and I don't feel it would be militarily wise to do that. He agreed, and we brought them back—probably saved the company.[234]

PFC Sidonio Patricio ["fish"] recalls: "We could see the air-strikes coming down. Then we went over Hill 471 and through one of those little Bru villages there [ville Breh]. We went through there and right up into Khe Sanh. Just before we got [to the District compound] we got the word to get the hell out of there, and I mean we came back fast! Fast! There was a short guy who passed out due to heat exhaustion."[235]

The warning was very fortunate, for the NVA had formed an ambush to annihilate the rescuing force. Several days later, the JTAD Joint Technical Advisory Detachment] at Khe Sanh reported that the attack on the Huong Hoa District Headquarters was conducted by only a battalion, but that there were three regiments in ambush positions around the headquarters (and seat of loc al provincial civilian government). The report indicated that the NVA had left 270 dead bodies in their attack. At 1400, 23 January 1968, an estimated NVA battalion occupied the District Headquarters (about 300 men composed a NVA Bn) consisting of North Vietnamese and Nungs. The battalion was there as a decoy and the plan was to lure American troops to attempt to retake the District Headquarters. When the American forces are committed and have encircled the compound, the outlying North Vietnamese units would then encircle the American force and attempt to attain total and undisputed victory, thus preventing the reestablishment of Route 9 and forcing American forces back to the coastal area.[236]

LANG VEI:

Photo intelligence of 25 January and 06 February disclosed numerous foxholes and positions in the immediate area,[237] On 05 February, aerial recon detected an ambush point at XD 81603872 where Route 9 was piano-cut at several places.[238].

In addition, not all the NVA tanks attacked Lang Vei; some apparently took positions to ambush any relieving forces that might arrive by helicopter. In his FMFPAC Debrief, Colonel Lownds commented:

> ..if the intelligence reports were indeed correct, it would appear that the enemy had well anticipated that we might possibly reinforce the garrison at Lang Vei. He had troops positioned along the edges of Route 9, and it's interesting to note that after the tanks had finished their mission at Lang Vei, and as a matter of fact in one case a couple of tanks actually never did get into Lang Vei, but they went north and northeast of Lang Vei's position, and were actually as near as we can determine in a position that we had planned as our helicopter landing zones, so that he had in fact anticipated a relief force and had positioned himself where he could intercept not only ground relief force, but also a helicopter relief force.[239]

Aerial photo recon of 25 January 1968 disclosed 94 foxholes at XD847376, just off Route 9 near Simard's house, opposite the CAP O-2 position (possible an ambush position for forces attempting to reinforce Lang Vei).[240]

In the sequence of events leading to the fall of Lang Vei, at 0335, III MAF confirmed a C-130 to arrive at Khe Sanh with passengers, about 100 paratroopers of Special Forces personnel. At 0400H, a conference was called consisting of Col Smith of III MAF, Capt Edwards of USSF, and Maj Saimon. The Special Forces requested a relief force be dispatched to Lang Vei at first light. Gen. Tompkins, after due consideration of the situation , replied, "Negative." The condition of the runway at KSCB made landing of relief troops who might be dispatched to Lang Vei ill-advised. Furthermore, there were tanks running betsween KSCB and Lang Vei as well as large amounts of infantry (as detected by electronic sensors), and KSCB was receiving considerable incoming. At 0350H, Gen Thompkins and Col Smith, the G-3 Watch officer at III MAF, registered a complaint about the proposed employment of troops moving into the area since it would inhibit our supporting arms, and further, Gen Tompkins inquired, "How would the forces make their way to Lang Vei?" Gen Tompkins also registered a complaint with LtGen Cushman, CG of III MAF, who said he knew nothing of the C-130 plane load of USSF but would check. Tompkins felt the enemy was planning precisely for an attempted rescue and would ambush the route from Khe Sanh to Lang Vei. "General Tompkins had long planned a 'set piece defense,' not venturing out too far and falling into traps that the enemy may have set in the area, but force the enemy to come to us. His opinion was that it would be extremely un wise to mount any sort of move toward Lang Vei. General Cushman concurred that such a move would be exceedingly unwise, in fact, stupid."[241]

[240] 6470 Recon Tactical Squadron 270100Z/Jan68, Initial Photo Intelligence Report, in III MAF COC Journal and File, 27/28 Jan 1968 #120.

[241] Comments of BGen Carl W. Hoffman, HQMC Oral History Tape #2535, 3dMarDiv COC 071209Z/Feb68, Spot Rpt #78 in III MAF COC Journal and File, 07/08Feb68 #258. Gen Tompkins later defended his decision: "Why wasn't any column sent? (A) There were no troops and the base was under attack at the same time, and I(B) had the base not been under attack, I still wouldn't have sent a battalion to Lang Vei. Route 9 was completely held by the enemy–complete from Khe Sanh Village to the Laotian border. That was enemy territory. The hills to the north of Route 9 were completely held by the enemy." [Interview of MajGen Rathvon McC Tompkins, HQMC HistDiv, 13 April 1973, transcript p. 30. COL John J. Padley, the previous CO of 26th Marines at Khe Sanh [relieved by COL Davie E. Lownds at 0900, 12 August 1967] in his Debrief, noted: "..if we were to reinforce Lang Vei, naturally we'd reinforce it with troops. But we have to be very leery because the enemy knows we're going to defend that place and if they attack, their attack may be for us to come down the road so they can ambush us. We know that and are very aware of it. In fact, when they attacked that one night [04 May 1967], we did shoot artillery and there was no problem stopping it with artillery. The next day the word came through the grapevine: where were the Marines? Why didn't they reinforce? Most likely they wanted us to come down that route to ambush us. Maybe that's why they attacked Lang Vei, to try to have us come down that road. We'll think three times before we go and we got a lot of other alternate plans on how we'll go." [Comments of Col. J.J. Padley, HQMC Oral History Tape #1504].

500 METERS[242]

It was an understanding of these NVA tactics that led the CG, 3rd Marine Division, Major General Rathvon McClure Tompkins, who visited Khe Sanh almost daily during the entire siege and was therefore intimately aware of the situation, to issue an order that while patrols were to be conducted, their limit was to be determined by how far the patrol could maintain the capability to extricate itself from a contact. Generally, this was within line of sight of the friendly front lines where direct fire weapons could provide support.

> The far sightedness of this decision was brought to light in a diary recovered from a dead body following the attack by 1/9 on Hill 471 [on 01Apr68]. The writer was either a Company Commander or Political Officer of a company that participated in the battle of Khe Sanh Village. He frequently mentioned the company being deployed in ambush positions prior to and during the attack of Khe Sanh village and again at Lang Vei. The comment frequently included, 'Oh, when will they come out.' He indicated that the enemy expected the Marines to come out in mass and were laying in wait for such a move, particularly a reinforcement of Khe Sanh village or Lang Vei.[243]

Gen Tompkins knew what he was doing, even if the Marines on the base itself became intensely frustrated at not keeping the enemy free from their wires through patrolling:

> ...my whole plan for the defense of Khe Sanh was to make the enemy come to us. Now, General Westmoreland has been criticized .. and other people have criticized Saigon for tying the Marines at Khe Sanh to their perimeters. It wasn't Westmoreland; it was me. I told them 500 meters was the absolute max in any position, 500 meters, no more.[244]

Gen Tompkins feared patrols would become sucked into ambushes.[245] Furthermore, there was no need to send patrols; our intelligence was such that we knew where enemy forces were and there was no need to risk the piecemeal ambushing of small, exposed Marine patrols.[246]

> I planned, therefore, a set-piece type of defense that would require the enemy to come to us. The daily papers, I am glad to say, made much of the fact that we were locked into our positions and did not engage in patrolling, et cetera. I hope the enemy high command believed this because such was not the case.[247]

The enemy which had always been in the Khe Sanh area in small groups, a dispersed formation, a few here, a few there, now were attracted to the Combat Base like flypaper which attracted and fixed them and from which position they could be annihilated.

Of course, the Marines on the ground, men of action that they were, were not in favor of this policy. One young artillery officer commented:

> We had no idea what was out there. I would have felt much more secure—and this gets back to it being really a company commander's war. I hate to say it but a lot of the field grades weren't in touch with what was going on. We were having things like guys shot filling sand bags on the lines by sniper fire. All of that could have been precluded by aggressive combat patrols within a reasonable distance that we could support it with direct fire weapons from the base. And all of that tunnel-digging activity—it could have been effectively kyboshed. The order not to conduct patrols outside the base, I think, was absolute foolishness. The result was that the troops weren't given any opportunity to flex their muscles. They were stuck in those trench lines.[248]

[248] Comments of Mr. W. M. Smith to the author, 16Mar85.

JANUARY AND FEBRUARY, 1968

If the stated strategy of the North Vietnamese Army was to lure Americans to Khe Sanh and thereby weaken forces defending cities so that their troops would have advantage in attacking them, it is notable that American military staffs did not react in this way. Those at Khe Sanh did not reinforce the District Headquarters when it was attacked nor the Lang Vei Special Forces Camp. In both instances, NVA troops were in ambush positions for such reinforcement. Nor did the Generals reinforce Khe Sanh Combat Base or send troops along Route 9, also avoiding NVA ambushes.

On the contrary, one could well argue that the Americans lured the NVA to Khe Sanh and held them there like someone holding on to an electric wire that they cannot release which then kills them, or like flies stuck to flypaper, or rats attracted to the cheese and then killed in a rat trap. Our strategy in reinforcing KSCB instead of abandoning it due to the advancing juggernaut of NVA forces, was to attract two divisions of North Vietnamese Army troops (which could have been employed to attack cities and other targets in South Vietnam) and then annihilate them with B-52 strikes.

> Khe Sanh, and adjacent defended areas, served to lure the North Vietnam forcers into commitments of major forces particularly susceptible to effective employment of massive air strikes, capable of crippling and consuming North Vietnam offensive capabilities in I Corps.[249]

AIR STRIKES

The destructive capability of the B-52 was unleashed at Khe Sanh in the form of approximately fifty sorties a day. (In comparison, there were a total of approximately 750 sorties during the period 18 June 1965 through December, 1966).[250] During the period 22 January to 31 March, there were 2,606 sorties delivering 75,631 tons (or 151,362,000 pounds) of bombs at Khe Sanh.[251]

As encircling troops of NVA dug trenches ever closer to the lines manned by B/1/26 on the eastern section of Khe Sanh Combat Base, Complete annihilation resulted. Although the normal ordnance load was 108 bombs, each B-52 was capable of carrying up to 128 500 and 750-pound bombs which were dropped in a rectangular pattern usually 1,000 yards long by 100 yards width. Sometimes the boxes overlapped or crisscrossed, depending on the target. Most flights consisted of six aircraft, together covering an area one-half mile wide and three miles long, all within a period of several seconds.[252] To obtain a grasp of this area, one need only think of a comparable area within one's own city and then imagine it totally destroyed. Flying at 10,000 to 30,000 feet, the B52s usually were unseen and unheard by those on the ground for whom the bombs came as a surprise. The earth suddenly erupted. A 750-pound bomb fused to explode on contact clears an area 180 ft. in radius; fused to explode below ground it digs a crater 30 ft. across and 10 ft. deep.[253]

To counter NVA trenches approaching the perimeter manned by B/1/26 and the 37th ARVN Ranger Bn, B-52 strikes were brought closer than the 3-mile limit previously imposed.[254] The ground shook like a continuous earthquake and troops on the lines saw NVA tossed into the air. As early as 29 January, a planning group on the staff of Third Marine Division suggested installation of X-Band Radar Beacon at Khe Sanh ASAP to ensure Arc Light delivery within one kilometer.[255]

On 13 February, Gen Westmoreland advised Adm Sharp (CINCPAC) that the tactical situation at Khe Sanh "may require that full defensive fire be brought into close proximity of defensive positions." He recommended that the previous restriction placed on B-52s forbidding strikes any closer than 3 kilometers to friendly combatants be rescinded. On 18 February, CINCPAC granted permission for the change. In emergency situations:

[254] An accidentally close B-52 Arc Light strike at Con Thien (# P-73) in November, 1967, made close-ion Arc Light strikes valid. The strike, 1400 meters from friendly lines, caused no injury to friendly lines, lives, or fortifications, while damage to enemy installations was significant. Secondary explosions indicated the enemy had closed on the Con Thien outer defense lines, indicating the main enemy threat to be within one to three miles of the base. [7AF 171400Z/Nov67 and 201800Z/Nov67, in History, 3d AirDiv, Jul-Dec67, Exhibits #191 and 192].

[255] CG 3dMarDiv 291334Z/Jan68, Arc Light Delivery Within One KM of Friendly Forces, in III MAF COC J&F 30/31Jan68 #185.

..minimum separation criterion of three kilometers from friendly combatants may be reduced to one kilometer when circumstances warranted as determined by COMUSMACV. A strike request with less than three kilometers separation will be considered a deviation from normal criterion.[256]

The test for a close-in Arc Light was Target KHE SANH 207 RED, 1.2 kilometers from Hill 881S (Target Box XD 778448 – XD 771456 – XD 785470 – XD 793463).[257] One of the Marines on Hill 881-S recalls the strike:

..we got the word that B52s were going to attack that ridgeline. We kinda looked at each other kinda strange. I mean B52s flying high level, and they were going to drop 500-pounders just across from us! They expected the impact from these bombs to be very severe. Of course, they were. Everyone was ordered inside their bunkers and to stay in there, and it was passed over the radio the moment the bombs were dropped. We were told to place our fingers in our ears and pull our knees up to our chests and scream as loud as we could during the bombing. This, of course, we did. This was, of course, to prevent anyone from getting shock. And even though we did this, many of us had nose bleeds from the concussion of the bombs being dropped.[258]

The first close-in Arc Light at Khe Sanh was conducted 26 February 1968. As these continued and were moved as close as 750 meters from Marine fighting positions, and ASRAT TPQ strikes were brought within 500 meters, the results were impressive. "Hundreds of secondary explosions and fires attested to the destruction of ammunition and supply stocks and undoubtedly caused casualties among [enemy] troop units maneuvering in the area."[259]

After a week of these strikes, the enemy forces began to crumble. Prisoners revealed they had been briefed that B52s were prohibited from bombing within three kilometers. The enemy force now moved, not to 3,000 meters, but out to 10,000 meters and his forces were subsequently split up to where he could only mass in battalion size.[260]

The primary concern, however, was the enemy trenches, part of the siege-works. The trench discovered 25 February within 100 meters of Co B/1/26's lines, had been dug the night of 24 February. On 26 February, additional trenches were discovered. On 27 February, aerial photographs revealed a network of trenches and bunkers extending from 1500 meters south of the KSCB to within 100 meters of friendly positions.[261]

We watched with some fascination and no small apprehension, day by day, as the trenches crept closer and closer to our perimeter. Various schemes for ordnance artillery wee concocted which were hoped would, at the least, seriously inhibit both the expansion and the utility of the network. Two-thousand-pound bombs, napalm 'baths' ignited after a number of tanks had been deposited, rockets, and all other types of ordnance in the aviation arsenal were applied.[262]

Consideration was made to employ 175mm for trench destruction missions. The artillery experts noted that the trenches south of the KSC B would be safer to strike than those east of the base. Range probable error for 175mm guns average range of 20,000 meters is 65 meters and deflection probable error is 10 meters. Assuming four probable errors in relation to point of impact, the projectile could land 260 meters over or 260 meters short of computed point of impact and 40 meters right or left of gun target line. Thus, the maximum troop safety for close-in fire was when the gun target line ran parallel to friendly positions.[263]

Destruction of trenches and enemy anti-aircraft and mortar positions within them was a constant frustration to pilots. Capt Gerald L. Harrington probably flew more missions over Khe Sanh than any other pilot. In an interview he stated:

Every day I went up there and put bombs in on the NVA—and the next day they were still in there digging trenches. It appeared at one time we were actually dropping bombs on them and helping them dig trenches at the same time. They would simply dig through our bomb craters and keep on going—our bombs didn't seem to slow them down at all. They were digging trenches like moles.

[263] 12MAR 292120Z/Feb68, Interdiction/Destruction of NVA Trench System at Khe Sanh, in 3dMarDiv Msgs Etc Feb68 Encl (65).]

When we dropped a bomb in one trench, it didn't stop them. We usually dropped at the terminal end of the trench-line, too, where they put their covered bunkers. The next day, I'd see they went right on through our bomb craters. It was very frustrating.

After awhile, the area became so bombed up that the NVA just walked through the bomb craters and I could see their footprints in the holes the next day. Of if the bomb crater had cut a road, I could see the tracks around the crater...

Once I didn't go up [as a FAC] for three days, and after that pause, it was unbelievable what I saw. The trails looked like thousands of troops had moved into the area—and they made no attempt at all at camouflage. They knew we knew—and they had no many troops they didn't care.[264]

MUDRINICH OF BRAVO COMPANY, 1/26

In addition to the 2,567 B-52 sorties, 22 January – 31 March, there were 21,236 Tactical Air sorties (9,684 USAF, 5,167 USN, and 6,385 USMC .[265]

PFC Peter J. Mudrinich (2385291) arrived in Khe Sanh in November, 1967, as part of a major turnover of Marines and was assigned to the mortar platoon serving alongside Gilbert Wall.[266]

On 21 February 1968, Khe Sanh Combat Base received an abnormally large amount of small arms and automatic weapons fire in connecting with an attempt by an estimated NVA battalion assaulting our positions on the eastern perimeter, manned by B/1/26 and the 37th ARVN Ranger Bn. Between 211245H and 211530H, the KSCB received 345 mortars, rockets, and artillery rounds resulting in moderate casualties, none killed. [267]

2/Lt Michael H. ("Hank") Norman, an artillery Forward Observer of A/1/13 attached temporarily to the 37th ARVN Ranger Battalion, was standing outside a hooch at that position when suddenly a recoilless rifle round whizzed overhead and hit a short distance from him. About this time the enemy opened up with small arms and automatic weapons fire. The GRAY Sector of the perimeter, manned by B/1/26, came under a heavy mortar attack along with small arms fire from a ridgeline approximately 400 or 6500 meters to their front. There was nothing the Marines could do other than lay low in their bunkers.

The real point of the enemy force was, however, focused against the lines just in front of those occupied by the Marines. Here, the 37th ARVN Rangers quickly spotted a hundred or so enemy soldiers moving toward them. The enemy force was probably battalion size since the ARVNs monitored the NVA radio net and heard them talking over four or five different radios.

The Vietnamese Rangers immediately engaged the enemy force, halting their advance. The enemy force never approached closer than 50 meters from the wire despite the heavy shower of their fire under which their troops advanced. KSCB received 250 rounds of mortar, 50 rounds of artillery, and 70 rounds of rockets in connection with this attack. At one point, there were about 75 incoming rounds within one 5-minute period.

In addition to the enemy incoming , a TPQ strike was accidentally dropped about 40 meters inside the KSCB perimeter, making a 40-foot note and throwing dirt all over the hooches. The bomb exploded near B/1/26 in the area between the ARVN and "B" Company lines:

> We all laid up in the trench-lines and my radioman hit the deck. It sent mud hundreds of feet up into the air and then my radioman was laying flat in the trench and this big piece of mud come [down] and gave him a compound fracture. It broke his bone right in half They took him to the aid station. They sent him back down that night. They said that anybody that can walk had to go back.[268]

The radioman, Peter Mudrinich, was a German, tall and muscular, who had attended Northwestern University. He had joined the Marine Corps, which he viewed as training, and planned to return to Germany and become an officer.

> He got a compound fracture that broke his arm right in half. The bone came out of the skin, and they took him off. He had to come back that night, but they took him out the next day.

---

Material on this incident is based on FMFPAC 230315Z/Feb68, SITREP #1060; Comments of 2/Lt John W. Dillon, Cpl Gilbert L. Wall, HM3 Raymond Toombs, 2/Lt Michael H. Norman, and Capt Walter A. Gunn, Jr., Tape #2768; and comments of Mr. Ted Golab to the author, 22Apr86.

[268] Comments of Gilbert Wall to the author, 26Aug88.

This guy—I mean we used to sit there and talk. There was a German in Delta Company 81s[269] and they used to talk German to each other. I liked old Peter. We used to sing 'Snoopy versus the Red Baron,' and he got mad and said, 'How would you guys like it if I put down Babe Ruth?' That was the last thing he should have said because those Marines never let up on him.

I recorded us in the bunker one night. You could hear the incoming and the laughing, and he was joking. We were giving Doc a bad time. Doc was from Mexico, Kansas. And we were giving him a bad time, cutting up, and stuff. And you could hear Peter and you could hear radioman for Second Platoon. There was me, the corpsman, the radioman for Second Platoon—lived in the same bunker.

We were giving Pete a bad time. See, Pete was older than most people. He graduated from college. He was around 22 or so. They were giving him a bad time.[270]

For all the ordnance expended by the enemy, there were no friendly fatalities. The corpsman of Second Platoon, B/1/26, HM3 Raymond Toombs, although wounded by mortar, shrapnel, attended to 7 or 8 other wounded Marines (2 or 3 with concussions, a couple with broken arms, and one with a badly messed-up elbow) despite his own wounds, and accompanied them to the BAS.

The attack by the NVA was repulsed, leaving an estimated 20-25 killed.

One of those wounded in the attack, Joe Lola, went to C Med with shrapnel in his leg and was evacuated on a CH-46. The chopper, however, took fire, and Lola was again wounded, again in his leg, while within the chopper He yelled, "I'm hit!" but no one could hear him above the noise of the chopper blades. Everyone returned to C Med, and Lola told the corpsman, "I'm hit!" The corpsman replied, "I know you're hit." Lola took down his blanket—he was nude except for the blanket, to show the corpsman he had been wounded a second time, and there was blood from his belly button on down. "O, my God!" shouted the corpsman. Lola was given some morphine and later told, "You're going out on the next chopper!" "No," cried Lola! "I don't want to get into another chopper. I want to stay here!" "You can't" said the corpsman.

At Graves Registration, there was a KIA from FOB-3, Paul Melvin Douglas, E-6. The Log Book at Graves Registration noted that on 19 January the entry was number 12-68. Today, the number is 141-68, indicating that 129 have been killed on the base itself since all this began. Of course, this number does not include all those who died after being evacuated, nor all those who were to die in aircraft attempting to land here to report for duty, nor all those who were yet to die. It was, after all, only 21 February; there were many more days to go.[271]

Today, an enemy self-propelled bun was observed at XD 7447 at 1335H.[272] At 1625H, 1/26 reported a C-130 LAPES drop broke apart on the runway resulting in two wounded Marines.[273] A total of 284 tactical air sorties were flown in support of the Khe Sanh area (USMC-82, USAF-138, USN-64), and B-52s flew five strikes (15 sorties).[274]

*

Two days later, PFC Mudrinich was medevaced to Delta Med in Dong Ha by a C-130 which was struck upon landing, its wing leaking fuel. Mudrinich felt he was going to die, having witnessed the C-130 on the airstrip of Khe Sanh on 10 February 1968 being struck and engulfed in flames. He then was sent to Iwakuni, Japan, and eventually returned to Khe Sanh, but it was after the 25 Feb 68 patrol, and, like all Marines who were not with their units when they suffered casualties, had that life-long sense of guilt of not having been with his brothers.[275]

On 23 February 1968, incoming on KSCB totaled 1313 rounds.[276] Men no longer desire to leave Khe Sanh on R&R since that would involve going to the airstrip, a place of death.[277]

*

[274] GEN Westmoreland back-channel msg to CJCS 211035Z/Feb68, Rpt #18 on Situation at Khe Sanh.

[275] Conversation with Peter J. Mudrinich, 24 Aug 2016.

[276] 476 of arty, 14 of 60 mm, 372 of 82 mm, 4 of 120, 437 of 122 mm rockets, 5 of recoilless rifle, total: 1313, but LtCol James B. Wilkinson reported (from the regimental briefing) a total of 1407 rounds at the 1/26 staff and officer brief on Sat, 24 Feb 1968. Later in the afternoon, Major David Smith, CO of FOB-3, said we received over 1700 rounds if one also counts the rounds that landed in FOB-3. [Stubbe, Ray W., *Khe Sanh Chaplain*, 01 Apr 1970, p. 701].

[277] Stubbe, Ray W., *Khe Sanh Chaplain*, 01 Apr 1970, p. 700.

The battle from the perspective of air support was persistence of trenching by the NVA *versus* pounding by American B-52s and close-in TPQs—and, most important, the bravery and determination of each individual fighting man at Khe Sanh. Eventually the latter won.

At Khe Sanh, support by artillery and air supporting arms reached new records in the history of warfare. The effort saw the first time strategic B-52 bombers were employed on a sustained basis for tactical support of American troops. Total U. S. Air Force support in terms of sorties:[278]

	TACTICAL AIR SORTIES	SAC SORTIES	TOTAL
7th AF	9,684	2,567	12,251
USN	5,167		5,167
USMC	6,385		6,385
TOTAL	27,236	2,557	23,803

This does not include 1,598 FAC sorties and 1,398 reconnaissance sorties [AFCHO ltr 18Dec68 to HQMC HistDiv, Khe Sanh Monograph Comments file. A daily breakdown of TAC and SAC strikes is provided in Mr. Warren A. Trest.[279] U.S. Marine Corps records reflect the support in terms of strikes and tons of ordnance:

	STRIKES	TONS
CAS	1,169	36,161
TPQ	4,989	32,500
		68,661
B-52	430	79,575

and notes that while B-52 strikes were delivered against less precisely located targets, they did add depth to the battlefield and denied the enemy the ability to mass troops and supplies necessary to assault Khe Sanh decisively.[280]

During the period 20 Jan – 31 March, UMC air flew 7,078 sorties against enemy forces at Khe Sanh with over 6,000 of these sorties (approximately 85%), delivered against targets located within a 9-mile radius of the KSC B perimeter.[281]

The daily average of tactical air strikes at Khe Sanh was 300. B-52 sorties increased as the operation progressed, increasing from a daily average of 33 in January and February to 41 during March.[282]

With such intensity of bombing in such a small battlefield, the air support, together with 102,660 rounds of III MAF artillery, the enemy was never capable of marshalling more than a battalion for a single, concentrated attack.

Bomb damage from Arc Light strikes included: 4,705 secondary explosions, 1,932 secondary fires, 1,061 structures destroyed and 158 damaged, 891 bunkers destroyed and 99 damaged, and 253 trucks destroyed and 52 damaged.[283] Tactical airstrikes destroyed 267 trucks, 305 guns, 1,378 bunkers, 1,095 structures being used for artillery purposes, and destroyed or damaged 13 tanks.[284]

"WE GOTTA GET OUTTA THIS PLACE"

For the Marines of Bravo Company, 1/26, remaining as sitting ducks in trenches like Marines in World War I,[285] was not an option. Daily conversation among the Marines continuously filling sandbags, revolved around "The Wound:" damage to their male equipment and "If that happens, I'm just going to dash out of the trench and kill as many Gooks as I can." When the chaplain would reply, "But you'll certainly be killed," the response would be, "Well, there's just nothing left to live for, chaplain!" Conversation also revolved around just doing something. The "word" was always that if a prisoner of war could be

captured, there would be a free R&R. (Perhaps this might explain why the patrol led by Donald Jacques pursued the "wood-cutters" and became trapped in the ambush on 25 February.

> ..they [the officers] had passed the word that if we get any sappers or anybody, they were wanting prisoners bad, for interrogation. So the big word on the line was: they want to capture somebody alive. So one night—well, you got to take this in context here, being rocketed every single day. So I had gotten to the point—well, OK, screw this! I've had enough of this. I pulled in my squad. I swear to you, this is the honest to God's truth. I pulled my squad in one afternoon and I said, 'Look, I'm sick of this. I'm going to go out—because we could hear the Gooks talking out in front of our lines—I said, I'm going to go out tonight with nothing more—I'm going to camouflage, no rifles, I'm going to take a pistol and a bayonet, and I'm going to go out and capture one of these Gooks out there. We're going to snoop and poop, sneak up on one of them, knock him cold and bring one back for interrogation.' So I told my squad this. I said, 'I want two volunteers, if somebody wants to go out with me.' And I said, 'I don't want anybody saying anything now. I want you to think about it. If anybody wants to volunteer, come let me know on the side. This is going to be totally hush-hush.' And everybody went, like, You're out of your mind, kind of went out, filled sand bags and did their thing. About five minutes later, Smitty[286] came up and said, 'Hey, I want to go. I want to volunteer.' And he was the one guy I was hoping would. Then, about five minutes after that, Moore[287] came up and said, 'Hey, I want to go. I don't care who goes, but I want to go. I want to be one of the guys that goes out.' Through the day, every single man in my squad came up and volunteered—every man in my squad. I couldn't believe it. I was so proud. Then, the amazing thing was, that somehow the word got out. Two guys from Claire's squad came over, and they volunteered. And then some guy from—I don't know where h came from or who he was, but throughout the day I had probably another eight people from other squads. I guess the word started getting out that we were going out, and I had like, seven or eight other men from other squads. But somehow the word got out and the Lieutenant called me and I think it was Captain Pipes, I think, commenced to read me the riot act that if I went out he personally would see that I spent the rest of my life in the brig, so we kind of never made that mission.[288]

Mudrinich also recalls that many of the men wanted to "mount up" and attack the NVA - "why are we sitting here?" The Marines of Bravo Company didn't want to be taking all the fire and do nothing. They wanted to go out and not just shoot them, but to bayonet them.[289]

PART II: THE PATROL OF SUNDAY, 25 FEBRUARY 1968

5. An American Account of the Battle[290]

The 20 year-old "youngest Marine Corps Lieutenant to complete TBS[291] in 18 years,"[292] 2/Lt Donald Jacques, commanded Third Platoon of Company B/1/26. He joined the Marine Corps while attending college. His parents had little money and he didn't want to ask them for more to attend school.[293] Arriving in Vietnam in early October, 1967, he wrote home: "Tonight I had a 19 yr-old come to me for help and advice. He is married to a 18 yr-old and he was having problems. If he knew I was only 20 I wonder if he would have come."[294] The evening of 24 February 1968, he wrote his parents, wishing them a happy anniversary and adding:

> The days go by quite quickly but the nights are long around here. I haven't been getting much sleep.. I stay awake all night sometimes and others not. We get our sleep in the day a couple of ours [*sic*] at a time. That is if the work

[293] *Ibid.*, comments by his other sister, Vallette, p. 61.

[294] Donald Jacques, letter to his parents, 14 October 1967. Jacques was born 23 March 1947 in Rochester, NY, entered on active duty 24 March 1967, and arrived in Vietnam 09 Oct 1967 [Casualty card, HQMC, Historical Division, Washington, D.C.]

load isn't too great. It is a constant digging deeper and the work really never stops. It can't."[295] In what was to be his last day, he also wrote his sister, Jeanne, and her family: "We're just sitting here waiting for all hell to burst loose with each day that goes by the incoming increases and the 3d Plt digs deeper. We are already for them in my opinion but no matter how well prepared you think you are there is always something more you can do. We have been lucky so far and I hope that the good fortune holds for us. Although my platoon has had 30 wounded since Jan 21st none have been too serious and the majority of the men are still on duty and all healing. One or two have made it home early but that is all to the good. For they have done their part. They seem to think that Khe Sanh will be the turning point to the negotiation tables. I hope so but if not we will go on until this is over... I just hope we can do our part well enough so that your Billy and Mark and Matt don't have to come... I'm fine and still kicking. I'll write again soon. Love brother, Don.[296]

2/Lt Donald Jacques was as "green" as the piece of camouflaged parachute he always wore as a dickey.[297]

For 18 year-old PFC Ronald Lewis Ridgeway, the morning of 25 February began with his squads leader, LCpl Kenneth Claire, briefing his men that they were going on a sweep, not to exceed 1000 meters from the combat base perimeter.[298] It was basically to be a perimeter wire check to determine if the wire had been cut or sabotaged, or if there were any NVA forward observers. They were instructed not to go out of sight of the base perimeter. "He said we were looking for any trench positions that were being dug towards our perimeter and for Bangalore torpedoes. He said there was a possibility of receiving enemy mortars because it was open terrain."[299] The patrol was to be far from a normal patrol for Ridgeway; it was the beginning of a 5-year nightmare as a POW.[300] Ridgeway turned 18 in boot camp and went straight over to Vietnam, arriving in November, 1967.[301] In early February, 1968, he got knocked out during a mortar barrage. "I did a foolish thing. I jumped into the trench line to get away from the mortars and I broke my nose."[302] He woke up in a helicopter in DaNang. "I got medevaced, I guess, because they said I was out, unconscious, for so long. Then I came back up [to KSCB]. I got my in-country R&R!"[303]

LCpl Kenneth Claire, the tall, rugged squad leader, probably thought of his family and home in California. He had spent his summers in the 7200-foot high Sierras at Silver Lake with his great-aunt where he would get up each morning and greet it with a Tarzan yell—for which he became quite famous at Khe Sanh before the siege battle. His younger brother (by 7 years), Richard, recalls their 4-hour treks up the 9,800-foot high Thunder Mountain and the sheer 2,000 foot drop to the 7,300-foot high Silver Lake.

> Ken would climb right up to the top and stand there with the wind howling around him, pound his chest and give out this wild Tarzan yell! I think it was at that point Ken got the idea of giving a Tarzan yell whenever he got to the top of a mountain. Unfortunately, he started doing the same thing every morning on our front deck and scared the heck out of our kids. On our last trip up there, he planted a post on the peak and tied his sweatshirt to it. The post stayed there for over 30 years through all the storms and the high winds.[304]

[304] Letter from Richard Claire, 5 November 2004.

His niece, Laura, recalls how terrified she was as a little child when Ken placed her on his shoulders and tossed her into the air. "I used to be scared to death because he was so big."[305] While in schools before high school, Ken was a very good baseball player, made the All Star team for the Fair Oaks Little League and Babe Ruth League every year he played, and when he went to Sequoia High School, he made varsity as soon as he started on the team. At high school, Ken "..got the reputation of being one of the toughest and fairest kids in the school. Nobody fooled around with him and whenever he saw someone picking on someone else he immediately stepped in and settled the argument. He also had a reputation of being a real fun guy.. was extremely well-liked and respected."[306] Following high school he briefly attended the College of San Mateo and played football for them (at 6-2 and 245 pounds), but found the academic world not to his liking and joined the Marine Corps.

LCpl Ken Claire was well-known for his Tarzan yell as well as other savage demeanor and actions. When re-supplied with loaves of bread, he would grab a whole loaf and tear off a piece with his mouth and yell.[307] During a battalion-size sweep in late December, 1967, LCpl Claire led his squad (PFC James Hebron, PFC Ronald Ridgeway, PFC Edward C. Rayburn, PFC Jeffrey E. Culpepper, and others), together with another squad and a machine-gunner up a creek bed of about 6 inches of mud. Suddenly they spotted four NVA soldiers at XD803495 carrying a wounded man. When the NVA saw the Marines, they dropped their wounded officer comrade and ran. Claire and Hebron fired 29 M-79 rounds, killing the officer. Ron Ridgeway and Jeff Culpepper threw the dead enemy officer in a poncho. "He was bleeding like crazy and the blood was sloshing around in the poncho and got all over us. When we got back we finished our chow and went on."[308] Upon returning, Lt. Jacques took the officer's pistol. "It should have been Claire's,"[309] but the issue became academic since both Jacques and Claire were to die on 25 February 1968. Lt Jacques asked LCpl Claire, "Is this a fresh kill?" Claire responded, "Of course," and took the blood on his finger and licked it.[310]

LCpl Claire had a reputation for being "hard" but fair; he took care of his men. He was very strict about falling asleep on watch and ensuring sufficient separation between people while on patrol. If someone walked with his head down, looking at the ground, he'd come by and let that person know it—physically as well as vocally! "But then in quiet times when you'd be standing watch or something he'd come around checking lines. He'd apologize to you and say, 'I'm not trying to give you a hard time; I'm just trying to instill in you're the importance of what we're doing. He did care for us."[311]

When the Combat Base was hit the early hours of Sunday, 21 January 1968, PFC Alexander Tretkiakoff fell while returning from a listening post and became hung-up on the wire. LCPL Claire dashed out amid the hail of exploding ordnance which was concentrated in that particular area of KSCB due to proximity to the exploding ammunition dump, along with NVA mortars and rockets, to rescue Tretkiakoff and bring him back to safety.[312] He also continuously moved through the trench line while shrapnel and pieces of unexploded and semi-exploded ordnance fell around him to encourage his men and assist casualties.[313] PFC Jeffrey L. Culpepper had just completed his watch when a rocket shrieked by and he dove into a trench next to PFC Edward C. Rayburn. The trenches at that point weren't very deep: "we were side by side, practically laying on top of each other." Big chunks of shrapnel made whizzing sounds overhead and then landed into the mud, sizzling. One chunk, "..a great big, huge, jagged, steaming-hot piece of shrapnel stuck in the mid right in between us, sizzling, and we both just scrunched down a little bit lower! Corporal Claire came around, walking above the trenches and said, 'Don't be in the trench like sissies, face down; they're probably coming to overrun us!"[314]

For Cpl Gilbert Wall, the 81mm FO and a Blackfoot Indian from Montana, the day began with the Second Platoon Commander, 1/Lt John William Dillon, telling him he was to accompany Third Platoon on today's patrol.[315] Wall already had

two Purple Hearts and was due to be rotated out of Khe Sanh, but he pleaded with LtCol James B. Wilkinson [CO, 1/26] to stay at Khe Sanh.[316] Only a few days earlier, during a night in which KSCB received heavy mortar fire, the First Platoon Corpsman, Richard Blanchfield, was about to medevac Wall, noting that Wall's eardrums had been blown. Wall refused. He said, "I'll stay. The hell with it." Doc Blanchfield (at 27 much older than most at Khe Sanh, having served 1963-65 with Tom Dooley in Laos previously)[317] notes, "What a wild man!"[318] Wall had been on the patrol along Route 9 on 21 July 1967 which collided with NVA preparing ambush positions—the day the 175s were coming from Camp Carroll to KSCB—as part of the 81mm mortar section (along with Sgt Jose Castillo and Cpl Bruce Jones) that accompanied 1/Lt Benjamin L. Long's Second Platoon, B/1/26. On that patrol Sgt Castillo was shot twice in the chest and immediately died, Cpl Jones was shot through the throat, and Cpl Wall: "The bullet went through up by my shoulder and it went through lung and it broke two of my ribs and they cut it out of my back. I took a ricochet in the face and they shot me right under the eye. I spent July 21st to the last part of September in Yokosuka. That was my second [Purple] Heart and they sent me orders to go back to the 3rd Marine Division Headquarters to be a MP. I didn't want to go. I had to talk with Captain Pipes, who was H&S Company at the time, and then I had to go talk with [Lieutenant] Colonel Wilkinson. I didn't want to go back to the rear, and Wilkinson said, 'OK, well, we'll keep you.'"[319]

Cpl Wall had not had time to clean his M-16; ironically, this was to save his life today. The previous night he was with the ARVN Ranger Battalion and participated in shooting possible probing NVA: "I shot almost 700 rounds from my rifle. The carbon had built up on it, and it would jam after firing three rounds."[320] Wall walked over to Lt Jacques' CP in the Third Platoon portion of the Gray Sector:

> When I arrived Lt Jacques came out of his bunker and invited me in to breakfast and some coffee. Lt Jacques and I had been on many patrols together and knew each other pretty well. He introduced me to the new platoon sergeant [who] asked me to call him 'Mac' [SSgt George McClelland]... I started talking to some of the Marines on the line.. Most of the guys were new. You could tell; they were 'white faced!' [none yet dyed with the red clay pigment of Khe Sanh]. Everybody was in a surprisingly good mood. They all were happy, loose and relaxed. It was a nice day, and just to move out of the base for awhile gave you a good feeling. I checked my gear. I had 25 magazines and 9 grenades. Then I looked over my map and had my radio man get a radio check, then looked out to the area we would be patrolling. I knew the area very well.[321]

PFC Michael J. Laderoute, a Canadian citizen, had enlisted in the USMC. His younger brother, Thomas, recalls him as not particularly athletic, but he did like to play ball, hockey, and was healthy and strong. The family called him by his middle name, "Jack."[322] Michael Laderoute was part of a family with a rich military history. His paternal grandfather fought in WW I and his great uncle, John, died in the same war. His uncle, Michael John, was a radio operator on a bomber during World War II who volunteered as a tail gunner in a bombing raid over Germany, was hit with flak, and killed. Laderoute's mother served in the Canadian Woman's Army Corps during World War II, attached to the Signal Corps as a radio operator. Laderoute's cousin, James Connolly, fought in Korea as a member of the Black Watch. Laderoute's brother, Tom, recalls that Michael John was very adventuresome and liked the outdoors. Even at a young age, his bravery was demonstrated. "One time while Jack and I were walking across a field near home, a herd of cattle was in the same field free ranging. A bull charged across the field at us. Ahead of us there was a steep bank where there were lots of young trees growing. Jack grabbed my hand and we ran for the edge of the field. I was afraid and crying and tried to duck behind a small spruce tree. Jack said 'No,' and held me in front of himself. The charging bull was almost on top of us when Jack jumped sideways and pulled me with him behind the tree. The bull had no time to react and stumbled over the bank through the saplings. I was seven years old at the time. Jack was ten. When Jack was 13, he took me camping about five miles back in the woods to a place called Lyons Lake. That night there was a thunderstorm. Lightning struck all around us. We got soaked and so did our matches. It was after midnight when Jack walked back three miles to a lumber camp to get dry matches. It was pitch dark, but that didn't stop this brave 13 year-old."[323]

[320] Conversation with Gilbert Wall, 26 August 1988.
[321] Letter from Gilbert Wall, 09 September 1988.
[322] Conversation with Thomas Laderoute, 05 May 1991. His middle name is actually "John," but by convention, "John" is called "Jack." Thomas Laderoute claims there were about 1500 men from New Brunswick Province, Canada, and maybe 2600 from the 4 Maritime Provinces that served in Vietnam. [*Ibid.*]
[323] Letter from Tom Laderoute, undated [but from October, 2000].

In his last letter home, dated 22 February 1968, Michael Laderoute wrote: "..We haven't had any mail in four or five days. The place is fogged in and no planes landed. A few landed today. For here is hoping for mail. Not much else to look forward to except mail and chow and hoping for contact. As soon as the NVA attack and we beat them off the wire, we will go on a sweep through the mountains and jungles to Laos and Cambodia after the remainder of their forces."[324]

Culpepper recalls PFC Arnold Javier Rivera as "..a real good-looking Mexican-American, kind of quiet, easy-going, soft-spoken, and real friendly," and PFC Walter F. Skinner as a "kind of hippie-type, free-spirit, kinda cocky, Marine from San Francisco."[325]

Staff Sergeant George McClelland enlisted in the USMC at 17. He was married and raised a family prior to his first Vietnam tour. On 12 August 1967, he celebrated his 25th birthday and soon thereafter deployed for his second Vietnam tour.[326] When KSCB was attacked on 21 January 1968, igniting the ammo dump which strewed exploded and semi-exploded ordnance concentrated in the area occupied by B/1/26, SSgt McClelland, while walking the lines to check on his Marines, was told by Cpl John N. Tracey that his squad area, near the 106 bunker, was covered with numerous dud rounds. "Even though the shrapnel from the incoming rounds was still heavy, SSgt McClelland did not hesitate [to clear them away] until the entire area was secure from dud rounds."[327] 2/Lt Don Jacques witnessed him "repeatedly leaving the cover of the trench line to carry rounds a safe distance from the rest of the Marines. His actions throughout the attack inspired the men of the platoon to fight and stand tall at any cost. He heightened the morale to the extent that they began to make a joke of a very bad situation."[328]

LCpl Frederick Billingham was remembered decades later by Ed Prendergast: "I've had friends since then, but never the best friend that Fred was. Now double his age, I still haven't lived life the way he did! Sometimes I think he knew he'd only be here a short time."[329]

PFC Michael John Brellenthin was married [on 19 August 1967] three weeks when he departed for Camp Pendleton and then to Vietnam.[330] His letters written from Vietnam to his wife, Ruth, attempted to reassure her. "I know that everything is going to work out right... There is nothing to fear. I believe now more than ever that a person who thinks enough can shape his own fate.. An intelligent man who uses his training can easily survive. Don't worry about me Ruth... I've decided that I'm going to be an architect when I get out of here.."[331] After the siege battle erupted: "Things started popping on the 21st of January. It all should be over pretty soon. The way I understand it we could end the war here... Don't worry about me Ruth. I have much waiting for me at home to let anything happen to me here... I got your package today. The one with the rum in it. I'm saving it until all this blows over... I love you boocoo."[332]

HN John A. Cicala, Jr., was 19 and one year out of high school, working for Chrysler, when his draft notice arrived. He went to the Navy recruiter a week before the deadline and enlisted in the U.S. Navy. Following boot camp, he trained at Corpsman "A" School for 14 weeks and was at home on leave when the FBI arrived at his family home while they were eating dinner with a warrant for his arrest for draft evasion![333]

The patrol consisted of 41 men including B-3 led by 2/Lt Donald Jacques and SSgt George McClelland second in command. The squad leaders were: in charge of 2nd squad, Cpl Robert E. Matzka and in charge of 3rd Squad, Cpl Kenneth Claire. Lt Jacques accompanied 2nd Squad who was first in the line of march; 3rd Squad was second in the line of march. Attachments included the 81 FO (Cpl Gilbert Wall) and his radioman, one S-2 Scout, and one Kit Carson Scout, 2 machineguns, and one rocket team.[334]

Not all of Third Platoon went on the patrol. Although LCPL Edward Prendergast, a 60mm mortarman, pleaded to come along, he remained because Lt Jacques decided the 60mm mortars could protect them better from the perimeter lines on

KSCB. "Our range was 1400 meters and he joked about definitely not going out that far."[335] By now, most Marines, cooped up on the combat base and enduring the daily death of minatory incoming rockets, artillery, and mortars—as well as sniper fire, were more than eager to remove those sources of death, "slay the dragons," and "put a hurt on" that which afflicted them and their buddies! Although Prendergast suggested he carry rocket rounds for the 3.5-inch rocket man (and his friend), LCPL Frederick A. Billingham, (who was short two men), Prendergast's Section Leader, LCPL William M. Woolman, disapproved. "I was the gunner and he wanted me to stay on the guns. My Section Leader was getting ready to rotate home and he sort of had plans for me to be the Section Leader, and didn't want me going out."[336]

LCPL William David Holliman had been wounded 24 February and did not accompany the patrol; a round had split his helmet and creased his skull.[337] PFC Jeffrey E. Culpepper was wounded superficially on 13 February and not medevaced. Instead, he received orders on 17 February to attend Infantry Weapons School on Okinawa and departed Khe Sanh with PFC James Hebron on 23 February.[338]

The mission of the patrol was to locate a NVA 82mm mortar position[339] supposedly 1200 – 1300 meters from the base perimeter and learn whatever they could. Ronald Ridgeway recalls the mission to check for Bangalore torpedoes, to see if the wire had been cut or damaged, to spot any positions, NVA forward observers, and not to make contact unless it was a FO. It was to sweep around the platoon area and not proceed beyond 1,000 meters of the wire, and to remain within sight of the perimeter.[340] By now, the NVA had crept close to the base perimeter as part of their Phase II operation. Phase II (10 February – 31 March 1968) involved the encirclement of KSCB to end re-supply overland and eliminate re-supply by air.[341] In the historical account of the battle of Khe Sanh by the Vietnam Institute for Military History, Ministry of Defense:

> After attacking Lang Vay and being unsuccessful in drawing in enemy reinforcements, the Campaign Headquarters decided to surround Ta Con [i.e., KSCB] in order to forced the enemy to send in reinforcements to lift the siege.. The old plan to surround Ta Con was re-organized into an effort to attack the enemy even harder, from surrounding the enemy expanded into a siege; the units in siege were required to construct strong positions.. forces had to be mobile and prepared to attack enemy counter-attackers or those who would land by air... forcing the enemy to become more and more unsettled as the days went on and forcing them to bring in forces [to lift the siege].[342]

According to the official NVA History of the 304th Division, the 9th Regiment was ordered to encircle KSCB by the Front Headquarters [B5-T8]. "Before carrying out the mission, cadre from Platoon Commanders on up had discussed and agreed upon the tactical guidelines to be: to stress the political factor, bravery and steadfastness in the encirclement, tying down the airfield so it could not be used for re-supply.. The encirclement of a large American base system was being set forth for the first time. Not only did the US troops not have to go to 'search' and 'destroy' our forces, but we would be face to face, attacking a large American base system."[343] Prior to the 9th Regiment's move to encircle KSCB, while the 2nd Battalion was moving into regrouping positions, it was hit by 3 B-52 strikes on the night of 6 February, causing nearly 200 casualties while it was along the Hoc Coc Giang Stream. Despite the casualties, the battalion officers argued that:

> the entire battalion wanted to directly attack the Americans in order to get revenge for their unit."[344] On 10 February, the 9th and 66th Regiments of the 304th Division together with the 95C and 101D Regiments of the 325C Division and local force troops from Huong Hoa District established 13 positions that encircled KSCB.[345] "The enemy didn't dare permit the heavy transport aircraft, like the C-130 to land and re-supply Khe Sanh and become a target for our small arms and artillery fire.. This created a shortage of food, ammunition, and an increasing number of wounded and dead that could not be removed and this caused the morale of the troops to

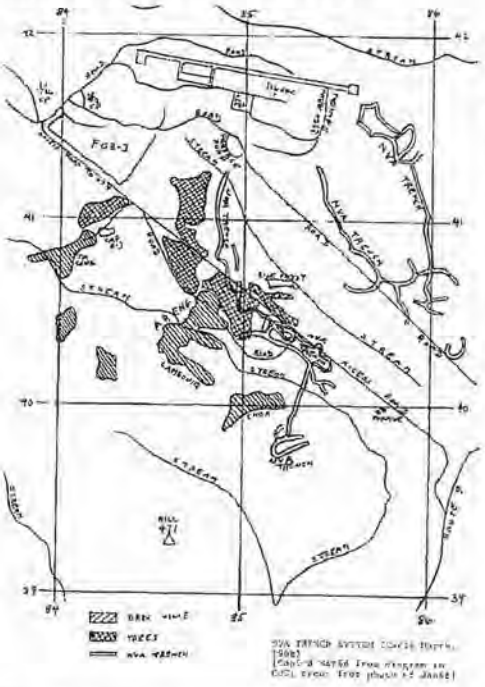
suffer.. The American Marine commander at Khe Sanh, LAO-DO [Col Lownds], together with his staff organized continuous counter-attacks in hopes of breaking our encirclement.[346]

One of the 13 positions, Strong Point #3, was the responsibility of the 8th Company, 2nd Battalion, and was divided into three areas. The principle strong point of the position was 600 meters southwest of KSCB's barbed wire perimeter on an unnamed high point opposite Khe Sanh and separated by a dry streambed with banks on each side from where they could clearly see the entire Khe Sanh base area. A secondary strong point 400 meters southwest of the primary strong point was established at Chau Long Chan, and 300 meters southeast of the main strong point was another. "All 3 strong points were like the three legs on a stool and this was one of the most advantageous points of the encirclement. From this group of strong points we dug a communications trench for about 300 meters toward the enemy and at many places it even entered the enemy's barbed wire defenses. From this position 82mm mortars, B40, B41, recoilless rifles, and particularly a 12.7mm heavy machinegun operated by Bui Xuan Chuc created continuous casualties.. on the enemy... The encircling position of the 8th Company, 2nd Battalion, was like a thorn in the enemy's eye. The 8th Company's Strong Point here had 32 weapons of which there were 2 60mm mortars, 3 B41s, and after 10 days of combat 20 men remained and if one adds the fire support detachment, the strength as of the 25th of February, was 39 people."[347]

By its proximity to KSCB, the encircling NVA units avoided devastating artillery and awesome B-52 Arc Light strikes that were kept a safe distance from friendly forces (3 KM in the case of Arc Lights). Within and from this sanctuary, NVA gunners continued to harass friendly aircraft as well as KSCB itself. At 1300H on 21 February, the entire GRAY Sector manned by Co B/1/26 (XD850418) came under medium to heavy mortar and rocket fire, approximately 50 rounds of mortars and 10 of 122mm rockets.[348] Then, late in the morning of 22 February, Co B/1/26 received 20 recoilless rifle rounds, 121 82mm mortar rounds, 15 122mm rockets, and 15 artillery rounds (suspected 130mm), and numerous small arms fire from NVA forces, most of which were in close proximity. The recoilless rifle at XD 856407, the small arms fire from XD 859405; a .50 caliber machinegun at XD 859403; enemy troops massed at XD 856402; a FP at XD 844440; and an enemy mortar site at XD 845409. Suppressive friendly fire was returned with 29 NE and 2 WP mortar rounds, 5 rounds of 106mm recoilless rifle, and 5 rounds of 90mm tank fire.[349]



Of greater alarm was the NVA trench network that was reported to be approaching the KSCB perimeter. The 1/26 CP had received a Spot Report from 26th Marines at 1230H, 16 February from the U.S. Army Advisor to the 37th ARVN Ranger Battalion, Capt Walter A. Gunn, that a platoon-size element of his unit encountered an extensive, well-developed bunker complex in the vicinity of XD851402 capable of supporting a regiment.[350] On 22 February, Capt Gunn reported that an analysis of reports from his LP and OP elements during the prior 2 days indicated that the NVA forces were constructing a defensive trench network between XD858408 and XD855416 which would support a very large unit in a defensive posture.[351] On 23 February, 1/Lt John William Dillon led Second Platoon, B/1/26, and followed the general trace of the patrol of B-3 today (25 February) and found nothing unusual. In one day, the trench system had been constructed, in places only 100-200 meters from the perimeter lines manned by B/1/26 and the 37th ARVN Ranger Battalion.[352] Finally, on 24 February, a Visual Reconnaissance report indicated large trenches, 3-ft. wide, 4-ft. deep and approximately 1000 meters long, sighted from XD848407 to XD855400, parallel to the road with 2 adjoining parallel trenches forming a trench complex. The trenches had

352 Letter of Maj Kenneth W. Pipes, undated, in HQMC, HistDiv, Khe Sanh Monograph Comments file.

numerous off-shoots containing bunkers. The report noted the enemy was trenching from present locations towards KSCB.[353]

The reason enemy trenching activity was viewed with such concern was that the 304th NVA Division now at Khe Sanh had employed the same tactic 14 years earlier at Dien Bien Phu. It was the final phase of preparation before an assault, having previously arrived on the battlefield and encircled the garrison, then having constructed the siege works and supporting bases. At Dien Bien Phu, the Viet Minh were able to penetrate the French perimeters by sending waves of troops through the trenches dug in zigzagged patterns to evade a direct line of fire.[354]

To the AOs, the NVA trenches were like a sinister hand reaching, ready to grasp a prey: "From the air, these enemy trenches looked like long, thin arms reaching for the wire. In a few cases, they were over 500 meters in length, all dug in one night."[355]

The Marines of B-3 were unaware of recently-learned intelligence of the trenches constructed in one day. GySgt Patrick E. Duffy (MOS 0239) in the 1/26 CP had gone to the 26th Marines COC the night before to learn current information. "I was told there was nothing out there, just to send them out there to see what was going on. When they got hit and really got chewed up, I ran back up there and said, 'How come? What happened?' And they had aerial photography taken by an AO that showed that position. It was on a Major's desk that night and I didn't get to see him because he was asleep and I didn't get to see it."[356] Being a Sunday, the 1/26 Battalion staff brief was scheduled for 0930H, but the diamond-shaped patrol[357] of B-3 departed 0806[358] and proceeded through the trash pit facing the GRAY Sector of the perimeter.
They immediately noticed a trench built by the NVA that half-encircled the trash pit and went down the face of a small hill, across a river, and up the face of another small hill.

> We proceeded down this trench for approximately 30 meters, then decided to move out of the trench and continue our patrol as planned. We moved down the slight side of this small hill into and across a small creek and across an open slope which led up to a heavy tree line. When we reached this tree line we were in a single column and spread out very well, and we stopped, got down on one knee, and a couple of fire teams were moved up to the front.[359]

PFC Calvin E. Bright, on his first patrol in Viet Nam and running point[360] was "..scared to death!"[361] PFC Clayton Theyerl told Bright, "This is your first patrol and I think you and I ought to switch." Bright recalls, "Probably twenty minutes later he was laying on the ground [dead] and I was still standing. I think if it wasn't for him, I'd be in his position and he'd be in mine right now."[362] By 0831, B3 was at XD849414 and by 0840 at XD847416.[363] Just as the NVA's contact with KSCB was something they could not release hold of, the intriguing trench became something B3 couldn't release. Like being killed by electricity from holding a wire and being unable to release that which kills, imprisoning compulsions or memories of traumatic experiences that will not disappear from the psyche, evil from which one can't let go that enslaves, imprisons, and kills, so also the fascinating evil enticed B3 to proceed.

The NVA's 304th Division's history records

> Early in the morning of 25 February, the enemy sent two companies of Marines and a company of Vietnamese who took advantage of the fog to come along the dry stream bed, directly in front of Strong Point Number 3... At 0850, the lead elements on the left encountered two of our troops guarding the forward area. The enemy opened fire and these two were killed on the spot, and it was at that point that we first discovered the enemy... Platoon Leader

Nguyen Quoc Thang, upon observing many US troops advancing, motivated the troops and assigned men missions and waited for the enemy to approach closer before opening fire.[364]

As the patrol advanced to the tree line, three North Vietnamese soldiers dressed in camouflaged utilities and helmets were spotted at 0845H running along the road.[365] Lt Jacques moved up along with HM3 Calzia, and the NVA soldiers turned off the road and disappeared after the Marines shot at them. Jacques requested permission to attempt capture of a live prisoner. POWs are always an intelligence prize since NVA soldiers almost always willingly supplied vital information on units present, morale, weapons carried, disposition and location of headquarters and rear supply areas, future planned actions, etc. BRAVO-6, Captain Kenneth Pipes, thinking they were on the road that led from the trash dump, not the parallel road further to the west that was the usual road used by Marine vehicles—Felix Poilane's private plantation road, told them to be extremely careful not to get sucked into an ambush, a tactic as old as warfare itself and one which LtCol Wilkinson had repeatedly cautioned in battalion staff and officer briefings during the previous months, but if they could make a capture, to do so. The B-3 patrol was, however, much further out than they were supposed to be and thought to be by Captain Pipes; Captain Pipes assumed they were near the base defensive perimeter, on the road closest to the KSCB. They were, in fact, about 600 - 700 meters from the KSCB.[366]

For some reason—disorientation and confusion by Lt Jacques (who had complained in his letters home of little sleep), the shrouding fog, negligence of some radio operator, misinterpretation of check points, the desire to capture a live POW, being too aggressive, not being able to restrain further examination of the trench system which fascinated and attracted, the desire to capture a live POW—the patrol was not where they were assumed to be by those in the command bunkers at KSCB.

Although the day had begun with low, drifting ground fog, periodically dispersed and then again shrouding the area, by now I t was clear skies. On the ground some rice was found scattered here and there; someone had recently been eating in this area.

As the patrol began to sweep the treeline area with CPL Steven Wiese's squad walking point, three North Vietnamese Army soldiers dressed in camouflaged utilities and helmets jumped up and ran towards the Marines and then dashed into a treeline after the Marines shot at them. "Jacques told me to take my first team and investigate; I told him he was out of his fricking mind. This is an ambush! This was my second tour in Vietnam, and I'd been there for almost 16 months. It was in an open area, so there's no way in the world that these guys would jump out in the road and run in our direction, then dive off in the treeline, other than they're trying to suck us over to there. I told him I wouldn't take my squad. It was suicide. So he got pissed off and told me I was relieved of command. He took my first team leader and told him to take the squad and check it out. I remember him saying, 'Sir, with all due respect, if Wiese isn't going, I'm not going either.' So at that point, he told us to 'take a knee.' He was pissed. He told me 'to take a knee,' and I was on report."[367]

The Kit Carson Scout accompanying the patrol warned that it was a trap.[368] Calvin Bright remembers "..the word coming down that we had found them [the N VA] and the Kit Carson Scout that was with us begged and pleaded not to go; he said, 'Don't go any further!'"[369] HM3 John A. Cicala, knowing it was an ambush, said, "Are you crazy?"[370] Cautiously, Lt Jacques moved his patrol across the access road [the Poilane road] and stepped into the brush.

From his position, Cpl Wall noticed the Marines in front of him "..were talking fast and loud. They looked confused. Lt Jacques ended the confusion by shouting 'Let's go get them' while his pistol was in the air and his hand was forward in the charge manner. Then he turned and looked at me and we both smiled at the same time. It was like the same thought went through our minds: 'This is what we want.' We started moving after them and the fire began."[371]

---

[364] 304th Division history, *op. cit.*, p. 93. The official NVA history's exaggeration of the American strength not only includes one platoon suddenly being 2 companies, but also the one Kit Carson scout suddenly becoming "a company of Vietnamese!" The basis of the NVA estimate of 2 US companies may lie in the dispatching of B1 once the contact began. However, B1 did not enter the battle scene but was dispatched to assist WIAs and removal of KIAs.

[365] 1/26 ComdC Feb 1968, S2/S3 Log, 25 February 1968, Ser #47.

[369] Comments of Mr. Calvin E. Bright to the author, 01Aug88.

[370] Conversation with John A. Cicala, 22 March 1987.

[371] Letter from Gilbert Wall, 09 September 1988.

Suddenly, the NVA opened up with heavy automatic weapons and machinegun fire. As soon as the patrol crossed the road and stepped into the brush at XD847408 they were fired upon with heavy automatic weapons and machinegun fire from fortified positions in trenches in two tree-lines, one running north-south, the other east-west, forming a L-shaped ambush at XD849409.[372]

> He [Jacques] took the Platoon, made a 90-degree turn, right into the treeline, and started sweeping into the treeline. All of a sudden there was just a huge roar of gunfire. There's no question the reason I survived and most of the guys in my squad survived is because we were at the very left end of this line and it put us out of the main killing zone.[373]

It was now apparent to the 1/26 battalion COC that the patrol was not where they were supposed to be.

> The platoon was definitely almost 400 meters beyond their checkpoint position. They radioed in that they were at Checkpoint 2, and within a minute and a half .. they said they were taking fire. We left the command bunker to see where, precisely, they were, and they were almost out of sight. They were far beyond where they were supposed to be.[374]

By 0915H, B-3 was in contact with NVA at XD849409, receiving heavy automatic weapons fire; B-3's unit leaders were the first hit.[375] PFC Alexander Tretiakoff, a rifleman, suddenly found himself face to face with a NVA soldier. "I wanted to shoot him, but my rifle wouldn't shoot. So I.. took the magazine out and throwed [*sic*] it away and put another one in. To my right, LCPL [Richard W.] McKenzie was shot. The Lieutenant crawled up to him and took his weapon. The enemy was firing from my right and from my left."[376] Sgt Patrick J. Fitch, a radio operator with B/1/26, upon hearing they were in a fire fight, "..left the command bunker to see where, precisely, they were, and they were almost out of sight. They were far beyond where they were supposed to be."[377]

Most of these Marines were new to Viet Nam. The shock could not have been greater, the loss of friends more devastating. "One minute they're there; the next they were dead."[378] PFC Theyerl, the point man was instantly killed.

Lt Jacques immediately dispatched Cpl Claire's 3rd Squad accompanied by the Platoon Sergeant, SSgt George McClelland, along with one of the machineguns, to move to the right and hook around the rear of the NVA position and remove the flanking action. The maneuver might have succeeded, but Cpl Claire did not hook sufficiently far enough to the west before turning back in on the NVA positions. Instead of hitting the tender flank, the squad walked into more blistering frontal fire.

The NVA history records:

> With strong fire power and experienced troops, the first fire left enemy [American] bodies at the strong point. Light machine-gunner Nguyen Van Lang fired off two series of rounds and eliminated 19 of the enemy. The Americans were tall and big and because they were so slow, many died. However those who remained alive continued the attack. Now they became the target for our mortar fire which fired into the troops and the counter-attack by the two companies of Americans... We only began to fire when the enemy was about 20 meters from our Combat Trench #1. Having killed a number, but with the enemy having a large force and having entered our position, they occupied a portion of the combat trench. They intended to use our trench to continue the attack. But because the Americans were so big and because they carried so much equipment, in a trench of ours that was so narrow, they could not move easily and in some cases were forced out of the trench. In the face of this situation, the company sent Comrade The's squad to move in from the south and the squad of Comrade Chuc to move along the communications trench attacking from the north. Being attacked unexpectedly on their flanks by two squads, the [American] commander [Lt Jacques] and the radio operator were eliminated.[379]

PFC Edward C. Rayburn, next to CPL Claire, was shot in his jaw and watched as several others were hit, including Claire, who grabbed as many men as he could and pulled them into the trench line. Claire continued firing for about an hour from the trench and was again hit a second and a third time, killing him.[380]

[379] *Su Doan 304, op. cit.*, p. 94.
[380] Conversation with Richard Claire, 25 June 2004. Rayburn had visited the Claire family just before he committed suicide and reported the details of Claire's last moments.

Initially, the Marines had fire superiority. HM3 Calzia noticed from his position with 2nd Squad that the Corpsman with the 3rd Squad had been wounded and was not on the road. "When I went down to get him, I noticed that the 3rd Squad [Cpl Claire's], from all indications, had been wiped out. There was no one left. He [the Corpsman, Doc John A. Cicala] was the only person left, and he was wounded."[381] Sgt Fitch, radioman with B/1/26, remembers B3 lost one fire team and sent out a squad to envelop to the left which was in turn enveloped, and one of these men were never again seen alive.[382]

HN John A. Cicala, the wounded Corpsman, had accompanied 3rd squad which charged into a mouth of a crescent of bunkers and were immediately cut down by fire from three sides. Doc Cicala treated one dying Marine, LCPL Jerry Dodson.

> I ran over to him and I took care of him. He had caught a round through his left eye. Believe me; I'll never forget it. It came out the side of his head, but he was still conscious. There was nothing I could do. I put a dressing on him and he told me—it totally freeked me out—but the last thing he said to me was, 'Doc, make sure I got my weapon.' I gave him his piece back and I laid a couple of clips by him.[383]

As Cicala dashed to another Marine who cried, "Corpsman," a NVA soldier fired and hit him. The round struck his taped neck chain that included his dog tags, a large St. Christopher medal, a GI can opener, and pushed everything into his windpipe. Another round ripped into his flak jacket, tore through his chest and right lung. He fell backwards and, to his horror, realized he had one of those dreaded sucking chest wounds. The NVA attempted to kill him with a grenade which landed between the Doc's legs and blew away his kneecap, shredded his thighs and calves, and tore into his groin. Despite this, Cicala lived, and covered his sucking chest wound with cellophane torn from a cigarette pack. He began crawling towards the KSCB perimeter.[384]

The Marines were not to be intimidated—frozen, clinging to the earth—but were constantly moving. Cpl Robert E. Matzka, leading the Second Squad, Third Platoon, was seen constantly exposing himself to the enemy fire with no thought for his own safety as shrapnel and heavy machinegun and small arms fire showered the area, while going from man to man to direct fire and encourage them.[385]

[*paragraph omitted*]

LCPL Doss B. Thrasher, PFC Calvin E. Bright, and HM3 Frank V. Calzia were on the left flank, further down the road. "Observing one of his comrades fall mortally wounded while attacking an enemy machinegun emplacement, PFC Calvin Edward Bright ignored intense enemy fire as he crawled to within a few meters of the hostile position to retrieve his fallen comrade and return with him to a covered position."[386] HM3 Frank Vincent Calzia could see the corpsman that had traveled with Third Squad was wounded. As Calzia went down to rescue him—he had been moving from wounded to sounded with complete disregard for his own personal safety, treating the more serious wounded and dragging the less serious to cover, constantly exposing himself to enemy fire–, he saw the gruesome reality: Cpl Claire's entire squad had been annihilated. There was no one left alive—or so it seemed. Actually, although the main assault force were all killed, there were a few scattered individuals in holes and trenches that were, in fact, still alive.[387]

One of those in Claire's squad still alive was Claire's Point Man, Ed Rayburn, the first man in Third Squad to be hit. His jaw was shot off. Cpl Claire placed him in a trench; Rayburn, in a state of physical shock witnessed in minute detail the entire sequence of his entire squad being killed. Writing from a hospital shortly thereafter, he told Capt Pipes: "I saw and heard them all die for three hours."[388]

PFC Thomas A. Detrick was part of the machinegun crew that accompanied 3rd Platoon. The machine gunner had been hit, and Detrick, following him, was also hit while in the process of firing the weapon.

> I was on the verge of blacking out, then I yelled 'machine gunner out of action, replacement up' and crawled into a crater and passed out. When I came to, a Marine [PFC Rayburn] had joined me and he had his lower jaw blown off.

[388] Ltr of PFC E. C. Rayburn to Capt Kenneth Pipes, undated (ca. Mar or Apr 68.

This Marine and I spent the next several hours in agony and hell. We came to realize that either the patrol had been wiped out, or had been pulled back.[389]

PFC Ronald Ridgeway recalled the action in vivid detail, even after years as a Prisoner of War. It has been seared and branded into his soul. As the Marines pursued the 2 NVA, they ran through a three line into a Montagnard village [Clong Sareh] and an adjacent field that had been ploughed by the Montagnards. The field was bare and approximately 50 by 50 meters. They came upon a newly-dug trench—the dirt was fresh—approximately 6 ft. long and 4 ft. deep into which the Corpsman, Lt Jacques, radioman, and SSgt McClelland moved for protection. SSgt McClelland, back inside the tree line, told Cpl Claire to get his squad up and moving. While one squad occupied the trench to provide a base of fire, CPL Claire stood in the middle of the field and directed the squad to move in fire team rushes through the barren field towards a series of interconnecting trenches to their front.[390] When Rayburn didn't move, Claire turned around and said, "Rayburn, what's the matter with you? Get up and move! Are you hit?" Rayburn replied, "No, I'm just laying here for my health."[391] "We began our fire team maneuvers across the field, receiving 2 or 3 rounds here and there. Off to our front we could see a trench running the full length of the field. The trench was approximately .. 50 – 60 meters long curving off to our left, back around the end of the field, against waist-high shrubbery. We couldn't see anyone as we started across. We picked up fire until we had just a full hail of fire coming in on us. We were caught in the open about half way out, and we kept our assaults up.. The first man hit was to my left. The Corpsman came and got him when he started screaming.. Another man was wounded off further to my left."[392] "When we assaulted, Claire was standing up in the middle of this field telling us to move, hollering and ducking bullets. He told us .. to just get up and run, forget maneuvers, that we were to try to get to the trench. So we got up and ran, three of us."[393] The three were PFC Ridgeway, PFC Bruder, and LCpl Geller.[394] In a later personal conversation, Ridgeway noted there were actually two fire teams of three each for a total of six that made it to the trench and that they had started with fire team rushes because it was a plowed-up field.[395]

Once they got into the trench, Ridgeway, Bruder, and Geller moved through the trench under cover of the machinegun fire of the other fire team, until they arrived at another small trench with a small bend. As they advanced, a grenade exploded and they returned to their initial trench, engaging in an exchange of tossing grenades.[396] LCPL Geller stood up, attempting to locate the rest of the squad when a round was fired creasing Geller's forehead and knocking him back into the trench. "Geller rolled back into the trench and said, 'Everybody's dead. Everybody behind us is dead. There's nobody left alive. What are we going to do?' We had been down below ground level for awhile and the NVA had taken it for granted that all of us were dead."[397] Ridgeway and Geller stood up and, spotting four NVA approaching them, Ridgeway fired a burst from his M-16 killing 2 and forcing the other 2 to cover while Geller killed one with his .45 pistol. After Ridgeway and Geller jumped back into the trench, Bruder stood up catching a round that came through the dirt in the side of the trench and penetrated his chest, instantly killing him.[398]

Geller, the Fire Team Leader, told Ridgeway they had to move. "We had to try to get back inside the perimeter because there was nobody left but us. He got out and took off running back across the field. At first I got stuck in the trench because it

[390] Material on Ridgeway is contained in the following documents in the archives of the U.S. Marine Corps Historical Center archives # 127-77-0049, Box 39: CG MARCORB CAMPEN CA 100244/Apr73, Subj: Returnee Press Conference (Sgt. Ronald L. Ridgeway); CMC Report AO2A-THM-fh, 3461, 17Jul73, Subj: Homecoming Marine Debriefing Report; case of Sergeant Ronald L. Ridgeway, USMC; Asst Chief of Staff, G-2, report AO2A-BFH-bfh, 3461 of 1 May 1973, Subj: Debriefing Summary, case of Sergeant Ronald L. Ridgeway, USMC, with appended FMFTMCMDR FIRST CIT I MAF CAMPEN CA 290300Z/Mar73, Daily Summary 005 for 23 Mar 73, debrief of Sgt Ronald L. Ridgeway; I MAF CAMPEN CA 200300Z/Mar73 to CMC, Subj: Message Summary Homecoming Marine; 1st Counterintelligence Team Report 16-9X-73, Operation Homecoming-Marine detailed report debrief of R. L. Ridgeway, Sgt, USMC; CMC letter AI2A-THM-bfh, 3461, 17 July 1973, Subj: Homecoming Marine Debriefing Report, case of Sergeant Ronald L. Ridgeway, USMC. Ridgeway spent five years as a POW in North Viet Nam and was returned to US control in March, 1973. He was 18 when captured; he returned at age 23. During the first part of Feb68 he had jumped into a trench during a mortar attack and broke his nose. He was sent to DaNang, had his nose fixed, and then returned to Khe Sanh in mid-February.

was so small with my pack on. I pulled loose, got out, and started back out across the field."[399] Geller came upon a black Marine, PFC Willy Ruff, who had a broken arm and was lying on his back. Geller knelt beside Ruff and was hit on the right side of his face. The round took out the whole left side. "He was spitting teeth all over the place. Just as I ducked, another round came from the back and I got hit in the shoulder. I dropped down to the ground and just laid there."[400] Ridgeway checked Geller, finding him alive but in shock. The three (Ridgeway, Ruff, and Geller) decided to wait for a reactionary force and to play dead until dark and then try to make it to safety.[401] "We were surrounded by NVA, so we decided to stay where we were. We laid there talking."[402]

While the squad led b Cpl Claire had moved to the right, Lt Jacques and Cpl Wall moved to the left of a little access road and became pinned down. Cpl Wall moved away from Lt Jacques and managed to reach a tree where he finally became pinned down and could move no further. "We were right in front of their trenches and bunkers. The air was filled with screaming, shouting, open fire, and blood." It was fortunate that Cpl Wall's rifle jammed: "My jammed rifle probably saved my life, because it would jam about every three times [I shot it], and I would get back and [then] they [the NVA] would just chew up the tree."[403] As Cpl Wall took out his map to call in fire missions from the 81s, he realized that trees obstructed his sight of the other Marine squad and he feared calling a mission that was too close. While he could hear the initial registration round exploding, he was unable to see where it struck. He couldn't move, due to intense fire, until another Marine gave him covering fire. As he moved he noticed wounded screaming for help everywhere—as well as NVA: "I couldn't believe how many of them were there. I threw a grenade in their trench and killed 3, but they filled the spot in no time. The more we killed and got killed, the more they came. The screaming and shouting was so loud you couldn't hear your own voice. By this time I was terrified and could see the deep trouble we were in clearly. We just didn't have enough men to match their fire power."[404] For CPL Wall, the battle was riveting madness:

> We were putting some heavy fire out now. I took out my map to call a fire mission in 81s. I wanted to call the mission in front of the squad that got hit first [Cpl Claire's].
>
> The visibility was bad because of the weather but that was not my problem. The trees that were between us and that squad to my right was right by their trenches were the real problem that kept me confused. I didn't know where all the Marines were.
>
> I wanted to call the mission but I was scared of hitting my own people, so I never did call the mission too close or more than one round. I didn't want to get careless.
>
> When my first round landed, I could not see it but I heard it. Between ducking and returning fire I couldn't place exactly where my round hit. I checked the map and the grids was what I wanted so I requested a repeat and was going to go with W.P. but I changed my mind. I couldn't move at this time because I was under too much fire. I was pinned behind the tree. A Marine was telling me to pull back then he opened up fire along with the Marines to my left and this took the fire off me. I moved back and to the right.
>
> Marines were wounded and screaming for help everywhere. My round had landed I guess in front of the Marines but behind the NVA trenches. I couldn't see it. I made a correction to move the 81s in front of us. Then the right to my right was stopped. I looked. All Marines were dead.
>
> I couldn't believe how many of them were there. I threw a grenade in their trench and killed three, but they filled the spot in no time. The more we killed and got killed the more they came.
>
> The screaming and shouting was so loud you couldn't hear your own voice. By that time I was terrified and could see the deep trouble we were in clearly. We just didn't have enough men to match their fire power.
>
> My round landed again and I didn't see it but I heard it very close and I knew it had to be behind the NVA trenches so I decided to move it closer to us.
>
> The Marine to my right got hit. My radioman behind us got out a magazine as I went for the wounded Marine. My radioman was behind a tree to the right and back a few meters. I bandaged the wounded Marine then moved back to the tree up front on the left.
>
> I was pinned there. They were chewing up the tree and I could hear the bullets cracking the tree. I put my rifle around the tree and kept firing blindly. My rifle jammed....

[403] Conversation with Gilbert Wall, 26 August 1988; Letter of Gilbert Wall, 09 September 1988.
[404] *Ibid.*

Some Marines moved to my left and took the fire off me. I looked around the tree, and an NVA was looking at me, looked like he froze instantly and I shot him in the face then turned left and noticed the Marine next to me had his ass in the air, his face in the ground. I reached over and pulled him. He was shot in the face. They had blew out the back of his head.

I took his rifle and threw mine away. I was also running out of ammo. A Marine moved up by the mount and asked me for some grenades. I gave him three.[405]

Cpl Wall had nine grenades, and tossed a few to the Marine as the two of them tossed them in the enemy trenches. Three enemy soldiers popped up in one side, then three on the other. The Marines to the right returned fire, enabling Cpl Wall to free himself from the snare. He knew he was too far out, but was confused as to where to call the 81 fire missions. Lt Jacques came back, firing a M-79. Cpl Wall ran up to him:

I was telling him what I wanted: to bring the fire mission in on the bunkers would be too close to us. I wanted to bring it in on the line, and I wanted to tell him that's what I wanted to do. And he told me, 'Pull out.' He said, 'Take the wounded and leave the dead and come out.' Then, while he was running away, he hollered at me, 'Come on, Chief, get the hell out of here!' He said, 'Every man for himself.'

Then we started pulling out. Me and another Marine there stayed and returned fire. And this other Marine tells me he's getting the 'uck out of there. He said, 'Come on, let's go.'

And we ran through the treeline. And they [the NVA] were already running down the hill, and they were shooting, but the bullets weren't coming at us.

I picked up two boxes of M-60 when I started going down the little road. I was the last Marine who came out of the tree line so I could see the Marines running down the hill; some were wounded and others on their own.

As I moved out in the open area and started going down the hill, I heard a Marine laying by a tree, and he was screaming at me, he was hollering at me, 'Marine, Marine, help me! Help me!' So I ran back to get him and these two other Marines came running, and they took him. They gave me his rifle because mine was already jammed up and I had already threw my rifle away and I had taken the dead Marine's rifle. They gave me his rifle, and they started carrying him. And we were the last ones.

And I turned around and I was using both rifles and I was just shooting them both at where they were coming from. Then we ran down to the rice paddy, crossed a really small rice paddy.

Marines in front of us were feeling a little relief because of getting closer to the base, when they ran into another ambush as they entered the treeline. We were under their fire again.

Right in the middle of all banana trees and high grass there was this circular open area which we were trapped in. Bullets were flying all over the place, cracking sound of AK-47 and M-16s were all you could hear, wounded Marines were all you could see, and the familiar odor of blood and fresh grass was all you could smell.

I thought of calling a fire mission, so I laid down on my stomach to get the map out and realized that I had lost it maybe when I was carrying the wounded Marine. Anyway the fire mission was out of the question. The bullets were cutting up the big leaves above my head to pieces. Everyone was laying there dead or wounded, and there was no time to be scared of death.

I was still on the ground when I saw this Marine who was shot in the chest and wounded real bad. He was moaning and obviously in a deep pain. I reached him and put a bandage on his chest but he was bleeding too much, and the bandage didn't do much and I knew there was no much more I could do for him. He was dying.

One look to the other side I saw Lt Jacques shot in the stomach lying on the ground. So I reached over and started putting bandage on his wide open wound. All the blood went through the bandage and ran down my fingers. He was hurt very bad and I couldn't do anything more to stop the bleeding. All this time he was trying to talk to me but I couldn't understand him. That was when a couple of bullets hit me on my flak jacket on the shoulder and knocked me on my ass, and the other one went between my arm and my ribs and left a hole in my sleeve.

I started moving Lt Jacques to a safer place where there was not that many bullets flying in the air. So I moved him behind a small mound of dirt. Uselessly I tried once again to stop the bleeding. But shortly I noticed the change in the color of his face. It was turning white. His head fell back. His eyes rolled back, and he died."[406]

[406] Comments and Ltr from Mr. Gilbert Wall to the author.

Another Native American, John Washa, dragged Jacques back to the KSCB lines. A dramatic colored photo of this is contained in a *Newsweek* issue with numerous photos by John Ellison.[407]

*

Meanwhile, 2nd Squad under the leadership of Cpl Robert E. Matzka was on the left flank, further down the road. Cpl Matzka was seen exposing himself to enemy fire with no regard for his own safety as shrapnel and heavy machinegun and small arms fire showered the area, going from man to man to direct fire and encourage them.[408] Observing one of his comrades fall mortally wounded while attacking a NVA machinegun, PFC Calvin E. Bright, ignoring the intense NVA fire, crawled to within a few meters of the hostile position to retrieve his fallen comrade and move him to a covered position.[409]

Although HM3 Calzia (with those in 2nd Squad) moved to the area where 3rd Squad was slaughtered and assumed all were killed, one of those in Claire's squad was still alive. PFC Edward C. Rayburn, the first one in 3rd Squad to be hit, had his jaw shot off. Cpl Claire placed him in a trench from which Rayburn, in a state of physical (but not mental) shock witnessed the entire sequence as he observed his entire squad being killed in minute detail. Writing from a hospital shortly after the action, he told Captain Pipes: "I saw and heard them die for three hours."[410] PFC Thomas A. Detrick was part of the machine-gun crew that accompanied 3rd Squad. When the gunner was hit, Detrick picked up the weapon and was firing when he also was hit. "I was on the verge of blacking out, then I yelled 'machine gunner out of action, replacement up' and crawled into a crater and passed out. When I came to, a Marine [PFC Rayburn] had joined me and he had his lower jaw blown off. This Marine and I spent the next several hours in agony and hell. We came to realize that either the patrol had been wiped out, or had been pulled back."[411]

PFC Ed Rayburn recalled that he and PFC Thomas Detrick passed in and out of consciousness:

> The United States Air Force then proceeded to strafe us with .50 caliber guns, then drop High Explosive bombs, then as a finale, they dropped two napalm bombs. Sir, I cannot describe the fear coursing through us as this happened. But the second bomb seemed to be the cue for us to shag ass. My lungs had been punctured by the AK-47 bullets that hit me, so I could only go 40 – 50 meters before I had to stop and rest. I told my fellow Marine to go on ahead and tell them I couldn't make it and would try to and get to the rice paddies. I eventually made it to the rice paddies but after waiting what seemed to be an extremely long time I decided to try and make it back on my own.
>
> Sir, I dodged two NVA patrols of four to seven men when I left there but finally made it to the south side of the mine field in front of the ARVN's lines.
>
> To my horror I discovered that I could not yell loud enough to be heard. So I found a white parachute flare and waved it for several minutes. Then, seeing no response, I sat down and cried. I was too tired to move to my left around the field and knew that if I moved to my right I would be shot by a trigger happy ARVN. A short while later I heard movement to my left and turned to find several Marines coming to my aid. I would like to thank the lieutenant who led that party but I don't know his name. So I'll just say thanks to the officers of the United States Marine Corps, which he represents to the highest caliber.
>
> I am presently in the 249th General Hospital, Osaki, Japan ... Could you please have somebody write and inform me of the events of that day and how our patrol made out.[412]

*

One of the corpsmen with B-3, "Doc" John A. Cicala, Jr., had just finished attending to Dodson. He jumped up and was going to another wounded Marine when an enemy soldier stood up in a trench ten feet away and began firing his AK-47 at Cicala.

---

[407] Ellison, Robert, "The Agony of Khe Sanh," Newsweek 71:12 (Mar 18, 1968) 29-36. Ellison had "lived" with the Marines of B/1/26 in their trenches, and after taking numerous photos and flying to Saigon to his boss, was told he could return to the States. However, he wanted to be with his Marines and didn't want to leave Khe Sanh until they did. On a flight returning to Khe Sanh, on 06 March 1968, his plane crashed just outside KSCB (at XD 933404), killing him and all 47 Marines aboard. Interestingly, he was 23 when he died, as was h is father who was killed in World War II, and there were 23 years separating their deaths!

SITE OF JACQUES PATROL (Photos by SFC Herbert Marshall of FOB-3 operations section)

Cicala was hit at the base of his throat. The round struck his dog tags, a large St. Christopher Medal, and a C-rat can-opener—all fastened as Grunts I the field in Viet Nam do, with tape to prevent noise. Everything was pushed into his trachea. A second round struck his flak jacket, shredding its fiberglass plates and entered his right lung.

> When I was wounded, Jacques came running by me. I was just laying there. The grenade had gone off. And I was kinda stunned. And he come by me and he said, 'We got to get out of here.' He said, 'Get out of here the best way you can. We're getting wiped out.'[413]

After taking some cellophane from a cigarette pack and dressing his sucking chest wound, he began to crawl back to the base alone, through friendly artillery which was by now plastering the battle zone, through mines, concertina, and barbed wire, and finally pulled in by Ed Prendergast.[414]

---

[413] Comments of Mfr. John Cicala to the author, 22Mar87.

[414] Robert Pisor, "The Motown Doc." Cicala had been thought dead; a message had already been sent to that effect.

About 4 PM down the trench line to my right someone was firing at something moving outside the wire. It looked like a wounded Marine. Wishing it was Fred, I ran out the opening in the wire that 3rd Platoon had gone out that morning. When I reached the body I was in front of the 1st Platoon's machine gun pit, next to the old trash dump. It was the Corpsman from 3rd Platoon I only knew as Motown Doc [John Cicala]. He had a sucking chest wound with cigarette wrapper on it, face and leg wounds. Doc was white as a ghost mumbling deliriously that everyone was dead. One of the replacement grunts had run out behind me. Everyone could see us and they were yelling to get him in the wire. By now I realized that I only had my .45 with me; the other grunt had his rifle. We carried him to a dirt clearing. I thought for sure he was going to die the way we had to handle him. At one point I had him fireman style across my back. The other grunt was protecting our backs. Marines from the trench were yelling we were near a mine field. My new friend and I looked in each other's eyes and knew we weren't going back where we had come from. Till the New York parade [07 May 1985] I had always thought that the Motown Doc had died of those terrible wounds and our handling at Charlie Med.[415]

*

Doc Cicala had been with Lt Jacques when he was hit. "When I was wounded, Jacques come running by me. I was just laying there. The grenade had just gone off, and I was stunned. He came by me and said, 'We got to get out of here!' He said, 'Get out of here the best way you can. We're getting wiped out.' I just started crawling, left my rifle and just had my .45 with me. As I was going back, I heard him. I looked over and he stood up for some ungodly reason, and that's when he got it. He got hit, I crawled over to him. He caught it right across his femoral arteries, and he was dead within minutes. There was nothing that could be done. It looked like he got hit with machinegun fire and it caught him just below the groin area. It severed both arteries.[416]

*

Beginning at 1005H, KSCB came under heavy rocket, mortar, and artillery fire.[417] Emergency TPQs and artillery counter-battery missions were being fired, but the enemy fire persisted.[418] By 1800H, KSCB had received approximately 350 rounds, well-directed, from several positions around KSCB and aircraft in support received intense small arms, automatic weapons, and anti-aircraft fire from numerous sites circling the base.[419]

The G-2 of III MAF, Col Kenneth J. Houghton, visited KSCB amid this incoming, and at his FMFPAC Debrief three days later stated: "I'm probably the only Colonel in the Marine Corps that got a 100-gun salute on landing. No 21-gun salute for me!.. We always get fired at. They wait until the planes land and then the mortars fire. They are just zeroed in on the runway and they follow you right down the runway. It's a right interesting trip if you want to make it!"[420]

One of the base's ammo dumps was damaged and small groups of NVA were spotted throughout the south and west areas close to the perimeter wires, at XD 847416, XD 854412, and in the vicinity of XD 832416 and XD 827425. The heavy volume of incoming resulted in 9 KIA, 27 WIA, 2 UH-1E destroyed, 1 H-34 shot down (pilot and crew OK), 1 U.S. Army slick destroyed, several CH-46s damaged, and the DASC bunker took a direct hit from a 122mm point-detonating rocket but withstood it, and 2 enemy self-propelled guns were spotted within 100 meters at XD 674475.[421]

When B3 made contact, Capt Kenneth Pipes realized that, for whatever reason, Lt Jacques and his patrol had veered several hundred meters from his assigned patrol route. Capt Pipes requested permission from battalion [1/26] to deploy the First Platoon as a reaction force, an assignment B1 had received the previous night. They were ready. The request was granted. Capt Pipes then requested assistance from the tanks, which was approved, and the tanks provided excellent fire power.

First Platoon, under the leadership of 2/Lt Peter William Weiss[422], [0103881], manning the south-east perimeter near FOB-3, plus one squad from B-2[423] moved out of Gate 42 at 1115H with its 1st and 2nd squads.[424] PFC Donald E. White, Point, moved the patrol out to the access road and moved parallel to it for about 300 meters when it was immediately pinned down by two machineguns approx. 600 meters from Bunker #42 (XD846416) along with mortar fire. LCpl George William Jayne went looking for a radio and found the radioman, the squad leader, and the corpsman killed along with 3 MIA. "We were separated from Lt Weise and the rest of the platoon, and I just felt like we needed to have a radio. I figured he [the radioman] must have been wounded and started to crawl back, and ran into part of Delta Company which came out also. I led them back to where we had been. By the time we got there, there was nobody there. People had started to pull back, and so we started to pull back."[425]

Although t he 2nd Squad of 1st Platoon became pinned down, the Corpsman, Hospitalman Lloyd W. Moore, fearlessly moved through the heavy barrage of fire to provide medical aid to the seriously wounded and saved the lives of at least 3 Marines. As he was moving to a fourth wounded Marine, an incoming mortar round took his life.[426] One of those he rescued, LCpl Johnny F. Bellina, had been next to a buddy who was shot through the forearm—"just like a paper punch"—while Bellina rolled on his right side with his left leg sticking up in the air. A NVA shot him across his leg. "I saw the muzzle flashes keep shooting and I put a couple of magazines in that [position] about 100 yards off. I stopped him. He didn't shoot anymore. I rolled down in a ditch and I was bleeding so bad I thought I was going to pass out. I thought they'd run up and bayonet me or something. I just laid and a corpsman got out to me, gave me 4 or 5 morphine syrettes in the leg. He threw me across his shoulders and carried me back."[427]

Donald F. Santner and Melvin Frazier attacked one of the enemy machinegun positions with grenades. The enemy threw them back at the Marines, and Santner took shrapnel in his legs. Then, an enemy soldier arose from a trench behind him. Frazier told Santner to hit the deck as he blew away the enemy soldier. Then they let a spoon fly from a grenade, tossed it at the enemy, and blew away the machinegun.[428]

> In the ensuing firefight, there wasn't a whole lot we could do. This higher command apparently 'nixed' a heavy relief force due to the fact that they thought we were getting in over our heads, and we had lost radio communications with the Third Platoon.[429]

Sgt Patrick J. Fitch was sent out by Lt Peter Weiss along with three or four other Marines to locate any wounded of Third Platoon.

> We got out beyond what was the dump just south of Khe Sanh. Beyond this dump there is a tank mine field. We went out beyond that to look for some of the wounded. We found three or four men that the corpsman [probably Doc Cicala] had managed to struggle back, a few stragglers, but we could find nothing else, and after an hour and a half or two hours of futile searching around in the bush, we were ordered back in.[430]

Sgt Fitch was surprised by what he <u>did</u> see: the enemy trench about 800 feet long and 4 ½ feet deep. He had been in this area only two days previously; then it wasn't there. The trench had been built in a day. Listening Posts had constantly reported sounds of digging and, while these were not dismissed, they were not regarded as significant.[431] (Two days earlier, on 23 February, Lt John W. Dillon led the Second Platoon of B/1/26 and followed the general trace of this patrol of the 25th, finding nothing unusual. Today, on the 25th, there were numerous trenches, in some places only 100-200 meters from the perimeter lines manned by B/1/26 and the 37th ARVN Ranger Bn.[432]

---

[422] Lt Peter Weiss was greatly admired by his men. During this patrol, he personally assaulted a machinegun bunker. On one occasion, Ronnie Seals, a radioman, froze in a bomb crater. A Gook threw a ChiCom grenade into the crater. Dick Cruz, standing beside Seals, saw Lt Weiss pick it up and throw it out. "..like it didn't mean anything. He was crazy; he was a good man." [Comments of Mr. Richard Cruz to the author, 19Aug84].

[432] Ltr of Maj K.W. Pipes, undated, HQMC HistDiv, Khe Sanh Monograph Comments file.

Capt Pipes requested deployment of another line company to break the NVA ambush and blocking positions and to recover the wounded and dead. "The request was denied. I was at first extremely bitter at this decision, however reflections indicated that it was a wise one."[433]

LtCol James B. Wilkinson rapidly thought: Do I send a squad or are we going to send a company? Apparently, Delta Company, 1/26, was ready to go, to relieve and reinforce the two platoons.[434]

> It was the most difficult decision a commander has to make, and the decision I made was: we would not send out the force or go to the aid of those Marines. Now that violates all the Marine principles that I was taught from my first day at Parris Island in 1948. When a Marine gets in trouble, you go out and help him and bring him back. My decision was based on the fact that the casualties had been inflicted rapidly. The Marines went into a killing zone and were either killed or seriously wounded. Then, the history of the Vietnamese War was filled with [instances in which] you get a squad in trouble, you send out a platoon; the platoon gets in trouble, you send out a company; you send out another company. Before long night falls and you've got half a battalion out in a very tenuous position. My mission was to defend Khe Sanh Combat Base. I was thin. That's why I did not send aid to the Bravo Company patrol.[435]

I/Lt William F. Smith, an artillery FO recalls that within the 1/26 there was

> a lot of fighting, a lot of recriminations, a lot of bad things said; everybody was at each other's throats. It was total confusion and it took a long time to get it unscrewed. It was even a question of who went and was actually on the patrol... We couldn't give any close support or direct support because we still didn't know exactly where they were. We didn't really know until we started to get some word from the patrol itself that they had crossed the 'Brown Line,' which was code for the [access] road. There were two roads; which road did they cross? It was totally confused. Then we had to figure out not only which road they crossed, but where were they along the road? We really didn't know. Everything was going real fast. Hours went by in seconds, it seemed. Then the stragglers started to come in. It was wild! It was so wild you had to get out of there... Everybody was at a loss for what to do. Half the people wanted to send out a heavy relief force, but we were under orders not to run any combat patrols out of the base at that time. Everybody wanted blood, and at that time I think we would have very hastily run a battalion minus out there and gotten really in shit.. gone piecemeal to our oblivion.[436]

Sgt Fitch reported a rather furious debate in the command whether or not to dispatch a relief force or to remain. The battalion commander [LtCol James B. Wilkinson] felt that if Delta Company (which was eager to go) to reinforce B-3, they would be lost since there were just too many NVA and they were too well entrenched.[437]

In a SPECAT EXCLUSIVE message from Colonel Lownds to Major General Tompkins, CG, 3rd MarDiv, Colonel Lownds reported, "Due to difficulty in interviewing members of Bravo 3 it is difficult to determine status of 25 MIAs. However, it is surmised a considerable number were hit in the initial ambush. Naturally it is my desire to recover the 25 MIAs but am sure it would take a minimum of two companies and probably a battalion which as you know I cannot afford to use at this time."[438]

*

Meanwhile, Maj Dennis J. Kiely of VMF(AW)-235 launched from DaNang on flight WING NECK 517, a flight of two F-8 jet aircraft, at 1230H. The target was troops in trenches at XD 856400.

The TACA, FINGERPRINT TWO THREE, informed Maj Kiely that the weather and ceiling were particularly poor for operations, but that the situation at that time warranted the effort. Ceilings varied from 500 to 300 overcast throughout the target and surrounding areas, and the only avenue of approach was up a small valley which afforded a quick look at the target before releasing their ordnance.

The lead aircraft dropped eight DELTA-ONE-ALFAs (250-pound snake-eye bombs), and Maj Kiely approached the target from the east at 400 to 450 knots and an altitude of approximately 100 feet to drop one of his two DELTA-NINEs (napalm). The second run, during which he planned to drop the other DELTA NINE, was a no-drop due to an obscured target.

He then noticed a rapid loss in fuel, and aborted the remainder of the mission. Upon return to DaNang at 1353H, it was discovered that his aircraft had taken seven hits from heavy automatic weapons and .50 caliber machinegun fire.[439]

Ironically, it was undoubtedly the enemy fire on his aircraft that saved Ron Ridgeway from certain death!

*

The agony of the commanders was not only the decision not to reinforce, but also the decision to bomb the area of contact. "Heavy suppressive fire was placed on the ambush site and suspected NVA mortar positions. These fires, along with our own friendly .50 cal, 106RR and 60mm mortars undoubtedly caused friendly casualties, but did, I feel, enable both platoons to break contact and return. The airborne controllers controlled air-strikes into the area consisting of rockets and napalm."[440] Ordnance expended into the trench system for the period 251300H - 260600H included: 3 rounds of 60mm mortars, 235 rounds of 81mm mortars, 47 rounds of 4.2-in. mortars, 11 rounds of 106mm RR, 25 rounds of 105mm howitzer, 75 rounds of 175mm, 2 rounds of 90mm tank, and in addition there were 35 CAS [Close Air Support] missions flown by the Air Force and 13 TPQ-10 flights expending 210 DELTA-2s (500-lb. bombs) and 8 DELTA-26s (M-117 750-lb bomb with a 1-second delay enabling it to penetrate 16-ft. before detonation).[441]

By noon the battle broke.[442] 1/Lt Thomas F. O'Toole, Jr., flying as an AO for G-2, 3rd Marine Division (Radio call sign SOUTHERN OSCAR) observed and reported the trench extending due north to within 30 meters of the KSCB perimeter. The new trench was an extension of a trench network in the vicinity of XD848404 to XD850405 and represented approx. 700 meters extension in less than 24 hours. The new trench was 2-ft. wide and approx. 4-ft. deep and terminated in a trench approx. 50 meters long running parallel to the KSCB wire. A large trench complex was observed containing 2 parallel extensions of trench network running northwest to within 15 meters of the KSCB wire at XD854417 and containing 50 - 100 NVA soldiers.[443]

O'Toole had other, sadder, things to report: fifteen or twenty Marines near the trench line at XD853409 to XD854409, bodies in helmets and flak jackets. Three of the bodies were lying together as if a machinegun crew [perhaps Ridgeway, Ruff, and Geller]. One man was bandaged on chest and another lying close by, as if a corpsman, giving aid. On the second pass, the AO received fire from nearby and from one figure who stood up from among the bodies, probably a NVA who was searching the bodies and had dropped to the ground to avoid detection. The bodies were in the center of the trench complex, in open area.[444]

O'Toole accompanied a Marine Birddog piloted by John L. Clark of VMO-6, sat right over that platoon when it got wiped out.[445] The next day, 26 February, as he landed he was met by a Colonel from the Division staff and led into the CG's office where a stenographer took down his statement on one of those little court-room machines:

> There were about 15 Marines in the trench trying to make it back and although I couldn't see it, I thought they were taking fire because the rear man was shooting to the rear. I informed the 26th Marines and asked what was going on. They said they had a unit out there that had made contact. They had lost communication with them. I told them I had at least 15 of them about 100 meters outside the wire, and I was worried that the extension [of the trench system], which went parallel to the perimeter, would be a NVA ambush... We went back to the area of the bunker complex and in the middle of a field surrounded on all sides by the trenches.. there appeared to be 15 to 20 Marine bodies. I advised the pilot and we turned around and I did identify them as Marine bodies because of the flak jackets, helmets. Three men lay together as if they had been a machinegun crew. One man was bandaged on the chest while another may lay beside him as if he were a corpsman. I didn't get a good look, so we came around again. This time a figure from among the bodies stood up and fired at us, and with that the entire trench line opened up and we received three hits on the aircraft. The grids would be approximately XD853-854409. The pilot said that they were probably NVA trying to trick us, but I told him at that time that maybe [while] all weren't

[445] Conversation with Thomas O'Toole, 08 August 1990.

Marines, I was thoroughly convinced that the majority were... Later in the afternoon we were shot out of the area by .50 caliber machine guns from Hill 471 to the south [and] we could not fly over that area any further.. We ran air strikes.. on an area about 600 meters south of where the bodies were, trying to hit the ville at XD851404 and the ville at XD848403 when a yellow smoke came out of the area where we had seen the bodies. We could not go out and check. I called 26th Marines. They said they had no friendlies further than 200 meters from the perimeter. We continued the air strike around that position.[446]

*

HM3 Thomas E. Casey had just arrived at Khe Sanh and, along with a few others, ventured outside the perimeter to assist any returning WIA. They came upon PFC Edward C. Rayburn, not far from the perimeter. "He walked to us as we walked to his aid. I was surprised to see the lower jaw was completely gone! I examined him quickly and saw that he was not bleeding and did not appear to be in shock. One of the Marines wanted him to lie down. He didn't want to do that. The Marine said to me, 'Shouldn't he be laying down, Doc?' I said, 'Well he made it all the way back here and it's hard to carry a guy out of here, so if he wants to walk, let him.' I don't recall putting any dressing on him. At that time I had no serum albumin which may have been good to start. He did not want to leave and kept looking back from where he came. I asked him then if he was trying to tell us something and he nodded his head 'yes.' I asked him if there were others still alive out there and he seemed relieved and very much shook his head 'yes.' Once he had communicated that to us he was ready to be helped back to the base, but only then! We found no others that day and darkness was coming. We looked for awhile and returned. That wounded Marine did all he could possibly do for his buddies that day!"[447]

*

When B-1 became frozen in place, other Marines from B-1, including LCPL William H. Woolman, LCPL Edward I. Prendergast, CPL Wood N. Lathrop, and one or two others, moved down the trail.[448] Wood Lathrop is standing a few feet off to the side, and "Chief," PFC John P. Washa, is dragging Lt Jacques. Prendergast helped carry the Lieutenant. "I couldn't get a pulse."[449] A civilian photographer, Robert Ellison, had lived with the Marines of B/1/26 in their trenches for several weeks. Wood Lathrop recalls, "He was in the trenches with us every day. When we went out there to rescue the 3rd Platoon, we didn't know how to get through the mine field. He led us through the mine field! I'm serious! He was out there with a camera in one hand and a .45 in the other. He was something else. He was probably the bravest man there as far as I was concerned."[450] Ellison snapped a photo of Marines dragging back the body of Lt Jacques which appeared in a 2-page, full-color spread, in the 18 March 1968 issue of *Newsweek*.

Prendergast continues:

On our left flank the NVA were moving up a trench we had passed on our way out. A machinegun team from our wire was keeping them occupied and waving frantically for us to get behind the wire. The Chief [Washa] thought everyone was dead because they were out in the open when it happened. Capt Pipes came on the radio and ordered us to come in. I knew by the tone of his voice that he was upset and probably following orders from someone higher to pull back. By now air-strikes were hitting the area... About 4 PM down the trench line to my right someone was firing at something moving outside the wire. It looked like a wounded Marine. Wishing it was Fred [Billingham, Prendergast's friend], I ran out the opening in the wire that 3rd Platoon had gone out that morning. When I reached the body I was in front of the 1st Platoon's machine gun pit, next to the old trash dump. It was the Corpsman from 3rd Platoon I only knew as 'Motown Doc' (John Cicala). He had a sucking chest wound

---

[446] Statement of 1/Lt Thomas F. O'Toole, Jr., 093732/0302, G-2 (AO) on flight of 25 Feb 1968. Copy furnished by Mr. O'Toole. The low passes over the bodies were at 60, 70 miles per hour, 15 or so feet off the ground. [Conversation with Thomas O'Toole, 08 August 1990].

[447] Letter from Thomas E. Casey, 02 February 1995. Casey died from an abdominal aneurysm 01 March 1998. James Hebron notes that Rayburn had been a very handsome guy, but after this, his girl friend left him. His jaw was fastened to his shoulder and he used his two front teeth to mash French fried potatoes. He became addicted to drugs, and committed suicide in 1979 while in a VA hospital. [Conversation with James Hebron, 26 March 1987.] Tom Winston, who had been badly burned during the Khe Sanh siege on 09 April 1968, spent a year in the U.S. Naval Hospital, Balboa, along with Ed Rayburn. According to Winston, the doctors took a rib out of Rayburn in order to construct a jaw and also made a graft on his chest to look like a chin. The doctors failed, however, to clean the jaw bone where it was shot off, and after gangrene developed, they had to remove it, repeat the procedure, and Rayburn became very depressed. Winston recalls that he was a fantastic person. "He used to blow smoke rings out of his trach!" [Conversations with Thomas Winston, 30 July 1996 and 23 August 1996. Sometime around 1997, Winston died from Huntington's Disease].

[448] Conversation with Wood Lathrop, 12 March 1993; Edward I. Prendergast, "Biography," 8 November 1988.

[449] Prendergast, "Biography," cited.

[450] Conversation with Wood Lathrop, 12 March 1993.

with cigarette wrapper on it, face and leg wounds. Doc was white as a ghost mumbling deliriously that everyone was dead.[451]

PFC Bright repeatedly exposed himself to enemy fire to provide covering fire until his platoon maneuvered out of the fire.[452] He then moved towards the combat base, he noticed the ARVN Rangers trying to flag him down. "Hey, don't go that way! Get out of there! Stop!" He later commented, "I didn't realize it at the time until I came up to a barbed wire fence with the triangle-shaped [sign that indicates a mine field], but I was facing it from the wrong side. I just went through a mine field!"[453] He then went back out when he spotted a Marine walking back "like he was in a daze. I hurried up real quick and went back out. As soon as I went out to him, it looked like the back side of him was smoking, like a fire in a trash barrel, and the fire had gone out and all there is, is smoke. When I brought my hand up to touch his shoulder to help him along, part of him and his clothing came off in my hand. I peeked over the side of him and realized he had just been hit with a napalm strike. We had to stand a stretcher up to him, get him to lean on it, then try to get him to grab hold it, then lay him down. I remember him say, 'God, it hurts!' He kept saying this over and over."[454]

GySgt Patrick E. Duffy (S-2 Chief in the 1/26 COC) and 1/Lt William F. Smith both recall that in succeeding days, Capt. Ken Pipes sat up all night on the radio and cried.[455]

*

Survivors of B-3 trickled back to the base throughout the afternoon and night through an open area that afforded no cover. Those who returned did so singly—Doc Cicala, Ed Rayburn, Johnny Bellina, Thomas Detrick—and could say little. Ted Golab recalls:

> They didn't know what was going on. They were all shell-shocked. For some of them, it was their first fire-fight. You'd ask them what happened and they'd just say, 'I got knocked out;' 'a grenade went off,' or something like that, and woke up, and 'here I am.' Or, the guy that came back and half hour later said that he was fighting and the next thing you know he was the only one there, and he was just fighting by himself. He ran out of ammunition, and he said he just stayed there, and after that he just came back and after everything was over with he just ran back to the lines when all the firing stopped ... He said it took him forever. He said he was scared. He didn't want to go too quick—run back—because he didn't know if they were still going to be there or what happened.[456]

HM3 Frank Vincent Calzia, on his return, suddenly spotted another unit of North Vietnamese soldiers attempting to envelop his position. Concerned only with the safety of his patients, he unhesitatingly seized a rifle and commenced directing a heavy volume of fire on the advancing force in an attempt to prevent further injury to his already wounded comrades. His heroic and timely actions prevented the enemy soldiers from isolating his position and enabled h is companions to evacuate the wounded.[457]

The Kit Carson Scout returned carrying an AK-47 rifle, saying that an enemy soldier was about to shoot him but the rifle jammed. The Kit Carson Scout killed the NVA soldier and took his AK-47. ("And ever since until I left country, he always had it with him, because he figured this was the rifle that was going to kill him and he wanted to keep it.").[458]

*

Initial casualty figures from the Third and First Platoons of B/1/26 today were: 1 KIA, 13 WIA (medevaced), 8 WIA (minor), and 25 MIA.[459]Obviously, these figures were soon readjusted. "After thorough investigation into the results of the contact, the following totals are submitted: 9 FR KIA, 15 WIAE, 10 FR WIANE, 19 MIA. Of the 9 FR KIA, only 1 body was recovered. Add 8 FR KIA, 2 WIAE, 2 FR WIANE, and drop 6 MIA.[460] A "minor" WIA (wounded in action) was not simply someone who received a scratch while entering a bunker during incoming. The following wounds of Marines who were on the 25 February 1968 patrol were designated as "minor" or "non-serious:" shrapnel in back; gunshot—back; gunshot-right shoulder and right hand; shrapnel in back; gunshot-lower arm; gunshot-upper arm. These are the wounded that were not medically evacuated, but continued their duties at khe Sanh.[461]

XD 826387 – 5 Anti-aircraft/Automatic Weapons positions.

POW

Still alive, Ridgeway, Geller, and Ruff, wounded and surrounded by NVA, moved in and out of consciousness. Ridgeway remembers a birddog aircraft flying over them. "My left arm was broken. Geller's right arm was broken and he was on his back. He reached down to the man that was wounded [Ruff] and pulled off a smoke grenade. We used this to notify the birddog that someone was alive. I held it and he pulled the pin and I threw it to the right, looked up and all I could see was a jet coming straight down. We ducked and the napalm hit back behind the NVA trench lines. We got small fragments of the napalm on us but we were able to knock it off as we laid there.. I came to in the afternoon around 3 or 4 o'clock. Both men were still alive. The man with the broken arm and I talked just to keep each other's morale up because we didn't know what was going to happen. The other man was delirious. All he wanted was a cigarette. He kept moving around. We told him to be still. He was afraid we were going to leave him. We told him that we weren't going to leave him."[463] Geller came up on his knees, and as he did, grenades were thrown, one of which killed him. When the grenades ceased, Ridgeway saw small arms fire from the right front traversing the field from right to left, firing into the bodies. A round hit between Ruff and Ridgeway causing Ridgeway to flinch. Another burst was fired in his direction. A round ricocheted off his helmet, hitting him in the left buttock and Ruff received a round in his leg, breaking the bone. Ridgeway lost consciousness.[464]

RONALD RIDGEWAY

*

Ridgeway woke. It was dark. It was around midnight. When I came to,

artillery was going off during the night sometime. It

> was going off all around us, in front of us, behind us, all around us. The thing that I said was 'Ruff, Ruff, are you still alive?' He said, 'Yeah.' I asked him if he was alright and he said that all he had was a busted arm. I said 'We've got to get out of here because of the fire. We got to get back. We have to get to a trench line to get away from the shrapnel.'
>
> He said, 'Let's go where Stoney was.' Stoney was by a trench. I said, 'Which direction was it?' Now he didn't remember which way he was facing or where he saw Stoney last. I still knew that the deep trench was in front of me. There was a small one behind in the trees. So I said, 'We've to get back to the small one.'"[465]

That would be away from the NVA who were in the large trench, only about fifteen meters from them.

> About that time, another round hit, and Ruff hollered again that he had been hit. He said that his leg was busted. I had already tried to remove my flak jacket and tried to push my pack off, but I could not push up with all my gear on. Well, just as I started to take it off, Ruff got hit.
>
> I said, 'We've got to get up and move.' And he said that his leg was broken. I told him to roll and crawl, and he got pissed a little bit because he said, 'If you can't crawl you can't move." He wasn't going any place. And about that time another round went off and he said that he was hit in the temple and that he was bleeding to death. All I could tell him was 'Put your hand against it and press on it, that we had to stay here and just hope we didn't get hit.[466]

He said he was already holding it, but that it wouldn't stop.

> So we just curled up underneath our flak jackets and put our helmets down and got as close to the ground as we could. That was the last thing I remember.[467]

Abandonment—the feeling almost everyone had at Khe Sanh no matter what year or what circumstance they were at Khe Sanh—was now especially and painfully felt.

> Everyone was always trained to think: We will always come and get you; being Marines, no one will be left on the battlefield. And here we were, a Major and a Lieutenant Colonel and a First Lieutenant basically saying, 'We're going to kill you.' I had a lot of problems with my people over it. We blew the place away.[468]

The MIAs now became a focus of preoccupation in the 1/26 COC. It was "..almost like an insult, about the worst thing that ever happened to the unit ... Regiment was talking about it all the time. It got to be almost like the horrible family secret that you didn't want to talk about. Pipes used sit up on the radio and cry all night."[469]

Regiment was indeed having a problem piecing together the facts. In a personal message to MajGen Tompkins, Col Lownds noted:

> "..Due to difficulty in interviewing members of BRAVO-3, it is difficult to determine status of 25 MIAs. However, it is surmised a considerable number were hit in the initial ambush. Naturally it is my desire to recover the 25 MIAs but am sure it would take a minimum of two companies and probably a battalion which as you know I cannot afford to use at this time ... I have committed another platoon and a Comm Hq to fill the void left by today's casualties [in the GRAY Sector of the perimeter defense]. This leaves me with one platoon in reserve and a reaction force (cooks and bakers etc) approx. 300.[470]

One of the artillery officers present in the 1/26 COC recalls the scene: "Every morning there were briefings and debriefings, interviews. And I think regiment was interviewing the survivors too, again trying to piece together who it was that was out there, cause it was days before anybody knew exactly how many people were there and who they were. And then it went into even more detail when the aerial photographs came in, 'cause they requested aerial photograph after aerial photograph after aerial photograph to pin-point the bodies—exactly who was there, where they were. And that went on for a long, long time ... I remember everybody talking like, 'They haven't taken the weapons. I could never understand why [they talked about weapons that were probably damaged beyond use]. But everyone wanted to have something to talk about."[471]

[471] Conversation with William Smith, 16 March 1985

*

During the early morning hours of 26 February, just past midnight, a FOB-3 OP heard enemy activity and possible tracked vehicles at XD 845404, then numerous vehicles at XD 945403. Artillery missions were directed against these noises.[472] At 0409H, 26th Marines set Anti-Mechanized Condition #3 and continued PTQ-10 controlled airstrikes and artillery missions at XD 845404 resulting in numerous secondary and large fires.[473]

Morning came. Ridgeway awoke.

> When I came to in the morning somebody was pulling my arm. The first thing that I thought of was that somebody was there who came out to get us. I just looked up. And my watch had a stretch band and he had led my arm up by the watch. I looked up and it was the NVA. He looked at me. He jumped about ten feet backwards. My watch came off. He looked and looked. At the time I didn't care. I knew they were going to shoot me. There was nothing I could do. I just put my head down and he started hollering and he kicked me. I looked up and there was nothing but dinks around.
>
> He started hollering and about eight or nine more guys came out. They took my pack off. My flak jacket, pulled me up and started pointing—talking Vietnamese. The guy who had been wounded with shrapnel, they kicked on his helmet, making sure he was dead, and they told me, 'Move!'."

Ridgeway then noticed the bodies of Baptiste, Ruff, Geller, a demolitions man, and a black man called "Stoney" and others he could not identify.

> They took me to the nearest trench line. They gave me a dirty rice b all and my canteen of water. They brought American field dressings, and they put them against my wounds and put me in a little hole in the side of the trench line. I don't remember how long I stayed there. Then they took me out and said, 'Move!'
>
> I moved about fifty to seventy-five meters to the camp and CP. It was a 'Yard' village that had been bombed out [probably the Areng, Clong Sareh settlements]. There were NVA trench lines and bunkers. Some of them were approximately fifteen feet under the ground and there were three levels. On the way up, walking down the trench line where it was shallow, I stood up and raised my head. I could see inside the Khe Sanh perimeter. I could see the Americans walking around. The NVA got bent out of shape and told me to 'get back down,' and they put me in a bunker.
>
> They came back about ten minutes later and told me to go with them to the trench. We came to a hole, approximately 35 to 40 feet in diameter that I believed to be the battalion CP. They brought me up to the front of it and there were more NVA officers running around there than I thought they had in the whole military."

Thus began the long and painful ordeal of Ron Ridgeway as he walked through Khe Sanh Village and then to a large rear area of NVA in Laos. He eventually met some of the American POWs from the Lang Vei Army Special Forces camp that had earlier been overrun—Staff Sergeant Thompson, Specialist McMurray, and Sergeant First Class Brande, as well as Specialist Fourth Class Young who was captured on 30 January. The NVA captors were initially kind to Ridgeway:

> When I was first captured in the jungle, I had three men with me as stretcher bearers in case I needed them, and five or six guards. They treated me good. I ate the same things they did and they shared their cigarettes with me. Something hard to get in the jungle are cigarettes. One guard was down to his last three cigarettes and he took one out, looked at me, broke it in half and gave it to me. They gave me some meat and fish. They never treated me bad or anything. There was a lot of NVA moving south and they all said 'Hi' to the Americans.

(Ridgeway's MIA status was changed to KIA subsequent to 15 August 1968 "when remains, later thought to be nine members of the patrol, were recovered from the ambush site. Positive identification of some remains was impossible because of intense bombardment and deterioration from the tactical environment. The remains of what was thought to have been Sergeant Ridgeway were interred in a communal grave at Jefferson Barracks, St. Louis, Missouri. Sgt Ridgeway's status was changed to POW on 27 January 1973 subsequent to the receipt of the Provisional Revolutionary Government's list of U.S. POWs captured in Southeast Asia).

In late February, 1968, an agent reported passing approximately twelve groups of U.S. and ARVN POWs, each group containing ten to twenty men, including a total of about twenty to thirty Americans and approximately 130 ARVN POWs. The agent, infiltrating South Vietnam with a NVA unit, learned they had been captured at "Lang Cay" Village [probably "Lang Vei"]

near Khe Sanh. The Americans were wearing standard jungle uniforms and boots. Some wore "strange caps" which were olive drab and made of cloth. Two were being carried on stretchers by fellow prisoners.[474]

Due to this live sighting report, discrepancies in the numbers of MIA in the various official reports, the subsequent return of Ronald Ridgeway who was also assumed killed, and the lack of positive identification of the remains, Mrs. Ruth Brellenthin remains [as of 1986] unconvinced that her husband died on 25 February 1968.[475] She still wonders.

Ed Rayburn, remembered as a very handsome 18 year-old before the 25th, had lost his entire lower jaw. Upon return home he visited the family of Ken Claire to set their minds at rest by telling them everything he witnessed, especially that Ken was indeed dead. Doctors attempted to graft his head to his shoulder. He could only eat fluids together with some soft foods which could be mashed against his two remaining front teeth and then swallowed. He experienced terrible emotional readjustment problems. His girl friend left him. He got heavy into drugs and became dependent on them. He committed suicide in a VA Hospital at Kalamazoo, Michigan, in the late 1970s.[476] In 2010 and 2011, Mr. Michael Preston attempted to get Rayburn's name added to the Vietnam Memorial Wall in D.C., arguing that it was the medications provided by the VA that led to his suicide.

*

On 8 March, between 0630H – 0815H, a patrol from the 37th ARVN Ranger Battalion encountered one Marine body at XD855404. Identification was missing and the patrol was unable to retrieve the remains. It was assumed this was one of the un-recovered KIAs or MIAs from the B-3 patrol.[477] Captain Pierce Durham of FOB-3 led a patrol to the area of contact in early March. Accompanying Durham were three to five Americans who had never before been in combat and an equal number of Bru, a total of about ten. They reached the KIA Marines and suddenly were showered with grenades. "I reported back that the bodies were there. They were in the best condition they could possibly be. The only thing missing were flak jackets, helmets, and the gas masks. We got in contact and had to get out of there. Colonel Lownds wanted me and my 10 men to carry the 25 bodies back!"[478]

On 30 March, when Lt John Kaheny returned to KSCB following an emergency leave, he "ran into Ken Pipes who I think is one of the best Marines I've ever had to serve with and who was woefully distraught over the fact that his Marines had been left to stay outside the wire for 30 days. I found out later from [1/Lt] Walt[on F.] Chapman, who was the [Marine Corps] Commandant's son, who had been in Delta Company [1/26], that the order not to bring back those bodies had come from the White House itself. Walt, as the Commandant's son, was privileged to get in on some briefings back in Washington when he got home in February, and later when I served with him again at MCRD he related that story to me. It was kind of a reflection of the paranoia that was rampant in the White House. My own personal feelings were then that if President Johnson had one-tenth of the courage of the Marines at Khe Sanh, the siege wouldn't have lasted as long as it did."[479]

*

Like the Vietnam War in general, certainly the Battle at Khe Sanh specifically, there were just too many questions, too many unresolved and nagging nightmarish images, a certain vaporous vagueness that could never form closure to the soul. It could never be a finished chapter. It remains an unhealing wound. We will never know why Jacques went out as far as her did. We will never know the real fate of some of those who were in that patrol. We will never know the many heroic actions of the brave young men who left no one to chronicle their action. We will never know their last words or thoughts. We will never know the degree of the devastating impact of grief and loss to wives, girl friends, mothers and fathers, brothers and sisters, children—how many died of heart attacks, succumbed to deep depression, from the scars of battle are always born by the living, and battle never finishes for those who have participated in it.

---

[474] HQ 6499th Special Activities Group Rpt #1516-0724-69. The debriefer noted the caps described fit a description of USMC utility covers. Note: these caps could have been Seabee covers which are exactly like the USMC covers except they do not have the black USMC emblem printed on the front. The Seabees had just completed construction of the new Lang Vei camp and undoubtedly left behind uniform items. It is unlikely these were Marines from the 25 February action since the Marines wore helmets; their soft covers would have been back on the combat base. Ronald Ridgeway's debrief states he spent five years in Laos and during this time eventually met Americans captured at Lang Vei, but none are mentioned from the 25 February actions, which, had some still been alive, he undoubtedly would have encountered.

[478] Conversation with Pierce Durham, 13 February 1989.

[479] Taped comments of John M. Kaheny, 30 November 1986.

Some do know; those who were involved can never forget. Jeff Culpepper, having departed 3d Platoon of B/1/26 on 23 February, later wrote home:

> "Dear folks. The whole damn war became too real today. As soon as I got to Phu Bai I found out that my whole squad was killed along with almost my entire platoon ... It happened about two days after I left. I just found out. Every buddy I had is dead ... I just don't know what to say. I should have been right there with them. They were all great guys. We were all tight. The war has taken too many of my friends now. You can't imagine what I'm going through right now. I don't care anymore. I'm going to be the craziest shit here in VN because I have revenge running through my veins. Nothing can stop me now! If I die I'll feel proud to be back with them. I'm sorry mom, but I have suffered 1000 times more than you can imagine. I ran out on those guys and I am going to make it up to them. No one can change my mind ... about 20 guys that meant the world to me. Their parents, wives, and girl friends all have lost more than can be replaced.."[480]

*

It is possible that this tragedy may have had a positive side. Jacques' venturing too far might have served the purpose of disclosing a poised, a regimental-size enemy force poised to assault the combat base or 1/9's position at the Rock Quarry, which was then destroyed by supporting arms that rained a fire storm hail of artillery and aerial bombardment. It might have broken up the assault that was to occur the night of 29Feb/01Mar. It is also possible that what Ronald Ridgeway subsequently told his captors made them delay an assault, a delay that decimated them due to friendly supporting arms striking them. "One day they were trying to interrogate me, and I inflated the numbers. I inflated the truth – the number of men on the base, the number of rows of concertina, and everything else. I made it worse than what it was from their side."[481] Ridgeway's words certainly must have had a chilling effect on those officers poised to execute an attack on the Combat Base. Of these minor, totally unexpected, very small details are entire battles determined! (Of course, Ridgeway is the first to dismiss the large impact of his words. When he was told, "Ronald, you may have saved us!" he replied, "O, no, I really don't think so.")[482]

6. THE NORTH VIETNAMESE ACCOUNT OF THE BATTLE OF 25 FEB 1968

A WEAKENED NVA FORCE

Before quoting the North Vietnamese account of the battle of 25 February 1968, it is important to note that the NVA force involved in ambushing the patrol of B-3 had been significantly weakened by a B-52 strike a few weeks earlier. The official NVA history of the 304th Division[483] records:

> Prior to the 9th Regiment's move into encircling positions there was an unexpected development, that being that on the night of the 6th of February, while the 2nd battalion was moving into its regrouping positions, it was hit by three B-52 strikes while it was along the HOC COC GIANG stream. The entire battalion suffered nearly 200 casualties. Immediately following the surprise B-52 strike, Comrade DU NHAN, the Regiment's Deputy Political Officer, Regimental staff and Division staff arrived at the site to resolve its aftermath. They quickly recovered the wounded in order to send them to the medics, buried the dead, organized recovery of the survivors, and strengthened the troops' resolve so they could resolutely carry out the mission of higher command had assigned to them.
>
> The losses in the 2nd Battalion of the 9th Regiment not only led to a loss of a portion of the combat forces, but it also had an impact on the combat resolve of the troops. In light of this situation, there were thoughts by some that the 2nd Battalion should not be employed in the encirclement, a mission that required a determined combat attitude and ability to withstand high casualties and ferocious fighting. However, the military and political

[483] *Su Doan 304 (Ky Su) Tap II.* [304th Division (Chronology), Volume 2. Published by the People's Army Publishing House (Nha Xuat Ban Quan Nhan Dan], Hanoi, 1990. Published under direction of the Party Current Affairs Committee and the Commander of the 304th Division, Major General Hoan Dan, Lt General Nguyen Trong Hop. Written by Nguyen Huy Toan—Chapters I, II, III, and Conclusions; Pham Quang Dinh—Chapters IV, V, and VI. Trans Sedgwick Tourison. Stubbe, Ray W., *B5-T8 In 48 QXD*, Wauwatosa WI, 2006, p. 79.

commanders of the 2nd Battalion, after reestablishing the morale of the troops proposed to the regimental command staff that the battalion accept the mission of participating in the encirclement. The battalion officers argued that in light of the unit's heavy losses, the fact that a number of cadre... However, the entire battalion wanted to directly attack the Americans in order to get revenge for their unit. The Division and Regimental cadre came down to help the 2nd Battalion build its determination and resolve and sent the battalion into combat. A number of soldiers deserted, or shot themselves so they could be taken to the rear, but now they all sprang forward to participate in the encirclement. The entire command and leadership of the 2nd Battalion was committed to sending the unit into the encirclement because in reality the combat would provide the fastest way to train the unit and through that mechanism the unit would mature.

The weakened 2nd Battalion, 9th Regiment, 304th Division, then moved to the strongpoint of Siege Position 3 just outside the KSCB.[484]

Strong Point 3 was the responsibility of the 8th Company, 2nd Battalion, and was divided into three areas. The principle strong point of the position was 600 meters southwest of the Khe Sanh barbed wire perimeter where our troops had established a fire base on an unnamed high point opposite Khe Sanh and separated by a dry streambed with banks on each side, and from here they could see clearly the entire Khe Sanh base area. 400 meters southwest of the primary strong point was the secondary strong point at CHAU LONG CHANH [Note: XD840408, approx 1,000 meters SW of KSCB] and 300 meters southeast of the main strong point was the secondary strongpoint. All three strong points were like the three legs on a stool and this was one of the most advantageous points of the encirclement. Form this group of strong points we dug a communications trench for about 300 meters toward the enemy and at many places it even entered the enemy's barbed wire defenses. From this position 82mm mortars, B40, B41, recoilless rifles, and particularly a 12.7mm heavy machinegun operated by BUI XUAN CHUC created continuous casualties and ... on the enemy.

There was no shortage of enemy fire into this area including that from B52 aircraft. There were times B52s bombed inside the barbed wire. When we first established this position, this was an area that was covered with light vegetation but now the hillside had been flattened meters into the ground.

The enemy bombs and bullets were mixed with the sand and the dirt but our positions held. In addition to the infantry our indirect fire units were also armed with assault rifles so that when necessary they could fight the same as an infantryman. During one ten-day period of the encirclement, the company's strong point was supported by and closely coordinated with the 122mm rockets and D74 artillery causing the enemy to suffer many casualties and contributing to our control over the airstrip and preventing the enemy from re-supplying the base.

The encircling position of the 8th Company, 2nd Battalion, was like a thorn in the enemy's eye. The 8th Company's Strong Point here had 32 weapons of which there were two 60mm mortars, three B41s, two B-40s, and after ten days of combat 20 men remained and if one adds in the fire support detachment the strength as of the 25th of February, was 39 people.

25 February 1968: 304 DIVISION HISTORY

The official history of the 304th Division continues with an account of the battle of 25 February[485] :

Early in the morning of 25 February, the enemy sent two companies of Marines and a company of Vietnamese who took advantage of the fog to come along the dry stream bed, directly in front of Strong Point Number 3. They were divided into two wings. The first wing of about one company of Americans followed the streambed into the area that was on the right flank of the strong point. The second force, consisting of one American company and a company of Vietnamese was broken down into two elements which took advantage of our communications trench in order to attack along the left flank of the strong point.

At 0850, the lead element on the left encountered two of our troops guarding the forward area. The enemy opened fire and these two were killed on the spot, and it was at that point that we first discovered the enemy. The troops holding the strong point quickly went into their combat positions. Platoon Leader NGUYEN QUOC THANG, upon observing many US troops advancing, motivated the troops and assigned men missions and waited for the enemy to approach closer before opening fire. With strong fire power and experienced troops, the first fire left

[484] Ibid., pp. 80-81.
[485] *Ibid.*

enemy bodies at the strong point. Light machine-gunner NGUYEN VAN LANG fired off two series of rounds and eliminated 19 of the enemy. The Americans were tall and big, and because they were so slow, many died. However those who remained alive continued the attack. Now they became the target for our mortar fire which fired into the troops and the counter-attack by the two companies of Americans and Vietnamese on the left flank was broken. The enemy was forced to withdraw and call in artillery and air-strikes on our positions. On the right flank the enemy took advantage of our efforts on the left flank and advanced forward. We only began to fire when the enemy was about 20 meters from our Combat Trench #1. Having killed a number, but with the enemy having a large force and having entered our position, they occupied a portion of the combat trench. They intended to use our trench to continue the attack. But because the Americans were so big and because they carried so much equipment, in a trench of ours that was so narrow, they could not move easily and in some cases were forced out of the trench. In the face of this situation, the company sent Comrade THE's squad to move in from the south and the squad of Comrade CHUC to move along the communications trench attacking from the north. Being attacked unexpectedly on their flanks by two squads, the commander and the radio operator were eliminated. The enemy force was thrown into confusion to the point that the artillery from Khe Sanh even fired into his own troops. The enemy was driven out of this strong point and withdrew to the rear, leaving 40 dead bodies in the communications trench that they had so recently occupied.

At 1015, the two enemy forces were forced to withdraw and ended their counter-attack. When we inspected the battlefield to recover weapons we counted 125 dead Americans but according to the statements from two Vietnamese who had surrendered from Khe Sanh, on 25 February they had 200 KIA of whom 180 were Americans.

When we went out on the battlefield to recover the weapons, we counted the bodies of 125 dead Americans, but according to the statements of South Vietnamese soldiers who had been at Khe Sanh and surrendered that on the 25th of February, about 200 had been killed and of those 180 were Americans.[486]

We permitted the enemy to recover its battle dead with the condition that each time two people would come out under a white flag, but the enemy ignored it.

At twelve o'clock noon that day, three reconnaissance aircraft were targeting for a large number of tactical jet aircraft who ferociously attacked our positions. After that they refueled and dropped napalm in order to burn up bodies of the dead. [They're referring to the American dead]. Of those there were even some who were only seriously wounded. The anti-aircraft units together with the infantry troops on the battlefield coordinated their operations to shoot down four aircraft and in particular, Comrade TAI, an infantryman, used 25 rounds from his assault rifle to shoot down a jet aircraft. That evening the command group and headquarters staff of the 2nd Battalion had moved its forces into Strong Point in order to motivate the troops and so that they could together rebuild Strong Point Number 3. After the attack the Division arranged for the command cadre from each of the strong points involved in the encirclement to come and observe and get lessons learned from the site. The lesson of the attack against the enemy's counter-attack on the 25th of February by the 8th Company motivated the cadre and soldiers all across the Front. The first time that an American Marine company had been completely wiped out [Note: only the majority of one platoon, B-3 of 1/26] and an enemy counter-attack had been chastised. The Division command quickly awarded battlefield commendations to the 8th Company.

25 FEB 1968: STUDIES OF BATTLES FOUGHT BY VIETNAM'S 2ND CORPS[487]

After we gained control of Khe Sanh village, Huoi San[488] and the Lang Vei strong-point, enemy forces were forced back into a passive, defensive posture. They reacted clumsily and were forced to fall back to try to hold out while waiting for reinforcements to relieve the siege.

[486] There were 9 KIA, 1 WIAE, 10 WIANE, 19 MIA (one subsequently known as a POW) (Ref: 26Mar 041100Z/Mar68, Operation SCOTLAND SITREP #499.

[487] "Counterattack at No-Name Hill (south of Ta Con) by 8th Company, 2nd Battalion, 9th Infantry Regiment (25 February 1968): [*Tran Phuc Kich Tai Doi Khong Ten (Nam Ta Con) Cua Dai Doi 8 Tieu Doan 2 Trung Doan Bo Binh 9*), in *Second Corps: Battles During the War of Liberation (1945-1975)*, Internal Distribution Only, *Quan Doan II: Nhung Dan Danh Trong Chien Tranh Giai Phong (1945-1975) (Luu Hanh Noi Bo)*, II Corps Headquarters: People's Army Publishing House, Hanoi, 1994, pp. 52-61 Trans by Merle Pribbenow.

[488] Ban Houei Sane, Laos, CP of BV-33 at XD 625379, overrun by tanks on 25 January 1968.

Assigned to conduct a siege attack on Ta Con[489] in an important sector, 8th Company, 2nd Infantry Battalion used steadfast defensive tactics combined with small-scale counterattacks against the flanks and rear of the enemy's attack formation. The cadre and enlisted men of 8th Company fought stalwartly and courageously. Holding firm control of their fighting positions, they repelled wave after wave of enemy attacks and gained an outstanding victory. This was a small-unit battle that displayed many strengths, achieved a high level of combat efficiency and contributed to the success of our siege of the enemy's Ta Con strong-point in February 1968.

I. General Situation

A. Terrain:

The fortified battle positions held by 8th Company, 2nd Battalion covered three areas. The primary fortified position was located 600 meters southwest of the Ta Con perimeter wire.

The position was located on No-Name Hill, directly opposite Ta Con and separated from the enemy base by a dry streambed. The two sides of the streambed sloped gently, and from this position our troops could clearly observe the entire enemy position at Ta Con. A secondary fortified position was located at Chau Long Chanh,[490] 400 meters southwest of our main position. Secondary Position 2 was located 300 meters to the southeast of our main fortified position. The ground in this area was soft and it was easy to dig all types of fortifications in this area.

Generally speaking the natural terrain was relatively advantageous for us to build solid defensive positions with good fields of vision and that could engage the enemy in many different directions. However, in this type of terrain the enemy was able to exploit his heavy firepower, especially his artillery and his air power, to attack us constantly, thereby causing many difficulties for us.

B. Enemy Situation

After a puppet commando company suffered heavy losses when it tried to push forward out of the position, every day enemy forces in Ta Con sent out anywhere from a platoon to a company (minus) to try to use the terrain to push forward to feel out and locate our forces. When they found that we had pushed our siege lines up right next to their outer perimeter wire on the southern side of the Ta Con strong-point, enemy reconnaissance and observation constantly circled overhead and enemy jet planes and artillery bombarded us savagely to prepare the way for large enemy forces to push out and recapture the area.

The enemy's greatest strength was his superior numbers and his large numbers of modern weapons. Our forces were very close to the enemy position, so the enemy could send out a large force and use the terrain to make surprise attacks on our fortified siege positions.

The enemy's weakness was that when he attacked he was forced to leave his fortifications and he could not fully exploit the power of his long-range artillery guns and B-52 strategic bombers because he did not dare use them so close to his own front lines. The siege mentality and the fear of being surrounded and isolated had caused a serious decline in the fighting spirit of his troops

C. Friendly situation

The 8th Company force defending the position originally had 32 combatants whose armament included two 60mm mortars, three B-41 [RPG-7] rocket launchers, and two B-40 [RPG-2] rocket launchers. After ten days of fighting, however, the company had only 20 able-bodied combatants left. If we also include the battalion's heavy weapons units stationed inside the company's position (an 82mm mortar, two recoilless rifles, and a number of B-40 and B-41 gunners), there were a total of 39 men defending the position. The main fortified position and the two secondary positions formed a tripod, and this was one of our most effective siege attack complexes. From this fortified complex, we dug more than 300 meters of trenches toward the enemy lines, and in one place our trench-line had penetrated the enemy's perimeter wire. From this siege position our heavy weapons and especially the 12.7mm machinegun commanded by Comrade Bui Xuan Chuc constantly inflicted casualties on enemy forces. The enemy used all types weapons to destroy the trees and vegetation, and the enemy fired reduced the height of the sides of the hill by a dozen meters or more, but our position still held firm.

In addition to our infantrymen, the heavy weapons units were also equipped with assault rifles and hand grenades so that when necessary they could fight close quarters battles. During ten days of siege attacks, the company's fighting positions had received close support from higher-level artillery guns and had helped to dominate the enemy airfield and completely cut off the enemy's supply line.

II. Preparation for Battle

---

[489] Ta Con refers to Khe Sanh Combat Base.

[490] XD 835409.

A. Higher Authority's Battle Intentions

Based on the actual course of developments on the battlefield, our policy was to resolutely send our siege forces forward against the enemy's Ta Con strong-point in order to totally cut the enemy's supply line. This would force the enemy to send out relief forces, thereby enabling us to fight enemy forces while they were outside of fortified defensive positions. Our forces had to combine siege attacks with constant readiness to kill enemy forces if they pushed out from the enemy position and prepare forces to fight small-scale and medium-scale battles

B. 8th Company's Assigned Mission

The company, reinforced by battalion heavy weapons units and supported by higher-level artillery, was responsible for, together with other friendly units, pushing in close and conducting siege attacks into the enemy's front line along the southern perimeter of the Ta Con base, while at the same time maintaining a firm hold on the No-Name Hill area and blocking and destroying any enemy forces trying to push out from the enemy base.

C. Battle Resolve:

Resolutely maintain a firm hold on the fighting positions, actively push forward into the enemy's defensive strong-point, and if the enemy pushed out from the base annihilate anywhere between two platoons and a company (minus) of enemy troops.

- Deployment of forces:

9th Platoon was deployed on No-Name Hill (the main position) and would coordinate its com bat operations with other friendly units pressing up next to the enemy perimeter wire. Specifically, the platoon was deployed as follows:

–Trench Line 1: two infantry squads, two B-40 rocket launchers, two B-41 rocket launchers, one engineer cell, one reconnaissance cell [Translator's Note: A "cell" was usually three men]

–Two recoilless rifles were deployed on the northwestern side to place direct fire on targets inside the enemy perimeter wire

–Trench Line 2 was held by 3rd Squad plus 82mm and 60mm mortars.

7th Platoon, with three medium machineguns and two B-41 rocket launchers, was deployed at the Chau Long Chanh position. Its mission was to protect the western flank and be prepared to provide combat support to 9th Platoon.

8th Platoon was deployed at Secondary Position 2 (300 meters southeast of the main position).

The Company command post was located 150 meters behind 9th Platoon where it could best direct the employment of heavy weapons (mortars and recoilless rifles)

III. Progress of the Battle, Results, and Significance of the Battle

A. Progress of the Battle:

At dawn on 25 February the enemy sent out two Marine companies and one infantry company. Utilizing the cover provided by the morning fog, they moved down the dry streambed in front of 9th Platoon's position. The enemy was di vided into two wings. The first wing, approximately one company of U.S. Marines, followed the streambed toward the right flank of our position. The second wing, made up of one Marine company and one infantry company divided into two spearheads, moved down our own siege trenches to advance toward the left flank of our position.

At 8:50 in the morning, the lead element of the left wing encountered two of our soldiers assigned to a listening post in front of our lines. They opened fire, killing both of our soldiers. Only then did we realize that enemy troops had entered our fighting position.

Platoon Commander Nguyen Quoc Thang saw a large number of enemy troops slowly and cautiously advancing toward the position. He immediately ordered the soldiers to come out of their bunkers and deploy to their battle stations. Comrade Thang assigned primary firing positions to the B-40 and B-41 gunners while at the same time encouraging the troops and reminding them all to strictly follow orders, wait until the enemy troops were extremely close, and to wait for his order before opening fire.

Seeing no reaction from our forces, the enemy troops hastily rushed forward, intending to seize our position, but the platoon commander immediately gave the order to open fire. With heavy firepower and simultaneous volleys fired by experienced gunners, the initial volleys left enemy bodies sprawled across the ground in front of the position. Light Machinegun Gunner Nguyen Van Long fired two bursts that wiped out 19 enemy soldiers. The enemy recklessly continued to fire and charged forward, but our B-41 rockets and 60mm mortar rounds hit accurately in the middle of their formation, terrifying them. They tried to escape by running off to the north, but they ran into accurate fire from our recoilless rifles.

The frightened enemy troops pulled back and called in artillery barrages directly against the platoon's trench lines.

The enemy's right wing, taking advantage of the fact that our forces were engaged in dealing with his left wing, moved forward silently. When they were only about 20 meters from Trench Line 1, the squad defending this section of the line suddenly opened fire simultaneously. A number of enemy troops were killed, but the rest charged forward into the position and captured a section of our trench line. The enemy troops planned to use the trench sections that they had captured as a springboard to attack our main fortifications. However, the American Marines were big and tall and they were carrying all kinds of things on their backs and around their waists, while our trenches wee deep but very narrow. They jumped in the trenches, but it was difficult for them to turn or move in the trenches. Some of them had to jump back out again, while others got stuck and could not turn or move at all.

Seeing this situation, the company ordered Comrade The's squad to move up from the south and Comrade Chuc's squad to move down the trench line from the north to attack them. When they were h it by surprise attacks on both flanks and when their commander and his radio team were wiped out in the first volley, the enemy's formation fell apart. Enemy artillery guns from inside the base bombarded the area heavily, but because there was no one to adjust the artillery fire, the barrages also hit the area where the enemy troops were regrouping. The enemy was driven out of our fighting positions, and his troops fled, leaving 40 bodies behind in the area of the trench sections that he had captured.

Both enemy wings suffered heavy losses. The enemy troops fled back down to the dry streambed and used individual mortars [M-79s] and medium machineguns to rake our fighting positions. They also called in continuous artillery fire. All of No-Name Hill was covered in a blinding cloud of fire and smoke, but the soldiers of 8th Company steadfastly clung to their positions. The company commander ran back and forth, encouraging the troops, directing them to repair trench sections and firing positions, and reminding the troops to load more magazines and lay out additional hand grenades to be ready to fight the enemy in the event the enemy troops charged our positions again. The return fire of our 82mm and 60mm mortars and our recoilless rifles inflicted many casualties on the enemy force. The company's snipers moved along the trenches, spotting targets to eliminate and confusing and frightening the enemy, so that he could neither advance nor retreat.

The fighting went back and forth until 10:15 A.M., when the enemy was forced to risk making a retreat under the cover of their direct-fire heavy weapons firing from the southern perimeter of the base.

The battle ended. At 11:00 we used a loudspeaker to offer to allow the enemy to come back to recover the bodies, with the condition that, 'Each time only two men may come forward, and they must display a white flag.' However, the enemy did not dare to accept our offer.

At 12:00 noon, three enemy reconnaissance [observation] aircraft spotted for a large number of enemy jet aircraft that savagely bombed our positions and then sprayed fuel and dropped incendiary bombs to incinerate the bodies of their fallen comrades, including a number of their troops who were severely wounded. Our anti-aircraft artillery units and our infantry troops on the southern perimeter of Ta Con fought together, shooting down four enemy aircraft. Comrade Tai, an infantry private, shot down a jet bomber with 25 rounds from his assault rifle when the aircraft made a low dive-bombing run near the area of our fighting position.

B. Results of the Battle

Enemy: according to two deserters from the Ta Con base, on 25 February the enemy lost 200 men killed.

Friendly: six men killed and seven men wounded.

C. Significance

The battle ended in victory. This was the first time we had ever completely annihilated an entire U.S. Marine company, and the enemy's counterattack was a complete failure. This feat of arms performed by 8th Company, 2nd Battalion thrilled the hearts of the cadres and enlisted men throughout the entire front. Our battlefield posture was further reinforced and solidified by this victory, and our plan to conduct a siege attack against Ta Con was able to create an important new advantage. The enemy was surrounded and isolated, and his situation became even more frightening and confused.

After the battle, division headquarters arranged for the officers commanding the other siege positions to come to the scene of the battle to study what had happened and to draw battlefield lessons from the fight.

IV. Strengths, Weaknesses, and Lessons Learned

A. Strengths

1. Cleverly and flexibly massed and dispersed our forces as appropriate to shatter the enemy's attack waves.

2. Maintained close combat coordination between infantry forces, attached heavy weapons units, and high-level artillery units.

3. Battle commanders were flexible, employed small-unit, three-man cell tactics well, and maintained constant, good communications.

4. The soldiers fought bravely, constantly achieved the element of surprise, employed all our different types of weapons expertly, and achieved a high level of combat efficiency

B. Weaknesses:

1. Poor organization of forward listening [warning] posts, failed to detect the enemy's attack.

2. Our organization of forces and battlefield command was slow during the initial stage of the battle. Some mortar and recoilless rifle crews were initially unable to join in the battle immediately because they had not had enough time to set up their weapons. The company did not send the personnel of the two platoons in the rear forward to reinforce our front-line fighters. The company allowed the balance of forces to be heavily weighed against us, thereby creating difficulties and causing additional casualties for 9th Platoon

The enemy attack took the company by surprise, but the unit remained calm, fought a close quarters battle, maneuvered its troops, counterattacked resolutely, and drove the enemy out of its fighting position.

The defensive, siege position held by 8th Company was very close to the enemy's front line, and in places our trenches had reached the enemy's perimeter wire. In the face of powerful pressure exerted by our forces from many different directions, the enemy employed many crafty, insidious tricks, including using the early morning fog as cover to launch an attack. This was a very new enemy tactic. 8th Company was vigilant and had deployed a forward listening post in front of its position, but because the enemy selected the early morning as the time to launch his attack, our field of vision was limited and we were unable to see his preparations and then his troops moving toward our position. This is why, when the enemy unexpectedly opened fire, attacking both flanks of our position, the two soldiers assigned to the forward listening post were both killed in the first minute of the attack.

However, with its fighting spirit and its courage, the company's officers, and most directly 9th Platoon Commander Nguyen Quoc Thang, remained calm and ordered the entire platoon to take their fighting positions. The platoon commander then assigned positions and pointed out targets to the heavy weapons teams while at the same time he encouraged his troops, waited until the enemy was very close, and then gave the order to open fire simultaneously, in a volley. From initially being on the offensive, the enemy quickly found himself in an unfavorable position, trying desperately to respond to our fire while caught on the hillside with no foxholes and no cover or protection from the terrain. Because we waited until the enemy was so close, our first volleys inflicted very heavy losses on the enemy force. The man firing the light machinegun wiped out almost twenty enemy troops with just two bursts. The unit attained a high level of combat efficiency that was achievable only by fighting at close quarters, exploiting the terrain expertly, and using skillful, accurate firing techniques.

The enemy's right-wing force exploited the period while we were fighting off his left wing force to silently advance toward our position. Our troops waited until the right-wing force was only about 20 meters from our position before opening fire, stopping the enemy force in its tracks.

The fighting took only a short period of time, but it was extremely violent and intense. In spite of his heavy losses, the enemy managed to capture a portion of our position. Resolutely determined to prevent the enemy from using our fortifications as a spring board for further attacks, the company commander ordered Comrade The's squad to move forward and Comrade Chuc's squad to attack down from the north. Even though these two counterattack forces were small (only eight to ten men each), their attacks were directed at key points, and they quickly attacked the enemy on both flanks. This terrified the enemy force so much that it had no time to react and was forced to retreat. This was a very resolute way of dealing with the situation and that was suited to our principles for defending a fortified position. If we had been slow in launching our counterattack, the enemy would have been able to use his springboard to expand outward and use his heavy firepower to suppress our forces. If that had happened, it would have been very difficult for us to hold this fighting position.

PART III
THE AFTERMATH

7. THE PATROL OF 30 MARCH 1968
An American Account[491]

The specter, terror, and horror of what happened on 25 February became an *idée fixe* continually gnawing at the souls of those still alive at Khe Sanh, especially within the command and staff of 1/26. Almost immediately, the battalion staff initiated plans for a return to the ambush site to retrieve the MIA.[492] Reports from the Division's AOs and aerial photography as well as patrols from the 37th ARVN Ranger Battalion, provided daily, up-dated intelligence. Reports indicated that the area was occupied by a reinforced NVA battalion in heavily fortified positions along with a regimental command group which occupied the high ground behind the battlefield area at the Old French Fort position.[493] Supporting arms plans were prepared utilizing pre-planned artillery concentrations on known NVA assembly areas, routes, reserve and supply areas by Capt Mirza Munir Baig, the Regiment's Target Intelligence Officer along with 1/Lt William F. Smith, an artillery officer from A/1/13 assigned as an artillery FO to 1/26[494] in which the commander on the ground would call "apples," "grapes," "peaches," etc., to designate a variety of targets to be struck by a variety of artillery, known as "the fruit basket."[495] Routes of movement through friendly mine fields laid by the engineers and through terrain features were committed to memory.[496] Originally, the plans called for a full battalion assault; this was rejected by the Regiment "because of the potential exposure to the Combat Base by having so many troops outside the perimeter at one time and because of the potential of getting the battalion in a fight that would be difficult from which to extract."[497] Indeed, this would have played into the hands of the NVA's master plan of creating a situation into which American troops would arrive in great numbers so that they could be annihilated,[498] a tactic presciently grasped and assiduously avoided by Col Lownds and his staff which precluded sending relief to the attack on the

[493] Statement of LtCol Charles E. Davis, III, USMC (Ret), 24 August 2001, Para. 9, Exhibit 14 in Letter from Capt Charles E. Patterson, Subj: Summary of Action in Support of Award Recommendation for Captain Kenneth W. Pipes, for Heroic Action Above and Beyond the Call of Duty in Combat on 30 March 1968 at Khe Sanh, Republic of Vietnam [hereinafter referred to as "Pipes, MOH package."]

[494] *Ibid*., para. 13.

[495] William Smith recalls that Baig would ask Smith, "What will we call this fire plan?" and Bill said, "Grapes," "And what about this?" "Apples." Smith: "We did it for one reason and one reason alone: everybody got a copy, everybody carried it. All they had to do was yell 'Peaches!' and everything was pre-planned, pre-shot, pre-fired. We figured the range of a 82mm mortar, drew a circle ad tried to take I all the possible positions for 82mm mortars. Then we took in all the high ground from which you could observe; we targeted all of that. For the hills, for instance, we would have 'Peaches' up on top of a hill; 'Peaches' would be a combination, let's say, of Battery-6, Fuse VT, which would fling the people off. If you took fire from the hill over there, then 'Peaches' would be an artillery counter-fire which would have in it smoke, white phosphorus, fuse VT, to clean the people off, and would also neutralize all positions on the reverse slope of the hill. So if you just thought you were taking fire, you'd just yell 'Peaches!' and 'Peaches' would take care of anything. Of if you took fire from your front, you yelled 'Apples' and 'Apples would basically take care of everything to 82mm mortar range that we found." [Conversation with William Smith, 16 March 1985]. The term "fruit basket" was used by the artillery FO, PFC Theodore H. Golab. [Conversation with Theodore Golab, 15 August 1985].

[497] Statement of LtCol Charles E. Davis, 24 August 2001, in Pipes, MOH package, *op. cit.*,Para. 11.

[498] Mission of the Highway 9-Khe Sanh Campaign included "..to draw the enemy to Highway 9, the more the better, to pin them down and continue to eliminate them." [*Chien Dien Tien Cong Duong 9—Khe Sanh Xuan He 1968* [*The Spring-Summer 1968 Khe Sanh-Route 9 Offensive Campaign*], Hanoi: Vietnam Institute for Military History, Ministry of Defense, 1987, p. 14. On 9 January 1968, the B5-T8 Command Headquarters issued the mission to the Khe Sanh section of the battlefield: "304th Infantry Division deployed to the south of Highway 9 would concentrate its forces to attack and seize the Huong Hoa district seat (including Ku Boc if the enemy was present). Be prepared to reinforce land forces from Tan Lam and Ca Lu on north if the enemy landed forces by air in the Huong Hoa area; if the enemy did not reinforce, then eliminate Houi San [*note, Ban Houei Sane, the location of BV-33 in Laos*] and Lang Vay [*Lang Vei*] and move forces to surround and constrict Ta Con [*Khe Sanh Combat Base*] in order to draw in enemy reinforcements. [*Ibid*., p. 21]. Cf also "..to draw out and tie down American and puppet forces, the more the better, and continue to eliminate them" [*Su Doan 304 (Ky Su) (Tap II)* [*304th Division (Chronology) (Vol II)*], Hanoi: People's Army Publishing House, 1990, p. 58].

Huong Hoa District Seat in Khe Sanh Village and the attack on Lang Vei, as well as the avoidance by Major General Tompkins in resisting sending reinforcements to the besieged Khe Sanh Combat Base, and an avoidance by General Westmoreland for sending in troops to relieve the siege until well after major elements of the North Vietnamese Army had departed the battlefield (sending the relief in April, after the 325C Division had departed in February/March, with some battalions and regiments departing in mid-February).

In what would be the first offensive action out of the Combat Base, approximately 75 – 80% of the NCOs and enlistedmen from the company had been there only a short time[499] and although there was no way to rehearse the plan of attack nor train for it, several days prior to the attack, briefings were given repeatedly to the troops in the trenches.[500] The mission was "to attack a known fortified position with an alternate mission of attempting to establish and if possible recover our comrades who had been ambushed on the 25th of February 1968."[501] The mission was broken into 2 phases. Objective #1 (XD 844411),[502] a NVA trench line would be secured by B-2 (led by 1/Lt John W. Dillon). The second phase would be to seize Objective ALFA (XD 853404),[503] a piece of high ground just beyond the area containing the MIA from the 25 February patrol. Just prior to first light, B/1/26 would stage itself outside the KSCB. Following intensive prep fires, B-2 would jump off, securing Objective #1 with 2 squads up and one back. After it was secured, the remainder of Co "B" would jump off in the assault of Objective ALFA which would be taken with 2 platoons up and one back. After securing Objective ALFA, the Company would establish a defensive perimeter while recovery teams searched for the bodies. After the bodies were recovered, the Company would pull back into KSCB.[504]

By 0001, 30 March 1968, a small unit from FOB-3 had occupied a position near Hill 471 to act as a blocking force.[505] PFC Theodore H. Golab [A/1/13] and his radioman, "Roach," accompanied this group as an artillery FO, along with an Army Captain, three Army Sergeants and a platoon of indigenous soldiers. When PFC Golab and his radioman, upon arrival at the FOB, were issued black pajama uniforms, he questioned being "out of uniform," but they insisted. Golab was amazed at their gear which included small radios in their helmets—small pads, microphone, and ear plug.[506]

Marines from Co. "B," 3rd Recon Bn were brought in to man the defensive positions normally occupied by B/1/26.[507] Reveille for B/1/26 was at 0330, and by 0430, the company had assembled in perimeter trenches. The Marines of B/1/26 were given the order to "fix bayonets!" "I almost shit myself when [Lt] Weiss said 'Fix bayonets!' O gees! One of the things that's stuck in my mind forever was that I told [PFC Ted] Britt, 'Don't worry about nothing; I'll bring your body back.' And he laughed—cause we were all geared. He said, 'No, I'll bring your body back.' I'll always remember that."[508] A platoon of FOB-3 departed the FOB compound at 0537[509] to occupy a pre-designated screening position southeast of the raid objective area.[510] B-2 which departed at 0606 out of the main gate in the vicinity of bunker #42 was followed by the remainder of Co "B" which departed the FOB gate at 0612. All units maneuvered to their pre-planned positions behind their LOD [Line of Departure]. An initial delay because of fog and poor visibility[511] actually aided the force which was able to take advantage of the concealment the fog provided to shroud their movement before it lifted. At 0725, B-2 crossed their LOD followed by Co B (-) (Rein) crossing their LOD at 0734. At 0738, the lead elements of B-2 reached Objective #1 (XD 844411) followed by the remainder of B-2.[512] B-2 (1/Lt John William Dillon) established an intermediate rally point for the rest of the company , set up

[511] The fog also temporarily obscured the battlefield from the AO and the 1/26 "6" and "3" halted the advance of the patrol behind the LOD temporarily. [Pipes, "Men to Match Their Mountains," *op. cit.*, p. 22].
[512] 1/26 ComdC Mar68, S2/S3 Log, March 1968, Ser #20.

a medevac station, and skillfully deployed his Marines to provide security for the field medical aid station.[513] Heavy H&I fires which were pounding the entire area did not eliminate the element of surprise since these fires had struck the same area regularly in previous weeks.[514] At 0750 the FOB-3 platoon was in position.

Facing the Marines, the North Vietnamese 2nd Battalion, 9th Regiment, 304th Division, was poised on what they referred to as their "Battlefield #3." The Company Commander of the 6th Company in command of the battlefield was killed at the outset.[515] The NVA position was approximately 600 to 1,000 meters across the front and about 500 to 1,000 meters deep[516] in the vicinity of XD 845429 to XD 853404.[517]

After B-2 (1/Lt Dillon) secured Objective #1, the Company paused momentarily (at 0751)[518] to link-up and reorganize and then jumped off from Objective #1 toward their final objective, moving out on a line from XD 844411 to XD 843406 with B-1 (led by 2/Lt Peter William Weiss) in a platoon wedge/squad wedge and B-3 in a platoon "V".[519] After moving 25 meters beyond Objective #1, at 0800, B-3 came under extremely heavy RPG, 82mm, ad 60mm mortar fire, heavy automatic weapons and small arms, and ChiCom grenades from mutually supporting and very well-built NVA bunkers. The area was "fortified a bit more than any of us had initially anticipated."[520] The momentum of attack, however, never slackened as B-1 and B-3 assaulted fortified positions.

PFC Ted D. Britt, a fire team leader with the 3rd Squad, B-1,[521] maneuvered his fire team by individual rushes until his squad secured the outermost defensive position. While consolidating in the NVA trench line, heavy NVA mortar and automatic weapons fire pinned down the squad. PFC Britt immediately left the cover of the trench and assaulted the enemy position from which the largest volume of automatic fire was coming, destroying the position, the weapon, and killing four NVA soldiers. He then moved to attack a NVA spider hole position and was fatally wounded in the process, but not before he had accomplished his mission. "He was greatly responsible for reducing the number of friendly casualties."[522]

HM3 Thomas E. Casey, responding to the call "Corpsman Up!" continuously moved from casualty to casualty despite mortars and heavy automatic weapons fire around him.[523] As he jumped into a crater to render medical aid, 3 mortars exploded in and around the crater, killing 2 Marines. Disregarding the danger around him, Casey continued to treat all the wounded in the crater.[524]

In an official, taped interview conducted shortly after the action, Pipes was to say, "I believe all of the young Marines that we had in the company had been waiting several weeks for this opportunity... Once the kids started, there was nothing, it seemed, that could stop them. From the point of initial contact until we reached our final objective, some 500 to 600 meters, perhaps more, they covered the ground in 20 to 25 minutes. A later body count indicated confirmed approximately 115 North Vietnamese Army were actually killed.. by kids using small arms fire, grenades, bayonets, M79s, all weapons organic to an infantry company."[525] In addition, a section of flame throwers participated in the attack. Capt Pipes felt these were a complete surprise to the NVA. "When we first used them there was a noticeable slack in their fire. I think the shock effect at that particular time of the NVA seeing the flame throwers, knowing that we did have them with us.. put a bit of fear in them and enabled us to continue the initial momentum of the attack clear through to the final objective."[526] LCPL Thomas N. Quigley, carrying the Company radio in the CP group, recalls being next to one of the Marines with a flame thrower and asking, "Man, how long will one of those tanks last?" "And it really amazed me because there were only so many seconds and the whole thing's empty.. And I said, 'That don't seem like very much,' and he said, 'Well, if you're at the other end, it's an eternity!'"[527]

527 Conversation with Thomas Quigley, 11 May 1986. [The Portable Flame Thrower, M2A1, has a burning time of 6 – 12 seconds. Weight empty: 43 lbs.; weight full: 68-72 pounds.]

PFC Golab, from his vantage point, watched the entire action: "Everything looked like it should be. They all had fixed bayonets. They got flak jackets on. They got helmets on. They looked good. They had all their formations down pat, and they were moving out. You could see the NVA walking in their trenches, just nonchalantly. One guy had a cup in his hand. I called artillery on Khe Sanh ville because I knew something was going to come out of there, to cut off that road. And then there was this mortar round. It lands and doesn't go off. It must of landed 6 yards from me, went into the mud, and its fins are sticking out."[528]

The assaulting elements reached the limit of advance at 0815 and consolidated their position as planned. As the artillery was pounding the NVA positions, suddenly the command, 'Cease Fire!' 'Cease Fire!' came over the Conduct of Fire net, and the artillery stopped. "This was not according to plan! The battalion forward CP was trying to find out who gave this order. The order apparently had come from the NVA using imitative deception. Before the artillery barrage could be turned back on, the NVA lobbed several mortar rounds into the middle of Ken's [Capt Pipes'] command group."[529] At the time, the Company's senior radioman, LCPL Thomas N. Quigley, was on the radio. "I had my left hand on my right forehead and my right hand on my receiver, bent over to talk to one of the platoons, and the Lieutenant said, 'Doc's hit.' And he started getting up. As he started getting up, I turned back to look at him, Lt. Norman, and that's when the rounds hit and I saw him get it."[530] It was now 0830, when the company CP group, moving in trace of the two assault platoons, received an estimated at 20 rounds of 82mm.[531] The mortar barrage was deadly. 1/Lt Henry Norman, the Artillery FO, was killed, Norman's and Pipes' radio operators were wounded. Pipes was momentarily knocked unconscious, and the ensuing radio silence caused the battalion forward CP to dispatch 1/Lt William Smith, the Battalion Artillery Liaison Officer, and his radio operator, LCPL John J. O'Donnell, to attempt a link and find out what happened to Pipes' command group and resume direction of protective and withdrawal artillery fires.[532]

The Corpsman hit, Richard Blanchfield, had been a Marine with 3/3 (1955-1963) after which he served with the Thomas A. Dooley Foundation as a medical corpsman to the Hmong and Lao (1963-1965) and then became a US Navy Corpsman in 1967. Initially assigned to the medical facilities at Phu Bai, he was asked by a One Star (Commodore) Navy Doctor to volunteer to serve at Khe Sanh. The siege battle was already well under way when he arrived.[533] Accompanying B-1 (2/Lt Peter William Weiss) Doc Blanchfield received a large piece of shrapnel in his left shoulder and was placed on a pile of dead bodies; no further medical aid was deemed necessary—he was near death. Blanchfield had distributed 2 morphine syrettes to each Marine and said, "If I can't get to you, only use this morphine for what you need." Now, he jabbed one into his own leg. It didn't work. He jabbed another one directly into his chest near his heart. Chaplain Charles ("Chick") Kelly came by and started giving Last Rites. Blanchfield looked up at him and said, "Kelly, I don't want Last Rites, get me some blood!" "Sure enough he came back; he had the blood. But he didn't tell me he took a bullet right through his leg."[534] A helicopter landed. The pilot emerged, picked up the naked, blood-soaked Blanchfield in his arms, put him inside the helicopter, and flew off to a medical aid station from where he eventually was sent to the USS REPOSE.[535] Michael E. O'Hara remembers seeing Doc Blanchfield: "When I found him, he already had two needles in his leg and he was really tore-up. We stopped and put a bandage on him, and then went on. He was so tore-up, and had so much morphine in him, he was laughing! He was phased-out!"[536]

Meanwhile, PFC Golab, after the mortar incident at his location, had moved to and linked up with Pipes' command group. "At that time I first saw Captain Pipes, who was helmetless and his face white from loss of blood. Captain Pipes was standing alone, propped up against a tree at the edge of a bomb crater. He had apparently lost his helmet (I later learned that a round had knocked the helmet off of his head) and his face was white from loss of blood. I saw that he was severely wounded: his left arm and chest were wrapped in blood-soaked battle dressings. Captain Pipes held a .45 caliber semiautomatic pistol in

his right hand and was shooting into enemy bunkers at a distance of 4 – 5 meters."[537] According to the NVA's official history of the 304th Division, they assumed Pipes had been killed: "A newly-assigned replacement, Nguyen Huu Dong, shot and killed the battalion commander and eliminated the enemy's signal section."[538] Captain Pipes took grievous wounds to his chest and shoulder. Lt Norman's radio operator was hit in the face. Thomas Quigley saw it all close-hand: "Lt Norman, he was just—it was like someone took a machete and split him right down the middle. At the time I was on the radio. I had my left hand on my right forehead and my right hand on my receiver, bent over to talk to one of the platoons. The Lieutenant said, 'Doc's hit," and he started getting up. As he started getting up, I turned back to look at him, Lt. Norman, and that's when the rounds hit, and I saw him get it. He didn't know what hit him. It picked him up and slammed him right back inside the trench line. It took the whole side of him off. I screamed... It scared me, because Lt. Norman was one of the best officers besides Capt Pipes and Ben Long that I ever had the privilege of serving with, just a super straight guy, and when I saw him, I screamed. My hand busted out blood. The shrapnel had broke my radio."[539]

1/Lt John W. Dillon now led some of the Marines from B-2, to Captain Pipes' position to carry the dead and wounded to the field medical station while B-1 and B-3 were engaged with the enemy. 1/Lt Benjamin L. Long, the Company Executive Officer, along with 1/Lt Dillon helped the wounded Capt Pipes to reestablish communication and regroup the remaining Marines in the CP group.[540] When 1/Lt Long reached Capt Pipes, he observed that Capt Pipes had immediately put battle dressings on one of his radio operators who was profusely bleeding and quickly evacuated the four radio operators to the field aid station as he rapidly regained communications with his maneuver elements, the battalion, the artillery net, and air support.[541] LCPL Michael E. O'Hara saw the CP group being hit and was one of the few Marines from B-2 to move forward and reach the company CP. He found Captain Pipes "had received a devastating wound from shrapnel in his left armpit which was bleeding profusely. The Battalion Surgeon, LT Harvey J. Demaagd, tried to treat Captain Pipes for his wounds,[542] but Captain Pipes refused any type of pain killer and refused medical evacuation from the field. As Dr. Demaagd was trying to treat him, Captain Pipes gathered up the Company radio, the Battalion radio, and the [artillery] forward observer's radio on his right arm and began to call in artillery fire in support of the advance... He continued, despite his wounds, to press the attack, including directing the individual groups of Marines in their assaults upon enemy trench lines and bunkers, joining, whenever necessary, in attacking fortified positions while continuing to lead the Company."[543]

HM3 Thomas E. Casey remembers the scene: "I remember him standing still with the radio and his arm wounded. He still stood there, giving orders. I thought he was a really big battlefield commander. [He wasn't crouched down]. He stood by the next bomb crater, giving orders on the radio."[544] Michael E. O'Hara: Pipes "..stood his ground to call for air and artillery and just wouldn't quit until all of his men were back safe."[545] "He set an example for my whole life... He was standing up, bleeding like a stuffed pig. He had two [radio headset] handles, one on each ear, controlling. Demaagd couldn't get him to hold still. He was trying to keep him bandaged up, and the blood would just explode out—'pfssh'—I mean I thought the man was going to die. He was torn-up in his armpit real bad, real bad!"[546] "I was simply in awe of this guy. Here most of his good friends were lying dead or wounded right at his feet, and he was still in control. I bent over and picked up Lt. Norman's body. When I saw who it was, I was devastated. Hank Norman had made friends with everyone in the company, from Private to Captain, and was admired by all who knew him... When I stood up and threw his body across my shoulder, I turned around to

[541] Statement of 1/Lt Benjamin L. Long in Silver Star Medal file of Capt Kenneth W. Pipes.

[542] Dr. Harvey J. Demaagd and a group of Navy Corpsmen from the 1/26 BAS had established a field medical station in a bomb crater to the rear of the company. As friendly casualties were taken, Lt Demaagd examined each Marine, supervised the treatment and personally attended all cases in which the Marine's life hung in the balance. [Statement of Capt Kenneth W. Pipes, in Bronze Star Medal file of LT Harvey J. Demaagd]. As in the case of attending to Captain Pipes, he left the security of the bomb crater numerous times, with complete disregard for his personal safety, to render medical aid to the wounded. "There is no doubt that the loss of lives would have been far greater had it not been for.. Dr. Demaagd." [Statement of SSGT William S. Dale in Bronze Star Medal file of LT Harvey J. Demaagd]

[544] Conversation with Thomas Casey, 16 December 1990. Casey died 1 March 1998 of an abdominal aneurysm.

[545] Michael E. O'Hara, letter of 1 September 1992.

[546] Conversation with Michael E. O'Hara, 23 March 1993.

look back for just an instant. Lt Mascato was about 50 meters away and Ken Rodgers was right behind him... A F-4 Phantom.. unloaded his napalm so close that I could actually feel the heat. I saw his tail shudder because he was too close to the ground. He nearly blew himself out of the air giving us the covering fire... Lt Norman was a slightly build man, but I remembered he seemed so heavy. My legs were beginning to ache with pain, and I was very nearly ready to drop him. I laid him down on the back of the APC, fell back on my butt, and began to cry. I began to wonder, 'How much can a man take?'"[547]

1/Lt John William Dillon (B-2) made numerous trips through the fire-swept terrain carrying wounded Marines to the field medical station.[548] The Marines of his Platoon, B-2, continued the momentum of the assault of NVA positions. LCPL Michael E. O'Hara captures the moment: "When I reached their trenches and jumped in, it was unreal. The trenches were full to the brim with freshly killed NVA soldiers. My foot never hit the ground while I was in their trenches. The rats were everywhere. Those bastards fear nothing and I would later reflect that we had become like rats. We were like sharks on a feeding frenzy. We were passing by wounded Marines on our quest for the kill. We went clear over the top and began charging down the back side before we realized we had inflicted total destruction on an entire NVA battalion. For just a moment, we all cheered like a come-from-behind football team who had just won a pennant or something. We began to pull back and started to realize there was a very high price for our exhilaration. Dead and wounded Marines were everywhere you looked and the danger had certainly not past."[549]

Cpl Edward I. Prendergast, Section Leader of 60mm mortars attached to B-2 also managed to reach Captain Pipes and saw him "standing in an exposed position under the continuing heavy enemy fire, calling in artillery fire on the forward observer's radio as well as directing the operations of the three platoons of the Company... If Captain Pipes had not acted in the manner that he had, even though severely wounded, and had not maintained the communications with the fire support center, the enemy would have been able to launch a counterattack to our advancement into their fortifications."[550]

During the next hour and fifteen minutes, the Bravo Co CP reorganized while B-1 and B-3 searched and destroyed the bunkers, killing all NVA in sight.

PFC David B. Anderson, a Marine with the search team, point squad, B-1, upon seeing a Marine laying in an open and unprotected area, rushed to give aid; while administering emergency first aid, PFC Anderson was fatally wounded.[551] PFC Anderson, like several other KIAs at Khe Sanh,[552] had a premonition he was going to die and told Capt Pipes before the patrol departed that he didn't want to go. After Pipes explained that he was needed, he agreed to go. He said, "I can understand; I just wanted to talk to you, Skipper, and let you know what my feelings were."[553] Anderson had less than 10 days left "in country."554 While giving emergency first aid to one of the wounded, PFC Anderson was fatally wounded.[555]

Also with B-1, LCPL Wayne Paul Moore, a rifleman assigned to the point squad, personally assaulted one of the enemy bunkers that was spewing intense fire. Upon reaching the trench, LCPL Moore destroyed 2 NVA fortified positions with hand grenades and continued to kill 2 enemy soldiers. To permit the rest of his squad to proceed, LCPL Moore exposed himself to the intense enemy fire to establish a base of fire with his M-16 and then sprinted to the aid of two WIA. As he exposed himself to draw the enemy's fire and permit his squad to advance, he was mortally wounded.[556] His Squad Leader at the time recalls: "Lance Corporal Moore jumped up and he charged that line, single-handedly. He got shot three times or four times, went down twice, got back up, and continued to charge this gun bunker and got hit, dropped his rifle, took out a pistol and dove into the trench—threw a grenade in, and dove into the trench line, and the last thing I seen of him was him beating this Gook with his pistol, and then it was literally like a 'John Wayne' movie, everybody just leaped up and charged. [Along with

[556] Statements of LCPL Ezell Green and 1/Lt Peter W. Weiss in Silver Star Medal (posthumous) file on LCPL Wayne Paul Moore. Moore's father, SGT Paul Moore, fought in WW II and was wounded on Okinawa 11 May 1945. He writes that his 6-ft., 190-lb. son with sandy hair and blue-green eyes, had joined the Marines 22 April 1966 and returned in Sep 1967 to marry his wife. "His Sgt. at H&S told him if he would sign-up for 6 more months he would not have to return to 'Nam.' He did, and returned Oct 1967 to rejoin his fellow Marines. In his last letter of 29 Mar 68 he stated he had volunteered to go out next morning, 30 Mar, to recover remains of fellow Marines." [Letter of Paul Moore, 11 Feb 1990].

Author C. Smith] these were both two of the best Marines you could ever imagine. These guys were absolutely fearless in combat. They weren't crazy, just flat brave! I'm so proud of these guys, you cannot imagine!"[557]

Moore was a good friend of Tom Quigley and had trained him for Point. "A friend told me later that when 'Charlie' jumped up from one of those spider holes behind him, he shot him right in the back."[558]

LCPL Moore had, on this date, just returned from the special 30-day "free" leave granted to those who extended six months for additional Vietnam duty. "He was actually listed on the company rolls at Bravo Company HQ as AWOL, as he didn't check-in with Headquarters when he returned to his platoon and no one from his platoon had notified Headquarters that he was back."[559]

LCPL Author "C" Smith, Third squad leader with B-1 left the trench line which had been secured in the initial battle in order to rush across open terrain to silence a NVA position. Successfully silencing the position, he returned to the trench to consolidate his squad which was by now under intense enemy fire. Again, he leaped from the trench and assaulted another NVA position from which heavy automatic fire was spewing. Again, he silenced the position. As LCPL Smith continued his assault to silence a NVA spider hole, he was mortally wounded.[560]

His Squad Leader, Steven Wiese, remembers "Smitty" as "..just such an outstanding person. We lived in the same bunker and we were pretty good friends. He was very short and had a dry humor. He never showed any fear at all. It wasn't like crazy; it was just when something happened, he was rock solid. He was there. He knew. If you went over and said, 'Hey, Smitty, how's it going?' he'd have this little smile. I don't ever remember him complaining once. If I had some clean-up detail or sandbags, he'd never bitch. He'd never say, 'O man, it's not my turn; I did it.' Most of the other guys complained.[561]

CPL Donald A. Warren, the Platoon Right Guide for B-1, volunteered to be one of four men to recover bodies of the KIA of 25 February and was located in the middle of the platoon.[562] After the initial burst of NVA fire, Cpl Warren led his fire team to the front of the platoon to direct their fire against the NVA positions. He maneuvered them out of the unprotected area, regrouped, and then led the squad in an assault against the NVA position. After knocking out 2 NVA positions, CPL Warren again moved the squad in the assault while under heavy automatic and semi-automatic fire. While directing accurate M-16 fire at the enemy, CPL Warren was mortally wounded by an enemy sniper round.[563] Cpl Warren had the "body bags" for the KIA. CPL Wood N. Lathrop remembers it as the "suicide squad," and recalls seeing Warren fall after being hit. "I just left him. I was the squad leader and was leading a charge into the NVA trench. I really had no choice. But all these years that has bothered me that here was my best friend. I seen him get hit. I seen him fall. And I don't go to him."[564]

PFC James Allen Williams, 1st Squad of B-1, although wounded, continued to expose himself to enemy fire to keep the NVA from encircling the squad.[565]

Five Marines from the Weapons Platoon (60mm mortars) of H&S Company, 1/26, reported to Capt Pipes the night before the assault. They moved immediately behind the Company command group which was about 25 meters behind the two assault platoons, B-1 and B-3, but had left their base plates at the point of contact and were without sites.566 As the Marines of B-3 became pinned down by NVA mortars as they advanced on the enemy, Cpl Kenneth A. Korkow left his position of safety and, hand-holding the mortar (there being no base plate), fired mortars at an angle of fire which put himself within the bursting radius of the round, but successfully eliminated the NVA mortar position allowing B-3 to proceed. Due to the accuracy of Cpl Korkow's fire, 4 NVA bunkers and 1 NVA mortar were destroyed. Depleted of 60mm mortar rounds, the mortarmen began moving casualties. While assisting a wounded Marine to move to the field medical position, Cpl Korkow was critically wounded.[567]

When the Marines of his squad were pinned down, PFC Albert Moguel, the grenadier of the point squad, B-3, assaulted 2 NVA bunkers that pinned down B-3. The range was so short that PFC Moguel was unable to use his M-79 and proceeded to

kill 4 NVA with his .45 caliber pistol.[568] PFC Julio Manuel Miranda, another grenadier for B-3, rose up from his position and made a one-man assault on a NVA position with his M-79, giving cover for the rest of the squad to advance. He leaped from the trench on several other occasions to repeat the action and, during the evacuation of the dead and wounded, provided cover.569 PFC Lonnie Wayne Morrison, a rifleman in the point squad of B-3, rushed across the fire-swept terrain, firing into NVA bunker apertures and throwing numerous grenades to knock out several enemy positions enabling the rest of B-3 to advance.[570] PFC Donald Ray Rash, a Marine with the point squad of B-3, overcame 3 NVA positions with grenades and small arms fire. When the Company was ordered to break contact, PFC Rash remained behind to provide effective suppressive fire for the evacuation of KIA and WIA, and was killed when he was struck with shrapnel from one of the NVA mortars.[571]

PFC Rash has just arrived at Khe Sanh on 20 January 1968, hours before the base was struck. "That night, he spent the night in the supply tent along with several other replacements who had arrived that day. They got in late enough that they had not even received weapons, helmets, or flak jackets. Not a good situation when the incoming poured in on the morning of the 21st.[572]

LCPL Ferdinandez Ludiveekus Van Eeten, from the Netherlands, had a body bag for the MIA of 25 February, and was able to retrieve the only corpse from the 25 Feb 1968 action. "He was all black skin because he'd been there so long. I started pulling on the guy's flak jacket to try and put him in the 'death bag' and his arms fell back and I fell back, and these thousands of flies came up and attacked me. I came flying out of the trenchline screaming, and I looked down and the whole circle of his back was nothing but maggots, just thousands of maggots about 3 inches long and as thick as my finger—I'll never forget it.. I finally rolled him over and his helmet came off... I wound-up putting him in the body bag, and nobody helped me. Nobody wanted to have anything to do with it. I dragged him to where they were loading bodies... I remember when we got back to the base, I needed to take a shower. I felt so dirty! And there was no place to take a shower."[573]

Capt Pipes ordered Golab, his radio operator, and 2 other Marines to stand guard over the bodies of the dead Marines, "that we were not to leave our fallen brothers for any reason, but to make our stand there."[574] The NVA were advancing in their trenches in a counter-attack, and Capt Pipes shot the lead soldier in the face, pushing him back into another soldier, breaking up the attack. He repeatedly ignored advice to seek cover as he fired his pistol at advancing enemy soldiers. When 3 OTTERs[575] arrived to carry out the dead, Capt Pipes was yelling at the enemy, "You're not going to get our dead again, you bastards!"[576] At 0945, the Bravo Co CP moved to Objective #1 and assisted in the evacuation of dead and wounded while B-1 and B-3 withdrew assisted by two squads from B-2. B-2 moved forward and made a thorough search of Objective ALFA, evacuating 3 KIA and 2 MIA.[577] During the withdrawal, Golab radioed Lt Smith to fire a WP round to mark the NVA for an air strike. As Smith replied, "Where do you want it?" a WP round exploded in the midst of the Marines, followed by 2 more WP rounds! Golab asked if Smith had fired the WP. "Negative!" Apparently the NVA, monitoring the net, had fired it. "Had our jets fired on that WP, the Marines would have been annihilated."[578] Golab hurriedly radioed the jets to ignore the WP marking rounds.[579] All units were in the vicinity of Objective #1 by 1030, by 1100 the lead elements of Co B were in KSCB, and by 1130, the withdrawal was complete.[580] Capt Pipes stood at the entrance of the wire until all of the Marines from Co "B" were inside the perimeter wire.[581]

1/Lt Marion Henry Norman had never received the Bronze Star Medal that was awarded for his actions the day the siege erupted on KSCB, Sunday, 21 January 1968. From the Citation: "Ignoring the heavy volume of hostile fire, he unhesitatingly left the relative safety of his bunker and attempted to observe the enemy firing sites. Although knocked to the ground on several occasions by the concussions from enemy rounds exploding nearby, he repeatedly made skillful crater analyses and relayed the information to the firing batteries. Electing to remain in his exposed position, and disregarding the exploding

581 Statement of PFC Theodore H. Golab, 1 August 2001, Pipes, MOH package, *op. cit.*

main ammunition supply point less than fifty meters away, he courageously directed and adjusted counter fire against the enemy firing sites until all the hostile weapons positions that he could locate were silenced."[582]

1/Lt Norman, the second son of Lloyd Eugene and Dorothy Norman, was born 27 Sep 1940 in Livingston, Texas. At Milby High School, he played quarterback on the football team. In 1964 he graduated from North Texas State University and in 1965 married Charlotte Sanders. He joined the Marine Corps in 1966, and after graduating from TBS [The Basic School], he graduated from the U.S. Army Artillery & Missile School, Fort Sill, OK, and arrived in Vietnam July, 1967.[583]

Chuck Patterson, who shared a locker with Hank Norman at TBS, recalls him as "..the warm one. When the group of us would get together at someone's apartment, Hank could always handle the small problems, like making a barbecue sauce from Karo and catsup or snow ice cream with a little vanilla extract. He always had that dry Texas smile that radiated a quiet confidence."[584]

Capt Pipes received a Silver Star Medal for his actions this date,[585] but around 2001, Charles E. Peterson gathered numerous statements of participants, official records, prepared diagrams of the battlefield actions, provided analysis, and forwarded to the Commandant of the Marine Corps a recommendation that the Silver Star Medal be upgraded to the Medal of Honor.

Co B/1/26 was recommended for the Meritorious Unit Commendation.[586]

NVA Account[587]

> On the 30th of March the enemy organized a counter-attack against Battlefield #3 of the 2nd Battalion, 9th Regiment. The enemy employed a large force consisting of two battalions of Marines, two companies of Vietnamese and a number of tanks supporting the engagement.[588] Their approach had also changed. They fired artillery and used air-strikes to attack on the evening of the 29th. At one o'clock in the morning of the 30th, the enemy once again conducted fire missions, and at four o'clock in the morning the infantry and tanks had reached within 300 meters of our position. Throughout nearly five hours, we engaged the enemy, one side would hold, one side would be determined to seize the other's position. The enemy forces were ten times larger than our forces and so the fighting was ferocious. The Company Commander of the 6th Company in command of the battlefield, was killed at the outset, but the troops coordinated by themselves to strongly attack the enemy. Comrade VINH single-handedly broke one of the enemy attacks. A newly-assigned replacement, NGUYEN HUU DONG shot and killed the battalion commander and eliminated the enemy's signal section.[589] The squad leader of the 82mm mortar squad, NGUYEN HUY HUNG, fired in support a succession of 110 rounds of mortar fire in order to break up one wing of the enemy.
>
> At 0853, at this point, we and the enemy were engaged in hand-to-hand combat, but because of the difference of size of the forces, the majority of our troops at the Strong Point had been killed or wounded. The enemy occupied two-thirds of the Strong Point. At 1000 we were down to very few weapons, but at that point the enemy withdrew its forces back into the base, leaving behind nearly 300 dead.
>
> That evening we sent more forces in to rebuild Strong Point Number 3. It can be said that this was the last large counter-attack by the enemy, but they had already been defeated by the determined combat morale of the Division's cadre and troops. During fifty days of the encirclement, our troops eliminated 3,055 of the enemy, captured 217, shot down and damaged on the airstrip 279 aircraft, destroyed a large quantity of weapons and ammunition and enemy supplies. The American Marines had to put up with days and months of increasing pressure, constantly in a state of alert, afraid of a surprise attack by our forces. In addition to weapons fire which had flattened the area around the

base, they organized counter-attacks to block our trenches which were getting deeper into the base as time went on. They even used a special means of defense, establishing units to find our underground tunnels where they put metal stakes into the ground attached to generators to prevent us from digging tunnels into the middle of the base and then conducting a surprise attack on them.

The fate of Khe Sanh had in reality become a nightmare for the American military command and the situation at Khe Sanh had given great headaches to the war mongers at the White House. In the American Congress there began a debate arguing among themselves whether or not Khe Sanh should be held or not.

RECOVERY OF THE MIA FROM 25 FEB 1968

On 06 April 1968, Co D/1/26 executed an early morning assault upon the NVA trench/bunker complex located parallel to the Route 9 access road, at XD 848407, securing it at 0730H. Co B/1/26 moved in trace of Co D and together with the assistance of Co D, policed the battlefield.[590]

The area was strewn with gear including enemy head-sets for calling mortars and rounds with Chinese and Russian writing on them. "I walked over to a boot and I picked up the boot and there's the rest of the bone in the leg. At least on the boot was a dog tag. A lot of the guys at that time used to put the dog tags on the boot. And there were a couple of guys scared; they didn't want to touch them cause these guys were laying there a month. I said, 'Put them in the bag; let's get out of here. I don't like this any more than you do, but these are Marines.'"[591]

GROUP GRAVE AT JEFFERSON BARRACKA, MO.

Seventeen Marines previously declared MIA on 25 February 1968 and on 30 March 1968 (the first rescue attempt) were recovered.[592] The recovery team put the bodies in Willy Peter bags, sand bags, ponchos—anything else that would carry them. All the remains were in bits and pieces.[593] Officially this patrol "..recovered the bodies of all the Marines listed as MIA and their bodies returned to Graves Registration Khe Sanh."[594]

The task of attempting to identify the almost totally decomposed bodies left in the hot, humid jungle filled with rats and bacteria fell to the Company Commander, Capt Kenneth W. Pipes. "The shock of losing 25 men MIA for a month and a half, then going to graves registration several weeks later to help identify the decomposed remains is indescribable."[595]

All but nine bodies were positively identified. The remaining pieces of bodies were so badly mutilated that identification was not possible, so they were placed in a group grave on 10 September 1968.[596]

8. THE CORRECT FIGURES FOR KIA AT KHE SANH[597]

The Siege of Khe Sanh battle during the first three months of January, 1968, resulted in more casualties than any other battle of the Vietnam War. It was undoubtedly the most violent and bloodiest battle of the Vietnam War. The actual number of Americans killed far exceeds the official regimental reported KIA of 205. The artificial date for the "end" of the siege, 31 March, does not correspond to the experienced battle for those who were there for whom the battle raged until they departed Khe Sanh. It is unfortunate that under-reporting of casualties continues to be made, diminishing the intensity of the battle those who were there experienced.

Operation SCOTLAND terminated at 310800 March 1968 at which time 26th Marines became OPCON to CG, 1st Air Cav and commenced Operation PEGASUS.[598] By the end of March, the formerly enchanted Garden of Eden with all its beauty, perhaps containing species of flora and fauna not yet known, full of wild animals from ocelots to large tigers, koupreys, durian fruit trees, rock apes, wild boar, a thousand shades of green, had been transformed into a moonscape, a wasteland product of human technology, a valley of dry bones. Mountains had been moved, tens of thousands of human lives perished, the lives of survivors, their families and the families of the dead were forever altered. One pilot, flying into Khe Sanh on 26 March 1968 noted: "It was quite evident that the B-52 Arc Light raids had significantly affected the countryside around the Khe Sanh area. It appeared to me that there's a major bomb crater every 200, 300 feet surrounding all the hillsides and surrounding terrain."[599]

Support by artillery and air reached new records during the siege battle at Khe Sanh. The battle saw the first employment of strategic B-52 bombers on a sustained basis for tactical support. In 70 days of operations, 96,000 tons of bombs were dropped, nearly twice as much as was delivered by the Army Air Corps in the Pacific during 1942 and 1943.[600] General Momyer, USAF, notes more tons of bombs dropped in the immediate vicinity of Khe Sanh during the siege battle than were dropped in the entire Pacific in all of World War II.[601] The USAF records this in terms of sorties while the USMC records this in terms of strikes and tons of ordnance. USAF documents note 9,684 tactical air sorties and 2,567 SAC [B52] strikes by the USAF, 5,167 tactical air sorties by the USN and 6,385 tactical air sorties by the USMC, for a total of 23,803 sorties.[602] USMC documents record 1,169 close air support missions delivering 36,161 tons, 4,989 TPQ-10 strikes delivering 32,500 tons, and 430 B-52 strikes delivering 79,575 tons.[603] CG, FMFPAC, reported 7,078 sorties flown 20 Jan – 31 March 1968 with over 6,000 sorties (approximately 85%) delivered against targets located within a 9-mile radius of the KSCB perimeter.[604]

With all the accumulated garbage on KSCB—accumulated because the high saturation of enemy incoming made usual trash removal an almost sure way to kill Americans, the rat population multiplied in geometric proportions. Then, suddenly, the rats disappeared—not due to death from eating C-rations, but, it was assumed, to all the enemy bodies and body parts strewn so close to the base which made for better food.

NVA losses on the Khe Sanh battlefield reflect the tenacity with which they pursued their objectives. It was almost as if Khe Sanh had become a large piece of flypaper, a gigantic spider web, from which they could not extricate themselves. They grabbed the tail of a tiger, the end of a high voltage electric wire, could not release it and were killed by it. Their loss was obviously heavy. Bru Montagnards from villages south and west of Khe Sanh reported at least 2,000 and possibly 10,000 were killed by bombing. Casualties due to secondary explosions and fired from destruction and damage to guns, bunkers, supply dumps, headquarters, and structures, although not capable of being accurately counted, must have been high. Assuming 2 NVA soldiers per secondary explosion, with over 6,000 secondary explosions and fires, 12,000 may be estimated. Some of these explosions continued several hours. Approximately 900 bunkers were destroyed, some of which must have been occupied. 300 gun positions were destroyed. Forward Air Controllers flying O1 and O2 aircraft counted 1,400 bodies,

and approximately 1,000 bodies were killed on the wires of KSCB from the three attempted assaults on the combat base in March, 1968.[605]

During Operation PEGASUS/LAM SOM 207A, 13,890 tons of enemy supplies were found of which 13,626 tons were food. The NVA left over 1800 dead bodies on the hills around Khe Sanh, a dreadful thing to do in their culture.[606]

Col Donald A. Gruenther, Director of MACEVAL, COMUSMACV, analyzed the probable number of NVA KIA using a formula by which the NVA suffered: an estimated 15,760 casualties (3550 KIA + 12,210 wounded and evacuated) from delivered fires plus 8880 casualties (2000 KIA + 6880) from ground action, for a total of 24,640.[607]

Official (classified "Mat"="Secret") documentation of casualties at Khe Sanh during the siege battle[608] indicate the: following numbers participating in combat: from 325th Division (15 Jan): 28,440; 304th Division (20 Mar): 25,580; Front Rear Services (30 Jun): 25,124. 325 Division suffered 398 KIA and 689 WIA (20 Jan – 3 Jul 68), 304th Division suffered 1,342 KIA and 2,527 WIA (20 Jan – 31 May 68), 45th Regiment (artillery) suffered 21 KIA and 53 WIA (20 Jan – 29 Mar 68), 675th Regiment suffered 54 KIA and 57 WIA (20 Jan – 10 Jun 68), 241st Regt suffered 22 KIA and 60 WIA (20 Jan – 30 Apr 68), 7th Regt suffered 42 KIA and 94 WIA (20 Jan – 27 Mar 68), and Front Rear Services suffered 73 KIA and 115 WIA (20 Jan – 15 Jun 68), for a total of 2,270 KIA and 4,219 WIA.[609]

While 26th Marines Regiment records reports 205 American KIA for the siege battle,[610] the Command Chronologies of 1/26 and 2/26 and the After Action Reports for Operation SCOTLAND of 3/26, 1/9, and 1/13 report a total of 274 KIA.[611] In addition, there were 219 KIA sustained in the Lang Vei battle (10 Americans), and the following KIA from other units: 13 from Co "B", 3rd Recon Bn; 6 from Hq Co, 26th Marine Regiment; 4 from "A" Co, 3rd Shore Party Bn; 4 from "A" Co., 3rd Engineer Bn; 2 from FLC (POL); 2 from HMH-463; 3 from VMGR-152; 8 from HMM-262; 5 from FOB-3; 3 from MACV Det-19 and 282nd AHC; 3 from the 37th Signal Bn; and one each from: HqBn, 3rd MarDiv; H&S Co., 3rd Shore Party Bn; SptCo, 3rd Eng Bn; 5th Comm Bn; CBMU-301 Det "B"; HQ, 12th Mar; CAC "O"; Co A, 3rd AT Bn; MASS-3, I MAW; MWHG-1; MABS-36; MACTU-62; VMO-6, and the USAF 20th TASS, for a total of 70 from other units. This gives a grand total of American KIA for the siege battle at Khe Sanh of: 354 Americans and 209 Vietnamese (not including those from the 37th ARVN Ranger Bn), for a total of: 563.

If Operation PEGASUS totals are added (01-15 Apr 1968) there were 6 KIA from 1/26, 23 KIA from 2/26, 12 KIA from 3/26, and 23 KIA from 1/9, for a total of 64.[612] The grand total for 17 January – 16 April is therefore 560.

---

[605] MACV, "Khe Sanh Analysis," 8 July 1968, p. 13; Gen. Wm. C. Westmoreland, speech of 13 June 1968, to 3rd Air Division, in *History, 3rd Air Division, Jan – Jul 1968*, Vol. I, Exhibit #180; MACV, *Command History*, Vol. 1, pp. 423-424.

[606] MACV, "Khe Sanh Analysis," 8 July 1968, pp. 14-15.

[607] MACEVAL: "An Analysis of the Khe Sanh Battle," 5 April 1968, in ACofS, MACV, letter to Chairman, JCS, 10 April 1968, in OJCS File 091, Vietnam, April, 1968, p. 3. An egregious under-counting of US KIA renders the value of "K" erroneous. According to the formula, KIA = K times the number of troops divided by the square kilometers of the battlefield times the tons of ordnance. "K" is a constant of proportionality based on the friendly experience at Khe Sanh for the period 27 January through 31 March with troop strength of 6085, tons received: 99.25, friendly KIA: 167, and area in sq. km.: 4.8. If the US number of 563 KIA is factored in instead of 167, the result is a "K" factor of 0.0044746, and, using the formula, 11,932 NVA KIA.

[608] *Cong Tac Hau Can: Chien Dich Duong 9 Khe Sanh Xuan He 1968* [*Rear Service Operations: 1968 Spring-Summer Khe Sanh Route 9 Campaign*], "For Distribution within the Army—Luu Hanh Trong Quan Doi, classified MAT, [Secret], Hanoi: Tong Cuc Hau Can [General Directorate for Rear Services], June, 1988, Medical Section, pp. 264ff.

[609] *Ibid.*, Appendix 2, p. 327. Specific battles: 154 KIA/486WIA on 20 Jan, Battle of Huong Hoa by 3rd Regt, 304th Div; 15 KIA/95WIA on 20 Jan, Battle for Hill 832 [Hill 861, XD803443] by 6th Bn, 2nd Regt, 325th Div; 20 KIA/68WIA on 20 Jan, Battle of Hill 845 [Hill 881, XD777438] by 4th Bn, 2nd Regt, 325th Div, 54 KIA/80WIA on 7 Feb 68 for Battle of South Lang Vei by 3rd Bn, 1st Regt, 325th Div; 36 KIA/140 WIA on 7 Feb 68 in Battle of North Lang Vei by 2nd Regt, 304th Div; an unknown number of KIA and 982WIA from the encirclement of KSCB by 1st Regt., 304th Division, etc. [*Ibid.*, p. 330]. By units: 325th Division suffered 398 KIA and 698 WIA, 304th Division suffered 1,342 KIA and 2,527 WIA. [*Ibid.*, Appendix 3, p. 331].

[610] 26Mar, AAR SCOTLAND, p. 15. General Tompkins gave the same figure, 205, in testimony before the U.S. Senate, Electronic Battlefield Subcommittee of the Preparedness Investigating Subcommittee of the Committee on Armed Services. [*Investigation Into Electronic Battlefield Program*, 91st Congress, 2nd Session, Nov 18, 19, and 24, 1970, Washington, D.C.: U.S. Government Printing Office, 1971, p. 95]. It is intriguing to note that if the 1/9 KIA total (72) is subtracted from the 274, one arrives at 202, almost the 205 figure. Was 1/9 considered ADCOM to another regiment, although OPCON?

[611] 1/26: 5 KIA for Jan (Command Chronology), 44 KIA for Feb (Command Chronology), and 47 KIA for Mar (Command Chronology); 2/26: 1 KIA for Jan (Command Chronology), 25 KIA for Feb (Command Chronology), 16 KIA for Mar (Command Chronology); 3/26: 46 KIA (AAR Opn SCOTLAND)' 1/9 72 KIA (AAR, Opn SCOTLAND); 1/13: 18 KIA (AAR, Opn SCOTLAND)' total: 274. In addition, there were 10 American USSF from the Battle of Lang Vei.

[612] Based on After Action Reports for these battalions. The 26th Marines Regiment AAR indicates only 43, 21 less than the total for the individual battalions. In addition, the 12st Air Cav 'Division's AAR for PEGASUS reports 59 KIA for US Army, 51 KIA for USMC and 33 KIA for ARVN There were also 70 additional KIA from assorted support units.

During the battle, 2,541 patients were seen and treated in the medical facilities at Khe Sanh. Of these 2,031 were wounded in action and 490 were non-battle casualties. 2,249 patients were evacuated by fixed wing very early in the siege, but later entirely by helicopter. Of these, 292 were returned to duty.[613]

Concerning the local Montagnards of the Bru tribe, when the siege battle began on 21 January 1968, the 1200 Vietnamese of Khe Sanh Village were evacuated but the I Corps Commander, General Xuan Lam, prohibited the local Bru from departing, saying there was no place to settle them in Vietnam.[614] The Bru were told to return to their villages, which were soon burned and abandoned. Bru were forced to carry supplies for the NVA and thus strafed and bombed by our own planes that were unable to differentiate between them and the NVA. Eventually many were flown out by helicopter from FOB-3 in mid and late March. Those who were able to depart the battlefield were settled in a refugee village south of Cam Lo called Cua. Among the refugees were many who had still been in the hills and not resettled in the strategic villages close to KSCB in 1962. Official Marine Corps records indicate 10,000 Bru located within a 5 km radius of Khe Sanh ville.[615] Another official Marine Corps document indicates 21,000 total indigenous persons located in 9 villages of Huong Hoa District,[616] a much larger area than the 5 km radius. Since there were 1200 Vietnamese, the figure of approx. 20,000 Bru in the total area and 8800 in the immediate area reflects the census. The population of the Cua refugee center as of June, 1968, was approx. 6,000,[617] although usually 3 or 4 were dying a day from starvation, dehydration, and wounds and illness. Therefore, somewhere between 2800 to 12,800 Bru perished during the first three months of 1968 at Khe Sanh. The figure may be higher. In early March, 1968, there were 1,643 Bru at the Ca Lu Combat Base (before their movement to the Cua center).[618] The disparity may be from Vietnamese refugees also at the refugee center making up the rest of the 6,000.

During the siege battle at Khe Sanh, the NVA strength was from 20,000 – 25,000 in some 21 battalions plus supporting forces, about 50% of the NVA forces in I CTZ, plus another 24,000 readily available in nearby Laos. US forces at Khe Sanh numbered 5,700 Marines and about 500 Vietnamese, representing about 3% of the total friendly forces in I CTZ. Within a radius of 10 miles of Khe Sanh there were 3,800 more Marines and 500 Army and within 40 miles, 37,000 more troops. Fire support, in addition to 18 105s, 5 155s, 10 ONTOS, 32 individual 106mm RR, 5 tanks, and 98 mortars included 175mm guns and 6 155mm howitzers at Camp Carroll and Thon Son Lam, at least 45 B-52 sorties available per day and 300 or more tactical air sorties per day. It was not uncommon to drop as much as 1,800 tons of bombs in the Khe Sanh area in a single day. During the siege battle, an average of 194 short tons of supplies and 70 troops per day were air delivered to Khe Sanh, for a total of 14,356 short tons of supplies and 5,180 troops. US forces fired a total of 117,643 rounds of artillery (including 12,441 rounds of 175mm). B-52 sorties averaged 35 per day delivering 1,022 tons per day of bombs. 533 sorties delivered ordnance within 3 km of friendly ground troops. Tactical air supported Khe Sanh with 15,266 attack sorties with a daily average of 184. US aircraft losses in support of Khe Sanh (1 November 67 – 1 April 68) were 8 fixed wing and 13 helicopters.[619]

APPENDIX
KHE SANH CHRONOLOGY MAY, 1967 – JUL, 1968[620]

11 MAY – Lead elements of 26th Marine Regiment arrive at Khe Sanh to relieve 3rd Marine Regiment.

13 MAY – "Battle of Khe Sanh, Search and Destroy" concludes: 168 US KIA, 443 US WIA, 2 USA MIA, 824 NVA KIA (confirmed), another 551 NVA KIA (probable), 6 NVA POW captured, over 24,000 artillery rounds fired, total ordnance dropped is over 3,000,000 pounds, not to include TPQ-10 directed flights or 23 B-52 Arc Light strikes. Operation CROCKETT commences, conducted by an abbreviated staff of 26th Marines regiment (the rear element remaining on Okinawa) as a 9th MAB unit, and battalion 1/26.

13 MAY – COL JOHN J. PADLEY, CO, 26th Marines, relieves COL J. P. LANIGAN, CO, 3rd Marines, as "SOP 3rd MarDiv/III MAF Rep Khe Sanh."

15 MAY – John and Carolyn MILLER, the Wycliffe Bible Translators, move into concrete house in Khe Sanh village, refurbished by efforts of newly established FOB-3 and funds donated by Marines at KSCB.

21 MAY – Patrol by 3rd Platoon, A/1/26, makes contact at XD751449 resulting in 2 US KIA.

MAY - The North Vietnamese Politburo and Central Military Party Committee concur with the reorganization of the command and leadership system in the Tri-Thien (B-5 Region). Province party committees and province unit headquarters are dis banded. District party committees come directly under the leadership of the region party committee. Group 31 is responsible for the area from Highway 9 north to the demilitarized zone using two infantry battalions under the command of the B5 Highway 9-Tri Thien Front Headquarters. The result: one commander has control over forces around Khe Sanh and Hue City. In Region 5, the main forces are augmented by the 577th (122mm) rocket regiment (formerly the 68th regiment, 304th Division).

JUN – The North Vietnamese Politburo determines to implement strategic planning to achieve a "decisive victory" in 1968. "We had to attack the American forces and force them to defeat militarily in order to change the scope of the Vietnam War."

02-04 JUN – Marine helicopters, launching out of KSCB in support of a FOB-1 mission to OSCAR-8 in Laos (XD 793044, assumed site of NVA headquarters controlling the entire Ho Chi Minh Trail network) are shot down, beginning a desperate battle resulting in 4 American MIA (one, LCPL Frank Edward CIUS, is later returned to US control in 1973.

05 JUN – One Marine (GySgt Di R. IBANEZ) mysteriously disappears while in an evening harbor site of a recon patrol from Co A/3rd Recon Bn.

06 JUN – SFC Charles F. WILKLOW is rescued from the OSCAR-8 battle.

06 JUN – KSCB receives approximately 19 rockets at 0105H. Hill 950 (XD 844456) is attacked by approx. 40-50 NVA from the 6th Bn, 95C Regt, 325C Div. and feared overrun, but a few Marines hold off the attack and in a daring early morning counter-attack, repulse remaining NVA attackers.

07 JUN – Co B/1/26 makes contact at XD 760445 with NVA unit resulting in 18 USMC KIA, 16 USMC WIA, and 63 NVA KIA (confirmed).

13 JUN – Bn 3/26 arrives at Khe Sanh to augment 1/26 due to recent NVA activity.

18 JUN – Hill 950 is struck by lightning igniting 30 claymore mines.

25 JUN – Co A., 3rd Recon Bn, is relieved by Co B, 3rd Recon Bn.

27 JUN – Battle of Hill 689 (XD 803409): after KSCB is mortared a CAC patrol is sent to determine NVA mortar positions resulting in 4 CAC "O" Marines KIA. I/3/26 and L/3/26 are dispatched to the area. Total KIA for the day: 25 US KIA.

06 JUL - Politburo member General Nguyen Chi Thanh, Secretary of the Central Office for South Vietnam and Political Officer of the Liberation Army Headquarters, dies of a heart attack. General Thanh is replaced by Politburo member and Deputy Prime Minister Pham Hung, to continue preparations for the 1968 Tet Offensive.

12 JUL – CBMU-301 Det "B" arrives at KSCB to upgrade the airstrip which has washed-out in places.

15 JUL – Census of local area reflects 8,930 Bru living within 8,000 meters of KSCB along Route 9.

16 JUL – Operation CROCKETT concludes (206 NVA confirmed killed and another 417 probably killed).

17 JUL – Operation ARDMORE commences (26th Marine Regiment (-), 1/26, and 3/26).

17 JUL – Command Group "A" and Companies K and L depart Khe Sanh. Companies I and M and the remaining elements of 3/26 depart 04 SEP.

21 JUL – 175mm guns enroute to KSCB return to Camp J.J. Carroll as a large NVA ambush site is uncovered by patrols of M/3/26 and B/1/26 moving on Route 9. 19 UA KIA result from the contacts. the 175s return to Camp Carroll.

---

[620] For a complete chronology of Khe Sanh, see Stubbe:*Pebbles in My Boots* (2011), pp. 199-218.

12 AUG – COL DAVID E. LOWNDS relieves COL JOHN J. PADLEY as CO, 26th Marines at Khe Sanh.

15 AUG – C/1/26 Bridge position (XD 910400)is abandoned; 1/26 radio call-sign changes from PINEFOLD to MOLLY PITCHER.

16 AUG – One Marine drowns in Rao Quan River while evacuating the Bridge Site and assisting locals across river.

17 AUG – COL LOWNDS closes the KSCB airstrip in order to effect repairs.

20 AUG – Recon Team SAMPLE CASE I (2B1) is shot out of insert zone killing 2 Marines.

23 AUG – USAF TIGERHOUND aircraft crashes on airstrip killing the pilot.

31 AUG – Work on KSCB runway begins with removal of 150-ft. of matting.

AUG/SEP – NVA Agent "X-1" surrenders and gives Mr. Robert BREWER, Quang Tri Province Senior Advisor (who is CIA) a copy of "Resolution 13," the NVA 1968 Tet Plan.

03 SEP – South Vietnam holds its first national presidential election.

02-04 SEP – Recon Team BROAD WEAVE II encounters extensive contact with NVA soldiers.

05 SEP – Remainder of 3/26 departs KSCB leaving only 1/26 as the infantry element defending the area.

1967, cont.

17 SEP – Heavy rains collapse bunker being constructed; 2 Marines die.

18 SEP – OpPlan 5-67, Relief of Lang Vei Special Forces Camp, is issued.

11 OCT – 65 Navy Seabees of Detail JULIETT, NMCB-10, arrive to construct new bunkers in the FOB-3 compound. Navy Seabees of MCB-11 construct a new site for Camp Lang Vei at XD 786456.

15 OCT – A USAF C-130F aircraft crashes on the KSCB airstrip.

20 OCT – North Vietnamese artillery units begin preparation of the Khe Sanh battlefield.

30 OCT – People Sniffer missions begin at Khe Sanh to detect enemy by detecting ammonia.

31 OCT – Operation ARDMORE concludes with 113 NVA confirmed KIA and 210 additional probably KIA.

NOV – FOB-3 relocates from Old French Fort position in Khe Sanh village to KSCB for better security.

01 NOV – Operation SCOTLAND commences (26th Marine Regiment (-) and 1/26). AO: From DMZ south along GL85 to GL48, east to GL90, south to GL43, east along GL to GL95, south on GL95 to Da Krong River, southeast along Da Krong River to YD004302, then south to Laotian border at YD004234. Boundary then follows Laotian border on S and W to the DMZ and east along DMZ to point of origin. The area encompasses approx. 403 square miles.

NOV/DEC – Based on USMC signals intelligence from MAJ GRAY's Radio Battalion, the decision is made at a meeting of Generals CUSHMAN, TOMPKINS, DAVIDSON (MACV J-2), METZGER, and COL HOUGHTON (G-2, III MAF) and various intelligence specialists, to reinforce Khe Sanh rather than Camp J.J. Carroll, the previously assumed target.

NOV/DEC – North Vietnam creates a new Front Headquarters, a portion of the B-5 Front designated "B5-T8" to control operations in the Khe Sanh area. The Front HQ is located approx 10 miles west of the western edge of the DMZ at Sar Lit (XD6266).

05 NOV - The entire 559th network begins to implement the 1967-1968 dry season transportation plan with 61,000 tons moved into the system, twice as much as during the 1966-1967 dry season, aimed at an early materiel preparedness for all battlefields for the Tet Offensive.,

03-22 NOV – 1,000 troops of US 4th Division and 173rd Airborne Brigade at Dak To are attacked by 4 NVA regiments (about 6,000 troops); NVA fatalities are estimated at 1455 while US casualties are 285 KIA, 985 WIA, 18 MIA. Some regard this as a prelude to Khe Sanh, testing siege tactics and gearing-up for the attack against Khe Sanh.

06 NOV – Radio call-sign of 1/26 changes from MOLLY PITCHER to BLACKBUD; CAC "O" from ACTIVATOR to MUTTER; 26th Marine Regiment from MORRAY to INTRIGUE; recon from SANTA ANA BRAVO to AIR-MINDED BRAVO.

09 NOV – Signals intelligence personnel operate on Hill 881-South.

09 NOV – LTGEN ALFRED D. STARBIRD (DCPG, a cover for a CIA project) visits Hill 881-South. DCPG develops an electronic sensor program.

10 NOV – COL LOWNDS, during Marine Corps Birthday ceremonies on Hill 881-South tells troops, "You will all soon be in the American history books."

16 NOV – Two air-delivery Marines are killed while parachuting into KSCB; one Marine from recon drowns in the Rao Quan River.

17 NOV – a 300-pound deer (actually a Kouprey) is shot near Hill 881-South.

17 NOV – COL LOWNDS emphasizes camouflage: need to erect false antennae and bunkers on KSCB to confuse enemy observers.

19 NOV – North Vietnamese Politburo and Joint High Command issue directives for the "General Offensive and Uprising" (Tet) establishing 2 battlefields across the entire South Vietnam area. Highway 9 Front is given the mission of drawing-in and

dispersing mobile forces to create favorable conditions for all of South Vietnam. N-Day [the Vietnamese equivalent of D-Day] is set for 31 January 1968.

27 NOV – Khe Sanh begins to be a focus of concern by President JOHNSON and White House staff due to multi-intelligence indications that Khe Sanh will be struck with a massive NVA force.

DEC – DRVN Political Bureau issues historic resolution on "transforming our revolutionary war in the South to a new phase—the phase of winning a decisive victory."

03 DEC – The Highway 9 Front receives the "General Offensive and Uprising" directive.

06 DEC – North Vietnam Central Military Party Committee orders establishment of the Party Committee and Headquarters of the Highway 9 Front, commanded by Brigadier General Tran Quy Hai. The mission: destroy the enemy, draw in and hold in place Americans and South Vietnamese mobile forces to create favorable conditions for subsequent attacks in the Tri-Thien and Hue area.

13 DEC – Bn 3/26 arrives at Khe Sanh to augment defense as part of the decision to reinforce rather than abandon the position, knowing the NVA plan to attack the position. The augmentation is phased so that NVA do not realize we know they will attack. General WESTMORELAND argues that this will provide an opportunity to destroy large numbers of NVA which otherwise would have moved into the densely-populated areas to the east making combat more costly to civilians.

15 DEC – Dr. Walt W. ROSTOW forwards completed intelligence analysis of probable attacks on Khe Sanh and the NVA Tet Offensive to President JOHNSON.

22 DEC – Recon Team SEVEN UP (3B3) makes contact (at XD763411) resulting in 1 Marine KIA.

25-30 DEC – the 325C Division enters the Khe Sanh battlefield.

26 DEC – B/1/26 on Hill 881-South is relieved by Co I/3/26; D/1/26 on Hill 861 is relieved by Co K/3/26.

28-30 DEC – 1/26 conducts a battalion sweep northwest of KSCB; patrols encounter NVA squad and capture a map marked with all entry routes to Marine positions in the area.

28 DEC – the North Vietnamese Campaign Party Committee meets to ratify the campaign order: Khe Sanh is to be the principle area while the eastern Quang Tri Province area (e.g., Hue) is an important area.

30 DEC – Recon team BARKWOOD (1B3 at XD 761409, 4 KM directly west of Hill 689) engages NVA unit resulting in 2 Marines KIA.

<u>1968 –</u>

01 JAN – There are 298,498 Marines in the Corps with 81,249 of them serving in Vietnam. Gen Leonard F. Chapman, Jr., becomes 24th Commandant, USMC, and his son, 2/Lt Walton F. Chapman, commands 3rd Plt, D/1/26, at Khe Sanh.

01 JAN – NVA recon unit probing western portion of KSCB perimeter is detected and engaged by Co L/3/26.

03 JAN – Lead elements of the 320th NVA Division enter the Khe Sanh battlefield.

05 JAN – COMUSMACV directs SLAM mission in Khe Sanh area. The code-named operation NIAGARA is approved by the Ambassador to Laos on 16 JAN and by CINCPAC on 17 JAN to be executed 21 JAN.

05 JAN – a FOB-3 patrol enroute to its insertion is shot out of the air and crashes at XD 701021 resulting in 5 US KIA.

09 JAN – The North Vietnamese Command HQ assigns missions to their 2 infantry divisions. The 304 Division is to attack and seize Huong Hoa District (Khe Sanh village) and then eliminate Ban Houei Sane (BV-33, in Laos) and Lang Vei. The 325C Division is to eliminate Americans on Hill 861, surround and constrict Hill 881-South and 950, and be prepared to attack American
forces landing by air to the north and northwest of KSCB.

10 JAN – CIA concludes in a document of this date that Khe Sanh is the target for a major NVA attack.

11 JAN – A large unit from FOB-3 scours Co Roc Mountain (XD 742318) just inside the Lao border under the leadership of MAJ QUAMO in charge of Special Projects, discovering numerous NVA caches and engages the enemy.

12 JAN – GEN WESTMORELAND requests JCS declassify COFRAM munitions for use in non-populated areas of I Corps (i.e., Khe Sanh). Sub Unit #5 is reduced to zero strength

13 JAN – A portion of KSCB's ASP is relocated; COL LOWNDS directs various defensive measures be implemented.

14 JAN – COMUSMACV requests III MAF review contingency plans to relieve Lang Vei USSF Camp.

14 JAN – LTGEN Robert CUSHMAN (CG, III MAF) directs various defensive actions be made by COL LOWNDS.

14 JAN – Recon Team DOCKLEAF (2B1) determines enemy presence on Hill 881-North; 2 Marines of the patrol are KIA.

14 JAN – The North Vietnamese 304th Division Party Committee meets from 1800 to 0300 on 15 JAN to discuss their combat mission. The main issue was the change in launch time which had been planned to begin the end of February; now it was changed to 20 JAN and combat preparations "had to move quickly." Troops, moving over a long route of march, had just arrived on the battlefield. Organization of the troops and preparation of caches of rice and ammunition had not yet been accomplished. Recon of the battlefield had just been initiated. Military medical detachments had just arrived on the

battlefield and route to evacuate wounded had still not been established. The mission assigned to 304 Division was to attack BV33 at Ban Houei Sane and to "liberate" the Huong Hoa District (Khe Sanh village). The 7th Bn, 66th Regt, did not reach its regrouping point to attack Khe Sanh village until 0400, 21 Jan since their route of march had just been bombed by B52s which knocked down trees causing slow movement with some elements becoming lost. The 7th Bn was the unit assigned to "liberate" Huong Hoa District and was reinforced by a 82mm recoilless gun company, a 82mm mortar company, a transportation platoon, a sapper squad, and an engineer squad.

16 JAN – ASRAT BRAVO arrives on KSCB and is operational 18 JAN.

17 JAN – 26th Marines received OPCON of 2/26 making the first time all of the 26th Marine Regiment and attached infantry battalions are operating together in combat since Iwo Jima in WW II; 2/26 moves to positions near Hill 558 (XD 820451) to guard the northwest valley approach to KSCB.

17 JAN – USAF O-2 plane crashes on take-off from KSCB killing the pilot and one FOB-3 soldier passenger.

18 JAN – GEN WESTMORELAND directs diversion of electronic sensors to the Khe Sanh area.

20 JAN – III MAF notifies COMUSMACV that contingency plans for the relief of Lang Vei are valid; no additional support is required.

20 JAN – Electronic sensors are first seeded in the Khe Sanh area.

20 JAN – Co I/3/26, patrolling towards Hill 881-North where recon team DOCKLEAF made contact, makes contact with an estimated NVA battalion resulting in 4 USMC KIA including 2 platoon commanders.

20 JAN – NVA Lt La Thanh DONG surrenders at KSCB and discloses the NVA battle plan of attack against the position.

20 JAN – Recon Team NURSE is surrounded. On the basis of this contact, Bn 1/9 is later located at the Rock Quarry vice Hill 471 as originally planned.

20 JAN – North Vietnamese Rear Service Bases A1, A2, and A3 are established.

21 JAN – The Khe Sanh Siege battle begins. According to North Vietnamese histories, the battle has 4 phases: Phase I (20 Jan – 07 Feb) has the mission of eliminating Hill 861 and drawing in 2 to 3 American infantry divisions, pin them down and eliminate them, destroy the positions at Ban Houei Sane and Lang Vei; Phase II (10 Feb – 31 Mar) has the mission of encircling KSCB; Phase III (01 Apr – 07 May) has the mission of attacking American forces relieving the siege; and Phase IV (08 May – 15 Jul) has the mission of encircling KSCB and attacking withdrawing American forces. The NVA's battlefield includes 3 districts of Laos and extends to the Cua Viet River. The Khe Sanh portion of the battlefield is identified by the secret designation "B5-T8."

21 JAN – Hill 861 defended by K/3/26 is attacked by 6th Bn, 95C Regt, 325C Div; perimeter is penetrated with brunt of the attack on the northwest side of the hill. NVA force is repulsed by the Marines leaving 47 NVA KIA. Hill 861 is reinforced with a platoon of A/1/26.

21 JAN – KSCB is attacked by fire 0500H-0530H. ASP #1 blows scattering ordnance; extensive damage to buildings and equipment but little personnel casualty.

21 JAN – An A4D "Skyhawk" is shot and crashes while making runs on enemy near the KSCB perimeter. Pilot, Capt DOWNING, safely ejects and is rescued.

21 JAN – Battery B, 1/13, arrives on KSCB making friendly fire support at 46 artillery pieces.

21 JAN – Capt KENNEDY, flying a CH-53 on mission "LUMINOUS 51," delivers 8500-pounds of whole blood, morphine and other essential medical supplies in night darkness and fog with no airstrip lighting.

21 JAN – Huong Hoa District Headquarters (XD 858386, 2 mi. south of KSCB) with MACV Det 4 (also HQ of CAC "O" and the JTAD) in Khe Sanh village, is surrounded and attacked by 7th Bn, 66th Regt, 304 Div. A relief force from MACV Det 19 is launched from Quang Tri via helicopters of the 282nd AHC, lands at the Old French Fort and is decimated.

21 JAN – Project TIGERHOUND ceases operations at Khe Sanh.

22 JAN – 1115 Vietnamese civilians are evacuated from Khe Sanh; Bru Montagnard tribesmen are not permitted to evacuate and told to return to their villages.

22 JAN – USMC helicopters evacuate CAC OSCAR from Khe Sanh ville to man a portion of the FOB-3 perimeter.

22 JAN – Counter-mortar radar arrives at KSCB.

22 JAN – Bn 1/9 arrives on KSCB and subsequently moves to positions at the "Rock Quarry." (XD 831419).

23 JAN – 3rd MarDiv G-2 augmentation arrives at KSCB consisting of Majors MIRZA MUNIR BAIG (TIO) and ROBERT B. COOLIDGE (Signals Intelligence).

23 JAN – ASRAT B sets new MASS-3 squadron record by controlling the delivery of 210.7 tons of bombs. (The record is again broken 27 Jan with delivery of 247.37 tons).

23 JAN – An A-4 aircraft is shot down over KSCB; MAJ WILLIAM J. LOFTUS, pilot, safely ejects and is rescued.

23 JAN – USAF reports sighting NVA tanks at Ban Houei Sane, 13 miles west of Khe Sanh on Route 9, the position of BV-33.

24 JAN – The NVA 24th Regt, 304 Div, and 198th Bn, 203rd NVA Regiment (tanks) overruns BV-33 Royal Laotian Battalion at Ban Houei Sane (XD625379, referred to as Ta May Strongpoint in North Vietnamese literature). Refugees (soldiers and their families) move to Lang Vei.

24 JAN – Marine and Air Force fighters and bombers fly 301 missions against North Vietnamese Army positions around Khe Sanh, a record number for a 24-hour period.

24 JAN – KSCB begins to receive artillery from 100mm field guns and 152mm artillery guns at Co Roc, Laos. A bunker in the area occupied by Co B/3rd
Recon Bn is struck killing 3 Marines and 1 Navy Corpsman.

24 JAN – Co F/2/26 on a company-minus patrol to Hill 516, makes contact with entrenched NVA company. F/2/26 resumes assault 25 Jan, but is unable to neutralize objective.

25 JAN – "Gravel" mines ("MICRO GRAVEL," XM-45E1) are seeded at Khe Sanh.

25 JAN – MGEN RATHVON MC CLURE TOMPKINS (CG, 3rd MarDiv) prohibits patrols beyond 500 meters of friendly positions; plans a "set-piece" battle.

26 JAN – Hatchet Force DENVER from FOB-3 conducts patrol into Khe Sanh village and encounters heavy fighting but sustains no casualties.

27 JAN – 30 large secondary explosions at XD 843385, a site 500 meters directly north of the former CAP O-2 position at Khe Sanh ville and at XD 847369 (about 1000 meters directly south of Khe Sanh village)—probable NVA artillery HQs—is destroyed following the newly-arrived Maj BAIG's perceptive analysis of NVA movements and his extensive knowledge of NVA tactics after being at Khe Sanh only 4 days.

27 JAN – 37th ARVN Ranger Bn arrives on KSCB (425 Rangers with US Advisor, Capt Walter GUNN); occupies positions on eastern side of defensive perimeter in a line forward of perimeter manned by B/1/26 Marines.

28 JAN – Project 972 office at 3rd MarDiv sends contact team to KSCB to train Marines in use of new ground surveillance radars (NOD, PPS-5, PPS-6, MSS-3); another electronic sensor string is seeded.

29-31 JAN – North Vietnamese and VC forces launch attacks against some 105 cities and towns throughout South Vietnam. Enemy ground assaults are launched against 5 South Vietnamese provincial capitals. Ultimately, more than 80,000 North Vietnamese regulars and Viet Cong guerrillas are committed to the 1968 Tet Offensive.

29 JAN – President JOHNSON requests and receives statement from the Joint Chiefs of Staff that KSCB can and would be held against any NVA assault.

29 JAN – FOB-3 patrol makes heavy contact at Hill 471 (XD 846393) and Khe Sanh ville resulting in 3 US Army KIA.

29 JAN – A planning group on the staff of 3rd MarDiv suggests installation of gear to ensure Arc Light delivery within one kilometer of friendly positions. (Previous limit had been no closer than 3 KM of friendly positions).

29/30 JAN – Signals and photo intelligence disclose large NVA positions poised to attack Khe Sanh.

30 JAN – Largest B52 strike of the Vietnam War hits the B5-T8 command center in Laos controlling the battle at Khe Sanh; HQ displaces. There are 85 secondary explosions.

30 JAN – MSGT DU rallies at Lang Vei and discloses his Bn is to ambush American troops moving between KSCB and Lang Vei and eventually to attack and overrun Lang Vei itself.

01-09 FEB – Elements of the 2nd Bn, 5th Marines and 1st Bn, 1st Marines, clear enemy forces from Hue south of the Perfume River. In a house-to-house battle, they are able to retake the province headquarters, jail, and hospital. By 09 Feb, the last organized resistance in the city south of the river ends with more than 1,000 NVA killed.

01 FEB – Aerial photographs reveal tanks near Khe Sanh.

02 FEB – US Army 37th Signal Bn bunker is struck killing all occupants.

02/03 FEB – Electronic sensor SPOTLIGHT reports reflect heavy NVA troop movement along approacdhing KSCB.

05 FEB – Co E/2/26 on Hill 861-A (XD 805445) receives heavy NVA ground attack which temporarily penetrates part of the defensive perimeter resulting in 7 USMC KIA and 109 NVA KIA.

05 FEB – USAF C-130 aircraft, loaded with ammunition, is struck, but fires are extinguished and plane is able to depart.

06 FEB – Contingency Arc Light targets submitted today include, within their "boxes," Hills 950 and 558, and are within a thousand meters of Hills 861 and 861-A.

06 FEB – While the 2nd Bn, 9th Regt, 304 NVA Div, was moving into its regrouping position the night of 06 Feb, it was hit by 3 B-52 strikes along the Hoc Coc Giang Stream. The entire Bn suffered nearly 200 casualties.

06 FEB – Marines fighting in Hue City tear down Communist flag at the provincial HQ building and replace it with the Stars & Stripes.

07 FEB – USSF Camp at Lang Vei (XD 786357) is attacked by the 66th Regt, 304 NVA Div, supported by the 198th Bn, 20-3rd Regt (tanks), the first use of tanks (Soviet PT-76 amphibious tanks) by the North Vietnamese Army in the Vietnam War. The attack overruns the camp. USMC artillery fires COFRAM munitions, the first use of this type of ordnance. Several thousand refugees gather at KSCB including approx. 2,000 Laotians and 5,000 – 6,000 Bru Montagnards. The refugees are refused access onto the KSCB and told to return to their villages. Most of the Bru are subsequently killed while Lao are eventually evacuated. A daring rescue by a small group from FOB-3 rescues Americans from Lang Vei.

08 FEB – An outpost designated "Hill 64" manned by a platoon of A/1/9, is assaulted by NVA troops and almost completely overrun; a few defenders are able to hold a section of the outpost until it is evacuated at first light.

10 FEB – North Vietnamese newspaper Nhan Dan warns that U.S. forces at Khe Sanh face a defeat as disastrous as that suffered by the French at Dien Bien Phu.

10 FEB – USMC C-130 of VMGR-152 crashes on the Khe Sanh airstrip.

10 FEB – NVA withdraw 5 regiments from Khe Sanh battlefield as the 66th Regt (304 Div) replaces the entire 325C Division. (Probable result of press release of 09 Feb that nuclear weapons were being discussed for use at Khe Sanh). CIA document notes that additional artillery support units more than compensate for the withdrawal of the infantry units.

11 FEB – COL ARGO, Gen. WESTMORELAND's staff historian, presents extensive analysis comparing Khe Sanh with Dien Bien Phu and numerous other military sieges. He doubts that Khe Sanh will be able to hold.

12 FEB – USAF ceases landing C-130s on Khe Sanh airstrip, considering it too dangerous. Up to this point, from 21 Jan – 11 Feb, USAF C-130s had delivered 7,338,000 pounds of assorted supplies via 320 C-130K and C-7A sorties to KSCB.

13 FEB – USAF begins massive air-drop of supplies.

13 FEB – 37th ARVN Ranger patrol captures a 82mm recoilless rifle.

13 FEB – A major NVA supply area (at XD 8734) is struck resulting in approx. 1,000 secondary explosions.

13 FEB – III MAF reports that Marines killed 1,078 NVA and 52 VC during the past 2 weeks at Hue City.

14 FEB – GEN MAXWELL D. TAYLOR, running the White House "War Room," recommends to President JOHNSON that Khe Sanh be evacuated "before the battle begins."

14 FEB – K/3/9 departs Ca Lu Combat Base (YD 012455) and is ambushed while moving west on Route 9 at XD 990450.

14 FEB – A major NVA supply area is struck just inside Laos (at XD 7622, about 21 KM south-southwest of KSCB. The site is repeatedly struck for the next 7 days, generating approximately 1,000 secondary explosions and fires.

15 FEB – A NVA rallier discloses NVA may use FROG (Free Rocket Over Ground) missiles against Khe Sanh.

16 FEB – First use of LAPES (Low Altitude Parachute Extraction System) at Khe Sanh is successful.

16 FEB – Total defenders at Khe Sanh: 154 USMC officers and 3070 USMC enlister
enlisted, 10 USN officers and 191 USN enlisted, 5 USA officers and 30 USA enlisted (does not include FOB, classified at the time), and 5 USAF officers and 24 USAF enlisted, for a total of 3489. (The 16 April manning message indicates 21 officers, 110 enlisted, and 455 ARVN at FOB-3 and 2 US officers, 3 US enlisted, 14 ARVN officers, and 436 ARVN enlisted for 37th Ranger Bn, making a grand total of friendly defenders at Khe Sanh approximately 4530).

18 FEB – During a 24-hour period, ASRAT BRAVO controlled 99 missions with over 275 aircraft dropping 486 tons of ordnance on 105 targets, establishing a new squadron record.

18 FEB – CINCPAC [Commander in Chief, Pacific, one of the Unified Commander controlling military operations in the Pacific area, including Vietnam] grants approval of Arc Light delivery within one kilometer from friendly forces.

19 FEB – GCA knocked out by incoming; TPQ-10 technique is used satisfactorily to control air-drops.

21 FEB – TPQ-10 guided air strike accidentally drops bombs about 40 meters inside KSCB perimeter, making a 40-ft. hole near B/1/26 between the 37th ARVN Ranger lines and those of B/1/26.

23 FEB – KSCB receives over 1,300 incoming rounds, mainly rocket and artillery.

24 FEB – Hill 950 is down to 2 gallons of water. The defenders on this outpost have been without water for 7 days.

24 FEB – SUPERGAGGLE helicopter resupply of the Khe Sanh hill outposts commences.

24 FEB – The city of Hue is declared secure after a 25-day battle. A combined force of Marines, Army, and South Vietnamese forces had accounted for
more than 4,500 Communists killed and the capture of large amounts of supplies.

Mass graves of several thousand Vietnamese civilians (government workers, priests, and women) massacred by North Vietnamese forces are discovered.

25 FEB – A patrol by 3rd Platoon, B/1/26, is ambushed sustaining very heavy casualties just outside the wire of KSCB (at XD 849409). Dead cannot be recovered and are left on the field; one Marine is captured as POW and released in 1973, RONALD RIDGEWAY.

26 FEB – First close-in Arc Light strikes commence at Khe Sanh with delivery within one kilometer from friendly forces.

27 FEB – Khe Sanh village is struck by multiple B-52 strikes.

29FEB/01 MAR – Regimental-size assault by NVA against KSCB is detected by electronic sensors and decimated by COFRAM as assaulting troops close on perimeter.

06 MAR – C-123 crash kills 43 USMC, 4 USAF, and 1 USN. E/2/3 conducted recovery operations at the site, XD 933404, on 25 Mar, and by C/1/4 on 05 Nov 1968.

06 MAR – Aerial photographs reveal that numerous Arc Light strikes on Khe Sanh village have totally annihilated it, the Old French Fort, and the triangular District Headquarters compound.

07 MAR – The few remaining Bru in Khe Sanh begin to be evacuated. During the period 09-19 Mar, 1,247 Bru are air-lifted from Khe Sanh to a refugee center at Mai Loc, just south of Cam Lo on Route 558.

08 MAR – Jonathan Nathaniel SPICER, a conscientious objector, is hit and subsequently dies due to performing his duties as a stretcher bearer at C Med and is later awarded the Navy Cross for his heroism.

08 MAR – 3 patrols by 37th ARVN Rangers result in 20 NVA KIA.

10 MAR – NVA incoming rounds on KSCB spew propaganda leaflets.

13 MAR – CIA memo of this date notes that although the 320th NVA Div moved from the central DMZ to coastal lowlands of Quang Tri Province, reducing the possibility it would be used against Khe Sanh, a formidable concentration of enemy troops, perhaps as many as 20,000, still threatens Khe Sanh.

17 MAR – COMUSMACV requests Agent Orange be sprayed along Route 9 from Khe Sanh to Bong Kho. Spray missions are conducted 14 and 25 May and 16 June. Within 2.5 kilometers and within 28 days of spraying, an estimated 25,900 Marines were affected according to a report by the Comptroller General of the US.

18 MAR – Newsweek cover, "The Agony of Khe Sanh."

18 MAR – An estimated 600 NVA assault 37th ARVN Ranger positions on the eastern perimeter of KSCB.

22/23 MAR – In excess of 1100 rounds slam into KSCB.

24 MAR – a !/9 patrol results in 31 NVA KIA and 5 USMC KIA, 14 WIA (3 evacuated).

25 MAR – Co E/2/3 searches wreckage of C-123 that crashed 06 Mar. (Area also searched 05 Nov 1968 by a patrol of C/1/4), recovering bodies and identification items.

27 MAR – NVA 81mm mortar shells disperse propaganda leaflets on KSCB, the second time in a month.

29 MAR – Last assault attempt by the NVA against KSCB results in 7 NVA KIA by ground fire and 71 KIA by artillery.

30 MAR – GPES (Ground Proximity Extraction System) resupply introduced at Khe Sanh.

30 MAR – Co B/1/26 patrols area of 25 Feb contact to retrieve MIA. Ferocious battle ensues making recovery of bodies impossible at this time.

31 MAR – Operation SCOTLAND concludes. Operation PEGASUS (LAM SON 207A) commences as largest III MAF offensive of the War, involving 14 infantry battalions. USAF Operation NIAGARA terminates. During the siege battle (21 Jan – 31 Mar), total casualties: 354 Americans KIA, 209 Vietnamese KIA (not including 37th ARVN Ranger Bn), for a total of 354 friendly KIA, 2,541 patients were treated in medical facilities (2,031 WIA and 490 NBC—non-battle casualties; between 2800 and 12,800 local Bru were killed; an estimated 24,640 NVA were KIA.

31 MAR – President JOHNSON announces he would neither seek nor accept nomination for another term as President.

01 APR – Operation PEGASUS/LAM SON 207A begins (concludes 15 Apr 68), the largest III MAF operation of the war involving 18 infantry battalions (7 USMC, 8 USA, 3 ARVN) for a total of 19,000 USA soldiers, 10,000 USMC, 300 helicopters and 114 helicborne artillery pieces. AO: XD9766 – YD 0334 to Lao border at XD7726, north along border to southern boundary of DMZ, then east along the DMZ to XD9766. 42 miles of Route 9 which had been closed since Sep, 1967, is reopened.

03 APR – While 1st Marine Regiment continues to attack west along Route 9, 2-7 Cav makes contact with Co-size blocking force at XD 890404. 2-7 Cav, 1-5 Cav and 2-12 Cav airlifted into various LZs receive incoming receiving 9 KIA.

04 APR – Bn 1/9 (- B Co) departs Rock Quarry position, assaults and secures Hill 471 (XD 846393).

05 APR – 1/9 on Hill 471 repulses Bn-size NVA attack.

06 APR – Bn 2/26 breaks out of its CP at Hill 558 (XD 820451) and assaults Hill 700 to the south southeast of Hill 861.

06 APR – 84th Company, 8th Airborne Bn, 3rd Airborne TF, is airlifted into KSCB to link-up with 37th ARVN Ranger Bn for the initial "relief" of KSCB.

06 APR – 1/9 is relieved by 2-12 Cav on Hill 471.

06 APR – MIA from 25 Feb and 30 Mar are recovered by patrol of D/1/26 and B/1/26.

07 APR – 1/9 assaults and secures Hill 552 (XD 822402), a major NVA stronghold during the siege battle.

07 APR – Cos F & G, 2/26, assault Hill 700 and secure objective 10 Apr.

07 APR – 2-5 Cav secures the Old French Fort after a bitter fight.

08 APR – Co D, 2-7 Cav, enters KSCB to link-up forces and formalize "relief."

09 APR – 1/9 assaults and secures Hill 689 (XD 803409).

10 APR – Col Bruce F. Meyers arrives at KSCB to relieve Col David E. Lownds as CO, 26th Mar, (relief on 12 Apr) and the mission of destroying and abandoning KSCB.

11 APR – Bgen Jacob E. Glick, ADC of 3rd MarDiv, arrives at KSCB; TF GLICK is activated to deactivate KSCB.

11 APR – 2 helicopters launched from Quang Tri to pick up medevac from Hill 881-South collide in mid-air 7 miles west of Dong Ha.

12 APR – Route 9 reopened to KSCB.

12 APR – Co B, 1-12 Cav, captures Lang Vei (XD 784357) finding 11 dead NVA, extensive NVA weapons and munitions, but no Americans.

13 APR –Felix POILANE, the coffee plantation owner, returns to KSCB and is killed when the aircraft in which he is riding crashes. Born at Khe Sanh, he managed his father's plantation since 21 Dec 1957 when he arrived at Khe Sanh with his wife, Madaleine. The Poilane family had departed KSCB 22 Jan 1968 and sought refuge in Hue.

14 APR – 3/26 assaults and secures Hill 881-North (XD 774457)

15 APR – Operation PEGASUS concludes; Operation SCOTLAND II commences under command of TF GLICK. Casualties for PEGASUS: 59 USA KIA, 51 USMC KIA, 33 ARVN KIA (total: 143 KIA), 236 USA WIA, 459 USMC WIA, 187 ARVN WIA (total 882 WIA), 5 USA MIA, 638 NVA KIA by USA, 404 NVA KIA by USMC, 260 NVA KIA by ARVN (total: 1302 NVA KIA), 18 NVA POW.

16 APR – Bn 3/26 departs Khe Sanh.

16 APR – Two companies of 1/9 become pinned down in two separate ambushes near Hill 689 resulting in 40 USMC KIA, 1 DOW, 15 WIAE, and 17 WIANE.

18 APR – 1st Marine Regiment assumes OPCON of all units at Khe Sanh.

18 APR – Bn 2/26 departs Khe Sanh.

19 APR – Co I/3/4 arrives on Hill 689 to relieve 1/9.

21 APR – Bn 1/9 departs Khe Sanh.

21 APR – Patrols from 3rd Force Recon Co. begin using KEYHOLE patrols, first used at Khe Sanh, involving 4-man, lightly-armed patrols used only for recon, not as FO or to engage the enemy.

21 APR – 1st Mar recover 38 USMC bodies from the 1/9 contact of 16 Apr plus 2 American KIA believed dead 2-3 months.

25 APR – TF GLICK redesignated TF HOTEL, under command of BGen Carl W. Hoffman.

25 APR – US tanks ambushed upon departure from KSCB

MAY – PAVN High Command sends 308th Infantry Div (minus the 36th Regt.) into combat at Khe Sanh to operate in the southern portion of the battlefield.

06 MAY – Memorial Service for 1/26 KIA at Khe Sanh conducted at Wunder Beach.

08 MAY – The NVA B5-T8 Front begins Phase IV of the Khe Sanh battle (lasting to 15 Jul)

15 MAY – Contacts with NVA increase, reflecting new NVA units in area.

16 MAY – K/3/4 and M/3/4 make significant contact with NVA at XD 788419 and XD 792416.

18 MAY – An entire recon patrol from E/3rd Recon at XD 885512 is annihilated.

19 MAY – NVA ambush road sweep detail and tanks; overall plan was to overrun KSCB. 37 USMC infantry KIA; 5 tanks suffer considerable damage; over 300 NVA KIA (100 by tanks).

23 MAY – President JOHNSON awards 26th Marine Regiment and its supporting units the PRESIDENTIAL UNIT CITATION.

27 MAY – M/3/4 makes contact with NVA at LZ PEANUTS (XD 810393).

27/28 MAY – F/2/3 position at XD 874383 is attacked resulting in 13 USMC KIA, 44 USMC WIAE, 174 NVA KIA (adjusted to over 200 as the surrounding area was searched).

30 MAY – 01 JUN – Operation DRUMFIRE II, an artillery raid, executed against Co Roc Mountain artillery positions.

31 MAY – E/2/3 attacked from 4 different directions. Co B/1/1, sent to assist, is also ambushed.

JUN – 2/1 defends KSCB, 2/3 provides road security for Route 9 until relieved by 3/4 on 20 Jun. 2/3 departs Khe Sanh to provide perimeter security defense at LZ STUD (XD 996460).

02 JUN – Operation ROBIN NORTH commences with 1st Marine Regiment.

05 JUN – C/1/4 receives 130mm arty from Co Roc on LZ LOON (XD 876334) resulting in 9 USMC KIA and 31 WIAE.

06 JUN – LZ LOON attacked by Bn-sized NVA force and artillery. Although attack is repulsed, FSB is abandoned. Results of attack: 154 NVA KIA, 24 USMC KIA, 37 USMC WIAE. USMC KIA are from helicopter that crashes at XD 877334.

06 JUN – Operation ROBIN SOUTH commences with 4th Marine Regiment.

08 JUN – C/1/12 at LZ TORCH (XD 911278) receives NVA attack resulting in 28 NVA KIA, 14 USMC KIA, 113 USMC WIAE.

09 JUN – BLT 2/4 attacked by Bn-size NVA force resulting in 7 USMC KIA, 41 WIAE.

12 JUN – Operation ROBIN NORTH concludes (91 NVA KIAC, 3 NVA POW, 16 USMC KIA, 130 USMC WIAE).

12 JUN – PAVN High Command and Front HQ, B5-T8 (Khe Sanh Front) assigns 246th Independent Regiment to replace the entire 304th Div which is withdrawn to be refitted. The 304th Div's CP sustained a direct hit by a B52 mission.

14 JUN – BLT 2/4 discovers Russian 1 ½-ton truck and van complete with machine shop.

15 JUN – Casualty figures in Khe Sanh area 01-15 JUN: 431 US KIA, 33 ARVN KIA, 2313 US WIAE, 187 ARVN WIAE, 3097 NVA KIAC.

15-18 JUN – Bn 3/4 units attacked resulting in 30 USMC KIA, 88 USMC WIAE, 315 NVA KIAC.

17 JUN – JCS concurs with III MAF proposal to abandon Khe Sanh and adopt a mobile posture in area.

17 JUN – Operation CHARLIE commences with the mission of destroying KSCB. 1/1 occupies Hills 689, 861, 881A, and 558; 3/4 patrols from FOXTROT RIDGE (XD 874383); 2/1 defends KSCB and Hills 552 and 471 plus road security; 3/9 destroys all bunkers and collects all salvageable items.

18 JUN – A Bn of 88th NVA regiment attacks 3/4, penetrating their FEBA. K/3/4 receives brunt of attack. Casualties: 14 USMC KIA, 30 WIAE, 129 NVA KIAC.

18 JUN – Operation ROBIN SOUTH concludes: 604 NVA KIAC, 48 NVA POW, 77 USMC KIA, 286 USMC WIAE, 20 USMC WIANE. During ROBIN operations, helos transported 6,164,374 pounds of cargo and 18,767 combat troops. 1,118 close air support missions expended 1740.5 tons of ordnance resulting in 64 secondary explosions. 13,381 rounds of 105mm and 2,103 rounds of 155mm were fired.

19 JUN – Co I/3/4 defending FOXTROT RIDGE (XD 874383), some 2000 meters SE of KSCB overlooking Route 9, is attacked. Later search on 02 Jul discloses 212 NVA KIAC, 77 weapons captured. Capt Merlyn A. SEXTON is awarded Navy Cross for this action.

19 JUN – 05 JUL – KSCB is destroyed.

24 JUN – ASRAT departs Khe Sanh for Chu Lai.

24 JUN – News reporter John S. CARROLL "leaks" news of abandonment of KSCB. Within 12 hours of his disclosure there was an immediate increase of NVA artillery into KSCB killing several Marines as well as increased NVA activity against Marines on the Hill 689 outpost.

02 JUL – Advance party of 2/1 departs KSCB, walking off eastern end of airstrip under cover of darkness. NVA artillery slams into now abandoned KSCB.

02 JUL – A patrol from D/1/1 on Hill 689 is ambushed. One body cannot be recovered at the time.

05 JUL – Patrol of 16 men from D/1/1 recover MIA but sustain 8 additional MIA (BNR) at base of Hill 689.

06 JUL – Hill 861 is abandoned by A/1/1 which relocates to reinforce Hill 689. Hill 558 is abandoned by C/1/1 which moves to Hill 689.

08 JUL – 1/1 is reinforced by L/3/4.

11 JUL – Some daring "body snatcher" teams of Marines successfully recover MIA.

12 JUL – 1/1 is heli-lifted from Hill 689, thus ending the period of permanent installations at Khe Sanh for Marines as a mobile tactic is adopted. Cumulative statistics for SCOTLAND II (16 Apr – 11 Jul): 301 USMC KIA, 25 USA KIA, 1489 USMC WIAE, 123 USA WIAE, 242 USMC WIANE, 34 USA WIANE, 2 USA MIA, 2440 NVA KIAC, 56 NVA POW. 2/4 remains in Khe Sanh area with a platoon on Hill 950 (E-3) and one company on ridgeline between Hill 950 and FSB CATES (XD 927437). 3/4 continues to operate in Khe Sanh area.

SOURCES FOR A BIOGRAPHY ON COLONEL DAVID E. LOWNDS

PREFACE

Books and articles on the siege of Khe Sanh consistently portray the controllers of the Siege of Khe Sanh to be General Westmoreland and General Giap. Actually, the main players were Lieutenant General Tran Quy Hai and Colonel David E. Lownds.

LtGen Hai was the Front Commander for the B5-T8 Front that controlled two battlefronts, the primary battlefield, Khe Sanh, and the area to the east.[621] General Giap wasn't even in Vietnam, having departed due to a medical issue. Col Lownds with his staff controlled the tactical situation at Khe Sanh and even initiated 95% of all local B-52 Arc Light strikes.[622] During an ordinary day, his intelligence staff generated targets for 100 TPQ-10 missions,[623] 16 Arc Lights,[624] 100 flights of fixed wing aircraft and up to 500 artillery missions.[625]

That General Westmoreland permitted Colonel Lownds to have control over the strategy and tactics at Khe Sanh rather than controlling these himself is reflected in the tank assault on the Army Special Forces Camp at Lang Vei.

While KSCB was receiving copious incoming, the nearby Army Special Forces camp at Lang Vei was rather tranquil. The XO, Miles Wilkins, comments: "We actually had very little contact, even when Khe Sanh was having a hard time leaving their perimeter. I was still driving up and down Highway 9, taking out mamasans back. We had vry little enemy contact. They basically just let us alone. We could go out on patrols and never see anybody."[626] Col Jonalthan Ladd (Commander, 5th Special Forces Group) had visited the Lang Vei camp on 6 Feb (along with Col Dan Baldwin and Sergeant-Major Hodge of CCN[627] and LTC Schungel) in connection with attempts to obtain anti-tank mines for them. Sounds from moving tanks could even be heard while he was visiting them![628] Col Ladd requested that Col Lownds execute the Contingency Plan[629] but conditions had changed considerably with the addition of tank and attack by a battalion-size NVA unit, along with detected NVA ambush sites in the area, making the execution a suicide mission. Even a patrol from A-101 moving east toward Khe Sanh village on 31 Jan was ambushed and Sgt John A. Young was captured.[630] While Col Ladd, based on his visit on 6 Feb, assumed a relief force could be dispatched, Col Lownds refused, saying it would be a suicide mission.

---

[621] For an extensive, detailed biography of LtGen Hai, see the draft manuscript, General Tran Quy Hai, *Duong cach mang va nhung hoi tri an* [*Steps Along the Road and Words of Gratitude*].

[622] Ltr of Maj Mirza Munir Baig to Col. F.C. Caldwell, 23 Dec 1968, p. 7. For geneeral account of the control of the battle by Col Lownds, see "Khe Sanh and the Mongol Prince," in Stubbe: *Pebbles in My Boots*, 30 March 2011, pp. 162-186. Citation from p. 166.

[623] TheTPQ-10 radar emits a small beam that locks on an aircraft. Using target coordinates provided by the FSCC, the TPQ-10 controller programs the enemy position, ballistic characteristics of the bombs, current winds, and other pertinent data, into a computer attached to the radar. The radar provides corrections due to air speed of the aircraft, altitude, and heaving. One A-6 Intruder could drop 28 500-pound bombs. Most TPQ-10 missions at Khe Sanh were flown at 290 knots. [Comments of 1/Lt Roy W. Schmidt, USMC Oral History Tape #2688].

[624] Khe Sanh saw the first time strategic B-52 bombers were employed on a sustained basis for tactical support of American troops. [LtGen John J. Tolson, *Airmobility 1961-1971*, Washington, D.C.: Dept. of the Army, 1973, p. 167]. The B-52 Stratofortress flew 2,602 sorties at Khe Sanh delivering 75,631 tons (151,262,000 pounds) of bombs during the period 22 Jan – 31 Mar 1968. [AFCHO ltr 18Dec68 to HQMC HistDiv, Khe Sanh Monograph Comments file]. The B-52's normal load was 108 bombs but each B-52 is capable of carrying up to 128 500- and 750-pound bombs which are dropped in a rectangular "box" usually 1,000 yards long by 100 yards wide. Sometimes the boxes overlap or crisscross. Most sorties consist of 6 aircraft, together covering an area one-half mile wide and 3 miles long, all within a period of several seconds. To grasp the extent of this destruction, one need only think of a comparable area in one's own city totally annihilated. The aircraft fly at 10,000 – 30,000 foot altitude. One 750-pound bomb clears an area 18-0-ft. in radius; fused to explode below ground, it digs a crater 30 ft. across and 10 ft. deep. [Trest, *Khe Sanh*, *op. cit.*, pp. 112-114; Peter Braestrup, "B-52 Big Weapon in Defense," Washington *Post*, 11 Aug 1968].

[625] Ltr of Maj Jerry E. Hudson, 2 Jan 1969, HQMC HistDiv, Khe Sanh Monograph Comments file.

[626] Conversation with Miles Wilkens, 08 April 1995.

[627] Conversation with Daniel Lord Baldwin, III, 25 Sep 1989.

[628] The NVA force, supported with tanks, had overrun BV-33 at Ban Houei Sane in Laos, on 25 January 1968, and were enroute to tttack Lang Vei.

[629] Contingency Plan for the Relief of Lang Vei, OpO 5-67 of 16 Sep 67, which called for a reinforced rifle company from 1/26.

[630] The man was Sgt John A. Young. At 1100H, a 17-man Lao recon element was ambushed by an estimated enemy force of two NVA companies at XD 815370 resulting in one friendly WIA and 1 USSF and 1 Lao MIA. [CO COC 5th SFGA 311530Z/Jan68, SITREP #30-68, in III MAF COC Journal and File 31Jan/01Feb68 #315]. The area was on Route 9, half-way between Khe Sanh village and Lang Vei. Later, the Special Forces attacked the enemy unit, resulting in 54 NVA KIA, 40 NVA WIA, and eight weapons captured [CO CO C 5th SFGA 011050Z/Feb68, Subj: 21 Message, in III MAF COC Journal File, Operation SCOTLAND, Pt. 3]. The Team Leader at Lang Vei, Bill Craig, notes: "He [Young] should be in jail. I didn't want that kid. I told the Sergeant-Major I don't need no SPEC-4s up here. He said, 'I don't have anybody else as a weapons man.' I said, 'Well, I'll do without.' He'd already sent him up there. Ashley called me and said that Young wanted to go out on patrol. I said, 'I don't want that kid going anywhere ... And you know what he did? He talked those stupid Laotians into going into Khe Sanh city! That's why I say, if I had my way, I'd of put him in jail because of that." [Conversation with Bill Craig, 04 Oct 1988]. For Young's story, see Ch. 11 of Zalin Grant, *Survivors, American POWs in Vietnam*, New York: Berkeley Books, 1985, pp. 189-199. According to Young, Capt Frank Willoughby, having just returned from a 30-day leave in the States, ordered him to

Col Ladd then flew from KSCB to DaNang and contacted GEN Westmoreland who was there in connection with a Marine Civic Action matter. Col Ladd's frustration is reflected in his memoir of that meeting.[631] "When I finally got his attention long enough, I told him, 'We have to do one of three things. We either stay there and just hold Lang Vei; we "DD" out and abandon the place; or the Marines execute their contingency plan. We can hold for probably another 3 or 4 days."[632] Col Ladd recounts: "Well, he couldn't make up his mind. Meanwhile I kept getting these radio calls from out there, telling me 'the Goddamn people are dropping charges down our air holes.' So I called Gen. Abrams on the phone and told him what was happening and I said, 'I just can't get Westmoreland's attention long enough to do anything. He is putting it off.' So, he called a General Anderson.. and told him that he was telling me to go ahead and evacuate the camp at the earliest opportunity and for the Marines to help us, which they did. Now in Westmoreland's book, he said that he did all that, but he didn't. Abrams did it, because he, Westmoreland, kept going back to those civic action meetings. Anderson was a great help; they dropped these CBUs all over the top of the camp and the people got out."[633]

Gen Westmoreland wanted the local commander (Col Lownds) control the battlefield situation.

The battle of the Siege of Khe Sanh was controlled by LtGen Hai and Col Lownds, not Gen Giap and Gen Westmoreland! It is for this reason that an adequate account of Col Lownds must be presented and preserved for future historians.

Col Lownds at Khe Sanh Reunion, 1997

Col Lownds at Khe Sanh 1868

From Stubbe, Ray William: *Battalion of Kings*, 2nd ed, 30 Sep 2008, pp. 149-152.

---

patrol out to Lang Bu ville, some 2000 meters northeast of Lang Vei, where Route 9 bends. Young departed just after sunrise on the 31st, proceeded along Route 9, and after some 45 minutes, cut north toward the jungle towards Lang Bu when enemy fire suddenly erupted, killing the point man with a shot to the head. The Laotians suddenly evaporated, leaving Young alone. He was then shot in his lower leg, fell, and shot twice more. His trouser leg was soaked in blood; pieces of bone protruded. After rapidly firing two magazines, he felt two bayonets stick in his back. He had been captured, not released until 1973. [Stubbe: *Khe Sanh*, 06 June 1989 (unpublished manuscript), p. 453.

631 which occurred shortly after noon and was attended by Gen Chaisson, USMC [Chief COC, MACV], Gen Cushman [III MAF], Gen Tompkins [CG, 3dMarDiv], Gen Anderson [CG, I MAW], and several other officers, including LGTC Hassinger [DCO, Special Ops], and Col Baldwin.

632 The official AAR for the Battle of Lang Vei notes: "There was considerable argument against implementing the plan because of the possibility of losing more men as well as the helicopters."

633 Ladd, COL Jonathan, *Interview by Col James P. Bergen and LtCol Willard M.Burleson*, 26 Feb 1971, Dept. of the Army, U.S. Army Military History Institute, Carlisle Barracks, PA, for "The Creighton Abrams Story." [Khe Sanh archives pp. 67961-67970].

LtCol Louis Rann, the Executive Officer of Regiment recalls the radioman leaning over and saying: "Colonel, the President wants to talk with you! The President's on the other end of the phone!" Rann notes, "I won't tell you what Colonel Lownds said—you're a minister!" "Shit?" "Well, a few other choice words!" "The next thing I know, Colonel Lownds picked up that phone [and was saying], 'Yes, Sir!.. No, Sir!' He's standing at attention!" Rann thought, "My God, it is the President!" Afterwards, Rann asked, "What did he say?" Lownds: "He said, 'I made the Joint Chiefs of Staff sign a paper that we're not going to make you guys surrender!'"[634]

During the months prior to the Siege, Colonel Lownds frequently wandered about the area, getting the lay of the land—noting possible routes the enemy might take, timing movement from one point to another, observing possible Ops and assembly areas, and so on. "I went out all the time. I was out most of the time. As a matter of face, at one point when it [the siege] first started, I went out towards the water point—before General Tompkins ordered me not to go out. I got three-quarters of the way there, heard something in the brush, so I headed back. Somebody was there. From time to time I'd go out; sometimes I'd even go out by myself [without a radioman]. Nobody knew it. I didn't want to jeopardize anybody else. I went out quite frequently. A commander needs to know the terrain he's fighting in; if he doesn't, he's in trouble. I was able to pinpoint in my own mind the likely places of attack and also where the lines of departure would be. As a matter of fact, when we had that B-52 strike that came as a result—nobody wanted to give it to me—General Tompkins did, but Westmoreland and nobody else did. I told them, 'That's where they are and that's their Line of Departure, and if they're going to attack, they're going to attack from there. They said, 'That's too close to your lines.' I said, 'I don't give a damn how close they [the B-52 strikes] are. It all paid off in the long run."[635]

LtCol Frederick McEwan, the S-4 of Regiment during the Siege, recalls: "Around December [1967], the North Vietnamese Army blew a French bridge across Highway 9. Well, Uncle Dave, who was Colonel Lownds, and the Engineer Officer and myself went to a steel bridge over the river at Route 9, and we swam across that river to check out that area, see if the bridge could be rebuilt. It couldn't. So we got out of there hastily. It was a precarious situation."[636]

Thomas Buono was assigned to Colonel Lownds when the Siege began as his driver and to accompany him during his rounds of the base: "The morning the Siege started, Col Lownds was out, and I had a hard time keeping up with him. As a matter of fact, we had mortars walking up main street right in front of Regimental Headquarters and we had two guys hit, and he went after them, and I followed him. The mortars were still walking towards us. He grabbed one guy, and the other guy was limping towards him, and the other guy made it around the side of regimental headquarters, along the wall. Luckily it stopped about 5 or 6 feet short of the edge of that wall, or else we would all have been fragmented that day. He was out moving around the base that morning and the rest of that day, and the following two weeks that I was driving, he was out and about. We were dodging sniper fire.. so at one point we just abandoned the jeep, crawled from bunker to bunker... He had a way of motivating you without actually having to give you the boot in the rear end—his comments, or the way he would say something, or his mannerisms. You knew exactly what he meant. We were getting ready to go out and he asked me, 'Corporal, how come you haven't shaved yet?' And I said, 'Colonel, I don't have a razor.' He opened up his desk drawer and pulled out one of those disposable razors and said, 'Here, shave!' 'Right here, Sir?' He said, 'Yep, go ahead, you've dry-shaved before haven't you?' He said, 'I want you to look like a Marine.' And I said, 'OK,' and proceeded to dry-shave. We checked on some of the different Commanding Officers, checked casualty reports, made it to the runway, checked the status there. It was a daily routine... Most of Colonel Lownds' time was spent above-ground... He stayed away from the media. His time was too valuable. He knew what the situation was. There was a possibility of nuclear intervention. I had a Top Secret clearance, perhaps one of the reasons they sent me over to the Colonel's bunker... I remember laying in a slit trench next to Colonel Lownds right outside headquarters. We had dug [it] the first day as quickly as we could; it was only about 10 inches deep. And incoming came in, and the two of us are laying there, side by side, facing one another. After the incoming subsided, he just literally stood up and picked me up with one hand and said, 'Come on, we have work to do.'... [He avoided "salty" language]. He expressed himself with the education and the intelligence that he had. He was able to stay away from vulgarity. There were times when his language might have been a little strong, but very seldom, very seldom, like the average Marine, like myself. He didn't express himself in that way at all. Even when the situations seemed like they were taking a turn for the worse, he still had an inner character and a strength about him that I saw him display, that really kinda gave everybody around him not only hope, leadership that he displayed... He was like a "shadow" the way he moved around the

[634] Conversation with Louis Rann, 30 Oct 1994. Capt Earle G. Breeding recalls, "The President talked to him on the telephone. When a President calls a Regimental Commander on the telephone, every subordinate person—subordinate to the President—is kissing butt. Nobody's going to stand up to him and say, 'Hey! That's stupid!'" [Conversation with Earle G. Breeding, 29 Oct 1994].

[635] Conversation with David E. Lownds, 2 December 1994.

[636] Comments of Frederick McEwan at Khe Sanh Reunion, Nashville, Tn, 21 July 1990.

base, like the "Phantom" movie that just came out. He moved. Sometimes he moved very openly. He very seldom had me stop the jeep, even for incoming rounds. There were only one or two situations that I can remember where he actually said, 'You'd better stop and take cover in the ditch.'"[637]

PFC Craig W. Tourte (HQ/1/13) in 2004, 36 years after the siege battle, wrote: "I was manning the line .. just a hundred yards or so south of the main gate. It was one of those dark dreary nights when you just stand there looking straight ahead at nothing. Exhausted from lack of sleep, C rats, rain and cold, digging and just plain being there, I turned towards a voice behind me who said, 'How is it going, Marine?' I looked up and saw..a Marine.. who had a big broad mustache and was accompanied by another Marine with a radio... He introduced himself as Colonel Lownds. He said he was just seeing how things were going and asked how we were getting along... He smiled, turned away, and continued walking down the trench line... I never expected a colonel to express concern for a lowly PFC... That simple act lifted my spirits and for some reason I felt a lot more secure knowing that the commanding officer was in this with us and was exposing himself to the same dangers the rest of us faced... I am proud of all who served—and of Colonel Lownds, who shared the danger and the pain, and made one lowly PFC feel as if his life was worth something."[638]

Capt H.J.M. ("Mac") Radcliffe (CO, A/1/9) recalls that after the Alpha Outpost (Hill 64) had been attacked and A/1/9 lost over 30% of its company on 8 February, he had told his troops, "Nobody gets into the Company perimeter I don't know about it." "They called down and said, 'We got somebody coming into your area.' I said, 'Stop him! We had a lot of press people and others coming in. I said, 'Who is it?' They said, 'I don't know who he is, Sir. He has a moustache and cigar and has his radio operator with him.' Well, I knew right away that was Colonel Lownds. He looked at me and said, 'How you doing, Captain?' I said, 'Fine, Colonel.' He said, 'No.' He pulled me aside, away from the radio operator, and said, 'Mac, how you doing?' And I said, 'I'm hanging in there.' And he said, 'I know you will.' And he gave me a cigar. Just that touch. I knew what I'd known before, but reinforced the fact that we had a caring, concerned, intelligent, super Regimental Commander, who knew what the hell it was to 'take it,' 'take it,' 'take it' and bounce back to be a Marine!"[639]

On one of his walks through the KSCB during the Siege, Colonel Lownds came into the Ponderosa area containing D/1/26 and noticed the men's clothing was getting raggedy. He told George E. Myrick, "Corporal, you get clothes anyway you can get I'em!" "I said, 'Yes, Sir! We stole them off the comm. lines. So I got his shirt. A day or so later, Lownds was again visiting the area, walking around. He saw his shirt, but said nothing at the time. Returning, he simply said, 'Nice shirt, Corporal! You got my sox, too?' and he walked away."[640]

John Hargesheimer (A/3rd AT Bn) remembers that during the Siege, "I was sent to deliver a message to Col. Lownds. I had to go to the concrete bunker that was his headquarters and was led through the maze to where he was. He was sitting in a chair and he looked exhausted. He didn't look up when I delivered the envelope, but he did thank me. I immediately turned around and left, but it left a lasting impression on me of the enormous responsibility that this one man had to carry and I was humbled. After that experience I prayed every night during the siege for Col Lownds. If anyone needed God's help and strength it was Col. Lownds during the siege."[641]

While histories of Khe Sanh generally focus on General Giap and General Westmoreland, neither had much to do with Khe Sanh other than in general, strategic ways. It was Colonel Lownds, with his staff, that targeted 95% of all B-52 strikes and generally conducted the entire course of the battle.[642] It was Colonel Lownds who had to make the agonizing decisions to abandon Huong Hoa District, to deny entry by the Lao refugees after Lang Vei had been overrun, to place a perimeter of KSCB with machineguns and riflemen pointed into the appended FOB-3 compound (both of the latter due to the possibility of NVA agents which could assassinate Americans as they did on 4 May 1967 when Lang Vei was attacked and the CO and XO killed, which led to the construction of the "new" Lang Vei so that no indigenous were within the inner perimeter, reserved for Americans). Colonel Lownds had very deep feelings for the local Bru (who were prohibited from leaving the Khe Sanh area by the Vietnamese ARVN I Corps Commander, General Xuan Lam). He recalls, "There was an old guy in town. I used to have a bunch of cigars. I'd take a few and put a few in my pocket and stop at his hootch and talk with him—not talk with him—I'd just give him the cigars. He was an old-timer and I took a real liking to him. I often wondered what happened to him."[643]

[643] Conversation with Col David E. Lownds, 01 September 1994.

"I took the driver and radio and went back in the hills to a village and saw a little boy standing there, naked and he couldn't speak any English and I couldn't speak any Bru. But he held up something. Now this was way back in the woods. He held it up. And as you know there's plenty of clay there. He made himself a clay helicopter to proportion. He had even gone on to the point of having the machineguns come out of the helicopter at the right spots. I got a picture at home. It's always impressed me that people say they were dumb. They're not dumb; they just never had the chance to have an education."[644]

Col Lownds was born 4 Oct 1920 in Holyoke, Massachusetts, and graduated in 1938 from Westerly High School, Westerly, Rhode Island, and earned a B.S. in agriculture in 1942 at the University of Rhode Island.[645] His father had served in the Army during World War I, but rarely talked about his experiences. "He was just like me: didn't want to impress people; all he would say was [I was] a good boy."[646] A Marine recruiter came to college and half a dozen young men joined the Marine Corps, including Lownds,[647] who was commissioned a Second Lieutenant in October, 1942 in the USMCR and shortly thereafter reported to 4th Marine Division as a Platoon Leader. He was promoted to 1/Lt in July, 1943. During World War II, he saw action as a Platoon Leader with Co. B , 1/24, 4th Marine Division, at Roi-Namur in the Marshall Islands, Saipan in the Marianas, and at Iwo Jima.[648] He was wounded on Saipan and Iwo Jima; one of the wounds involved a shot through the hip[649] and the other a concussion.

From July 1953 to February, 1954, he served as the Intelligence Officer of 9th Marine Regiment. "When I went in the 9th Marines, I wanted to be the "3" but Colonel [William Kenefick] Jones [the "father of Marine Corps Corps-level amphibious reconnaissance during WW II, later LtGen, and father of James Logan Jones, who served as a Captain at Khe Sanh in May, 1968, and later was Commandant of the Marine Corps, Supreme Allied Commander of NATO, and as Presidential Military Advisor to President Obama during his first term] said, 'No.' He had 'Pinky' Saunders and said, 'I'm not going to replace Pinky now, so I'll make you the '2.'"[650] It was at this time that several Privates and PFCs reported in as scouts—Harper Bohr, Jerry Hudson, and Earle Breeding—the first two the S-2 of Regiment and the latter CO of E/2/26 during the Siege.

He served in Korea with 1st Shore Party Bn of 1st Marine Division. He served as a staff officer at the Armed Forces Special Weapons [nuclear weapons] Project in November, 1954 until October 1957. After being promoted to LtCol in July, 1958, he served as Plans Officer of the 2nd Marine Division and from September, 1964 to July, 1965, as S-3 of 4th Marine Expeditionary Brigade during the Santo Domingo involvement, Dominican Republic.[651] He was promoted to Col in July, 1965.

He married the former Jean C. Bruner of Cranston, RI and had 6 daughters and a son. Mrs. Lownds recalls that while Col Lownds was at Khe Sanh during the siege, one of their daughters was in 6th Grade and taunted by her classmates who said her father was a killer—because of the TV coverage. Mrs. Lownds was unaware of this at the time.[652] Even high-ranking officers and their families were not immune from the ill-treatment of many Americans at the time!

LETTER TO GENERAL RON CHRISTMAS, 04 September 2011, upon the death of Colonel Lownds and his invitation to preside at his funeral:

Dear General Christmas:

As I mentioned on the telephone, Colonel David E. Lownds had a profound effect on my life. Although I was assigned to 1/26 and not the regiment, for a long time, 1/26 was the only battalion at Khe Sanh and I came to know Colonel Lownds through informal conversation and the evening regiment briefings. Soon after his arrival at Khe Sanh on 12 August 1967, I noticed his presence at memorial services for a Marine from recon that had been killed while his team attempted an insertion and for a Marine who drowned in the nearby Rao Quan River. His concern and interest in the welfare of the Marines at Khe Sanh was plainly evident. He cared.

I recall an incident during the monsoon rainfall in which a recon team had completed about eight days of patrolling, had run out of water and food, and due to the weather, the helicopters couldn't extract them. 1/26 had alerted an infantry company to move to them and bring them back. (They were south of us, south of Route 9, as I recall). Knowing all the men in

the recon team, I had obtained permission and decided to accompany the patrol. Just as we were about to depart the combat base, the skies cleared and the helicopters were able to extract the team. Colonel Lownds suddenly appeared with our infantry patrol and informed us that the team had been successfully extracted and thanked us for preparing to rescue them. He didn't have to do that, of course. His presence there spoke volumes of his concern for his men.

I recall talking to a recon Marine (Kevin Macaulay) who overheard a conversation in the regimental bunker. It was a conversation between Colonel Lownds and the recon commander who was about to commit another team to replace one that had just been shot out. Obviously, we knew where the enemy was! Colonel Lownds told the recon commander, "Don't you care about your men? Why are you sending them to the place where we already know the enemy is located?"

Colonel Lownds had his humorous moments. At one regimental briefing, he had just returned from a visit to 3d Marine Division at Phu Bai, and he jokingly reported to the staff and officers gathered about his trip "to the wonderful world of 'Bai'." I can still hear him talking about how they "actually had sidewalks of wooden pallets so you don't get your boots muddy!" (laughs). "And then there was hot and cold running water–and flushing toilets!" (more laughs). "They actually had air-conditioning–but I don't think they'll ever get it as cool as we have it here at Khe Sanh!" (by now he was on a roll, and everyone was roaring!)

As I mentioned to you, General, I am firmly convinced that I am here today because of some very difficult, agonizing decisions that Colonel Lownds made during that Khe Sanh siege battle. In fact, had I given a short eulogy for him, I might have been tempted to use the text from John 10.10 ("I am come that they might have life, life in its abundance") and noted that while this may be strange to use for a Marine officer, it certainly reflected what Colonel Lownds accomplished. He made numerous decisions that all turned out right. Probably from his earlier duty as a regimental S-2 (in which he had, by the way, two very junior lieutenants who later served him as Captains during the siege–Jerry Judson, one of his S-2 scouts who was, during the siege b, his S-2, and Capt Earle Breeding, another scout who was the commander of E/2/26. Earle tells me that when 2/26 arrived at Khe Sanh just a few days before the battle erupted, the officers and staff of 2/26 were in the regimental bunker and Colonel Lownds said, "We will hold." And then spotting Earle, continued, "Won't we, Captain Breeding?" to the astonishment of all the officers of 2/26!))

For example, he placed battalion 1/9 at a blocking position to guard the approach to the combat base in an area (we called it the "Rock Quarry" because the Seabees quarried basalt and crushed it for a sub-base for repairing the airstrip in the fall of 1967), rather than on Hill 471 near the junction of the base access road and Route 9 near Khe Sanh village, an area where a recon team had been surrounded the very day the base was attacked. He also placed the 37th ARVN Ranger Battalion on the eastern perimeter of the base after learning (from a North Vietnamese rallier) that the NVA attack plan indicated a major assault would come from that direction. He maintained the base perimeter when the Army's SOG unit, FOB-3, formed a large "bubble" on the perimeter. He even had .50 caliber guns and M60 machineguns pointed into the FOB-3 position, much to the consternation of the soldiers there! But they had hundreds of indigenous troops, and who knew how many NVA were among them? (In fact, one of the FOB-3 troops that worked for Special Projects, SFC Charles Minnicks, once told me that his point man was a NVA soldier they had captured on one of their patrols!). He made the agonized decision to abandon Khe Sanh village and withdraw the Marine CAC OSCAR unit as well as the District Headquarters since it was indefensible. He refused to be lured into the trap of dispatching a Marine contingency company to reinforce the Army Special Forces Camp at Lang Vei when it was overrun with tanks since aerial observers and signals intelligence indicated numerous ambush sites. He refused to admit the refugees from the Laotian BV-33 battalion that had been overrun by tanks and taken refuge at Lang Vei which was subsequently overrun by the same tanks. The Laotians had thrown down their arms at Lang Vei, much to the anger of the Special Forces from FOB-3 that went to rescue that position, and who knew how many North Vietnamese were among them?

For all these actions, he was severely criticized by some–by some who were in Khe Sanh village, by the press (for not permitting the Lao refugees on the combat base), by the soldiers of Lang Vei for not coming to their rescue, and so on. Yet, it was the correct decision and it meant that human life was maximized. That is why I was thinking of John 10.10 as a text for his funeral!

There were many other decisions–a platoon of the Combined Action Company OSCAR (O-2) had been planning to relocate to a position near Lang Vei, but that was stopped by Colonel Lownds. Had they gone ahead with their plans to relocate, they certainly would have been annihilated in the opening days of the battle. When the siege battle began and Khe Sanh village was attacked, an infantry company (D/1/26, led by Walt Chapman, the Commandant's son) had left the combat base and reached Hill 471, just a click away from the village, when Colonel Lownds recalled them. He had received intelligence that only a NVA battalion attacked the district headquarters but a whole NVA regiment was in ambush positions to snare any reinforcements. Again, he was able to save dozens of lives!

He had personally (sometimes, only by himself!) walked through the entire area, becoming totally familiar with all the approaches to the base. SFC Bill Craig, the Team Leader for the Special Forces camp once told me how he was very nervous with Colonel Lownds walking about the area near Lang Vei–by himself! The Colonel also thoroughly scouted the eastern approaches to the base, a flat terrain going north from Route 9, and the location of a regimental assault on the combat base on the night of 29Feb/01 Mar, and with the expert abilities of Major Mirza Munir Baig, his Target Intelligence Officer and also an expert in artillery, was able to decimate the attaching regiment so none closed on our wires.

On Marine Corps Birthday, 1967, I was on top of Hill 881-South, one of our outposts, a position captured during the 1967 Hill Fights at very great loss of life. It was a very foggy day, rainy, and very cold. Although I grew up in Wisconsin and spent 7 years of college and seminary in Minnesota, I can say that I never felt more cold than I did at Khe Sanh. We were at a high elevation, and it rained, perhaps seven inches a day, for several months. We could never get dry. Trenches and bunkers collapsed. Resupply was tenuous. Many of the 31 bridges over the only land access route to logistic bases to the east (Route 9) had washed-away. Aerial observers were unable to detect enemy encroachment. Patrols were wet, muddy, miserable. Bunkers collapsed. One bunker on the combat base being built for the regimental communications section collapsed, killing two short-timers due to crushed chests, while a dozen or so others received broken ankles, arms, legs. On Hill 881-South, being Marine Corps Birthday, two platoons were gathered in a formation; one platoon was out on patrol. We could hear a helicopter attempting to land, but which had no visible approach. Miraculously, it did land, and out came Colonel Lownds along with our 1/26 commander (LtCol James B. Wilkinson) and the artillery commander. They brought a birthday cake. We were all in a formation, and I recall–I even put in my daily diary–the Colonel mentioned something about how he always got together with a couple other Marines for this special day, "but I doubt they'll be coming to Khe Sanh to be with me today.! (The Colonel always had that humorous element). He then said, "You all soon will be in the American history books!" I don't recall any of the troops or officers there subsequently commenting on that. I guess we had been warned so many times earlier to expect an attack–the Vietnamese elections, the monsoons, etc.,, that it was almost like "crying wolf." But I took it seriously!

I remember a regimental briefing in mid-January, about ten days before the battle), in which the Colonel announced that all Marines would have their rifles with them while on the base, would wear helmets, and he wanted internal concertina. He also said "The forward observers can readily see where the command bunker is with all the antennas. Therefore, I want false bunkers built and false antennas erected. During the 1/26 battalion briefing the next morning, LtCol Wilkinson quipped, "The Colonel wants false antennas because his location is prominent. Therefore, instead of the regiment taking 50 rounds, the whole base will take 500 rounds!" How prophetic that all turned out to be!

General, I believe I already sent you a copy of my 2nd edition of Battalion of Kings. On pages 148-151, there is an extensive piece about Colonel Lownds, and I am attaching those pages in case you don't have that particular book at hand. There are numerous accounts of Colonel Lownds that reflect his personality and leadership.

Many years ago, while still on active duty, I was doing some research at the Marine Corps Historical Division, and Colonel Lownds picked me up one late afternoon, and drove me through all that horrendous DC traffic to his home. I seem to recall it was in Fairfax. His wife, Jean, prepared a wonderful supper and we had a most enjoyable time. He then drove me back to where I was staying. I think it was Ft. Myers, in a temporary officer quarters. His hospitality, warmth, will never be forgotten.

Over the years, we've maintained connection through letters, birthday and Christmas cards, and he even telephoned me a few times in recent years.

I've always thought that he should have become a General, perhaps even Commandant. Khe Sanh was so controversial–as was the entire Vietnam war, of course. The question of "who won," and who provided the crucial element (the resolve of the Marines, the B52s of the Air Force). Certainly, the politicians didn't! Yet, Khe Sanh was perhaps the bloodiest battle of the war (over 40,000 enemy and locals killed, nuclear weapons were considered, the JCS had to sign-off that we wouldn't fall, etc.). History books speak of Westmoreland and Giap, and yet it was Colonel Lownds and his staff that planned most of the Arc Light strikes (according to Mirza Baig). Colonel Lownds is the real hero (i.e., the one who got us through it all).

Fortunately, I was able to tell him, in writing and phone, how I feel, how I admire him, how I remain so grateful to him for bringing us all out of that horrible hell! Perhaps I've written too much, but even these words can't express the fullness of gratitude and admiration I have for this truly great man.

You can see why I was so honored and yet humbled by your gracious invitation.

Please convey to the rest of the family my sincerest condolences with the assurance you all remain in my prayers.

Semper Fidelis, Ray W. Stubbe

VARIOUS CONVERSATIONS, LETTERS, and EVENTS

FROM MAJ MIRZA M. BAIG:[653]

> There is no question that to Colonel Lownds goes the credit for the successful defense of Khe Sanh and for the destruction of two NVA divisions. To my mind, his greatest gift lay in his ability to use his staff. Recognizing that his offensive capability lay with his supporting arms, Colonel Lownds called upon the FSCC for more and greater efforts. Given enough supplies, he could have held indefinitely. This was not only his view, but the opinion of everyone, too.

CONVERSATION WITH EARLE BREEDING, Wednesday, 18 July 1984

Mentioned that when he was a Private in 1953, he was a scout for then Major Lownds, S-2 of 9th Marines.

CONVERSATION WITH KEVIN C. MAC AULAY, 12 August 1984 in his home

The regimental Commander for the 26th Marines, Colonel David Lownds was a very impressive figure—and that handle-bar moustache. He had a quiet way about him. We took incoming this one day and one 122mm rocket landed in the street between Bravo Company's company office [B Co, 3rd Recon Bn] and the entrance to the COC bunker. This brand-new 2nd Lieutenant [1/Lt Robert J. Mariz, KIA 30 Jan 68] had just exited the COC bunker, I guess after checking in with the Colonel. The Colonel didn't need any platoon commanders and was going to use him in an administrative post. His utilities were perfectly clean. His flak jacket was green where the rest of ours were red because of the clay. His helmet liner and helmet cover—they were perfectly green. His jungle boots were the bright green and the dark black that characterized jungle boots. And he walked out of the COC bunker after getting his assignment and walked right into the middle of this barrage. He was wounded extremely severely by this 122mm rocket, and we saw him laying on the ground and one of his feet at a totally impossible angle. His foot was almost severed, and there was a big pool of blood around him.

We were carrying our company clerk, a fellow by the name of Coleman, out of the company office. He had taken shrapnel from the same round that had hit this Second Lieutenant

Coleman had lost the major portion of all his fingers on both hands, plus he had a gaping wound over his right kidney, but I do believe that he survived. We ran Coleman up to CHARLIE MED and then we came back and there was a group of fellows around this poor Lieutenant. As we were loading him on to the stretcher, Colonel Lownds came up out of the COC bunker to take a look what was going on, and he spotted us there. Immediate recognition came upon his face as he saw this poor Lieutenant.

We picked up this Lieutenant and Colonel Lownds was watching us. Colonel Lownds looked over to us and yelled, "Hey, Marine, how's he doing?" And I looked back to Colonel Lownds and I shook my head, because as soon as we had brought him into the aid station, doctors took one look at him and said, "Put him over there," and it was the same place that they put Reather [PFC Wallace Lee Reather, Jr., KIA 27Jan68], so I knew at that point in time that he was dead.

And you could see the look that came across Colonel Lownds' face. You could see how visibly he was upset by this man's death. It was one of the few times that I had seen Colonel Lownds and had direct conversation with him. I had seen him numerous times in the COC bunker, but it was the first time that I had really spoken to him, and it just gave me the impression that the man really cared. Not only did he care about the entire base—the worry that he had on his mind that we had anywhere between ten to forty thousand NVA against us, but he was concerned about the individual. And he was visibly shaken by this man's death. And it impressed me because it showed me that—I admired Marine officers in the war and I thought they were all "John Wayne" or "Sergeant Striker charging up the Mount Suribachi in Iwo Jima" and it showed me that they were personally affected by our death.

CONVERSATION WITH EARLE BREEDING, Wednesday, 29 May 1985

When 2/26 arrived at Khe Sanh (17 January 1968), the officers assembled in the regimental COC for a briefing. Everything was highly classified[654] but they needed to be told everything anyway. Lownds said, "We must hold." Then he

---

[653] Ltr from Mirza M. Baig, 23Dec68, HQMC HistDiv, Khe Sanh monograph comments file.

[654] LtGen Phillip B. Davidson, J-2 of MACV, upon visiting Colonel Lownds just before the siege erupted, mentioned: "Lownds had the information. As a matter of fact, I remembered it was posted openly in the command bunker, and I thought at the time, this is serious security violation because it was communications intelligence." [Conversation with Lt Gen Phillip B. Davidson, 19Apr89].

noticed Breeding sitting there. He then said, "Won't we, Captain Breeding?" Very surprised at being recognized, Earle simply said, "Sir, with ECHO Company, Khe Sanh will be held!" – much to the shocked looks of the others present.

LETTER FROM COL DAVID E. LOWNDS TO RAY W. STUBBE, 18 June 1990
[To be read to Khe Sanh Veterans, Inc., reunion]

Dear Chaplain Stubbe:

First, I consider myself a warrior not a writer

As a famous General once said, 'Unhappily, I possess neither that eloquence of diction, that poetry of imagination, nor that brilliance of metaphor to tell you.." I, too, cannot express the deep feeling I have for those whom I served with at Khe Sanh.

It was a honor and privilege to command some of the finest Marines in our Corps' history.

A great deal was written about Khe Sanh – about the feasibility and desirability of defending it. Khe Sanh was important at that time and North Vietnam wanted it so much that they committed three divisions to try and overrun it. As you know they failed. Their defeat was made possible by a team with all members of the team giving a hundred percent effort.

To those who died at Khe Sanh, we say fear not that you died in vain for we caught the torch you passed to us and held it high. Marines rest

"Your warfare is long over
Sleep the sleep that knows no breaking
Dream of battle fields no more."

Some of you are or have suffered from Post Vietnam Syndrome and my prayers are with you for a complete recovery. May God stand between you and harm in all the empty places you may walk.

My sentiments are best expressed in a dispatch which was received in April, 1968, and which I quote in part: "...Marines of other years have said with pride, I was at Belleau Wood or I was at Tenaru, or Suribachi, or Inchon or at the Reservoir and well they may be proud, because our country has benefited and our Corps has flourished as a result of their deeds. Now this is a new group, those gallant Marines who can lift their heads and say, I was at Khe Sanh, knowing that through their indomitable conduct they have brought reassurance, confidence, and strength to the whole free world.

Khe Sanh was to have been the enemy's decisive strategic triumph. He vowed that he would overwhelm you. But he failed, and his failure at your brave hands is plain for everyone to see.

Have a wonderful reunion and may God bless you all.

Semper Fidelis, David E. Lownds, Colonel, USMC (ret)

CONVERSATION WITH DAVID E. LOWNDS, 265 August 1990

[*Speaks of his return trip to Iwo Jima during the summer of 1990*]

I was able to find the exact spot that I was shot at. I would guess within a foot or two, because I remembered it that well. I was in B Company, 1st Battalion, 24th Regiment. I got it through the hip.

CONVERSATION WITH DAVID E. LOWNDS, 01 September 1994

[*On whether he would be open for me to write up a biography on him*]

Well, I don't want to publicize myself. I don't know if that's right or not, but I just feel that there's plenty of other people in the world that people should know, not me.

...

I got a call last week from some First Sergeant that retired and he just wanted to let me know that he thought that I had gotten a bum rap, and the time he was in the Marine Corps he always said, If I saw a situation I didn't know quite how to handle, I'd say to myself, I wonder how Colonel Lownds would of done in this situation? That to me is the ultimate—gee, it makes you almost want to cry to think that after 25 years would think of you and call you on the phone and tell you that. It makes you think: what a wonderful organization it is that people would think to do that.

... I went to an Army Intelligence School in Fort Riley, Kansas, at one point in my career, when I was a Captain or a Major. Well, when I went in the Ninth Marines, I wanted to be the "3," because I had been "3" of the Second Marines. And Colonel [William Kenefick] Jones, who had the Ninth Marines at the time, said, No. He had "Pinky" Saunders. He said, I'm not going to replace Pinky now, so I'll make you the "2." [*He had on his staff, then Privates and PFCs, Jerry Hudson, Earle Breeding, and Harper Bohr. all who later served at Khe Sanh as Captains and Majors*]

[*Colonel Lownds was born in 1920, and his father served in World War I*]

[*He grew up in the Depression*] I was very fortunate. My dad never missed a day of work. He was a Superintendent of a mill, elastic web mill. He never missed a day's work. When everybody else was out of work, my dad was still working. So I guess one of my ambitions was—I always felt when I came in the Marine Corps, if I could make as much money as my dad made, which I think at that time was, $50.00 a week, I guess. If I could make that amount of money and get to be a Captain in the Marine Corps, I will have satisfied my life-time ambitions. I did a little better!

The recruiter came around to college, and there were about six or us that went. One of the guys got spinal meningitis in Quantico—he lived through it all right, and after he got out of the Marine Corps he was very successful as a financial—some kind of financial–. There were about six or seven of us: Oscar Morrell and Morey Flynn, Billy Rutledge, and a couple others—all went down the same time and joined up.

[*He was wounded twice, once on Saipan and once on Iwo Jima*]

I was probably in every scrap they had. I had a battalion in Panama when the rioting broke out there; that was the first time. General Mara had the Canal Zone at the time. Anyway, I was down there training and all of a sudden it broke out, so they just put me in an alert status. They never did anything, but I was all ready to go if they needed me. Then I went to the Dominican Republic. I don't even remember where else I went.

[*Mentions an old Brou man at Khe Sanh village*]

I used to always have a bunch of cigars. I'd take a few and put a few in my pocket and stop at his hooch and talk with him—not talk .. because he couldn't speak any English. But he was an old-timer and I took a real liking to him. I often wondered what happened to him.

CONVERSATION WITH DAVID E. LOWNDS, 02 October 1994

[*You had become intimately familiar with the whole area, possible storage sites and assembly sites, places of movement*]

Well, I patrolled by myself, with just a radio operator. I went out all the time. I was out most of the time. As a matter of fact, at one point, when it first started, I went out to look at the water point. I got three-quarters of the way there, heard something in the brush, so I headed back. somebody was there. Sometimes I'd even go out by myself. Nobody knew it. I didn't want to jeopardize anybody else. I went out quite frequently. Any commander needs to know the terrain he's fighting in. If he doesn't, he's in trouble. [*because of this*] I was able to pinpoint in my own mind the likely places of attack and also where the lines of departure would be. In other words, the terrain. As a matter of fact, when we had that B-52 strike: that came as a result—nobody wanted to give it to me—General Tompkins did, but Westmoreland and nobody else did. but that—and I told them, that's where they are and that's their line of departure, and if they're going to attack they're going to attack from there, and I want them. And they said, Well, that's too close to your lines. And I said, I don't give a damn how close they are. Yeah—it all paid off in the long run.

[*Your father had been in World War I. Did he ever comment on the similarities to the trenches at Khe Sanh?*]

No. My dad was not that type. He was getting pretty old by then, anyway. He never commented on it at all. He was just like me—didn't want to impress people. All he could say was that I was a good boy.

CONVERSATION WITH LOUIS RANN, 10 October 1994

Upon mentioning to him whether or not Colonel Lownds walked around the base during the siege: "O yeah, he wandered around. He was always checking up and walking around."

CONVERSATION WITH EARLE G. BREEDING, 29 October 1994

"The President called him on the telephone. ... I was talking to Lownds the last time I saw him, in Florida. I asked him a number of things. We had quite a talk.. I said, Colonel, to put us up on a hill like that with orders that no Listening Posts, no anything—out in front of the wire, to me goes against all the training I ever had. And he said: That was from higher up. And I said: Well, I want you to know if it hadn't been for a Listening Post we had out there, we may have been overrun. I had one out there, in violation of anybody's orders. And he said: I knew you would! That's all he said. That told me a lot right there."

CONVERSATION WITH FREDERICK MC EWAN, 30 October 1994

Mentioning that he had said that he and Colonel Lownds swam across the Rao Quan River:

Yeah, Colonel Lownds and I did that. It was the last steel bridge that they blew. I forget which company—we had one rifle company went out there with a battalion staff. Dave Lownds and I swam across that river and back, and it was a strong

river.[655] Of course we were both excellent swimmers and all that [?] to determine what it would take to rebuild that thing, and it was going to be a major engineer effort. The river was very deep. It wasn't fordable by a tracked vehicle.

[Frederick McEwan also mentioned this river crossing at the 1990 Khe Sanh Veterans reunion, 21 July 1990.]

CONVERSATION WITH KEVIN MAC AULAY, 30 March 1996

The day that we got hit, on the 21st [of January, 1968], he's [Capt Reynolds, CO of B Co, 3rd Recon Bn] putting a patrol together to go out and probe the area a thousand meters in front of the Rock Quarry. And Lownds said to Reynolds: Don't you like these people? Reynolds said: What do you mean? He said: We know that these people are out there, why send a 7-man recon team out there to get wiped-out to confirm that they're out there. Do we need bodies to confirm that they're there? What's why I love Lownds.

CONVERSATION WITH TOM BUONO, 11 June 1996

I was is [Lownds] driver for the first two weeks during the Siege.

[In response to statement, "people have said that Colonel Lownds stayed in his bunker"] Absolutely not. The morning the Siege started, Colonel Lownds was out and I had a hard time keeping up with him. As a matter of fact, we had mortars walking up main street right in front of Regimental Headquarters at about nine in the morning, and we had two guys hit. And he went out after them, and I followed him. The mortars were still walking towards us. And he grabbed one guy, and the other guy was limping towards him, and the other guy made it around the side of regimental headquarters, along the wall. And the last of the mortars hit. Luckily it stopped about five or six feet short of the edge of that wall, or else we would all have been fragmented that day. He was out moving around the base very, very quickly that morning and all the rest of that day. And the following two weeks that I was driving, he was out nd about. As a matter of fact, we were dodging sniper fire on the west perimeter of the base to check on the Forward Observers that were out there, right on the perimeter. So at one point we just abandoned the jeep. We crawled from bunker to bunker. At that time he had a handlebar moustache. In the Department of Defense film it shows him completely clean shaven.

One thing that he insisted on was that I shave every day. I think more than anything else he was trying to keep my spirits up because I was feeling pretty low at that point because I knew what the casualty figures were, what our ammo supply was like, and the forces that were surrounding us. I was right there in the middle of everything, hearing everything, and it was a pretty bleak picture.

He had a way of motivating you without actually having to give you the boot in the rear end. His comments, or the way he would say something, or his mannerisms. You knew exactly what he meant. As a matter of fact, the day after the Siege started, I was in Headquarters with him. We were just getting ready to go out. He asked me: How come you haven't shaved yet? And I said, Colonel, I don't have a razor. And he opened up his desk drawer and he pulled out one of those disposable razors and he said, Here, shave! Right here, Sir? He said, Yep, go ahead, you've dry shaved before haven't you? I said, Yes, Sir, I have. And I did. He said, I want you to at least look like a Marine. And I said, OK. So, I proceeded to dry shave. And we checked on some more of the different Commanding Officers. They were spread around the base—checked casualty reports, made it to the runway, checked the status there. It was a daily routine.

Most of Colonel Lownds' time was spent above ground. .. He was in the bunker when it was hit. He was in his cot, and it hit the wall where he was, and it threw him out of the cot.

I did have a Top Secret security clearance. I think that was one of the reasons they sent me over to the Colonel's bunker.

... I remember Christmas Eve.... at that time I think they knew [we were going to get hit]. From conversations I had with the people that were working in intelligence—that I more or less went through Basic [training] with, they got there [at Khe Sanh] before I did. Some us came to me with some pretty serious concern—almost felt like we were being "set up," In a sense, we were.

[*He then mentions he left KSCB on 19 Jan to go to Dong Ha*] to get two jeeps with special "sound sensitive equipment for being able to detect enemy movement. [*Perhaps they were for the electronic sensors or for signals intelligence*] We picked these up—that was one of my assignments from Colonel Lownds because of my security clearance. When we got back to the base the first confrontation on 881 had started and there was air support going on. [*This was INDIA Company, 3/26's patrol to 881-North*]. We picked them up—myself and another NCO. We came back the following morning. It is the most vivid memory I have. I had a splitting headache when we landed. When we landed, one of the whip antennas from the jeep got

---

[655] Two Marines at Khe Sanh drowned while crossing the Rao Quan River: PFC John Robert Hinson (16Aug67) and LCPOL Marion Lee Meggs (16 Nov67).

caught in the rotor blade after we backed it out. The antenna on the jeep wasn't damaged and the sound equipment wasn't damaged, but the blade on the chopper was. So it was grounded.

[*Did you ever see Colonel Lownds get angry?*]

I can't ever remember seeing him actually lose his temper. But I can remember seeing that one look of panic on his face when the artillery dump went off and he saw the casing of a round coming towards a Marine on top of the bunker trying to rearrange sandbags. And as he was yelling to him it was almost like a look of panic on his face. I remember that so vividly because the guy dropped and rolled to his right, and that's the direction it was coming at him. And as he rolled to his right it impacted, and it dropped about three or four sandbags right off the top of the bunker, because he was right on the edge of the bunker. It missed him by inches. If it would of hit him it would have literally split him. And it all seemed like it happened in slow motion—very slow motion. I remember laying in a slit trench next to Colonel Lownds right outside headquarters that we had dug the first day as quickly as we could. It was only about ten inches deep. And incoming had come in, and the two of us are laying there, side by side, facing one another. And he was quite a bit taller than I am. And after the incoming subsided, he just literally stood up and picked me up with one hand and said, "Come on, we have work to do." He could see that I was pretty well shaken because the rounds were real close.

I was 19 at the time and pretty impressionable. I joined the Marine Corps with some pretty high expectations for myself, but when reality set in, it was a whole different b all game.

[*I never heard Colonel Lownds utter an off-color word*]

No, not at all. He expressed himself with the education and the intelligence that he had. He was able to stay away from vulgarity. There were times when his language might of gotten a little strong, but very, very seldom, where the average Marine, like myself, that was a common, everyday situation. He didn't express himself in that way at all. And even when situations seemed like they were taking a turn for the worse, he still had an inner character and a strength about him that I saw him display that really kinda gave everybody around him not only hope but the leadership that he displayed.

It disturbs me when he said that some people said he wasn't out and about the base. He was like a "shadow" the way he moved around the base. I kind of related it to "the Phantom," the movie that just came out. He moved. Sometimes he moved very openly and we'd go right down main street, right past the airfield, and right out the main gate and check the perimeter, see what's the situation out there—1/9, Special Forces. He very seldom had me stop the jeep, even for incoming rounds. There was only one or two situations that I can remember where he actually said, You'd better stop and take cover in the ditch.

REUNION AT ST. LOUIS, MO, 10-13 July 1997

[*During this reunion, Col David E. Lownds was present. Attendees also made a trip on 12 July to the nearby Jefferson Barracks National Cemetery where there were two large mass graves for the unidentifiable remains of the 25 Feb 1968 patrol and the 06 March 1968 crash of the C-123 that killed 43 USMC, 4 USAF, and 1 USN*] *At Jefferson Barracks, Col Lownds said:*

I speak for no individual. As a Commanding Officer, I speak for those who have no one to speak for them today. I want you to know—that although I don't know any of them personally—I may have patted them on the back, I may have shouted at them—but they were my brother, and they will always live within my heart, regardless of their name. And if you don't think a commander suffers when he loses people, you're sadly mistaken, because it goes deeply into your heart. It never leaves. The loss of one, single individual is more than enough. When it gets into a hundred, that's almost unbelievable. There are battles where thousands are lost. I can't imagine what the commander of the units must have felt. So I speak for all the brothers who died, and I know that they are all in our prayers."

At the general meeting of Khe Sanh veterans, several former Company Commanders came to the front (Earle Breeding, John Kaheny, and Mac Radcliffe. Col H.J.M. Radcliffe (CO, A/1/9 at Khe Sanh) then introduced Colonel Lownds:

RADCLIFFE: I remember the 8th of February. I was going to say something today at Jefferson Barracks, and I just couldn't do it. I took a helluva hit, as did my fellow Company Commanders here. I lost 50 some Marines that day, about 30% of my Company. ... When Colonel Lownds made h is comments today about what it means to lose one Marine, how it hurts—you can't show that when you're in command because you think you have to stand tall and not waver, and not be brushed aside by the horror of combat. You needed to lead by example. Let me tell you something nobody has ever heard. After Alfa got hit, two days later, after we reconstituted and tried to rebuild the Company, coming into my perimeter is some unknown individual with a radio operator. I told my troops: Nobody gets into the Company perimeter, I don't know about it. They called down and they said, We got somebody coming into y our area. I said, Stop him! We had a lot of press people and others coming in. I said, Who is it? They said, I don't know who he is, Sir. They said, He has a moustache and a cigar and has his radio operator with him. Well, I knew right away that was Colonel Lownds. He looked a me and he said, How you doing,

Captain? I said, Fine, Colonel. He said, No. He pulled me aside away from the radio operator, and he said, Mac, how you doing? And I said, I'm hanging in there. And he said, I know you will. And he gave me a cigar.

Just that touch, folks, just that touch. I knew what I'd known before, but reinforced the fact that we had a caring, concerned, intelligent, super Regimental Commander, who knew what the hell it was to 'take it,' 'take it,' 'take it,' and bounce back to be a Marine. God bless you!

COLONEL LOWNDS:

You know how to bring a grown man to tears, that's for sure. I've known these three men for many years now. They're all outstanding figures as everyone else in the Regiment is, as far as I'm concerned. Your courage, your determination, your fortitude, your obedience—everything about you, is outstanding. I think I could stand up here for a week and I could never tell you what you have meant to me.

You're a band of brothers. Well, in my case, I guess you'd say, A band of sons. I don't know that people ever really realize that if you're in command of a group of Marines, not necessarily in combat, when you go home at night, they really all sit down at the table with you. I mean, you can't take them out of our mind. You're always thinking of them. You take those people home with you at night. They're yours and you love them.

AT KHE SANH REUNION, 1997, ST. LOUIS, MO, AT GLEN RAPPOLD'S MEMORIAL TO KHE SANH AT HIS HOME. L-R: Ray W. Stubbe, Col David E. Lownds, Earle G. Breeding, and John Kaheny

Colonel Lownds then told of some incidents before and during the Siege, reflecting on the life and the humanity of the people that were there:

My sister, Pat, when she was a youngster—my dad served in World War I in the Army. At Christmas time he'd always tell the story—or used to start telling the story, and say, Pat, did I ever tell you about the guy in the Army that I served with? And she'd say, Dad, don't do it. And he'd say, Well, let me tell you this, I'll tell you once more, Pat. He said: The mail call'd come and they'd call out the names—Lownds, here; Majorsky, here; Smith, here; Jones, here. And this poor old Corporal or PC, with tears in his eyes, would say, No mail for me? He'd say, No. My sister—well, that was the end. She broke up.

Well, just to show you how things come around—probably none of you know this, or may be the gentleman's in the room today. I went out on Christmas Day and was walking the lines and I come beside this Marine who was sitting beside the road, crying. I asked him what was the matter? What is the matter, son? He said, Colonel, I just got here a few days ago, been in country now for about a month, and I haven't got any mail. And I said, Where have you been? He said, They keep transferring me.

Well, right away, tears come to my eyes, because I know what in the hell he was talking about because I had watched my sister cry many Christmases. So I went back to the CP and said, I don't care what happens, I don't care if you move heaven and earth, this man gets mail today! Not tomorrow, today! They came back, Bad weather for helicopters. I said, I don't care whether the helicopters are flying or not flying, bring it up by carrier pigeon. [They said], Well, they can't find it. [I said], Find it! Or, I'm going to see the General.

And eventually the young man got his mail. The story has always stuck with me.

I don't know whether it's true or not, so I'm not going to state it unequivocally, but I'd have to guess that you people in this room came the closest to B-52 strikes as anybody. the JCS at the time of Vietnam had a restriction that said you can't come within a thousand meters of the troops.[656] And that didn't quite satisfy me because I knew—or thought I knew—I guess I did, as it turns out—where their jump-off point would be. So I went to General Tompkins and said, I want a B-52 strike. He said, Well, they're already in the air. I said, I don't care. I had talked to the Air Force people to make sure that, Number One, they

[656] Note: This is a little over half a mile.

were accurate within 250 meters, and Number Two, that they could change it in the air. And he said, I'm sorry, Dave, I can't do it. He said, You're welcome to talk to General Westmoreland. He had a helluva Marine General down there [in Westmoreland's staff]. I don't know whether any of you eve served with him or knew him—John Chaisson. He was kind of the "3," the operations guy and a helluva officer, a Harvard graduate, intelligent as they come—rough as they come. I don't know it to be true, I understand that somebody gave him a bunch of sass at school when they were going to junior school, and he laid him out low, and kept his promotion down one year. And John said, I'll talk to General Westmoreland again. I said, I'd had about enough. I want something. How about you patch me through to the President. Oh! That shook them! So, to make a long story a little shorter, they finally said, OK, we'll change it; we'll put it where you want them. So I told them: 250 yards in front of the front lines by the early dawn. "Oh! Can't do it!" Said, How 'bout 500. I said, No, I want them 250. Said, We gotta go back to Washington. So they went back to Washington and Washington eventually gave us permission, so we got our B-52 strike. Incidentally, I'm told that that B-52 strike wiped out two battalions or the better part of a regiment.[657]

[Col Lownds then mentioned some stories about the Brou. Col Lownds had been known to walk the area around Khe Sanh by himself or with a radioman or one or two others on a frequent basis before the Siege. He gained much awareness of possible assembly points, places for strong points, mortar sites, etc., so that when the Siege began, he had a very good feel for the land. Bill Craig from the Army Special Forces at Lang Vei once remarked how critical they had been of what they regarded as reckless walking that the Colonel did. During his frequent walks through the area before the Siege, he came to know the Brou people, and like all who came in contact with them, felt deeply for them. There is official message traffic that relates how disturbed he was when the I Corps Commander, General Lam, permitted the 1200 Vietnamese at Khe Sanh Village to depart when the Siege began—on aircraft that had delivered many tons of ammo, but refused to permit the Brou to leave the area, saying, "There's no place in Vietnam for them," voicing the racism between Vietnamese and Montagnards. So they were forced to stay. Neither could he permit them inside the perimeter of the combat base—for several reasons: he couldn't provide shelter for them or food (we were frequently down to one C-ration a day ourselves, and without water for several days at a time) and it would have made for an insecure situation. Lang Vei had been attacked during the Battle of the Hills on 4 May 1967 when four Vietnamese who posed as CIDG recruits but were actually NVA, and who knifed the sentries on duty on the perimeter, permitting a large force to enter and kill the CO and XO, Captain Willoughby, CO of the Special Forces at the new Lang Vei camp, constructed in November-December, 1967, arranged that there would be no indigenous within the inner perimeter, only Americans. This explains why the Vietnamese and Brou from Khe Sanh Village were not allowed in the Combat Base perimeter, why the 37th ARVN Ranger Bn lines were a separate perimeter in front of our own lines, and why we had machineguns and perimeter facing in to the FOB-3 compound; in case the 15,000 NVA made a human wave" attack and put the local Brou in front of them as a "human shield" the question always was: would the Brou fire on their own people.

It must have therefore been a most agonizing and heart-wrenching decision for Colonel Lownds to keep the Brou he had come to love so deeply and respect so profoundly, outside our wires.]

Col Lownds continued—

I think that one thing that really impressed me: took the driver and the radio and went back in the hills to a village—a little boy standing there, naked, and he couldn't speak any English and I couldn't speak any Brou. But he held up something. Now this was way back in the woods. He held it up. And as you know there's plenty of clay there. He made himself a clay helicopter to proportion. And he had even gone on to the point of having the machineguns come out of the helicopter at the right spots. I got a picture at home. It's always impressed me that people say they were dumb. They're not dumb; they just never had the chance to have an education.

There was an old man—and everybody knows my cigar; I got one right here... Way back, I had taken a box of cigars and gave them to the S-1 and said, Put these cigars so when I run out, I got a box to fall back on. We got a bunch of incoming,. I was out of cigars. I needed a cigar to relax my nerves a little bit, so I said, Send me the "1." The "1" didn't come in because, unfortunately, he had been killed by that blast.[658] But the Top Secret clerk said, Your cigars were in the Top Secret safe, Colonel, and I hate to tell you this, but that blast took the Top Secret material out and took your cigars out. So I didn't have any cigars. Well, the people in the hills—on 881, if I'm not mistaken, sent me down a box.

It had been my habit, when I went down to Khe Sanh Village—there was an old Brou man—he must have been 70, 80, and he would be sitting on the front porch, and we'd stop the jeep, go in and light up a couple of cigars. We'd sit down. I'd give him one, I'd have one, and we'd smoke together. I got an awful lot of information from him. He couldn't speak any English

---

[657] This particular incident relates to the regimental-size assault from Route 9 to the eastern perimeter of KSCB on 28/29Feb68 [See Lownds, Debrief, Tape #6369, and his testimony to the Electronic Battlefield Subcommittee, 1971, p. 87].

[658] 1/Lt Robert J. Mariz, KIA 30Jan68.

and I couldn't speak any Brou, but he had ways of transmitting stuff to me and he was really a big help. He was a grand old guy, and I always wonder what happened to him—I could never find out.

[As Colonel Lownds returned to his table, with the assembly standing and applauding, someone began singing "He's a Jolly God Fellow," and the thunderous singing continued.]

[This was printed in the Khe Sanh Veterans, Inc., Red Clay, *Issue No. 40 (Fall, 1997), pp. 5, 8, 13-15]*

CONVERSATION WITH MRS. JEAN LOWNDS at Khe Sanh Veterans Reunion, St. Louis, Mo. , 12 July 1997

Mrs. Lownds mentioned that while her husband, Colonel Lownds, was at Khe Sanh, his daughter , in 6th grade, was taunted by her classmates who said her father was a killer—because of the TV coverage. Mrs. Lownds (Jean) was unaware of this at the time.

CONVERSATION WITH GEORGE MYRICK, 13 July 1997

Colonel Lownds was visiting DELTA Company, 1/26, one day. The men were getting raggedy. He says, "Corporal, you get clothes any way you can get em." I said, "Yes, sir!" So we stole them off the comm lines. So I got his shirt on. A day or so later, Lownds was again visiting the area, walking around and he saw me wearing his shirt, but said nothing at the time. Returning, he simply said: "Nice shirt, Corporal!" He said, "You got my sox, too?" and walked away.

CONVERSATION WITH GARY DAHLHEIMER AND COLONEL DAVID E. LOWNDS, 13 July 1997

LOWNDS: For COFRAM to work properly they have to go up in the air. That's funny. I wrote a message to the Marine Corps about that. They came to me and said, What's your clearance? And I said, I worked for the atomic weapons business, so I probably have the highest clearance you probably have. And they said, Well, we're going to have to give you another clearance so we can talk to you about COFRAM. I said, What the hell do you mean you're going to have to give me another clearance? Here I am, the god dam Commander and you're telling me you can't talk to me about it unless—I told them to take the damn stuff and go home! They said, OK, fill out this form. I said, I'm not going to fill out a damn form; I just finished a tour in the armed forces special weapons project working in the atomic weapons with a clearance that would include anything, and if you don't want to believe it—I couldn't fill it out because my mind wouldn't let me concentrate enough to know where I was ten years ago. The war was going on!

STUBBE: You had pressing things right now.

LOWNDS: Right. So eventually they said, OK, we can talk about it. So I wrote a letter to the Marine Corps. I said, If you're going to do this kind of stuff, then teach it in the Basic School or the Senior course at Quantico—some place teach it, so a Commander, before he goes into combat knows. It's funny; the knowledge that you have to have is so secretive that the enemy has it before you do!

STUBBE: We had a battery on each side of the base that maybe could fire a high arc to support the other side.

LOWNDS: O, no, no. It would never have happened.

STUBBE: Would we have a B-52 strike on ourselves if indeed we got overrun?

LOWNDS: No, no. with the supporting fire we had, they couldn't have.

STUBBE: Did you have a BRAVO Command Post with the XO in case the Regiment took a direct hit?

LOWNDS: No, no. We'd all go together. Being in an area that small, there's no sense having—once they get inside an area that small, the only place it would be any good to have an alternate CP is if we were spread out so that if they hit this way. I guess as a matter of fact, I guess we did, because it would be good military thinking that we would have something like that and that it would be the 1/26 bunker.

LETTER FROM JOHN M. HARGESHEIMER, 11 August 1997

[Referring to Colonel Lownds' appearance at the Khe Sanh Veterans reunion 10-13 July 1997 at St. Louis, Mo,]

"I was impressed with Col Lownds. I've often wondered if he was ever going to attend a reunion and I was extremely pleased that he was at this one. I've always held him in high esteem since and during the siege. During the siege I was sent to deliver a message to Col. Lownds. I had to go to the concrete bunker that was his headquarters and was led through the maze to where he was. He was sitting in a chair and he looked exhausted. He didn't look up when I delivered the envelope but he did thank me. I immediately turned around and left but it left a lasting impression on me of the enormous responsibility that this one man had to carry and I was humbled. After that experience I prayed every night during the siege for Col. Lownds. If anyone needed God's help and strength it was Col Lownds during the siege."

FROM DIARY ENTRIES INCLUDED IN VARIOUS UNPUBLISHED MANUSCRIPTS ON KHE SANH:

EXCERPTS FROM: Stubbe, Ray William: *Khe Sanh Chaplain*, completed 01 Aril 1970, at Marine Corps Recruit Depot, Parris Island, SC

Monday, 21 August 1967

0900: Memorial service for Tallent. Conducted the service jointly with the Roman Catholic father. The altar was a small wooden table. We all assembled between the wings of the regimental mess hall, over 100 in attendance, including Captain Bohr, 1/Lt Hester, and Col Lownds. [p. 142]

Monday, 18 September 1967

It is nothing short of absolute misery in this rain! The basic problem seems to be how to stay dry. All the clothing gets wet and there's no way to dry it. I've got about three sets of utilities out on comm wire lines now; at least they're getting a good washing! It also gets too cold to take showers; the mud is ubiquitous, and my roof leaks! My clerk, Glen, and I, during a large rainfall, lifted up my old tent and put it on top, but it still leaks.

In the afternoon, went out on a projected three-day patrol to rescue a squad of 3rd recon who couldn't move due to immersion foot and immersion hand,. They are located at the old sites of Lang Kat (1) and (2), south of highway 9, south of the area of the bridge site previously manned by C/1/26. It was pouring, but Captain Greene, the Company "6," said we shouldn't wear our rain suit, but rather pack it for warmth at night. Went to the LSU to get a case of C-rats, and took out several meals. We started down the road and the rain ceased. We walked down the road leading past our dump, not the regular road used to take us into Khe Sanh ville. We got to Highway 9. The rivers were furiously rushing. A little further, we passed two goats; one was a baby. They stood right by the road, but didn't move when we approached. We passed a Brou village and continued about 1,000 meters when we received word to return to the combat base. The 45 minutes of clear weather had enabled the choppers to rescue the men, who also had been without chow for several days.

Colonel Lownds himself met us as we returned, arriving at the area just south of "C" Med, and explained why we had gone, but that how he was able to send the choppers there and took advantage of the situation, but how much he appreciated us having gone out there. [p. 271]

Sunday, 15 October 1967

Colonel Lownds mentioned he'd left the base for the first time recently and went to the fabulous "world of the Bai" (Meaning, Phu Bai). "There are things along the road, hard strips, on which you can walk without getting muddy! I walked in through a door, and there were sinks—and faucets. I'd forgotten what hot water was, and practically burned myself. I was afraid to take a shower for fear the loss of dirt would make me cold! They're trying to imitate us in Khe Sanh, however, with air conditioning, but can't make it quite as cold! Then there were flush toilets!" (After each phrase, appropriate laughter erupted from the officers and staff. This was during his remarks at the evening regimental meeting).

After the meeting, I mentioned to the Colonel that attendances were slightly lower because of all this rain. (He likes to be kept informed about my activities even though he's one command level above my own Commanding Officer). I mentioned I'd like to get into the bush with the troops—to get to know them better and to try to communicate to them that God loves and accepts them. He said he liked chaplains to do this. He indicated he will be getting a Roman Catholic chaplain who was formerly USN but got a bad fitness report and sued his Commanding Officer for defamation, so he was given a USNR commission. "I told the Division Chief of Staff, 'Thank you!" He continued that one of the most important things a chaplain could do is just to visit and show interest in the men. [pp. 317-318]

*

EXCERPTS FROM STUBBE: *KHE SANH*, UNPUBLISHED MANUSCRIPT, completed 05 June 1989

"Colonel Lownds didn't like the way our Vietnamese flew their helicopters. He was really pissed off about that. They flew sideways, and they come skimming across in the air. They wouldn't tell anybody they were coming or anything else because the first thing they did was throw all their comm gear out: they'd lighten their aircraft so they could do tricks with it." – [Comments of Billy Waugh to the author, 18Mar89.] [p. 185]

On 17 August 1967, Colonel Lownds permanently closed the Khe Sanh airstrip so that necessary repairs could be made. This action was to be significant later on for several reasons: not only was the airstrip itself strengthened for absolutely essential aircraft during the siege, it also afforded an opportunity to test means of supply delivery—LAPES (Low Altitude Parachute Extraction system) as well as air drops, which were to become so vital in early 1968. [p. 190]

Following the death of a recon Marine upon insertion into a zone, a memorial service was held the next day: The next day, 21 August 1967, at 0900H, a memorial service was conducted. the altar was a small, wooden table set within the U-shaped entrance of the regimental mess hall. There were over a hundred in attendance, including Capt Harper L. Bohr, Jr., 1/Lt Hester, and Col Lownds. At the time for the prayers, a floppy cloth bush hat was brought up and laid before the cross. One young Private who was standing in the formation wiped a tear from his eye. The sun was brightly shining. [p. 223]

On Saturday, 16 September 1967, all of 1/26 was issued rain gear—coat and trousers, and everyone was wearing them about the base, trying them out. But they were made of very flimsy plastic and soon burst open in the crotch and everywhere else. A few were able to obtain a special rain hat, which appeared like a monk's and was officially designated as "HAT, MANS, RAIN, COTTON, RUBBR COATED." Colonel Lownds wore his with the brim turned up on either side, like a cowboy hat. [p. 238]

On the death of Marion Lee Meggs: Colonel Lownds was furious that we now had two Marines drowned, both involving men who could not swim. [p. 243] *At the memorial service for Meggs* Colonel Lownds, LtCol Rann, Majs Bohr and Beall, were present along with so many men from the recon company that one remarked, "I haven't seen so many of B Company together at one time." [Author's Diary entry for 20Nov67] [p. 246]

On 15 January [1968], Major General Tompkins directed Colonel Lownds to:

A. Maintain constant aggressive patrolling on a 360° front;

B. Search to the west and south for suitable outpost locations;

C. Continue to improve outlying positions to ensure that they have sufficient tactical and protective wire and that the fields of fire are being constantly improved. Each position should have a full complement of weapons and a sufficient supply of Class I [Rations], III [Oil and lubricants], and V [ammunition] to withstand any attack;

D. As a master of urgency, improve, strengthen overhead fighting holes o include at least two layers of sand bags;

E. Prepare plans to receive reinforcements in increments of battalions;

F. Prepare counter-attack plans on basis of current forces and on basis of 1 – 3 additional battalions. [CG 3dMarDiv 150350Z/Jan68, Improvement of Combat Readiness, in 3dMarDiv Msgs Etc Jan68 Encl (31)] [p. 311]

When recon patrol NURSE made contact the night of 20/21 Jan 1968: As a result of this patrol's contact, Col Lownds made the tactical decision to hold Battalion 1/9 (when it later arrived) at the hill above the Rock Quarry instead of pushing them out to Hill 471 or 689 where he would rather have positioned them. The enemy was probably laying in wait for such a force. [Ltr of Maj Jerry E. Hudson, 25Jan69, in HQMC, HistDiv, Khe Sanh Monograph Comments file]. [p. 343]

On the day KSCB was attacked, Sunday, 21 January 1968: Col Lownds walked around the base to make a personal assessment of the damage even while the rounds were still cooking off. [CG III MAF 071000Z/Apr68 in III MAF SPECAT EXCLUSIVE file]. [p. 364]

The evening of 21 Jan 68: Colonel Lownds, INTRIGUE 6-ACTUAL, sent a message that from 1935H to 2035H, enemy soldiers were attesting to reconnoiter the wire of the south side of the combat base. During this period, the mortar fire on the combat base ceased. [3dMarDiv 211444Z/Jan68, Spot Rpt #202, in III MAF COC J&F 21/22Jan68 #280] [p. 367]

30Jan68: Colonel Lownds had just exited the regimental command bunker and was on the runway, bringing Gen Cushman and another General who were there to meet with him. The rocket landed about 12' away from Sgt Gidlof, wounding him in the arm, a little bit in the chest and the head, and a few others were slightly injured. Not so with 1/Lt Robert J. Mariz who had just checked in as one of the officers of the regiment's S-2 section. He had only been on Khe Sanh about 28 hours and only in Vietnam about 5 days, and was just in the process of checking-in. [Comments of Sgt David A. Gidhlof, Tape #2477] [p. 448]

Maximum use of Arc Light strikes was being made at Khe Sanh, and on 30 January, Col Lownds personally requested several specific targets be struck by Quick Run Strikes as soon as possible due to buildup of enemy forces during the previous 48 hours. [p. 451]

Months preceding the 21st of January, Colonel Lownds, Lieutenant Colonel Wilkinson, and their S-4s, had pleaded for material to build bunkers. The requests were denied: "..they seemed to get no priority because we were unable to get heavy lumber, any kind of heavy matting or, for a long time, even sand bags, until just before Khe Sanh was initially hit on the 21st of January." [Comments of Sgt Patrick J. Fitch, Tape #2498] [p. 473]

07Feb68, attack on Lang Vei: At 0150H, MajGen Rathvon McC Tompkins, Commanding General of 3d Marine Division, directed Col Lownds to employ COFRAM artillery against the enemy tanks at Lang Vei. [Comments of MajGen Tompkins, Tape #2535] [p. 511]

On 10 February, a message was sent from Col Lownds to 3d MarDiv summarizing all tank activity and sightings to that point, concluding: "Request whatever information available .. and our analysis of armor threat at Khe Sanh." [26MAR 101330Z/Feb68, Subj: Armor Threat at Khe Sanh, in 26MAR ComdC Feb68]./ [po. 525]

Concerning the refugees from the fall of Lang Vei (mainly Brou and survivors of the fall of BV-33 in Laos) that gathered outside the KSCB wires, and Col Lownds' refusal to let them on the base

"The decision to close the gates of this embattled fortress to the fleeing Vietnamese defenders of the fallen Lang Vei Special Forces camp was made by Khe Sanh's commander in sorrowful anguish and full awareness of the moral and ;political issues involved.

"I sat with Marine Col David E. Lownds in his combat command center through the dark hours between Wednesday and Thursday when that decision was made.

"No one in the crowded 20-by-20 foot banker .. was more aware than he of the conflict between human values and military necessity in which he was involved...

"'This,' said Lownds, a 47 year-old native of Holyoke, Mass., 'is a sticky one. There's no right answer. Here are these people whom we organized, trained, gave weapons to, and promised we would help defend themselves. They come to my gate and ask me to take them in. They have fought bravely on our side and have been overrun. They are hurt and beaten and they need help, and they've come here expecting to get it.

"'On the other hand, the fact is I don't know really who any of these people are. Even if most of them are Vietnamese and Montagnards who worked with our Special Forces people at Lang Vei, I know they are certainly infiltrated with VC. I can't let them in without also letting in several thousand civilians out there with whom I know even less about. Once they're in, I have to feed them, and I can't. I'm responsible for them. I can't be responsible for them on this base. I can't even spare men to watch them.

"'From a strictly military point of views, there's simply no problem. But the days of Teddy Roosevelt, when a military decision was that and nothing else, are long gone. This thing can come back to haunt me—all of us. If these people say when the chips were down, after getting us to fight for you, you wouldn't protect us, then the whole civil action business here goes down the drain.'" [Newbold Noyes, *The Washington Star*, in the Boston *Globe*, Thu, 22Feb68, pp. 32-33]. [p. 527]

08 Feb 68: In the midst of the bleakness of Khe Sanh at this time—the fall of Khe Sanh Village and the seat of government for the area, the fall of Lang Vei Special Forces Camp, the attacks on 861A and the 1/9 OP which were very costly but which nevertheless held, the problems of the thousands of refugees, the uncertainty of who would die next, tanks, the expected human-wave assault on the combat base by tens of thousands of frenzied foe, Col Lownds received the following message:

> For Colonel Lownds. For the past two weeks the eyes of the world have been on Khe Sanh, and particularly, the U.S. Marines tasked with the responsibility for its defense. The enemy has thus far been unable to claim even a small success despite continual attacks by fire on the combat base and ground attacks on outpost positions. This can only be attributed to the well organized defensive system, extreme alertness on the part of all units, extensive patrolling, and good intelligence. Though we mourn those who have gallantly given their lives in defense of this outpost of freedom, we who are directly involved, and the free world, know it has not been in vain. The main ground contest for Khe Sanh remains to be fought, and a continued effort of vigilance is still necessary. Your professional performance and the determination of every Marine, Soldier, Airman, and Seabee involved to win, are

the same denominators used wince 1775. Keep up the outstanding work. Well done! LtGen Cushman sends. [CG III MAF 080112Z/Feb68, in III MAF Outgoing SPECAT Exclusive File 04Feb-01Mar68 #5]

[p. 545]

11 Feb 1968: At 1145, one rocket impacted on a 106mm RR bunker (XD 848416) killing PVT Walter Michael Scott [26MAR 111105Z/Feb68, OPN SCOTLAND SITREP #411; 1/26 ComdC Feb68 S2/S3 Log 11Feb68 Ser # 15].. The regimental Adjutant reported two men killed and three other wounded, and 8 Recon reported three men wounded (and evacuated), all as a result of the heavy mortar and rocket attack at noon today [26MAR 111105Z/Feb68, OPN SCOTLAND SITREP #411]. Caught in the barrage of incoming was an Air Force C-130 aircraft, filled with passengers. Landing at 1130H, it was greeted with a barrage of incoming that lasted 20 minutes. The first round landed 15 feet from the plane, resulting I n the death of two passengers and serious wounds to the loadmaster. Among the passengers were all the company First Sergeants of 1/9 who were sent to obtain the payroll for the battalion. As a result of the hit, all five First Sergeants were medevaced. First Sgt Robert L. Turner, although evacuated to Delta Med at Dong Ha, died of his wounds.

Col Lownds raced to the scene and immediately took charge of rescue operations, placing himself in immediate proximity of the burning plane without benefit of protective clothing while exposed to flame, burning debris, and numerous explosions. He personally and diligently searched the wreckage for survivors. Locating one crew member, he pulled him from the wreckage in a vain attempt to save his life. Throughout the rescue efforts he continually exposed himself to the billowing flames directing operations and personally trying to extricate other crew members from the wreckage. [CG, III MAF 071000Z/Apr68, in III MAF SPECAT Exclusive file]. [p. 556]

12 Feb 1968. Col Lownds submitted the following estimated requirements for CAS (Close Air Support) of Khe Sanh:

1. Following considered minimum requirements for support of Khe Sanh Combat Base:
   A. Minimum of five flights fixed wing per hour on continuing basis.
   B. Minimum of four aircraft on strip alert.
   C. Minimum of six air observers on station. This HQ [3dMarDiv] will request four FAC aircraft from 7th AF representative Khe Sanh. Urgently require positioning of two USMC observation aircraft at Khe Sanh to provide immediate surveillance capability during periods of visibility

2 ... Current tank threat requires minimum of two flights of 5-inch ZUNI rockets be available throughout the day for immediate use.

3. Helicopter support has been adequate considering constraints imposed by weather and hostile fire. Minimum daily requirements fr resupply aircraft remain as follows:
   A. 4 CH-46
   B. 4 UH1E
   C. 2 UH-34
4. Recommend employment of additional TPQ-10 ASRT team for following reasons:
   A. MASS-3 ASRT team currently operating at maximum capability
   B. Priority targets continue to back up during period of heavy enemy activity.
   C. Rate of operation and personnel shortage does not allow sufficient time for adequate maintenance.
   D. Difficulties inherent with artillery resupply causes reliance on air ordnance above normal requirements.
   E. Sudden reliance on artillery alone would jeopardize defense of KSCB
   F. Air Force priority commitments outside of Khe Sanh AO preclude use of MSQ-77 (MILEY) as backup

[CG 3dMarDiv 130705Z/Feb68 to CG, III MAF, Air Support for Khe Sanh, in III MA Outgoing SPECAT Exclusive file 4Feb-1Mar68 #19].

23 Feb 1968: Colonel Lownds summarized the results of 5today's incioming barrage in a meswsage to MajGen Tompkins:

2. Runway cond fair with one large crater midfield 12' inboard from edge, 25 craters rockfilled, ramp—10 craters all field repaired. West taxiway to cargo ramp is closed. Runway was closed five times for short periods due to shrapnel. Lost two TAFDS fuel pumps due to enemy action. TACAN was down for a 30 min period. Both GCAs are operational. Tower has been moved underground due to receiving direct hits. Four fuel hoses for TAFDS destroyed, plus 1 bag punctured resulting in loss of 3000 gallons of AVGAS. All crash trucks are down for fighter repairs or in need of water. TRC-97 comm are operational but antennas and feed horn assys have extensive shrapnel damage. Due to both weather and high density of incoming only a limited amount of air traffic was received here at KSCB.

3. We have 1500 gallons of potable water on hand and 2000 gallons of non-potable. Pump is operational at a reduced rate. Equipment at this time there is no report of damaged tractors or forklifts, however, all tractors are down and three of seven forklifts are operational. No additional artillery pieces are down due to todays action. Received nine air drops today mostly Class I with some Class III. Drop zone is all cleared.

4. Supply Class I good shape. Class III, have no capability for bulk hoses, pump. No hand pumps available in LSU. However, some units have them. Class V. A fire broke out in ASP NR 3 where 1100 rds of 90mm, 560 rds of 106mm beehive and some 57mm recoilless rifle ammo. All the 90mm, 57mm and 500 rds of beehive 106mm were destroyed.

5. Aviation ordnance is in good shape. ASRT and DASC both in good working condition.

6. Air Force representative of Khe Sanh has indicated unless fires are suppressed the Air Force will n ot fly in any aircraft. We are using all assets available to suppress these fires. They have been requested by me to send Third MARDIV a message on this subject.

7. There has been an increased interest in Hill 950 all day. They have received mortar rounds, and there are indications of a buildup north of that position. I am keeping a close watch on it.

8. Only resupply to the hills conducted today was 1600 lbs of concertina to Hill 881. Hill 950 has 5 gallons of water remaining. Patrol sent out for water resupply encountered enemy and was turned back. [CG 3MarDiv 240808Z/Feb68, III MAF SPECAT Exclusive #21; 26MAR 231330Z/Feb68 in 26MAR ComdC Feb68].

[p. 594]

24 Feb 1968. A considerable number of casualties at C Med early this morning were waiting to be evacuated as soon as the fog lifted. Col Lownds was there, visiting the wounded. Col Lownds is a sensitive person, deeply concerned for the welfare of the Marines here. He is very unassuming, hardly distinguishable in a group, except for his well-developed moustache waxed into two points. He is frequently seen touring the lines, and is 47 (born 4 October 1920 in Holyoke MA). He served in WW II where he was wounded during the Marine landing on Saipan and again at Iwo Jima; he served in Korea and in the 1965 Dominican Republic Crisis. He has seven children at home and over 5,000 youngsters here at Khe Sanh. [Biographical data from New York *Times*, 12Feb68, p. 4] [p. 605]

25 Feb 1968: Col Lownds requested additional manning, so he could get out and destroy the approaching enemy forces:

> Over the past week we saw the enemy dig trenches, build fortifications and close to within 100 meters of the perimeter. I have utilized all of my assets in an endeavor to stop this closing in of the enemy. However a point has been reached where the only method I can see to stop the digging, fortifying and prevent the enemy from getting closer vantage points to KSCB is to go out and close with the enemy from these areas to spoil his attacking posture. However all of my battalions are committed to the [defense] of KSCB and are not available for either a spoiling or counterattack. In view of the above, it is requested that additional troops be provided to conduct spoiling/counterattack on the enemy and drive him away from the Khe Sanh Combat Base. [26MAR 251229Z/Feb68 to CG, 3dMarDiv, Reinforcement for Khe Sanh Combat Bse, in III MAF SPECAT EXCLUSIVE file #31]. [p. 633]

27 Feb 1968. The following message was received from MACV:

> P270938Z/Feb68
> FM: COMUSMACV
> TO: 26th MARINES
> INFO: COMUSMACV FWD, III M AF, 3D MAR DIV
> 1. YOU, YOUR MARINES, AND THE ASSOCIATED US ARMY AND VIETNAMESE TROOPS ARE AT THE CENTER OF THE INTERNATIONAL STAGE. YOU ARE FACED WITH A MILITARY CHALLENGE UNPRECEDENTED IN THIS WAR. I WANT YOU AND YOUR TROOPOS TO KNOW THAT I H AVE THE UTMOST CONFIDENCE IN YHOUR FIGHTING SPIRIT, PROFESSIONALISM, AND ALERTNESS. THESE ESSENTIAL QUALITIES, PLUS THE INDOMINABLE COURAGE OF THE US MARINES, ARE DESTINED TO PREVAIL OVER THE ENEMY. THE ENEMY WILL TRY EVERY TRICK IN THE BOOK BUT YOU WILL DEFEAT HIM AT EVERY TURN. BE ASSURED THAT THE CHAIN OF COMMAND IS WATCHING YOUR SITUATION HOUR-BY-HOUR AND PROVIDING YOU FIRE POWER NEVER BEFORE EQUALLED ON ANY BATTLEFIELD.
> 2. MY PERSONAL COMPLIMENTS AND BEST WISHES TO YOU.
> BT

[Copy of this message in 3dMarDiv Msgs Etc Fe b68 Encl (67)]. [p. 639]

26-29 Feb 1968

During 26-29 February, 14 U.S. Air Force C-130s landed on the KSCB.[659] In a personal message to Col Lownds, LtGen Robert E. Cushman, Jr., detailed the effort as the greatest air support in recorded military history.

> 1. I thought you might like to know that the support provided Khe Sanh by FMAW, 7th AF, and 7th Fleet has been greater than any other air support effort in history of warfare. From 22 Jan to 29 Feb, aircraft committed to Operation Niagara delivered 53,380 tons of ordnance, 2,500 secondary explosions and nearly 1,000 secondary fires were caused, 1,000 structures/bunkers were destroyed or damaged, and in excess of 100 trucks were destroyed. These statistics are attributed to only one-half of the 13,298 sorties flown, ordnance dropped by remaining sorties was under radar control due to weather, and the damage caused was not directly assessed.
> 2. This unprecedented support from the sky, combined with your masterful employment of ground weapons and units has caused the enemy to suffer heavy losses. You and your officers and men are making a great contribution – keep up the outstanding work. Warm regards to all. LtGen Cushman sends.[660]

[p. 645].

11 April 1968

Ensign Kux[661] wrote in his diary tonight[662]

> Col Lownds called me to his bunker tonite: (1) He's been relieved by Col Meyers. (2) The Army has vacated the blue sector and to provide security for our area, I assigned 6 men—starting tonite—to stand perimeter watch in front of our area. This was quite a shock—to realize that Army has left us open to Charlie (without even telling us so!) (3) This is the item that has me keyed up so much. Col Lownds asked how long it would take to completely tear up the airfield and load the panels on trucks for convoy out. He also wants a summary of all our equipment for airlift or road convoy. All this is to happen in two weeks—if word doesn't change again?

[p. 747]

AWARDS

On 23 May 1968, Col David E/. Lownds and SgtMaj Agrippa Waren Smith[663] received the Presidential Unit Citation from President Johnson on behalf of all who fought at Khe Sanh during the siege.

The 26th Marines also received (as a unit) the Vietnamese Cross of Gallantry with Palm at a ceremony on 05 March 1970 as they prepared to depart Vietnam.[664] They also received the award twice previously—since both Third Marine Division and also III MAF also received the award. Rather than have the Marines wear a fourragere—which is worn if one's unit receives more than one of these awards—it was decided (by whom?) to accept only the award given to III MAF. Since the aware to the 26th Marines came after the acceptance of the III MAF award (was bestowed 27 July), this award was never "received." Again, the "rear" deemphasized the courageous Grunt, disallowing us this special distinction—the wearing of a fourragiere

There was a special award to those who were at Khe Sanh during the Siege: everyone became eligible for the individual award of the Combat Action Ribbon. The official notice indicated:

The SECNAV has established the Combat Action Ribbon .. which is intended to provide recognition of personnel .. who have actively participated and satisfactorily performed in combat action as a direct confrontation with the enemy ground or surface forces ... This aware is personal in concept, intended to be restrictive and, therefore, should be awarded only in case of participation and satisfactory performance in combat and not as a campaign ribbon ... All personnel within an advanced combat base, e.g., Khe Sanh or Camp Carroll are eligible in event a heavy attack occurs which threatens the entire base..[665]

NAVY CROSS file on Colonel Lownds:

SPECAT EXCLUSIVE FOR LTGEN KRULAK FROM LTGEN CUSHMAN INFO MGEN TOMPKINS
1. I find it difficult to improve upon lucid accounts contained in Ref A. As Tommy says the situation was at the center of a scene watched by the world and every person has a feel for what went on during the most crucial days at KSCB. I have, however, made some independent inquiries in an attempt to isolate a few specific examples of Col Lownds heroic actions.
2. A specific example of his personal courage and dedication to duty occurred during the early morning hours of 21 January when the KSCB was subjected to an intense enemy rocket and mortar barrage. As the result of the firing the primary ammunition dump was hit almost immediately starting to burn and explode culminating in a tremendous explosion in mid-morning which scattered a large number of mortar rounds, artillery rounds and deadly explosive devices throughout the eastern end of the base. After the initial explosions Colonel Lownds amid continual enemy mortar and rocket fire toured the entire area of the still burning and exploding ammunition dump in order to make an immediate assessment of the damage to his positions and to calm his troops in their positions. He fearlessly and courageously walked over terrain, heavily littered with various explosive ordnance items, many of which were still exploding from heat generated by the burning dump. His dedication to duty in the face of grave danger to himself was of the highest order. Never faltering from this duty he was able to give accurate assessments of damages taking remedial action where required.
2. As another example of his cool courageous leadership and immediate response I am reminded of the Air Force C-130 aircraft which on 12 February crashed on the strip and was immediately engulfed in flames. Colonel Lownds raced to the scene of the accident and immediately took charge of rescue operations. To do so he placed himself in immediate proximity to the burning place without benefit of protective clothing while exposed to flame, burning debris and numerous explosions caused by the fire. He personally and deliberately searched the wreckage for survivors. Locating one crew member he pulled him from the wreckage in a vain attempt to save his life. Throughout the rescue efforts he continually exposed himself to the billowing flames directing operations and personally trying to extricate other crew members from the wreckage.
4. Still another specific example of his courage and indomitable spirit occurred on 23 February when KSCB was subjected to the heaviest mortar, rocket, and artillery barrage encountered. More than 1300 rounds were fired in an effort by the enemy to make the Combat Base untenable. Throughout this critical period, Colonel Lownds provided firm, decisive and highly professional leadership at all times demonstrating supreme coolness and calm despite constant landing of large caliber enemy rocket and artillery rounds on and in proximity to his CP bunker. Throughout this tremendous barrage Colonel Lownds coordinated accurate and timely counter fire using the complete spectrum of fire support available to him. His actions throughout undoubtedly saved many lives and significantly reduced the number of casualties suffered during the barrage.
5. Colonel Lownds' caliber of leadership which he has demonstrated throughout has been a constant source of inspiration to all who were there with him. Each man and officer there could look to him as the bulwark of the KSCB area of operations, continually providing dynamic leadership, exhibiting keen judgment and foresight in reaching the many decisions he had to make during each 24-hour period.

FOR ADDITIONAL DOCUMENTATION OF COLONEL LOWNDS AT KHE SANH DURING THE 1968 SIEGE BATTLE the following are relevant:

- Debrief of Col Lownds, Tape #3139, interview at FMFPAC HQ, 29 July 1968
- Testimony, in *Hearings* before the Electronic Battlefield Subcommittee of the Preparedness Investigating Subcommittee of the Committee on Armed Services, United States Senate, 91st Congress, 2nd Session, November 18, 19, and 24, 1970, *Investigation into Electronic Battlefield Program*, pp. 86–95.

MISCELLANEOUS LETTERS, PRESENTATIONS, DOCUMENTS, cont.

NOTE ON MEMORIAL SERVICES CONDUCTED WHILE IN VIETNAM

RECON MEMORIAL SERVICE, Saturday, 20 April 1968

[*Stubbe*, Khe Sanh Chaplain, *unpublished manuscript, 01 Apr 1970, pp. 866-869, and Stubbe*: Khe Sanh, *unpublished manuscript, 07 Oct 1971, pp. 1313-1317*]

It rained during the late morning and it was very windy. It was to be the day of our arge recon memorial service. I tried to think of how the bush hats could be kept on the altar without blowing away and came up with the idea of putting some rope or comm wire around the top of the altar and putting the bush hats underneath.

There was a very large formation—about 250 men. They formed a large "U" in front of the altar. Eighteen men with helmets stood directly in front of the altar; Father (Bernie) Filmyer and I stood on the other wide of the altar. To one side of the altar was the American flag and to the other side were the church flag and the church pennant (they really wanted everything!) The Company Gunny stood in front of the church flag and pennant. the "B" Co. Gunny, Gunny Wells, read off the names, one by one. As he read a name, one of the eighteen Marines advanced, came to port arms, and cleared his weapon. The company "top" then took the weapon with his right hand sharply grasping the top, and twisting it, pointing it downwards, and thrust it into the ground, harshly. The man then, slowly and sadly—reverently—placed his helmet that he was wearing on top of the inverted rifle, stepped back, put on a soft cover he had in his utility trouser pocket, and walked away. This was done for all eighteen. It all took a lot of time, and the tragedy of it all seemed to sink in deeper and deeper as each new rifle was plunged into the earth. After this was done, the rifles and helmets still in place, the formation was dismissed and re-formed as a close group about the altar in a more informal manner. The trumpeter that I had arranged for at Division Band played Church Call, and the Father and I conducted the religious portion. Then came three volleys of fire from the firing squad and Taps by the bugler. The service was conducted for all those killed from the time I arrived at Khe Sanh, including Tallent and Meggs.

I wrote the parents of each of these eighteen with a two-page, single-spaced letter, and received some replies. The following is an answer to one of these replies:

Dear Mrs.—

Thank you for your letter of the 12th. It is indeed with great difficulty that one can ever justify the loss of a person, even when that loss is occasioned by sacrifice to a greater cause. Death and loss of people is indeed meaningless and inexplicable; it is the enemy of man, but conquered through our Lord Jesus Chris's resurrection.

Aside from all religious or political aspects of the war, one might say that value in life and a sense of meaning is only obtained through sacrifice and devotion to something or someone outside of oneself. In your case, this was to your son. But in his case, it was undoubtedly to service. This might have been an inner compulsion he felt to prove himself, as so many young men feel as part of growing up. I know your son was somewhat firm and when his mind was made up, that was the way it was going to be. ... Perhaps one of the reasons he was here was that he had just made up his mind to be heere, and nothing or nobody would shake him away from that.

He was medevaced to one of the hospital ships in November due to malaria, but returned to B Co. in December. He was part of a reconnaissance team called 'Dock Leaf' that experienced many close calls. In one week they were extracted from their reconnaissance zone of operations in an emergency situation, four times. Sometimes they were surrounded and could hear noises. After awhile some became quite jumpy and shaky. I believe your son was a little high strung and perhaps full of some degree of anxiety, as was the whole team.

This might have been the occasion of his request for baptism. Although my denomination usually requires a period of instruction prior to adult baptism, being in a combat zone in which people might at any time be killed, has caused me to baptize anyone who desires to be baptized. I do, of course, briefly explain the meaning of baptism, but I have always felt that baptism is what God is doing, not what men are doing, and as one of the early church councils declared, its efficacy is not affected by the baptizer or the person being baptized...

Mrs... I wish there were more I could write. I always visited the Reconnaissance area, and developed many passing friends there. They were always so friendly to me and seemed to appreciate my coming into their living areas and just listening to them and talking with them. Your son was one of those who always had a smile when I came around. I really didn't come to know him deeply, but I'[m sure he was living a life the way he felt he must. He had determination, courage, and conviction. He was friendly and kind. He suffered the same fears and temptations we all do. He was deeply appreciated as a friend by those close to and around him. In the end, it really isn't the quantity of life we live, but how we live the brief span of years we have. If he felt his life to be meaningful because of what he was doing, and if this gave him satisfaction, then at least we must be thankful for that.

Please be assured I remember all those men daily in my prayers. I was especially dismayed in that I had taken a picture of the baptism of your son, but my camera was stolen when I laid it down in order to help carry off some dead bodies to

graves registration. I would have treasured those photographs so much as I have no photograph of your son. But he does live in my memory and in the memories of those who were close to him...

Please be assured I will remember you personally in my prayers, that our Lord will comfort you in your grief. Faithfully yours...

COMMENTS IN MEMORIAL SERVICE BULLETIN FOR BRAVO COMPANY, THIRD RECONNAISSANCE BATTALION, Saturday, 20 April 1968, by Ray W. Stubbe, printed in worship bulletin:

> We remember today those who gave their lives while engaged in a life in maintaining Khe Sanh Combat Base. How they died is not as significant perhaps as how they lived. Personal sacrifice is indeed great when one voluntarily lays down his life to serve his brother in one glorious moment, but greater still is the daily sacrifice of living a life in service to others, a continual laying down of one's life, for it is not life itself that is significant, but how one lives. These men were called from us while performing their duties and engaged in the life of our community at Khe Sanh.
>
> That day-to-day life, concentrated in serving others, involved a daily encounter with all the anxieties and fears struck into our hearts by the enemy, whether on patrol or on the base during "incoming." With firmness and faith, dedication to daily duty, and personal perseverance, we all held fast, refusing to weaken.
>
> Khe Sanh represents the triumph of all the armed services contributing in concert the greatest they could– perhaps the greatest expenditure of B-52 strike bombs; vast numbers of soldiers. But the greatest single factor was the resolve of courage by our U.S. Marines and corpsmen, living under continual threat of attack, through the screeching rockets, with shocking and fear-inspiring cracks, splats, and whomps of artillery and mortars, day after day after day. We held firm; the base is still ours.
>
> These men lived such a life of firmness and resolve despite unnerving adversity. The determination of their lives is the factor determining the triumph of freedom over forces of intimidation, the battle we now fight.
>
> Our Lord, as the Good Shepherd, laid down His life for us that we might have a more abundant life. He has said that we live as branches in His vine, living by participating in His same life of self-giving love. It was in this context He said, "Greater love has no man than that a man lay down his life for his friend." The promise of such a life of service: "Where I am, there shall my servant be also." Such love never ends: "Having loved his own who were in the world, He loved them to the end," and then washes His disciples' feet. "God so loved the world that He gave.." That is the life these men lived; that is their accomplishment; that is their hope; that is their significance; that is their salvation.

> –Chaplain Stubbe

ADDITIONS

My lingering memory of that recon memorial service is the sadness I felt watching so many march off at the end of the ceremony, back to their area.

The formation: It must have been the first time the entire Bravo Company plus others from the recon battalion, gathered together. When Bravo Recon Company moved from Khe Sanh to Quang Tri Combat Base (which was just being built up), it was the first time that all the companies of the recon battalion were together, including a new, fifth company, ECHO Company, commanded by the former CO of A/1/26, Capt John Raymond. The Marines of Bravo Company had the adjacent 3d Shore Battalion and the Engineer Battalion dig a long slit trench, the only company of the Recon Battalion to do so. Those from Khe Sanh KNEW to dig!

FOR 1/26 CONDUCTED AT WUNDER BEACH, VIETNAM, 06 May 1968

[*From Stubbe,* Khe Sanh, *unpublished manuscript, 01 April 1970, pp. 885-888; and* Khe Sanh, *unpublished manuscript, 07 Oct 1971, pp. 1332-1335*]

I received a phone call from LT COLE of the 1/26 rear that a vehicle would pick me up to take me to Wunder Beach (used to be called Utah Beach) for the 1/26 memorial service this afternoon.

We rode down on a 6-by with three reporters (with long hair), civilian type and the Division memorial service bugler, LCPL RICHARDSON. The ride was described by one of the reporters as being the worst he has ever been on as far as dusty. We rode behind on Otter most of the way which kept us in a dense cloud of dust of the powdery type. One man sat next to me, closest to the front slowly had his scalp of hair changed to a brown, dusted appearance, and everyone had a face caked with

the powder, like make-up. I fortunately was wearing the wind goggles I had picked up from the Shore Party supply. It seemed to be no good to be able to keep the eyes open despite all the dust. It was as though we were all being "baptized under the cloud." Along the way, small children demanded "chop chop." "Hey, you—you, you, gimme chop chop!" (How different from the Brou Montagnard children cho used to cheer, jump, shout, and wave to us at Khe Sanh). The Montagnards aren't so sophisticated that they have become corrupt as yet. The new uniform I had put on last night and wore all last night due to the readiness condition of security, was now all dust and dirt.

Wunder Beach, a logistic area, is simply a series of bunkers, like a whole bunker city, mainly Army. Off the Beach was a Navy supply ship. All the 1/26 personnel are, of course, most glad to be here. The S-1 personnel are in a large tent rather than the cramped, hot, humid bunker they had occupied in Khe Sanh in which it was necessary to do contorted movements in order to move from one place to another. I mentioned to one man that it must be good to be in a relaxed atmosphere and relax a bit but he replied that they can't relax. He was referring to the paperwork. But I was referring to the battle situation. Perhaps he was new; perhaps he forgot all too soon how bad things once were. Work and needs of the moment suspended any feelings.

I received quite a few friendly greetings from many of the men. Sgt. Meeker was there. He said the hymnals were saved, but the pulpit that recon had made had been blown away. It was with a sense of relief that I saw him and the others; I knew they were relatively safe, or at least, they had made it through that horrible situation and had been spared. Not so the others we were to remember today. The effects, however, were still among the living. Sgt. Meeker mentioned that Capt. Pipes, the Bravo Co. Commander, had almost reached the stage of breaking up. He was a most conscientious person. (He later received the Silver Star for his bravery.) I recall how anxious he was when several of the Bravo Marines were killed or hit while receiving rounds in the trench. And that was before the two times Bravo patrols were hit so hard.

The chapel is a blown-out concrete structure,. The walls still stand, but the roof is gone. At the entrance is a bell tower with the bell. (We finally got it back to its consecrated use),. There is a sign that announced RC mass and Prot. Bible study. Lt Fitzgerald read off all the names. I discovered that Stanley Strong and Terrell from ":A" Co. were both killed on the plane crash at Khe Sanh. Two of the three men killed at the 106 bunker where I had remained the night before were CHISHOLM and LCPL MCKEEVER. (The latter was, I think, the one that was playing "I Heard it on the Grapevine"). 1/Lt Ben Long read the Epistle from Thessalonians, and enlisted representatives from the four letter companies read various parts of the liturgy. Chaplain Kelly gave the prayer and a sort homily, free-style, in which he emphasized that the real saints are those who enter the situations in which they sacrifice all, giving to others, sharing with others, giving of themselves, neglecting all their comforts, etc.

The men wore flak jackets and helmets. The altar had a haversack and E-tool.

I read the message I had prepared and mimeographed on the back of the recon memorial service of the 20th of April.

LtCol McEwan, the new 1/26 CO, gave a very brief comment at the very beginning of the service, and then explained he had to be off at a regimental meeting for tactical purposes. His remarks were read by the battalion XO, Major McCartney at te proper time during the memorial service:

> ..In this service, we have honored not only those who have died at Khe Sanh, but all those who were there. We have fulfilled our promise to the families of our Marines killed in action. Equally important for you men of this battalion is the fact you will always remember the Battle of Khe Sanh. You will live with it for the rest of your lives and in so doing, you will always remember those who gave their lives.
>
> To each of you men who were there, I have this to say. For three months, the eyes of the world looked at you and the enemy, who was unable to claim success. At another outpost and milestone in Vietnam's history, this same enemy claimed success at the battle of Dien Bien Phu and with it fell half of Vietnam. Had Khe Sanh fallen there would have been far reaching effects. But Khe Sanh held. You held Khe Sanh living in the trenches, constantly subjected to heavy bombardment by mortars, rockets, artillery, recoilless rifle and sniper fire. You held because of your fighting spirit and indomitable courage. May God bless you and return you safely home.[666]

There was an attendance of about 60. I was somewhat surprised that there was no formation as such, and only 60 out of the whole battalion. The photographers took pictures of me while reading the address; one later taped an interview for radio broadcast.

LETTER TO CDR HERBERT BERGSMA, CHC, USN, Sunday, 27 August 1978

[Chaplain Bergsma was writing the volume that focused on U.S. Navy Chaplains who served Marine Corps units in Vietnbam for the Marine Corps Historical series on the Vietnam War]

---

[666] Printed in the *Khe Sanh Veteran*, 2:1 (Fall, 1995), p. 8.

Dear Chaplain Bergsma:

I am enclosing a few other items which I located since your visit some of which may be of interest to you. There are some copies of award citations from the microfilms in the library. I have indicated what reel they were from, e.g., "HD66." You may want to exercise some caution in these, however. For example, ... Furthermore, he organized a lay leader program and did not himself visit his battalion's positions although they were all ensconced in a very small area. I cannot vouch for the others.

I am also enclosing a brief piece entitled "The Author"[667] since you asked how I became interested in "recon" organizations. It is self-explanatory.

I located a brief piece on the "Chaplains Service Corps," and a roster of 3rd MarDiv chaplains of May68. The chapel in painting on the 17 Dec 1969 issue of *Family* looks just like the chapel which was at Ai Tu (or Quang Tri Combat Base).

The articles on Con Thien, Saigon City Map, packet of propaganda leaflets picked up around Quang Tri Combat Base I April, 1968, miscellaneous issues of *Sea Tiger*, and the *Navy Times* article on Rabbi Frankel, are all other items I am forwarding.

All items forwarded in this letter you may retain or dispose of as you see fit. The items which you took for use I would eventually like to have returned, unless you hear that I have died before then. A review of past biopsies of my kidney tissue by the histopathologuist now indicates that the favorable diagnosis which I received last year was erroneous, that I still do have glomerulonephritis, and I anticipate hospitalization in the near future.

There is one item I wanted to discuss with you, but forgot—what Vietnam did to chaplains. I am not the only one, but there are many of us even after ten years, who still have the lingering effects of a grief reaction, of which the powers that be in the chaplains division are totally insensitive. Some of this is reflected in "The Author" piece which is enclosed. But it goes much deeper; I still cannot forget many of my friends who died there.

A second effect on me personally has been the conscious obsessive-compulsive behavior of always putting everything in order since I "just know" that each day is going to be my last. Perhaps that is my heritage from Khe Sanh, where I used to visit and remain over night at places like Lang Vei or the CAC outposts or Khe Sanh village CAC or the hills like 950, all of which were overrun just prior to my arrival there, and I always kept a compass, extra C-rations, pencil flares, etc., because I just knew we'd be overrun and I might be the only survivor.

A third effect has been an irreconcilable ambivalence towards the Marine Corps generally. I deeply love and have very deep feelings towards the individual Marines, especially the lower ranking Ems—they shared their life with each other and with me. That's on the one hand. But the other hand are the policies by the USMC which made life so very awful for them, even killed them on numerous occasions. When that comm bunker collapsed on a Sunday because it was being built out of locally-obtained timbers vice appropriate bunker materials which were available at the time and place, used by Seabees to build the FOB portion of the Khe Sanh Combat Base—and two men were killed after shrieking in excruciating pain from crushed chests, I have always and with deep disgust and revulsion hated the fiscal austerity policies of the Marine Corps for killing my friends. There were also young officers like Jacques who led part of B/1/26 and 2 platoons were wiped out during the siege—because he wouldn't call on supporting fire, report enemy trenches encountered, etc. But it was all part of a pattern what was so manifest elsewhere—that Quantico had inculcated in these young men to earn their medals and assault positions—all at the expense of their men,. It happened numerous times, such as also with Meggs, as I chronicles in my long MSS. What this did to me was made me want to be with those who suffered—the Marines, but deeply detest their milieu. What do you write a young man who was called "Preacher" because he planned to enter the ministry, who was always of the highest moral standards, of B Co., 3rd Recon Bn, at Khe Sanh, who extended 3 times, and who finally sent me a taped message dated 1 July 1969, in which he stated that he now enjoyed killing the enemy because they had killed his friends, that he could no longer read his Bible or plan on church work since he felt his feelings and actions to be irreconcilable with being a Christian. I have it in exact quotation "This environment is anything but conducive to being a good Christian which you know,. I just can't—you know—pray and read the Bible and then go out on patrols as I do, because to me it's just being—I don't know—a sacrilegious or hypocritical or what, I can't do it. Because to me I'm making a mockery of something I like very much; I really do ... I just can't, you know, read the Bible and then turn around like this last patrol—I just got in the day before yesterday—we were at Mutter's Ridge, and we got about 7500 meters outside our LZ and it took a company of Grunts, six air strikes and about, Oh, five hours to get us out. We did a job on 'em, but I mean, I just can't go from something like this to come in, and then read—you know—that I should, you know I should love people and this, because I' ve seen too many guys get zomped over there, and I hate 'em; I really do."

On 23 December 1969, while getting out of my automobile, having just parked it and facing the "A" Company building at Parris Island, the 1084 series was returning from their morning PT and chanting as they ran:

---

[667] "The Author" appears in Stubbe, *Pebbles* [Vol. 1], 2011, pp. 27-30.

DI: BLOOD EN GUTS

DI: WOMEN!
MEN: WOMEN!
DI: CHILDREN!
MEN: CHILDREN!
DI: KILL!
MEN: KILL!
DI: GRRRH!
MEN: GRRRH!

A fourth effect is hardness of Marines. You live with those who go through long, excruciating patrols, eight hours up and down hills in hot, humid jungles, whipped by branches, tripping over vines, getting leeches on arms, legs, day after day, week after week, no showers in over 6 weeks (the company commander hands you a box of soap saying "Give this to the missionaries; we have no use of this here.")—then returning to their rat-infested and wet bunkers to stand watch, dig more trenches in the hard clay dirt, no hot food no electricity or candles and therefore no light after sunset to write letters or read them. Then you go to Parris Island and recruits are treated harshly and painfully—for their own good—for their survival—they'll die or crack up in battle, they and others too; it's a life-and-death matter. A mother calls and complains her son is in a place where he has to do exercise all day long, and you reply, "O, how good, now he'll become strong and be able to take care of himself.": And she pauses and then says, "Well, I'm gonna lie to the Red Cross and get him out of that place!" You can sympathesize with her feelings, her anguish. Reality is painful; life is death and is tragic. You condone the harshness even if it erodes and bruises the spirit of the man; you have seen where harshness prepares him so he'll return from the battle alive. Yet it does work against your humanizing concerns. You did also.

Another problem of Vietnam with chaplains was identification. You begin to get very close to your men; you are one of them; you feel their hurt, share their sorrows, comfort their spirits. To get close to them you "put off" special privilege and "humble yourself" in a truly kenotic manner (Phil 2.5-11) because you are participating in the life of Christ who did the same thing. But then you find yourself becoming "too much identified," accommodating to the world, seeing reality as they do.

Well, I write only my own heart. I returned from Vietnam with no more tears to shed, but still crying deeply inside my soul. I returned without a Purple Heart despite the ravages of Khe Sanh (and I didn't remain in any bunker or trench, but was always circulating around)—("Thou shalt not be afraid for the terror by night nor for the arrow that flieth at day; a thousand shall fall at thy side, ten thousand at thy right hand, but.."). Yes, I returned without a scratch, but I had died there. I returned with an eternally lasting respect for Marines and a deep love and desire to be with them, but was always revolted at their milieu and sitz-im-Leben. I have been shaken by participating in dehumanization in order that men might live! I have been grossly misunderstood by other chaplains who felt I liked being with Marines—the military aspects, that is—and who even called me a "Marine!" I felt like vomiting.

Of course, I don't feel the Chaplain Corps is really pastoral to its fellow chaplains anyway. After all, I submitted last year materials simply to help others. They were laughed at. But I learned out of that how people laughed at Christ because love, actions of love—in this case attempting to help others without expecting anything in return—they could all have been anonymous—was laughed at. Love is always regarded as being something stupid and foolish. What I learned out of all this is, I think, how God must feel at times!

Well, I didn't mean to digress so much, but simply to indicate some areas of the lasting effects of Vietnam on chaplains, not just me.

And, I'm really not bitter, although as I look over what I've written it may appear that way. If anything, I feel disappointed that for so many years the Chaplains Division kept ordering me to duty where I couldn't be part of a team ministry and where I had to serve alone, because I deeply need other chaplains. And I feel disappointed that I was continually ordered to Marine units when there were Captain chaplains who had never served with Marines, and the hurt became deeper and deeper since every time I saw Marines, I was confronted with death—even visually seeing dead Marines as I looked at Marines I was then

serving—and I had to go to my office or staterooms ad just have a big cry. And I feel disappointed that for so long I was denied the opportunity for serving in a parish situation with children and families or in a hospital situation.

What keeps me from becoming bitter is my deeper love of Christ and His love of me, His acceptance of me when the Chaplain Corps continually casts me off. The reason that really doesn't bother me is that I don't seek the favor of men, only God, and I know that I have served the Gospel and His Kingdom well.

It is really Christ living within me. I do not complain of my sufferings, but regard them as participating in the wounds of Christ. If my close identification with Marines caused me to be called a "Marine" by other chaplains, well, they did the same thing to Jesus when he associated with sinners and tax-collectors. If they think I go off into places on my own and not part of a team to lonely outposts in Khe Sanh or the peaks of Marble Mt. in DaNang, it's because no other chaplains went there, and well, Jesus did the same thing by not remaining in the temple, but going where the common people were. Of course all that was ten years ago—but the rejection apparently still is here. I have the awareness that it is not a rejection of me, but of Christ living in me, who has motivated me to love, forgive, proclaim his concern. If I jump out of airplanes in the past (but have not done so in over three years and do not plan to do so again) it was only to minister to SEALs, USMC force recon, ANGLICO, air delivery, etc. -people who never see a chaplain for fear of revealing that they went to see a chaplain, but who are people in need of Christ, and to paraphrase Paul, "I because all things to all men in order to win some to Christ." Perhaps none of these things were seen as being "proper role" of a chaplain. But my suffering is the suffering of Christ. "He who receives you receives me; he who rejects you rejects me." There is perhaps nothing more evident in the Bible than that the people of God suffer—it's a sign of being a disciple, as Jesus repeatedly told His disciples. So there is actually a joy in the suffering—it indicates to me my election and participation I Christ.

It's odd how other chaplains could feel me to be a "Marine" or that I enjoyed parachuting or going off by myself in dangerous places, or that I was not a "team man"—all absolute lies (and of course, the Devil himself is the author of all lies)

Since I may have only a very short time left to live here on earth—that's what the doctors now tell me—I see things in their proper perspective—as Heidegger voluminously wrote about in *Sein und Zeit*. The words of the psalmist ring true, "It is better to trust in the Lord than to put confidence in princes." [Ps 118.9] or that of Jeremiah, "Cursed be every man that trusteth in man." [Jer 17.5]. People may disappoint us and let us down. I still love them; I pray for our Corps—I would only strongly wish that those in high places could, at least for a short time, again experience the joy, the thrill, the life that comes, from being with the common, ordinary, enlistedman in honest confrontation in sharing in his life as on a ship (say and night), or in bunkers and foxholes. As Jesus said, "My food is to do the will of Him who sent me," [John 4.34] or I John, "We know we have passed out of death into life because we love the brethren." [1 John 3.14]. So many of our Captain chaplains have been abstracted away from reality for so long—from ministry to the common man that Jesus was with—and who is with—that they no longer know anything anymore. That is tragic. So I am neither bitter nor angry. If anything I have a hope that they too may know love.

I am only, and have always only been in all my activities, a pastor—someone intensely concerned, sensitive to, and loving his people, doing things that will never get me any credit, being in relationships to people where they may even forget me but through which they grow. It's not me that's doing it; it is the Lord living in my and through me to others.

It is for these reasons that I did not become bitter or depressed when passed over; it is for these reasons that I continue to give totally in ministry here at Great lakes—having three worship services a Sunday, seeing up to 23 men a day in counseling or a type that is very draining, supervising and nurturing two other chaplains assigned me me—and will continue to give my all in ministry until I die or am transferred. It is for these reasons I was more than willing—even eager—to share with you any of my materials for your—our—project. I don't need to rake the credit for anything; I'm just overjoyed that the history is finally being written. What I am saying is that I no longer live for myself; I live only to love my fellowman as Christ's love lives in me.

I very much enjoyed our brief visit together. You are a person I would like to know more. You are very strong in the Word. The time is perhaps too short for me to say that I hope that someday we could serve together, but I do look forward to that day when we shall eternally be together in Christ. Then, all these distasteful, revolting aspects of my personal hurts-the derangements of my soul—will have been purified out, and there will be only Christ who really is my life—our life.

Your friend, Ray

LETTER TO BRIGADIER GENERAL E. H. SIMMONS, USMC, Director, Marine Corps History and Museums, Headquarters Marine Corps (Code HD), Washington, DC 20380 - 26 April 1982

[*Comments on draft manuscript for 1968 volume on the Vietnam War*]

Dear General Simmons:

First, permit me to express my deep appreciation for permitting me an advance look at the history of U.S. Navy chaplains with Marines in Vietnam, and the opportunity to make comments.

I am very much impressed with the overall book, and have only the following general comments on the book as a whole: unit identification of chaplains, pp. 287*ff*, while essential (especially since the biographical sketch volume of the history of Navy chaplains did not include specific units, but only, e.g., 3rd Marine Division) is somewhat defective since chaplains were usually rotated between various units; they usually spent six months with an infantry unit and six months with a support unit (at least in 3rd Marine Division, 1967-68). I don't know if it would be possible, but a more accurate listing of units with each chaplain might be worth the tremendous effort involved in such research. Second, there should be a listing of individual awards. This only follows the practice of previous volumes in the history of Navy chaplains, WW II and Korea, and especially since there were so very few: one MOH, no NCs, two SSs, 47 BSMs, etc. Finally, much of the 'general flavor' of the situations—the feeling of daily life, the organizational and ecclesiastical problems (e.g., whether to be in the rear or with one's unit in the field), and the stating of 'just what it was really like' is somewhat defective, but might be written down in other Vietnam era histories.

My specific comments relate entirely to what I am personally acquainted with: Khe Sanh. While literally thousands of pages could be written, the rather terse treatment on pp. 219-224, could be, I honestly believe, just a little more expanded due to the quite general interest then and now in that Battle. I would strongly suggest the following information which I have previously noted in my diaries written right at the time they happened and which I have consulted (so the information is not 'off the top of my head!'):

p. 220, first line, after 'Khe Sanh.' – Chaplains serving the approximately 6,000 Marines, Navy, and Army units included LCDR Walt Driscol, Roman Catholic, covering the combat base and outlying battalion areas, frequently riding on a motorcycle left by a local French priest, Father Poncet, when he was evacuated, for which Chaplain Driscoll received the title 'Hoodlum priest.' At other times, he rode the OTTER. Chaplain Ray Stubbe, attached to 1/26, covered the entire combat base with the exception of the small western section which was covered by Chaplain Roy O. Swift until 25 January and then Chaplain William Hampton, both of 3/26, and also covering the hill outposts. Chaplain Brett, 2/26, provided Roman Catholic coverage for his battalion situated at Hill 558 guarding the northwest approach to the combat base, and Hill 861AS, until his death, and then Chaplain Hollis Bond arrived as the 2/26 chaplain. Chaplain Jack Heino was situated with his battalion, 1/9, at the Rock Quarry area guarding the southwest approach to the combat base. Chaplain Chick Kelly arrived on 3 March (from 9th MAB) as the 1/26 chaplain, and provided Roman Catholic coverage [of the entire combat base] since Walt Driscoll was wounded and evacuated.

p. 220, paragraph 3, line 5, after 'the combat base.' There was, of course, some discrepancy in the amount of rounds. The official Sharp and Westmoreland report listed 1307, 26th Marines Regiment listed 1313, 1/26 counted 1407, and Major Smith and his deputy, Major Quamo, of the top secret FOB-3 base told chaplain Stubbe there were over 1700 rounds. Perhaps the discrepancy is attributed to one of the rounds touching off an ammunition supply detonating 1620 rounds of 90mm tank and 106mm recoilless rifle rounds. Living in an area approximately one-half mile wide and one and a half miles long, such high intensity of incoming could not help but produce casualties, among which was the Latter Day Saints lay-leader, First Lieutenant Kim Johnson, the Supply Officer of 1/26. The words of Isaiah, 'Surely he hath borne our griefs and carried our sorrows' were fulfilled by Chaplain Stubbe who wrote in his diary of another casualty of that day:

> The 106 recoilless bunker where I had slept one night took a hit in the hootch and then in the trench adjacent it, injuring one and killing four. The dead were not all together. There were pieces—arms, bodies. There was one less head than all the bodies; it was completely vanished. There were small pieces of flesh all over the place. I knew them all. Parts of one of the man's body hung out as I held him in my arms carrying him into the truck. A hand, an arm, a stringy piece of flesh with cloth caked with mud. The 106 gun was completely untouched, but three of my friends were gone—James, Mike, Gary. The letter to Gary's parents said I said prayers for Gary. What an understatement! I said many prayers; I am saying them still.

Chaplains Driscoll and Stubbe visited the Graves Registration area daily, saying prayers over the collected, filled plastic body bags. On 21 January, the log book entry was 12-68; on 21 February, it was 141-68; 129 killed. Actually, this number did not include those killed after being evacuated or those shot down in aircraft enroute the combat base. Chaplain Stubbe accumulated a listing of 475 killed as a result of the combat at Khe Sanh, January through April. [*Revised to 615 (20 Jan – 16 Apr, and an additional 396 for 17 Apr – 11 July, when the base was abandoned. All are listed with date and unit and circumstances on the book* Battalion of King, 2nd ed (2008)].

There was really no safe place. The artillery rounds left craters in which a man could stand and still be below the surface of the [surrounding] ground. Everyone kept moving about; very few remained fixed in their bunkers. Chaplain Stubbe, at the suggestion of Major Green of 1/26, conducted short worship services complete with Bible reading, prayer, homily, and

communion, jumping between rounds from bunker to bunker, trench to trench. During one two-day period, he conducted approximately fifty such worship services. (Ref: Bronze Star Citation). During one communion, the first Marine drank the entire contents of the chalice unlike other communions where each took a sit; all the other Marines followed suit, so Chaplain Stubbe merely consecrated the bottle itself.

Continuous blasts of incoming, anxiety over incoming when planes arrived, the ever-present and increasing population of large rats, the absence of any light after sunset other than for those in the command bunkers or those fortunate to have candles, a day or two without any water, the continuous talk of being overrun like the nearby Lang Vei Army Special Forces camp with Russian tanks, the clothes that were rotting off everyone, the reddish Khe Sanh mud that impregnated the pores of the skin (and soul!), the absence of 'fox hole' religion, the caring of each for each other, and the daily heroism by everyone that was the usual way of life, were the characteristics of those at Khe Sanh during the battle.

p. 220, after last sentence. Chaplain Hampton reported his service as a reliving of the early Christian experience of worshiping in catacombs, feeling the danger outside but the presence of the Lord in the earth.

Enlisted Marines assigned as clerks for the chaplains at Khe Sanh suffered great loss. In addition to Alexander Chin who was killed along with Father Brett, Chaplain Hampton lost his clerk, and Chaplain Stubbe, who was without a clerk at the beginning of the battle managed to have PFC Jonathan Nathaniel Spicer transferred to him as his clerk since the man had applied for Conscientious Objector status the previous month. Chaplain Stubbe had him work in the C Med area as a stretcher bearer, the area where both Chaplains Driscoll and Stubbe 'lived' at night. Spicer, a very mild-mannered person who sincerely desired no one be harmed frequently threw himself over the bodies of casualties during incoming, and during one evacuation of wounded, was fatally wounded himself, dying several days later after having been evacuated. This Marine, although a conscientious objector, was awarded the Navy Cross for his heroism. Chaplain Stubbe bears the wound in his soul: were it not for his actions, perhaps Spicer would be alive today.

Very respectfully, RAY W. STUBBE"

REMARKS FOR KHE SANH VETERANS REUNION, St. Louis, 14-18 July 1999

[Enclosed in Letter to Mr. Dick Peloquin, President of Khe Sanh Veterans, Inc., 05 July 1999]

Soon after we started connecting as Khe Sanh Veterans, an excitement, a new joy, a new life energized many of us. A buddy with whom we had shared everything in desperate times, a buddy who perhaps saved our life or one we saved, a buddy thought to be dead—suddenly standing in front of us—to whom we rushed and hugged. Someone with whom we could talk who understood our experience. Someone who could fill in the missing links—like, whatever happened after I was evacuated? whatever happened to so-and-so? and the always dreaded, but pressing question: who didn't make it? Someone to write a letter to verify a VA claim for benefits. Someone to share our fears, tears, guilt and grief.

I always said that 'Ma Bell' and the US Postal Service should make a charitable donation to us for all the tens of thousands of telephone calls and letters our members generated.

The philosopher Hegel wrote that organizations are reflections of their leadership. Perhaps this explains why, when I first started gathering together those that had been at Khe Sanh—back in December, 1983, it was important to me to include everyone that had been there. I had been a chaplain there, caring for men of all units, not only doing my religious things, but sharing life, staying overnight and going on patrols with those in the various Marine outposts before the Siege battle—Hills 861, 881-South, 950, the Route 9 Bridge Site, the CAP OSCAR outpost just outside our base, and even the Lang Vei Special Forces camp—the S2 of both Regiment and my own Battalion were very apprehensive since Lang Vei had been overrun. I also had visited the local French coffee planter (Felix Poilane) and his family, the local Wycliffe Bible Translator missionaries (John and Carolyn Miller), and, through the CAC OSCAR Marines, was invited to many of the local Brú Montagnard ceremonies and family meals. I enjoyed the rice parts, but the bloodied pig meat—well, that, fortunately, some of the Marines with me enjoyed far more and I readily gave my portion to them. The rice wine mixed with various herbs—the Bru called it "Blang Kang"—was very potent, and drinking it from a straw along with one of the other Marines, caused strange sensations, indeed! What had these Marines gotten me into!?

But the point is that it is not unexpected that those first listings of members of our Khe Sanh Vets group included Marines from all the infantry units at Khe Sanh, arty, recon, the CAC OSCAR, Shore Party, Engineers, Motor T, ITT, LSU, Marine Air units, Navy Corpsmen and doctors, soldiers from FOB-3 and Lang Vei, and 3 civilians who had been at Khe Sanh for many years.

Our membership is based on a common experience of having been at Khe Sanh, rather than based on branch of service or even when they were at Khe Sanh has. This has made our organization unique. Numerous friendships have emerged between men who were there who didn't know each other then, and who were, in fact, in entirely different units. Numerous mini-reunions of members of platoons, recon, the 1967 Hill Battle vets, as well as gatherings for the 1984 New York Ticker

Tape Parade, have been made possible because of our policy of making our membership inclusive of all those who had been at Khe Sanh.

Our early reunions exhibited all the excitement of a new birth. Everything was simple. Earle Breeding passed a hat—or should I say, a "cover"—and at the 1988 meeting in Tampa where the 3d MarDiv Association was honoring the 20th anniversary of the Siege Battle at Khe Sanh. He was promptly designated our first Treasurer by popular acclaim! We had no dues for many, many years, and printed our magazine—our only real expense—with money people just donated. Our meetings consisted of several hours of sharing our stories—of Khe Sanh and since—and perhaps 15 minutes of business. here was no Board of Directors. Ernie Husted donated his time and that of his friends—to assemble and mail our newsletter to up to 500 people at the time. Although we met with 3dMarDiv Association—who sort of tolerated us like some wayward child—our men weren't really interested in tours, events, shows, banquets, but just relished the time together, now, with their friends. The reunion was a time to hug, shed a tear, a belly laugh, stories, life.

The American philosopher, Josiah Royce, observed that community exists for those who share a common past experience, usually of suffering, form communities. That certainly is true of us, who have been forged together on the anvil of the battlefield of Khe Sanh, in the heat and with the hammer of battle. We have all been shaped as different men because of our experience of what happened there.

Royce also noted that a common hope or vision for the future also cements communities together. I want to address, not our organization's past, nor what happened at Khe Sanh. What I wish to address is our future.

Obviously, one cannot attend one of these reunions without being aware of being together with some very special men. I have consistently told anyone who would listen, that as a group, I've never been with men who exhibited greater humanity, greater caring for others, greater dedication, even greater moral fiber, than those I knew at Khe Sanh and those I've come to know since who were also there that I didn't know at the time.

A wise man once observed that the gifts are in all the people, and that we affirm and validate people most when they know that we need them. In other words, those gifts are drawn out and made active when we are in need—as we all were during the various battles at Khe Sanh—when it was not uncommon to see men share give their last drops of water, hare their last cans of Cs, to dash out during incoming to pull a wounded man to safety. One very rugged, battle-hardened soldier at FOB-3 during the Siege battle pointed me to Lao refugees outside the wire. He said, "Padre, I'm not a religious man. Please say a few prayers for these people." In fact, while strengths always seem to divide people—strengths of power, money, intellect, popularity, even morality and piety—weaknesses and needs always join people together.

Perhaps that's why Marines are so tight—we had so little and faced so much—but it was always together. And we knew others depended on us, and we depended on others—or we wouldn't make it back alive. That's where *Semper Fidelis* is not just words, but a way of life. There's not a man sitting here, who very well might not be sitting here, were it not for the work of others. What will shape our future, pull is into the future?

Thanksgiving and gratitude will characterize our lives as we move into the future. Others have given us so much. So when you get a chance, say, "Thank you" to that pilot or air crewman, that artilleryman, that man who moved ammo during incoming, the doctor and the corpsman, the recon Marine who probably was one of a working party to move wounded on litters—maybe even you. Say "thank you" even if you don't know the man or what he did there. It doesn't matter. Everyone who was there was crucially important to the survival of all.

Our losses were great—much greater than the official regimental total of 204. In fact, if one adds up the totals from the various official subordinate battalions the total is 274, and if one adds those of the various other assorted units there—an additional 70, plus those from Operation Pegasus and up through 16 April—the date 1/9 departed—the total is 560 for the period 17 January - 16 April. We all know that our losses were great. But think for a moment how much greater they'd be if those 40,000 or more enemy surrounding us had finally been able to assault our base! We had, on 16 March 1968, a total of 6,475 American servicemen at Khe Sanh. Had it not been for our superior intelligence through the signal intercepts, newly-used electronic sensors, and other means, had it not been through the wise decisions of our commander to move B-52 strikes closer to us, and so on, had not everyone done their part to fight to hold our outposts on 861 and 861-Alfa and Hill 64, and bravely fought in Khe Sanh ville and Lang Vei inflicting such loss on the enemy—had it not been for all that, our losses might reasonably been in the thousands. Perhaps none of us would be sitting here tonight. It's really a very great miracle that we made it out alive. We need to thank a lot of people!

Then, compassion will also move our future actions. I'm always amazed at how our members continue to exhibit a humanity and morality and dedication to their community far exceeding what might be anticipated. I know, for example, of a former battalion commander at Khe Sanh who retired on Hilton Head Island after working in high, executive positions of Merrill Lynch in the years following Khe Sanh. What does he do? He volunteers for Meals-on-Wheels and Habitat-for-Humanity. Then there are two Sergeants from FOB-3 who single-handedly have returned to do good for the Bru mountain

people at Khe Sanh that we, as Americans, said we would protect—and then abandoned them. They have managed to built and stock dispensaries and schools, have had wells dug, distributed medical manuals so that the Bru can help themselves, distributed mosquito netting and good will. A former FOB-3 CO visited Vietnam last year, talked with the American ambassador and various Vietnamese officials and was able to cut through all the red tape to establish this Bru volunteer work on a more solid foundation. Then there is a former CAC OSCAR Marine who made his millions in contractor work, yet who also was the one who donated devices to search through the rubble on the collapsed interstate highway in the Bay Area of San Francisco from an earthquake to locate survivors. O, there are so many—many, many dozens of such stories, in fact, of our Khe Sanh vets who now do so much.

There are people who care for each other. A former B-52 crewman, John Gaston, once wrote that I seemed a little "down" and he promptly began sending me a hilarious, and somewhat "off color" monthly magazine to "cheer me up a little." He was a bouncer in a local bar. A few months ago the magazines stopped coming; I discovered he had died.

We all need each other. Someone once observed that the face of a friend is the face of God. Think about it. There have been many Khe Sanh reunions. A small handful has attended all or almost all of them. Many hundreds have attended one or two. As I look over the attendees, I see the following names: Bill BARKOWSKI, Tom BYSTROM, Clay ERNST, Les FAUREBRAC, Bill JABUSCH, Quiles JACOBS, James LAHR, Andy METTS, and Ernie FRANK. These are those who attended a reunion and who are no longer with us. The opportunity to embrace them, to give them a "thank you," to appreciate their life, is past. But it isn't past for those still with us right now, whom we can still hug, still share life and conversation, still appreciate.

And so I encourage us, not to be pushed forward by the past, but to be pulled forward into the future by our thanksgiving and gratitude, our compassion and care, our brotherly love. Love is not really, fundamentally, a thing, a noun, a feeling, an emotion; it is really a verb, an action, something done. And in the end, as the Jesuit John Powell noted, we will all be judged by our love—what we have done that has benefited others—the cop of water we did or did not give to a thirsty brother, the one imprisoned in fear and aloneness that we visited, the one who was naked in resources to survive or naked in knowing the value of his life that we did or did not visit and attend. [Matt 25.31ff] Our true wealth will be measured in what we have given to others, not received or accumulated.

As I look at our Khe Sanh vets, this is not something strange, something we must work at, a challenge. Almost everyone already is thankful, compassionate, loving, and serving. So like the ancient Greek poet, Pindar, the word for the day is, simply, "be who you are." Don't hide your gifts. The suffering and pains of the past only serve as windows and opportunities to see and help those in need. The angers and rage sometimes felt can be the energy to become involved in volunteer work.

Share your stories; share your life. Write down your past experiences and stories and get it out of your system; your children and others will probably be happy you did so. This will also help to form an accurate historical account for the future. Like the controversial Civil War, Vietnam will be studied for Centuries into the future. Help make what they understand to be our experience accurate by writing down your part in it. Contribute to our Khe Sanh magazine, which is a place to share feelings and thoughts and experiences, a place to contribute poems that express emotions, images, dreams. Most important, express your appreciation of each other. We don't have much time left to do so and the opportunity may never again be there.

I want to close by telling you that life is very, very fragile and very short, and very precious. There is a rather famous picture of me holding worship services at Khe Sanh during the siege with Hills 950 and 1015 in the background. I had a 100-degree fever at the time that photo was taken and soon thereafter collapsed. As I write this to you now, I have a 100-degree fever and it's been about a week from an emergency appendectomy I had. I am aware that my life is a matter of not being able to count on the next day—just as we all finally realized at Khe Sanh during the battles there.

Back in 1984, when I was getting ready to retire from the Chaplain Corps on 21 active years, I found myself hospitalized for six months in the nearby VA hospital. I was still on active duty, and was there for Post Traumatic Stress Disorder due mainly to grief that was finally coming out for all the dead I had personally known at Khe Sanh—many dozens of Marines and corpsmen—even my own enlisted assistant, and then, all the thousands of Bru that I didn't know personally, but knew as a tribe of caring, playful, innocent, and wonderful human beings. I needed time to grieve and fell into a deep depression that forced me to become grounded—depression can be a good thing, you know.

At the time, I reached out for people to embrace me; I felt so very lonely. My fellow chaplains, only a mile away at Great Lakes, mainly avoided me, like I was contaminated by some sort of plague. I compiled a listing of those I knew had been at Khe Sanh with me and shared it with the others on the list, out of a very painful need for connections with those who understand, know, and care. As they did back in Khe Sanh, these friends rallied, supported, embraced me. Then the miracle happened: they started connecting to each other. Gradually those listed added many more names. We came together in parades in New York City and Chicago, met in Tampa with 3d Marine Division Association in 1988, and I was privileged to get us incorporated officially, and thus began our organization.

We have met every year since, and have grown. We can never forget our past; we are unable to do so, actually, despite the well wishers of those who tell us to do that. How could we? But let us also look forward. The War Memorial here in Milwaukee has as its motto: "Let us honor the dead by serving the living."

God bless you all, my comrades, my friends.

Why don't you all, now, stand up. Go to the one Khe Sanh vet next to you, give a hug and say something like, "Thank you for saving my life; I wouldn't be here if it weren't for you," or something like that, and then go to someone else, and someone else. Do this for a few minutes and then go back to your seats. I can tell you, you're going to feel something very, very precious.

LETTER TO MRS. CONSTANCE GIBBONS, 24 October 2011

Dear Mrs. Gibbons:

...

I see by the Khe Sanh Directory that your husband was in the S-1 section of our battalion, 1/26. I still recall seeing the Adjutant himself in April, I think it was. He was, like all of us, so very gaunt; emaciated, nervous. (Was his name Fitzgerald? Right now, as I write this, I can't be sure of his name.) I recall he had a very large box of Purple Hearts for the Marines and Corpsmen of 1/26; I wondered why Division had sent them to Khe Sanh since the battalion would be moving, and now he had to transport all the Purple Hearts. There were hundreds of them! He and that box of Purple Hearts was a sort of icon, image, through which the reality of the siege battle was so apparent. It's a scene that I'[ll never forget.

It would be so easy to write something about how bad it was, and what happened to us, and the tragedy of war, and so on. Some of that might have its place, of course, and writing about it does help the writer–as well as readers who might be prompted to do the same, and thereby get what is buried deep within and place it in the light of day. I recall a very ancient Christian writing, the Gospel of Thomas, in which there is a statement: "If you take out what is inside of you, what is inside of you will heal you, but if you keep what is inside of you inside of you, what is inside of you will kill you."[668] I think that's a very helpful insight.

Hopefully, the attached might be of some use, perhaps not. It's where I am right now in dealing with the lingering legacies of the experiences of prolonged and intense combat, over forty years ago!

Sincerely,

...

A NOTE ON LIVING WITH THE LEGACY OF THE EXPERIENCE OF INTENSE, PROLONGED COMBAT

Perhaps for all of us who were at Khe Sanh during the Siege battle, the story of Adam and Eve expelled from Paradise echoes our own story. Despite the living conditions on Hills 861, 881-South, and other places at Khe Sanh, and despite the misery of monsoons, raging rivers, and torturous terrain, elephant grass and leeches, for the post part, the ravishing beauty we saw at Khe Sanh, cooler temperatures, separation from those in the rear–the Generals and their staffs along with their picky regulations, made our time there almost a Garden of Eden experience.

Then, suddenly, like someone flicking a light switch, all turned into horror, terror, desperation, isolation, living moment to moment with no assurance of another moment. Youthful innocence was lost forever; we could never again return to Paradise, "to the Garden" from which we felt expelled. We emerged completely changed and, for us, everything and everyone else also changed. It was hard to "fit in" and others made it even more difficult by despicable venomous hatred heaped on us as representatives of the war they hated. Just like Adam, we hid, only to hear the voice, "Adam, where are you?"[669] as our question. Where, indeed, were we?

Now the challenge became to live with it, to transform negatives into positives, using what we had learned to bring life to others, to make rational sense out of what was really irrational. Perhaps we had become more compassionate, more aware of injustices, more sensitive to what could injure. Perhaps our angers gave us energy to be productive. Perhaps we learned to put our pains and hurts into a wider context of meaning–a wider context of a larger understanding of what happened through talking with others who were with us and who saw things from a different perspective, through a wider context of friendships and a hopefully understanding family, through a wider context of an awareness of God's Presence and love for us, so that our dark pains became like dark clouds within a much greater sky. Perhaps the larger context became realizing that a few months of our life, however intense they were, were only a few months of a much larger life. Life and hopes, which had become narrowed, squeezed, pressed, crushed, needed greater containers, larger space. Everyone needs a container for their soul. Everyone needs their space. Everyone needs a good hug of embracing arms of love within which we feel a peace, like a

---

[668] *Logion* 70.

[669] Gen 3.7.

hurt, crying child running into its mother's arms. The pain remains, but somehow, all is well. Perhaps the great context is our love for others, not as an emotion, but as an action–what we do, not what we feel. For the network of caring for others, that we knew in battle as we shared our last bits of C-ration, drops of water, as we dashed out to drag a wounded man to safety during incoming, all brought us closer together than blood relatives and gave us life. Humor and heroism in battle always emphasize life instead of death, courage that lives with the reality of fear but doesn't let it take control.

In the end, we can all become "wounded healers," as much as alcoholics and victims of abuse helping others with the same issues. We all have pieces of the whole, and when we come together, we become whole. Negatives are transformed into positives. In the end, we learn that God is on the cross of our pain and suffering, in our shadows and in our valleys.

–Ray William Stubbe, 24 October 2011

FLAG DAY PRAYER – 2014, Peck Pavilion, Marcus Center for the Performing Arts, Milwaukee WI, 13 June 2014

Dear Lord, our Father,
Your hand weaves us
    into families, communities, and a nation.
As we focus on our flag,
    we see a social fabric
        of many individual, colored threads
    of so many who gave so much.
REMINDING us:
    we are a nation richly blessed
    by You, that we might bless others,
        That our true wealth is what
            we have given away,
            not what we accumulate;
        And we will be remembered
            by how we've enriched others,
            not how we've enriched our self.
Our flag CALLS us to freedom, Your gift,
    from imprisoning self-seeking,
    and the opportunity to do good
        and do what is right.
Our flag COVERS caskets
    of our honored dead
        who lived to give, to bless,
            and to serve.
    We see colors,
        not the ugliness of death,
Our flag RALLIES us to action.
    It's red reminds us:
        There is no birth without blood
        No life without passion,
        No enrichment without sacrifice.
Our flag UNITES us:
    It's white is only pure
        as the presence of all colors.
    We are only strong as each person
        is affirmed, valued,
        and whose contribution
        enriches the whole.
    All depend on each other;
        give life to each other,
    As branches in a vine

Our flag EMBRACES AND INCLUDES.
As its blue field contains
a new constellation of stars
in the wide blue sky,
we are contained
in "true blue" loyalty
of each to each.
Open our eyes that we might be aware
of the needs of those around us,
Give us "strength equal to our tasks,
not tasks equal to our strengths,"
That we might serve others
in Your Presence
of the peace and power
of Your Holy Name. We pray. Amen.

PRAYER FOR THE DEDICATION OF WAR DOG MEMORIAL STATUE, Sunday, 22 June 2014, Village Park, Menomonee Falls, WI

O Lord, our God, Creator of all life:
We thank You for your gift of war dogs.
Through them, O Lord, You bless us
with companionship, protection, and guidance
in dark times and dangerous places.
Through them, O Lord,
we know Your presence with us in all places.
Through their faithfulness and watchfulness
as companions on our way,
and by their ability to detect explosives
and the presence of enemy
You, O Lord, have saved thousands of lives.
Accept, O Lord, our gratitude,
and keep us always
in the protective peace and presence
of Your Holy Name.
We pray. AMEN.

REMARKS AT THE DEDICATION OF "JOURNEY OF SOULS" PAINTING BY STEVEN ALPERT BSED ON A PHOTOGRAPH BY LCPL PAULT. DARGAN, MARINE CORPS MUSEUM, QUANTICO VA, 16 JULY 2014

[Sent to Mr. Steve Alpert to be read in my absence]

We will never forget them. Their young faces are forever burned into our soul. Located in the center of the Khe Sanh combat base, sandwiched between the airstrip and the regimental headquarters, Bravo Company, 3rd Reconnaissance Battalion, received most of the incoming enemy rockets, mortars, and artillery from 21 January to 30 March 1968. Three weeks into the Siege battle, over 70 of the recon company of Marines at Khe Sanh had been wounded or killed. They retained their position rather than relocate to a safer portion of the combat base since they were the last defense to defend the Combat Operations Center of Regiment against a human wave attack by the approximately 40,000 North Vietnamese troops that surrounded Khe Sanh. Their resolve, undeterred by the ferocity of the battle, exhibited an unexcelled bravery as they daily continued to rescue comrades trapped in collapsed bunkers and trenches, for over two months. Some frantically scraped away the hard clay until their fingernails split and then gave mouth-to-mouth resuscitation to revive a trapped comrade. Daily, they faced death. The scene at Khe Sanh reminded one of the horrors of the trench warfare of World War I—pinned down in constant shelling, filth and rats.

We will never forget them. These young men gave their last drops of water to a thirsty comrade at a time when we were restricted to one canteen cup of water a day. They shared their C-rations at a time when we were down to one C-ration a day and burning-up calories while improving defensive positions and in the anxiety of the battle, day after day, week after

week, month after month. Loss of more than fifty pounds of body weight was not uncommon. These young men maintained their humor. During one of many hundreds of rocket attacks, one could overhear one Marine declare that the NVA gunners were piss-poor since they couldn't even hit their bunker, disregarding the fact that the rockets were fired from launchers over half a dozen miles away. Some pulled wounded buddies to safety during incoming. They exhibited an everyday heroism of the highest degree.

We will never forget them. Their young faces are burned forever into our soul. These Marines and Navy Corpsmen are perhaps the best group of men we have ever known,

LETTER TO MR. DAVID MARAGNI, 21 Oct 2014

Sometimes people ask me a question that appeared in Mahedy's book.

> [The central religious question to come out of the war is.. 'Where was God in Vietnam?' When vets ask it, the question carries an element of rage directed against God. Like most Americans, vets have a religious impulse buried deep within their souls. Like most of us, they believed in God; they also believed that God was good and just. But where was God at Khe Sanh?" (Mahedy, William P., *Out of the Night: The Spiritual Journey of Vietnam Vets.* New York: Ballentine Books, 1986, p. 125).]

That question never really arose in my soul, either while at Khe Sanh nor afterwards, for despite all the horror and terror and the darkness of the situation, I always felt the presence of our Lord. In fact, on Veterans Day, 11 November 2009, I was part of a panel in front of several hundred at the Chazin Art Museum on the campus of the University of Wisconsin, Madison, Wi. During the question and answer time, the last question was directed to me by a young girl sitting in the front row: "What was the spiritual condition of the men during the siege at Khe Sanh?" In my response, I indicated that over two dozen there at Khe Sanh during the siege battle, later became priests and ministers. In conversations with them, they said that they experienced God in the midst of all that horror and terror. I was reminded that great anti-slavery poem, "The Present Crisis," by James Russell Lowell, which includes the line: "and beyond the dim unknown / standeth God within the shadows / keeping watch above His own." I said, "God is with us in our darkest times. God is on the cross!" As I said that, I suddenly recalled holding the crucifix for a photograph taken by an interviewer from Wisconsin Public Television who wanted us Vietnam vets to hold something that was significant to us from Vietnam for our photograph. I then suddenly realized it was a metaphor of Khe Sanh during the siege: God with us, suffering with us, on the cross!

PRAYER, TENTH ANNIVERSARY/VETERANS DAY CELEBRATION
Hmong American Peace Academy, Milwaukee, WI, 07 November 2014

With thankful hearts, full of joy
we remember Your compassion, O Lord:
You deliver us from evil
places and people that diminish life.
You faithfully place us where we may live
and grow in peace
with family, friends, and teachers
that we may enjoy a full and rich life
You give us opportunities
beyond our dreams and expectations
to help one another
to appreciate Your goodness
and praise You,
to develop into persons
we might be.
Bless this gathering, O Lord:
these people and this school
That it continue to be a place of peace
where life abundant flourishes,
its teachers dedicated
to bless their students,

its students receptive to blessings
You give through this school,
their families, and their friends
That all may enjoy Your blessings of peace
in Your Holy Name—
We pray, AMEN

VETERANS DAY REMARKS AND PRAYER, 11 November 2014 – Milwaukee War Memorial, Milwaukee, WI

World War I began a hundred years ago this summer; Veterans Day has its origin in the ending of that war.

Upon entering the World War I National Museum in Kansas City, Missouri, one stands before a glass floor. Beneath that glass is a large map of the battlefield of that war, covered with poppies. There are so many, it is as impossible to count them as it would be to count the leaves through which we walk in autumn. A nearby guide quietly whispers that each poppy represents a thousand killed. There are actually 8,000 poppies representing over eight million soldiers killed. The war raged for three years before American soldiers entered it, and although American soldiers were in the war for only a little over a year, our loss was such that our Vietnam Wall in Washington, D.C., however overwhelming it's loss makes us feel, would have to be over twice as large if the names of all those killed were listed.[670]

Veterans Day started as Armistice Day, following World War I. Thus, the celebration was not a remembrance of the horrors and casualties of that war, but of the Armistice, the peace. The Day was not focused on memories of war, but on peace. It was a declaration that we would be more drawn into the future than pushed by the past. There is work to be done! Peace is forward-looking, future-oriented. Life is not what happened to us in the past, but what we're going to do with it to make a better future, to take what we have learned and make a better world. Over 2,000 years ago, the citizens of Athens, Greece, pledged to give to their sons and daughters a better nation than what they received. The women who organized our Milwaukee War Memorial gave us a motto which says it all: "To honor the dead by serving the living."

With this background, let us pray:

O Lord, our God
In Your presence we know peace
though we be in battlefields
of turmoil and terror
swirling around us like a hurricane
destroying lives, hopes, dreams,
even our faith in You,
You miraculously and mysteriously
remain with us
like the eye of that hurricane,
a refuge of peace in the midst of war,
strength when our power and spirit wilt.
Centered in You,
we have peace,
as confidence, strength,
fulfillment and future
Centered in You,
we know peace,
not as the world gives,
but as only You can give:[671]
The world knows peace
as the absence of conflict,

---

[670] Vietnam KIA 58,000. World War I American KIA 117,000. There were also seven times as many killed in World War II (408,000) and ten times as many killed in the Civil War (620,000) at a time when the US population was a tenth of what it now is, (U.S. population in 1860: 31,443,321; in 1870: 39,818,449; in 1865 (by interpolation): 35,630,806. US population on 26 August 2013: 316,539,860.

[671] Jn 14.27.

war, danger,
turmoil and threat.
Your peace brings blessing,
strength, power,
fullness of life, assurance,
hope and a future
so a soldier can have peace
in the midst of desperate battle.
The world knows peace
as a balance of terror,
"mutually ensured destruction,"
as slavery
resulting from imposed force and fear;
You give us peace
as a living, compelling,
dynamic force of life.
We ask Your blessing on our veterans
and their families
that life may grow
into fullness, wholeness,
and completion
As You draw us into Your future
may the power of Your peace
flowing from You
like ripples radiating
from a pebble tossed on water–
make us an instrument of Your peace
in the power of Your Holy Name,
We pray. AMEN.

DEDICATION PRAYER; GARY G. WETZEL MEMORIAL
War Memorial, Milwaukee, WI, 25 March 2015. [Gary Wetzel is a Medal of Honor recipient]

INVOCATION:
Our Father:
Today we honor Your servant
and our brother, Gary G. Wetzel.
You, O Lord, empty Yourself to serve us[672]
that we might live life in its fullness,[673]
In Gary we see an image
of Your image[674] of love and life:[675]
Despite loss of an arm,
and disregarding his own safety
he rescued others,
His life reflects Your consistent emphasis:
greatest are those who serve[676]

---

[672] Phil 2.5-11
[673] John 10,.10.
[674] We are created in the image of God, Gen 1.27.
[675] "Pops" Donald Turek, Director of the Milwaukee War Memorial in the late 1980s, often remarked, "The closest we can get to God is to see His face in the face of our brother." *Cf.* Gen. 33.10, Jacob upon seeing Esau, "truly to see your face is like seeing the face of God.."

and no greater love is known
than to lay down life that others might live.[677]
Long after all of us are gone,
Our children's children's children
in far-off generations yet to be
will see this granite monument and ask,
"What does this stone mean?[678]
Who is Gary G Wetzel?"
As his story is retold, may his life inspire
service of others.
For Your Presence, always and everywhere,[679]
becomes a blessing and is experienced
as we care for each other.
Help us, O Lord, to catch this healing vision;[680]
move us to serve others,
living to Your glory in Your Holy Name,
We pray. Amen.

BENEDICTION: (First used at Veterans Day Banquet, War Memorial, 11 Nov 2012)

May the strong arm of the LORD
protect you from all harm.
May the right hand of the LORD
guide you in serving others.
May you see God in the face of your friend.
May the gracious Presence of the Lord
still your troubled waters.
May our Lord's peace make you whole
and equip you to
do justice, help the needy,
and be an oasis of blessing and life.
May the Lord direct you
into paths of nourishment,
strength and peace
in His Holy Name. AMEN.

(If asked to give a Table Grace, might give the following, first given at Miller-Coors and Veterans Day Banquet, 11 Nov 2013):

You open Your hand, O Lord,
and satisfy the desire of every living thing.[681]
As we gratefully acknowledge Your gift
of this food for our nourishment, we know
we do not live by bread alone,[682]
but by all Your actions[683] which nourish us.

---

[676] Luke 22.26: "Let the greatest among you become as the youngest, and the leader as one who serves." *Cf.* Luke 22.27, Matt 20.28, and Mk 10.45.

[677] Jn 15.13: "Greater love has no one than this, that someone lay down his life for his friends. (ESV).

[678] Josh 4.21: " And he said to the people of Israel, "When your children ask their fathers in times to come, 'What do these stones mean?'" (ESV)

[679] *Cf.* Jer 23.24, Eph 4.6 & 10, Col. 1.17, Acts 17.28, and Ps 139.7-9.

[680] Biblical testimony emphasizes the healing comes through a vision (Prov. 29.18, Ex 3.2, and Jn 3.14,1 Kings 19.11, Job chapters 38 through 42.6, Matt 17.2 and parallels, Luke 5.8, etc.

[681] Ps 145.16.

[682] Matt 4.4, Lk 4.4.

As we eat this food, our soul feeds
on the strength of friends and family,
Your love, beauty, and peace.
Today, we especially thank You (*for Gary Wetzel and*)
for those who serve and have served
our nation,
who guard and protect us
that all may have life–life in its fullness.[684]
Bless us, we pray,
that we may be Your food to nourish others
through our presence, words, and actions.
Keep us
in the power of Your Holy Name we pray. AMEN.

PRAYER AND REMARKS AT INTERNMENT OF SP4 TERRENCE LEE SUND, Wisconsin Memorial Park, 08 August 2015

[*Mr. Conto, a Vietnam veteran, was compiling a listing of all KIA Wisconsin Vietnam veterans and where they were buried. In the process, he discovered this man's remains, along with his mother's, in a warehouse on a shelf, not having been buried., I was requested to provide the service for his internment. Mr. Conto subsequently discovered many additional remains of Vietnam vets who had not been buried*]

INTRODUCTION:

We meet today to place our brother, Terrence Lee SUND in his final resting place along with his mother, Magdalene.

A SP-4 with "B" Co., 12th Infantry, 4th Infantry Div, Terrence was killed in action in Kontum Province, Vietnam, on 6 December 1967, after serving in Vietnam five months. He was 20.

Even after 48 years, our bond remains. We care for each other. We remember. We do not forget.

PRAYER Let us pray:

O God, your days are without end and your mercies cannot be counted. Make us aware that Your gift to us of human life which is precious, fragile, and short. Let Your Holy Spirit lead us in serving Your will of love, justice, and bringing fullness of life to each other, so that, when we shall have served in our generation, we may be gathered with our families, having the testimony of a good conscience, cleansed by our Savior, in the confidence of a certain faith, in the comfort of a holy hope, in favor with You, our God, and in peace with all humanity through Jesus Christ, our Lord, AMEN.

SCRIPTURE (A reading from the 7th Chapter of the Book of Revelation, verses 9 through 17:

I looked, and there was a great multitude that no one could count, from every nation, from all tribes and peoples and languages, standing before the throne and before the Lamb, robed in white, with palm branches in their hands. They cried out in a loud voice, saying, "Salvation belongs to our God who is seated on the throne, and to the Lamb!" ... Then one of the elders addressed me, saying, "Who are these, robed in white, and where have they come from?" ... "These are they who have come out of the great ordeal; they have washed their robes and made them white in the blood of the Lamb. ... the one who is seated on the throne will shelter them. They will hunger no more, and thirst no more; the sun will not strike them, nor any scorching heat; for the Lamb at the center of the throne will be their shepherd, and he will guide them to springs of the water *of life, and God will wipe away every tear from their eyes.*"

RFMARKS:

The end of the story is not the battlefield of terror and horror, of desperate situations we experience and endure, or our passage through the "great ordeal" of living life itself. Our destiny lies with the great heavenly crowd, which no one can number, cleansed from all dirt and stain by our Savior in the center of the throne of God, waving palm branches, the symbol of

---

[683] Mt 4.4b.
[684] Jn 10.10.

victory in ancient Israel. There are no more tears, no pain or discomfort, no more hunger or thirst. There is reuniting in community. There is praise of God, joy, and peace.

PRAYER: Let us pray:

O Lord, our God
for whom every single individual is precious
source of all love, mercy, and compassion
without whom those who build the city labor in vain
without whom all community fragments into
sharp chards of pain
We come to You today to ask Your blessing upon us,
granting final rest to our brother, Terrence Lee
and his mother, Magdalene
remembering that with You, no one is lost or least.

We commit their remains to this resting place. Christ was the first to rise from the dead, and we know that he will raise up our mortal bodies to be like him in glory. We commend our brother and his mother to the Lord. May the Lord restore them into his peace and raise them up on the last day; earth to earth, ashes to ashes, dust to dust. The Lord bless and keep them, the Lord make his face to shine on them and be gracious to them. The Lord look upon them with favor and give them peace. Amen.

Eternal rest grant unto them, O Lord
And let perpetual light shine upon them.
Amen.
Let us go in peace. Amen.

PURPLE HEART PRAYER, 07 August 2015, Milwaukee War Memorial Building

INVOCATION:

Dear Lord, Heavenly Father:
Help us to remember today
those who have borne the burden
and paid the price
those whose spilled blood
and sacrifice on the battlefield
we, today, honor.
Give us strength, dear Lord
to care
for family members with wounded loved ones
and for one another in actions and not simply words and feelings
In the Purple Heart may we see
the cost of our freedom
the suffering and sacrifice by some
that others may live
May Your Presence, O Lord, today:
enable those wounded to be Wounded Healers
give us insight to mend our brokenness,
give us strength to invigorate our commitment
to justice
and to our social contract of bearing one
another's burdens
bring peace, even in the midst of conflict
and bless us all with life abundant,
in Your Holy Name. We pray. AMEN

BENEDICTION:

Receive the blessing:
In the sight of so many, may you be blessed with courage.
In the love of our Lord, may you be blessed
with love to serve each other.
In the Presence of our Lord, may you be blessed with peace.
in Your Holy Name. We pray. AMEN.

MEMORIAL SERVICE FOR BRUCE PAUL NETTESHEIM, 27 July 2016, Menomonee Falls, WI

[*Mr. Richard Trawicki had been asked to repair an outdoor sign for St. Matthew's Catholic Church and discovered that on the back it had been erected as a memorial to Bruce Paul Nettesheim, a Vietnam veteran. Much of the underground wiring had to be replaced, and Mr. Trawicki, upon seeing it was a memorial to a Vietnam veteran, donated all his costs and arranged for a memorial service. I was asked to give the prayers. The entire Nettesheim family, several dozen, were present, along with Mr. Gary Wetzel, Medal of Honor recipient, and others*]

Today, we remember Bruce Paul NETTESHEIM, killed in action in Vietnam while serving as a Sergeant in C Co., 2nd Battalion, 377th Infantry Regiment, 101st Airborne Division. Paul had been in Vietnam only two weeks. He was 23 and a half years old.

LET US PRAY:

O Lord, our God, we praise Your presence with us now, at this place, and on this occasion.

Your sea of loving compassion in which we live and move and have our being, like the deep sea of the atmosphere around us and in us, gives us assurance that all shall be well.

O Lord, as we travel along the pathways of our life, we sometimes find ourselves in strange places, but You are always with us, so we do not fear.

We find ourselves ensnared in webs of memories of the past, stuck in problems of the present, and anxious over uncertainties of the future, yet Your hand guides and holds us even if we are unaware.

Bless us now, we pray, with Your gift of faith that trusts in Your unfailing presence with us, that grasps Your life-giving blessing upon us, and that assures us of Your never-failing mercy on us all.

In Your Holy Name. Amen.

SCRIPTURE READING: From Ecclesiastes 3.1-8:

"For everything there is a season, and a time for every matter under heaven: [2] a time to be born, and a time to die; a time to plant, and a time to pluck up what is planted; [3] a time to kill, and a time to heal; a time to break down, and a time to build up; [4] a time to weep, and a time to laugh; a time to mourn, and a time to dance; [5] a time to cast away stones, and a time to gather stones together; a time to embrace, and a time to refrain from embracing; [6] a time to seek, and a time to lose; a time to keep, and a time to cast away; [7] a time to tear, and a time to sew; a time to keep silence, and a time to speak; [8] a time to love, and a time to hate; a time for war, and a time for peace."

COMMENTS:

When Mr. Richard Trawicki noticed the name of Bruce Paul Nettesheim on the back of the church sign erected in his memory, his first thought was to have a brief ceremony to remember him.

It is common for Vietnam combat veterans to remember those who were with them in Vietnam, even if we didn't personally know them. Indeed, we never really know another person, even those closest to us—or even our self for that matter. There are always surprises as new experiences and situations disclose a hidden aspect that suddenly emerges. So although we might not have known Paul personally, we know he was there with us and shared the same life we did while in that far-away place, and we remember him.

The important fact is that we remember, for to remember reflects our basic humanity. We remember each other because we aren't really individuals but are all part of a greater whole, or as John Donne famously said, "No man is an island, entire unto itself." We are individual threads woven into the fabric of our society and humanity. People will remember us in terms

of our relationship to others, what we gave to others and not by what we accumulated for ourselves, for true wealth is always what we've given away, not what we've accumulated.

Remembering shapes the contours of who we are and determines how we live.

We remember who we are—our relationships to others who give us life, who depend on us, and who shape our life by the values we've learned by living with them.

Most important: God remembers us. We might not always remember God, but God always remembers us, with our best interests in mind. For God knows we face many tasks and do not always have strength within ourselves, that we are limited and vulnerable. We pray to God for strength equal to our tasks, not tasks equal to our strength. Life is short, precious, and uncertain. God does not remove us from danger or pain, but promises to be with us in them, blessing us with strength and confidence by His presence with us.

We recall the 23rd Psalm:

The LORD is my shepherd; I shall not want. [2] He makes me lie down in green pastures. He leads me beside still waters. [3] He restores my soul. He leads me in paths of righteousness for his name's sake. [4] Even though I walk through the valley of the shadow of death, I will fear no evil, for you are with me; your rod and your staff, they comfort me. [5] You prepare a table before me in the presence of my enemies; you anoint my head with oil; my cup overflows. [6] Surely goodness and mercy shall follow me all the days of my life, and I shall dwell in the house of the LORD forever.

Today we celebrate faithfulness, someone on whom we can rely with certainty and conviction.

That is what Bruce Paul NETTESHEIM exhibited in laying down his life for his friends and for us, for "greater love has no man than to lay down his life for his friend." [John 15.13].

That is what we see in all of you gathered here today, indicating that you remember.

That is what we know in relation to our God. Remembrance has to do with faithfulness, with recalling that we are part of the greater whole, part of the larger set of values that determine who we are and how we live. Remembrance makes us human.

We are thankful to Bruce Paul Nettesheim and all those who, like him, laid down their life in service that we might be free to develop into all we could be and free to do what is right.

We are thankful for our family and our nation, especially those who instilled in us the set of values and the sense of how we ought to live, so that we might be a blessing to others.

We are thankful to Mr. Trawicki for seizing the opportunity to call for this assembly.

But most of all, we are thankful to our God who is always faithful, whose faithfulness is the solid rock on which we stand, the firm foundation on which we build our life, our family, and our society.

BLESSING:
Now, receive the blessing:
May the strong arm of the LORD
protect you from all harm.
May the right hand of the LORD
guide you in serving others.
May you see God in the face of your friend.
May the gracious Presence of the Lord
still your troubled waters.
May our Lord's peace make you whole
and equip you to
do justice, help the needy,
and be an oasis of blessing and life.
May the Lord direct you
into paths of nourishment,
strength and peace
in His Holy Name. AMEN.

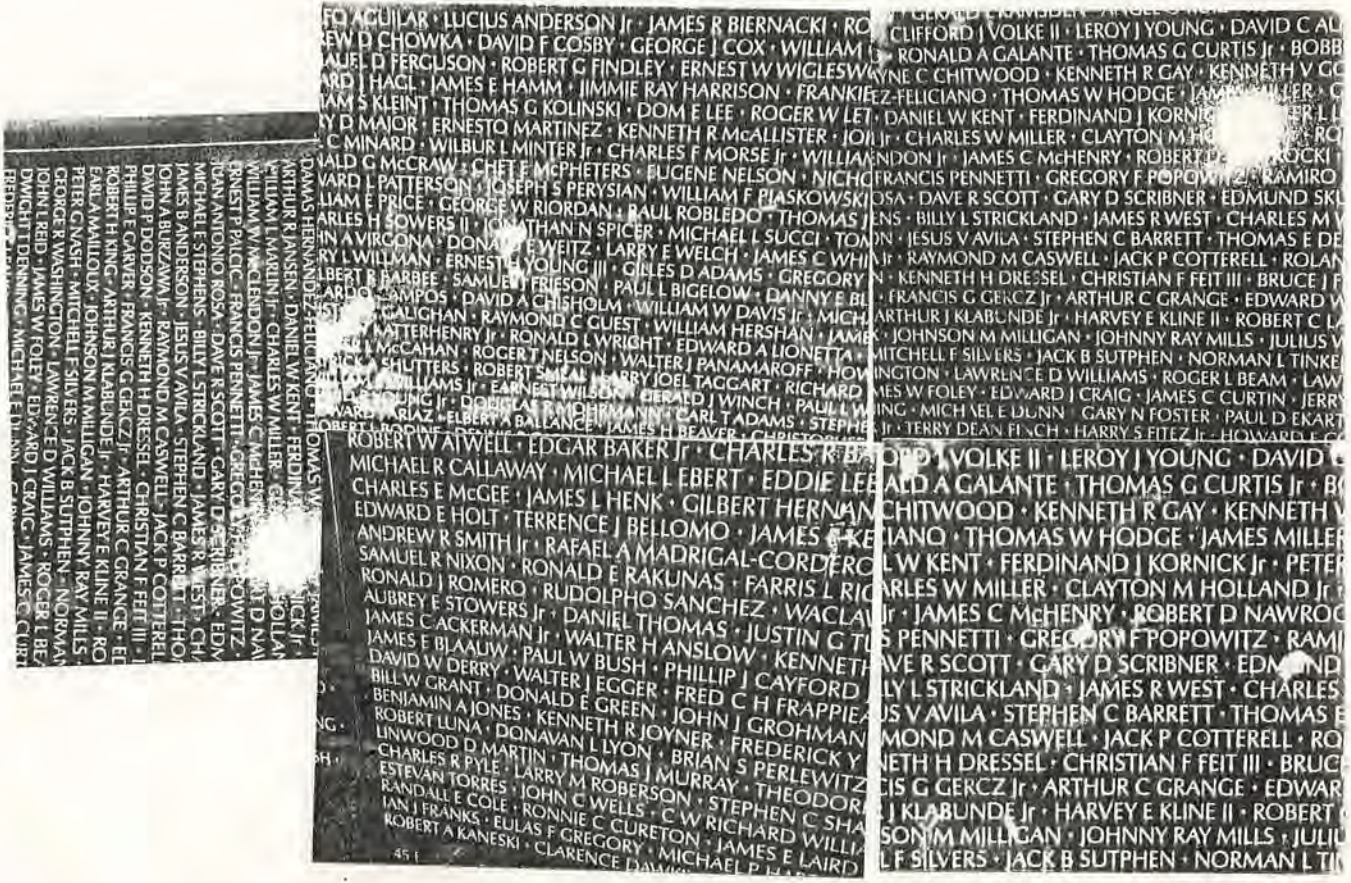
THOSE WHO DIED BECAUSE OF KHE SANH

Compiled by Chaplain Ray W. Stubbe

Memorial Day 1985



The attached is a listing of 470 men who died because of Khe Sanh: killed there, died subsequently because of wounds received there, and who died within five miles in aircraft arriving or departing Khe Sanh. It is based upon memorial bulletins of memorial services conducted within a few weeks of leaving Khe Sanh and upon review of the 3d Marine Division G-1 Casualty Section log at Quang Tri. It covers the period of August, 1967, through April, 1968, with a few additions of persons known killed in June and July, 1967.

The following units have been checked:

1/26, 2/26, 3/26, 1/9
B Co, 3d Reconnaissance Bn
C Co, 3d Medical Bn (none)
B Co, 3d Tanks Bn (none)
3d Anti-Tanks (Ontoss) (The Bn had dissolved; those ontoss personnel in Khe Sanh were the last of the Bn)
A, B, C, & W Batteries, 1/13
A Co, 3d Shore Party Bn
H&S Co, 3d Shore Party Bn
CBMU-301
Hq Battery, 1/12
Hq, 26th Marines Regiment
Hq Bn, 3d Marine Division
CAC OSCAR

Among the many units not checked include the following:

All Army units: dusters, quad 50s, FOB-3, USSF A-101 (Lang Vei)
FLC: LSU, Graves, EOD
All Navy, Marine Corps, and Air Force air units
1st Radio Bn, III MAF
5th & 7th Comm Bn

Additions to the attached listing:

19 JUL - 1 Vietnamese officer
25 JUL - 5 men from SOG/Khe Sanh
15 OCT - 5 men in fire/crash of C-130
02 NOV - 1 Nung from FOB-3
19 NOV - 1 Nung from FOB-3
29 NOV - 3 Brou Montagnards
13 APR - Mr. Polaine, the Frenchman, in plane crash at KSCB
22 JAN - 38 from MACV Detachment 19, Quang Tri, in Khe Sanh Ville
07 FEB - 219 from fall of Lang Vei: 10 USASF, 5 VNSF, 165 CSF, 34 MSF, 5 interpreters
15 APR - 148+ from Operation PEGASUS: 59 USA, 51 USMC, 33 ARVN (While the listing includes 26th Mar (rein), it does not include 1/1, 2/1, 2/3, and attachments)
06 MAR - 5 men from 1st Radio Bn operating out of III MAF and 19 USAF crewmen and others on the C-123 shot down on 06 MAR (30 of the total 44 Marines and 5 USAF are listed)

The census of the Brou Montagnards in July, 1967, was 8,930. In addition, there were reports from many sources that many more migrated into the Khe Sanh area from just inside Laos when the conflict began. There were also 500 Laotians plus their dependents when the 33d Laotian Elephant Bn was overrun and took refuge in Lang Vei village. Only approximately 5,000 Montagnards made it safely to the Cam Lo refugee village. It is therefore a very conservative estimate that over 5,000 Brou Montagnards were killed during the siege.

Intelligence reports based on testimony of captured enemy personnel, who, for example, stated that they saw 60%+ of their units annihilated by B-52 air strikes, and that those who did not die immediately, died several days later from internal hemorrhage, all indicate that a very conservative estimate of enemy killed, mainly through B-52 strikes and artillery would be 15,000 enemy killed. (Note: General Westmoreland in Time Magazine, 12 Apr 68, Vol. 91, No. 15, gives the figure of 15,000; the 1969 Armed Forces Report, p. 23, gives the figure as 10,000).

All this gives a rough, and conservative, number of deaths because of Khe Sanh, and only during the indicated period, of: 20, 897 killed.

(This, of course, does not include those killed from 1962 through the costly battle for the Khe Sanh Hills of 1967, nor those killed subsequent to the indicated period during Operation SCOTLAND II).

The apparent discrepancies between 470 and officially-reported figures (100 or 200 killed) may be attributed, in part, to the disregard for those who died of wounds received at Khe Sanh after they were evacuated and those who died, e.g., in the C-123 plane crash of 06 March.

The attached consists of two lists: one alphabetical with rank, name, unit, date of casualty, and location on the Vietnam Memorial in Wash; the second list, beginning on p. 10, is a listing arranged by appearance on the Vietnam Memorial, roughly a chronological listing.

MEN WHO DIED AT KHE SANH (AND WHO DIED OF WOUNDS RECEIVED AT KHE SANH AND WHO DIED IN AIRCRAFT NEAR KHE SANH) JUNE 1967 - APRIL 1968

VETERANS SALUTED, 10 YEARS LATER

The Washington Post, Wed, May 8, 1985

UNITED PRESS INTERNATIONAL

New York throws a belated welcome-home party, with 25,000 veterans of Vietnam war—many in jungle fatigues—marching in ticker-tape parade and hailed by huge crowd. Among the marchers: retired Gen. William C. Westmoreland, 26 Medal of Honor winners.

LETTER PROMULGATING SECOND EDITION OF *BATTALION OF KINGS*

During the three years since the publication of the first edition of this book, several dozen persons have contributed new materials on some of our casualties as well as the action in which they were involved. There have also been a few corrections of fact. For those who made these contributions, the memories of our fallen comrades are enhanced. Many years ago, I read the preface of a book memorializing dead from a much earlier American war which noted that although monuments have a lasting reminder to succeeding generations, what our fallen comrades really need is descriptions of them as persons and not simply names. It has been the effort of this book to preserve the memories of our fallen brothers in terms of their words, their hopes and dreams, their personal characteristics—what stands out when we remember them. For this reason, poems, letters, memoirs, and other notes have been included. In addition, the more general background of what was happening, the setting, the context, which may explain why certain actions happened.

This second edition incorporates several major revisions and also corrects typographical errors present in the first edition.

Copies of the first edition, limited to 850 copies, were distributed to family members of our fallen comrades and to libraries and archives to help ensure the preservation of our story and the memories of our fallen.

Again, should any be motivated to submit new information, it may be used for a future reprint of this book. Please submit them to me at the address in the letterhead.

RAY WILLIAM STUBBE

Excerpts from Letter Promulgating the First Edition:

Memorial Day 2005

The attached book, *Battalion of Kings*, is sent to you with the compliments of the author.

The primary purpose of this book is to preserve the memory of our fallen brothers who "bore the burden and paid the price," to quote from President Kennedy's inaugural address. While it covers the entire period of American involvement on the battlefield of Khe Sanh, from 1964 through 1973, the focus is on those who died rather than a complete historical account. This is military history written from the perspective of war's casualties...

Included are various poems, letters written from Vietnam, memoirs by family members and fellow servicemen, and accounts of the background for the incidents—the bigger picture which may help to explain why the action happened, why a specific unit or person was involved, and what happened. Hopefully, this will preserve the memory of our brothers as real persons rather than simply a listing of names, as well as an account of what was the situation which they had to face. The effects on those who survived who were also involved, who also knew these men, should be an obvious affirmation of the adage that "for those who fight in a war, it never ends." In a very real sense, those who we knew who didn't return home, have been buried not in the ground, but in our hearts and live there as long as we live. Nikos Kazantzakis, writing a summary of his life's work, notes that his grandfather "..will live inside me as long as I live. We shall die together. This grandfather was the first to make me wish not to die—so that the dead within me should not die. Since then, many departed dear ones have sunk, not into the grave, but into my memory, and I know now that as long as I live they shall live too." (*Report to Greco*, pp. 29-30).

The Holocaust survivor, Elie Wiesel, writing soon after 9/11, writes that we confront violence best through memory; he writes, "In recalling an event, I provoke its rebirth in me... To live through a catastrophe is bad; to forget it is worse." What these good men did shall not pass into oblivion! Hopefully also, this book will provide healing and assistance to those who survived, who struggle with the VA in making claims and in being able to understand a fuller picture of what happened. Although the tragedies and pains do not disappear, they can be put into a larger context, and this sometimes helps.

I write this as a Chaplain, caring for those who hurt and commending to the source of life and love those who didn't return to live among us, to contribute to families, to society, to culture, to posterity. These live in us, as Kazantzakis writes. For those who write memoirs, poems, and provided information on them, their memory is preserved. Unless an account is written down, it didn't happen—as far as history and posterity are concerned.

God bless us all!

Ray William Stubbe

POEMS:
Chiseled Memories 489
Beholding the Wall Beholding God 489
A Prayer 490

Khe Sanh, an enchanted place of beauty, almost a "Garden of Eden" filled with lush vegetation, exotic animals, spectacular natural beauty of mountains and clouds, with primitive tribal people friendly and so uncorrupted they didn't know to steal, remote—even isolated—from vexing artificialities of social conventions and expectations, an apparent place of "peace" and tranquility, soon became a place of unspeakable terror and unimaginable horror, a place where many thousands perished, a site shrouded in its genesis in the violence of crashing tectonic plates and volcanic eruptions. It was here, in the darkness of death, that the light humanity reflects glimmered in comradeship welded in the heat of battle. It was here, under the immensity of pressure that the ordinary was transformed into diamonds—ground into our souls forever shining and glimmering in dreams and daily thoughts, abrading, ulcerating, yet enriching. It was here that so many were buried forever in us and live in us as long as we live. This book is meant to be a permanent (and hopefully adequate) tribute to our fallen brothers, remembered not simply as numbers or even just names, but in terms of real people with personal characteristics and hopes. We remember, as individuals, what is summarized in numbers that reflected what happened on the battlefield of Khe Sanh, Vietnam:

PERIOD	ARMY	MARINE	NAVY	AIR FORCE	CIVILIAN	TOTAL
1964-1966	11			12	2	25
1967: JAN-23 APR		25	2		116	143

TOTAL AMERICANS:	472	1391	57	42	135	2097
TOTAL BRU:					APPROX:	10,000
TOTAL NVA:					IN EXCESS OF:	10,000

This book tells the story of the major battle of the Vietnam War in human terms (rather than strategy, tactics, political implications, etc.). Not only individual deaths, but how that death affected others, and continues to do so, makes the implications of President Kennedy's statement about bearing any burden and paying any price to ensure freedom profound beyond mere words. In our fallen brothers we know the meaning of "Greater love has no man than this, to lay down his life for his friends." [John 15.13, understanding "love" as a verb, not a noun, as an action, not a feeling or a thing].

Ἀρηιφάτους θεοὶ τιμῶσι καὶ ἄνθρωτοι
--Heraclitus, Fragment 102 (born 500 B.C.)
("Gods and men honor those who are killed in battle")

PREFACE TO *THE FINAL FORMATION* (1995)

IN MEMORY

We remember now our brothers who died because of what happened at a place called Khe Sanh in the country of Vietnam. It is appropriate for us who are veterans of those events to do so. It is incumbent upon us who carry the precious memory, however also painful, to ensure these men and what they did are not forgotten.

For those who served at Khe Sanh, this list may assist to piece together just what happened in the chaos of battle. This list may prompt you to face your pain and, knowing the truth, be freed. This list may help you find a name of a close friend, perhaps even someone who saved your life—a name that you perhaps have since forgotten—so when you visit the Memorial Wall in DC you may be able to pay your respects—to touch the name, make a rubbing, place a flower or memento, shed a tear, say a prayer, to pause, to reflect. Hopefully, this list will facilitate closure of open wounds that do not heal.

Names cast in bronze, engraved on a wall
Faces branded upon our hearts
We cannot forget; we know them all
Soul-seared scenes that n'er depart.

Perhaps this listing will finally put to rest the question of casualties at Khe Sanh: how many there really were. Perhaps this may enlighten others to appreciate, however limited, your experience there, so as a World War I poet (E.M. Walker) put it:

Now you are one with us, you know our tears
You have tasted of our hopes and fears..

For those who did not serve at Khe Sanh, this list will reflect the cost of battle; it indicates the burden and the price of serving. When President Kennedy declared in his Inaugural Address of 20 January 1961: "..we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and the success of liberty.. and so.. ask not what your country can do for you; ask what you can do for your country," perhaps we really did not comprehend the magnitude of the price and the greatness of the burden when these very words motivated so many to go to Vietnam. How can one read through these pages without realizing just how good and decent these young men were who gave so much, who cared so deeply about others? Although the full story surrounding each loss is not provided—not enough books could contain a full description of all—these are written that you may know the degree of caring, sacrifice, giving, service, and dedication that was the common characteristic of all and reflected in the last moments on earth by those among us who died. Alongside such dedication, however, remains the horrible nastiness and brutality of war, of which US Confederate General Robert E. Lee once remarked in 1862 after watching the slaughter at Fredericksburg: "It is well that war is so terrible or we should grow too fond of it." For those who were not at Khe Sanh, may this confrontation with the specter that jolts into greater appreciation those who fight the wars to which politicians and civilians send them as so many "hot hearts for chilling deeds" [Sophocles, *Antigone*[1]], and greater soul-searching deliberation before committing them.

Listen
Listen close
there is a voice for each and every name
a silent picture for a distant friend
a memory shared with subdued words
timeless conversations easing the pain of loss
left behind
yet carried where weary feet drag
through the passage of time
And its sudden stopping
imparting a message to the stunned
the living those stumbling for meaning
crying in their relief
mourning the loss
Avoiding the answer
of when
of who
of why
Tomorrow or today
for some even yesterday
And then there is the future
the utterance of all
Of companionship
And Love.

[Poem by Talis Kaminskis, 1994. Talis served with CAC OSCAR at Khe Sanh]

In a much greater purpose, however, this special listing is neither to prove a point to posterity, nor to benefit those of us who still remember and cannot forget; this document is really for our brothers. It is to honor these men who died "because of Khe Sanh," that this listing has been compiled, out of love to them and respect for them.

KHE SANH
FIRMLY STOOD
THE FEW
COURAGEOUS
SHARING LIFE IN SERVING
SERVING LIFE IN SHARING
VICTORIOUS
SEMPER FIDELIS

By far the greater number are those who died thinking of others, that others might live. Not all died in some especially heroic manner; some were simply ensnared in webs of death spun by others, and yet were involved in living to serve which is why they were there. For the most part, these are ordinary men involved with their destiny of extraordinary deeds and circumstances. Heroes always change what is, confront that which means life-or-death

[1] Line 88. [In *Loeb Classical Library*, Sophocles I, p. 320].

for others, and transform the situation by their personal involvement in it. These are real people yet great people, ordinary people yet extraordinary. These are people who make a difference.

One Khe Sanh vet stated: "..he was more than just a battlefield statistic. It's funny how an average person reading books about a particular battle—these KIAs are just statistics or names. But every KIA had somebody in their outfit that could tell you a personal story about them." [Daniel O. Allen]. Kevin Macaulay says: "We are all better persons for having known them."

A fourth reason for these lists is to note the trauma of those who were near their friends who died and who have harried these memories. "Surely, he hath borne our grief and carried our sorrows." [Isa 53.4]. One vet declares: "We are the tears of those who died." May those who read this document gain a greater appreciation of those who lived these experiences and now carry these memories since for some, the memory is like a scratch in a LP record that repeats the same portion of a melody. Maybe this list will enable the picking-up of the playing arm so that the song of life may continue!

Finally, it would be appreciated if you, the reader, would relate stories of these herein, especially of those who have no story of the circumstances surrounding their death indicated, and also if you are aware of additional names to add to the list of those killed because of Khe Sanh or the list of those who died after having served at Khe Sanh. For some of these, their delayed death is but a "Died of Wounds" received at Khe Sanh, perhaps in the form of a cancer or emotional trauma. We need this for our historical records and also for possible follow-up printing of what you might add in the form of an updated version of this document. Send to: Rev Ray W. Stubbe, 8766 Park Viet Ct., Wauwatosa WI 53226.

—Ray W. Stubbe, 30 September 1995

PREFACE TO FIRST EDITION OF *BATTALION OF KINGS* [2005]

The title, *Battalions of Kings*, refers to the quantity of those killed because of Khe Sanh with a Marine battalion numbering approximately 1200 men, and the word "kings" was one of the brevity codes used in radio communications to report a man "killed in action." For this author, the word also has a connotation of a man demanding respect and with a degree of power.

In the eight years following publication of *The Final Formation*, several dozen have submitted additional information concerning those who died because of Khe Sanh. These additional comments have been incorporated to enhance the effort of portraying each man as a real person with hopes, characteristics, abilities, not simply a list of names or a statistic. A focus on each individual, and the immensity of the cumulative impact, cleanses one from lubricious passing over their loss, as Goethe wrote: "I am rent to the core by this simple one's suffering; you pass carefree over the fate of thousands."[2] Family members have written of their son, father, brother, uncle, and veterans have written of their friend, their buddy, the one who shared their bunker, and of their last words and actions.

This revision, while far from providing comprehensive descriptions of each skirmish, still provides more contexts so that non-veterans may better understand what was happening. More details concerning the incident of their loss—details which are not provided in military histories—have been submitted by those who were with them in their last moments. Some of these are very precious, tender, reflecting depths of humanity, some are filled with horror:

"There was one guy in our 81s. I guess he got a direct hit. He was by himself in a mortar pit, and they couldn't find enough of his body to list it as him. Three weeks later we were filling sandbags and we found an ear, and we were by then—nobody really worried about that stuff, and we just went ahead and stuck it in the sandbag."[3]

For those living on Hill 881-South during the siege battle, KIAs were unable to be evacuated due to heavy NVA mortar attacks whenever a helicopter landed. For sanitary purposes, a "body bunker" provided a temporary mortuary:

"The body bunker was located between the two machinegun positions over on our sector of the hill, the Second Platoon sector and had been abandoned because of the poor construction. It was narrow, and it was too high and the parapet of this bunker just wasn't made properly to house a machinegun. We had no other facilities or no other bunkers in the trench-line in which to put our mortally wounded, and this is what became known to us on the hill as the body bunker. We would stack them up, and later on, it became full... Later, when the body bunker became full, we started stacking them in the area where the water buffalo was, behind the warming tent. This was a small, flat area of ground. They had placed a cargo net in this area, and we would stack them in the cargo net like you would stack logs for building a log cabin. We would run three or four bodies in one direction, and three or four or five in the opposite direction, and a helicopter would come in. They would hook up the hook on the rings of the net to the bottom of the helicopter and the bodies were taken down to Khe Sanh that way.."[4]

Numerous family members noted they received so little information when initially notified and had subsequently learned little. Many veterans, especially those

[3] Conversation with William Jabusch, 21 February 1990. Bill died 08 Nov 1991 from a brain fungus after receiving a bone marrow transplant. He had served with H&S/3/26.

[4] Taped comments of Mr. James E. Schemelia to the author, 01 August 1984.

who were medically evacuated, never knew what happened to others. Some veterans, filing for claims with the Veterans Administration, only knew a first name, or couldn't be specific about a date. Due to the silence of returning veterans, many family members really didn't learn of the immensity of the experience of their loved one. Most Americans had little appreciation of the loss, not as a statistic, but in human terms. For many others, memories had been deeply buried and only reappeared in dreams or motivated behaviors which diminished fullness of life, plunging them into Post Traumatic Stress Disorder. Not only have we been slowed down by the burden of their loss, but we also have been enriched: "The tomb of a hero is in the hearts of the living."[5] Elie Wiesel, a survivor of a World War II concentration camp experience, wrote: "To live through a catastrophe is bad; to forget it is worse."[6] Great effort has been made, starting with the Vietnam War, to remember individuals (e.g., on the wall of the Vietnam Memorial in Washington, D.C.) and to account for all the Missing in Action through the efforts of the Joint Task Force—Full Accounting. In some cases, although the physical remains have not been recovered, memories still vividly are always present to survivors. An officer who worked in the Pentagon's Missing in Action section, once noted:

"The acidity of the soil will let them know a chance in a million of finding a bone. Some of the soil in Laos I know specifically—if the body wasn't wrapped in a poncho, it's gone. They threw them in a shallow grave, and they're gone. The acidity of the soil, the wild animals, the predators, sometimes the local villagers—the bones are gone. We had a recent incident where we went in and interviewed villagers in Laos and they said, Yeah, our medicine men dug them up and made aphrodisiac potions with them."[7]

On Memorial Day, veterans and surviving family members resonate with the words of Jeremiah: "Is it nothing to you, all you that pass by?"[8] The cost paid and the burden borne, so soon forgotten, needs to be remembered. The Hebrew word for "remember" [*zachar*] does not refer simply to recall something mentally, but to recall it in order to motivate and shape action. The motto of the War Memorial in Milwaukee, WI, suggests appropriate remembering: "To honor the dead by serving the living."

Hopefully this book will bring resolution to unhealed wounds and lingering doubts, will provide a caution against those who rush to war without counting its cost, and will be a suitable tribute, even encomium, to our fallen brothers.

Lieutenant Colonel Fred McEwan, Commanding Officer of First Battalion, Twenty-Sixth Marines, at a memorial service for the KIA of 1/26 conducted at Wunder Beach, said:

"..In this service, we have honored not only those who have died at Khe Sanh, but all those who were there. We have fulfilled our promise to the families of our Marines killed in action. Equally important for you men of this battalion is the fact you will always remember the Battle of Khe Sanh. You will live with it for the rest of your lives and in so doing, you will always remember those who gave their lives.

"To each of you men who were there, I have this to say. For three months, the eyes of the world looked at you and the enemy, who was unable to claim success. At another outpost and milestone in Vietnam's history, this same enemy claimed success at the battle of Dien Bien Phu and with it fell half of Vietnam. Had Khe Sanh fallen there would have been far reaching effects. But Khe Sanh held. You held Khe Sanh living in the trenches, constantly subjected to heavy bombardment by mortars, rockets, artillery, recoilless rifle and sniper fire. You held because of your fighting spirit and indomitable courage. May God bless you and return you safely home."[9]

It is again requested that should you, the reader, wish to contribute further information concerning a particular man mentioned herein or further data concerning the loss, that you provide that information to: Rev. Ray W. Stubbe, 8766 Park Viet Ct., Wauwatosa, WI 53226-2729, for inclusion in some future revision of this book.

THE KHE SANH BATTLEFIELD

The men included in this book perished on the "Khe Sanh battlefield" or who died because of Khe Sanh. This area covers most of western Quang Tri Province of South Vietnam. For the North Vietnamese Army[10] the Khe Sanh battlefield during the 1968 siege battle at Khe Sanh included not only that area, but also three adjacent Lao-

[6] Wiesel, Elie, "How Can We Understand Their Hatred?" *Parade Magazine*, 7 April 2002, p. 5. Wiesel's article focused on the 11 September 2001 terrorist attack and concluded that fanaticism must be faced by fighting indifference through education and diminished through compassion. The most efficient remedy is memory since memory provokes rebirth of the event or person which opposes constrictions and limitations felt by the fanatic so that nothing confronted today is final.

[8] Lamentations 1.12.

[9] Printed in the *Khe Sanh Veteran*, 2:1 (Fall, 1995), p. 8.

[10] The term, "North Vietnamese Army" (NVA) in American parlance refers to the army (and individuals in it) that operated from the country of North Vietnam during the war. This army referred to itself as the Peoples' Army of Vietnam (PAVN). Since the readers of this document are mainly veterans of that war or next-of-kin of those who fought in it, the term "NVA" will be used to avoid confusion.

tian districts as well.[11] The Khe Sanh battlefield was designated the H-2 "direction" of the B-5 Front, and the secret designation of the Khe Sanh battlefield was "B5-T8."[12]

For American forces, the term "Khe Sanh battlefield" included the Khe Sanh Combat Base (KSCB),[13] its supporting outposts: Hills 552,[14] 558,[15] 861 and 861-A,[16] 881-South,[17] 950,[18] the Combined Action Platoons of Combined Action Company (CAC) OSCAR, headquartered (along with the Advisors of MACV Advisory Detachment 4 and the Joint Technical Advisory Detachment, (JTAD),[19] and Lang Vei.[20] Beyond local patrolling from these positions, long-range operations originating from these positions radiated out to areas reconned by Project DELTA in late 1966, the Detachment of 3rd Force Reconnaissance Company in early 1967, liaison with BV-33 in Ban Houei Sane, Laos, for which 26th Marines had artillery support requirements, areas patrolled by Project TIGERHOUND aircraft from the KSCB airstrip into Laos, and the areas patrolled by teams from FOB-1 using KSCB as a launch site and from FOB-3 into Laos. Later, Fire Support Bases in late 1968 through 1970 and mobile operations generally covered a more extensive area, as did support of Vietnamese units for Operation LAMSOM-719 in early 1971.

The Headquarters for the NVA Corps-sized operation waged against KSCB in early 1968 was located at Sar Lit (also Sap Lit) in Laos.[21]

The borders of South Vietnam were, in fact, a matter of dispute. While we were prohibited from dispatching ground troops (but not small, time-constrained reconnaissance units) into Laos, the NVA freely flowed down the Ho Chi Minh Trail in violation of the 1961 Laotian Accords. North Vietnam did not regard the borders as definitive. The anthropologist, Gerald Hickey, researching mountain tribes in the early 1960s, noted: "The border wasn't too well defined up there. Half the time we didn't know which side we were on."[22] When the first Special Forces team arrived in Khe Sanh in 1962, the Medic, Gerald J. Howland recalls: "Neither Vietnamese nor Laotians knew where the border was, and they didn't care. We saw Laotian troops in Khe Sanh routinely then.

The CIA [Directorate of Intelligence, *The Continuing Communist Military Threat in Northern South Vietnam*, 13 March 1968, map] indicates this Headquarters at 9 miles west of the western edge of the DMZ. It was struck by B-52s on 30 January [WW Rostow memo to President Johnson, WR58, in LBJ Library, NSF, Vietnam Country File, container 66, 2A(1) I Corps and DMZ 11/66-1/68]. General Wheeler, CJCS, cautioned against any public disclosure of this attack since "any public statement.. would certainly compromise the source of the information.. No valid cover story can be developed. We have no ground reconnaissance resources which could be admitted to be in that area. While photographic interpretation could confirm a possible logistics complex, it would not support identification of a major headquarters." Furthermore, he added "approval for the strike was granted by American Ambassador, Vientiane upon condition that no publicity would be given to the strike." [General Wheeler 010207Z/FEB68, MAC 01463, in LBJ Library, 5EE(1) Laos 10/67-12/68, Doc #52].

[22] Conversation with Dr. Gerald Hickey, 31 August 1989.

They came in force."[23] A team leader with that first USSF unit at Khe Sanh, Jacques Standing, recalls a hilarious incident at Lao Bao when a Caribou aircraft came there from Thailand, and slid into the XePone River: "..the Lao came over and challenged us and said their border was on our side, and we said it was in the middle of the river, but they had more men than us—30, 40 people in fatigues with weapons. Then one of their Captains came up, who spoke English real good. He started mentioning names that we knew and everything else. He told us that he'd been watching us from across the river, knew we were in trouble, so he came over to help. It was crazy! The whole situation up there was crazy!"[24] A Joint U.S./Lao survey team attempting to resolve MIA sites attempted to travel to a particular site on 31 October 1992, was stopped due to a border change which was now at the 63 north/south grid line (instead of the 658 line).[25] In fact, as early as 1964, North Vietnam claimed a border as much as six miles into Laos, thus assigning to Vietnam the area of jungle trails of the Ho Chi Minh Trail. A CIA document indicates: "In 1954 and again in 1958, North Vietnam followed up its claims by moving troops into the region, cited historical precedents dating from 1428, and termed the disputed area "uninterruptedly part of Vietnamese territory."[26]

Dispute concerning the location of the DMZ had a long history. During the Conference of Berlin (the Potsdam Conference), at the conclusion of World War II, General Marshall asked Admiral Mountbatten (UK) what he thought of the idea of splitting French Indo-China into two and placing the southern half, south of 16 N, in the Southeast Asia Command. Admiral Mountbatten concurred.[27] (The northern portion would be under control of China). The precedent for portioning Indo-China was established.[28]

During the Geneva Conference, the dividing line became a matter of dispute. While the Vietnamese representative, Dong, was ready to go as far as the 16th parallel running just south of Tourane, (DaNang), the French representative, Mendes-France, insisted on French control of Tourane (DaNang) and Hue as well as control of the road (Route 9) running from Quang Tri to Savannakhet in Laos. Mendes-France insisted on the 18th parallel (Dong Hoi area).[29] According to classified French documents, Chou-En-Lai took the general view that Vietnam should be split. Giap said, "Split at the 16th parallel," and Mendez-France said, "split at the 18th parallel." Molotov said, "Then we agree that the split should be at the 17th parallel."[30] Bernard Fall indicates that Molotov's suggestion "..has been explained by the conciliatory role played at Geneva by the U.S.S.R., which in 1954 was trying to induce France not to join the European Defense Community."[31] On 20 July 1954, the 17th parallel was adopted.[32]

WHY WERE WE AT KHE SANH?

Millions of years ago, when the Kontum Massif slammed into the shallow seas of what is now Laos, the rugged mountain range known as the Truong Son Mountains (or the Annamite Cordillera) was formed as the land masses crumpled and rose, forming such cliff-like features as the Co Roc Massif. Despite monsoon rainfall, these rugged mountains remained as almost impassible barriers except

The Provisional Demarcation Line was fixed as follows: from East to West: the mouth of the Song Ben Hat (Cua Tung) River, and the course of that river (known as the Rao Thanh in the mountains) to the village of Bo Ho Su, then the parallel of Bo Ho Su to the Laos-Vietnam frontier. A 5-kilometer demilitarized zone on either side of this line was established. [*Documents Relating to British Involvement...*, p. 16]. The line was approximately 60 kilometers (roughly 37 miles) long.

for a few major passes: the Ban Karai[33] and the Mu Gia Pass[34] far to the north, and the D'Ai Lao at Lao Bao[35] approximately 9.5 miles west of KSCB.

It is this latter mountain pass by which attacking armies moved east into central Vietnam (the country of Annam) and from it, attacking westward. In 1282 the Mongol General, Sogatu, followed the route through Lao Bao along the present Route 9 passage to attack westward.[36] The Mongols attacking the Chams[37] forced them into the mountains. From the mid-18th Century, the Annam kings, Vo Vuong (1738-65) and Gia Long (1802-20), extended Vietnamese authority into the highlands of the present Savannakhet Province of Laos by moving through the D'Ai Lao Pass moving into Tchepone.[38] In 1827, the Thai moved through the D'Ai Lao Pass and the Vietnamese abandoned their positions, fleeing to Cam Lo.[39] The French stopped the advance of the Siamese [Thai], and in November, 1890, Captain de Malglaive reoccupied D'Ai Lao.[40] This pass provided a strategic choke point through which invading armies flowed east and west for centuries. In 1954, a French column going from Laos back into Vietnam was ambushed at Lao Bao by Viet Minh, with much bloodshed.[41] In 1960, William Colby (later Director of the CIA) picked up an automobile in Hue and drove with his son and a friend from Hue to Lao Bao finding it heavily jungle-covered and abandoned.[42]

There was also a political consideration as well as a warning that the paradise of the Khe Sanh area contained within it much suffering and death. Lao Bao became the site of a prison to which Christians were sent to their death, constructed on order of Minh Mang (1820-41).[43] On 25 May 1834, Father Odorico died of hunger here after no one had been permitted to bring him anything to eat or drink.[44] A Century later, in 1896, the French established the prison at Lao Bao as one of their two major penitentiaries with a space for 250 prisoners.[45] In 1915, a prison revolt due to forced laborers having sharp tools destroyed the Lao Bao prison.[46] In 1934, a Communist document was confiscated at Lao Bao which enunciated the power and sophistication of communist prison organization; such prisons were routinely described as revolutionary schools.[47] Harry Hervey, writing of his travels in the area in the 1920s, noted the prison at Lao Bao was as grim as a medieval fortress, housed some hundred or more native criminals, and was administered by a guard of Annamite troops and one white man.[48] Over the entrance was a plaque commemorating the bravery of the prison guards during the 1915 mutiny. His description is chilling: "The convicts lay in rows on broad

[37] The Chams established their kingdom in 192 AD with their capitol in what is now Hue City. They continued to move northward, replacing the original aboriginal tribes which were pushed into the hills, like the Bru, and conducted raids into the area around what is now Hanoi. In the Centuries following there was almost continuous warfare in what is now Quang Tri Province between the Chams and others. The Chams were known for their fierce, war-like quality as pirates, and for their artistic style (During the Vietnam War, there was a Cham Museum in DaNang housing specimens of their art). When the Mongols invaded in 1282, the Chams moved westward into the mountains. [Hickey, *op. cit.*, p. 85]. Of note, the place name on the maps where KSCB is located is "Xom Cham," (i.e., "village of Chams").

[48] Hervey, Harry, *King Cobra, An Autobiography of Travel in French Indo-China*, New York: Cosmopolitan Book Corp., 1927, p. 278. Hervey was born 05 November 1900 in Beaumont, Texas, served 3 mo. as a 2nd Lt in 1918, wrote 15 books and about 70 short stories on his numerous travels in Asia, Africa, Europe and South America. For some months he studied in a Buddhist monastery in Burma, lived in the homes of natives, and visited Asiatic rulers. The late Dr. Sun Yat-sen was one of his friends. He led an expedition into upper Indo-China in 1925 and discovered additional Khmer ruins. He remained unmarried and died 12 August 1951.

wooden slabs built against the walls, with cangues about their necks and their feet thrust into stocks. Smoky lamps half illuminated the two great wards, casting a soiled reflection upon the many faces... The whole scene swam in a nauseating stench."[49] Between 1930 and 1932, Giap along with his brother, Vo Thuan Nho, and several other influential Viet Minh were imprisoned at Lao Bao, a period of his life which he always passes over in silence.[50] One can only wonder whether General Giap's negative familiarity with this area may have informed his subsequent actions! Another inmate of the Lao Bao Prison was Ho Chi Minh himself.[51] In the late 1950s, the American Advisor to the 1st ARVN Division at Khe Sanh, Captain Eugene Hardy, found Lao Bao's ruins to contain rectangular boxes, like ovens into which they put prisoners, closed them, and slowly cooked them.[52] Major James Whitenack, Senior Advisor for Huong Hoa District March-December, 1967, recalls: "They had walls that were 20 or so foot thick. They had cells in one area exposed to the weather and the elements—no roof other than bars on the top. You could walk into a hallway with doors going into these cells completely open to the weather, open to the sun, the rain, the weather."[53] Major Fred Patton, commanding the element that would eventually become FOB-3, surveyed the Lao Bao site and concluded that it would be perfect for the new FOB-3 unit: "The walls of the fort itself were pretty well intact except on one corner and they had all kinds of heavy walls still standing inside. It would have taken a minimal amount of materiel and effort to make one hellacious fort out there."[54] Patton flew to Saigon which disapproved the site, claiming it was within mortar range of surrounding high ground. "It was funny because a few months before that I had been in downtown Saigon waiting on a parade with [General] Westmoreland and we got run off the street by mortar fire!"[55] A Bru named Onya whose parents worked for the Poilanes and who was educated along with the Poilane son, Felix, in Hue University and thereby became a kind of unofficial leader among the Bru (although not really a chief since leadership was hereditary in the Bru tribe), "..was just beside himself [at the disapproval]. He said, 'I'll put 1500, 2000 men out here in nothing flat,' and he really looked forward to it."[56] As of April, 1990, the Vietnamese had established a prisoner camp at Lao Bao housing 400-450 inmates.[57]

In addition to the important D'Ai Lao pass at Lao Bao, the pass produced what was eventually to become QL-9.[58] In 1877, Dr. Jules Harmand, a Navy doctor and naturalist, led an expedition which eventually took him through the D'Ai Lao Pass and along a path that would become Route 9. By 19 July 1877, he had reached "Dinh" [the name for Lao Bao] "..which serves as a site for exile, much like New Caledonia, destined mainly for women, children and those convicted of political crimes by Tongking.. The place is extremely unhealthy.. to live in Dinh might seem a disguised death sentence without bloodshed. It appears that few survive more than four or five years under such miserable conditions." Escape into Laos was unthinkable due to intense fear that Laotians were cannibals.[59] On 03 January 1891, an exploration team led by Captain Malglaive and Inspector Odend'Hall, split with the latter moving by canoe across the Xepone River to the D'Ai Lao pass with Captain Malglaive moving overland from Tchepone to "Dinh, Ai Lao, or Lao Bao, three names to designate one ruin. There's nothing left there of the Annamite fort occupied only three years ago by a French post before the Annam returned entirely to their indigenous masters."[60] Only seven enlistedmen remained at Ai Lao who were left unsupported for food. In 1904, work began on construction of QL-9 under the supervision of Mssrs. Bourard, Assistant Public Works Engineer, and Captain Odend'Hal, Civil Service Administrator, and, following their deaths, Mr. Valentin, the Province Administrator. "Because of its location and its general layout, the Ailao Gap must have served, from time immemorial, as a means of communication between the two sides of the Annamitic Chain. Its advantages immediately struck the members of the Pavie expedition .. [which summarized].. Ailao is the isthmus between Annam and Laos, between the limestone of the North and the sandstone of the South, and, among the Indo-Chinese races, forms the junction of the three main ones: the Laotians, the Khas, and the Annamites. It's the economic key

to Indo-China, and can easily be linked to Tourane [DaNang], the best port on the Annam coast.."[61]

In addition to this strategic mountain pass and development of a highway through which invading forces could rapidly move east into the populated areas of Vietnam (Cam Lo, Quang Tri, DaNang), political events in neighboring Laos portended ill. Following the coup of 09 August 1960 led by Kong Le who overthrew the Laotian government of Prince Tiao Somsanith,[62] the city of Tchepone[63] soon became a target and was reported captured on 01 May 1961.[64] On 02 May, South Vietnam took emergency counter-measures due to the overrunning of Tchepone by Pathet Lao and North Vietnamese forces and moved an infantry battalion to Lao Bao, and on 04 May, a 150-man special forces group, in civilian clothes, penetrated about six miles into Laos to aid Laotian government troops withdrawing eastward from Tchepone toward the border.[65] The South Vietnamese forces withdrew to the border on 23-24 May.[66] The Khe Sanh area now emerged as significant for the Communist strategy developed in the 1950s and 1960s which dictated capture of periphery territories and working backwards towards centers of power. The plan was to "find its bases far from the capital and gradually work inward against the government in hope that after a number of years it would be strong enough either to assault the capital itself or bring the government to its knees in a protracted struggle."[67] QL-9 became the principle east-west infiltration routes, intensively employed since the end of 1958 by Communist forces.[68] The enemy situation during the summer of 1961 gave indications that North Vietnamese forces would push eastward along Route 9 toward Hue.[69] Urgently, the situation reflected a menace and the Chief of the MAAG [Military Assistance and Advisory Group], Vietnam, was "..convinced that this guerrilla war cannot be won by free world unless effective steps taken to plug up porous border."[70] That the border might be incapable of being sealed almost doomed further American assistance and involvement in Vietnam. In late 1961, planners in Washington, D.C., explored the idea of introducing an international force to guard against infiltration from Laos into South Vietnam.[71] Chief of Naval Operations reported: "Current information from the Chief of the Military Assistance and Advisory Group at Vietnam indicates that Viet Cong infiltration is mainly overland through Laos. Since the fall of Tchepone, Communist forces have had free access to the Vietnam border by this secure and well concealed route."[72]

Exploratory efforts to halt this ingression became the focus of the biennial SEATO exercise,[73] TULUNGUN conducted 02 March – 12 April 1962 with the scenario:

"After the fall of Tchepone, Laos, to Pathet Lao and Kong Le forces, Aggressor used this route to infiltrate large numbers of guerrilla elements into northern Republic of Vietnam... Unable to copy with the overall deteriorating situation alone, the Republic of Vietnam government requested SEATO assistance in restoring order and government control."[74]

The Taylor Mission Report, proposing a "Frontier Force, Vietnam," indicated that as of the summer of 1961, the 325th North Vietnamese Division was just north of the 17th parallel and the 304th and 324th NVA Divisions were in the vicinity of Route 9. The Frontier Force concept included securing willing assistance of Montagnards to make infiltration along the 103-mile "hot" area impossible.[75]

[75] Letter from the President's Military Representative (Taylor) to the President," U.S. Dept of State, *Foreign Relations of the United States*, 1961-63, pp. 520-521.

Accordingly, a Special Forces "A" Team arrived at Khe Sanh Village and established a permanent camp there on 08 July 1962,[76] to check infiltration along Route 9 by North Vietnamese Army forces. It located just to the east of the village in an old French fortified hilltop that was neither secure nor easily defended, referred to as "the old French Fort."[77]

Thus began the permanent American military presence at Khe Sanh to "plug up" the hole in the porous border at the D'Ai Lao pass (Lao Bao) and preclude massive movement of enemy troops down Route 9 eastward toward Hue, a route taken in 1972 after American and South Vietnamese military had abandoned the area.

NOTE ON GRID COORDINATES

Military maps designate locations by following UTM (Universal Transverse Mercator) grids rather than longitude and latitude designations. Thus, for example, Khe Sanh Combat Base is designated as XD 849415 rather than 16°39' N 106°44' E.

The use of grid coordinates enables setting of artillery to strike accurately. In fact, while patrolling in a heavily canopied area such as at Khe Sanh, where it is difficult to see hilltops and thus orient one's location through compass cuts, patrol leaders occasionally requested artillery to fire a "registration round" on a specific grid coordinate, usually a WP (White Phosphorus) round. Hopefully, the patrol leader wouldn't call the fire on where he thought he was! When the round exploded, the patrol leader then could determine his location in relationship to the exploding round.

Also, the use of grid coordinates provides ease in communicating locations by radio, provides for designating locations where there are no roads or built-up areas. In the United States, land acquisitions such as the Northwest Territory, were divided into range and township lines following a grid system to determine accurate surveys of property.

The UTM system divides the surface of the world between 80° N and 80° S into large geographic areas extending 6° in longitude and 8° in latitude. Starting at 180°, each of these columns is consecutively numbered, from 1 to 60 proceeding easterly. The rows 8° high, are identified by letters are identified by letters, C through X (with the letters I and O omitted). (The Khe Sanh area is within the zone designated 48Q). These zones are then further divided into 100,000 meter squares by a series of two letters lettered A through V (I and O omitted), reading from south to north. (To compensate for the curvature of the earth, the first zone, "AA" does not cover a full 100,000 meter square. The first full 100,000 meter squares are in the next column, "BA," "BB," "BC," etc., moving north, and "BA," "CA," "DA," etc., moving east.) This partial alphabet repeats itself every 2,000,000 meters. North of the equator, lettering of rows starts with A at the equator in odd numbered UTM zones and with F at the equator for even numbered zones.[78]

Thus, references to a geographic area consist of a series of numbers, letters, and numbers. (The Khe Sanh area is in "XD," with "YD" being the next 100,000 meter square to the east. Thus, for the Khe Sanh area, the 100,000 meter square is "48QXD." For convenience, since consideration is not focused on a larger area, the "48Q" is omitted, and only the "XD" is used). Each square, increasingly divided by ten lines across and ten lines up and down, provides focus on smaller areas. For example [the added 10th line is underlined for illustrative purposes]:

48QXD locates a point within a 100,000 meter square

48QXD84 locates a point within a 10,000 meter square

48QXD8441 locates a point within a 1,000 meter square

48QXD849415 locates a point within 100 meters [the usual designation for Khe Sanh Combat Base

48QXD84934169 locates a point within 10 meters [location of the 26th Marines COC[79] during the 1968 siege battle]

When reading a grid designation, move right, then up.

Map sheets are named for the most prominent human habitation designated therein. Thus, the map sheet covering KSCB is named "Huong Hoa," and indicates a major population center southeast of Khe Sanh village (at XD865375). This village, however, is imaginary. Madame Madeleine Poilane (who lived at Khe Sanh for many decades, John and Carolyn Miller, the missionaries

Dept. of the Army Field Manual FM 21-26, *Map Reading*, 1969, p. 3-7 through 3-12.

[79] COC=Command Operations Center, the Command Headquarters, or CP (Command Post). In U.S. Army parlance, this would be designated as the "TOC" or Tactical Operations Center. [There are numerous differences between the language used by the Navy and Marine Corps on the one hand, and the Army and the Air Force. For example, the Army and Air Force refer to time using the word "hours," (as in "0800 hours") while the Navy and Marine Corps simply say "0800" without the word "hours" added. The Army and the Air Force refer to "inclosures," and the Navy and Marine Corps refer to "enclosures" the Army has "latrines" and "fatigues," and the Navy and Marine Corps have "heads" and "utilities."]

who lived at Khe Sanh from 1962-1968, Bruce Clarke, the senior District Advisor for Huong Hoa District, and those who occupied the Old French Fort position (within 1,000 meters from "Huong Hoa") do not recall a populated area there! James Moore (FOB-3) states: "I've seen the map. It looks like a built-up metropolitan area, but it was never that way. I asked Fred Patton about that because he was up there in '66 and I said, "Why do that call Huong Hoa?" He said, "That comes from something the French had on their old maps, and there was never a city there."[80] Allan B. Imes, Commanding Officer of the Special Forces team (A-728) that replaced Floyd Thompson, served at Khe Sanh in 1964, operating out of the old French Fort just east of the village, said, "concerning Huong Hoa village: "It's shown prominently on the map, but when you get there it's not there!"[81] Old French maps from the 1920s and 1940s indicate a "Huong Hoa" over the Highway 9 area between Bong Kho and Ca Lu, as an area name. The word "Huong Hoa" refers to "pretty flowers." No one who was there can ever forget the luxuriant beauty of the area, almost an enchanted, spiritual place, like re-entering the "Garden of Eden." And yet, with all the lurking violence—not only the enemy, not only the pervading sense of violence that perhaps traced its origin to the origin of the area since Khe Sanh sat atop an ancient, weathered caldera of a volcano, one of five in northern I Corps, but also the extreme dangers associated with raging rivers, malaria-bearing mosquitoes. (Malaria is thought to have originated in the area of Vietnam).

[There are several other inaccuracies on the map of the Khe Sanh area. For example, during the attack on Hill 950 on 06 June 1967, artillery attempted to strike the northern slope, furthest away from KSCB, but the rounds didn't clear the summit. A survey team from 2d Topographic Company in August, 1967, determined Hill 950 to be actually 963.29 meters high! At the same time, Hill 881-South was really only 856 meters high—perhaps because of all the 2,000 bombs that were dropped on it during the Battle of the Hills, and 861 was really only 837 meters high. The Combat Base at the main gate was 495 meters and at the eastern end, 475, indicating an odd slope rise of the airstrip for landing aircraft which flew uphill after touchdown.]

Khe Sanh Village resulted from the coffee plantations of the Poilanes. When Eugene Poilane arrived at what would become Khe Sanh village in 1918, following his military service in Saigon during World War I, and again visited it in 1921, the "village" consisted of only one house, the engineer who had built National Route 9, the first metal road to Laos.[82] Eugene Poilane introduced chairi coffee trees and tended them for ten years before they became productive. The Bru people were quite savage at this time, and terrified when he brought the first motarized vehicle down the road. The Bru women in those days wore dresses made from the bark of a poisonous tree, the sap of which was used to douse their hunting arrows to paralyze animal prey.[83] Initially, Poilaine hired Bru to work his coffee plantation, but as they proved unreliable, they were replaced by Vietnamese from the coastal areas to the east,[84] and thus arose the village of Khe Sanh, inhabited by approximately 1,200 Vietnamese by late 1967.

The name, "Khe Sanh," "Khe" meaning "stream" and "Sanh," (pronounced "schan," the "s" in Vietnamese having a "sch" sound, and the "s" sound designated by "x" as in the major river separating Laos and Vietnam at Route 9, the "Xe Pone" which is pronounced "Seh Pone.") The Marines from the summer of 1967 and thereafter mispronounced the place "Khe San" instead of the proper "Khe Schan." (Pronounced correctly, i.e., as "schan," the word does not mean "river.") This prophetic slip of the tongue might have portended subsequent history since the word "Xan" means "green." Where was the "green river?" It was the "green river" of green-uniformed Marines and green-uniformed NVA soldiers! The Bru designated the town as "Saran."

Time Zone

The Khe Sanh area was in the "H" (+7) time zone, exactly 12 hours difference from the time in Washington, D.C. (-5). Since World War II, with so many operations happening all over the globe, and with increasing micromanagement of military operations from the National Military Command Center (NMCC) in Washington, D.C., the use of ZULU time designations appears on most messages and reports of actions. ZULU, "Greenwich Mean Time (GMT) or "Z" time zone, is the one containing Greenwich Observatory in southeast London, England, through which 0° longitude passes.

Thus local time in Vietnam is designated as "H" and "Z" designations must add 7 hours in order to arrive at the local time. What was happening at midnight in Khe Sanh was noon in Washington, D.C., and vice versa.

Military time designated in messages (as in the footnote references in this book) use the date, time, and time zone, followed by the Month. This is called the "date time group," and is written, for example, as "200430H/Jan68" which refers to January 20th, 1968, at 4:30 AM. The same time, using GMT would be written as "192130Z/Jan68" (being seven hours different).

FEBRUARY, 1964

Monsieur Wolff Pharmacist

"In February, 1964, a French pharmacist from Dong Ha, Monsieur Wolff, had come to visit Monsieur Emmanuel Llinares who was sick. Upon going back down in his car, Monsieur Wolff was killed. They had taken him for an American, we thought."[85]

26 MARCH 1964

WHITESIDES, Capt Richard Lebrou

19th TASS, 34 TG[86]

Capt Whitesides departed Khe Sanh[87] at 1415H as a pilot of an O1F (L-19), #55-4695, on a visual reconnaissance mission scheduled for two hours with three hours of fuel on board. He crashed at XD890419 [in the area of the Llinares plantation]. His passenger, Captain Floyd J. Thompson, Commander of the Special Forces A-Team at Khe Sanh, was captured when he regained consciousness and discovered he was surrounded by a group of enemy guerrillas, one of which was trying to cut off his finger to obtain a ruby ring he was wearing.[88] He was told by his captors that the pilot had been killed. Thompson became the longest-held American POW of the Vietnam War, released 16 March 1973.[89]

[During April, 1964, Major Alfred M. Gray, Jr., accompanied by a few Vietnamese, conducted a preliminary recon in preparation for operation of the Signal Engineer Survey Unit, SESU. The unit consisted of 5 officers and 152 enlisted Marines,[90] from the 1st Composite Radio Company, augmented by a 76-man infantry detachment from Co G, 2/3, reinforced with an 81mm mortar section. SESU, designated as Advisory Team One, was "..the first actual Marine ground unit to conduct independent operations in the Republic of Vietnam."[91] Tiger Tooth Moun-

---

[85] Letter of Madame Madeleine Poilane, 18 July 1988. Emmanuel Llinares figures prominently in the subsequent losses of 1964. The plantation which he worked had originally been that of Monsieur Rome (listed on map sheet 6342 II, Series L7014, at XD 882394, approximately 500 meters south of Route 9, 2,000 meters directly west of Lang Kat (1) (XD 905395) and 4,000 meters directly east of Khe Sanh village. Intrigue blanketed this location. Both the wife and the gardener of M. Rome were Japanese and, with the arrival of the Japanese in the 1940s, they lived well, but then mysteriously disappeared. According to Mrs. Poilane (conversations in 1967 with the author), Mrs. Rome spied both for the Japanese and the Viet Minh on French positions and was killed, some say by the VC, other say by the French. Her body was never found, and the property reverted to the government, there being no heir. M. Llinares, settled on this plantation. Llinares was born in Montpellier in the Herant (northeast Pyrenees of France) [Madeleine Poilane ltr of 06 Jul 1990, p. 4], had become quite wealthy in North Vietnam, but having fled North Vietnam during the Passage to Freedom, lost everything, and had no great love for the North Vietnamese, according to Mrs. Carolyn Miller [comments to the author, 27 May 1986]. His wife, however, had contacts with the Viet Cong. A network of VC was discovered on his plantation, near the Rao Quan River, Bru living in the mountains far from Route 9, were resettled in hamlets near the road, and many defected to the VC, refusing to be resettled. Following a double assassination of two workers of Llinares in his house, the wife departed, demanded protection from the Province Chief in Quang Tri, and never returned to her husband. Col John D. Waghelstein (then a Capt.), CO of the USSF team at Khe Sanh in 1965-66, relates: "We had an recon operation who spotted Llinares on the road about two o'clock in the morning all by himself. Shortly after, maybe a minute or two later, a patrol of VC came by, following him and my intel handler, Minh, was convinced that he was—we always had known that the guy had a lot of connections. We always thought he was involved in supporting the VC in one way or another and Poilane didn't have much to do with him.. I think Poilane was trying to stay neutral and I think this guy, the Basque, was in it up to his ears." [Taped comments of Col. John D. Waghelstein, 09 May 1986].

[86] Born 14 Jan 1937 in Manila, Philippine Islands, Capt Whitesides attended the US Military Academy, West Point (Jul 55 – Jun 59). Service No.: 55637A. More than 190 air search missions and a ground party of over 200 Vietnamese and USSF scouring the flight path, failed to discover anything. Data on this incident is based on documents in the Library of Congress MIA microfilm, Reel 213, Folder 12.

[87] The Special Forces at Khe Sanh who arrived in 1962, occupied the old French Fort position (XD858388), a place which had been overrun in the mid-1950s when occupied by the French who threw their dead down the well there [Conversation with James Whitenack, 06 Oct 1988]. During the second USSF team at Khe Sanh (arriving around Sept, 1962, commanded by Capt Chuck Korchek, Team A-131) a Vietnamese engineer unit placed pierced steel matting over what had been, to that time, simply a dirt field, about December, 1962. [Conversation with Frank Fowler, 21 March 1989, who was a member of that USSF team].

tain (Dent du Tigre, also known as Dong Voi Mep or Hill 1739, XD832543, the highest point in northern I Corps, over a mile high, became the site for SESU operations. Major Gray later became Commandant of the Marine Corps. G/2/3 was the first ground unit to operate in Vietnam; this was at Khe Sanh].

20 April 1964

POILANE, Eugene Civilian

".. on the 20th of April 1964, a Monday, at the time when we were going to market as we did each day we stopped at my father-in-laws at noon. His wife told us that he had left to go to Quang Tri that very morning. She was uneasy following the death of the pharmacist. Felix [Eugene's son, Madame Madeleine's husband] reassured her by saying that both of us had just gone down and come back up without any problems. He had not finished his sentence when a Vietnamese soldier who we knew well came in and quickly shouted to us in Vietnamese: 'Monsieur Poilane is dead! He was killed in his automobile by the Viet Cong.' We were stunned and very tense by the announcement... He was killed by three bullets of which one near the heart was fatal. It was at kilometer marker 51. The Viet-Cong told his chauffer to leave. The latter was shot in the foot. To complete their work, the Viet-Cong tossed a grenade into the engine of the car... I went to Khe Sanh accompanied by Father Poncet to the house of my father-in-law and there I helped my husband wash his father. We placed him in the dining room and the arrangements were made. We decided to bury the body near his sister on the plantation, near to his house... Papa was 76 years old."[92]

Llinares had been with Eugene Poilane in the little Citroen car when the assassination occurred. "Everybody knew that car. There wasn't any doubt who what was."[93] "He had a beard as long as his courage, and a great will to work. He'd come to Khe Sanh as a young man with his wife, and, when he came, Khe Sanh didn't exist: only the woods. He'd made that plantation entirely himself, loving the land as if he'd been born there, and people who talk about colonialism when it involves people like Papa Poilane make me laugh: he wasn't a colonialist, he was a peasant who cultivated the land, that was all, and he wasn't stealing from anyone."[94]

His obituary[95] indicates his birth at Saint-Sauveur de Landemont, district of Champtoceaux, France, 16 March 1888, the son of peasants. He was sent as an artillery worker to Cochinchine in 1909, and after the war met Auguste Chevalier who recognized in Eugene qualities of courage and insight and assigned him to the Botanical Institute of Saigon. He was appointed a botanist prospector in 1919 and promoted to correspondent of the Museum in 1928. By 1926, Poilane was established at Khe Sanh. His trees and buildings were destroyed or burned by the Japanese in 1945 and by the Viet Minh in 1953, but he remained. He fathered six children, five of whom were born after he was 60. He traveled more than 40 years, most often by foot, to the frontier of China and to Siam [Thailand] to gather botanical specimens from sectors that were little known or even completely unknown. He sent from 1500 to 5000 specimens a year. There are over 40,000 samples of his discoveries in the Natural History Museum in Paris. He discovered 21 new species. He also experimented with fruit trees at Khe Sanh at his experimental orchard [located near Hill 558 northwest of KSCB]. He imported grafts from France, Japan and other countries to study grapevines, peach trees, strawberry plants, plum trees, pear trees, chestnut trees, and walnut trees, could survive and flourish.

In 1921 he returned to France for a population census, met his future bride, Mlle Yvonne Bourdeauducq (who was 13 years younger than he) who wanted to become a nun. Her third child, Felix, was born at Khe Sanh 30 April 1931. She gave birth alone, her husband being out collecting botanical specimens. In 1926, Eugene settled in Cu-Bach (Khe Sanh), built a straw hut to house his little family and cleared the land for a coffee plantation.[96]

[*On the American national level, the National Security Council met on 17 March 1964 at the White House to approve National Security Action Memorandum No. 288 [NSAM 288], providing for cross-border operations from Vietnam into Laos. Recommendation No. 11 provided for Vietnamese ground operations into Laos; recommendation No. 12 for a full range of Laotian border control operations.*[97] *CINCPAC developed OPLANs 37-64 and 98-64 to implement NSAM 288. The latter provided for cross-border operations into Laos south of the 17th parallel to obtain positive evidence of communist use of Laos as an infiltration route into the Republic of Vietnam and to disrupt such infiltration. No Vietnamese or American uniforms would be worn and no American troops would participate. Operations would penetrate to a depth of 50 kilometers.*[98] *The NSC meeting disclosed "the basic problem here in Washington... When Maxwell Taylor talks, he is representing a composite view of the Chiefs. There*

is an element in that body.. who wish to bomb or otherwise interdict the infiltration routes in Laos. This is consistent with their view that the war in Vietnam is essentially a conventional one, which should be fought by the United States with all the conventional resources at our disposal, especially those which involve a minimum loss of American life.. General Taylor and General Wheeler have a more sophisticated view.. but they are naturally unwilling to ask a subordinate command (MACV) to undertake an action which in their view can have no real military effect on the enemy... The State Department.. is fundamentally worried about the precarious situation in Laos... In my own opinion, our real problem is that we have given to the military (MACV) missions in South Vietnam which they are unwilling and unable effectively to perform. We do want hard intelligence on the Ho Chi Minh Trail, both for military and political reasons; but in the getting of it, we do not want an overt invasion of Laos at this time."[99]

By May, Operation LEAPING LENA plans were devised to obtain intelligence in Laos between Route 9 and the 17th parallel east of Tchepone in Laos.[100] *Although plans included two Americans on each team, MACV was constrained by OPLAN 98-64 from their presence, and morale plummeted among the indigenous members. However, by mid-June, five of the 8-man teams were ready and on the night of 24 June, Team 1 embarked an unmarked C-47 to be inserted by parachute and padded jumpsuits to land in thick trees. The results of parachute insertion of all the teams were a preclude to the 1971 LAMSOM-719 operation into Laos from Khe Sanh: it failed miserably, and the folly of making blind parachute drops near Tchepone was obvious.*[101] *Of the five 8-man teams inserted along Route 9 east of Tchepone by parachute, only five survivors emerged.*[102] *Nevertheless, we did learn that the area was "alive with enemy ground forces.. equipped with the uniform of the North Vietnamese Army.. every culvert on every road and every bridge had a minimum of two enemy personnel guarding it.. Units as large as battalion-size were observed, including one that was actually in the act of crossing into Vietnam, west of Khe Sanh.. confirmed by a helicopter crew that had been sent out to rendezvous with one of the teams."*[103] *Following transfer of USSF from CAS [the cover for CIA in Vietnam] to MACV during Operation SWITCHBACK, LEAPING LENA became Project DELTA.*[104]

The Marine Corps SESU operations on Tiger Tooth Mountain were conducted 13 June 1964 – 17 July 1964, during which they experienced a severe thunderstorm and an enemy probe, compromising their position, forcing them to depart within a couple of days.

USSF Team A-728 at Khe Sanh under command of Capt Allan B. Imes, was relieved at the presence of the Marines, convinced that their presence meant that they would not be attacked. Gen John K. Waters, Commander of US Army Forces, Pacific, a 4-star General and Gen. Patton's son-in-law, visited Khe Sanh during this time and informed Imes of at least 15,000 NVA in the immediate area, that the thought was the NVA would cross the DMZ, try to take I Corps, and declare it a neutral country. "It scarred me to death."[105] *In November, 1964, Capt. Chuck Allen's A-team from 1st Special Forces, Okinawa, arrived and moved the USSF from the Old French Fort to the airstrip where he spent his 6-month tour constructing the concrete bunkers*[106] *that later Marines referred to as "old French bunkers!"]*

03-04 JANUARY 1966

11 KIA [all CIDG, no Americans]

By December, 1965, increased presence of North Vietnamese Army units became obvious. The Special Forces team (A-101) that had arrived in early October, 1965, under command of John D. Waghelstein, had the mission of interdicting re-supply from Laos. His Team Sergeant was Pete Morakon. His four to five separate agent nets reported that NVA units were no longer moving south but had halted and were stockpiling large quantities of supplies. By December, indications of a considerable enemy presence was evident. On the night of 17 December 1965, a small border village protected by PF soldiers was overrun. Three nights later, agent reports confirmed two regiments of NVA soldiers had crossed the border. A 65-man patrol was dispatched from the Khe Sanh USSF camp to screen the western edge of Huong Hoa District, then move north and back to the base. The patrol discovered evidenced of heavy enemy traffic. Fog had diminished visibility to less than 40 meters. The USSF patrol caught the NVA in an ambush[107] **The NVA regiment that had been decimated, carried brand-new equipment, the troops had fresh haircuts, and included a Chinese ad-**

visor.[108] The NVA, however, soon launched a retaliatory attack.

A-101 consisted of a company of Vietnamese CIDG, two companies of Bru CIDG. On 03 January 1966, a company of Nung Chinese mercenaries arrived along with two U.S. Air Force Birddog observation aircraft to begin Project Tigerhound.[109] The unit operating at Khe Sanh was the 20th Tactical Air Support Squadron (20th TASS), subordinate to 504th Tactical Air Support Group.

The evening formation was just breaking-up, and Waghelstein was having his "usual evening harangue right before supper [with the LLDB commander] because I wasn't crazy about these formations. And sure enough, they put the first three rounds right into the middle of the formation. That's where we took most of our casualties... We took heavy mortar fire for about the next hour, anywhere from a round a minute to two rounds a minute. Once we got everyone underground, we didn't take any more casualties. One of the rounds hit the team room and the team house went up. We didn't have to worry about illumination. The team house burned for a couple of hours and we had plenty of light... In the underground bunker—it had been an ammo storage and we had cleaned it out and converted it earlier into a beginning of an Op Center and a medical bunker. It turned out we had 13 killed and some 50 or 60 wounded, some critical with traumatic amputations."[110] U.S. Marine medevac helicopters landed in the middle of incoming to evacuate the wounded.[111]

The NVA used 120mm mortars, the first time this weapon was used in the war.[112] The mortars were located at XD858440 and XD866432, and subsequent patrols through this area disclosed Chinese documents and firing tables at these sites which were manned by an estimated 200-man force.[113] About one out of ten rounds had a rather strange sounding crump, and it turned out that the NVA were firing delayed-fuse so that it could cut through 12 feet of laterite soil before detonating. The 120s were fired just outside the range of the camp's 81s, but although within range of the 105s, there were no recoil pits to permit 105 high angle fire, so the NVA moved into the "dead space" with their tubes and fired unmolested,[114] a tactic that was to be repeated during the 1968 siege battle when NVA units moved into an area where they would be safe from B-52 strikes, but far enough from the perimeter to avoid fire from within the perimeter.

The newly-arrived Tigerhound aircraft had not yet been placed in large underground revetments that were to be dug by USMC engineers who had just arrived, and were severely damaged in the attack.[115] Doc Cobb, the senior medic, was in DaNang, so Doc Robinson, the junior medic, along with the local missionaries (Nancy Costello and Eugenia Johnson, who had just found refuge here) and four Bru girls that the Army had been training as nurses, attended and saved the wounded. Their work was well done: out of 12 or 14 critically wounded, only one was lost.

[108] Taped comments of Col John D. Waghelstein, 09 May 1986 to the author.

[109] Gen Westmoreland had given the name "Tigerhound", "tiger" for aggressiveness and "hound" for smelling out the enemy. Their mission was to conduct aerial recon inside Laos to a depth of 12 miles inside the border, support USSF teams, and acquire targets for B-52 strikes. [Westmoreland, *A Soldier Reports*, Garden City, NY: Doubleday & Co., Inc., 1976, p. 196]. The 20th TASS had been organized 06 May 1965 and became fully operational 04 Sep 1965 before deploying two aircraft to Khe Sanh. [504 Tactical Air Support Group, *History*, 01 Apr 1967 – 30 June 1967, Chap. 3, "History of 20th Tactical Air Support Squadron, DaNang AB, Vietnam, 01 April 1967 – 30 June 1967," p. 29.

[110] Waghelstein ltr of 09 May 1986. The Special Forces camp at Khe Sanh (and later, at Lang Vei) was a Vietnamese camp with American advisors, not an American installation; the Vietnamese had the final word.

[111] Waghelstein, Col. John D., letter of 30 July 1985.

[112] Westmoreland, *History File* #7, 29 May – 16 Jul 66, LBJ Library, Container No. 8, Chronology 1 January – 30 June 1966; MACV, *Command History*, 1966, p. 3; CIA, Weekly Report, *The Situation in South Vietnam*, 12 Jan 1966,p. 8. The Soviet 120mm Regimental Mortar M1943 weighs 606 lb in firing position and 1,100 lbs in traveling position, has a range of 5,700 meters and can fire 15 rounds per minute. [Dept of the Army, *Pamphlet 381-10, Weapons and Equipment Recognition Guide*, Washington, DC: Dept. of the Army, 1966, p. 139]. A USMC EOD team confirmed 120mm mortars with body delay fuses and PD types. [A-101 MOPSUM, Jan66, cited].

[113] Det A-101 Monthly Operational Summary (MOPSUM), January 1966, p. 4.

[114] Col John D. Waghelstein, taped comments, 09 May 1986. Waghelstein notes: "We'd been pleading with the ARVN to dig recoil pits so they could elevate the 105s to cover that dead space which we had plotted in that Rao Quan valley, which is where they put the 120s. They were inside the 105 range and outside the 81 range. They just set there where they were unmolested and they just pounded the shit out of us for most of the night."

[115] Tigerhound hangers were completed 15 Feb 66 by USMC engineers and Tigerhound began operations at Khe Sanh on 26 Feb 1966. [A-101, MOPSUM, Feb 1966, pp. 4 & 5].

The C123B cargo aircraft departed DaNang at 1320H, arrived at the Khe Sanh Special Forces camp (XD845415) at 1410H, departed Khe Sanh, and flew to Dong Ha (YD008434) and returned to Khe Sanh on supply shuttle runs. The aircraft then departed Khe Sanh at 1655H on its second supply shuttle to Dong Ha, 28 miles distant. When the aircraft failed to return to Dong Ha around 1720 as scheduled, a communications search was initiated and the crew was declared missing in action at 1830H. Weather at Khe Sanh was 3000 overcast, 2 miles of fog. The flight path is over mountainous jungle of high trees and dense foliage. Two C-123 aircraft flew low over the flight path until last light in an attempt to locate the downed aircraft or crewmembers. The next morning additional aircraft joined the search and the flight path was again covered many times. Areas extending ten miles to either side and beyond the flight path were searched all day without success. The search efforts were hampered by thick jungle, constant haze and occasional thundershowers. The search was terminated 10 February 1966 when the search commander determined that further efforts would be of little value.[116]

LtCol Hugh L. Baynes reported discovery of an aircraft wreckage on 01 March 1966, "..located at the end of a box canyon approximately 15 miles northeast of Khe Sanh and on a ledge at approximately the 3000 foot level of a sheer cliff. The wreckage..would require professional mountain climbers and equipment for ground access [and] is controlled by unfriendly forces.. official records show that a USAF C-47 crashed in this location in 1963. The report I received indicated that the wreckage was new and the possibility existed that the missing C-123 had crashed into the same position. The wreckage was checked by rescue personnel from a helicopter and they reported that there was no evidence of the C-123 having crashed into this position or of the wreckage being anything but the C-47 that crashed in 1963."[117]

It is possible that four South Vietnamese troops were also aboard the Provider aircraft for the flight when it went missing.[118]

[116] MIA file on James Louis Carter, Library of Congress MIA microfilm reel #373, folder #13; MIA file on Therman Morris Waller, LC microfilm reel #375, Folder #35; MIA file, LC Reel #464, Folder 2.

[117] Carter MIA file, *op. cit..*, Statement of LtCol Hugh L. Baynes, FR49233. Mr. John R. Horn (Chief, External Inquiries Div., Defense POW/MIA Office, Pentagon) writes: "We thoroughly researched our files and data bases, and we also had the United States Air Force Historian and the Central Intelligence Agency Historian check their records for information related to this crash. I am pleased to report that this particular aircraft loss is not associated with anyone unaccounted for from the Vietnam War. It appears that the personnel associated with this downed aircraft were rescued at the time of the crash." [Horn ltr, I-95/48522, 05 Oct 1996].

15 MARCH 1966

HOLMES, LTC David Hugh 22nd TASS

Colonel Holmes departed Khe Sanh Special Forces camp at 1050H on a FAC mission flying an O-1E Birddog, #56-2530, to control air-strikes in the Steel Tiger sector of the Ho Chi Minh Trail. A large concentration of NVA troops was spotted at a concealed truck part in the Xe Namkok river valley protected by half a dozen gun emplacements,[119] and Holmes' aircraft was hit by ground fire, and crashed in the vicinity of XD214536, 164549N 1060821E (approx. 13 KM NW of Tchepone, Laos) near an embankment on the edge of a creek, about 2 KM from an anti-aircraft battery. About ten minutes later, Capt Jack R. Harrington, flying 7 miles from Capt Holmes in another O1E observed the crash site at 1315H and reported the aircraft had landed flat, there were no visible holes, the cockpit door was slightly open, and Capt Holmes, who showed no sign of life, was still strapped in his seat and leaning against the instrument panel. He concluded that Capt Holmes controlled a forced landing and that he was alive since the aircraft landed in the only spot in the area that was suitable for a forced landing, the aircraft was basically undamaged, and the cockpit was intact. Capt. David A. Farrow, the Detachment Commander at Khe Sanh, relieved the other FAC (Capt Jack R. Harrington) flying in the area within 7 miles of Capt Holmes, and also observed Holmes' aircraft on a grassy slope adjacent to a stream as though it had purposely landed in a controlled crash. The aircraft was pretty much intact. Ground fire in the area was intense. Rescue attempts could not be made due to heavy ground fire, bad weather, and approaching darkness. An organized ground search was conducted on 16 March, but rescuers reported the pilot was not in the aircraft when they reached it at 1400H.[120]

Colonel Waghelstein [then Capt.], Commanding the USSF team at Khe Sanh, notes: "We had four pilots and two Birddogs in the camp, and a guy who became a good friend, David Holmes, was shot down and presumed dead. We mounted an operation to go get him, but it was called off by higher headquarters."[121]

[121] Taped comments of Col John D. Waghelstein, 09 May 1986.

[MACV, Saigon]

Two crews of OV-1A Mohawk aircraft, SPUD-5 and SPUD-6 took off on a visual and photo mission to the Tigerhound area at 1540H. At approximately 1655H, Hillsboro (The USAF ABCCC) received a "Mayday" message that both aircraft had crashed within a kilometer at XD830033 (161819N 1064116E). Hillsboro directed Forward Air Controller aircraft, Hound Dog 51 and 53 to conduct a search for the downed aircraft. About 1730H SAR aircraft located the crews, came under intense ground fire, and, at 1900H were able to rescue the crew of SPUD-5. SPUD-6 (OV-1A #63-13117) with Captain Gates, pilot, and Major Lafayette, observer, reported being surrounded by VC. Their last transmission: "Please hurry. My God, they're all around us. Bring air power." The rescue helicopter made several low passes, but no visual sighting or radio contact could be established. The FAC aircraft reported that enemy forces had surrounded the area and the situation appeared grave.[122]

[*Based on multi-source intelligence, Gen. Westmoreland's J-2 staff concluded by early 1966 that the NVA infiltration into South Vietnam averaged 7,000 men a month during January – March, 1966, and that the NVA were massing in Laos opposite the Lao/Vietnam border "to prepare the battlefield."*[123] *While the G-2 of III MAF did not concur in this ominous conclusion, Operation VIRGINIA was launched at Khe Sanh*[124] *This first large-scale U.S. Marine operation at Khe Sanh was conducted by 1/1. Capt Waghelstein was dismayed that the advance party to plan the operation focused on the valley to the north of the range containing Hills 950 and 1015 whereas Waghelstein strongly asserted that the NVA were operating south of Route 9: "if they wanted to make contact, go south of Route 9. That's where the action was. It was full of camps. We didn't have the clout to go in there without getting beat up on. And they said, 'No, this is the one we're going to do,' and I think the sum total were heat strokes."*[125] *It was almost as though the Marine command did not want to make contact so that they could claim there was no NVA activity in the area. During the summer of 1966, the CIA reported NVA use of Route 9 in Laos, just west of Khe Sanh, to move up to 600 tons of supplies daily.*[126] *Increased patrolling by SOG teams and Tigerhound aircraft operating in eastern Laos thus became crucial to determine NVA activity. SOG patrols into Laos under Operation SHINING BRASS had begun in October, 1965.*[127]]

29 JULY 1966

LAWS, SFC Delmer Lee FOB-1
SAIN, SFC Don Rue FOB-1

A recon team with three Americans and seven Vietnamese of FOB-1 launched from their Khe Sanh Launch Site, inserted atop Co Roc Mountain, Savannakhet Province, Laos. As the unit stopped by a small stream, they were ambushed by an enemy force, and the team dispersed along a trail with Laws at the rear in a crouched position. The terrain consisted of elephant grass approximately 8 to 10 feet high and observation was very poor. Whalen: "I was situated between the VN 01, Tran Quang Thanh, and the US radio operator, Sain. Laws at this time was in a crouched position attempting to observe back up the trail. He glanced at me and signaled with his hand by pointing that he heard something to the rear. The team was fired on from the rear and flanks by automatic fire. I saw the American radio operator throw back his head and fall backward. A VN team member, Tran Thanh Van, who was next to the radio operator, rolled forward. I looked to see if I could see Laws, but he was nowhere in sight. I rallied the remainder of the team and moved north to the stream."[128] Laws gave a hand signal that he heard something to the rear. At this time the patrol received fire from their rear and flank from automatic weapons, immediately killing 3 ARVN and SFC Sain. The team leader, MSGT ("Crash") Whalen, rallied the remaining team, was unable to locate Laws, and moved north to evade capture. On 31 July 1966, a recovery team (led by SGM James A. Craig) returned to the scene of the contact, XD709269, and recovered the body of Sain and one Vietnamese. Other bodies could be seen but could not be recovered or identified because of the proximity of NVA forces. On 04 August 1966 another recovery team returned and located one Vietnamese who had completely decayed due to the hot jungle climate, but all his limbs were present. Billy Waugh "..walked up the trail on which the ambush had taken place and found a beaten area. Sergeant First Class Memorio Quiroga, FOB-3, called me and I found a human leg from the hip down in the area. I placed the leg into a bag and re-

turned it to Khe Sanh."[129] "I picked his leg up myself. I personally carried his leg out of the jungle."[130] On 05 August 1966, medical personnel accidentally cremated the leg, making the case MIA rather than KIA.[131]

SGM James A. Craig was attending the National League of Families annual meeting in Washington, D.C., and at a banquet the evening of 18 July 1987, noted by name tag a lady who was a relative of a MIA. She said it was her brother who served in Special Forces in 1966. "I asked Pat what was her brother's name. Pat then replied, 'My brother's name is SSG Delmer Laws.' .. I replied, 'Oh my God, I know your brother!' At this time Pat and I stopped eating and it became very quiet around the table. Pat asked me, 'What do you know about my brother?' I replied, 'Your brother is dead.' 'How do you know?' Pat asked. I told her, 'I was there when it happened.' ... I then told her that I was on the body recovery team which went in and brought out the bodies. Pat asked 'What did you find about my brother?' I replied, 'I am so sorry but we only found and brought out your brother's leg.' At this time Pat stood up at the table and remarked, 'O God, you do know what happened to my brother,' and stormed out of the dining room in tears... I also left the dining room to find Pat and try to console her... She said she was glad that I told her what happened.. Pat began to cry again and started shaking all over and asked me if I would sit down with her by ourselves and talk with her some more about her brother.. Pat and I went off to an area by ourselves... I could not eat; by this time I had tears rolling down my cheeks also. But, I left anyway and went back to the dining room. Of course everybody at the table wanted to know what happened and how Pat was doing and how I was doing. I felt like shit and the food tasted the same. The other M.I.A. relatives sitting at the table told me not to feel this way and that the families of all of the M.I.A.s are looking for people who know what happened to their relatives and that they wish it had been their son or brother whose body I had found so that they could have peace of mind."[132]

Craig adds the following information: The rescue helicopter "..went in and pulled out the surviving members of the team, which included SGM Whalen. During this time the helicopter took a heavy volume of ground fire from the NVA in the area. We Got SGM Whalen and what was left of his team back to Khe Sanh and asked him what had happened. The questions were being asked by LTC James Van Sickle, commander of the launch site, Maj Jerry Kilbourne, second in command of the launch site; MSG William (Billy) Waugh, NCOIC of the launch site; and myself, who as the Intelligence Sergeant was plotting the information on the map inside the target folder. SGM Whalen stated that they had been moving north through elephant grass and came upon a creek and decided to break for lunch. They did not know that they were being followed by the NVA and their trackers until the last minute when they were ambushed and half of the team got killed. He (Whalen) and the rest of the team jumped down into the creek and broke out of the ambush by running down the creek, east, thus breaking contact and eluding the enemy until rescued... The body recovery team consisted of LTC Van Sickle, SGM Whalen, MSG Waugh and several other NCOs which launched out of Khe Sanh on two helicopters, two gun ships and a FAC spotter plane..."[133]

28 SEPTEMBER 1966

TAYLOR, SSG Danny Gene
HHC, 5th Special Forces Group Airborne

The patrol was inserted at approximately 1755H on 25 September 1966 and performed normal patrolling until 6030H, 28 September when the rear security informed the Patrol Leader, SFC Larry S. McMillian, that two VC were approaching from the direction the team had moved. Just then, firing commenced. SSG Taylor, the patrol's radio operator, picked up his weapon and immediately returned fire. The patrol was in the vicinity of XD760640 (two clicks south of the southern boundary of the DMZ in Vietnam, 1651N 1063908E). McMillian, saw Taylor returning fire for some ten minutes and then, during a lull in the firing for a few seconds, moved approximately 15 feet to his radio. He put it on his back and moved to the rear of SFC McMillian.[134] He again moved, and SSG James R. Moore observed that Taylor attempted to jump off some rocks but was hit; he died immediately. He "was hit in the back by a machine gun bullet. The round went through the radio, cut his spine and opened up his stomach. In my opinion he died immediately. Prior to leaving the area I checked his body and there was no pulse or heart beat."[135] He then left Taylor in a standing position between two rocks.

[134] Statement of SFC Larry S. McMillian in MIA file on Danny Gene Taylor, Library of Congress microfilm Reel #404, Folder #58.

[135] Statement of SSG James R. Moore in *Ibid.*

[By the end of September, 1966, Detachment A-101 at Camp Khe Sanh had 2 VNSF officers, 12 VNSF enlisted, 4 US officers and 18 enlisted, 340 CIDG, 504 RF/PF, 13 assigned to Tigerhound, 10 operating the FOB-1 Launch Site, 62 Navy Seabees, 5 USAF operating the 15th Aerial Port, 4 with the 1st Mobile Command Group, 4 with 7th ITT and 4th Marines, and 875 of 1/3 with 6 105mm howitzers and 2 155mm howitzers.[136] Those not attached to A-101 increased during October, 1966, to include: 11 (Tigerhound), 13 (SOG), 3 (3dMarDiv), 38 (NMCB 10), 1050 (1/3), 7 (1st MOB), 4 (15th Aerial Port), 4 (Naval Security Group), 17 (1st MAW), 6 (USMC tank farm), 70 (Project DELTA).[137]

Gen Westmoreland firmly believed that NVA forces would descend in large numbers,[138] but the senior USMC command assumed that aggressive reconnaissance would disclose any large-scale movement of NVA forces. Concerning the Khe Sanh area, CG, III MAF, General L.W. Walt, wrote: "I believe far too much emphasis is being placed on the importance of the infiltration threat. I base this on my conviction that our primary enemy here remains the guerrilla... In my mind.. we should not fall into the trap of expending troops unduly seeking to prevent the entry of individuals and units who pose the lesser threat to our ultimate objective, which remains the people of South Vietnam."[139] The Marines fully believed the enemy forces were pursuing a strategy of drawing American forces into static positions away from the local populace where determinative battles were to be won. They eschewed holding static positions. Gen Westmoreland interpreted the intelligence to reflect a rapid buildup of NVA forces and the Defense Intelligence Agency reported, on 22 Sep 1966, elements of the 324B Division reorganizing near Khe Sanh Special Forces Camp on 16 Sep with about 14 elephants transporting supplies.[140] A SOG patrol uncovered a NVA base camp on 27 Sep at XD837653 with 150-200 enemy in green utilities.[141]

During a meeting at III MAF, General Westmoreland observed, "I notice you haven't made any commend about putting a force in Khe Sanh. What's your reason for this?" The Marines replied, "Well, we think it would be too isolated, too hard to support." Westmoreland responded, "Nevertheless, I think that we ought to have a larger forced out there," and indicated he desired a battalion.[142] The III MAF staff immediately embarked on a very detailed comparison of Khe Sanh's location with Dien Bien Phu with the conclusion that Khe Sanh was indeed very similar.[143]

Accordingly, a detachment of 65 Navy Seabees from U.S. Naval Mobile Construction Battalion TEN arrived on 10 Sep to upgrade the airstrip. 300 sorties of C-130s brought in bundles of AM-2 matting, and obtained a bulldozer from BV-33 in nearby Laos.[144] On 12 hours' notice, First Battalion, Third Marine Regiment, moved to Khe Sanh on 29/30 September 1966 "..in response to an expected major offensive by NVA to attempt to overrun Khe Sanh."[145] The AO assigned to 1/3 consisted of a circle with a 10,000-meter radius from the Khe Sanh camp. The BN CP and Co A were on the base itself, Co B at XD825415, Co. C at XD855410, and Co D at XD8344. Co B and D patrolled and exchanged positions while Co C remained stationary. Most patrols were oriented towards the valley containing Hill 558, the villes and river basin, and towards Hill 861. For the most part, all was peaceful.[146] Local patrols conducted by squads and platoons went out to approx. 6,000 meters from company positions and later the patrols fanned out to 15,000 meters in company-size patrols, the limit of 105mm artillery support.[147] On 04 October 1966, the last of 1,385 bundles of AM-2 matting was received.[148] While 1/3 conducted local patrols within the 105mm fan, longer-range recon and formation of additional agent nets became a priority. Accordingly, III MAF requested FMFPAC to accelerate deployment of the 3d Force Reconnaissance Company,[149] and by mid-October, 1966, III MAF reported formation of JTAD [Joint Technical Advisory Detachment], with four teams operating in III MAF's AO, one of which was at Khe Sanh.[150]]

03 OCTOBER 1966

ECHEVARRIA, SGM Raymond Louis
JONES, SGM James
WILLIAMS, SGM Eddie Lee
—all assigned to FOB-1

A 7-man team (with 3 Americans) made a helicopter insertion at approximately 1800H into a LZ at XD632624 (3 miles west of the DMZ) and after moving about 20 meters to the high ground south of their position, encountered and killed an enemy soldier. They instantly came under fire from all directions and requested immediate helicopter extraction, but heavy enemy fire prevented the team's rescue. The team's interpreter, Bui Kim Tien, heard the enemy say, "Hold your fire, try to capture them." Tien estimated the NVA force at battalion strength. The team decided to split in an attempt to escape and evade the enemy force. Bui Kim Tien, the only team member who returned to friendly control, later stated that he initially started out alone. Later he linked up with Williams who had been wounded in the leg above the right knee. Williams told him "Jones is dying and Ray [Echevarria] is the same way," and said they should escape by going over the mountains. On 04 Oct, while Tien was investigating some caves, he heard Williams exchanging gunfire with the enemy and did not again see him. Tien was rescued the afternoon of 04 October.[151]

Billy Waugh recalls the incident: "I remember that just as clear as a bell. They launched out of Khe Sanh by 34 with a recon mission. They were not to fight; they were there to take a prisoner if they could. They landed and got one transmission out, an 'on the ground' transmission. We had a code set up and they gave us a 'BLUE-6' or whatever it was that stood for 'we're on the ground and we're moving from the LZ.' That was it. A lot of times the NVA would wait until the helicopters got out because they knew we had gunships and Skyraiders normally and they didn't want any part of the Skyraiders—their napalm, bombs."[152]

[*On 15 October 1966, Project DELTA [B-52] arrived at Khe Sanh for Operation 13-66, commanded by Maj Charles Beckwith with the mission to locate enemy concentrations through small recon teams and then insert a reaction force in response to any developed targets. Location of the enemy was through area saturation by 12 recon teams, each composed of 2 American advisors and 6 Vietnamese Special Forces [LLDB], and trail network recon by up to 5 Roadrunner teams, each composed of Vietnamese CIDG dressed and armed as VC. Total strength of B-52 was about 600 men.*[153] *The FOB for Operation 13-66 was established at Camp Khe Sanh on 141650H.*[154]]

09 NOVEMBER 1966

GLIDDEN, SFC Arthur	B-52 det
SWOPE, CAPT Charles Frederick	USAF FAC

On 09 November, Road Runner Team 102 infiltrated at last light without incident. Capt. Swope (USAF FAC) and SFC Glidden departed Khe Sanh airfield at 1130H for a routine flight of radio relay and visual reconnaissance. After take-off, one radio contact was made at 1140. Although numerous attempts were made to regain radio contact, no further transmissions were made and at 1400 a full scale search was initiated. At 1645, O1E wreckage was discovered by Capt Richard E. Fitts, USAF, who reported the plane generally intact, but completely burned from the rear of windows forward and out two feet on the wings. The recovery party reported three .50 caliber holes in the tail, two in the left wing, and one in the right wing. SFC Glidden (positively identified) was lying about six feet from the cockpit near the right wing. The pilot, Captain Swope, was still in the cockpit, charred beyond recognition. When removed from the plane, his body became disjointed at the knees. Both bodies were placed in body bags, secured to McGuire rigs and transported to Camp Khe Sanh.[155]

[*By 30 November 1966, personnel at Khe Sanh included: 2 officers and 11 enlisted (VNSF), 4 officers and 11 enlisted (USSF), 393 CIDG, 504 RF/PF, 12 (Tigerhound), 10 (Shining Brass), 25 (III MAF CIC/COC), 29 (NMCB 10), 26 (1 MAW), 10 (1st MOB Comm, USAF), 5 (USAF 15th Aerial Port), 4 (Naval Security Group), 1 (USAF 5th Weather Det), 1150 (Bn 1/3) and approx 260 (Project Delta).*[156]]

[156] Det A-101 MOPSUM, Nov 1966, p. 1

Project DELTA AO at Khe Sanh was designated as XD6670 – XD9070 – XD9050, the extreme northwest corner of South Vietnam.[157]

Col John G. Hayes, CO of Det B-52 at Khe Sanh, received missions from III MAF and had no charter to conduct operations in Laos. On 28 November, MSGT Bott made an over-flight over the proposed recon zone in an 0-1 aircraft to select landing zones for their patrol, operating approximately 1 click east of the Lao/Vn border and 2 clicks below the DMZ.

When Bott's Team #1 was inserted 29 Nov the weather in the area had deteriorated with ground fog, rain and high winds, and the team inadvertently picked the wrong LZ and landed in Laos. SFC Stark broke radio silence and reported that he doubted his true location and believed his team had landed inside Laos by mistake. He was instructed to move east, establish a secure patrol base and maintain radio watch. Back at Khe Sanh, the Det B-52 officers determined they had, indeed, landed in the wrong area and were approximately 3-4 KM south of the DMZ and approximately 3 KM west of the Lao/Vn border. Throughout the night heard movement close to its position. Det B-52 radioed SFC Stark to move east, that the weather was not flyable due to bad weather. The following morning, Sgt Bott and his four comrades fiercely engaged ten enemy troops, killing six and forcing the rest to flee. The team was able to evade for a day and again found itself in heavy contact at which time SFC Stark, the Patrol Leader, was wounded in his left thigh and chest and one Vietnamese killed. The team was again assaulted and Stark shot in the chest and one ARVN was killed. The team was outside of artillery range and all air assets were grounded at Khe Sanh due to heavy rain and fog, making a ground rescue impossible.

Four gunships from the 241" Aviation Company were sent to the area, and Col. Hayes was present in the airspace above the recon team in his command and control helicopter. Communications links were made between Col. Hayes, Capt Flannagan (FAC), the gunships, the operations element at B-52 HQ at Khe Sanh, and SSG Bott and SFC Stark on the ground.

At 1000H, WO-1 Sulander, Aircraft Commander, WO-1 Donald D. Harrison, Pilot, SP4 Bodzik, Crewchief, SP4 Bordreaux, Gunner, and Sgt Dyer, a Medic from Det B-52, boarded a UH-1D, #65-10088, and departed Khe Sanh to extract SFC Stark's patrol. WO-1 Sulander's helicopter was part of a flight of seven helicopters in the recovery attempt. The flight orbited in the vicinity of Recon Team 1, while a Forward Air Controller (FAC) located the team. Meanwhile, hearing that helicopters had reached the team's area, the ARVN leader ordered the patrol to move out and ran ahead. As the Vietnamese soldiers departed, Bott remained, refusing to abandon his Patrol Leader. This incident was at XD634633. The team's point man said he heard the enemy open fire on the ARVN Team Leader and then saw him hit the ground, possibly wounded. Weather conditions in Team 1's area was extremely adverse.

As Sulander's helicopter (one of seven helicopters in the recovery mission) located the team and began his approach, he came under intense fire, but nevertheless managed to land his helicopter. Captain Lynn F. Coleman, pilot of a UH-1C gunship flying protective cover saw a man (assessed to be the ARVN Team Leader) running toward Sulander's aircraft. Due to intense ground fire, Capt Coleman's UH1C was driven off and the crew could not determine if the man ever reached the helicopter. WO1 Sulander's aircraft was next seen to take-off, out of control, and descend in a nose down attitude, and at 1041H crashed and burned for about 15 minutes at XD633631.

The FAC maintained radio contact with SSG Bott on the ground throughout the incident, who was located with SFC Stark approximately 300 meters northeast of the crash site, at XD634633. SSG Bott said "they" could see smoke from the crash but made no reference to possible survivors. He reported to SSG Cranford, flying an Army Beaver aircraft for radio relay purposes, that he was out of ammunition, that his capture was imminent, and was destroying his radio. The last transmission heard was a North Vietnamese soldier saying, "Here you are! We've been looking for you. Tie his hands. We'll take him this way."

An immediate search of the crash site was impossible due to intense ground fire, but on 09 December a Spike Team entered the area and on 10 December a Hornet force (which built up to 80 men) of Operation Scramble reached the crash site and took photographs of the remains, finding numerous boot prints and some remains. SFC Bobby W.K. Linville, SSG Charles L. Berg, SSG William T. Copeland, and SGT Gerald F. Apperson, members of the recovery team, found five charred bodies, burned beyond recognition and having been horribly mutilated by the NVA with two of them booby trapped. No identifying objects were found on the bodies, clothes, dog tags, etc. The tail boom was almost intact, with the US Army and aircraft number plainly legible. The tail section was hoisted out by CH-46 helicopter. We did not find it feasible to recover the bodies at this time due to booby traps and ground fire. On December 11-13 the crash site was subjected to heavy air strikes and on 14 December, an Arc Light struck the area.

Following these air-strikes, on 15 December, another recovery team reached the crash site and retrieved those partial remains which could be found. The air strikes had disturbed the site to the extent that less than five complete bodies were retrieved. Sufficient remains were recovered positively to identify Harrison, Bodzick, and

[157] III MAF COC 010827Z/Dec66, Subj: Designation of Delta Operation Area, in III MAF COC Journal and File, Dec66 #J54.

Bourdeaux. No trace of Sulander or Dyer could be located, nor was any trace of Bott or Stark discovered.[158]

The area was struck by Arc Lights,[159] and MACV promulgated a SICR [Specific Intelligence Collection Requirement] soliciting identification, strength, composition, and disposition of enemy forces in the area.[160]

Russell Bott's mother, Mark K. Bott Bedugnis, a machine operator for Worcester Woven Label Co. for ten years and previously a foundry worker, also lost a son in the Korean War. She was very active in POW causes and even traveled to the Paris Peace Talks in 1971 to appeal to North Vietnamese officials on behalf of her son, Russell. She flew to Switzerland to appeal to a convention of 40 nations who were discussing the 1949 Geneva Conventions, and frequently visited Washington, D.C. on behalf of people missing in action. She died 10 February 1988.[161]

[*In his November, 1966, Monthly Operational Summary, Capt Pauls C. Hutton, II, CO of A-101 USSF Det at Khe Sanh Camp, noted that the large number of American forces at Khe Sanh (with the arrival of battalion 1/3 and other units) raised considerable difficulties: rapidly increasing buildings, antennae, radars, airport control towers, generators, repair facilities, mess, showers, laundry, water supply, etc., took up all available space; movement of heavy earth-moving equipment turned every road into a quagmire," the LLDB Camp Commander and staff were excluded from the III MAF COC (NOFORN) due to classified (SOG) missions, and concluded: "If the US presence at Khe Sanh is to remain indefinitely at such a high level, I recommend that consideration be given to separate the CODG, LLDB, and this detachment. by relocating the CIDG .. to another area, perhaps Lang Vei if the ARVN battalion there is indeed going to abandon it.*[162]

Marine artillery had been fired on A-101 patrols (of 2 Americans and 40-50 Vietnamese) and Marines withheld fire one day on a group of 20 uniformed Vietnamese, assuming they were from A-101, but were later informed they were not. The Special Forces, feeling their missions were classified, did not always inform the Marines of their patrol activity. The Marines said they would henceforth fire on all suspicious, uniformed Vietnamese.[163]

Furthermore, NVA activity near Lao Bao and with nearby BV-33 indicated the need for increased American monitoring of activity in the area. American patrols had spotted Russians, Chinese, and North Vietnamese at Lao Bao and at BV-33 and on one occasion a USSF patrol was ambushed at Lao Bao after apparently receiving information from a nearby village of the American patrol. 1/Lt Stallings (XO of the Det) wiped it off the face of the map with 4.2" mortars. "We moved the camp so we could better police the area... It would be a better place for us at Lang Vei."[164]

During 19-25 December 1966, the USSF camp at Khe Sanh relocated to the ARVN camp at Lang Vei, replacing ARVN Battalion 3/2 (which then located itself at the old French Fort). The move was assumed to be temporary, and Marines were directed not to destroy permanent structures of the camp "..in the event future repositioning of the Khe Sanh USMC BN requires relocation of the CIDG camp back to Khe Sanh.[165]

The other major event of the time that impacts on casualties, was the request of Colonel Thomas M. Horne, "Senior Officer Present 3dMarDiv/III MAF Representative, Khe Sanh" to replace Project DELTA recon operations with a detachment from USMC Force Reconnaissance. Project DELTA, he noted, was only able to field an average of one recon team for four days to every two weeks during its 2-month operation at Khe Sanh.[166]

[166] Col T.M. Horne, USMC Oral History Tape #1539. Since its original formation on 19 June 1957, the Marines of the Force Reconnaissance Companies had the mission of long-range recon—up to 300 miles inland from the beach (as dictated during, e.g., Operation GREENLIGHT) to collect information on the enemy's rear areas for the Force-level commander formulating operational plans. Third Force Recon Company was formed 04 Oct 1965, basically from assets of the 2nd Force Recon Co., at Camp LeJeune, North Carolina. The Detachment of 3d Force Recon Co arrived on Oki-

When the Marines of Det, 3d Force Recon Co., arrived at Khe Sanh they called the Marines of 1/3 the "orange men" due to the color of their skin from the Khe Sanh clay.[167] *Indeed, the weather starting with 17 Oct 1966 liquefied the laterite soil making for a miserable limicolous existence. The Chaplain of 1/3 quipped: "I believe that along with combat pay, there should be 'monsoon pay.' Even Noah would complain. Everyone gained about twenty pounds due to wet utilities and muddy boots. Ponchos help the rain drip down your neck. No one told me how cold it becomes in Vietnam. I may not have believed it."*[168] *Pluvial rains during November, almost 25 continuous days, accompanied by winds gusting from 15 to 20 knots and an average temperature in the 50s, made for a raw cold and intense wet chill.*[169] *The CO of 1/3 noted: "We were totally unprepared both mentally and physically for the monsoon season here in the northern highlands."*[170]

18 JANUARY 1967

SCANLON, CPL MICHAEL JOHN Det, 3d Force Recon Co

When Clay Ernst sat down in the hotel lounge with the author during a Khe Sanh Veterans reunion, he knew he had about two years left to live and was anxious to tell the story of Michael Scanlon while he still could.[171] Michael was to be the first USMC KIA at Khe Sanh.[172]

Scanlon, younger than his comrades, red-headed, and especially short—so short at about five feet that Senator Dodd of Connecticut had to intervene to get him on active duty, and very athletic (had been a wrestler), won the hearts of all in his unit. James Capers, who served in all three Marine Force Recon Companies, and the Officer in Charge of the Detachment at Khe Sanh, got very close to him: "It was a problem I had mostly because I got so close to him. He did a lot of things for me. He cut my hair. He was my driver. I loved that little kid, I'll tell you. He was just a tremendous young man, and so when he was killed, the war came home to us."[173] Master Gunnery Sergeant Tom Nicholson recalls that when Scanlon attended SCUBA School he was almost dwarfed by the SCUBA tanks. A red-headed kid, short and muscular, high-school wrestling champion, Michael was very mild mannered, nearly timid, very strong, full of energy and the victim of many practical jokes.[174] Clay Ernst notes, "He was the unit virgin; we tried to alter that...,"[175] and another member of the Detachment, David Sibley, recalls that Scanlon was going to be a Catholic priest."[176] The Detachment corpsman, Doc Lowell Burwell, notes: "Mike would of made a good priest."[177]

On the night of 17 January 1967, Sgt Thomas Dean Willson inserted a 7-man force reconnaissance patrol some 14 miles north of Khe Sanh, far outside the artillery fan and near the DMZ with the mission of locating enemy infiltration routes. The team included Clay Ernst as Assistant Patrol Leader, Leonard Stephen Bessent (who had never been on patrol with this team previously) as communicator, PFC Thompson (from A/3rd Recon, who also had never been on patrol with this team previously), HM2 William H. Feyh and a dog handler (Boucher) and two scouts.

Clay Ernst recalls that Willson was taken aside and briefed by Lieutenant Schmidt and given the only map. "Later, in the hospital, a Major from G-2 came in, and I was a little drugged-out. He told me: When you get back to the States, don't tell anybody where you were." There was no brief before insertion, and no over-flight of the area.

"As soon as the [insertion] chopper cleared the area there was sound of wood chopping all the way around us, lower down on the mountain and what sounded like a rifle range down in the valley below us. So we moved maybe 500 meters to set up the harbor site and sat in for the night. First thing in the morning, wood-chopping and shooting started again, so I took Scanlon and we went west on the ridgeline, checking it out. It looked like

[177] Conversation with Lowell Burwell, 19 October 1993.

a farmer once had tried to clear the land. It was about three-foot high elephant grass and 3-foot high tree stumps all over the area along with a split-log fence, like Abraham Lincoln used to build. We headed west and the rest of the team remained as an OP. We got out about five, six hundred meters out and then came back. All the wood was old and dry. Then in the afternoon we were going to move east and then return for the night.

"While I'm sitting here, Willson signals me from the top of the ridge that there's enemy on the other side of the ridge coming over. So I told Scanlon to set up in a position about ten yards below me and hide behind a tree stump in a grassy area. I was behind another tree stump, near the fence. I could hear them as they came over the top of the ridge, and I looked up. Scanlon started to stand up, and I waved him down. He tried to stand up again, and I waved him down a second time. I waved him down three times.

"Then the enemy was right in front of me, three of them, all at sling arms and one was carrying a pack. They weren't patrolling, and got down past me, and I'm still watching behind the tree stump. All of a sudden I felt something. I looked up, and Scanlon had got up, run around behind me, jumped over the fence, ran out about a yard towards the trail and yelled. He opened fire on the three and probably killed all three because they went down. I was shocked. What's he doing! He was standing, looking down towards the trail, and I started to stand up, about half-crouched, trying to think when it was a blast of fire like on a rifle-range. These three were a point for a company! (About 30 to 40 NVA, according to the rest of the team on top of the hill).

I hit the ground and crawled over to the fence. Scanlon had been blown back against the fence and was laying flat on the ground. I counted five hits on him—on his legs, his hip, his shoulder, and his chest. I got up to reach over the fence to pull him over to my side so I could pull him to the top of the hill. As I got about halfway up to the fence, they opened up with automatic weapons and the top of the fence splintered.

"Meanwhile, the other members of the patrol were firing and throwing grenades. I hit the ground and tried to pull a couple of the logs loose from the bottom of the fence so I could get him to my side, but it was a well-built fence. I started throwing grenades and firing my weapon, and I had a M-79, firing it into the trees and letting them burst off the trees. I was throwing all my grenades and Scanlon passed me two of his grenades, I believe, and I threw those.

"There were three enemy soldiers to the south of me, I pulled the pin on one grenade, let the spoon go, counted to three, and just as I started to throw it, I got hit in the right arm and knocked the grenade out. It felt as though somebody had kicked me, so I turned around to see who had kicked me. I saw blood running down my arm and looked up and there was this man looking at me. I believe he was aiming at my chest, but as I twisted to throw the grenade, he got my arm. I grabbed the M-79 and hit him in the chest. His head and arm came off; they went one way and the body went cart-wheeling down the hill.

"The rest of the team was about 50 yards above me, in the middle of a fire-fight, and weren't really paying attention to what we were doing below them.

"The bullet went through the elbow, so my right arm was useless. I stuck it in my jacket and was firing my M-79 left-handed as best I could. I looked up and saw four grenades in the air and told Scanlon to lay flat. One landed at my feet and I kicked it away; one landed by my side, and I threw it away. One landed over my head and exploded, blew out an ear-drum, and one landed to the side of Scanlon. We were getting intense automatic weapons fire. When the four grenades came, I knew they had me pinned; they know where I am. I can't do any fighting with one arm. So I stuck my M-14 and M-79 under the fence, jumped up and grabbed Scanlon by his harness, and I was going to run for the top of the hill where the rest of the team was.

"As I jerked him up, it felt like he grabbed my arms and squeezed my arm. I looked down, and there's a big bone—the bullet hit the bone and blew out three inches of the arm. I looked at him, and his chest was blown open, and blood was all over him. I assume that was from the grenade that landed near him. From the blood on his chest plus the large hole, I believe Corporal Scanlon jumped on the other grenade or pulled it under him to keep me from being harmed. I dropped him and I took off to the top of the hill. Both my arms were broken. Tommy Willson later told me that machinegun bullets were right at my heels and he thought I'd set the world's record for running up a mountain!

"I got to the top of the hill, dived over the fence, and landed at Bill Feyh's feet. I told him I couldn't use my arms and asked him about morphine. He was firing the M-60 machinegun and said, 'Wait a minute.' He fired a burst and then said, I can't get the morphine. I asked why, and he said, I've just been hit. I believe it was his left wrist and rode down the bone to the elbow, which put him semi out of action. Tommy Willson was hit in the forehead with shrapnel and didn't have a battle dressing, so he tied sox around his forehead to stop the blood from rolling into his eyes. I think Bessent was hit in the hand."

Leonard Bessent maneuvered to Scanlon's corpse and, upon reaching it, was wounded by an enemy grenade. He succeeded in recovering the body and returned to the patrol's perimeter.

Bn 1/3 dispatched a Sparrowhawk[178] platoon which inserted at XD874613 and the recon team was successfully extracted.

---

[178] SPARROW HAWK is a platoon-size reaction force. A Company-size reaction force was a BALD EAGLE.

27 JANUARY 1967

SRSEN, PFC Steve Alert **A/1/3**
[pronounced "Seir-sen"]

It all began when "Mad Dog" (GySgt) Gordon Boyer Hopkins led Team 5-2 of the 3d Force Recon Co Det at Khe Sanh into their IP [Insertion Point] at XD666527 at 1145H on 26 January 1967—within a click of the Laotian border. There had been Red Haze reports as well as TIGERHOUND and a SLAR report of 24-25 January 1967 of enemy troop movements at XD660573.[179]

The team, consisting of six Marines and one dog, moved northeast to XD672529.[180] At 1745H, the team spotted ten armed NVA with AK47s moving about 15 meters away. Holding fire until all were within the killing zone, the team opened fire killing all ten. The team then immediately received heavy automatic weapons fire from an estimated 35 NVA moving tactically by fire and maneuver. Two Marines of the patrol were immediately wounded, and the team rapidly found itself ensnared in a heavy donnybrook with small arms, automatic weapons fire, and grenades. After twenty minutes under fire, the team realized they were in trouble and a reaction force was requested. The team was now surrounded by approximately 150 NVA, located on a 2300-ft. hill covered with six to ten foot high elephant grass in an area approximately 100 meters long and 15 meters wide, and well beyond friendly artillery support.[181]

For about two and a half hours (before the SPARROW HAWK arrived), Hopkins repeatedly exposed himself to enemy fire as he fired on the enemy and moved from place to place in the small perimeter to control his team's fire. The team was able to ward off several attempts by the vastly superior enemy force to annihilate them, all without any supporting arms.[182]

At 1805H, two H-34 helicopters of HMM-163, SUPERCHIEF 1-9 piloted by 1/Lt Robert William Hein, Jr., and SUPERCHIEF 1-10, piloted by J.H. Brickell, were launched on Mission #8002D, emergency medevac for the two wounded members of the team. In addition, two UH-1Es ofVMO-2, DEADLOCK 4-0 and DEADLOCK 4-2, were launched for cover. The four helicopters arrived at the zone at 1812H. Lt Hein said they were coming in, but the Team Leader said, "You can't get in; need reinforcements." Nevertheless, Lt Hein made an attempt, but was hit as he landed and was unable to embark the team due to the heavy hits, one of which (later identified as a .50 cal.) went between Hein's legs, shearing the gas and hydraulic lines. Due to the intense fire, the helicopter was forced to take-off. The H-34 had been hit approximately 17 times by .30 and.50 cal. and automatic weapons fire, had to abort, and returned safely to Khe Sanh.[183]

At 1845H, a section of CH-46A transport helicopters from HMM-265 arrived. Due to the heavy fire, closing darkness, and lowering weather, it was decided to return to Khe Sanh, disembark the reaction force, and return to the team to rescue them. The lead bird, piloted by Capt Joseph Gerald Roman and the wingman, Capt Harold James Campbell, Jr., had an embarked a 30-man SPARROWHAWK from 1st Platoon, A/1/3. Upon arrival, due to the heavy engagement, Capt. Roman returned to Khe Sanh to discharge his part of the reaction force and return empty to rescue the team. After being hit several times, Capt Roman landed to the right of the recon team in 8-10-ft. elephant grass. The co-pilot, Capt Jimmie Edward Cook and Capt Roman attempted to lift the collective, but it would not budge. They had lost their number one and number two hydraulic systems and had no flight control boost. In a matter of seconds, Capt Roman turned to see the aft portion of the aircraft in flames. Capt Roman ordered the crew to abandon their aircraft, EP-171 as Capt Cook cut the engines and engaged the rotor brake and spotted the recon team 20 yards down the trail engaged in a fierce fire fight.[184] Captain Harold J. Campbell, Jr., Captain Roman's wingman, saw Capt Roman and his crew shoot their way up the hill to the recon position, due to the close enemy.[185]

As everyone gathered in a 10-yard perimeter, Capt Roman sized up their situation: only seven were capable

[180] Col Kenneth D. Jordan notes that the team, by the time of their contact, had actually slipped into Laos: "I can tell you we were outside the border. At the time it was very politically sensitive, and we weren't supposed to go outside the border. We were out there, and there was a lot of high-level discussion about how to—hoping no one would read a map and look at those carcasses [of the downed helicopters].. There were two helicopters down there that we eventually had to blow in place because the NVA were all around them. We blew them up with fixed-wing aircraft, but they left the debris of the burnt helicopter carcasses there, and that was indelible evidence that we were outside the country." [Comments of COL Kenneth D. Jordan, 02 June 1986]. Also, the award recommendation for Capt Olivo's award citation lists the location as XD659533, inside Laos.

[184] CO, HMM-265 ltr Admin:ROH:lce, 1650, 03 Apr 1967, in Silver Star Medal file of Capt Joseph Gerald Roman; Statement of Capt Jimmie E. Cook in Silver Star Medal file of Capt Harold James Campbell, Jr.

[185] Statement of Capt Harold J. Campbell, Jr., in Bronze Star Medal file of Capt Jimmie Edward Cook.

of fighting the enemy force. There were four wounded including one critically wounded recon Marine who had been hit three times lay in the center of the perimeter. Another recon Marine with leg wounds was on his stomach, firing. Capt Roman took the PRC-25 and assumed command as BONNIE SUE GROUND. Firing continued for about 15 minutes by which time the chopper was completely engulfed in flames and the .50 cal. ammo left in the aircraft began to cook-off, confusing the enemy force. The Americans heard screams of pain and shouts of orders and the enemy broke contact and withdrew to the south.

Capt. Campbell returned to Khe Sanh, re-embarked a 16-man reaction force. At 1914H, while in the LZ, the chopper received extensive hits, lost power, and the crew of 4 plus the reaction force of 16 joined the team and the other crew members in the perimeter. Captain Cook later wrote: "Within minutes the helo crew and reaction force were in our position. Without them I am sure we could not have survived the night. Although Captain Campbell knew what he was getting into, he probably saved all our lives by risking his own. Once inside our perimeter, Captain Campbell and Captain Roman inspected the perimeter and enlarged it to accommodate the additional troops."[186] By this time the NVA force had moved in close and were throwing hand grenades. At 1945H, two additional CH-46s arrived at Khe Sanh from Dong Ha and lifted the remainder of the reaction force. At 2030H, a CH-46 piloted by Major Watson lost power while approaching the LZ, crashed and burned as its blades hit a tree 200 meters north of the other downed helicopters. The four members of the crew and the reaction force of 15 escaped with only one WIA but were separated into two groups and unable to join up with the others in the LZ. Capt Roman advised them to hold their position. They were not attacked and were rescued the following day.

At 2230H, a CH-46 bringing ammo from Dong Ha collided with a Huey parked off the side of the Khe Sanh runway; both aircraft were destroyed, but there were no casualties. Visibility at the time was extremely poor due to ground fog.[187]

Flareships, fixed wing, and SPOOKY[188] were on station by 2000H. The moon was bright. U.S. Army cannoncockers of 2/94 displaced two of their tubes from Camp J.J. Carroll to Thon Son Lam[189] under cover of darkness and began firing at 0200H.

At 270308H, a CH34 piloted by Capt Thomas Runyon Olivo, directed by strobe light and radio, bounced his main landing gear across the knoll, clearing Capt Roman's rotor blades by several feet, striking several small trees obscured by the low handing fog and darkness, and successfully embarked one medevac.[190]

At 0615H the NVA force attacked from the south, PFC Steve A. Srsen, a rifleman with the First Platoon of A/1/3, part of the reaction force who had covered the southwest portion of the perimeter during the night, stood up and yelled "Grenade! Grenade! Incoming!" warning three other Marines—PFC David M. Tillotson, PFC Raymond E. Maguinness II, and one other, allowing them to take cover and escape injury. The Marines threw two or three grenades, then three grenades exploded inside the perimeter causing four casualties, including PFC Srsen, who received fragments in his right side and right leg. After receiving treatment, PFC Srsen returned to his position and rejoined the fire-fight. Approximately 30 minutes later, the NVA force threw another barrage of about 70 grenades,[191] one of which landed near another Marine while he was changing positions. PFC Srsen saw the enemy grenade, jumped up and pushed the other Marine to the ground thereby saving him from injury. PFC Srsen received the full blast of the grenade, instantly killing him.[192]

In his endorsement of the award recommendation, General Bruno A. Hochmuth, CG, 3d Marine Division, recommended upgrade to the Medal of Honor noting that PFC Srsen requested to be returned to action after being wounded, that the act was clearly intentional in his leaping to his feet and pushing the other Marine "thereby saving that Marine's life, giving his own in exchange," and that he had a choice at the time he performed the action.[193] General Lew Walt, CG, III MAF, concurred in his endorsement, but General Westmoreland (MACV), Admiral Roy L. Johnson (CINCPACFLT), and Admiral U.S.G. Sharp (CINCPAC) all concurred in MACV's recommendation for the Navy Cross instead.[194]

Fixed wing air-strikes enabled extraction of the American force by 0937H.[195]

Steve Srsen's nickname was "surfer Joe" (from the Jan & Dean song of that title) since he was from California and had blonde hair. "All of us from CA were

'surfers' back then. He was a fairly quiet individual, about a half-year younger than I. We both had been wrestlers in our respective small town high schools. He was an 0311; I was a corpsman."[196]

Steve's sister, Joanne Srsen Norman recalls: "Steve was born in Oakland California, January 25, 1947. We were a very close-knit family. We all loved each other and made sure the other knew it. To give you an idea about my brother, I was in a serious accident when I was 16. He came to the hospital after visiting hours but talked the nurse into letting him in to see me. He told me he loved me no matter what he said and left me his prized graduation ring as collateral that he would be returning the next day. He put other people's needs above his own; he was a very special person!... For as long as I can remember, Steve wanted to be a Marine. My parents talked him into going to a junior college. After only a few months he came home and announced he had enlisted in the Marines! My parents were in shock. Steve simply said the Marines are the best and I want to be a part of their family. He was so happy and excited."[197]

[*The Command Group and three rifle companies of BLT 1/3 departed Khe Sanh 01 February 1967 as B/1/3 assumed defense of the airstrip and maintained fire team Ops and LPs at XD839417 (the main gate of the combat base) and XD840422 (just off the west end of the runway).*[198] *MAJ James L. Day, CO of 1/9, was directed to send an infantry company to Khe Sanh.*[199] *Co B/1/9, augmented with one section of 106mm recoilless rifles, one section of 81mm mortars, two extra M-60 machineguns, and one extra 3.5-inch rocket launcher, departed 3d Marine Division Headquarters at Phu Bai on 6 February 1967 and arrived at Khe Sanh, fresh off Operation DECKHOUSE V. Its mission: defend the airstrip and contonement and conduct patrols out to 15 kilometers. About a week after their arrival, Capt. Michael W. Sayers, CO of B/1/9, was augmented with a 45-man security platoon from Headquarters Company, Headquarters Battalion, 3d Marine Division, none of whom were combat experienced and lacked an officer.*[200] *The newly-arrived B/1/9 immediately began patrolling. Normal daylight activity was four full 13-man patrols and four 4-man LPs or four Ops. Night activities included 4 ambushes and 4 LPs. Additionally, the Det of 3d Force Recon Co. at Khe Sanh usually had 3 to 4 teams in the field at all times.*]

25 FEBRUARY 1967

CUTBIRTH, SSGT Kendell Dwayne B/1/9

A patrol, consisting of a 13-man squad with a 2-man gun team attached, led by SGT Donald E. Harper[201] from 1st Squad, 2nd Platoon, B/1/9, departed Khe Sanh about 0800H to recon the area around the combat base. As they began to scale a hill at 1100H at XD829425 (1500 meters west of the airstrip), Cpl Wright, the first fire team leader, spotted three men going up the trail to the hill where the patrol was headed. Cpl Wright opened up with a 12 gauge shotgun and the machinegun team opened up on three directly in front of the patrol.

An additional squad (from Lt David L. Mellon's 1st Platoon) was dispatched to reinforce the patrol. The SPARROW HAWK platoon, 1st Squad, 1st Platoon, B/1/9, was composed of Sgt. Robert Anthony Chapp's 1st Squad, an M-60 machinegun team under Cpl Kenneth Vermillion, HN Daniel W. Polland, Platoon Right Guide SSGT Kenneth D. Cutbirth, and Platoon Commander 2nd Lt David L. Mellon. Missing was Cpl Robert A. Mettert, 1st Fire Team Leader, who was returning from R&R on 25 Feb 1967.[202] David L. Mellon later wrote:[203]

"We left the Khe Sanh perimeter early afternoon on 25 Feb 1967. It was an overcast day, but visibility was good. We we3re not in the clouds, which was typical of that time of the year at the Khe Sanh Combat Base. We followed the road westerly out of the Combat Base for about 1000 meters and picked up a less traveled but substantial trail. We proceeded about another 1000 meters

[198] SOP 3dMarDiv/III MAF Rep 011330/Feb67, SI TREP #1.

[199] "Jim earned the Medal of Honor for his actions as a 19 year-old Corporal at Sugar Loaf Hill on Okinawa with the 2nd Battalion, 22nd Marines, 6th Marine Division. Jim fought almost single-handed for 3 days and nights, from 14th to the 17th of May, 1945, as his men were serious casualties. Jim received white phosphorus burns and shrapnel wounds, but fought on through repeated Japanese attacks on his squad's position. When he was finally relieved, the bodies of 158 enemy soldiers were found surrounding his position. He was credited with saving the lives of his fellow Marines and inspiring them by his example to fight on against a numerically superior enemy force. Major Day selected Bravo Company, commanded by Captain Michael W. Sayers for this detached duety. The balance of 1/9 was assigned duty on 'The Street Without Joy.': [Letter from David L. Mellon, 4 Aug 2005].

[200] Comments of Capt Michael W. Sayers, USMC Oral History Tape #566; ltr of Maj Michael W. Sayers to US Marine Corps Historical Center, 18 May 1981.

[201] SGT Harper was KIA at Khe Sanh on 16 Mar 1967.

[202] David L. Mellon writes: "I learned from LCPL Kenneth D. Lease.. that Cpl Mettert was killed in a friendly fire incident while patrolling the environs of Camp Carroll on 7 May 1967. Apparently, Cpl Mettert was leading a patrol and called in artillery. The first round, a marking round, exploded at his feet and killed him. LCPL Lease was wounded in the same incident and evacuated." [Letter of David L. Mellon, 4 Aug 2005].

[203] *Ibid.*

and were met on the trail by St. Harper's Squad. As Sgt Harper's squad was in disarray, I had him organize them into a small perimeter and instructed them to remain where they were in the event we needed some covering fire to maneuver under.

"Our mission to locate the lost weapons was facilitated by Cpl Steve Wright, a member of the 1st Squad, 2nd Platoon, Bravo Company (Sgt. Harper's squad). Cpl Wright volunteered to lead the SPARROW HAWK unit back up the hill to the spot where the weapons were located. Cpl Wright was Sgt. Harper's 1st Fire Team Leader. Cpl Wright was one of those who had lost a weapon. He had been carrying a 12 gauge shotgun and had taken a small group of NVA soldiers under fire during the initial encounter. He had the shotgun to his shoulder when a NVA bullet hit the shot gun shattering the stock and rendering it useless.

"We proceeded in a well-spaced column another 300 meters to the intermittent stream bed at grid coordinates XD828423. The stream was bordered on both sides by a stand of bamboo. We crossed the stream, passed through the bamboo which channeled us and the reinforced squad got on-line in very tall elephant grass on the northwest side of the bamboo. I then resumed the fire mission that Sgt. Harper had placed on the top of the hill from the 105mm battery at the Combat Base. After working salvoes on the face of the hill, we began our advance to the top of the hill slowly under the covering fire of the artillery. As we advanced, I shifted the fire mission to keep it at least 200 meters to our front. When we reached the crest of the hill, we were preparing to begin searching for the lost M-14 rifles when we noticed movement to our front. The elephant grass at the top of the hill was only about waist high and we could see it moving. I called Cpl. Vermillion forward with his gun team to hose down the area of movement with M-60 machinegun fire. The team started firing above the top of the elephant grass, but eventually put rounds down into the grass. At that time, we, also, began throwing hand grenades down the back side of the hill.

"Next, I formulated a plan to envelop the enemy to our immediate front by sending a fire team under Cpl. Harold Tucker out to a tree located approximately 100 meters to our left and approximately 50 yards down the back side of the hill.[204] Once Cpl. Tucker departed with his fire team, we began taking effective fire from our front. We could not see those who were directing their fire on us, but I believe it was coming from high ground to our front (the southeast approach to Hill 861). We were taking rifle fire from one or more M-16s[205] and there were a few substantial explosions in our perimeter. The shrapnel from these explosions generated hundreds of very small shards of metal, similar to our M-26 fragmentation grenade. There is a question in my mind as to whether the explosions (estimated at 3 to 5) were mortar rounds or grenades, possibly even our own outbound grenades being thrown back at us. I had never been subjected to mortars previously, so I do not know if the small shrapnel fragments were characteristic of the NVA's 60mm or 82mm mortar rounds. I do not recall hearing the distinctive 'thunk' characteristic of our own outbound mortars, but there was so much confusion and other communication going on at the time that I may just have missed it... One KIA was attributable to the explosions: SSGT Cutbirth's upper body and face was charred and singed.

"The Combat Base had been monitoring our radio traffic and scrambled a forward air controller aboard a Huey. I coordinated with the FAC to get some fixed wing aircraft with 500-pound bombs on the high ground to our front. The FAC advised us to get down as he was bringing in a flight. I passed the word up and down the line and we hunkered down. Soon, we had F-4B Phantom jets bombing to our front. At this point, the NVA broke contact and withdrew from the area. During the period we were under fire and the explosions were rocking our lines, we sustained several casualties. I was hit with small arms, presumably an M-16 round, in the right knee. An explosion that rocked our Command Post area hit my radioman, LCPL Frederick A. Westerman. He sustained shrapnel wounds to his lower back, buttocks, and the backs of his legs. He was peppered on his entire back with the exception of the area where he was carrying the PRC-25 radio...I subsequently learned that while HN Polland was administering first aid to the shrapnel

---

[204] David L. Mellon writes that he literally "ran" into Cpl Harold Tucker after reporting to Camp Pendleton in late August, 1967: "While jogging along, Cpl Tucker asked a critical question that had obviously been bothering himn for some time: 'When you sent me out to that tree to do the envelopment, you forgot about me, didn't you?' I had to admit that with everything going on that afternoon, I had, indeed, forgotten about him and his fire team being in position out there in front of our lines. We had a real laugh about my oversight there in the safety of San Onofre at Camp Pendleton. In retrospect, however, I am sure it wasn't as funny to Cpl Tucker when his ass was hanging out there waiting for his Lt. to give him the order to move out and begin his assault across our front, a few months before!" [Letter of David L. Mellon, 22 Jul 2005].

[205] Concerning the M-16 fire from the enemy, David L. Mellon notes that the bullet or bullets that struck Sgt. Chapp were given to Doc Dan Polland by the surgeons that removed them from Chapp. Polland subsequently had them analyzed and was informed they were M-16 rounds. Mellon writes: "It raises an interesting question regarding how the NVA acquired the M-16s. This was prior to our troops being issued the M-16. My troops were carrying the M-14 during this action. As I reflect upon my wound, I previously thought that I was hit by a carbine round as the round passed through my right knee joint without doing much damage. I think my wound is, however, consistent with the smaller caliber of the M-16 as well." [Letter from David L. Mellon, 22 July 2005].

wound on Westerman's back, a second explosion went off by Westerman, causing him to receive yet another set of shrapnel wounds to his side and face.[206] HN Polland also received minor shrapnel wounds to his chest and left leg.. HN Polland was lucky to escape serious injury that day, as his helmet also had a very large dent in front from the explosions.

"As my reinforced squad had sustained several casualties, Captain Sayers sent a further relief column to help consolidate the position, evacuate the casualties, assess and police the battlefield. The 2nd Platoon, under 2nd Lt John Kramer, was dispatched from the Combat Base to our position. After my casualties had been evacuated by CH-46 helicopter and I had briefed Lt. Kramer on the situation, I turned over command of the position and was evacuated myself by CH-46 helicopter back to the Combat Base at Khe Sanh.

"[Our] 'Sparrow Hawk' suffered a significant number of casualties in this firefight. Sgt Chapp was mortally wounded in the upper right quadrant of his abdomen [and] died of his wounds approximately 7 weeks later on 14 April 1967.[207] SSGT Cutbirth was killed instantly by some sort of explosive device, either a grenade or mortar round.[208]

As Sgt. Chapp's squad with Lt. Mellon (B-2) attached had met such fierce resistance and sustained numerous causalties, Capt Sayers took two squads from B-2 along with 2/Lt John M. Kramer, to augment B-1. Kramer initially had difficulty reaching the patrol due to the intense enemy fire. The fight, however, was over by the time they did. Kramer subsequently swept the battle area and located 9 KIA by body count, 15 probable KIAs. Special Forces agents reported the enemy carrying 30-40 dead and wounded with them. Kramer also located one 82mm mortar complete, two more base plates and one more bipod, 180 rounds of 82mm with fuses, one complete FDC with wire and telephone. Also found: 1 pistol, ammo, 1 AK47, 3 rifles and a mortar site.[209] One of the enemy was a cadre officer from the NVA who had "lots of maps and other goodies showing complete breakdown of their personnel, weapons, munitions, where they came from, unit designation, mission. etc. They were here as part of a coordinated attack on Khe Sanh, Phu Bai, Dong Ha, Camp Carroll, the Rock Pile, and Lang Vei. Everyone got hit but us. CG 3rd MarDiv sent Bravo [Company, 1/9] a real nice msg saying how well you did."[210]

Capt Michael Sayers notes the significance: "..I felt that right there was probably the first long indication that there was going to be a big buildup in that area. We

---

[206] HN Polland wrote: "..concerning Westerman's injuries.. I had given him a shot of ¼ grain morphine for his pain due to multiple shrapnel injuries and dressed some wounds. I then painted a big red 'M' on his forehead to signify he had received morphine (policy). I ran to treat someone else and during the interlude another explosion (grenade or mortar?) went off by Westerman causing him to receive yet another set of shrapnel wounds to his side and face. Westerman said to me (as a joke) as I was treating his second set of wounds that he deserved another shot of morphine because he was wounded twice. I saw Fred Westerman in July, 1997, and we laughed about that for awhile. By the way, the policy of tagging the wounded and writing the big red M on the forehead with my merthiolate vial is nuts. By the time I got back to see Westerman for his second set of wounds, the merthiolate M had literally melted off his forehead due to the intense heat and humidity, so I wrote it on the tag I wired to his shirt." [Letter of Dan Polland, undated, ca. 1999, to David L. Mellon, attached to Ltr from Mellon, 22 Jul 2005].

[207] LCPL J.S. Brown wrote to Lt. David Mellon (hospitalized for three months, March-May of 1967 at Naval Hospital, Yokosuka, Japan) on 01 Apr 1967 [Attached to Ltr from Mellon, 22 Jul 2005]: "Sgt. Chapp was hit by a M-15. Doc Polland brought the bullet back. Doc said the bullet had hit his spine but he didn't think he would be paralyzed. He also had his spleen, one kidney and some of his intestines removed." "Doc" Dan Polland wrote: "Sgt Chapp was shot in the right upper quadrant of his abdomen. As soon as he was hit, he started reciting a Catholic prayer repeatedly about Mother Mary, and don't let me die. I literally stuffed everything I had into the hole in his abdomen (like the plastic wrappers for the battle dressings). The surgeons at Dong Ha told me that packing his liver saved his life. I am sure he suffered tremendously.

[208] HN Polland later recalled: "SSGT Cutbirth may have been shot in the chest, but I know when I turned him over, he had gotten hit by a tremendous explosion very close to him as his face was burnt and his mouth was open like screaming in pain and there were black marks around the face and torso like a singing burn." [Letter of Dan Polland to David L. Mellon, undated, ca. 1999, attached to Ltr from Mellon, 22 Jul 2005.] HN Dan Polland, who later became a Doctor of Osteopathy, O.D., specializing in anesthesia and pain management, died of post-surgical complications in 2003. Brig Gen Harry T. Hagaman, USMC, reported his death: "Dr. Dan Polland's death was a shock to the many thousands of people that he treated in his many years as an anesthesiologist at our local hospital. I met Dan six years ago when he was treating me for a lower spinal problem that I received when I ejected from a F4B Phantom on 22 Jan 1968 outside of Khe Sanh... He was a great corpsman, an honorary Marine, a superb doctor, and devoted family man. He will never be forgotten by those that knew him." [BGen Harry T. Hagaman, letter, Khe Sanh Veterans: *Red Clay* Issue #56 (Fall, 2003) p. 6.

[209] Officially, a search of the area disclosed 5 more NVA and one POW who DOW, one 82mm tube, 3 base plates, 3 bipods, 380 rounds of 82mm, and a variety of other gear and ammunition. [3rd MarDiv 260205Z/Feb67, Khe Sanh Operating Area SITREP #25; Comments of 2/Lt John M. Kramer and Sgt Donald E. Harper on USMC Oral History Tape #567].

[210] Letter from Captain Michael W. Sayers to 2/Lt Davide Mellon (USN Hospital, Yokosuka, Ward 2-B, SOQ), 27 Mar 1967.

brought those maps back to Khe Sanh. They were quickly whisked away and I never got to look at them again."[211]

[*Combined Action Company OSCAR became operational at Khe Sanh in early February, 1967. After final plans were completed with the Huong Hoa District Chief for three CAPs [Combined Action Platoons][212] the three platoons arrived the morning of 05 February 1967 at 0945H[213] and the CAC at Khe Sanh was officially established at 061530H in Huong District Headquarters in Khe Sanh village.[214] Khe Sanh's CAC OSCAR had the peculiarity of being the only CAC composed of Montagnard tribesmen and was organized with CAC O-1 and the CAC HQ CP located in the District HQ in Khe Sanh village (XD846380), CAP O-2 located at the western edge of Khe Sanh village (XD843380), and CAP O-3 located at the village of Ta Cong, just outside the main gate of KSCB (XD841408). The 52 Marines of CAC OSCAR under command of Lt William T. Sermeus developed a very strong tie of friendship and the Bru tribes people eagerly welcomed the Marines of the CAPs into their huts to participate in festivals and meals. The Marines very soon learned to appreciate the Bru as very hard-working, extremely friendly, trusting, and loyal.*]

02 MARCH 1967

116 UNKNOWN BRU

At 1900H, 02 March 1967, the Bru Montagnard village of Lang Vei (XD794363) was mistakenly bombed by two USAF F-4Cs aircraft dropping one of the deadliest anti-personnel munitions in the arsenal, CBUs. Lang Vei village consisted of 300 – 400 thatched hootches setting on stilts across the road from the USSF camp.[215]

The planes, COYOTE 11 and 12 launched out of DaNang to work under BLIND BAT 01, the ABCCC for the area. COYOTE 11 carried 6 MK-82 (500-pound GP bombs) and 2 CBU-2A pods while COYOTE 12 carried 2 CBU pods plus 4 LAU-3 rocket dispensers. Due to TACAN [Tactical Air Control and Navigation] malfunctions in one aircraft and switching between crew in the second, the commander of COYOTE 12 thought he was reading radial and distance from Channel 85, Khe Sanh, when in actuality he was reading Channel 109, Dong Ha. Lang Vei lies approximately 30 NM from Dong Ha on the 250 radial of channel 109. The geographic features of the Lang Vei area—a road paralleling the bulge in the river's course, a stream that crosses the road and joins the river, the prominent saddle-back mountains—are almost identical with the geographic features of the area 30 NM from Khe Sanh on the 250 radial of channel 85. The latter was the intended target. With the aircraft approaching "Bingo" fuel and ordnance not fully expended, the pilot saw the road, river and mountain features and assumed he was 20 miles inside Laos in the free bombing zone. When no moving targets are spotted, the ordnance is pickled. The second pilot, who had not yet seen the target, expended his CBU and expended his 500-pound bombs in a ripple mode to cover a long area while the first pilot came around for his last pass expending his 2.75-inch rockets.[216]

On KSCB, some of the Marines thought they were under attack by Russian MIGs flown by the NVA: "We were in panic because we thought, 'My God! Here we're up here and if they introduce fixed wing aircraft in an exposed place like this, we're in trouble!' And for awhile we couldn't determine if they were American aircraft or Russian aircraft that had bombed Lang Vei."[217]

CH-46 and H-34 helicopters were immediately dispatched from KSCB to evacuate the wounded despite increasingly deteriorating weather. When the weather finally made flying impossible, trucks were sent.[218] Marines were on the scene within 20 minutes to assist Captain Duffy's Special Forces Det A-101 in treating and evacuating the wounded, including a truck load of Marines from the Det, 3d Force Recon Co.[219]

Maj Richard C. Conway of VMGR-152 launched as ANCESTOR 890 despite the Khe Sanh airstrip being below GCA minimums: indefinite 200', sky obscured, visibility ¼-mi variable, ½ in fog, as he made his approach at 2125H. It was unsuccessful. Informed of the numerous civilian casualties requiring immediate medical attention, and with complete disregard for his own safety, he maneuvered his aircraft and landed safely, embarked 53 critically wounded and proceeded to 3rd Med Bn, undoubtedly saving many lives by his resolute determination and composure under very difficult conditions.[220]

Captain Michael Sayers, CO of B/1/9 at Khe Sanh recalls the language problem with the casualties. "In order to identify their wounds you had to strip them, inspect to see if they were hurt. They didn't make any noise, One of those Montagnard women was laying there with her guts out and she's not making a peep. I felt the stripping was degrading, even if necessary."[221]

"Survivors walked around little piles of smoldering remains of burned-out huts, still dazed, looking for things and people who weren't there any more. Others sat on their haunches, stark naked, and they just stared and stared. There were a few children around. They were strangely quiet—too quiet."[222]

Casualty estimates: 112 KIA, 213 WIA, 4 MIA, and a minimum of 140 structures destroyed.[223]

III MAF sent relief supplies (food and construction materiel) and equipment for rebuilding was moved to the scene provided by Sub Unit #5, FLSU, and MCB-40. By 0900, 03 March, KC-130 aircraft were able to land and all remaining casualties were evacuated.

Due to this tragedy, LtGen Lew Walt dispatched an Advisory Team (MACV Advisory Team #4) to Huong Hoa Sub-sector, Khe Sanh village under the leadership of Captain James Whitenack who arrived with Sgt. Humphrey (Ops Sgt), 2 carbines, a radio, a case of C-rations, and arrived on an Air America flight about 1500H.[224]

03 MARCH 1967

LAVOY, PVT Eugene Louis Jr.	FLSG A 3dServBn
GOODWIN, LCPL Raymond	HqCo, HqBn 3dMarDiv

The western sector of KSCB (at XD843417) received approximately 74 rounds of 82mm mortars resulting in 2 Marines killed and 17 wounded (7 medevaced).[225] "It was a long night. They got 2 CH46s and 2 gunships that were on the pad. Tore up the strip a little. All the mortars fell on 3rd Plt [B/1/9], LSU, and the chopper pad."[226]

LCPL Goodwin had previously been sick, vomiting, and Joseph J. Johnson took his watch. When he felt better, he replaced Johnson on his watch. During the night the enemy infiltrated and "blew the top of his head off with a satchel charge."[227]

[Co E/2/9 arrived to reinforce Khe Sanh on 07 March at 1615H.[228] Major General W.B. Kyle stated in his FMFAC debrief that the NVA neither wanted nor had a need for Khe Sanh, that there were now two Marine Corps rifle companies there to frustrate any attacks the enemy forces might possibly launch.[229] Senior Marine officers neither believed there were any enemy forces in the Khe Sanh area, nor did they want to hear there were any. The newly-arrived Col James M. Reeder, SOP Khe Sanh, who had previously served a tour of several years at the CIA, felt torn between Generals Westmoreland and Walt: "I happened to know Lew Walt rather well at the time. He was constantly telling me, 'Now, you don't tell Westmoreland this when he comes up.' And Westmoreland would drop in, make a point; then Walt would be chugging right after him in his helicopter and say, 'Did you know he was coming?' And I'd say, 'I didn't have the foggiest!' I truly thought at the time that I could have gotten a lot better service and could have gotten a lot better information if the two of them hadn't been so at odds."[230] Col Reeder reflected the opinions of his superiors as Marines of the Force Recon Det and the infantry company at Khe Sanh anguished that their reports of enemy presence were apparently disregarded by the Colonel.[231] Sgt Herb Marshall at the SOG launch site at Khe Sanh had been sending training patrols to hills 881 south and north. "I came off the hill with my team and the Captain said: We gotta go over to the Marines for a debriefing. So we went over to the Marine bunker and the Captain told me to do the briefing. So I showed them were we inserted and told where we went and where we saw numerous bunkers and lots of enemy. My Captain said, 'Sergeant Marshall, if you were going to take that hill, how would you take it?' And I said, 'Well, Captain, I would give it many, many hours of prep with airstrikes and then I would form my artillery and I would lay a barrage and I would walk my troops up with a barrage of artillery in front.' A Marine Major looked around and said, 'Bullshit!' The Captain looked at me and said, 'Well, Sergeant, our briefing is completed.' We turned around and walked out of there. And the Marines sent a Company up on that hill and the Company got wasted; they ran into a world of shit and it ended up just being a real cluster."[232]

Infantry patrols from B/1/9 and E/2/9 dispatched small squad-sized patrols from PPBs (Platoon Patrol Bases), saving time by not having to travel from the main combat base and preserving a modicum of secrecy by avoiding noisy helicopters while yet able to patrol some distance from KSCB. These PPBs were mobile, ever-changing, just as were the enemy forces in the area.

On 13 March, a platoon from the newly-arrived E/2/9 on the southern tip of Hill 861 (XD805435) received 12 – 15 mortar rounds from the vicinity of 881-North (XD777458).[233]]

At 1000H, SSGT Spencer F. Olsen, Platoon Commander of 1st Platoon, E/2/9, moved his patrol down Hill 861 (XD803444)[234] along a narrow trail through very thick elephant grass and bamboo with point man George Johnson in front followed by LCPL McKee. When Johnson came to a fork and turned for directions, he suddenly confronted several NVA. Although he fired, the NVA instantly killed McKee and mortally wounded Johnson.[235]

Danny Schuster of E/2/9 later wrote:[236] "On 15 March 1967, 1st Platoon of Echo, 2/9, left the Khe Sanh combat base via trucks and were dropped off at the French plantation at the foot of Hill 861[237] to begin a PPB. We were under strength by at least a dozen Marines. We made it nearly three fourths of the way up the hill before dusk. SSGT Olson, our Platoon Commander, chose to leave our squad, led by Lou Damiano, in some elephant grass as an ambush. There was a huge ravine near where we set up and we could hear the NVA talking all night.

"When we rejoined the rest of the platoon early the morning of the 16th we informed SSGT Olson that we hard a lot of chatter from the NVA during the night. He requested artillery support from the Base Commander prior to our platoon moving out that morning but was flatly turned down.

"We were on the move for about a half an hour when Johnson, the point man, saw a couple of NVA setting up a h ome-made claymore mine. He opened up on them and they returned fire, seriously wounding him. If it were not for the immediate action of Doug Goodin, our gunner from Weapons Platoon, many of us would have died very quickly. Goodin had the gun up and blazing in a matter of seconds, and the enemy fire subsided long enough for us to set up a makeshift line along a trail through a bamboo thicket. It was shortly after we set up that the enemy started rolling grenades down the hill on us. SSGT Olson was finally successful in getting air support. I can still remember those crazy bastards flying those jets right at tree top level, dropping 500 pounders on the NVA positions. Those pilots saved our asses. A chopper came in for Johnson. Joe Schroeder was one of the Marines who volunteered to carry Johnson. An enemy soldier suddenly appeared and opened up with his AK47. Joe was killed instantly and, most likely, Johnson. Fens returned fire killing the NVA who had shot Johnson and Schroeder.

"We were sent out into a perimeter and were digging foxholes when mortars started falling on us. Lou [Damiano] immediately realized that they were walking the mortars with great accuracy, along the line of our perimeter. He got my fire team out and was running behind me when he went down. I remember turning around and not seeing him. I went back and found him. The entire fire team grabbed him and carried him back to our platoon CP area. When we saw how seriously he was wounded, we thought that he was not going to make it.

"By now we had between five and seven KIAs and just as many WIAs. Lou [Damiano] was the worst off. A helicopter arrived to mede3vac Lou and the other WIAs. Lou, the most seriously wounded, was the first to be placed on the helicopter. Our fire team carried him on aboard. We are probably alive today because we were on board when a mortar round hit the ramp just as the helicopter was taking off. Most of the men in the immediate area of that chopper were killed by that incoming round."

The point squad (3d), led by Sgt Donald Lord was far in front of the other two squads and was immediately ambushed at XD802443 by an estimated NVA platoon north of them and an enemy squad south of their position. E-1 took 1 KIA and 5 WIA.[238] Third squad immediately returned fire and the other two squads came down, firing.

The only suitable LZ to medevac casualties was back on top of the hill. As casualties were being carried there, the enemy force, now occupying it ferociously fired on the Marines, killing 6, wounding 4, and there was one

MIA.[239] LCPL James L. Chase called napalm, then aborted as the planes were too close. The cancellation was too late, however, and napalm splashed the top of the hill and brush fire approached the Marines, snuffed out by squad leader Sgt Stephen P. Bodie. The napalm not only cleared away the enemy force, but also created a LZ.[240]

During the ensuing fire-fight HM3 Benoit received multiple fragmentation wounds to his arms and legs, but ignored his own wounds in order to render aid to others wounded.[241]

Meanwhile, at 1100H, 2/Lt John M. Kramer's 2nd Platoon, B/1/9, assisted by moving from their PPB at XD823440 (about 1500 meters east of Hill 861), and at 1415H B-2, which had been on their last day of patrol and were returning to KSCB, linked up with E-1[242] and a LZ was secured for medevacs. "We were only about 15 minutes from the base; we thought we were coming home, but it didn't turn out that way," noted PFC Walter H. Weber, grenadier, 3d squad, 2nd Platoon, B/1/9.[243] "We'd been out on patrols and ambushes for about 12 days. We were supposed to be relieved after four days by another platoon, but they couldn't, and we stayed their four days. Then another platoon was supposed to come out and relieve us, and we did their four days also."[244]

The first CH-46 medevac helicopter landed amid sniper and mortar fire, embarked 7 casualties including the dying Johnson and safely lifted. Doc Benoit, noting that not all the wounded had been evacuated, refused to be evacuated himself.[245] (The only other corpsman, Doc Jackobsen, was the most seriously wounded and was evacuated).[246]

A second helicopter landed and three more NVA mortars exploded right on the LZ.[247] Oddly, the Marines had not expected mortars while evacuating their dead and wounded. Captain William B. Terrill, CO of E/2/9, said: "This is one thing we never expected in a landing zone—to be mortared. And this is when we took most of our casualties."[248] HM3 Benoit was to have left on this one, but opted to remain to treat casualties. Both of Sgt Donald Harper's legs were severed by a shell exploding at his feet.[249]

SSGT Olsen faced a dilemma: more medevac choppers would undoubtedly mean more casualties; he should carry his casualties down the reverse slope. On the other hand, he needed to evacuate the casualties where they could receive life-saving medical attention, and there were insufficient able-bodied Marines remaining in either of the platoons to do this.[250]

A third helicopter landed about 20 minutes after being requested (about 1615H) and all remaining wounded were placed aboard except two. 14 additional 82mm mortar rounds exploded and more casualties were taken than from the previous fire fight or mortar attacks. "I saw trees lifting out of the ground and hot hit a second time."[251]

One of them, HM3 Benoit, lost his life carrying the wounded aboard the helicopter. Sgt Bodie wrote: "This man had multiple fragmentation wounds but they were never touched by a bandage. His men came first."[252]

The mortars ceased and there was silence. The scene was apocalyptic: "Bodies were laying everywhere and wounded men. Both of our corpsmen were dead and we had no one left to fix the wounded except for a few Marines that were still walking abound the top of the hill... We made radio contact with ECHO-6 [i.e., the CO] and said that the only way we could get the wounded and dead off the hill was to carry them; we cannot risk any more medevac choppers coming in with the few walking men remaining."[253]

Fixed wing blasted suspected enemy positions; the enemy mortar fire ceased. At 1705H, a reaction force (3d Squad, B-2) was sent from KSCB to XD802443, but overshot the LZ, crashed at XD805438,[254] and rolled down the embankment. "We had approximately 20, 22 Marines on board and we were coming in for a landing just before dusk. We got hit and shot down. Nobody got killed. I took a leg wound in the right leg and a couple other Marines on board got hit.. we rolled down the backside of the hill. Fortunately we had the infantry on board and they immediately set up a perimeter."[255] Only minor casualties were taken in the crash and the crew and reaction force were extracted by another helicopter and returned to KSCB. At 1730H, E-2 and Captain Terrill's company command group lifted to the LZ, made their way to the top of the hill and carried casualties down to the LZ. By 2100H, under light from flare-ships, all casu-

casualties except three MIAs had been evacuated, but due to heavy fog, the helicopters had to secure. The platoon worked throughout the night, and by 0630H on 17 March had moved all KIAs and weapons on to the LZ.[256] Artillery fired throughout the operation and 13 air-strikes were run during the night.

Shortly after midnight (at 0002H), Sgt Richard Jerome Vedder was by the wire and set off a trip flare. Twice he was challenged and told to halt by troops on the line, but he didn't. Troops on the line opened fire shooting Sgt Vedder in his shoulder, the round emerging from his neck, and he died.[257] Joseph J. Johnson ("JJ") had joined the Marine Corps in March of 1966 at the age of 17. He was held on Okinawa until he turned 18 on 27 Nov 1966 and then sent to Phu Bai where he volunteered to go to Khe Sanh with the Headquarters Battalion detachment stationed there. He arrived at Khe Sanh before Christmas of '66 and, when Sub Unit #5 was formed on 01 Feb 1967, was assigned to it. On this particular night, Sgt Vedder, after being challenged, was fired upon by the position next to "JJ" but they missed. "JJ" then fired, shooting him through the neck. He was later told that Sgt Vedder must have been sleep walking.[258]

By 1300H all 782 gear, KIAs, and equipment were evacuated. Total results of the skirmish: 18 Marines killed, 56 wounded (18 serious), and one MIA (later recovered as a KIA).[259]

"As it ended, the 2nd Plt had 4 men left up on the hill that wasn't hit. Took 19 hours to get the WIAs & KIAs out. E Co. sent another platoon up. Charlie broke contact. 10 VC by body count. It was a long night. We lost radios, weapons, etc. Echo made a few bad moves that really hurt us. John [Kramer] almost flipped his lid (really). Physically, he's not too bad but mentally I'm not too sure. He blames himself for the losses. We lost Sgt Harper and Sgt Land, Pvt Rhodes, Pfc Perry, Pfc Daley, LCPL T. Williams, LCPL Pino, Pfc Nicklow. I gave 2nd Plt to Lt Kinhg with SSGT Riner as Plt Sgt. We got replacements immediately and kept functioning."[260]

On 18 March at 0845H, the MIA was located.[261] "They brought him up to the top of the hill and he was unidentifiable. He had been shot in the back of the head and it looked like he had been trying to crawl up to the top of the hill. Our own napalm got him. He was burned."[262]

Corpsman Keith Price recalls Sgt Land: "I thought he made it. We got him out. He was hit bad. He had on his flak jacket—a lot of us had thrown them away. It was about 100° and double-time [*Price is in tears as he tells this*]. We stopped and filled-up canteens in the ditches. When we got up there, they were out of water, so we gave them what we had—the ECHO people. [*Price has a long pause, emotionally choked up*].[263]

CINCPACFLT recommended that Benoit receive the Navy Cross instead of the originally recommended Silver Star Medal, which is what was awarded.[264] Benoit lived in and graduated from high school in Red Lake Falls, Minnesota and had one sister.[265]

Sgt Harper's son, Michael, was 14 months old when his father was killed. After his death, Harper's second wife raised Michael, but never adopted him. "She kept me as her own and severed all contact with the family. We moved around—many years." He later joined the 82nd Airborne Division.[266]

Alfred Pino was known to his family and friends as "Freddy." While in high school, Alfred Pino loved sports and participated in the Clifton's football and Little League programs.[267] After graduating from Clifton High School, New Jersey in 1965, he originally tried to enlist in the Navy. Their quotas being filled, he joined the Marine Corps and arrived at Parris Island on 31 Jan 1966. After boot camp he became engaged to Loretta Russo of Clifton, and arrived in Vietnam on 7 July 1966.[268]

2/Lt Howell was later KIA on 7 July as the S2 of 1/9 during Operation BUFFALO when the CP bunker was hit by artillery and rockets at Con Thien in a barrage that killed 15.

[268] Information from Richard Delotto, 06 July 2004.
[269] In the original, 1st edition, of this book, HN Leonard N. Long is listed as KIA. This entry was erroneous since HN Long was KIA on 26 Mar 1968. The circumstances of his death are discussed on the entry for that date in this book. This error was noted by David L. Mellon in his letter of 22 Sep 2005.

[Col Reeder, SOP Khe Sanh, was unreceptive to reports by the Force Recon Det and B/1/9 of NVA in the area. When the mortar crew was caught 25 February 1967, along with maps, wire, mortars and equipment, the Colonel informed Capt Sayers that this was just some gear that had been found. "It was this action and what we didn't bring in that caused Reeder to tell LtCol Wilder that 'they have two 82mm mortars but only one base plate.' We captured the rest."[270]

Brigadier General Michael P. Ryan, Commander of 3d Marine Div (forward), who frequently visited KSCB had known Mike Sayers previously when the General was a LtCol and regimental commander for recruit training at Parris Island and Sayers was a Series Commander. He asked Sayers what he needed to defend KSCB, and Sayers gave him a "shopping list."[271] *The "list" included a light section of Marine tanks and a heavy section of Ontos, along with U.S. Army quad 50s, 40mm "dusters," and two Searchlights.*[272] *(He discovered that with a low cloud cover, the Searchlights could bounce lights off the clouds and illumine a large area).*

The tanks, quad 50s, Dusters, and Ontos were able to arrive at Khe Sanh due to the re-opening of Route 9 on 27 March 1967 when a Rough Rider convoy of 68 vehicles departed Dong Ha at 0832H and arrived at KSCB at 1155H without incident. It was the first time that Route 9 had been open since September, 1964.[273] *The two Ontos [Light Section, 2nd Plt, Co A, 3d AT Bn] remained at Khe Sanh as the convoy took back with them the remnants of E/2/9 to Dong Ha. FOXTROT Battery, 2/12, arrived 2 April (at 1430H) to relieve I Battery, 3/12.*[274]]

Capt Sayers wrote (on 27 Mar 1967): "On 20 Mar.. E Cmpany pulled out so we've [B/1/9] got it all alone again. Charlie is really out there now. We've been mortared 3 or 4 times since our first time but neg. results. Charlie didn't hit too good. Col. McGee was replaced by a Col Reeder. He's 10 times as bad as McGee. A bug on police & flowers and sanitation and shaving & clean clothes, etc. Highway #9 opened today. 1" rough rider got through from Phu Bia. Big deal. We now have a hot shower unit behind the mess hall. Also got 2 quad 50s and 2 Ontos up here. The Onti arrived today. Force Recon replaced by Div. Recon this week... We've lost a total of 7 helos in the last month. They don't stay here at night anymore... Our strength is now—don't feint—305 (including attachments). Each platoon is about 72-75 strong with their weapons attachments. We're fat. Our S-1 has orders to keep B [1/9] at 250 effrective."[275]

30 MARCH 1967

KEGLOVITS, 2/Lt Edward Joseph VMFA-542

On 30 March, Platoon B-3 of 1/9 discovered a NVA base camp just as the sun was rising. The Marines blasted away their LP but was informed that about 400 NVA were on line, approaching.[276] **At approximately 0830H, B-3 began receiving approximately 85 rounds of 82mm or larger mortar fire and took cover in the NVA bunkers and received no casualties.**[277] **Later that morning, at 1140H, fixed wing began working the area in their support.**

Second Lieutenant Keglovits was a NFO on a F4B (#151512) when his aircraft received hostile ground fire and crashed at XD804449 and burned while conducting an air strike in support of B-3 against mortar positions and caves where units of NVA had dug themselves threatening the KSCB. The plane crashed into the side of a hill and caught fire The pilot, 1/Lt J. B. Geller, ejected and survived but the navigator was still in the aircraft when it crashed.[278]

On 27 June 1967, a patrol from D/1/26 found a downed USMC F-4 aircraft at XD802451 along with assorted maps, documents, a section of rib cage and vertebrae and a dog tag for Keglovits, one .38 pistol, a USMC clasp knife, and a steel toe to a boot. Remaining portion of the aircraft was destroyed.[279]

"Just yesterday [31 March 1967] 3rd Plt [B/1/9] was sent to check out 2 caves on the other side of 861 ran into a gook position that was fortified with caves and sleep-

ing positions and had 130 [mm.] mortars showered on them."[280]

[On 12 April 1967, LtGen Krulak, CG, FMFPAC, sent a SPECAT EXCLUSIVE MARINE CORPS EYES ONLY message to CG, III MAF quoting a message exchange between Ambassador Sullivan (of Laos) and General Westmoreland.[281] This significant message portends much future action at Khe Sanh, not only for the imminent Battle of the Hills, but for the later 1968 siege battle and Tet Offensive.

Ambassador Sullivan: "I have been watching with great concern the situation developing in the western reaches of the DMZ, the area immediately south of this in SVN and the adjacent eastern frontier regions of Laos... As I see it, they have been taking two sets of actions in the last several weeks. First, they have moved a considerable amount of stores and equipment down the Ho Chi Minh Trail and have pushed the bulk of it eastward to positions just south of the DMZ either in SVN or in base areas on the Laos frontier. Secondly, they have moved vast numbers of troops (perhaps in divisional strength) across the western reaches of the DMZ into SVN, presumably to marry up with this equipment... I would like to suggest a hunch.. I start from the assumption that it is something which has a political and propaganda as well as a military content. I assume it is the constantly recurring effort to emulate Dien Bien Phu. It seems to me that the logical place for them to begin such an effort is at Khe Sanh.. [where there are forces] who can be quietly surrounded by troops which may be already tunneling in against potential air attack. They can make their preparations quite undisturbed because they control the hills and the countryside... They will assume that the Marines at DaNang will attempt to relieve Khe Sanh and that the Marines will therefore move in reinforcements as fast as they can. But these.. will be susceptible to ambush and destruction piecemeal. In short, I would assume that they will use the bait of a besieged Khe Sanh to draw more and more of your Marines into the totally inhospitable territory of western Quang Tri [Province]. Then.. they will send some of their other units.. and carry out major raids either on Hue or on DaNang itself... I wonder whether you would consider it prudent to pull your Marines and ARVN temporarily out of Khe Sanh in order to deprive them of the bait for their trap.. you could lift them out and also clear out friendly villagers in order to open up the hills for a full scale shampoo [and].. follow up by a massive campaign of defoliant spraying [and] saturate the area all around Khe Sanh with Arc Light raids... If you agree to pull temporarily out of Khe Sanh, please let me know.."

General Westmoreland replied: "I share your concern over the enemy's movements from Laos... within the past few days I completed one of my periodic personal inspections of the Khe Sanh area. [He then reviews various actions that make Khe Sanh defensible.].. Contingency plans exist to deploy on short notice my strategic reserve to predetermined locations in I CTZ... The CIDG base at Lang Vei and the USMC base at Khe Sanh serve as integral patrol bases for our surveillance activities in the northwest. In fact, it is from Khe Sanh that we launch PRAIRIE FIRE [i.e., SOG, later called SHINING BRASS] operations into the areas of more immediate interest to you... Experience has proved that the enemy has suffered his greatest losses when he has chosen to mass for attack against our defensive positions, or when we have managed to engage his forces in open combat.."]

The "Battle of the Hills" at Khe Sanh began this date with two platoons of B/1/9 (B-1 and B-3) moving out of their PPBs [Platoon Patrol Bases] at 0430H to check out some caves near Hill 861. At 0530H the two platoons moved until about noon and set in for chow after which they separated and moved about 300 -400 meters apart. As the 57-man B-1 moved towards the caves, a Marine in 3rd Squad spotted 4 – 5 NVA in khaki uniforms moving toward them and the Platoon Commander, 2/Lt James D. Carter, Jr. passed the word to hold fast. The NVA element moved to within 50 meters from the Marines, spotted one of them, and began to fire. After an exchange of fire, a fire team was dispatched to check out the area.[283]

[280] Letter from LCPL J.S. Brown to Lt David Mellon, 01 Apr 1967, attached to letter from David L. Mellon, 22 Jul 2005.
[281] CG FMFPAC 120337Z/Apr67 to CG III MAF.
[282] Letter from David L. Mellon, 22 Jul 2005.
[283] Comments of Sgt Milton G. Norwood, USMC Oral History Tape #992.; Comments of SSGT Dennis W. Ritchie,

The First Squad leader, CPL James Pomerleau, went down into a gully. "I heard a BAK! BAK! BOOM! And two guys from the fire team yelled, 'Get a corpsman down here!' Somebody had hit the [Willy Peter][284] grenade on the back of Pomerleau and blew him in half—cut him right in half,"[285] as smoke from the exploded WP round shrouded escape of the NVA.[286]

SSGT Gilberto Telles, the First Squad Leader, B-1 "..was there when Cpl James Pomerleau went after the NVA and got killed. I was very well acquainted with Pomerleau, for we had both seen action down in the Delta. It was quite hard for me to loose such a fine Marine. Pomerleau was due to get his Sergeant stripes as soon as we got back to Khe Sanh."[287]

As B-1 brought Pomerleau's body back up the hill, some 300 meters toward Hill 861, they began to receive heavy fire, pinning them down. LCPL Dana Cornell Darnell, a mortar ammunition carrier, saw his mortar gunner fall unconscious as the mortar tube he was carrying struck him in the head when he hit the deck as the ambush was sprung.[288] With extraordinary calm in the face of the intense enemy fire, Darnell retrieved the mortar. Due to the intensity of the enemy fire, the Marines having mortar rounds which had been distributed among the platoon, could not reach Darnell, so Darnell, with complete disregard for his own safety, raced through the enemy fire to gather the rounds. Unable to set up the mortar properly, he propped the tube between his legs and steadied it with his hands, using his helmet as a base plate and began to fire accurate rounds into the enemy positions. His A-Gunner urinated on Darnell's hands and tube to cool it.[289] An O-1E Tigerhound aircraft circling overhead marked NVA positions as fixed-wing bombs battered the NVA. (Darnell was KIA on 26 April 1967 while trying to drag a wounded Marine from a heavily mortared position.)[290]

The NVA fire having been silenced, B-1 was ordered to withdraw from the clearing and to leave their KIA with B-3 which was approaching, and join up with BRAVO-6 and assist B-2 which had lost four men.

After moving half an hour, a dug-in NVA force showered small arms fire on the Marines. One, PFC Wayne R. Barth, although hit, gleefully exclaimed, "I'm going home. I'm going home!" Although Doc Polland [later a D.O., Doctor of Osteopathy] started toward Barth, Lt Carter held him back due to the intense, deadly fire.[291] SSGT Gilberto Telles, 1st Squad Leader, B-1 "..was present when PFC Wayne R. Barth got hit. I remember coming up to him and trying to comfort him until the corpsman got there. He had been hit in the legs several times and was lying on the ground. He then proceeded to holler, 'It's OK, Charlie, I'm going home and I'll still be able to ride a bike.' In an instant, he was shot through the head and killed. Damn good Marine."[292]

Early on the morning of the 24th, 2/Lt Thomas G. King had led 30 Marines from B-2 plus a 81mm mortar section with approximately 120 rounds and 1/Lt Phillip H. Sauer (the Commander of the Ontos Section) to Hill 700 (XD804437), about a click south of 861 (XD802445) to provide security for platoons (B-1 and B-3) sweeping a cave area behind Hill 861. He set up his 81mm mortar tube, began firing into the cave area, and dispatched a 5-man OP to Hill 861 for better advantage to call in fire missions and possibly air support for B-1 and The OP advanced until it reached a bamboo thicket about 300 meters from the top of the hill, and at 1100H was ambushed by dug-in 20-30 NVA. The point collapsed, yelling "I'm hit!"[293]

Lt Sauer, a gung-ho Marine who always wanted to get into the action,[294] and the FO, PFC William Marks made it to a foxhole after the first burst killed the point man. The radioman and security took cover about 15 feet behind them as the NVA plastered them with fire. Lt Sauer, armed only with his .45 covered the escape of the others. Marks' M-16 had become caked with mud and wouldn't fire and a NVA round had burst the muzzle of the security man's rifle. Marks took off and ran with the others through the heavy fire. The radioman was hit in the chest and collapsed and the security man disappeared, so Marks ran blindly, stumbling and falling as bullets hit all around him along the narrow and slick mud path.[295] The 81 security had moved forward to investigate the contact, and Marks stumbled into them. Breathless, exhausted, and caked with mud, he blurted, "They're all dead. The other four. All dead."

Lt King immediately dispatched one of his squads to retrieve the four bodies. They arrived at the ambush site and had their hands on two bodies, but didn't see the

other two.[296] Due to the heavy fire, the squad was forced to withdraw and Lt King proceeded to call an artillery mission on Hill 861 where it was assumed the NVA were dug-in. Lt King continued to direct fire in support of B-1 and B-3 and the FO of B-1 radioed that the rounds were landing directly on top of a NVA company and to fire for effect. 105mm howitzers of "F" Battery, 12th Marines, fired 140 rounds into the cave area.

B-1 had been moving towards Hill 861 as ordered, but was ambushed with heavy automatic machinegun fire killing another Marine. The platoon disengaged, moved to a LZ and was able to medevac two or three of their wounded. Remaining behind were 4 WIA and 1 KIA, along with several new casualties. Receiving additional fire, the platoon moved to another LZ where another chopper arrived—along with NVA fire which killed another Marine and wounded three more. SSGT Gilberto Telles, First Squad Leader, B-1, was standing about ten feet from PFC Twomey "..when a chopper started to land. I was right below the chopper and I had to roll to my left or the left tire of the chopper would have landed right on top of me. As I looked up at the pilot, he got shot, the co-pilot took control and took the chopper up. The crew chief started firing away with the .50 cal. machinegun. Just then, PFC Twomey got on one knee to shoot at a sniper when a bullet from the hopper's machinegun hit PFC Twomey square in the head. Brains exploded all over. I seen PFC Twomey's body fall quivering for a few minutes until it stood still on the ground. I went over to check him out. The only thing left of his head were the jaws. PFC Twomey was a Nez Pierce Native American. I am of Lipan Apache stock. If it has been hard to accept all this carnage, [the death of] PFC Twomey was especially hard."[297] The chopper was unable to land, so B-1 dug in for the night with their wounded and dead.

B-3, the other sweeping platoon, fared no better. After B-1 left them with Pomerleau's body, they started to receive small arms fire, mortars and .30 and .50 machinegun fire from the ridge opposite them. A machinegunner in B-3 recalls: "We couldn't figure whether we were supposed to set in or not when all of a sudden all kinds of fire opened up on the ridge line across from us and rounds started to pop into us, and we jumped down... We heard a couple of guys get hit and they were screaming and it shook us up... It was the mortar section.. One of them seemed to be alright at first. He was on his feet running. Then he was laying down, unconscious. Another guy got hit twice in the leg and in the arm. It tore up his arm pretty bad, but he never let down his spirits. He kept his morale up.. One of the gunners in my squad gave up his machinegun and started carrying on his back a WIA who was hit in the leg."[298]

Fortunately, the NVA mortar fire was not accurate. Then friendly air began dropping bombs—too close. The bombs killed six Marines. "The jets blew my whole fire team away. I think they thought we were the enemy the way we were coming off that hill."[299] "There were bodies spread over the area. There was one guy almost completely mutilated. One guy was dying and all the rest of them were dead."[300] The Marine still barely alive but dying, PFC Daniel T. Perez, had a badly mangled leg, and he died. There were insufficient able-bodied Marines to carry both dead and wounded. Breaking Marine Corps tradition, the dead were abandoned in order to carry the wounded.[301] "I was in the middle of the formation.. and we moved to this area that had been bombed.. and parts of bodies were all over the area, and we were told to move past this area so that the platoon sergeant could move up and stay with this man who was dying. And the man wouldn't die right off, so we got the word to pick him up with all—most—of the gear we could carry and the wounded, and move down to the LZ."[302]

That night B-1 and B-3 dug in as best they could. They had no entrenching tools and dug using canteen cups and bayonets. One Sergeant in B-3 who had been shot in the legs kept telling everyone, "We're all going to die!"[303]

Casualties for the first day of the Battle of the Hills included 14 Marines killed, 18 wounded, and 2 MIA.[304]

A Marine with the Ontos unit later recalled: "I was told that he was cut in half by a .50 or .51 cal. NVA machinegun and that they recovered half his body eight days later."[305] Sauer's sister, Mary Schoelch, notes that although he remained behind in order to cover the escape of the other Marines (only Marks made it, however), he was only awarded the Purple Heart.[306]

Ron Taylor recalls Kent Leonard: "He was from Las Cruces [New Mexico] and I went all the way through school with him. Everyone was surprised when he joined the Marines because he was a real skinny kid and was a bookworm."[307]

SSGT Gilberto Telles, First Squad Leader, B-1, sat next to corpsman, Doc Pollard, that evening "..when I noticed bullet holes from side to side on my trousers. I

noticed three bullet holes in my pack that had also penetrated through three C-ration cans. One bullet had gone sideways and hit a can of blasting caps sideways and dented it. I was also carrying 2 ½ pounds of C-4 on top of my pack. Imagine if the blasting caps had gone off and detonated the C-4; I would have been scattered all over Vietnam."[308]

[*Co K/3/3 had been scheduled to relieve B/1/9 at Khe Sanh on 29 April, and the "advance party" of 3/3 was already at Khe Sanh on the 24th.*[309] *On 20 April 1967, SOP Khe Sanh passed to OPCON of 3rd Marines with commencement of Operation PRAIRIE IV. The Khe Sanh AO, not included as part of the PRAIRIE IV AO, was "a territorial appendage for operational control purposes to the 3rd Marines which, occupying the adjacent area of operations, was in the best position to oversee activities there and to reinforce if the need arose.. with the commencement of the operation, reports were submitted to the 3rd Marine Division via the 3rd Marines."*[310]]

[*B/1/9's patrol had revealed an enemy plan not unlike the strategy used at Dien Bien Phu in 1954. Reconstruction of the enemy plan*[311] *included isolation of the battlefield by mortar attacks on Dong Ha, Gio Linh, Con Thien, and Camp Carroll, all designed to deny fire and logistic support. A mortar attack on Phu Bai would endanger helicopter support, while destroying bridges along Route 9 would sever overland re-supply. In addition, a diversionary attack on Lang Vei, 4 miles west of Khe Sanh, would make the enemy threat appear focused there. LtGen Krulak summarized: "All this was to be ancillary to the main effort, a strong ground attack on Khe Sanh, coming southward from the mountainous regions near the Laos-RVN-DMZ corner." On 27 and 28 April, Phu Bai, Dong Ha, and artillery and logistic support bases near the DMZ were struck with some 1,200 rounds of rockets, artillery, and mortar fire, killing 10 Americans and wounding 226. Lang Vei was overrun on 4 May 1967 and Route 9 was cut. In retrospect, it appears that the North Vietnamese, not quite ready to strike, were anxious that patrols depart rather than expose their plans for the ground attack. The aggressive patrol of B/1/9, however, forced their hand.*]

[*Over the millennia, two annual monsoon rains of biblical proportions carved numerous caves in the ancient sea-floor that had been uplifted and folded into sharply-rising hills and cliffs at Khe Sanh. The rains and tropical heat ensured lush vegetation—with grass over six-foot high, bamboo thickets, and weathered the laterite soil, making it as slick as ice when wet, making ascending and descending the mighty hills arduous and dangerous. Because of this terrain, moving units were forced to fragment into squads and platoons. A necessity to maintain intervals between men so that one mortar would not kill many and to avoid many being in the kill zone of an ambush, movement through the tall grass, winding rivers, and frequent fog, made the possibility of getting lost very real. These considerations explain why patrols at Khe Sanh were so fragmented into small-size units. Moving squads, recon patrols, helicopters, commanders in them, etc., reminds one of chessboard pieces moving in various ways on the battlefield.*]

25 APRIL 1967

CARMICHAEL, PFC Dale Eugene	K/3/3
GAGNON, LCPL Patrick John	K/3/3
GIBBS, HM3 Michael Gerald[312]	K/3/3
LYVERE, PFC Ronald Lee	K/3/3
MONAT, HM3 Donald Henry Jr	K/3/3
NEAL, LCPL Charles Marion Jr	K/3/3
NELSON, PFC Stephen Carl	K/3/3

On 25 April a medevac helicopter landed at B-1's position about 1000H when the fog temporarily cleared, attracting a hail of small arms fire. It departed almost immediately, but not before the Company Commander (Capt Sayers) had debarked along with 22 men of B-2 and several wounded were embarked. Due to fog, this was the only helicopter able to reach B/1/9 on 25 April.[313]

As they moved, much gear plus three more Marine bodies were found. The humping of sharp slopes made slippery by the rain, anxiety of battle and the always realized possibility of death, and the lack of water made them dangerously desiccated and weaker as they progressed. The dead bodies still had some canteens of precious water to assuage their thirst. Even in death, Marines of Khe Sanh shared—gave—what they had to each other.

"We found another dead man. By his dog tags we recognized him as a man from First Platoon... The last three men were supposed to pick up this dead man and carry him along.. Word was passed to move out. We passed the word that the litter wasn't ready. Word came back, 'We're moving out anyway.' So we moved out, got about 75 meters from this dead man, and word was passed to go back and get him. The fog was, by now, very, very thick, and it was also dark. We told them we couldn't even find the path to get back there, and just moved on. We already had about three KIAs with us."[314]

[314] Comments of LCPL Donald A. Clark, USMC Oral History Tape #959.

The other sweeping platoon of B/1/9, B-1, still separated from B-3, had been able to evacuate their wounded, but not their dead, and moved carrying them all day until about 2100H.[315]

Fog delayed movement of the Battalion 3/3 Command Group under the leadership of LtCol Gary Wilder from Thon Son Lam until noon on the 25th, at which time 3/3 assumed OPCON of B/1/9. Co K/3/3[316] under leadership of Capt. B.L. Spivey, received the immediate mission from LtCol Wilder to take Hill 861 and be prepared to aid B/1/9 and exploit their contact.[317] K/3/3 proceeded shanks' mare at noon as artillery prepped Hill 861, approximately 5000 meters from the airstrip, and "a pretty good climb."

When it was about three-fourths there, Capt Spivey deployed Co K for the attack. It was about 1500H as two platoons separated to ascend the two ridge lines approaching the hill in a two-prong attack. An hour later, the Marines were about 500 meters from the top and had taken no fire. Upon permission from LtCol Wilder, Co K moved to take Hill 861. Platoon K-1 moved up the ridge line directly south of the summit of 861 with the Co K Command Group about 100 meters behind them; K-3 moved from the east to XD806445 (a hill later called "Hill 861-Alfa" during the 1968 siege battle). About 1645H, Marine 105mm blasted ahead of K-3, and then—a short round!

Tom Vineyard recalls: "My first Khe Sanh memory is standing in a line with the rest of the platoon, maybe the rest of the company, waiting for orders. While waiting, I was chatting with Cpl Hall. He was really scarred about this thing we were about to do... I have a vivid recollection of him. In my memory he was rather short, stout with a cherub-like face."[318] Cpl Hall had previously served in Co A, 3d Reconnaissance Battalion and on 12 July 1965 was shot while part of a team in which Lt Reasoner was KIA and received the Medal of Honor.[319] It was about 1600H. There was "..a loud explosion up front. As we passed through the area in a single file, Cpl Hall lay there mortally wounded. I have never seen anything like it. I can best describe it as he was broken. I saw no blood, just a quivering mass."[320] Hall pleaded, "Please don't let me die here. Please! Please don't let me die here."[321]

The platoons were not tied together due to the terrain. At 1700H, Cpl Alfonso Ray Riate, leading the Point Squad as Point, disappeared from view as he proceeded in the tall grass on the curved trail. (Riate became MIA and was repatriated by PRG 16 March 1973). At 1705H, the lead elements of K-1 reported heavy contact, approximately 300 meters from the crest of the hill. Cpl Maloney frantically yelled that his newly-issued M-16 rifle had jammed. Suddenly no one heard his screaming.[322] By 1730H, the Marines had advanced to within 100 meters of the crest, but were depleted of fighting troops; only 10 effectives remained in K-1, the remainder all WIA and KIA.[323]

K-1's corpsman, HM3 Michael G. Gibbs, had rushed to the forefront, the heat of the battle, to treat a Marine with a sucking chest wound and then moved him 15 meters to a safer location. He then rushed into the intense fire to help another Marine—and then to a third, where he received a wound that broke his leg. He remained there, quiet until darkness whereupon he and the others moved to a more secure area. HM3 Gibbs was killed the following morning during a mortar attack.[324] (Although his Silver Star Medal Citation indicates his death on 26 April, the Vietnam Memorial in D.C. lists him as KIA 25 April. On 7 July 1967 at 1605H, Marines of WHISKY Battery, 1/13 (the 4.2" mortars) digging a position near the LZ of Hill 861 uncovered a wallet containing personal effects and ID of Michael G. Gibbs, 795-99-92.)[325]

"Of all the firefights I had been in this was by far the worst. We were out gunned by a ton.. Within minutes several of the guys in the squad were hit. I remember the screaming, the confusion, the fear, and worst of all the feeling of certainty about my own impending death. I vividly recall seeing Dale [Carmichael] get hit by an exploding grenade." It had rolled near his head, and killed him instantly. "I believe I was next to him when he was KIA. The memory of that event stays with me to this day as it was especially gruesome."[326]

The sun was setting along with their hopes; darkness was setting in, along with the dark unknown, fear and terror. The Marines were just under the enemy bunkers

and Capt. Spivey was unable to disengage K-1 from the immediate contact with the NVA. K-3 had been unable to arrive at K-1's position; K-2 arrived about 1830H. All the WIA of K-1 were recovered along with all but four of the KIA. "During this time I had many people who were moving about, pulling in the wounded and dead, risking their lives every time they moved, but they did the job real fine."[327] 3/3 set in for the night in close proximity to the NVA. K-3 was within 100 meters of the top of Hill 861 and the remainder of Co K/3/3 200 meters to the south of K-3. The command group was at XD805435.[328]

With the arrival of K-2, an attempt was made to retrieve the 4 KIA, but when 2 additional casualties were taken while so doing, the effort was discontinued, although all remained within sight.

During the evening, ammunition was distributed, reorganization was made, and K-1 and K-2 made preparations for continuing the attack in the morning. K-3 continued forward but reported slow progress in the saddle northeast of Hill 861. They reached XD804444 and set in for the evening.[329]

B/1/9 had succeeded in moving to a point 800 meters northwest of Hill 861.[330]

[*Due to today's action, Co K/3/9, commanded by Capt Jerrold E. Giles, was flown into Khe Sanh from Camp Carroll. 3d Marine Regiment assumed OPCON of K/3/9 at 251830H and remained at the airstrip overnight.*[331]]

The sun arose on the Marines of K/3/3 still in place on Hill 861 pinned down by the enemy. Capt Spivey noticed, however, that by 0615H on the 26th, K/3/3's Third Platoon's presence was apparently still undetected by the NVA. Shortly before first light, K-3 was ordered forward in an attempt to take the enemy position from that direction. K-1 and K-2 were alerted to move out on order, pending developments of K-3's advance.[332]

2/Lt Curtis L. Frisbie led K-3 by stealth until the enemy positions could be observed and voices heard. By 0815H preparations for the assault were being made when the platoon came under an intense volume of automatic weapons fire and grenades, immediately sustaining casualties including Lt Frisbie, who was seriously wounded and medevaced.[333] Sgt Dana L. Dick assumed command as Platoon Commander.[334] LCPL Kermit Anthony Ray was KIA from a gunshot wound to his neck and PFC William Thomas Hedgepath received a mortal wound to his chest from NVA mortars.[335]

By this time it had also become apparent that B/1/9's platoons were a considerable distance to the west and could not influence the action. It was also apparent to Capt Spivey that he just did not have the horsepower to overcome the extensive and well-organized defense on Hill 861. Due to the close-in fighting, no supporting arms could effectively contribute to the action. Capt Spivey requested permission from Col Wilder to disengage K-3. Wilder concurred, and K-3 pulled back to a secure LZ to extract their wounded.[336]

K-1 and K-2 were instructed to disengage under cover of gunships which arrived about 1030H. The platoons leapfrogged 25 meters at a time down the hill, an arduous task to bring down their dead, wounded, and gear.[337]

At 0800H, Col Wilder ordered Capt Giles to move 2 platoons of K/3/9 to assist Capt Spivey disengage and evacuate his WIA and KIA.[338] "As we approached.. we could see them bringing down some of the wounded and dead. A lot of the men, as they were coming down, were telling us not to go up, how bad it was up there."[339] By 1600H all elements of K-1 and K-2 were within the 3/3 Command Group's position and medevacs completed. At

about 1900H, K-3 linked up with the remainder of Co K at XD806444. All Marines had disengaged from Hill 861. The Company, with elements of K/3/9, established a perimeter defense the night of 26/27 April and returned to KSCB the morning of 27 April, arriving by 1100H. After collecting all their gear and equipment, what remained of K/3/3 boarded aircraft and returned to Dong Ha. There had been 19 men killed from K/3/3, including two corpsmen and one who later died of wounds, two were MIA, and 36 wounded (evacuated) with 6 wounded (not evacuated).

The remaining Marines from B/1/9 did not fare as well during the 26th.

B-3 dispatched a fire team of 5 Marines to retrieve the body they had passed the previous afternoon. They had been gone only about 5 minutes when they became involved in a firefight. The rest of the platoon gathered their fighting gear and quickly moved to where they were, a path on top of a slope. As the platoon moved, they found one dead Marine. While moving another man was hit in the leg, breaking it.[340] They moved from about 0800H until they met up with their "6" and parts of B-1 and B-2 platoons at about 1030H.

The rest of B/1/9 had begun the day at 0700H attempting to move east along the trail leading to 861 and immediately encountered enemy resistance at XD795449. B-1 and B-3 linked up at 0840H at XD802443. Enemy small arms fire coupled with sporadic mortar fire succeeded in limiting B/1/9's advance to a bitterly contested struggle for each foot of terrain.[341]

That's the official version. The human version is given by SSGT Leon R. Burns, Platoon Sergeant of B/1/9 in an interview conducted 8 May 1967, while all was very fresh:

"..at dawn we moved out. We were still heading for Hill 861. We got to a small hill approximately 500 meters to the west of it. We got to the top of it. We took a few sniper rounds. We started down the far side, and then the stuff really hit the fan... The Third Platoon had managed to link up with the First, and my people were in the middle with the CP group. As they started down off this hill, getting right up to the very base of 861, they came under heavy automatic fire. At this time the First Platoon leader was wounded and about four or five other men. I lost one of my squad leaders and the M-79 man and one of my machine-gunners, LCPL Puelo who spotted an enemy machinegun, fired on it, exposed himself to fire and lost his left thumb and was wounded in the left side in two or three places... Sergeant Orton, my squad leader [and Point man] was cut in half by a burst from a machinegun..."[342] ["Sgt. Orton had been 1st Platoon, B/1/9, Right Guide, when we were on Libertyu Road in July, August, and September of 1966. He was transferred to another platoon when we got back to Okinawa and SSGT Cutbirth assumed the Right Guide position for 1st Platoon. I believe Sgt Orton was transferre3d to 2nd Platoon, commanded by 2/Lt Mel Thompson oin the Mekong Delta and then 2/Lt John Kramer, 2/Lt Tom King, and ultimately SSGT Burns, while the company was at Khe Sanh."[343]]

A round hit PFC Shelly Egly in his head. Still alive, he moved his helmet, spilling brain matter down his face. Another Marine grabbed him, "Stop it. Stop it," but Egly's brain injury caused him to jerk[344] until he died.

Following a medevac in which only one WIA was able to be rescued before mortar rounds forced the chopper to depart, the Company moved with everyone grabbing the wounded and headed over the ridge line accompanied by NVA mortars, and in the process some of the wounded were killed.[345]

One of those was Cpl Troy David Payne, Jr. Cpl Payne had not accompanied his company when it went to Hill 861 due to a cold. He was on light duty. A Marine Corps General landed at Khe Sanh to receive instructions on how to get to the scene of the battle once B/1/9 made contact. In a characteristic Marine move, Cpl Payne boldly climbed aboard the General's helicopter and accompanied him to the action, where he joined his unit. Upon reaching the battlefield, Cpl Payne carried wounded to the landing zone and fought off repeated enemy attacks with weapons he retrieved from the WIA. He moved right to the center of the impact areas to aid the stricken men to a safer position and even used his own body to shield the wounded from mortar fragments. He was hit. He died that others might live. He was awarded a Bronze Star Medal for his bravery.[346]

Capt Sayers reported to Col Wilder's S-3 at 1445H that he had so many casualties that he couldn't move. The S-3 responded that he should abandon the dead and just bring out his wounded. Capt Sayers replied he couldn't even move with his wounded and that he would assume a defensive posture, move into the fog, and fight until it was all over.

"We were carrying KIAs and WIAs in ponchos, four men to a litter. The heat deteriorated the bodies rapidly and they bloated fast. It was almost impossible to carry in the dark, the mud, and the rain. Many times we stopped our march to retrieve a body that had fallen out of a poncho and rolled down a hill. Identification was difficult. KIA tags were lost. It was not until we arrived back at Khe Sanh and matched our company roster with

the evacuation list was I convinced that we had not left a fellow Marine in the hills."[347]

Cpl Frank D. Thompson of B-1 spoke his emotion by his silence in an interview conducted 10 October 1967:

Interviewer: "What did you think about that?

Thompson: "It was bad, but we had to do it."

Interviewer: It was a bad situation, then. What did you feel about it and what did the other people feel about it? What did they think?

[*LONG SILENCE, NO RESPONSE*]

Interviewer: "Did they think it was a hopeless situation?"

Thompson: "It was—".

Interviewer: "Were the people scarred? Were the Marines scarred?"

Thompson: "You're always scarred when you're getting shot at."[348]

At approximately 1800H, K/3/9 elements married up with B/1/9. The Marines of K/3/9 gave all the water they had and their corpsman began attending to the wounded of B/1/9. The men cut poles for stretchers and, four men to a stretcher, saddled up and moved out skirting to the southwest of Hill 861. The air was dense fog, which gave the Marines some assurance the NVA might not detect them. It was muddy, and at one time it rained extremely hard. They finally arrived in the vicinity of XD805428 and set in for the night.[349]

As a result of the contacts, General Bruno A. Hochmuth, CG of 3d Marine Division, CHOPed the SLF, BLT 2/3, commanded by LtCol Earl R. ("Pappy") DeLong, then conducting Operation BEACON STAR, back to its parent regiment. Picked up in the middle of operations the morning of 26 April, 2/3 was transported by helicopter and fixed wing to KSCB with the lead elements (E/2/3) arriving at noon. Co G/2/3 arrived about an hour later, and Co H/2/3 another hour later. The companies moved out and set in for the night by 2120H at XD812431.[350]

27 APRIL 1967

GRIJALVA, CPL David Centeno B/1/9

[*M/3/3 arrived at 1610H to replace K/3/3 which departed at 1500H to Thon Son Lam (the Rock Pile). M/3/9 arrived at 1730H to replace B/1/9 which departed at 1630H by C-130 to Dong Ha and then trucked to Camp Carroll that night. The remaining company of the SLF, F/2/3, arrived and assumed the mission of reserve force. B/1/12, the SLF artillery battery, arrived at 1900H and was laid and ready to fire by 2150H.*[351]]

28 APRIL 1967

CHEEKS, CPL John Herbert B/1/9

Cpl Cheeks died of wounds (DOW) received on 16 March 1967.

[*During the day, air dropped 136,000 pounds of bombs—(DELTA 1, DELTA 2, and 18,000 pounds of DELTA 9*[352]*), primarily on Hill 861. 2/3 assaulted Hill 861 (XD803443) with 2 companies abreast (Co E and G) and secured it at 281600H encountering negative enemy but finding 200 fighting holes, 4 mortar positions, 11 sleeping bunkers, along with weapons and munitions. Half an hour later, 2/3 secured Hill 861 and recovered 6 Marine KIA previously reported as MIA.*[353]]

29 APRIL 1967

BODA, LCPL James Albert G/2/3[354]
SANSEVERINO, CPL Anthony F/2/12

Both died of gunshot wounds.

At 290800H, 3/3 attacked XD782445, a hill 750 meters northwest of Hill 881-South (XD778438). At 1120H, the right flank became engaged in a draw (XD792448) and suffered 2 KIA in a battle lasting until 1300H.[355]

H/2/3

On the morning of 30 April shortly after first light, H/2/3 moved into the area of M/3/9's contact of 29 April (XD791449). The NVA allowed Co H to move to within 100 meters of their bunkers and then opened up with .50 caliber automatic weapons as well as sniper rifles with high-powered scopes. An estimated 50 NVA soldiers dug in bunkers to their front and 15 NVA on their left flank at XD791447 caused immediate heavy casualties in the cross-fire of an estimated two NVA platoons at XD793446. Platoons H-2 and H-3 were immediately pinned down and took heavy casualties.[356]

From a small depression, 1/Lt David Spencer Hackett, the Company Executive Officer, noticed the location of the majority of enemy fire and charged 30 meters through a hail of murderous fire to direct fire of a M-60 machine-gun team near him against the enemy bunker firing on them.[357]

One of the Navy Corpsmen, HN Richard L. Kinney, rushed through the intense enemy crossfire, moving from one injured Marine to another to attend to their wounds. While doing this, he was killed by the enemy.[358]

1/Lt Hackett, still under heavy fire, directed the evacuation of several wounded Marines and sent his radioman to replace Cpl Clifford G. Davis, the radioman of the Company Commander who had been killed, leaving himself without communications. While moving through the intense fire to direct the attack, and move to the wounded 2/Lt Bruce E. Griesmer, the H-2 Platoon Commander, Lieutenant Hackett was killed by an enemy rifleman.[359]

In Memoriam
By L. McKay, Jr., May 2, 1967
(In honor of 1/Lt David S. Hackett)

In the shadows of a lonely hill,
Strong to be—strong of will.
There stands a man beside a tree,
A part of us—apart to be.
A day will come in traveling time,
A fire will roar and he will find
A moment's love when eternity's day
Bids him farewell and he goes his way.

A person special—the temperance here,
A chance to be when life's so dear.

---

[356] SOP 3dMarDiv/III MAF Rep 301245Z/Apr67, KHE SANH SPECIAL SITREP #3.
[357] Statement of Capt. Raymond C. Madonna (CO, Co. H/2/3) in Silver Star Medal file of 1/Lt David Spencer Hackett.
[358] Statement of SSGT T. H. Delorey in Silver Star Medal file of HN Richard L. Kinney.
[359] Statement of GySgt Wilfred J. Catalon in Silver Star Medal of 1/Lt David Spencer Hackett; Letter of Raymond C. Madonna, 02 March 1998.

A cause in mind, a purpose wrought,
But life is out and death is sought.

The sap does sour—the blossom dies,
Dandelions fade and summer cries.
The Spring has up and gone away,
But will return again someday.

But a time has come—a silent song.
Though life was short—his glories long.
Honor gained—courage won,
A purpose bettered—
day is done.

LCPL Jerome Hanrahan received a gaping hole wound in the left side of his back, but amazingly lived long enough to be medically evacuated. A good Catholic, he had time to say an Act of Contrition before two of his buddies (Cpl Gerald C. Pett and LCPL John Radgoski) carried him to the casualty collection LZ, passing the dead bodies of 1/Lt Hackett, Cpl Davis, and PFC Julius Kessler, who had been right behind Pett when the firing erupted and making Pett wonder why he lived and Kessler didn't.[360]

H/2/3 pulled back with its casualties and cleared the area for close air support strikes. They had suffered 9 Marines killed and 43 wounded (29 evacuated).[361]

E/2/3

E/2/3 meanwhile moved on the left flank of H/2/3, receiving several rounds of sniper fire during Company H's contact. E/2/3 continued to advance unhindered to the southern approaches of Hill 881-North.[362] E-3 had the mission of seizing the high ground on the right flank of 881-North when it suddenly came under intense small arms and automatic weapons fire and was pinned down. The Company suffered 2 KIA. Gunships were called to neutralize the enemy fire and casualties were successfully extracted. At 1927H, E/2/3 reported sporadic small arms fire directed at them and heard a warning device making a "beep" sound every time an aircraft passed over the area bounded by Hills 861, 881-South, and 881-North. E/2/3 remained in a tight perimeter at XD778452 for the night.[363]

G/2/3

At mid-afternoon after traveling one and a half hours through extremely dense foliage, Company G/2/3 arrived at the area where H/2/3 had made contact in the morning. At about 1700H G-1 moved two squads down to the base of the incline and got on line to assault the hill, half crawling, half walking up the bomb-riddled slope. The move was without contact until they arrived at the crest at which time the assaulting squads came under intense fire from automatic weapons and extremely accurate sniper fire from the top of the hill, about 75 meters to their front causing immediate casualties.

2/Lt Peter Hesser, commander of G-1, was standing right next to LCPL William Junior Roldan, who was attempting to clear his jammed M-16, when he was shot in the left lung and left shoulder and instantly died from fire as they came over the military crest of the hill.[364] A French photographer, Kathy Leroy, who accompanied the platoon, snapped one of the most famous photos of the Vietnam War as G-1's corpsman, Vernon Wike, bent over in anguish over the corpse of Roldan.[365]

The NVA were entrenched, having a wide field of fire. Darkness was approaching. Due to twilight, several of the spider traps were passed unnoticed as the hilltop was seized and the platoon established a 360° perimeter.

When it came time to clear and search the NVA holes and bunkers, Cpl David M. Coleman saw Cpl Richard Travis Schmitz being pulled into an enemy bunker. Cpl Coleman jumped in front of the bunker, grabbed ahold of Cpl Schmitz's foot and attempted to pull him out of the NVA bunker. The NVA inside, shooting through Cpl Schmitz's body, wounded Cpl Coleman in five different places and knocked him to the ground. Although shot in his legs, Cpl Coleman again crawled back trying to aid Cpl Schmitz, whom he thought was still alive. SSGT Ruben Santos arrived and resumed the attempt to dislodge Cpl Schmitz, tying a line to the man's legs. He tossed in a CS grenade, hoping the NVA inside would surrender. As he attempted to pull the Marine from the hole, the enemy soldiers fired through the body of Schmitz, wounding Santos. Realizing that Schmitz was dead, 2/Lt Hesser ordered his men to cover the bunker with dirt and logs and block all exits.[366] The Marines had thrown frag grenades inside before blocking it, and the next morning discovered one NVA, still alive, who apparently had sat on the grenade because of the holes in his rear end.[367]

G/2/3 had sustained two KIA this date along with 9 WIA, and set in for the night at XD789449.

M/3/3 and K/3/9

On the morning of 30 April, M/3/3 and K/3/9 linked up at 0800H as lead elements of M/3/3 attacked Hill 881-South (XD778438). The assault was led by Capt Raymond H. Bennett, CO of a Marine detachment aboard the USS ENTERPRISE who had requested TAD assignment in order to participate in the Khe Sanh operation.[368] During the evening of 29 April, 33 aircraft sorties dropped 250 DELTA 4 bombs[369] in addition to over 1,300 rounds of artillery that rained on the hill.[370] No one suspected just what was there. By 1025H, the lead platoon (M-1) led by 2/Lt Billy D. Crews, had reached the top of the hill and received sporadic small arms fire. As he progressed, M-1 ran into heavy opposition. M-1's radio operator, LCPL Francis Michael Palma, wore glasses which apparently glared in the sun and created a target. In the midst of a radio call, he was shot right through the eye by a NVA sniper.[371] and another platoon (M-3) commanded by 2/Lt Norman D. Houser reinforced M-1. Both units were hit by heavy fire from a well dug-in enemy in heavily camouflaged positions and by sniper fire from rifleman who had tied themselves into trees. They also received about 30 rounds of 82mm mortar fire and they were trapped, unable either to advance or withdraw. The NVA had permitted them to advance past their bunkers while scaling the steep slope of the hill and had excellent fire discipline.[372] The battle was to last six hours.

The thick vegetation, tall grass, and intense enemy fire had caused the various squads of M-1 to become separated. One squad was forced to seek cover several meters in advance of the remainder of the platoon where it remained some 5 hours.

Realizing the necessity to assist and supply the advance squad with ammunition—they were almost depleted fending off repeated NVA assaults—PFC Dorsey Burwin Williams exposed himself to the enemy fire by crawling forward with the ammunition. Advancing only a few meters, he sustained a painful shoulder wound but refused to return to safety despite being urged to do so, and continued forward. Approximately ten meters from the advance squad, PFC Williams threw several magazines of ammunition to them. At the same time, NVA soldiers rushed from the thick foliage. Although PFC Williams wounded a few of these NVA, one fired a burst of automatic weapons fire into his head, killing him.[373]

The Second Platoon (M-2) led by 2/Lt Michael R. Mitchell, veered to the left (eastern section) of Hill 881-S as 1st Platoon moved right (west) after scaling the declivitous slope filled with trees, vines, and slippery mud. As they advanced, a Sergeant yelled "Let's go get 'em, let's go around the other side and get 'em." One of the men in 1st Squad, M-2, replied "We're not lifers; we're draftees, we ain't going nowhere!" Just then, PFC Robert John Kotik was hit between his eyes and another Marine (LCPL Charles Shiver) was also KIA by a sniper; both immediately died.[374]

PFC Randy Neal McPhee was on point, got off the first shot in the ambush zone which precipitated the donnybrook firefight that ensued. McPhee was shot in his right hip. Actually, the round struck his cartridge belt and, although he screamed he was dying, the shot didn't kill him; the next shots did.[375]

It was McPhee's second Vietnam tour of duty. Everyone respected McPhee. "We'd stand watch together many times. I'd stand with him when it was his turn; he'd stand with me when it was my turn." He was considered "a Marine's Marine," "but just before we went into this particular battle he fell down before the Sergeant there and cried and begged not to go to this particular fight because, he said, 'If I go, I'm going to die'."[376] The premonition proved correct; he took two rounds to his chest. (When the Marines later withdrew from Hill 881-South and subjected it to massive bombardment, they returned on 3 May to recover KIA. In their search of the battle area, they located 37 human remains from M/3/3 and K/3/9, but none which could be identified as those of PFC McPhee. Remains originally identified as those of McPhee were later identified (by dental records) as those of Cervantes. All the corpses were in an advanced stage of decomposition.

As M-2 advanced, fire from one particular NVA bunker inflicted heavy casualties and halted its progress. A machine-gunner's jaw was shot off as a RPG round shattered the gun's receiver. The squad leader, Cpl William D. Early, attempted to fix the machinegun, then shouted, "I don't think I can fix it, sir." A mortar round exploded, killing CPL Early along with three more Marines.[377] LCPL James H. Whisenhunt, a rocket squad

leader with M/3/3, on his own initiative advanced into an exposed area with a clear field of fire and destroyed the bunker with a M-72 LAW. He then advanced across the open field to the remains of the bunker and killed the remaining enemy. While so doing, enemy machinegun fire killed him.[378]

The next mortar exploded just as 2/Lt Joseph R. Mitchell, Jr., peered from a kneeling position to see what was happening. The wood pump on his shotgun sent splinters into his face as he turned to his radioman, Don Hossack, and said, "Did you see that?" Hossack, next to him, put battle dressings on his own wounds, then turned to see the Lieutenant's boots jerk in a spasm as he died.[379] "He had one tiny piece of shrapnel that hit him in the left cheek bone, and it evidently deflected right up into his brain. That was the only mark on him."[380]

His mother, Florrie Mitchell, wrote the following:

Where are you now
Soldier boy of mine
you with the Pied Piper laugh
that even the smallest child
would try and follow in your footsteps.
Where are you now
Soldier boy of mine;
whose life was made
known by your courage and your dreams
of the unbelievable made known
by the believable.
Wipe the tears from my eyes,
Soldier boy of mine;
so they will not blur the vision of you
drenched in God's glory.

In an obituary by a classmate, Judge H. Gerald Reynolds wrote:

"Death is feared by most Americans. But today there lies one in final repose whose valor, courage, and honor will long be remembered. Joseph Robert Mitchell, Jr., known as 'Bussy' to those of us who were privileged to know him, lived as he died, a Marine!

"During his childhood years Bussy played soldier—during school, after school, in the summer, in the winter, during the day, and at night until his mother would make him take off his Confederate cap and go to bed.

"He often went to school wearing a Confederate uniform, sometimes with a long sword. Bussy marched and drilled the other boys in the neighborhood, preparing them for the time when the South would rise again. He always carried a confederate flag, one carried by an ancestor during the Civil War more than one hundred years ago.

"Time passed and Bussy Mitchell grew into manhood. He followed his lifelong dream of becoming a Marine. He attended Marion Institute where he was an outstanding cadet. He graduated from Auburn University, the same college where his father had been an outstanding football player. At graduation he was commissioned a Second Lieutenant in the United States Marine Corps....

"Bussy Mitchell left behind a young wife, a ten months old daughter, a bereaved mother and father... men such as Lt. Bussy Mitchell who gave their lives for freedom will live forever in the hearts and minds of those who love liberty."[381]

Staff Sergeant Karol R. Bauer was approaching the crest of the hill when he began warning his comrades to remain back and take cover as he heard mortars pop from their tubes. His warning saved many lives as moments later an enemy mortar barrage saturated the Marine advance. After this, SSGT Bauer rushed to assist the casualties to safety, and while assisting one Marine, an enemy sniper mortally wounded him.[382]

As Don Hossack moved to collect ammunition from his fallen comrades, he spotted his best friend in the platoon, PFC James Arthur Randall, seriously wounded. As he applied battle dressings and cradled Randall in his arms, his buddy died. He recalled how his friend often told Don he planned to be a Baptist minister after he left the Marine Corps. This event was preserved in a painting by Austin Deuel and became the basis for the San Antonio, Texas, Vietnam Memorial sculpture.[383]

Cpl Charles B. Baltafarmaggio, a fire team leader, moved on Hill 881-South. About 1600H, LCPL George Andrew Cervantes was atop the hill, about 10 feet from Baltafarmaggio on a tree line and stood up to throw a grenade. Just then, a NVA sniper shot him in the chest, killing him.[384] HM3 Jerry L. Bartachek, the Platoon Corpsman for K-2 of K/3/9, only a short distance away from Cervantes, immediately went to him and found him dead.[385]

Cpl Robert J. Schley, a machinegun team leader attached to M-1 fired his weapon for several hours until his gun was low on ammunition. While under heavy fire, he moved to locate additional ammunition. Successful, al-

though painfully wounded in his shoulder, he refused medical evacuation and returned to his gun as the only member of his team able to fire. While he continued to fire, he received a serious neck wound. Although profusely bleeding, he continued to fire, halting numerous enemy assaults until he died from loss of blood and his wounds.[386]

A NVA soldier was seen standing over Schley and his A-Gunner, LCPL Michael R. Morgan, firing into their position with his AK-47. Lt Crews fired his M-16 at the NVA soldier killing him, but not before he had shot both Schley and Morgan.[387]

Meanwhile, M-3 had advanced to the top of Hill 881-South, and after Cpl Larry Michael Smith, Point of M-3, reached the top, his squad was sent to reinforce the embattled M-2. He maneuvered towards their position, exposing himself to enemy fire when a NVA mortar round exploded nearby wounding him mortally. Cpl Smith had volunteered to be in this battle; being a short-timer, he could have chosen to remain behind.[388]

Other Marines of M/3/3 KIA today include: LCPL Peter Mazzillo who died from gunshot wounds to his chest, PFC Jerry Wayne Hood, who died from fragmentation wounds to his head; SSGT John Vincent Chutis, who died from fragmentation wounds to his head and abdomen, and Cpl Douglas Paul Hallock, who died from a gunshot wound to his chest.[389]

Third Platoon (M-3) was sent to assist M-2 to secure the eastern portion of Hill 881-South. 2/Lt Douglas Houser, commanding M-3, organized both platoons into an effective fighting force, rallied his men and directed and encouraged them to continue the assault. It became obvious, however, that the overwhelming volume of NVA fire dictated disengagement of M/3/3 to permit fire from supporting arms to reduce the objective. Although the hill had been heavily bombarded, many NVA bunkers remained intact or only lightly damaged. Additional bombardment was necessary prior to a continued attack.

M/3/9, sent to assist in the evacuation of casualties, suffered casualties as the NVA attempted to stop the link-up, pouring heavy blocking fire between the two Marine units.

"I was pinned down, talking on the radio behind a log about 8-inches in diameter. Woodie [Cpl Wayne Howard Woodard] piled in on top of me wanting to get into one more good fight before he left for home in two weeks. I described to him what he would see when he looked up and that the most accurate fire was from the bunker just to the right of the one small tree across from us. Not realizing that the gunner was still trying to take me out (since I had the radio) and that he was sighted in on my radio antenna that stuck up from my position, Woodie raised his head to have a look. Three shots from that automatic weapon hit him in the forehead about an inch below the front rim of his helmet. He fell lifeless onto me. Woodie saved my life with that move. I was just through talking on the radio and was getting ready to do exactly what he had just done. It cost him his life. I had filled out a lot of WIA and KIA reports and sent them, but something just took the heart out of me right then. I couldn't write up Woodie's report. Such a full-of-life, enthusiastic man dead, two weeks before he was scheduled to lave Vietnam."[390]

Co K/3/9 jumped off at 300615H to link up with M/3/3 and linked up with rear elements of M/3/3 at 300815H.[391] The squad leaders gathered at the base of Hill 881-South and, the battalion advanced, company on line, platoon column with K-2 and K-3 on the left side and K-1 on the right. "About an hour later all hell broke loose on the top of the hill. You could hardly hear yourself think where we were— so much small arms fire and mortar fire going on."[392] About half-way up, K-1 became pinned down by a sniper who seriously wounded the rockets man K-3 moved up 881-South through a ravine with thick vegetation. As they neared the summit, they saw the other platoons pinned down by enemy fire. "We weren't receiving any fire of any kind from our movement up the hill. So we continued moving up on the hill, thinking that they hadn't spotted us yet and we might be able to get in behind them. That's when we underestimated them."[393] The NVA position was prepared and they had lulled the unsuspecting K-3 into a trap.

First Squad of K-3 veered to the left with the Platoon Commander, 1/Lt John Braxton Woodall, and immediately found itself in cross-fire from an interlocking bunker system. The initial burst of enemy fire felled the two point men. LCPL Edwin Aponte was killed. "We had gone through Jungle Training together. He was a very good friend... The entire top of his head was gone."[394] Attempts to reach two critically wounded Marines were thwarted by the hail of minatory bullets. With a total disregard for his own personal safety, 1/Lt Woodall grabbed a rifle and placed accurate fire into a NVA bunker and then charged the bunker, killing both

its inhabitants and laid covering fire to enable the two wounded Marines to be carried to safety. As he covered their withdrawal, Lt Woodall was fatally wounded by an enemy sniper.[395]

The Second Platoon Commander, 2/Lt Stephen Thomas Hepner, was also KIA.[396]

R.J. Hill, the senior corpsman with K/3/9 this day, had begun the day with Lt Hepner's platoon and reached a point about half way up the hill when two Marines carrying a wounded Marine reached him. The Marine, wounded in an ear and trachea, needed a trach to restore breathing. "Then we were pinned down in a bomb crater, and I guess it was probably lucky that I didn't make it all the way to the top or I probably wouldn't be able to talk with you right now."[397]

LCPL John Burdette Appleton rose slightly from his prone position to see if he could locate the source of incoming NVA grenades. Just then one exploded before him, sending fragments into his face and chest, killing him.[398]

Although K-3 reached bomb craters and a heavy tree line where most of the dead and wounded were, they were only able to retrieve the wounded; "..the dead we couldn't hardly even move to get at them—snipers and machine-guns set up."[399] 37 dead Marine bodies had been abandoned on top of Hill 881-South; trying to retrieve them would have meant the loss of much additional life. "..from what I saw I didn't think it was really feasible to go up there and sacrifice other Marines to get dead Marines down off the hill, even though you are taught in basic training never to leave a dead Marine out on the field if at all possible."[400]

The order was given to withdraw. "We went back and sat in and waited that night for whoever was going to come back. They brought the wounded and the dead back in, and it wasn't very pretty. They—quite a few of my friends were dead or wounded pretty badly."[401]

The battalion force (M/3/3, M/3/9, and K/3/9) disengaged, moved to XD782445, and set in for the night. Evacuation of WIA was completed by 302155H.[402] Final casualty figures for the 881-South battle of 30 April 1967 were: 43 Marines killed, 109 wounded (90 medevaced), 125 NVA killed (confirmed) and 85 (probable).[403] 33 Marine bodies along with body parts were left on Hill 881, recovered 0222100H by 3/3 who evacuated the body parts in one bag.[404]

190 men of M/3/3 went into the battle; 26 remained.[405]

The Hill Fights
By PFC John P. Colvis, USMC
Infantry Rifleman, MIKE Company, 3/3

What day is this?
A yesterday that doesn't go away!
A day of honor and deep sorrow dipped in blood
to bond us all together.
A day whose sights and sounds and odors grabbed
our souls and won't let go.
Who amongst us would not lay down his life
for his friend?
Or go through hell to save one of our own? Indeed,
we've been there.
This is who we are.
Our covenant was written and sealed in blood
on and around the hills of Khe Sanh.
Was it 30 years ago?
Today we live our lives—to each his own.
But on this ground we all agree:
Our hearts will not forget
what took place at Khe Sanh.
Neither will our covenant be broken.

[On 01 May 1967, over 650,000 pounds of ordnance were dropped on Hills 881-South and 881-North from 166 sorties, including over 130 DELTA 4 bombs[406] and 1,445 artillery rounds.[407] Air support was the highest number of sorties flown in support of one battalion in a single day since Operation STARLIGHT in August, 1965.[408]

---

[395] Silver Star Medal Citation, 1/Lt James Braxton Woodall.
[396] Hepner is listed as KIA on 02 May 1967 in the Vietnam Memorial in Washington, D.C. However, the senior corpsman of K/3/9, HM2 R. J. Hill, found him on 02 May when the hill was searched for KIA, and placed him in a body bag. He had been shot by an automatic weapon across his chest and fallen in mud, face-down. Despite all the heavy bombardment, having been in the mud preserved his face, while most other bodies were in advanced decomposition and dismemberment. He was killed on 30 April 1967. [Conversations with R. J. Hill, 17 Sep 2003 and 27 July 2004.]

At 010630H, M/3/3 began moving to the 3/3 CP in order to be relieved by F/2/3 which was helilifted in. By noon, the turn-over was completed.[409]

E/2/3 on the southern slope of Hill 881-North (XD778451) received 18-20 mortar rounds at 0725H on 01 May along with small arms fire. The enemy fire stopped following counter-mortar fire and air strikes, but the Marines suffered 3 KIA and 16 WIA. Plans for E/2/3 to move on 881-North were therefore postponed so that further supporting arms might reduce the objective.[410]

E/2/9 completed its movement to KSCB via fixed wing at 1910H.[411]

02 MAY 1967

CARTER, PFC Anderson Jr.	**G/2/3**
DYE, CPL Ralph Victor Jr.	**G/2/3**
HEATH, HN Lloyd Lavern	**G/2/3**
HENDERSON, LCPL John Michael	**H/2/3**
HILL, PFC James Edward Jr.	**G/2/3**
VLASAK, LCPL William James	**G/2/3**

Following a final, heavy artillery prep, Companies K and M of 9th Marine Regiment launched an assault of Hill 881-South (XD778438), securing it at 1420H with negative contact.[412] All had changed. "It just didn't look the same anymore. There were no NVA, no trees, no nothing."[413] "There was nothing but the smell of death."[414] 33 Marine bodies and 1 bag of body parts from the M/3/3 and K/3/9 contact of 30 April were recovered.[415] One of the Marine KIA, brought aboard USS PRINCETON, was booby-trapped with a grenade inserted into an open head wound and a string leading out of the wound. The booby trap was discovered and disarmed.[416]

Hill 881 North was assaulted at 1015H with Company E/2/3 (XD772451) attacking the hill from the south and Company G/2/3 (XD787452) assaulting from the east, with Co H/2/3 in a support position between the two advancing companies.[417]

At 1455H, as 2nd Lt Andrew B. McFarlane's G-1 Platoon (with 1st Squad led by Cpl Robert E. Torter as point) received small arms fire from one automatic weapon (XD778460) which increased as the Marines advanced. Cpl Torter reported: "After our magazines were reloaded, we stood up to assault.. and we ran into quite a bit of a problem with the rifles. Of the 13 of us that went up there, there were 9 riflemen left, and only 3 of the rifles would fire.. and we took 10 casualties, 5 KIAs and 5 WIAs. The only ones not getting hit were my 2nd team leader, my 3rd team leader, and myself."[418] Unable to communicate, Lt McFarlane moved his Second Squad forward to aid Cpl Torter, as Cpl Torter left his covered position to retrieve his wounded. Driven back time and time again, Cpl Torter nevertheless managed to retrieve some of the wounded, but not all. He ceased his valiant efforts only after being directed to do so by the Company Commander.[419] LCPL William James Vlasek received a bullet in his temple and HN Lloyd Lavern Heath, trying to reach one of the wounded, fell from a burst of enemy fire.[420] Following UH1E gunship support, and through very heavy rain and fog that shrouded the movement of the Marines, two more casualties were spotted, apparently KIAs. As the Marines advanced to recover them, they took heavy automatic fire from the tree line and from ground-level foxholes resulting in another Marine killed (the squad leader) and one wounded (a fire team leader).[421] Total casualties: 6 KIA and 7 WIA. Co H/2/3, which had advanced to provide support to G/2/3 during the afternoon, received sporadic 82mm mortar fire at the same time as G/2/3.[422] Approximately 1400 rounds of artillery had been placed on the area of contact prior to returning.[423]

(The 4 MIA from G/2/3 were recovered 05 May at 1430H.[424] "One Marine had his weapon between his legs with a rifle cleaning rod down his weapon. Also he had a pen knife in his hand. As we looked over the weapon, a M-16, we found that there was a cartridge in the chamber. After speaking to his squad leaders, this man had definitely been cleaning his weapon earlier and was always cleaning his weapon. It was due to a malfunction...

All the Marines found there were shot through the head. One Marine, I might add, had an enemy weapon, when he got close enough to an enemy to take the weapon away from him. He had it underneath him. He also had been shot through the head.)"[425]

Home From the Woods
By William Stross[426]

As I stood on the hangar deck with its empty spaces that could hold 5,000 strong men—only a wooden crate stood, full of broken equipment, broken dreams, and blood-stained web gear, staring out at me.

All that was left of untold numbers of brown haired, sandy haired, bright eyed, innocent young—Oh, so young warriors.

I felt compelled to touch, and turn over, and hold every piece of metal, every piece of material, trying to feel, trying to bring back, trying to remember the faces, the smiles, the names of the men—the boys, that only a few days before had been my friends, my comrades, my buddies. My point man, my radio man, my tail-end Charlie.

I tried to remember what ha brought me to this hollow wooden graveyard so cold, with the sweet smell of death still surrounding it. I was numb, I was going back, almost running into the hills—the hills called Khe Sanh. Somewhere else called the foothills of Ohio, or Kentucky, or Pennsylvania, but remember, come back, you are not home. Remember you are in the mountains, the mountains of Khe Sanh, of the country of Vietnam, of the Province of Quang Tri.

This is the season for walking through the woods, dog at my side, rifle at the ready. Keen eyes, alert senses, await the rabbit or squirrel soon to cross my path.

Remember—remember, this is the season for walking in the woods, but these are not the familiar warm woods of Ohio, Kentucky, and Pennsylvania. These are the woods and trails of the mountains, the mountains called Khe Sanh.

My rifle is at the ready, my senses are keener and sharper than they have ever been. For no squirrel nor rabbit will this day graced my game bag. For today we are after bigger game, game that is wiser and knows the ways of these woods, the hills called Khe Sanh. They live here, they have lived here for untold thousands of years. These are the men of the woods, the woods called Khe Sanh.

We are the intruder, we are the trespasser, we don't belong, not in these hills, these hills called Khe Sanh.

I stopped by the local grain and feed store to buy my hunting license for a mere fee, for a mere fee—I could be master of the woods I walked.

But remember—remember, these are the woods, the woods of Khe Sanh, and no license has been issued. You are here, but not invited. You are here, but not wanted. You are here and they know, they know, these men, these men of Khe Sanh.

They watch, and they wait, these men—Oh so patiently they wait. They have waited for decades, before I was born, before my father was born. They wait, these men, these men of Khe Sanh.

As I run and hide behind a tree, I lose my breath, in the woods, the woods of Ohio. I can hear my heart pounding, pounding so loud that my friends can hear it, and I will be found, and it will be my turn to find them. But remember—remember, these are not the woods of Ohio, these are the woods, the woods of Khe Sanh.

My heart is still beating, harder, faster. These woods with the silent eyes of the owners—watching, waiting, silently, patiently.

We move, we stop, we look, every head in a different direction, every sense smelling, beating, a different smell, a different feeling.

We are getting close. The woods are quiet now, the only sound is the perspiration as it runs off the tips of the noses, on the forest floor, and splashes like a giant waterfall.

These young men—the prides of their families.

Fresh from the Prom, and remember the smell of her hair and the softness of her cheek, the smell that arose from her ivory neck.

Come back, come back, remember—remember, you are in the woods, the woods of Khe Sanh. We are through the field and valley, and into a tree-line. We stop, almost in unison.

I feel the tension—should we move on line, should we recon by fire, should we throw grenades?

Oh God! What should I do?

I look to my left, and then to my right. Joe and Ray nod, and John and Bill smile. Yes it is my decision—they trust me and why not, I have led them through many valleys, and many tree-lines, through untold streams and hills.

---

[425] Comments of Cpl John P. Hays, USMC Oral History Tape #949.

[426] Written 29 March 1984 and presented to the Stress Disorder Treatment Unit, North Chicago V.A. Medical Center. Mr. Stross, a veteran of G/2/3, died 17 April 1998. Printed in the Khe Sanh Vet *Newsletter* #6 (Dec 1987) pp. 11-12.

They trust me, they believe in me.

We move closer, the signal is given, the decision has been made, in the time it would take to drop a cigarette to the ground. They were all down, all these fine young men, bloodied and twisted, life being pulled and jerked from their still not grown bodies.

I hear the dog barking and he is excited, a clean shot, he should be running back, through the woods, these warm, pleasant woods of Ohio.

But remember—try to remember, these are the woods, the woods of Khe Sanh.

Their patience and silence had paid off, for the men of the woods, the woods of Khe Sanh.

Twelve young, shiny-faced, unassuming men—boys from the land, the lands of Ohio, Kentucky, and Pennsylvania, and everywhere the Stars and Stripes fly.

I pulled myself up on my elbow, can it be, these men of Khe Sanh, with their shoes made of old tires and hats of straw, have beaten and won over our shiny new rifles, our helmets of steel, and our flak jackets of the bullet-proof type.

I am getting tired now, I feel the life running out from my body, nourishing the floor of this forest, these woods, these woods of Khe Sanh.

I call out names, but no one answers.

Ollie, Ollie in free, can't you guys find me? I call out the names but these are not the names of my childhood days.

These are the names of my comrades, lost—never to speak my name again, nor I theirs.

I am drifting now. All is quiet and peaceful. I have done my best, I am due for a rest.

My men and I have come home, home to the woods, the woods of Ohio.

Simultaneously with Co G's advance, Co. E/2/3 advanced and almost reached the top of Hill 881-North.[427]

At 1500H, a heavy electrical, wind and rain storm struck the area limiting close air support and obstructing artillery fire. 3 Marines were struck by lightning.

"Halfway up the hill the assault was stopped, not by enemy, but by order of the Company Commander (Capt Lyons). 'How strange,' I thought. Nothing stops the assault except the enemy and we had not made contact.. We would later learn it was a matter of control—an inability to control such large units so far out in such bad weather... We were to return to the position we had previously occupied... It became increasingly dark during our movement back to our previous position, and by the time we arrived it was night. It was still raining. Everyone was tired and miserable and the bone-chilling rain didn't help. We searched out the inner perimeter and, after doing so, each platoon took up their old positions. It was still raining hard."[428] It was this nightly re-occupation amid the noise of rain that was to prove deadly within a few hours.

With gusts up to 40 miles per hour, LtCol DeLong pulled back the battalion to more defensible terrain for the night.[429]

"It was 0400 in the morning. The rain had stopped and there was an eerie mist hovering over the hill. I had taken my boots off, wrung the water out of my socks, and turned my boots upside down to allow them to drain. Everything was quiet. The silence was broken by my second squad leader [Sgt Billy Like]. I heard him shout, 'Halt! Who goes there?' With that challenge the entire northern half of the hill exploded. We were hit. I sprang for the bunker entrance. As I did so, one of my Marines was blown in on top of me, badly wounded... From my right at about 2 o'clock enemy machine guns

were raking my section of the perimeter. At the same time, enemy mortars were falling over the entire hill.. and I knew this was not just a probe. My second squad leader was nearly cut in half by machine-gun fire."[430]

CPL Dennis Paul Bergenstein, machine-gunner, died about four feet from Larry Welch. Everybody got killed there except one guy. Later, when Bergenstein's body was recovered, there were 20, 25 dead NVA in front of his hole.[431]

Co E/2/3 (at XD778451), a small hill 500 meters south of Hill 881-North was under attack by an estimated company-size unit,[432] The Second Platoon (E-2), under the command of 2/Lt James R. Cannon, situated on the northeast section of the perimeter, bore the brunt of the assault.

PFC John R. Meuse, the radio operator of First Squad, E-2, who had chased down a wounded man on May 1", was seriously wounded during the initial burst of fire today. When asked by 2/Lt Cannon of the situation, he replied that he had been hit and gave the impression he was dying. He also said that his squad had been penetrated and their positions heavily overrun. Though mortally wounded, he refused to abandon his position and seek the medical help that could have saved his life. He instead remained on the radio for over an hour to inform his company commander and platoon commander of the situation. This accurate information on the disposition and nature of the enemy force enabled the company commander to make essential decisions on the employment of his maneuvering elements and the coordination of supporting arms necessary to repulse the enemy assault. (PFC Meuse was found about noon, still in his position, his radio hit but still working, his hand-set still in his hand, and five enemy dead in front of his position.[433]

An engineer of Co A, 3rd Engineers, attached to E/2/3, LCPL William Thomas Womble, unhesitatingly rushed from his position, retrieved ammunition from overrun positions, and proceeded through heavy automatic weapons fire to redistribute badly needed machine-gun and 60mm mortar ammunition. Then, spotting several pinned-down Marines in platoon E-2, he opened fire with his M-14 and single-handedly engaged the enemy, drawing their fire upon himself so that the Marines in the bunker could gain fire superiority. As he daringly delivered a large volume of well-aimed, accurate fire into the enemy, he was instantly killed by heavy automatic weapons fire.[434]

The fight was bitter to the end.

SSGT Javier Arturo Sanchez was killed: "A 'young', clean cut, very personable, married Marine—had just become a father.[435] Also killed was PFC Robert Henry Kruger, Jr. Before entering the Marine Corps, Kruger had been active in his church, Trinity Lutheran Church in Clifton, NJ. He had attended Clifton School #4, Christopher Columbus, and Clifton High School where he played varsity soccer before graduating in 1966. He enlisted in the Marine Corps prior to graduation, attended the graduation ceremonies, and departed for boot camp the next day. He was only 18 years, 10 months old, when killed.[436]

The Company Commander, Capt Lyons, sent a squad from E-1 to assist, but they never arrived. Another squad was sent. It too never arrived. NVA gunners decimated the squad, killing and wounding most.[437] Both squads had been badly hit trying to reach Jim Cannon's E-2. A 3.5" rocket launcher team was dispatched and arrived. LCPL Thomas Rice, carrying the launcher, and PFC Phillip G. Skinner who carried the rockets and Rice's M-16, prepared to fire. NVA fire, however, spewed rounds into their area, and just as Rice asked for his rifle, Skinner raised up a little to pass it and was killed by the NVA fire.[438] Cannon was just in the process of directing their fire when an explosion went off right before him, knocking out the rocket team. "I was still standing. For some ungodly reason, I thought nothing could touch me."[439]

Another Marine instrumental in containing the enemy was Cpl William K. Downing, a member of the composite squad organized by the Company Commander and commanded by 2/Lt John L. Eller (E-3). Cpl Downing, second in command of this squad, moved his fire team in the direction of the enemy penetration and was wounded in his leg. The squad was able to halt the advance of the enemy. Someone asked if he needed medical attention, and Cpl Downing shouted, "Don't come down here and help me; take care of the rest of the men first." He continued courageously to deliver continuous and effective fire on the enemy forces as casualties were removed under his covering fire. Having ensured that the last wounded Marine was evacuated, he remained firing from his position. His body was later found with 6 dead NVA around his position.[440]

All during the battle, the Second Platoon Commander, 2/Lt Cannon, repeatedly exposed himself to en-

emy fire as he moved from position to position, occasionally engaging in hand-to-hand combat, skillfully directing the defense of his critical position[441] "I informed my company commander that my entire 1st and 2nd squads were wiped out, that there was only one friendly position up there—my bunker. My third squad, although lightly engaged, was still intact and had suffered no casualties."[442]

After hours of bitter fighting, the penetration was contained, action was taken to eliminate remaining NVA. First Platoon, H/2/3, was approaching on the extreme right, moving northwest along the ridgeline XD785450 – XDE778460, placing them at the rear of the noisome bunkers. As they advanced, they received intense small arms and .50 caliber machine-gun fire, almost immediately sustaining a number of casualties from the well-fortified and well-concealed bunkers and spider holes.

Results of the action: 27 Marines KIA, 84 WIA. Cannon writes: "I would cry later and when I did the tears would never completely stop. The memory of these Marines, so young, so brave, would stay with me forever."[443] Later he would reflect on Meuse: "After finally reaching his position in the morning I stood there for the longest time wishing I could have reached him in time. I remember thinking, 'My God, how young he was.'"[444]

"PTS"
By James Cannon (E/2/3, 1967)

It was long after Nam
that I went astray.
Thinking of those brave men and
of 3-4 May.

For many years after
I would just sit and think,
But it was the pullout that
brought me to the brink.

I felt myself slipping
I could not hold
It was Post Traumatic Syndrome
I was finally told.

Fifty-eight thousand
gave their all,
But in the end
the South would fall.

All for what?
I could not understand,
Cause the whole damn country
was not worth one single man.

Today my walls are covered with
memories in this place I call home,
And I continue to wrestle with this
Post Traumatic Syndrome.

I ask 'will it ever be over?'
As I lay at night and pray,
And I hear a tiny voice answer:
Yes, maybe, someday.

Battalion 2/3 (E/2/3(+), G/2/3, and H/2/3) passed the night with three companies in tight perimeter defense on the southern slopes of Hill 881-North surrounded by barbed wire, trip flares, and Claymore mines.

04 May 1967

CRENSHAW, CAPT William Anderson	A-101
JAGGERS, CPL Thomas Murl	G/2/3
STALLINGS, 1/Lt Franklin Delano	A-101

Jaggers "..was from Mississippi and he spoke with the accent and everything... He was a short-timer. He was given the option of staying aboard ship in supply because he had so much time in country, or to go out in the field, and he wanted to go out in the field with his friends. We had just gotten a re-supply of food, and Jaggers had been transferred out of a line company to supply and took charge of all of the food from the helicopter. He filled his hole with cases of C-rations. I remember we were all sitting around his hole, and while we were talking and he was giving us our individual food some artillery rounds started falling in. They were our own rounds, and some of them landed short. Jaggers was killed and another guy lost his leg... Jaggers tried to get into his hole, but his hole was all filled-up with all these cases he'd put inside. So he laid on top of them as best he could, and he was decapitated."[445]

At 040315H, Lang Vei Special Forces Camp (XD795360) came under mortar attack that lasted 10-15 minutes followed by a ground attack through Lang Vei Village by an estimated NVA battalion. The attack was aided by several VC infiltrators who had posed as recruits. After killing the guards, the enemy force which had broken through the wire by Bangalore torpedoes under the leadership of the infiltrators inside the camp[446] proceeded systematically to destroy the vital installations within the compound—the communications center, the command bunker, and to eliminate key personnel. The

[444] *Ibid.*, p. 11.
[445] Interview of Robert Maras [G/2/3] by Dr. Peter C. Rollins, undated.
[446] Stanton, Shelby L., *Green Berets at War*, Novato, Ca.: Presideo, 1985, p. 148.

swiftness and the thoroughness of the raid reflected a well-planned, well-led, well-executed attack.[447]

Within minutes after breaching the wire, the command bunker in which Capt Crenshaw was sleeping was hit with an estimated anti-tank rocket. Inside the bunker at the time it was hit were the Commander, Capt Crenshaw, the Team Sergeant, MSG William Steptoe, and Captain Ledee. As he attempted to exit the bunker, Capt Crenshaw was killed by small arms fire. While this was happening, 1/Lt Stallings, on guard duty approximately 20 meters from the command bunker, was killed by small arms fire at his guard post.[448]

The bullets that killed Captain Crenshaw went through Steptoe's arm. "I was in the team house asleep on the lower bunk when the first rounds exploded. As I went down the steps in my underwear, a man jumped up and fired at me, and I dodged the bullets that hit Stallings. He fell, hit in the chest... As I hit the main bunker, a mortar hit me, blew off a finger and got me as I dove through the door. Once I was in there I talked to Crenshaw who was standing up against the wall. I had my back to the bunker and I told him that people were in the camp. At that time a burst from an AK-47 got me in the left arm and shoulder, and the same bullets that got me killed Crenshaw. He was a black man, so was Stallings."[449] Crenshaw had been in country for two weeks at this time and had just returned from a patrol. Steptoe leading a 30-man patrol that engaged the NVA in a terrific fire-fight near Hill 881, had reported enemy near Hill 881 of division-size to SOP Khe Sanh (at that time, LtCol Reeder, called "Cynthia" by the Special Forces) who dismissed such information as ridiculous.[450]

The insider enemy agent, Dinh Nhon, was recruited by the VC approximately January or February, 1967, and sometime in April, the VC directed him to join the CIDG at Lang Vei in order to obtain information about the camp. After joining, Nhon recruited Sam Boi who was to determine location of bunkers in the camp, A Loi, a member of the 103rd CIDG Company, who was to report all the guard positions and how well they were manned, Than Dinh, a member of the 101st CIDG Company, who was to make a sketch of the camp, and Sang Dinh, who was to report on supplies brought into the camp. Nhon and his helpers in the camp were informed about the attack and given instructions, including removal of their shirts so the VC attackers could recognize them during the attack. On the night of the attack, Nhon and Sam Boi killed the CIDG guards on the northwest positions of the camp, and then Nhon led the VC force through the wire and remaining mine fields into the camp perimeter.[451]

Results of the attack: 2 U.S. Army soldiers KIA and 2 WIA, 20 CIDG KIA, 34 CIDG MIA, 7 enemy KIA (confirmed) and 5 more possibly killed.[452] The new Commanding Officer of A-101, Capt Frank Willoughby, was a former USMC non-commissioned officer.[453]

At 1530H, F/2/3 and E/2/3 commenced a final assault of Hill 881-North. Movement was slow and methodical and only the southern edge was secured by nightfall.[454] Co C/1/26 began arriving at 041350H by fixed wing from Phu Bai, completing its movement by 1610H.[455]

At 041530H, Companies F/2/3 and E/2/3 began a final assault of Hill 881-North through very densely vegetated terrain. Movement was slow and methodical and they only reached the southern edge of the hill.[456] 2/Lt James Cannon (with his platoon now strengthened to 17 men with the addition of a gun team and rocket team) recalls: "Echo Company was guide company and Foxtrot was to guide on us. Foxtrot Company fell behind on my left and was slow maneuvering even though we met minimal resistance. To prevent any decrease in our momentum we, Echo Company, pushed forward up the ridgeline and over the crest and into a hasty defense. We were already in our hasty defense when Foxtrot company arrived... There were a few NVA bodies lying around on the hill... Just to our front stood a peak. It towered over us. Sooner or later it would have to be taken. It was too late in the afternoon to do it now. We set about establishing our night defense... There was a sense of relief throughout the company."[457]

[457] Cannon memoir, 14 Dec 1990, cited.

Hill 881-North was secured at 1445H following an attack by F/2/3 supported by fire from E/2/3 with G/2/3 assaulting from the east along the northwest ridgeline.[458] "The smell of death was everywhere. There is no doubt those 1,000 and 2,000-pound bombs took a terrible toll of them. We found shreds of clothing, bits and pieces, but nothing you could put together."[459]

"After the actual capture of Hill 881 North by E Company under Captain Al Lyons and Golf Company under Captain Jim Sheehan, it was determined that the place was not good defensive terrain."[460] (This may explain why Hill 881-North was not subsequently manned by Marine infantry companies as were Hills 861 and 881-South).

At 052050H, E/2/3 at XD777456 and F/2/3 at XD773459 received 92 rounds of 82mm mortars equally divided between the two companies. One Marine was KIA and 6 WIA.[461]

CPL Carl Franklin Pepple, Jr., of CAC OSCAR, was on watch at night by himself and killed by an explosion from his own grenade. Carroll ("Chip") E. Daly, also with CAC OSCAR (Plt O-3), speculates he may have pulled the pin on a grenade. "It was the practice of some Marines to do this on watch. They would hold the grenade this way as a method of staying awake. They were convinced that they would never fall asleep when it meant certain death."[462] Pepple had enlisted 30 Mar 1964.[463]

07 MAY 1967

THOMAS, LCPL Barry Don E/2/3

In the HQMC weekly listing of USMC KIAs[464] there is an entry for THOMAS, LCPL Barry D, 2135198, Died of Wounds (DOW) 07 May 1967, from fragment wounds to the body. The entry notes: "(Date of initial injury and circumstances unknown)," and the Vietnam Memorial listing indicates THOMAS as a member of E/2/3. On 01 May, E/2/3 suffered 3 KIA from a morning mortar attack (*q.v.*), but no KIA are listed in the Vietnam Memorial casualty listing nor on the HQMC weekly casualty memoranda. Possibly Thomas may have been one of these.

Co E and F patrolled northwest of Hill 881N with F moving northwest and E moving west and then swinging north to marry-up at the final objective, Hill 803 (XD746473).[465]

Two platoons of Co F/2/3 were moving along a trail that was fairly well-used along a stream and then pulled off the trail to proceed up the slope of Hill 778. F-3, running point, collided with what appeared to be a NVA with a mortar tube and the Company began to receive automatic weapons fire from three or four directions. Since it was fairly light, they continued to maneuver, one squad on line, sweeping through a tree-line as the enemy fire rapidly intensified and included grenades.

"We had quite a few wounded at this time. My senior corpsman was hit; he was about ten feet from me when he got hit. And three guys that was in the squad that was going to sweep through [the tree-line] got hit. The NVA seemed to be coming in closer and stronger with their automatic weapons. We started taking a few more casualties."[466] 2/Lt Cannon (E-2) "could hear Foxtrot giving situation reports to Battalion. They started off with messages such as 'Pygmalion 6[467] this is Foxtrot

[465] Cannon memoir, 14 Dec 1990, cited.

[466] Comments of Cpl James H. Ward, USMC Oral History Tape #997.

[467] Note: the "6" is the Commanding Officer, the "5" is the Executive Officer, the "one four" is the Air Officer, the "one

6, we have encountered snipers; we have 1 'kangaroo' (KIA) and 3 wolves (WIA)'. In no time it became 'we have 5 kangaroos and 9 wolves'. The situation was intensifying."[468]

The Marines pulled off to higher ground, taking heavy casualties. The Platoon Commander, 2/Lt Patrick G. Carroll, had been hit in both legs and an arm, SSGT Watts was hit in his shoulder and mouth, Cpl McKeen was hit in his chest and both lungs, and there was only one corpsman remaining.[469]

LtCol Earl R. Delong, PYGMALION-6 (CO of 2/3), immediately ordered E/2/3 to reinforce F/2/3.

2/Lt Cannon, peering through his field glasses upon reaching high ground spotted Foxtrot. "What I saw horrified me. The North Vietnamese were crawling over men of Foxtrot company and stabbing what appeared to me as wounded Marines. Foxtrot company had been drawn into a saddle along a small ridgeline and couldn't move. I saw the NVA attempt to drag off what looked like a wounded Marine. I grabbed a M-60 machine-gun and determined that a clump of bushes.. would be my reference point. I determined that all left of those bushes were dead Marines and NVA. I opened up with a long burst of fire raking the ridgeline from the bushes to the tree-line and the left end of the finger. The range was about 1100 meters. I turned and told the weapons platoon sergeant to take the other gun, watch my tracers and rake the finger from the bushes to the left. Our fire was right on target. Meanwhile my company commander had come up behind me. He shouted, 'Get off the gun Cannon.' 'Go to hell' I replied and kept firing. I meant no disrespect. He had not seen what I had seen. I knew what I was doing."[470]

Pygmalion-6 ordered ECHO-6 to dispatch 2/Lt Cannon's platoon [of 13 men!] to pull F out. Upon reaching the hill, "we formed on line and swept up the hill. At the top I found 2/Lt Carroll and three other Marines.. It was payback time. I was glad that I could help him. He had helped me so much just six days earlier. 2/Lt Carroll informed me that he and the other three Marines were the only ones that could brake out and reach the high ground."[471] 2/Lt Cannon, leading two squads through Foxtrot which fired over their heads, passed a big black Marine who asked, "Who was that mother f. on that machinegun?" Cannon cautiously asked why. "He replied, 'he saved our asses'. I felt relieved. I believe he was a gunnery sergeant. We passed through Foxtrot and opened up with our assault fire. My Marines ran, firing and screaming across the northern finger."[472] The NVA fire ceased, the position was secured, choppers began to arrive to extract Foxtrot Company, and Echo provided security. Cannon was the last to depart.

Results of the engagement: 24 Marines KIA, 19 Marines WIA. The majority of the casualties were taken during the initial moments of the encounter.[473]

Lance Campbell, recalling the scene of the KIA: "As we reached the edge of the ravine, I immediately noticed the dead Marines who were all lined up in a neat row. The horrible thing that we first saw was that most of them had no faces. We realized what the NVA had been doing when we saw them first overrunning the main group. They were firing full auto into the dead and wounded. Some appeared to have been stabbed and that was probably the bayonet action we saw. One of the dead I recognized only by his reddish-blond hair and his slight build. His face was totally unrecognizable. I don't remember his name and really didn't know him very well. But [of] all the Marines who died that day and throughout my tour, I think of this Marine the most when I think of Marines I knew killed in action. For only a couple of days before this he was going around showing everyone a picture of his brand new baby girl. I wanted to break down and cry!"[474]

"After we got back aboard ship.. there was an investigation: Foxtrot Company was missing a man. They wanted me to take my platoon back in there and find him. I thought: Somebody's crazy! There's no way I could find him. I personally checked that hill. There were no Marines left. He may have been missing, but he certainly wasn't on that hill anymore."[475]

The MIA was PVT Robert Jacy Todd.

The Company Executive Officer, 1/Lt Richard D. Koehler, wrote Todd's parents: "On 9 May the First Platoon was taken under heavy automatic weapons fire.. During this struggle your son was mortally wounded and his death was instantaneous. His body was carried by his platoon Sgt. and comrades to a helicopter landing zone for evacuation; however, at this time the company again came under attack by a strong element of a North Vietnamese Army, and the ensuing action was such that evacuation of your son's body was not accomplished.. Aerial reconnaissance of the area was conducted for the next two days in an effort to ascertain that his body was still there. The unsuccessful search can only lead to the conclusion that his body was bound by the enemy when they recovered those of their own dead. Your son at this

time has been placed in the status of 'killed in action – body not recovered'."[476]

F/2/3's action took place at XD747473 and they later moved to night positions at XD750463.[477] The Joint Casualty Resolution Center Report (Case 0675-0-01) states that on 09 May 1967, Pvt Robert J. Todd of F/2/3 was "..struck in the head and back by small arms fire while near Huong Hoa Village, in the vicinity of coordinates XD860375 [The location known as the Old French Fort]. The tactical situation prevented other members of his unit from reaching him." A map in the file correctly portrays the location at coordinates approximately 1000 meters east-southeast of Khe Sanh village, an erroneous notation. [478]

There were four brothers in the Todd family and another, James, was stationed in DaNang. Pvt Robert J. Todd had been in Guam, but got into disciplinary trouble, was in the brig and, to get out, volunteered for Vietnam duty. He never informed his mother who assumed he was still in Guam. He was in Vietnam only two months when he died. He had written his brother in DaNang who knew he was in Vietnam, but his brother also had not informed their mother. His mother's first thought, upon hearing of his death, was, How could this be? He's in Guam.[479]

The Marines in F/2/3 were unaware they had a MIA. There are two differing accounts of Todd: A black Sergeant recalls putting Todd on a helicopter and evacuating him. 1/Lt Koehler's letter indicates that Todd was left on the LZ, the unit withdrew due to enemy action, and when they returned, the body was missing.[480]

The Joint Task Force investigated this case in 1993 without success. "Unless new information comes to light there is little likelihood that Pvt Todd's remains will be found.[481]

10 MAY 1967

AHLMEYER, 2/Lt Heinz Jr.	A/3rd Recon
LOONEY, CAPT Paul Thomas	HMM-164
MILLER, HM3 Malcolm Thomas	A/3rd Recon
SHARP, LCPL Samuel Arthur Jr.	A/3rd Recon
TYCZ, SGT James Neil	A/3rd Recon

Lance Corporal Samuel Arthur Sharp, Jr., loved the outdoors. An only son, he accompanied his family camping, hunting, and fishing in the great outdoors of California and Oregon. He had lots of friends and was liked by everyone who knew him. He never participated in school sports, but preferred being in the hills and forests with his dog "Spot," purchased for one dollar when he was five years old. He bought his own 270 Winchester with a scope. After graduating from Pioneer High School, he worked at a gas station for awhile and then volunteered for the Marines in the Fall of 1965. He often wrote of the new car he planned to buy upon returning stateside, a Malibu, and told his dad to take care of his rifle and use it if he wanted. He asked if his dad had his deer yet and added, "Don't worry day, I'll be home next year and we will get our share then."[482]

That was not to be.

He wrote home that he arrived at Khe Sanh in March, 1967, arriving earlier than the rest of his unit (A Company, 3rd Reconnaissance Battalion). In his last letter home, dated 7 May 1967, he wrote:

"Dear Mom, Dad, and Sis

"Well I am just fine. They took 861 – 881 now and things are beginning to quiet down around here now. We could sit on our chairs out in back of the tent and watch the jets and B-52s make the runs on Hill 861.

"They have about 3,000 Marines up here now. I don't know how long they are going to be up here. I hope they stay up here for a few more weeks at least...

"I'm sending this $5.00 home to Janet [his sister] for her birthday. She can buy something with it. The other is a North Vietnamese dollar. Have you got the pictures of the wedding yet?...

"It has been raining here off and on for the last week. They had a bad wind storm here and it blew a few tents down, and blew the mess hall roof off.

"Well I'm going to say goodbye now. With love always. Your son Sam."

The letter is postmarked 10 May 1967. Sam was already on patrol. His last.

YT-1 (piloted by Capt Manz) and YT-21 (piloted by Capt Kirk) inserted reconnaissance team 1A2, "BREAKER," at 1600H, 09 May 1967 at XD758534 (Hill 665).[483]

BREAKER, a 7-man recon team, was assigned the mission of observing suspected enemy infiltration routes

and to uncover any indications of enemy build-up in the area.[484]

The Patrol Leader, Sgt James Neil Tycz, at 21 was considerably older than most of the Marines in Vietnam. A thoughtful man who had once attended St. Francis Seminary in Milwaukee, Wisconsin, Tycz was known to sometimes lead prayer services before leaving on patrols. He had eight brothers and sisters.[485] A fellow Vietnam veteran recalled: "I attended South Division High School [Milwaukee, Wisconsin] with Jim [Tycz] during the middle 60s. We both played on the tennis team. Although Jim was two years ahead of me in school [a Senior], he gave me his friendship and provided support during my first year [Sophomore] at South Division. To have called Jim a 'nice guy' would have been a gross understatement. He was always smiling, pleasant, and caring. Jim displayed a positive attitude toward everything he encountered."[486] High-school yearbooks indicate his activities: cross country, wrestling, tennis, men's club, school newspaper (proofreader).

Another Marine in the patrol, Carl "Britt" Friery, had been in Vietnam 7 months but never in combat. Prior to his transfer to recon he'd served as a 106mm recoilless rifle gunner in infantry.[487]

1/Lt Heinz Ahlmeyer was attached to observe and gain experience. The 3rd Marine Division Intelligence Officer augmenting the Khe Sanh bunker staff, 1/Lt Lee Klein, recalls him as "..a real hard charger, a heck of a nice guy, just the kind of guy you expect to see go into recon."[488]

An argument had taken place in the command bunker before BREAKER was inserted. 1/Lt Lee Klein had been given 35mm photos taken by a Marine pilot which Klein sent to Division and received developed prints within 24 hours disclosing NVA digging their position. The newly-arrived regimental XO said, "We're going to send a recon patrol in there." Klein recalls: "I should of fought it more, but I said, 'We know what's there. Why are we sending a recon patrol?' You send recon patrols out where you don't know what's happening. The XO replied, 'We want to send a recon patrol in there." (Klein recalls the XO, a LtCol who spent all his time in the bunker, "..wore 'Mickey Mouse' ears, a headset with large pads over the ears. I'd never seen anything like that in a command bunker before; everybody else listened to the radio with their regular ears.")[489] One of the pilots who was to participate in the rescue noted, "These guys should never have been put in there in the first place. It was stupid because it was obviously a hot spot. We knew that."[490]

Immediately upon insertion, BREAKER came upon 4 well-constructed NVA bunkers and assorted enemy gear. After traveling only a few minutes, they came upon 9 additional bunkers with gear.[491] The hill in which they were inserted, in fact, was covered with camouflaged bunkers that could not be seen from the air—nor on the ground unless one walked right on one,[492] as they soon discovered. At 1755H, 10 NVA bunkers were discovered at XD755530 ranging in size from 2-man to 10-man, all of which were in good condition and had been occupied recently; rice, remains of meal, smell of fish, all indicated recent presence by the enemy. The area showed signs of being bombed, and the team also found a pith helmet and a partially destroyed letter. Moving only a few meters, the team discovered an enemy harbor site with 11 sleeping racks, 9 well-constructed bunkers, and miscellaneous combat gear.[493] They found unopened packs and they found rifles.[494]

Back at Khe Sanh, the Commanding Officer of Co A, 3rd Recon Bn, asked Sgt DiDonna, "Tony, what do you think?" DiDonna replied, "Tell the men to get the hell out of there. If they stay, they're gonna be dead five minutes after midnight. It's a trap. Something's wrong. No way those packs could be there."[495]

Within the team, an argument arose between the Patrol Leader, Sgt Tycz, and the attached 1/Lt Ahlmeyer. Tycz wanted to move to an alternate LZ; Ahlmeyer wanted to stay put. Britt Friery and Steven Lopez were off to the side. "Several of the guys were arguing with Ahlmeyer to get to the secondary LZ, a better location. We knew we were in a bunker complex. We knew they might be back at any minute, and we wanted to get out of there. There had been a B-52 bombing in that vicinity and what we were told is that some reconnaissance photos were taken after the B-52 bombing and that a recon patrol needed to reconnoiter on the ground after every B-52 bombing."[496]

BREAKER was informed to depart the NVA campsite since it was becoming dark, and to move to some high ground and establish a night defensive position,

which they did.[497] They set up their harbor site on the top of Hill 665 (XD758534).

Shortly after midnight the patrol heard a North Vietnamese force estimated to be about 30 – 50 men moved toward BREAKER, returning to their fortified camp site to reoccupy their bunkers. Sgt Tycz cautioned his men to remain silent, hoping they would remain undetected by the NVA. The bunkers had a tunnel system and apparently when the bombing started, the NVA went underground, abandoning the bunkers, but were now returning. The Marines, laying in 3 foot-high elephant grass, were about 10 – 20 yards uphill from the NVA bunkers.[498]

Two of the NVA troops, however, walked into the patrol's position and started to un-sling their weapons after seeing the Marines. PFC Steven D. Lopez, the radioman, was sitting in the elephant grass when the NVA soldier suddenly appeared: "I looked at him and he looked about 14 years old. And he wasn't ready at all. He didn't expect me to be there. I fired several rounds at him with the rifle. He was extremely young. I didn't even know if I should shoot him or not; he didn't even look like a soldier. He had a weapon and military gear. He was young."[499] The enemy force, now alerted to the Marine presence, immediately began delivering a heavy volume of small arms fire into the patrol's perimeter. 2/Lt Heinz Ahlmeyer, Jr., the blond-haired, blue-eyed Platoon Commander along to gain field experience, was badly hit and started groaning.[500] Lopez was wounded in his side and LCPL Sam Sharp, Jr. was shot through the head next to Carl Friery. "I saw him fire an automatic burst.. I crawled over to see how he was but he had a hole the size of a silver dollar in the back of his head."[501]

Sgt Tycz immediately called in supporting arms and artillery missions on suspected enemy positions. Despite the heavy volume of fire being poured into their small perimeter, he fearlessly moved among his men to direct their fire and shouted words of encouragement.[502] The NVA tossed grenades in on Ahlmeyer's groans. Tycz was groping for them and managed to toss back three or four grenades. They were landing next to him because he was next to the Lieutenant. He couldn't find the last one, and while groping for it, it exploded in his face. Then he started groaning too. Carlson treated them as best he could, and then they stopped tossing grenades at the Marines.[503]

Vicious enemy fire battered the patrol's position, and within minutes several more Marines became casualties, including red-haired and blue-eyed HM3 Malcolm Thomas Miller, the corpsman attached to the patrol. With complete disregard for his own safety, LCPL Clarence R. Carlson, Point Man of the patrol, maneuvered to different positions in order to bring a heavy volume of small arms and grenades against the enemy force. Lopez ignored his painful wound in his side in order to move to a position from which he could deliver effective fire against the assaulting NVA. Friery was shot in his abdomen "by a bullet that I later found out had bounced around my insides, tearing up much of my intestines."[504] Half an hour later he was hit in the back from grenade shrapnel and went unconscious until dawn. Carlson and Lopez assumed he had died. In less than two hours, there were only two Marines remaining able to man their weapons—Lopez and Carlson.

Moving to the side of his fallen patrol leader who had been using his radio to call in artillery support, PFC Lopez directed effective artillery fire on the enemy, dangerously close to their position—for almost 12 hours. PFC Lopez was wounded several other times during the course of the action and PFC Carlson was also wounded twice more.

The NVA had reoccupied their bunkered position: "These bunkers were placed in strategic positions around this entire hill where they could overlook the valley below. And we were right in the center of the top of the hill. There was no bunkers near us—approximately ten meters from us in sort of a perimeter around us, where they were lobbing grenades and sniper rounds—they were in these bunkers."[505]

Throughout the night the enemy continued to probe and attempted to close with the patrol, sometimes approaching within 15 feet, but was driven off by the intense volume fired by PFC Lopez and LCPL Carlson.

A flare ship illumined the area as SPOOKY spewed its destructive dragon-breath of bullets. Communications difficulty, bad weather, and close proximity of the enemy hindered any accurate assessment of the situation and ability to render optimal support.[506] Yet, the 18 year-old Lopez, on his third recon patrol, continually requested artillery to be placed closer and closer "..because the enemy was within 10 meters of us, and it seemed as though the artillery batteries wouldn't cooperate; they couldn't bring rounds in for us. And we kept calling 'fire for effect' and they wouldn't fire for effect.. they refused to do this."[507]

Cooler heads on the Combat Base had more fear than the younger men in their desperation: "He kept calling in artillery closer and closer to his position. Back

here they were actually scared to drop them closer. But he kept repeating, 'Drop it closer.'"[508]

At about 02340H, both Lopez and Carlson were again hit by small arms fire, but continued delivering fire and throwing grenades at the enemy force. The NVA force which had attacked BREAKER then withdrew. 1/Lt Klein opined: they just went back to await rescuers so they could annihilate them.[509] The NVA "..could easily have overrun the 7-man team; however, they chose not to do so, probably in hopes of shooting down any helicopters attempting extraction."[510] It was an old, old NVA tactic reproduced at all levels: create a casualty and destroy those who came to rescue—whether this was an individual WIA or a whole unit or position (e.g., Khe Sanh Village on 21 January 1968 when they attacked with a battalion but had a whole regiment in ambush positions ready to annihilate any rescuers or reinforcements, or 07 February 1968 when they attacked the Special Forces Camp at Lang Vei, or the entire Khe Sanh encirclement which was meant to draw-in American troops—which didn't happen until three months after the attack; their plan had miserably failed, probably because were aware of this tactic and strategy].

The first attempted extraction resulted in the helicopter taking extensive hits throughout, making it appear like a piece of Swiss cheese. The aircraft shuddered. A round hit the co-pilot's foot. Hydraulic pressure plummeted. The aircraft barely made it back to KSCB, having taken 53 new hits.[511]

Inside the command bunker at KSCB a second launch to rescue was being planned. Captain Paul Tucker Looney (a Section Leader of a division led by Major Arthur B. Colbert) who had been awakened at 0145H and his Co-pilot, Lt John C. Roots, were being briefed. VMO-2 ("DEADLOCK") UH-1Es were on station along with "PUFF" (C-47 gunships). In this grim situation, Capt Looney launched in his CH-46, YT-5 (#151923) at 0235H. His wingman, Captain Douglas A. Manz, orbited at 5,000 feet as Captain Looney arrived on station about 0245H and made contact with the UH-1E gunships who pointed out the zone. Following a marking round from one of the gunships, Capt Looney began a descending right hand turn.[512] The gunship informed Capt Looney they were out of 7.62mm ammunition and would remain at 1000-ft. AGL.[513]

Capt Looney dropped YT-5 to within a few feet off deck, a hundred yards from the zone, and then proceeded to within 10 meters of the crater. He pulled his aircraft into a hover and asked BREAKER to shine a strobe light. Upon shining, the bird began to receive intense automatic weapons fire from 360°. The first round penetrated the windscreen on the pilot's side and sprayed plexiglass within the cockpit, and after that rounds seemed to come from everywhere, hitting Capt Looney, Sgt Bon H. Reese, and Corpsman Bridges. Capt Looney, hit in the right collar bone just above his chest protector, convulsed and pulled up the collective and pushed the cyclic forward. Lt Roots, realizing that Capt Looney was hit, immediately took the controls, made a left turn to the west, and began climbing. Capt Looney came up on the ICS: "I'm hit bad, John; let's go home!" Capt Looney began to un-strap from his seat, and Cpl Remo assisted him to the cabin to remove his vest. HN Bridges, having regained consciousness, worked with Cpl Remo on him. Lt Roots landed the aircraft at KSCB at 0308H. Sgt Reese had a shattered left arm but had continued firing his machinegun until the danger was past. Corpsman Bridges had taken shrapnel in his hip and ass. Capt Looney, although given emergency treatment for a serious throat wound, died about 15 minutes later.[514]

Captain Manz later wrote: "Captain Looney—pilot of the second attempt lead aircraft—he paid the supreme sacrifice for God and country. What more can a man do? In his twelve months in country, Captain Looney has contributed a great deal to the success of his squadron. On this particular occasion he was again contributing his professional flying skill and the combat knowledge of his many past experiences. His approach was perfect but the situation was far from it. He took a fatal round and died thirty minutes later. His courage and professionalism were always in the highest tradition of the United States Marine Corps."[515]

Meanwhile, BREAKER's predicament was fast becoming desperate. The two remaining effective Marines were becoming dangerously low on ammunition as LCPL Carlson put himself in a position where he could cover PFC Lopez as the latter moved among their fallen comrades and stripped them of their ammunition. At this time he discovered that Carl Britton Friery, "Britt," although extensively wounded, was still alive. The other four members of BREAKER were dead.

At 0645H, DEADLOCK Gunships (VMO-2) and OAKGATE (VMO-3) took turns making firing runs,

strafing the elephant grass and surrounding wood lines adjacent the recon perimeter. The NVA, within ten meters of BREAKER, were struck by pinpoint and devastating fire from the Gunships' TAT-101E and M-60 machineguns. One gunship expended 9000 rounds of 7.62 and 32 2.75" rockets. Debris and bodies covered the entire area.[516]

"We could hear the enemy in the bush. I thought they were going to walk on us and finish us up, so I kept calling in the Hueys for ground cover and they strafed right next to us. At this point I think (I'm pretty sure) one of the .50 caliber rounds from the Huey hit [Carlson]. At that point I wasn't sure if he was dead or alive and I thought I was alone. He got it pretty bad."[517]

A third attempt was made to rescue BREAKER at 0915H. The plan was to have one CH-46 land 5 Marines into the zone to rescue the 3 wounded survivors. Although the chopper was met with very heavy fire, the pilot continued to maneuver his chopper towards the patrol. As the helicopter was about to set down in the zone, an enemy round damaged the chopper's fuel line and the pilot was forced to abort and return to KSCB.[518]

In this desperate situation, jet aircraft dropped napalm and snake eye bombs as close as prudent while almost simultaneously, the Huey gunships made passes on three sides of the team in close proximity while two CH-46 helicopters approached as feints to confuse the enemy. Major Charles Andrew Reynolds, assigned this date to pilot Major General Bruno Hochmuth's UH-1E "slick," had merged crews and decided to take only one aircraft instead of two so that two pilots would be aboard in case one was hit, while two crew chiefs (LCPL Ronald Zaczek and Cpl Jackie Lynn Acosta) could assist the remaining wounded aboard.[519]

The last napalm drop started a bush fire which rapidly spread toward BREAKER. Lopez radioed that extraction had to be immediate; they were being engulfed in flames.

Major Reynolds approached, receiving intense automatic weapons fire from a tree line west of the zone as OAKGATE gunships fired on either side and across the front. With the intensity of the fire, Major Reynolds waved off and then commenced a second approach from a different direction. Again, he was met with intense fire. BREAKER reported they could not hold off much longer due both to the incoming and the brush fire. Boxed in with fixed wing and gunships, the eastern end of the box was opened and with two gunships firing as cover, Major Reynolds' UH-1E retrieved the three survivors of BREAKER.[520] As Major Reynolds touched down, 1/Lt David G. Myers called in the obstacles and directed the aircraft toward the team avoiding the close-in brush fire. Immediately upon touchdown, Cpl Ronald Joseph Zaczek and LCPL Jackie Lynn Acosta, the Crew Chiefs, leaped from the aircraft and assisted the three wounded Marines aboard while NVA fired on them.

Ronald Zaczek, one of the two Crew Chiefs recalls the scene: napalm had struck the lower slopes of the mountain leaving it charred black. The final hundred feet of the hill was in flames with very, very thick gray smoke from the wet grass, "..like thick clouds of gray cotton just boiling up, and we could see flames but couldn't see the team very well. They were pretty darn much completely engulfed in smoke, and you could see flames inside the smoke, going higher and higher... Lopez came on [the radio] and said, 'We're burning up. We're burning up down here. You gotta get us out. The fire's close. Please get us out.' And it was just really horrible... When we landed there was a ring of burning grass a few yards from the patrol. They were being roasted. The fire was upon them. And there was a lot of ground fire from the NVA, popping all over the place, but confused because of the smoke... First we came in to a hover, but lost visual contact. Couldn't see a damn thing. The blades were just churning the smoke.. When we finally found the team, they had no cover at all. All the grass around them had been beaten down, and they were just sitting on top of it. They were absolutely naked. Just imagine: take a smooth, relatively smooth hilltop and put a thick mat of green grass on top if it, then stick people on top of that... [They] had piled up the bodies of the dead and hid behind the bodies of the dead.. bodies of the Marine and the North Vietnamese dead. They had built—it wasn't like a big wall—18-inches of cover, 2 or 3 bodies piled [high]... they had to do it.. they were all Marines. And if those spirits of those dead Marines could of spoken, they would of said: Take shelter behind us. They would of wanted their friends to live...

"My pilot landed us right next to them. We didn't have but a yard to go. We stepped over the bodies, grabbed them, and we got them in. Carlson and Lopez helped Friery in first. I dragged him in and literally shoved him as far forward in the aircraft as I could. Carlson was next. And then we pulled Lopez in and propped him behind the pilot's seat in a seated position; Carlson and Friery were both prone.

"I started to work on Friery—we had taken medical kits [aboard]—to keep him alive. All of them were pretty bloody. Their shirts, their trousers were well soaked with blood... When I brought Friery in I shoved him into my M-60, so he was blocking it, and I pulled him away from it [to fire it] and he had dumped his guts into the receiver section of the M-60.. I tried to get Fri-

ery's pants off and when I unbuttoned his fly, everything started to come out—bowels—and I tried to push it back in and I didn't know what to do... Everything was slippery with blood and I just couldn't get it [closed], so I held him. I was kneeling. I pulled him up and I held him in my arms and put rags over the stuff. Jack [Acosta] was working on Lopez, and we couldn't do anything for Carlson behind us."[521]

Friery recalls, "When I dove for the chopper I didn't have strength enough to get in, and the crewmen pulled my arm and we took off."[522] The bird lifted off at 1145H as the tree line beneath them erupted with intense fire.[523]

"We tried to lift off out of the zone and we couldn't lift. We were too heavy [for the altitude]. Finally, the way we got out was: Reynolds [the pilot] jiggled the aircraft over the edge of the hill, put us into a skid, sledding down the hill, and this gave us enough translational lift that we were able to bounce clear. We would not have been able to get out of the zone with another alive person on board the aircraft."[524]

Due to the close proximity of the enemy and the heavy volume of fire as well as the brush fire started by the napalm, it was virtually impossible to retrieve the bodies of the dead members of BREAKER. When the three surviving Marines returned to Khe Sanh, they only had approximately 20 rounds between them.[525]

Friery "..was told that with the wounds I had at the time that normally you died within 2 hours without treatment, and I'd been out there 13 hours without any kind of treatment." He spent the next 9 months in the hospital and then returned to active duty at Camp Lejeune, NC. During this duty he was guarding a payroll office during a hold-up and fired at the robber. Then the armory was broken into and several machineguns stolen. "I stayed in a combat situation even after I got to the States!"[526]

After Major Reynolds departed with the three survivors of BREAKER, what the holocaust of the flames didn't consume, very intensive bombardment by fixed wing completely obliterated.[527] Zaczek opines, "There were no bodies or bones left."[528]

In 1998, 31 teeth along with some bone fragments were discovered as remains from the patrol and the POW/MIA Accounting Command identified them as members of BREAKER by DNA and dental records. All that remained of Tycz were three of his teeth. The remains of Ahlmeyer, Tycz, and Miller were interred at Arlington and Sharp's remains next to his father at Oak Hill Memorial Park in San Jose, California. Tycz was interred on 10 May 2005, the same day and month of his loss.[529]

[*May 10th was the last major enemy contact. The Battle of the Hills officially ended 131500H when Col. John J. Padley, CO of 26th Marines, relieved Colonel J. P. Lanigan, CO, 3d Marines as SOP 3rd Marine Division/III MAF Rep Khe Sanh.*[530] *The cost of the Battle of the Hills: 168 US KIA, 443 US WIA, 2 US MIA, 824 NVA KIA (confirmed) and 551 additional probable; 6 NVA POW. Artillery fired over 24,000 rounds. Total ordnance dropped was over 3,000,000 pounds, not including TPQ-10 and Arc Light missions (611,500 pounds of napalm, 3,218,500 pounds of explosives, 1230 250-pound bombs, 3318 500-pound bombs, 380 750-pound bombs, 247 1000-pound bombs, 387 2,000-pound bombs, and 1170 air SORTIEs. There were 23 Arc Light strikes*[531] *Co C/1/26 had arrived 1350H, 04 May*[532] *Operation CROCKETT commenced 1500H, 13 May 1967 with the mission of defending KSCB, establishing company-size defensive positions on Hills 861 and 881-South from which patrols were to saturate the area within artillery range, and maintain a radio relay atop Hill 950 for units in the field.*[533] *Enemy contacts, evidence of their recent presence and movement, fire, probes, and sightings were a daily occurrence, along with reports from agent nets (e.g., the JTAD) of hundreds of NVA ten miles or so from KSCB. On 12 May 1967, more units of 26th Marine Regiment arrived. Relief by 26th Marines was somewhat deceptive. Although battalion 1/26 arrived, the Regimental Headquarters was split, with a rear in Okinawa and a forward staff at Khe Sanh. The Khe Sanh 26th Marines staff did not include the Sergeant-Major, and was officially a unit of 9th MAB (Marine Amphibious Brigade), not a III MAF unit. (MACV had limits on the amount of Marines that could be "in country", and so the Marines had 9th MAB units, a SLF (Special Landing Force) that operated from Navy ships off-shore, although they were usually ashore, and the repair and logistic rear was positioned on Okinawa, not in-country, so that there was a*

3-man "logistic tail" for every Marine infantryman in Vietnam, whereas the Army had a "logistic tail" of 9 or more soldiers for every infantryman in country.]

21 MAY 1967

HENDERSHOTT, PFC Thomas Edward A/1/26
HURD, LCPL Roger Michael A/1/26

For the Grunt on the ground in Vietnam, the time was an occasional rifle shot, occasional grenade that suddenly exploded, artillery H&I missions, air strikes, always and ever patrolling, digging, filling sandbags, night ambushes with endless tense silence and un-peaceful quiet, peering from perimeter trenches always watchful. For the most part, Khe Sanh remained peaceful bedecked in all its sheer beauty, and life was boredom punctuated by intense terror.

One such terror occurred Sunday, 21 May 1967 when it ensnared a platoon in its deadly web.

2/Lt John M. Kaheny furtively moved his 43-man patrol of 3rd Platoon, A/1/26 (A-3 or "PINEFOLD ALPHA THREE") out of the west gate of Hill 881-South at "O dark thirty:" 0520H, into a valley just west of Hill 881-South where an AO had just reported heavy trail use by enemy units.[534] Dense fog shrouded everything. At 0700H, the patrol spotted 4-5 sets of footprints on Hill 821 (XD763443) made within the previous 24 hours. The patrol paused in the morning mist called "crachin"[535] until the fog burned off enabling gunships at KSCB to launch.[536]

At 0850H the patrol (at XD757446) heard firing in the distance. "We called in to see if there were any friendlies in the area. The shots seemed to be quite a ways off and were quite rapid. We were told there were no friendlies in the area, and we proceeded out to the west roughly along an almost continuous ridgeline past an area of land bridge where Bravo Company [1/26] would later be ambushed [on 07 June 1967]. We found some letters and some spent rounds and knew NVA were in the area."[537]

Gunships (OAKGATE 1-1 and 1-2) arrived on station at 1000H as the fog dissipated and requested targets. While none could then be spotted, Lt Kaheny's intuition moved him to point to a tree line and had his 3.5-inch rockets fire a smoke round to mark a target. The gunner, misunderstanding the spot Lt Kaheny indicated, fired about 200 meters from that point. The gunships zeroed on the smoke mark and to everyone's surprise, struck about a dozen NVA lurking in the streambed.[538]

Following continuous gunship strikes, artillery poured on the target. Lt Kaheny then moved A-3 to a small knoll (XD751449) to their left which had several bomb craters to provide some cover. Radio transmission back to Hill 881-South had become weak, broken, and unreliable (the PRC-25 radio being "line of sight"), so Lt Kaheny moved a squad to the top of the knoll (Hill 721) for radio relay as he moved with 2 squads to its backside and into a streambed. There were slash marks on trees marking trails, and he circumspectly proceeded for about half an hour. A NVA soldier was spotted on one of the hills peering at the area where the radio relay squad had been positioned.[539] The NVA were beyond 105mm artillery range, but 155mm howitzers could drop a "precision destructive mission." The first round was low on the slope of the NVA OP. The NVA didn't move, apparently aware they were beyond the 105mm fan. Lt Kaheny adjusted rounds up the slope as one of the NVA flashed the finger (the universal sign of disrespect). The next round blew off the top of the hill along with all NVA there.[540]

It was now about 1800H. "We were low on ammo, we were all real tired, it had been a long day."[541] Five minutes later, all hell broke loose as the NVA fired from XD756454. "Evidently when we took out their Observation Post they were not quite ready to assault, but [now] they had to, because we were leaving. They all stood up out of the grass and attacked up the hill, supported by mortars, RPGs and grenades."[542]

The initial rounds killed two 19 year-olds: PFC Thomas Hendershott's radio was pierced with bullets that tore into his body, and LCPL Roger Hurd was shot and killed as he fired his M-16 with a round that went in one armpit and exited the other. In addition, there were four serious WIAs.[543]

Les Faurebrac recalls: "Everything was so quiet and one second later it looked like Custer's Last Stand. I was never so scared in my life."[544] And, "At times there was so much fire in the air it sounded like Puff the Magic Dragon was with us. I thought we were cut off and surrounded with little chance of making it out."[545] "The NVA had us. They assaulted uphill... They could of walked around behind us, got up on the ridge-line and sealed off our exit completely, and then attacked us from the high ground and we wouldn't—[of returned]."[546]

"A Marine Remembers on Memorial Day"
By John M. Kaheny

"Suddenly, the Cat of Death leaps from a tree line on the exposed flank of the platoon. Two young rifleman, each but nineteen years old, shun available cover, stand up, stand fast and fire into the charging horde. Taking the full force of the enemy's assault, they purchase with their blood a precious gift of reaction time for their fellow Marines and Corpsmen. Helmets fade slowly into chest high grass and soon disappear from view. Eventually forty-one make it back to safety, some bleeding, none broken, but the two go on home to rest forever beneath marble crosses. Their names, Private First Class Thomas Edward Henderschott and Lance Corporal Roger Michael Hurd, are now etched in stone on that Wall beneath Lincoln's watchful eye. The years have passed but everyday I see their sacrifice reflected in the smiling faces of my children. For had not those two brave men held their ground with everything they had, Coleen, Meghan and John Peter simply would not be, because one of those they saved that day was me..."

A medevac helicopter attempted to land to extract 8 seriously wounded Marines, but with 200 rounds of small arms fire directed on them, they waved off. Artillery was called within 50 meters of A-3. Eventually the choppers returned, evacuated the wounded, and the platoon was able to disengage as jets dropped DELTA-2 bombs[547] on the NVA,[548] and OAKGATE gunships ran rockets on the NVA. While moving to Hill 881-South, A-1, led by 2/Lt "Rusty" Reeves, assisted in their return and they got inside the wire as darkness descended.

About a week later, Lt Kaheny was briefing in the command bunker on the base when he "noticed there were four holes in my right trouser leg near the crotch. There weren't any on the left leg. I asked Master Sergeant Dubois why they only put ventilation holes in the right leg and not in the left. The old Master Sergeant looked at me like most Master Sergeants looked at Second Lieutenants, went over and picked up a 7.62 caliber round, returned and showed me how I got the holes in my leg. And then I realized how close those bullets had been coming on the 21st of May—2 of the 3 round bursts right through the folds of my trousers. The other [round] went right in between!"[549]

03 JUNE 1967

[550] NVA units, moving into Quang Tri Province in May, 1966, were soon detected and a Marine Operation (HASTINGS) inflicted heavy losses on them. They learned, however, that the Marine reaction force had been at the expense of Marine-supported pacification, considerably relieving pressure on local Communist forces from Hue to DaNang. In addition, the NVA thrust had also drawn forces from III Corps. (This was to provide the background of the 1968 Tet Offensive strategy). Beginning in January, 1967, NVA forces in the DMZ were realigned and augmented. The Hill Battles revealed Division-strength entry into the area. Extensive bunkering and automatic weapons emplacements were discovered along the Laos-Quang Tri border near Route 9. CIA reported that a former NVA officer disclosed NVA plans for a gradual increase in the size of attacking forces, moving to regimental and divisional operations by the summer of 1967, embracing all I Corps [CIA: Intelligence Memorandum, *The Communist Build-up in South Vietnam's Northern I Corps*, 11 May 1967, in LBJ Library, National Security Files, Vietnam Country File 2A(1) I Corps & DMZ 11/66 – 1/68 #44.
[551] MSGT William D. "Billy" Waugh, the senior permanent party person at the Khe Sanh launch site from June 1966 – January 1968, supported teams of for Phu Bai-based FOB-1 operations into Laos as part of Operation SHINING BRASS, changed in early 1967 to PRAIRIE FIRE. The Launch Site also included a communicator, Danny Horton, and two radio operators. Teams launched in H-34s consisting of 3 Americans and 2 – 7 Montagnards on patrols not less than 5 days; one patrol remained in the field 65 days. Targets were exploited with a Hatchett Force of 60 – 80 men. [Conversation with William D. Waugh, 30 Oct 1988].

patched a 80-man HATCHETT force into OSCAR-8[552] to conduct a BDA of a massive B-52 Arc Light strike on what was reputed to be the headquarters for the entire Ho Chi Minh Trail.[553] The place was XD793044, a very small piece of flat land roughly 460 meters high, surrounded by cliff-like hills out to 3,000 meters away rising 900 to 1200 meters, about 24 miles almost due south of KSCB.[554] The location was reported to be protected by a NVA regiment. Only 4 aircraft, not the 18 planned, had struck the target.[555]

Since only 4 B-52s had struck the area and the area was under heavy thunderstorms with high winds, the initial insertion, scheduled for 0630H on 02 June 1967, was delayed until 1600H.[556]

Captain Stephen Wesley Pless, TIGER THREE, launched as section leader of two UH-1E gunships from VMO-6,[557] and joining with 2 additional UH-1Es from VMO-2, escorted 5 Marine CH-46 helicopters of HMM-165 and 9 Vietnamese helicopters to insert the 80man SOG HATCHETT force. The Vietnamese H-34s were the first aircraft into the landing zone, 2 of which received hits from small arms fire.[558]

Major Richard Eugene Romine of Marine Medium Helicopter Squadron (HMM)-165 (of MAG 36) launched as Flight Leader ("SHARK LEAD") of the 5 CH-46A and 9 UH-34D transport helicopters. As the aircraft debarked the first half of the force,[559] it was immediately apparent that the zone was ringed by enemy automatic weapons and the fire so intense as to make the zone normally unacceptable. This discovery was not, however, made until the insertion was already in progress, and it became mandatory that the remainder of the troops be inserted to ensure the safety or at least the chance for safety of those already on the ground.[560] The NVA had 12 – 15 automatic weapons, each with 2 – 3 heavy caliber guns, mostly 12.7mm, and the noise was deafening.[561]

Billy Waugh, monitoring everything from a helicopter, recalls: "We tried to keep the birds from going in, but we couldn't. There was so much screaming on the radio when all that was taking place. We used three different channels, UHF, VHF, and FM for the team, but as the gunships were going down, they were on the UHF, and they couldn't hear anything but a bunch of screaming. They said, 'Hell, we got to get those guys out!' So they did what they thought they had to do."[562]

As the UH-1E gunships continued to deliver suppressive fire, the lead aircraft, VT-4, piloted by Maj G.H. Coffin, received several hits and crashed a few minutes later in a densely forested area 2500 meters from the LZ.[563] Maj Romine, observing the crash, immediately debarked his reaction force passengers into the LZ and flew to the crash site which was marked by Capt Pless. Maneuvering along a mountain slope, he located the wreckage deep in the dense jungle along with its crew who were unable to move due to the terrain, the enemy presence, and the pilot's broken back from the crash.[564] Realizing that time would not permit a properly equipped helicopter to be dispatched to the site without endangering the lives of the ground crew, he began the rescue despite adverse weather and terrain. Unable to land in the area covered with 100-foot high trees, Maj Romine hovered at tree top, remaining in that precarious position exposed to heavy enemy fire and gusting winds as the hoist was lowered through a narrow opening in the trees. He remained in this position 25 minutes and successfully extracted the four Marine crew.[565] During the extract, he dumped fuel as each new crewmember was rescued to compensate for the weight, taking care not to spray JP-4 on the survivors. "When the last was aboard my low fuel level light had been on for several minutes and I briefed my crew that I was almost certain we couldn't make Khe Sanh. We did! My Crew Chief (CPL Bradshaw) was so awe-stricken that he opened the tanks to measure what we had left and couldn't even wet a dip-stick!"[566]

---

[552] OSCAR-8 was a target designation. Targets in August, 1966, included GOLF-4 (XD628586), HOTEL-4 (XD563564), INDIA-4 (XD553513), and JULIETTE-4 (XD 645549). [COMUSMACV 040430Z/Aug66, Subj: SHINING BRASS INTENT MESSAGE]. Targets covered 6 – 12 grid squares of area, and they overlapped so that every point was within 4 different targets. By overlapping, SOG could comply with the American Ambassador in Laos (Sullivan) who prohibited more than 3 Americans on the ground in any one target area. By overlapping, 12 Americans could be placed with 4 different recon teams. [Conversation with Harve Saal, 16 June 1990].

[566] Romine letter, cited.

When the UH-1E helicopters returned at first light on 03 June, the ground unit reported they were in contact with the enemy on all quarters and required assistance. Each strafing run was met with increasing enemy anti-aircraft fire until the entire valley seemed full of automatic and individual weapons fire,[567] mainly 37mm fired from bluff tops which encircled the zone for 200°. The mission was felt to be a suicide mission due to lack of prep in the area of suspected strong resistance and lack of sufficient air cover for extraction.[568]

After return to Khe Sanh to brief SOG, assess damage, rearm and refuel, the flight returned to the area to attempt an emergency extraction, but was hindered not only by the massive enemy force, but also lowering overcast and heavy thunderstorms.[569] An emergency extraction would have to be executed immediately since nightfall was approaching. The SOG team leader expressed doubts they would be able to hold off the enemy until reinforcements could arrive, and they had several severely wounded needing immediate medical attention. The enemy was closing in on their haven, a crater made by a 750-pound bomb, the only protection they were able to reach.[570]

Maj Romine, the first 46 in the zone, had set his chopper in the trees. With the exception of three NVA, no other enemy were visible and after stripping the aircraft of anything that might aid the enemy, the crew gathered up all the ammunition, weapons, and any other gear they could carry, and fought their way for about 15 minutes through a dense jungle forest to the tenuous shelter of the large bomb crater. Survival became a team effort for the 51 in the crater. Maj Romine as senior person organized a tight defense, directed the fire of the men and repeatedly exposed himself to enemy fire as he improved the defense. The defensive zone was marked for the pilots making strikes by having all available strobe lights shine prior to each flare drop and air strike around the rim. This enabled the 2 A-1 Sky Raiders—the only fixed wing available—to attack any target outside the lights and yet bomb very close. Utilizing valuable experience gained from a tour with ANGLICO, Maj Romine assisted the TACA in calling close-in air-strikes.[571]

The survivors were huddled around the rim of a slimy red muck-bottomed crater approximately 12' deep and 30' across, and were probed 360°. From approximately 1600H on 03 June until approximately 1500, 04 June, Maj Romine directed both air strikes and flare drops without sleep or relief, some strikes as close as 10' from the crater. They were hopelessly outnumbered.

In addition to their grave predicament, rain clouds blew into the area, soaking everything and denying use of close air support aircraft at a very critical time. Everyone shivered in the mud throughout the lonely, anxious night as sounds of construction filled the night from the enemy creeping closer and closer, clearing fields of fire, preparing fortifications, and emplacing additional automatic weapons.

A second CH-46A (SHARK-2), piloted by Captain Jack Hill McCracken (co-pilot Capt John Henry Hartman IV), upon seeing Maj Romine's aircraft crash, landed, embarked 16 troops, and was successful in leaving the zone.

A third CH-46A (SHARK-3, plane #150955), piloted by Capt Stephen Paul Hanson (co-pilot, John Garrett Gardner, and Sgt Timothy Ray Bodden and LCPL Frank Edward Cius, Jr. as crew) in aircraft YW-7, embarked 12 of the survivors including SFCs Billy R. Laney, Ronald J. Dexter, and Charles F. Wilklow. The loading was difficult since the ramp, although open, was so high off the ground the two gunners, Bodden and Cius, had to pull each man up onto it. SFC Laney had already been wounded in his back. When the gunners determined enough passengers had embarked, they signaled the pilot who was looking to the rear, and he immediately lifted.

Both gunners ran forward to their .50 caliber machine guns and began firing as the plane lifted. Unfortunately, Capt Hanson as he lifted turned YW-7 toward the heaviest enemy concentration, probably not realizing they were there. The helicopter immediately started to receive fire which became increasingly intense. "By the time we got right over them bullets were flying all through the aircraft. I think several passengers were hit at this time. About that time it sounded as if one or both engines quit and the helicopter started down rapidly. We continued to be hit by bullets all the way down. We hit hard and I bounced off my seat onto the floor. I estimate that we came down through trees about 50' tall. It appeared that we landed right in the middle of an enemy camp because there was a hut not more than 2 feet from the left side of the aircraft and we were sitting in a cleared area under the tree canopy. There were other huts and clearing nearby."[572]

Sgt Timothy Bodden was hit in his stomach, got to his feet clutching his stomach and was hit a second time in the same area and fell to the deck of the helicopter where he remained motionless with his eyes closed. (It is

believed that he died). He was wearing a flak jacket, and the rounds seemed to enter just below it.[573]

Cius, meanwhile, continued firing and was able to fire 300 to 500 rounds before both engines were knocked out and the helicopter crashed at approximately 1705H with a hard jolt in an upright positions in trees 50 to 100 foot tall, approximately 340 meters from the rest of the survivors (at XD795050),[574] just a few kilometers from commo-liaison station T-19 of Binh Tram 33.[575] It was suspended about 4 and a half feet off the ground by trees, and continued to receive a heavy concentration of fire from three different directions.[576]

"The enemy continued to pour fire into the sides of the aircraft after we landed. There seemed to be a particularly heavy stream of bullets coming in the windows where the .50 caliber machine guns were mounted... One Nung was jumping from window to window firing a M-79 grenade launcher. Each time he would fire, a hail of bullets would come in the same window just as he jumped to the next one."[577]

SFC Charles F. Wilklow was hit in his left knee by a bullet, but was able to hobble on his feet. There was an explosion inside the aircraft spraying Wilklow and Laney with what seemed to be acid. "I got a little on my face and quite a bit on my lower arm. It was very painful. SFC Dexter seemed to be hit in the face by the same stuff. When that happened, he said, 'I'm getting out of here.' He left and I haven't seen him since."[578] The enemy fire subsided and more was fired on the right side of the aircraft. Wilklow pulled himself over the half-door on the right side and fell to the ground. Captain Hanson, wounded in his thigh or abdomen, followed. The aircraft was still under fire and Wilklow crawled behind a log as the enemy began tossing grenades against the left side of the helicopter and into the windows. Captain Hanson said he had to return to the chopper to get his carbine, and left. Wilklow decided to move further away, went over a hill crest and down a small stream.[579]

Three indigenous passengers of YW-7 successfully made their way to the crater position of the 51 survivors about an hour after the crash. This was the first they were aware of the crash.[580]

In addition to a back wound received prior to being pulled into the helicopter, SFC Billy R. Laney had a badly broken leg and was unable to move. When SFC Wilklow attempted to examine him, he said, "Please don't touch me." Laney remained on the aircraft when Wilklow departed.[581] According to a statement of Cius in 1973 after repatriation, Laney "..had sustained shrapnel wounds in the back prior to the extraction and subsequently received additional injuries on lift-off, was seriously wounded and appeared to be in a state of shock."[582]

Captain Hanson received a bullet wound to his right leg and was last seen alive in the helicopter. He was close friends with Capt Jack H. McCracken—both pilots having served in HMM-165 for two years. Hanson, due to rotate home in June, 1967, was very anxious to see his wife and child.[583] SFC Wilklow later stated: "I crawled forward and saw one of the pilots crawling out of the cockpit into the cabin. The other one was already in the cabin lying on his back trying to use his survival radio to broadcast MAYDAY. I don't know which pilot was which. The one crawling out of the cabin appeared to be wounded in the upper thigh or lower abdomen. The pilot lying on the floor appeared to be hurt but I don't know how bad or what type injury he had."[584] According to later interviews, Vietnamese said that Capt Hanson was shot in the head and died; 1/Lt Gardner was shot in the chest and died.[585]

In 1969, Hanson's 2 ½-year-old son, Todd, was quoted in a newspaper article, "Please God, bring my daddy home soon," as a prayer he said every night as he got down on his knees beside his bed. Hanson, a former school teacher, had arrived in Vietnam just 10 days before his son, Todd, was born. His wife, Carole, also a former school-teacher, was quoted as believing her husband was still alive and would return home.[586]

In an article printed at the time of Hanoi's release of American POWs (1973), Todd was now 6 ½, and his mother explained the possibilities that the following afternoon would bring concerning Hanoi's accounting of American POWs. "Carole Hanson thought about the passage of time.. when she sat on her son's bed and tried

to prepare the boy for the possibilities of the next day... The bedside talk had taken about a half hour... It was plain Todd was trying to grapple with the real possibility that a father he had never known might never be home. After minutes of silence, Carole Hanson had heard the gentle sobs of a boy too early forced to be a man..." The phone rang at 5 or 5:30 PM. The voice said, "Carole, Steve's name is not on the list." Todd, playing outside, came to the door. His mother said, "Todd, your daddy is safe in Heaven with God."[587]

Approximately 45 minutes after the crash, Capt Hanson told Cius to leave the aircraft and attempt to establish a defensive perimeter. Cius never again saw Hanson, Gardner, or Bodden. Cius was armed with a Thompson Submachine gun and one of the indigenous had one fragmentation grenade. The group, consisting of Cius, Dexter, and ten indigenous soldiers, departed the immediate area and spent the night on a hilltop approximately 200 meters east of the crash site. The following morning extensive enemy movement continued in the area and the group did not return to the crash site, but traveled the entire day without encountering any enemy. At dusk they arrived at a 2-lane dirt road and spent the night. The next morning the group continued to move, and as they passed a Montagnard hamlet, became separated. A short distance further, Cius, Dexter, and one Montagnard soldier were captured by North Vietnamese Army regulars.[588]

After capture, the 2 Americans and ten Montagnards were repeatedly beaten with sticks and rifle butts as they walked into Quang Binh Province where they were placed in trucks for further travel to North Vietnam. Prior to entering Thanh Hoa City they stopped at a bombed-out bridge and waited to cross. At that time, Dexter asked for medicine for his stomach and leg wounds. Ha Van Son, an interpreter for the group, requested medicine from the NVA guard. The soldier thought Dexter wanted a cigarette and gave him the one he was smoking. Dexter took one puff and threw the cigarette away which infuriated the guard who proceeded to beat him on the back with his rifle butt. Dexter yelled at the guard for which he was again beaten. After crossing the bridge, Dexter asked the guard to stop the truck so he could urinate. The request was denied. Dexter insisted and shook the soldier's leg and was again beaten on the back and nape of the neck. Dexter moaned and urinated in his trousers. The truck stopped at Hau Loc village [WH901006] where Dexter climbed down the side of the vehicle, collapsed on the ground, and called for Cius. According to the interpreter (Son) and the source (Chen, who later informed Ly Son), Dexter told Cius that he missed his wife and he wanted Cius to keep his wedding ring and return it to his wife. Dexter then lapsed into a coma. Cius and the Vietnamese carried him and placed him on the ground outside a civilian house where at 0330, 30 June 1967, Dexter died. The body was wrapped in his and Cius' hammock, placed on the truck by NVA guards, and driven away.[589] During their movement, Dexter told Cius that he was 34 years old and had 6 children.[590]

(Following the events of Capt Romine, Capt McCracken, and Capt Hanson, the first three CH-46s sent to rescue the survivors, Capt Robert William Byrd, alternate flight leader, held the remainder of the flight back from landing and called in fixed wing support. When no fixed wing aircraft were available and darkness closed in, he directed the remaining helicopters to return to Khe Sanh.[591] Throughout the night, plans were developed as terrain features, availability of fixed wing, and developments at the crater holding the survivors, were considered. To decrease the vulnerability of the larger CH-46A helicopters it was recommended that the entire extraction be performed by 9 VNAF H-34s while Capt Byrd led a section of CH-46As as airborne SAR.[592]

On 4 June, low clouds precluded fixed wing support and gunships launched and expended all their ordnance in support of the 51 in the crater. At 1500H, after hours of aerial bombardment, a helicopter armada which now included 6 USMC CH-46As, 9 Vietnamese Air Force H-34s, 2 VNAF O1Es, and 2 A1E Skyraiders, launched.

When the first H-34 landed, Cpl Bradshaw dashed out of the crater with sniper bullets bursting at his heels, and lifted aboard five wounded soldiers for evacuation. He stood right in the middle of the zone to prevent the H-34s from being over-loaded.[593] The third VNAF H-34 was shot down as it exited the zone and the crew and passengers were retrieved by two other choppers. Another H-34 was shot up so badly it was unable to pick up any passengers,. As the last H-34 made its way out of the zone, 12 people remained to be rescued. Capt Romine recalls, "when we got out the place smelled like a barbecue."[594] Capt Byrd's section of Sea Knights was now

committed and within seconds Capt Byrd was sitting in the zone, aware that his larger helicopter would draw more fire. He remained in a hovering position with only two wheels touching the deck as the last dozen men of the SOG patrol embarked. Back at Khe Sanh, Capt Byrd refueled his helicopter, instituted repairs—enemy fire had knocked out his electrical power—and requested clearance to search for the Captain Hanson and the downed crew missing from the previous night. His request was over-ruled by higher authority, however.[595]

No search was made for survivors on 4 June since all aerial resources were involved in the extraction of the 51 survivors. Poor weather and enemy fire on 5 June prevented determination whether or not an air panel that was spotted was part of those from YW-7. Then, on 06 June, a single person was spotted in a bomb crater next to a colored panel, and he was retrieved by a Vietnamese helicopter. It was SFC Charles F. Wilklow, badly wounded, suffering from lack of water, and in a state of shock. He said he had departed the aircraft alone and evaded the enemy until picked up without having come in contact with any of the others on the aircraft.[596])

05 JUNE 1967

IBANEZ, GYSGT Di Reyes — A/3rd Recon

The disappearance of Sgt Di Reyes Ibanez, shrouded in mystery, haunting those who were with him, generating numerous speculations, may never be solved. The Marine Sergeant, third oldest in a family of seven children (oldest male), all born in the Philippines, was named "Di" after his father, a U.S. Navy veteran, whose name, Deo Gratias, was shortened to Di. His mother died when he was 11, was a very religious Roman Catholic, and during his first year in college before he joined the Marines, he was still very active in the church. In addition to the father, one of Di's brothers served in the U.S. Army and another in the USMC. His sister, Dina Sepe, remarks, "..it really runs in the family; I think it's in the blood."[597]

Sgt. Albert R. Lumpkin[598] recalls that A Company, 3rd Recon Bn, at Khe Sanh had lost several men and 18 to 20 were sent to Okinawa to retrain and integrate several new Marines for recon, among whom was Sgt Ibanez. The cadre from the recon company soon knew Ibanez as a good Marine, the type "..that knew the Marine Corps 'manual' from cover to cover and could answer a question very quickly and accurately. During training in the field in Okinawa, however, "..he just couldn't seem to get himself together. He wasn't good in the field." He was quick as a cat and had a black belt in karate. He constantly moved, was pretty well disciplined, and got along with everyone, although he maintained a certain personal distance. His knuckles had an ungodly appearance from heavy calluses since he continually practiced striking a small 2 x 4 board about 6 – 8 inches long which was wrapped with twine used for tents. "He would sit there with each hand, individually, and keep hitting it and keep twisting his wrist." He kept that board with him always, taking it even to chow and in the field on training maneuvers.[599] Ibanez had almost ten years in the Marine Corps by this time, and one of the Marines in his unit, Mark M. Hughes, thinks he was involved in operations into Laos in the early 1960s.[600]

The training in Okinawa was cut short due to the Battle of the Hills and the necessity for recon teams to scour the area following that battle. On 04 June 1967, two different teams (total of 17 men), NEPTUNE I and NEPTUNE II, one led by Sgt Gary D. Trowbridge and the other by Sgt Albert R. Lumpkin, 4A1 and 4A2, were to be inserted together, then split off into their respective RZ [recon zone]. The mission of the two teams was: "to find a company size HLZ and a suitable area for a Bn-size command post in the vicinity of LL XD8934 UR XD9137 and search in the vicinity of LL XD9132 UR XD9335.[601] It was Ibanez' first combat recon patrol. Sgt Trowbridge, 4A1, was the senior patrol leader while they operated as a single patrol.[602]

All were given their particular gear. Ibanez, Assistant Patrol Leader, was given a claymore mine, used to secure positions at night or any other time the team harbored. Ibanez, however, was not satisfied. "He liked to carry a gas mask full of grenades with him because you wouldn't give your position away at night by throwing a grenade. He carried a bag with about 25 frags in it."[603] Sgt Lumpkin objected: although Ibanez was in excellent

---

[595] Later, Steve Pless, who would be awarded a Medal of Honor for another incident, was killed in a motorcycle accident at Pensacola in 1969; Jack McCracken was killed in an automobile accident at Pensacola in 1967. [Romine letter of 09 March 1988, cited].

[603] Conversation with Mr. John Franklin, 06 December 1986.

physical condition, slender and muscular, it was still too much weight; Lumpkin feared that if he became fatigued, he might pawn off the grenades on the other Marines in the patrol. Ibanez insisted, however, and assured Lumpkin that he would carry the grenades until the end of the patrol.[604]

The two teams sat on the airstrip all day, waiting to be inserted by helicopter. The weather, however, made flying impossible: there was an especially low ceiling and as the day progressed, pouring rain.[605] The teams were therefore trucked to their insertion. However, the truckload of Marines were sent in the exact opposite direction of where they were to be inserted, ending up on the Laotian border! "We drove and drove. It just didn't feel right, like we were in an area that was extremely remote, like we were in the wrong place, an awful strange area... We had one of the smaller guys climb a tree to give us an idea [where we were]. We called in WILLY PETER rounds. We couldn't see the cloud; we couldn't see anything. We concluded, we're not at any point near where we're supposed to be. Quite awhile had passed, a couple of hours. They finally called us back and said they were coming to get us. We waited and waited and they took us back in. It was getting quite late in the afternoon by this time."[606] The teams were inserted at 041645H at XD 885399.[607] (Mark M. Hughes testified the time as 1715H.[608]

Sgt Lumpkin was very uneasy. It was, by now, becoming late, not permitting time to determine if they had been spotted during their insertion or to move off to a different location to harbor for the night. (Recon teams frequently would harbor in one site; then, after dark, furtively move to another harbor site in case they had been spotted, thus obviating assault). Had any enemy force heard the commotion from the trucks and spotted the Marines without helmets and flak jackets, they would know it was a lucrative target to be exploited. Some WILLY PETER registration rounds were called; the teams were sure of their location. The two teams moved a short distance to a location along a small cliff overlooking a river, a place they could defend, and set in for the night in a 360. Lumpkin noticed that Ibanez was quite nervous, constantly moving his gear around. "I remember going over to him on more than two occasions and telling him that he'd have to settle down and stay in one spot... I'm sure he was scarred, being his first patrol, maybe. He had a M-16 and went out and set his claymore, got all his gear together, got adjusted, and set in for the evening. It had started raining, and was just an absolute downpour. You almost couldn't see your hand in front of your face, and of course it started getting dark."[609] The jungle at night is a matter of complete darkness! Trowbridge and Lumpkin whispered to each other, planning the next day's activities.

Then, with the distracting sounds of the nearby rushing river and the whistling wind of the storm, in a downpour of rain, and in 10-12 foot-high elephant grass,[610] in the cold,[611] in complete darkness,[612] it happened.

The official patrol debrief states: "At 050010H June 1967 several members of the team heard a sound like something falling in the brush about 30 meters from their position (XD905399). About five minutes later the patrol heard a short (about one second) human groan."[613] Cpl Mark M. Hughes, located approximately 2 meters from Ibanez,[614] hearing "sounds of a scuffle, like a grunting, and movement in the bushes and thrashing around over and above the rain,"[615] "thought we were being overrun. I grabbed my weapon and jumped towards Sergeant Ibanez's position. I landed on Sgt Ibanez's rifle, but I could not locate him. In the mean time, PFC James A. Seastrom awoke and came over by Sgt Ibanez's position. I told him to cover me while I crawled out to see if I could locate Sgt Ibanez. I crawled out approximately 20 meters from our position. It was raining very hard and there was no visibility. I crawled in a zigzag manner searching with my hands. I thought I felt the canvas part of a jungle boot but it was only a pouch containing his magazines."[616] (PFC James A. Seastrom testified, "I awoke to a sharp and sudden moan. I grabbed my rifle and got to my knees."[617] Jack J. Gottlieb recalls, "The evening of 5 June 1967, myself and Sergeant Trowbridge were on watch. Our watch began at 2330 and ended at 0100 thereabouts. I heard more or less a moan to my left flank. I turned my head in that direction and [there] was a large figure to my direct front. I reached for my rifle

and took the safety off. I then realized it was Corporal Hughes to my direct front. I stared at him a second."[618] Howard G. Vaughn testified: "I was awakened by a noise which sounded like someone moaned and moved some bushes."[619])

Hughes crawled over to Sgt Lumpkin and "..whispered to me that while he was on watch he had heard what he thought was a noise. In trying to describe the noise, he thought it sounded as though someone had been hit or punched in the stomach—kind of a UGH! noise in the area where Ibanez was. He called over to make sure Ibanez was still there, and Ibanez was not there. I sent Hughes back to his position, thinking maybe Ibanez had just gone out to—to go to the bathroom.[620] Sgt Gary D. Trowbridge reported hearing "a sharp crack like someone falling down on some brush."[621]

Hughes "took a .45 and a K-Bar and went out and followed the claymore wire. I couldn't see anything. I didn't know if my eyes were playing tricks on me or if anything else was going on, but it was like you could see movement. And when I was going back, I found one claymore we had set out, and it was turned around. So I turned it back. I remember I had enough presence of mind to reach around it and reach under it very slowly to make sure it wasn't booby-trapped. I turned it back and stuck it towards the root of the tree. I came back and said, Man, he is gone! Nobody wanted to believe that somebody got grabbed from the security of our harbor site. And by that time it was only a couple of hours 'till dawn, and we waited."[622]

Hughes came back and said, He's still not there. I again asked Hughes what kind of a noise it was he heard, and it was like somebody got hit or slugged; that's the best way he could describe it. I sent Hughes back to his position and I then crawled over to Ibanez' position. Ibanez was not there. I couldn't see his gear. It was too dark. Of course, as you well know at night recon doesn't use flashlights. So I started feeling around and found that his rifle was laying there, up over his gear. The pouch of grenades was there and his deuce gear. I just couldn't understand where he was. I went back and told Trowbridge and we were both rather stupefied on what to do. We didn't feel it was necessary to call back to the command post cause there was nothing they could do at the time. We figured the best thing to do is wait for first light and then find out what's going on, which really, at that time, wasn't that long of a period away, maybe an hour. We waited for first light."[623]

As noted, Ibanez had been moving about at the beginning of the patrol. He had, in fact, "a habit of wandering off to be alone in garrison."[624] Sgt Trowbridge assumed that Ibanez had moved to better cover from the rain. He requested illumination, but was still unable to see anything.[625]

At 0715H, the recon patrol reported to RAINBELT ALFA [Co A, 3rd Recon Bn CP] Ibanez as missing since 050001H.[626] Sgt Lumpkin recalls that nobody other than Hughes heard anything, that George W. Hee and Craig C. Kuhlenbeck, near the river, had not heard anything, but, "it was very difficult to hear anything because how heavy it was raining."[627]

At first light the patrol scoured the area. They round Ibanez' M-16 on "automatic" which was unusual because Marines always carried their rifles on "safe."[628] Mark M. Hughes found Ibanez' dental plate that fit on the roof of his mouth with 4 teeth on it, split down the middle.[629] The pieces were covered with blood. Drag marks were found like "someone dragging their feet or someone dragging an object on the ground."[630] "An extreme chill at that point went through me, thinking that if they—who were they or whatever was that close all night, why didn't they take the rest of us or why they didn't try for the rest of us. I followed the drag marks probably 10 or 15 yards of our position. Branches and leaves and stuff were broke in half. It was a very short scuffle if it was a scuffle at all. It was very short and sweet."[631] Sgt Lumpkin, along with Cpl Vaughn, Cpl Holmes, and LCPL Schloerb, found a fighting hole which would hold three people 50 meters east of the patrol's harbor site which showed signs of recent use, and a harbor site 20 meters east of the fighting hole was found which could hold 8 – 10 people which also showed signs of recent use.[632] Hughes recalls, "It almost looked like we set in right next to the goonies, and they were more

scarred than we were."[633] Company A/1/26 scoured the area,[634] who found traces of blood on leaves a trail (XD903500) to Lang Kat (1). By 1745H, A/1/26 completed a search of the Bru villages of Lang Kat (1) and (2) at XD904394 and reported that the village had not been inhabited for approximately two months.[635] The recon teams remained with the Grunts that night and continued to scour the nearby areas, sweeping the whole valley.

What had happened to Ibanez?

Rumors began to fly. One was that Ibanez was a spy, that he really wasn't a Philippino but a Vietnamese![636] He was, in fact, very Oriental-looking; whereas some Philippinos appear more Indian or more Spanish, he was more Oriental.[637] Sgt Trowbridge recalls that on the ship from Okinawa, he apparently told some of his team that on the first patrol he would disappear, and Trowbridge believes that he walked off in the country there.[638] "Some of the guys told me that while on the ship, Ibanez had said that he was going to defect and join the North Vietnamese. To this day, I believe that he did, or at least tried to do so. I don't believe that it happened any other way."[639] This, however, does not explain blood on the trail and leaves, cracked dental plate, leaving his rifle and other gear, and the sounds of scuffle, nor does it fit with the description of Ibanez as being a good Marine.

SSGT James L. Hutton, who accompanied the patrol for orientation, being his first, thinks that Ibanez was snatched. He recalls that the little village nearby, Lang Kat (1) had two suspected VC living there for a long time.[640] Col John D. Waghelstein (CO of the A Team at Khe Sanh in 1965-66) recalls the French planter that occupied this area, Llinares, as a bit of "unfinished business I didn't attend to before I left Vietnam. We had a recon element out and they had spotted him on the road about two o'clock in the morning by himself. Shortly thereafter, maybe a minute or two, a patrol of VC came by following him and my intel handler named Minh was convinced that he was—we always had known that the guy had a lot of connections. We always thought that he was involved in supporting the VC in one way or another and Poilane didn't have much to do with him."[641]

Another theory was that Ibanez was attacked and dragged off by a tiger, noted by John M. Kaheny, a Platoon Commander of A/1/26 that searched the area immediately after the report of Ibanez' loss.[642] Tigers freely roamed the area.[643]

Another possibility may be the corpse discovered in the Hill 689 area on 13 July 1967 at 1000H at XD804408 containing a NVA harbor site used by an estimated 20 NVA. A part of a USMC utility uniform was found, covered with flies. Odor in the area indicated a dead body, but none was initially found. Further search of the area revealed empty ChiCom ammunition cans and tunnels cut into the brush. At 1245H, Co K/3/26 reported finding the remains of one Marine body at XD804408, estimated to be 15 days old, ID unknown. Body was 6'1"

[641] Conversation with Col John D. Waghelstein, 09 May 1986
[642] John M. Kaheny, "Squalls Between the Storms," Khe Sanh Veterans: *Red Clay* 55 (Spring 2003) 59.
[643] Fallaci, Oriana, *Nothing and So Be It*, Trans. Isabel Quigly, Garden City, NY: Doubleday & Co., Inc., 1972, p. 224, quotes: "The only bad thing in Khe San was the tigers. You had to shoot them or they'd eat you. Madame Bordeauducq [Eugene Poilane's wife], the owner of the plantation, spent whole nights in the trees firing at the tigers and by the time she was old she'd killed forty-five. She used to say: 'I don't like to kill the tigers, but they eat up my peasants.'" Madame Madeleine Poilane [Felix Poilane's wife] writes: "We were right in the middle of the coffee harvest in 1958 and for sometime we had known that a tiger, a manp-eater, was roaming around the villages. He had already killed a dozen Montagnards. One Sunday morning, after we returned from Mass, the Montagnards of the village of Ta Can came to tell us that a woman had just been killed by the tiger. The women, there were five of them, had come into the *ray* (rice field) to pull weeds. The victim's mother was among them. The tiger had laid in wait for them and had jumped on the woman, mortally wounding her with its paw. (They know just where to strike). The mother and the three other women had then screamed and pulled on one side of the woman while the tiger pulled on his side in an attempt to drag off his prey to devour it. They eventually succeeded in driving off the tiger..." [Letter of Madame Madeleine Poilane, 06 July 1990]. Gerald J. Howland, with the first Special Forces team at Khe Sanh in 1962, recalls: "The Bru would leave us if the tigers came, and that was every night. They didn't believe you could kill a tiger, so they wouldn't mess with them. They attributed a lot of religious power to a tiger." [Conversation with Gerald J. Howland, 20 March 1989]. Jacques Standing, with the same unit: "Every time they [the Bru] didn't want us to go in the area, they'd say, 'There's teegers, teegers!'" [Conversation with Jacques Standing, 20 March 1989]. In January, 1969, a 400-pound tiger was killed by members of a small Marine recon team standing watch near Fire Support Base Alpine (north of Khe Sanh) after it attacked one of its members. ["Tiger Killed Near Viet Border," III MAF: *Sea Tiger* 5:1 (3 Jan 1969) 1.

tall and approximately 180 pounds. The body was decapitated and right arm was missing. Two M-14 magazines and ammunition, two M-26 grenades, one compass, and one cartridge belt with one canteen was found on or in the vicinity of the body. The area was further searched and the head was located near the body, but no evidence of the right arm or weapon was found.[644] One might speculate that since the right arm was missing, and Ibanez was proficient in karate, it might have been severed and taken "for its magical properties." The Joint Task Force, Full Accounting, in Hawaii, lists this KIA as SSGT Gilberto Caballero, Jr., who was a Marine from BLT 1/3. BLT 1/3, however, was at this time operating in the Con Thien area in Operation BUFFALO/ HICKORY II[645] 30 miles from Khe Sanh! Also, the Death Certificate for SSGT Caballero indicates not only decapitation and right arm missing, but also his right leg is missing, and the latter was not indicated in the SITREP. It is therefore unlikely that this KIA is CABALLERO, and might very well be Ibanez, although the finding of M-14 rather than M-16 pouches and ammunition does not agree with Ibanez having a M-16.

Lumpkin went to his grave with apprehensions: "It has always been in my mind. God bless him. I hope [*long pause*] it wasn't too bad for him."[646] John Franklin: "I've had something just eating me to death in the last 20 years."[647] We are left with a great mystery.

06 JUNE 1967

BARNES, EOCS Donald Joseph	**NMCB-10**
BURKE, CPL John Roland	**H&S/1/26**
HUBBARD, BUL3 Charles Austin	**NMCB-4**
LAWRENCE, LCPL Larry Eugene	**HqCo 26Mar**
SHERRELL, CPL David Frank	**A/3rd Recon**

STUPAR, LCPL Michael Nick	**H&S/1/26**
WITHEY, CPL Howard Hugh	**A/3rd Recon**

Shortly past midnight (at 060105H), approximately 19 very sudden loud, screeching rockets pierced the calm, silent, very dark summer jungle night, exploding on Khe Sanh Combat Base, killing two, wounding eleven.[648]

Rodney C. Little was sitting on an orange crate playing cards when the rounds crashed, striking the nearby Seabee tent just across the roadway, striking the top of the tent pole so that it detonated as an air burst.[649] Senior Chief Equipment Operator Donald J. Barnes had been sent to KSCB to maintain the heavy equipment used to construct roads and facilities at the rapidly-expanded base. 05 June 1967 was the first day of his second tour of Vietnam service. The Seabee camp at Dong Ha was later named in his memory.[650] During the attack, Gunnery Sergeant James Wilkinson Moore, Jr., of H&S Co., 1/26, dashed from his bunker to the Seabee bunker, but was knocked back into his bunker by the blast. Although he suffered bruises to his ribs and torn cartilage, he still ran to the Seabees and assisted in the evacuation of the wounded, only after which he allowed himself to be treated and evacuated.[651]

At 0125H, the secret SOG unit located at the Old French Fort just east of Khe Sanh village, received 6 mortar rounds.[652] The main attack, however, was an assault up the very steep slopes of Alpha Relay on Hill 950 (XD844456). This aerie was used as a radio relay since the PRC-25 radios used by patrols moving in the steep hills and declivitous valleys were "line-of-sight" and frequently moved into positions where it would have been impossible to communicate with the headquarters on KSCB were it not for this high radio relay site. Approximately 40 – 50 North Vietnamese Army soldiers of the 6th Battalion, 95th Regiment, 325C Division, attacked from Hill 1015 to its east.[653]

Two sheer cliffs on either side of the outpost of Hill 950, one facing KSCB and the other facing the Rock Pile, along with a very steep and rocky slope to the east, facing Hill 1015, helped to create a sense of security for those atop the position. A gradual slope opening into a grassy area on the western side of the hill provided the most probable access to the position. Two machinegun

[644] 26Mar 131105Z/Jul67, Opn CROCKETT SITREP #245. Note: the 2 MIA from CAC at Hill 689 from the skirmish there of 27 June were recovered. Neither I/3/26 nor L/3/26 reported any MIAs from their battle there. The entire area had been scoured thoroughly following the battle there on succeeding days.

[645] Telfer, Rogers, and Fleming, *op. cit.*, notes on pp. 163-164 that BLT 1/3 on 6 July was involved with a tank that had been knocked out by NVA rockets. "The fighting around the disabled tank became so savage that the BLT did not reach the burnt-out hulk until 1000 on the 7th of July." The history reports that BLT 1/3 sustained 8 KIAs in this battle.

positions were set up, #1 facing Hill 1015 and #2 oriented to the gradual slope.[654]

Eighteen Marines manned the outpost,[655] including nine Marines from Headquarters Co., Security Platoon, 26th Marine Regiment (SGT Richard Baskin, the NCOIC, CPL Richard Green, LCPL Larry Lawrence, LCPL Charles Richard del Castillo, CPL J. B. Powell, LCPL William C. Balzano, PFC David Stevenson, and PFC Steve Arnold) which had been sent to man the outpost to provide security for the Marine communicators on Monday, 28 May 1967, relieving Marines from Sub Unit #5.[656] "We walked into hell at Khe Sanh."[657] Also manning the outpost were six radio operator Marines of H&S Co., 1/26 (including CPL Dale Lloyd Speir, CPL John Roland Burke, LCPL Kenneth S. Howard, LCPL Michael Nick Stupar, and LCPL Kenneth S. Howard) and three radio operator Marines from A Co., 3rd Reconnaissance Bn (CPL David Frank Sherrell, CPL Dale Lloyd Speir, and CPL Howard Hugh Withey). "The Marines were told a tour of duty on top of Hill 950 was like R&R, so no one ever thought there was a need to fortify the hill. Never thinking their lines would be penetrated, they did not sandbag the rear of the shallow foxholes housing the M-60 machineguns."[658] It was very easy for these people to just lob grenades in and be effective."[659]

LCPL Castillo and PFC Arnold were on watch the evening of 5 June when, at 2230, Castillo saw rockets hitting KSCB and yelled to awaken Sgt Baskin, in charge of the security detachment atop the outpost.[660].

At 0150H, a trip flare ignited about 30 meters out from the hill's east side, and a minute later, a RPG fired by the NVA sailed over the tiny hilltop and detonated a trip flare on the west side of the perimeter. Then the eastern side of the hill began receiving hand grenades, a few RPGs, and a high volume of small arms fire.[661] Cpl Green and LCPL Balzano, awakened in their tent on the west side adjacent their M-60 foxhole (position #2) as AK47 rounds stitched the top of their tent.

Shortly thereafter, PFC Arnold was deafened by concussion from a RPG, started screaming incoherently, and was placed in the ammo bunker by LCPL Balzano as CPL Green moved to fortify the south (right) side of the perimeter against a possible enemy assault.

LCPL Castillo yelled "Incoming grenades! Everybody get up! We're under attack!"[662] A grenade had exploded in front of his position on the west side of the hill.[663]SGT Baskin yelled to CPL Withey, the recon radioman on watch, to bring in artillery on the east side of the h ill.[664] SGT Baskin ran out of his hootch and "before anybody knew it, there were NVA swarming up the eastern side of 950 and grenades were going off all over the place. I could hear people screaming and hollering and there was a lot of confusion. At the time I was standing outside my hootch."[665] SGT Baskin dashed into his bunker and grabbed his M-16, disregarding his flak jacket or cartridge belt.

CPL Powell's machinegun #1, on the eastern side of the hill, was immediately overrun in the initial attack, seriously wounding CPL J. B. Powell, LCPL Lawrence, and PFCs Monroe and Stephenson. Their machinegun, guarding the eastern sector of Hill 950, became unserviceable and the Marines decided to fall back towards LCPL Balzano's position.[666] LCPL Larry Eugene Lawrence, A-Gunner of the machinegun, covered their withdrawal as the three wounded men went first. While withdrawing, the three wounded were fired upon at close range by the NVA. LCPL Lawrence, seeing this, stood and fired point blank at the enemy, driving them back and allowing the three men to make it to safety. While facing the enemy, LCPL Lawrence was hit, fell, stood up again, and was again wounded and killed.[667] SGT Baskin saw him get hit, stand, and get hit again: "I wanted to go out, but I just couldn't. There were NVA on our right flank and they were penetrating right up through the center.[668]

PFC David Stephenson, followed by PFC George D. Monroe, staggered into the position manned by LCPL Richard C. Green and PFC Jeffrey L. Arnold, as PFC Monroe yelled, "Cpl Powell has been hit." At that moment, two grenades were thrown into Green's hole, but

[668] Comments of Sgt Baskin, Tape #1196, cited.

although they exploded, no one was injured. A trip flare went off on the east side showing four North Vietnamese soldiers jumping up and down on top of the radio bunker. LCPL William C. Balzano killed two with the machinegun while PFC Arnold and LCPL Green killed the other two with their rifles. SGT Baskin had moved into a hole in front of Green and Arnold to cover the southeast as LCPL Castillo dashed from the hole containing LCPL Balzano's machinegun and took over SGT Baskin's position, killing several NVA soldiers. The NVA moved to bunker in the center of the hill where they set up three machineguns, pouring heavy fire on the Marines in bunkers on the perimeter.[669]

LCPL Balzano "saw another trip flare ignite, illuminating a sea of NVA charging from the rear. He swung his M-60 around since the onslaught was coming from the [hill] 1015 side of the hill by what seemed like hundreds of NVA.[670] Bullets kicked up dirt in front of him, but, oblivious to his jeopardy, he "..opened up the machine gun and just kept firing, having more than 1000 rounds belted together so reloading was infrequent. Another flare went off and it appeared that now the NVA were dancing on the tops of bunkers without their helmets but wearing bush hats.. Balzano thought they might be high on drugs because they were holding their rifles over their heads, laughing and jumping up and down. It was a frightening, lonely feeling because Balzano thought only he and Arnold had survived the invasion. Balzano quietly called out to SGT Baskin who was in a nearby bunker and believed he answered but wasn't able to hear clearly over the [deafening] noise. He was somewhat relieved, thinking another Marine might [still] be alive."[671]

Although the position atop hill 950 was very small, the dark night, the turmoil of the attack, and the noise, fragmented the defenders. A bunker occupied by CPL David Buffalo, CPL Dale Lloyd Speir, and LCPL Kenneth S. Howard of H&S Co., 1/26, "PINEFOLD RELAY," had been isolated throughout the attack. CPL Buffalo was on the radio, calling in artillery on positions from where the NVA fired as the other two Marines looked and listened for rockets from the north fired over the hill toward KSCB. Following the fourth volley of rockets, Howard heard grenades explode on the outpost, and CPL Buffalo reported the outpost was under attack. CPL Speir spotted a NVA soldier entering their bunker and unloaded half a magazine on him. LCPL Howard, spotting three NVA attempting to enter the adjacent bunker, left his bunker and opened fire on them. While outside his bunker, another NVA soldier tossed a grenade into the bunker containing Buffalo and Speir.[672] It has been raining for about ten days and the deck of the bunker was soft mud. Buffalo was near his rack as Speir moved from side to side. "When the grenade went off, I remember feeling something hot hitting me. Howard came back into the bunker. Neither of us knew at that time what had happened to Speir. It was at this time I whispered to PINEFOLD[673] I was hit and the camp had been overrun. They asked me to key my set, once for yes, twice for no, in response to their questions if it got too dangerous to speak. I told them to fire on the camp as it seemed we were the only ones left and we were in the bunker. As we found out later, Speir was already dead... The ground was muddy. I always thought the grenade that killed him and wounded me had sunk in the mud before it went off and he had caught shrapnel in his chest because he wasn't wearing his flak jacket and I was saved because the combination of the grenade sinking and my being on the top bunk, away from the major explosion. It could be true that Speir either fell on the grenade partially or it landed on him, but as I recall, he was standing... As the night wore on, I prayed that we would be safe and made every promise in the book if God would see me through this."[674]

Meanwhile, a bunker containing 4 snipers was hit by grenades. Two Marines, CPL John Roland Burke and PFC Thomas R. Back, dashed from the bunker, but a ChiCom grenade exploded in their midst knocking both snipers into their bunker.[675] CPL Burke was badly hit in his head and, although profusely bleeding, attended to LCPL Carper, also wounded. Burke placed Carper on top of the rack and placed his body on top of his body to keep shrapnel and other flying objects from hitting the wounded Carper. CPL Burke, after rendering aid to the wounded, then charged the enemy from his bunker and was killed by a deadly hail of enemy fire.[676]

SGT Baskin observed three NVA throw the charges or grenades into the sniper's bunker and heard their

[674] Letter from David Buffalo, 20 November 1989. David Buffalo received wounds in both legs from the thigh to the neck as well as a hole in his ear, and was medevaced to DaNang to Japan to Alaska to Edwards AFB, to Hanskin Field in Boston. [Conversation with David Buffalo, 09 March 1990]. Howard emerged without a scratch! Howard, according to Buffalo: "God was certainly looking upon him because when that grenade went off, and he came back in the bunker without a scratch.. God was certainly looking after him as He was looking after all Marines on that particular night." [Comments of David Buffalo at Khe Sanh Veterans reunion, 21 July 1990, Nashville, TN, printed in Khe Sanh Veterans *Newsletter*, Issue #12 (Nov., 1990) 14.
[675] Statement of PFC David Stephenson in Navy Cross file of Cpl John Roland Burke.
[676] Navy Cross Citation, Cpl John Roland Burke.

screaming. He also saw two emerge, only to be cut down by the waiting NVA despite his attempts to provide cover for them. At this point, SGT Baskin took a Willy Peter grenade, pulled the pin, let the spoon fly and held it. "I finally released the thing and I saw the soldier and he was looking at me and I was looking at him, and it h it him right in the chest and it went off. And it was terrible. It just blew him off his feet. His partner there caught a fraction of it and both of them were aflame. This one, he may have been a Lieutenant; he was a good-looking young man, and he was just blown to pieces. He was like ash when I found him that morning."[677]

PFC Stupar dashed from the recon bunker, only to be shot and killed.[678] The recon bunker was hit by a RPG that entered the bunker through an opening and exploded inside, killing the three occupants.[679]

The hilltop was shrouded in dense fog. Trip flares created eerie silhouettes. SGT Baskin heard B alzano tearing away with his machinegun. As SGT Baskin moved, CPL Powell, the gunner on the other machinegun position that had been overrun, came up to Baskin, fell at his knees and said, "Sarge, help me. I need help. I'm hit in the back." SGT Baskin grabbed him and dragged him to his hootch. "There's lead flying all around. There's grenades. You could hear rockets to the northwest over our heads heading towards Khe Sanh. At the same time we could hear artillery pounding from Khe Sanh over our heads and then eventually was coming right down on top of us."[680]

LCPL Balzano "then saw a muzzle flash and got a glimpse of a large number of NVA crawling up the center of the hill. He began throwing as many hand grenades as humanly possible to allow the machine gun barrel to cool off and decoy the NVA from the machine gun position. After throwing cases of grenades, PFC Arnold, now deaf from the earlier concussion but able to function, found grenades still packaged in their canisters, opening them with a bayonet because the dampness swelled and sealed them, continued to feed them to Balzano to throw. We each saved one grenade apiece in case we were captured. We knew they would kill us slowly, taking pleasure in the mutilation of our bodies, so we were prepared to use the grenades on ourselves."[681]

During a lull, LCPL Balzano managed to change barrels on the machinegun, thinking that the barrel was burned out since it glowed when last fired. A NVA round exploded and he saw CPL Green sail through the air. Although hit in the leg by shrapnel, Green said he was okay. He also saw two Marines, which he thought to be Castillo and Green, to his right firing. They kept the side covered while he kept the center covered, walking his machinegun fire side to side from a point in front of him to the far end of the hill. The M-60 finally jammed.[682]

Balzano and PFC Arnold desperately attempted to repair the M-60, breaking it down and checking each piece, but were unable to fix it.[683] Balzano told Baskin: "I can fire one round, but can't get any sustained rate of fire out of it, no automatic fire." The weapon had been previously test-fired, but he was only able to fire 200 – 300 founds and it jammed."[684]

Hand grenades were getting low, so LCPL Balzano found a willie peter grenade in his bunker. Not recalling the time delay, he saw a NVA coming around the side, popped the spoon, counted, and threw it, hitting the NVA soldier about chest high as it exploded, causing the enemy soldier to scream a cry he says he will never forget.[685]

SGT Baskin saw PFC Steve Arnold with CPL Powell who was seriously wounded: "..his elbow on one of his arms was plain and I saw blood running out of one ear, and he had shrapnel wounds covering one portion of his body. It just scarred me. I was scarred. I was frightened. This was my first fire fight and I knew—I'm in a position now where everyone's depending on me as I depend on everyone else."[686]

CPL Buffalo, who was wounded about 0130, had remained on the radio directing artillery on the enemy positions and finally on the hilltop itself since the position had all but been lost. He later noted that it was a good thing the artillery didn't have the correct coordinates "or else he wouldn't be here today." Although Khe Sanh base fired "everything but the kitchen sink," he was unable to determine its effectiveness due to the night and the fog that socked them in. Then, either a RPG or grenade came into his bunker, killing Speir and wounding himself and Howard.[687] (Note: in July, 1967, Marines from 2nd Topographic Company who surveyed the Khe Sanh area, determined that Hill 950 was actually 963.29 meters high.[688] Rounds fired from KSCB to the northern slope of Hill 950 obviously didn't clear the summit!)

The NVA force clearly had fire superiority in addition to their element of surprise. SGT Baskin spotted the NVA setting up a machinegun atop the bunker in the center of the outpost and their determination despite being shot at and killed by the American defenders. "I saw

two go down, only to be replaced by two more. They were filling sandbags; believe it or not, they were taking sandbags from the base of this position and filling them up, and they built a parapet around this gun.[689]

LCPL Balzano heard something land in his hold, but couldn't find what it was. He later discovered it was a ChiCom grenade which was thrown without the string pulled to detonate it. As he looked up, he saw a head without a helmet starting to come between two bunkers. He aimed to fire, but just before he pulled the trigger, he saw it was CPL Green, who looked at him and smiled![690]

LCPL Green continued to fire at the NVA, and at least five or six fell over the cliff. Marines not in the radio bunkers or on the each machinegun position withdrew in the southwestern side of the perimeter[691] where SGT Baskin established a 360 perimeter around one bunker and two hootches.[692] LCPL Balzano, PFC Steve Arnold, CPL Powell, and PFC Monroe manned a machinegun position while SGT Baskin, LCPL Green, and LCPL Castillo manned a bunker covering the right flank. SGT Baskin refused LCPL Balzano's request to send over one man, thinking the NVA might attempt to penetrate from the right flank. "Why I made this decision I don't know because it turned out to be for the better."[693] Then a ChiCom grenade exploded, peppering the backs of Castillo and Baskin.[694]

By 0220H, SGT Baskin had requested artillery be fired on top of the hill, and the request was granted as artillery, 4.2" mortars, 40mm dusters and 106s blasted the hilltop.[695] SGT Baskin recalled the rounds: "..these twin 40s down at Khe Sanh were firing right on top of us, right directly on top of us, and they were like eyes coming out of the fog. You could see them. They were all over the place. It felt good to have this artillery. I felt as though it wouldn't hurt us, because, you know, we were on the same side."[696]

At 0230H, 3d MarDiv COC reported to III MAF COC: "The situation looks grim on the hill. One report received indicated the position was overrun, however, cannot tell complete situation at this time."[697] Ten minutes later: "3 are reported still alive. Looks like the enemy is trying to overrun the position."[698]

At 0310H, a misfire of the 40mm Dusters resulted in 3 WIA. At 0320H, Recon team VIPER was adjusting fire on the north side of Hill 950.[699] At 0323H, 3rd MarDiv COC reported to III MAF: "All contact has been lost with Marines on Hill 950. Appears position completely overrun."[700] At 0340H, TPQs were fired at XD805465 and XD825485.[701]

At 0500H, fog completely shrouded the outpost and NVA soldiers held the bunker containing three radios in the center of the hill.

The NVA machine-gunner atop the comm. bunker in the center of the hill continued to fire on the Marines.

"Balzano had a M-79 in the hole with him, so he tried to hit the tree behind the NVA gunner with the hope the explosion would annihilate him. He hit his mark on the tree, but without success. The NVA gun still fired. Balzano then decided to wait for him to put his head down and then sight his gun on the spot where he should come up, and kill him. It soon appeared that he was down, so Balzano stuck his head up and found himself looking straight into the eyes of the NVA gunner for what seemed like minutes. Balzano wondered why he would want to kill him; he probably has a family, parents, a home, a wife waiting for him, just like him, when something struck Balzano in the front of his head and knocked him over. He thought to himself that he must be dead and the first thought that came to his head was that he would never get the Corvette he dreamed about. He touched himself all over and realized that he was still alive. The gunner had pulled the trigger aiming at Balzano and in those few seconds he realized it was all for real and acted upon what the Corps had taught him – kill or be killed. After looking at his helmet later he realized that if the bullet wasn't deflected by the liner it would have entered through the top left side of his head and came out of the right side of his jaw. He touched his head and realized, although bloody, that he had only been graced."[702]

SGT Baskin told LCPL Castillo: "We got to get over there; we got to get that radio." LCPL Castillo picked up two of the AK-47 rifles strewn over the area and gave one to Baskin. Castillo, a former sniper, put down his M-16 (which was giving him trouble) and told Baskin: "If I see one, Sarge, I'm going to hit him right between the eyes." "And he did! He knocked one out of the tree,

and that morning when we found him, he had a round right between the eyes."[703]

Sgt Baskin furtively crept up on the 2 NVA sitting behind a gun, fired on them, and killed them. LCPL Castillo's helmet was shot off his head during the continual NVA fire. SGT Baskin told him to spray covering fire as he maneuvered to the center and assaulted the comm.. bunker occupied by the NVA. "I knew it was e3ither take that bunker or stay here all day, and who knows what may happen?" As SGT Baskin, LCPLs Castillo, Balzano, and Green, and PFC Arnold went on line and assaulted the NVA-occupied comm.. bunker, the NVA fled. "They showed their backs and we were happy. We knew we had them." SGT Baskin seized the bunker along wi8th a NVA POW, and comm.. was restored with KSCB.[704] The Marines heard the NVA dragging their dead from the position and fired at them until they disappeared into the woods.[705]

CPL Buffalo had worried about the antenna sticking out of his bunker. The NVA evidently has assumed no one was alive in his bunker (containing both he and LCPL Howard) and, after the one grenade, had made no further assaults on it. As the morning dawned, "I heard someone ask 'What the hell is Vietnamese "to stop"?' I jumped out of the bunker and shouted 'Americans, Americans!' Someone said, 'Come the hell out of there' and I did with both my hands preceding the rest of me. I was afraid I'd be shot if I didn't. Howard came out after me. I couldn't walk, and Howard didn't have a physical scratch. Howard then took over the radio and got a call from some General saying everything was OK and reinforcements were on the way.[706]

LCPL Balzano remembers CPL Buffalo emerging from his bunker: "We looked at him and he looked bad."[707]

SGT Tom Howard of D/1/26, landed to secure the position.[708]

Following the fight, the Marines secured the perimeter but decided not to touch their KIA, which might have been booby-trapped. They returned to KSCB. "We cried; it was a nice feeling to be safe for awhile."[709] Balzano and Green later returned to the hill to assist in fortifying the perimeter.

SGT Baskin later killed himself in his attic with a .45.[710] CPL Green and LCPL Balzano, although meritoriously promoted, were never recognized with either a Purple Heart for their wounds nor an individual award for their heroism. William R. Fultineer, also from the Security Platoon, later wrote: "No braver Marines have ever served.. How individuals such as these are simply forgotten is beyond imagination.[711]

Back on KSCB, 2/Lt Lee Klein, the Intelligence Officer sent from Division, recorded a tape he sent home: "One major problem is now they've taken the hill which is right above our base, Hill 950. You'll probably hear about that in the newspapers. If they've taken that we're going to be in some deep trouble. They're going to try and send a rifle company up that hill today to see if they can take it. We don't know exactly what the status of the people is up there. This is the morning now; it's about 8:15 right now. We haven't got a real good idea of what's going on up there. The thing is all cloud-covered right now so we can't see anything."[712]

At 0945H, KSCB received the radio call from Alpha Relay that all friendly were accounted for: 6 friendly KIA, 2 friendly WIA.[713] One of the WIA, Carper, an Afro-American, was covered with shrapnel holes over 90% f his body. At 1230H, weather broke, and helos landed elements of Co D/1/26 to secure and evacuate the WIA and KIA.[714] Cannoncockers of A/1/13 and W/1/13 had fired 3,206 rounds in support of the Hill 950 fight.[715] Marines from D/1/26 scouring the area discovered a NVA WIA, PFC Nguyen Van Chat, of C-9 Co., K-9 Bn, 95th Regiment, 325C Division. The 20 year-old NVA from Thanh Hoa in North Vietnam stated that his unit of 100 men attacked Hill 950 with 50 AK-47s and 38 CKC-90s.[716] PFC Chat disclosed that his unit walked two days and nights from the north (vicinity of Dong La Ruong, XD8551) with only six hours rest in the three days preceding the attack. C-9 Company was composed of 100 men (90 of which were combat effective). The mission of their unit was to overrun the Marine position and then retreat back to their base area at Dong Tri Mountain (Hill 1009, known as Hill 1015 on American military maps). The 325C Division began their infiltration into South Vietnam, crossing the Ben Hai River on 7 March 1967 and their first engagement was this attack on Hill 950.[717]

Following the battle, two platoons were left on the hill to construct adequate defenses. After sufficient wire and other defenses were complete, it was planned to re-

duce the number to approximately 26 men to include communicators, scout-snipers, and infantry.

John Franklin, who had been on the Ibanez patrol, was sent to Hill 950 as one of the recon radio operators. 'I went up, rebuilt the bunker. They sent up another guy to help me stand watch because staying on it 24 hours a day was tough. I was sitting there pulling dirt clods off the wall of the bunker and a finger rolled out! It stunk the whole bunker up so bad. I called for my secondary man who came in there and got one of those little milk cartons. He took a stick, scraped this thing and put it in the milk carton and threw it away. It was a body part that got thrown back into the wall when the charge went off."[718]

That significant numbers of NVA remained in the Khe Sanh area following the Battle of the Hills should have been apparent to those who ordered operations in the area following the contact of 21 May. Bravo Company, 1/26, had just relieved Alpha Company, 1/26, defending Hill 881S, when they dispatched a two-platoon size patrol to the same location as the contact of 21 May, moving from Hill 881-South towards Hill 800 (XD759444). All patrols had been using the same route, over a land bridge. During the preceding night, leaders of the patrol expressed their apprehensions. 2/Lt Guy Pete "..told everyone they were going to get hit."[719] The first fire team leader, 1st Squad, 1st Platoon, Gene Weresow, along with Cpl Crooks, told their Lieutenant "..we didn't like the path of this patrol as we ran this same ground several days in a row. We had misgivings about this and the Lieutenant told us these are the orders and we go... I was always of the opinion that someone knew they were waiting for us and let us walk right into that ambush. Wanted to see some action."[720] Lt John Kaheny, "I always suspected that the higher-ups knew that there were large numbers of NVA hanging around just outside 105mm range (11,000 meters) from KSCB and that we were sent out to bait them into range."[721] "Nobody would pay attention to what we were telling them."[722]

At 1105H, the patrol received approximately 15-20 rounds of automatic rifle fire from Hill 881-North (XD775456) during a helicopter landing. The Marines responded with 81mm mortars and 106mm recoilless rifle fire, silencing the enemy—then.[723] A few hours later (at 1320H) the patrol, now at XD760445 (just west and a little north of Hill 881-South) went on line, in a 180 formation as their Line of Departure and as an assault squad moved through this LOD,[724] all received 20-30 rounds of incoming fire followed by an assault from their west by approximately 30-40 NVA,[725] from XD756443.[726] The NVA had the position zeroed-in: "In 10 or 15 seconds the majority of the patrol was decimated. Bravo Company almost did not exist after that. Guys were killed pretty quick because they mortared us. We were in soft covers. It happened so fast; everybody was killed or wounded within a matter of ten seconds."[727] During the mortar attack, a machinegun crew in front of the company CP was hit and LCPL Edward C. McFadden, a company radio operator, removed his radio and moved under the NVA fire to the machinegun position where he opened up fire on the assaulting NVA, only 10 meters from his position, stopping their advance and undoubtedly saving many Marine lives.[728]

Denny Bowers, a radioman in Lt McDonald's platoon, suddenly found himself alone. All those in front of him had been killed as well as those behind him, and in this precarious position, his M-16 jammed! John Joseph Chase grabbed a rifle and ran across the fire-swept area to give to Bowers only to be killed in a burst of automatic rifle fire. Miraculously, Bowers escaped this skirmish with only a second Purple Heart.[729] The Marines

[729] Conversation with Denny Bowers, 01 January 1987.

had walked into a carefully prepared NVA ambush.[730] The mortars streaked right over the top of Tom Steinhardt's fire team which didn't get hit. "We sprayed that area and then we started fighting our way up to the top of that ridge. By the time I got up there I was the only one left in the fire-team. Dutch took an AK [round] through the throat."[731]

Most of Eugene Weresow's squad were KIA. There were 2 WIA and Eugene, unwounded. They were on the left flank as the mortars and small arms fire rained upon them. "Most of the platoon fell back to the right side and I was stuck on the left side of the knoll with a wounded Marine and NVA running all over the place."[732]

The Marine patrol returned fire and moved to the reverse slope as artillery, 81mm mortars, and gunships struck the NVA.[733] LCPL Kenneth Ray Keefer, a 3.5" gunner, ran to 2/Lt Dennis E. McDonald asking for targets, and moved through the fire to the right of Staff Sergeant Robert Otis Ward of the Second Platoon. (SSGT Ward had led a squad into a forward position from which he could return fire and throw grenades on the advancing enemy and provide covering fire to protect the CP of the patrol). Along with three other Marines, SSGT Ward held this forward position, dodging grenades thrown from less than 20 meters along with small arms fire. LCPL Keefer, during later evacuation of casualties was mortally wounded while returning to assist other wounded.[734]

HN Gregory Paul Vercruysse, a newly-arrived Corpsman, replacement for Al Winney had arrived as the patrol was departing and begged to accompany it. Winney said, "No, stick around and meet the guys and I'll take this patrol." He replied, "No, I'm here; I want to get my feet wet, let me go." Winney spoke with the Lieutenant who said, "Hey, he's right, let him go." Vercruysse was the first casualty Winney located. "He was trying to get a cigarette wrapper and go ahead and tape up his own sucking chest wound when I got to him. Harvey [DeMaagd, the 1/26 Battalion Surgeon] opened his chest and apparently cut one of his major vessels and he ensanguanated and died. He did everything he could—with a flashlight and a number Ten blade, what more can you do?"[735]

Corpsman Winney's best friend, LCPL Robert Francis Enderby, was also KIA this day. "We had plans of spending time together after we got home. He really wanted to see the Adirondack Mountains of upstate New York, my home, some friends, and do some fishing. Bob was our 60mm mortar man, and he was killed by a NVA mortar. I had just left him and he was covering my butt while I tried to get to 2 wounded Marines on our left flank. Someone started yelling 'Corpsman' behind me. I went to them and found a mortally wounded Marine with much of his face gone. I cut a tracheotomy and attempted to resuscitate him when I read his dog tags and realized it was Bob. Over the months with Bob in combat it seemed whenever we had wounded that Bob was always assisting me in carrying them to a medevac chopper. That afternoon I carried Bob by myself with eyes free of tears and a heart full of hate and remorse."[736]

CPL Edward Francis Furlong had joined the 26th Marines as it formed at Camp Pendleton, assigned then to I/3/26. Another Marine in the same company, Gregg Reed, couldn't stand him: "We're both from Irish Catholic families. He was a typical New Yorker. The next thing I know we're best buddies. The day I was transferred, I'll never forget: he gave me a religious medal. And I remember when I spoke to his mother I said, 'Mrs. Furlong, would you like me to send that to you?' And she: 'Absolutely not. He gave that to you."[737]

Lt Guy Pete, watching the entire action from Hill 881-South, went to the 105mm howitzer crew on the western finger of Hill 881-South to ask if they could shoot direct fire. He had them load Willy Peter rounds to identify where the rounds hit and fired until the Company Commander, Capt Connell, called cease fire: the

---

[730] John Kaheny recalls a visit by Col Padley (CO, 26th Marines) and LtCol Newton (CO, 1/26) to Hill 881-South just after this incident, saying the action resulted from a chance encounter between patrols. Lieutenant Guy Pete spoke up and said, "Don't you remember two weeks ago [May 21st when we took two KIA] when Alpha-3 almost got cut off just past where Bravo got ambushed. They were waiting for us today." Kaheny recalls, "Soon after that Guy was transferred to recon!" [email from John Kaheny, Khe Sanh Message Board, June 2002, posted 11 June 2002]. Guy Pete: "It was not a chance contact; it was an ambush." [email from Guy Pete, Khe Sanh Message Board, June 2002, posted 13 June 2002].

[731] Comments by Tom Steinhardt at Khe Sanh reunion, 20 July 1990; Conversation with Tom Steinhardt, 7 October 1990. He could not further identify "Dutch," except to note that he had about 20-30 days left to do in his Vietnam tour of duty and was the fire-team leader. "They gook him out to the hospital ship, but he didn't make it. He died of wounds was the word I got."

[732] Letter from Eugene Weresow, 19 December 1996.

[734] Statement of 2/Lt Dennis E. McDonald in SSM file of LCPL Kenneth Ray Keefer. The 4th Endorsement on the recommendation by Commander in Chief, U.S. Pacific Fleet, recommended the Bronze Star Medal with "V" instead of the Silver Star Medal. [FF1-1, 1650, Ser 102/5845, 22 Sep 1967].

[735] Letter from Al Winney, 03 June 2003; Conversation with Al Winney, 15 November 1989. Al Winney's father had served in World War I and was 61 when Al was born. Al wanted him to as proud of him as Al was of his father, and went into the Hospital Corps, U.S. Navy. After serving in neuro-psychiatry at Bethesda, he felt he should be in combat, and volunteered to serve with the Fleet Marine Force.

[736] Letter from Al Winney, 30 July 2003.

[737] Conversation with Gregg Reed, 25 November 1998.

rounds, he thought, were too close.[738] Eugene Weresow, however, credits this fire with saving their hide: "You are right they were close. I was on the left flank all alone at that point and those suckers went right over my head. The NVA got spooked and took off. Otherwise my name may be on that list."[739]

In addition to the artillery, A-1 Skyraiders dropped two 2,000-pound bombs on masses of the NVA. "The bombs looked bigger than the plane; I'd never seen a bomb that big. I don't see how they got in the air!"[740]

2/Lt John Kaheny had been searching with his platoon the area where Ibanez was lost when he got the word to return to KSCB immediately due to the Hill 950 situation. "We were at the airstrip and all of a sudden everything changes." They received word of Bravo Company's contact. "My Company Commander and Company Gunny, Norm Centers and Gunny Parrish, got on a helicopter and went out to 881-South and picked up Guy Pete's Platoon. Guy Pete was there [on Hill 881-South] because Centers took what was left of his platoon to run the medevacs and air strikes. 2/Lt Doug Sykes, the B/1/26 XO was also there, unable to communicate with the patrol due to dead radiomen. John Kaheny, upon arriving with his platoon said, "We got to do something. I got a platoon. I'm going out." "So we took off and went out as the NVA were still making their hat down the slopes of the hills."[741] A-3 departed 881-South, led by John Kaheny, at 1415H.[742]

Upon linking up, a HLZ was established and casualties medevaced as ALFA-6 (1/Lt Norman Centers) directed fixed wing; the NVA broke contact and withdrew to the west at 1640H. John Kaheny moved B-3 under fire to Hill 821 (XD763443) to cover return of the patrol.[743] Casualties: 18 KIA, 16 WIA.[744] NVA strength was estimated to include a company at XD756439 and another company to the north of Hill 821 (XD760445).[745]

Upon return, the Marines were greeted by visiting Generals. One, in starched utilities came up and said, "I understand you really did a fine job out there, Marine." PFC Tom Steinhardt, not realizing it was a Brigadier General, said, "If you really think so, why don't you tell it to the dead!"[746] He notes that they were going to put him in for a Silver Star Medal; he said, "Yeah, big deal! What about the dead Marines and the wounded Marines?" "I was pretty upset."[747] Eugene Weresow recalls a LtGen who said, "Good show, Marine." "At that point I was so disgusted all I could say was something like 'yeah, sure!'... The next morning I was sent down to KSCB to identify the bodies of most of first squad. I remember praying for them, but did not expect what I saw. Some had half a head missing. Others had limbs blown off. God, what a bad scene!"[748]

08 JUNE 1967

MYERS, 1/Lt David Gephart VMO-3

On 08 June 1967, 1/Lt David Gephart Myers launched as pilot of a UH-1E gunship of VMO-3 (#154763), assigned a VR [Visual Reconnaissance] mission for mortar positions west of Hill 881-South. (Capt Boyd Leedean Barclay was Co-Pilot[749] and the crew consisted of Cpl Lannan[750] and LCPL Charles P. Alexander). As they flew approximately 1000 feet above Hill 881, suddenly at 1412H, a big ball of fire crashed through Lieutenant Myers' front window, head on, throwing Lt Myers back into his seat. He dropped his arms to his side and the bird started down in a wobbly flight. A few seconds earlier, another ball of fire and explosion had crashed through Capt Barclay's front window, severing his left hand above his wrist.[751] The pilots had been struck by a .50 cal.[752]

The chopper lost all power and immediately commenced loosing rotor turns, descending into the trees. Acting instinctively and despite his serious condition, Capt Barclay lowered the collective[753] with the remaining portion of his left arm to save rotor turns and expertly

747 Conversation with Tom Steinhardt, 07 October 1990.
748 Letter from Eugene Weresow, 19 December 1996.
749 Capt Barclay, although senior in rank, had less flight time than 1/Lt Myers; Barclay had served his first Vietnam tour in artillery, then went to flight school. [Conversation with Boyd L. Barclay, 22 August 2004].
750 Died of a heart attack *ca.* 2000.
751 26Mar 081120Z/Jun67, Opn CROCKETT SITREP #105; Statement of LCPL Charles P. Alexander in SSM file of Capt Boyd Leedean Barclay. Although Alexander's statement indicates that Myers was hit first, Capt Barclay recalls the sequence being that he was hit first, yelled, "I'm hit," and then Myers shouted, "I'm dead! I'm dead!" [Conversation with Boyd L. Barclay, 22 August 2004].
752 "When I got back, I asked our section leader 'What was it that got us?' He said, 'It was a quad .50. I saw them get you.' He was coming in behind us and saw what hit us." [Conversation with Boyd L. Barclay, 22 August 2004].
753 The "collective" is raised with the left hand and twisted to give gas and engage the rotors with the engine. When engines are lost, to autorotate, the collective is lowered to disengage the rotors from the engine so the rotors will "free wheel." [Conversation with Boyd L. Barclay, 22 August 2004].

guided the aircraft toward the ground, resulting in a semi-controlled landing in dense undergrowth as they crashed at XD763467. The aircraft rolled several times down a steep incline, breaking Capt Barclay's left leg. The two crewmen were uninjured except for minor cuts and bruises. Had it not been for Capt Barclay's quick response, there assuredly would have been no survivors of the crash.[754]

The two crewmen crawled out and went to Capt Barclay who was rapidly loosing blood from his severed hand. LCPL Alexander took the tie down from the bird and used it as a tourniquet to stop the bleeding, took his .38 and the survival radio and began calling for help. Five or ten minutes later, a H-34 arrived, but could not get to them due to the vegetation and terrain. "We dragged the Captain all the way using a chain method by grabbing each other's hands with the lead man grabbing a bush.. vine or anything handy. He'd tug the second man who had a hold on the Captain's good arm or flight suit. The hill was steep and the going slow. We were around ten yards from the bird and the smoke was very thick."[755] "When they were dragging me up the side of the hill, I thought my hand was gone—I didn't look at it. But they were dragging me on their hands and knees up the side of the mountain and I felt a tug on my arm. I looked down and my hand was still hanging on by an inch of skin ther by the thumb and it was getting tangled in shrubs and the tourniquet came off, but there was hardly any blood coming out."[756] As the three struggled to the top, Capt Brackins flew cover, aware that whatever struck Lt Myers and Capt Barclay could not be far away. The three boarded the H-34 and all returned to Khe Sanh.

The three survivors escaped just in time: NVA soldiers were crawling over the carcass of the helicopter within five minutes. The body of Myers was not recovered. The area remained hot for a long time. Air strikes were run, completely destroying the aircraft.[757] "Some of the crews in the unit wanted to go back immediately to recover his body but they were overruled. Eventually an effort was made to recover his remains, but they were long gone."[758]

"Davy" Myers
By Christopher J. Vann[759]

"It was an evening in late November, 1966. The sharp, late autumn cold could not be felt within the warmth of the Rathskeller at Penn State, where I stood at the bar drinking Schmidt's of Philadelphia draft beer with David, an Airborne Ranger Army Captain. The jukebox was playing the early '60s songs favored by the college crowd; the Four Tops' *Baby I need your lovin; Reach out, I'll be there;* etc. David and I had gone to high school and Penn State together, I had left to serve in the Army, while David was graduated in '63, went into the Army, went to Vietnam with the 101st Airborne, and was now back as an ROTC instructor. I had returned after the Army to finish my last year, and would be graduated in a few weeks.

"Their arrival is as clear as if it happened yesterday; the door swung open and two Marine officers strode in. I can see the sweep of their arms as they removed their garrison caps and pulled them under the right side of the belts on their woolen forest green uniforms. The taller dark haired Captain, I did not know. The Lieutenant on the right, walking up and extending his hand was, astonishingly, 'Davy' Myers. Davy and I were both members of Sigma Phi Epsilon; in fact, he had been my 'little brother' when he pledged the house. My astonishment was occasioned because in my experience, Davy was not one whom I would have imagined as a Marine. He was a *gentle*, good natured boy with a ready smile and laugh. A boy whom I could believe *had never done a mean thing in his life*. A boy who, with his good manners and Teutonic blood handsomeness, were he to show up on the arm of your daughter, you would silently exclaim *'Thank God!'*

"We talked and caught up. Davy introduced his friend. They were both from State College, Marine aviators, and were home on leave before shipping out for Vietnam. They had just come from some sort of a meeting with the VFW or something.. They of course were mightly interested in David's experience of Vietnam. We drank Schmidt's, and at the end wished them well and good luck.....

"Now it's 1989. I've got two kids... Just before Christmas, visiting in-laws in suburban DC, I got up and got going one morning. My wife asks, 'Where are you off to?' *'Going down to the Vietnam Wall.'* 'Do you know someone on it?' *'Oh, yes.'*

"On the street from the Metro Station it was brisk. I guess I thought about Davy Myers at times over the years, I just don't remember. I had no idea what had happened to him, nor what sort of helicopter he flew, or where he had died. I was wearing running shoes for the walking and broke into a slow trot. Turning the corner onto Constitution Avenue, I suddenly experienced a *physical, and emotional, sensation*. A tingling, electrical surge on and through me, coupled with a feeling of great joy and happiness; a *grand frisson; a spiritual embrace*. I know it was Davy saying, *'You son-of-a-bitch!...you didn't forget me!!!'*"

Lt Myers had been one of the pilots that rescued recon team BREAKER on 10 May 1967.

[*Numerous reports of detections of NVA units during June, 1967, ominously reflected portending battle. A SOG unit operating just west of the DMZ (near the location of the future site of the NVA's headquarters for the 1968 Siege battle) on 10-11 June heard equipment and an estimated 150 troops moving into a bivouac near XD697667 and 17 trucks moving to a second bivouac area.*[760] *In the area just west of Hill 881-North to the area of Hill 918 (XD726445) numerous NVA positions were discovered and destroyed by air rather than infantry as had been the case in the Battle of the Hills.*[761] *A JTAD report of 15 June indicated that just west of the Co Roc massif, on 13 June there was a large unit of NVA located in a triangular area (XD700308, XD740317, XD709328). In the same area a large tunnel was discovered with entrances at XD700308, XD740317, XD709328, and XD704314. Large quantities of food were stored in the area and there were about 1800 men armed with many heavy weapons, anti-aircraft weapons, machineguns, and individual rifles.*[762] *On 23 June 1967, the S-2 of 26th Marines reported two NVA battalions operating near Hill 918 (XD726444), and the ridgeline (XD740510 to XD780500). A prisoner and captured documents indicated this to be the 4th and 6th battalions, 95C Regiment, 325C Division. Recon patrols had made numerous contacts in this area and discovered numerous well camouflaged and well fortified bunkers, tunnels, and foxholes through the area of Hill 918. The majority of the positions are unmanned but could be occupied at any time.*[763]

Col John J. Padley did not possess sufficient troops to venture into these areas without risking a repetition of what happened to B/1/9 in April. In fact, being beyond the artillery fan, the situation would be more tenuous. At his FMFPAC debrief, he warned: "Operations there should be at least battalion-size. Whether they're there or not we're never too sure. They've built bunkers. They can move in and occupy any time they desire.[764]

TIGERHOUND and JTAD agent reports indicated a heavy buildup of NVA forces in the vicinity of the Laotian border near the northwestern portion of the TAOR, XD643494, XD619521, and XD580507, with the mission to attack U.S. forces.[765]

Due to sustained and reinforcing NVA presence in the Khe Sanh area, another Marine battalion arrived to permit saturation patrolling of the area. Battalion 3/26 was CHOPed to the 26th Marines on 13 June 1967 at 1815H.[766] *The next day, "C" Battery, 1/13, arrived via Rough Rider convoy at 1550H along with K/3/26 and the RLT-26 Scout Sniper Platoon, and F/2/12 departed via the same Rough Rider.*[767] *Co "B," 3rd Reconnaissance Battalion, replaced Company "A," 3rd Reconnaissance Battalion on 25 June 1967 (although many Marines of Co. A remained at Khe Sanh, now assigned to Co B), and Co. B, 3rd Tank Battalion arrived on 28 June 1967. Exchange facilities (the barest of essentials!) became available at Khe Sanh on 15 June and postal facilities the next day.*[768]

On 14 June 1967, two Marines of CAC OSCAR were seriously injured while clearing a friendly mine field with C-4 explosives, at XD842408 (just outside KSCB).[769] *One of the Marines, Cpl Craig William Albers, lost both his legs above his knees.*[770] *The Marines from CAP O-3 had purloined mines from the base and installed them in the fire zone around their camp. They then were ordered to remove them but had neglected to map the locations or had lost the map. Cpl Albers, who had set the mines, volunteered to recover them. His nickname was "Slats," which describes his build. Supposedly he was an aspiring track and field athlete.*[771]

During the evening of 18 June 1967, a rainstorm developed when suddenly, at 2230H, a loud explosion rocked the hilltop of Hill 950 as it was struck by lightning, igniting the 30 claymores that had been set around the hill.[772] *One Marine's back was burnt about one foot wide straight down from the nape of his neck to his boot tops, and no clothing. One was peppered by an exploding grenade with fragments puncturing his lung, face, and legs, and the corpsman quickly cut his throat to permit breathing. The lightning bolt had struck their RC-292 antenna, gone down the guide lines, one of which ran into the hole where the Marine with the burnt back lived.*[773]

Just past midnight on 27 June 1967 (at 0035H), KSCB received over 50 rounds of 82mm mortars fired from XD820395.[775] The mortars were walked up and down the tent area housing troops of "A" Battery, 1/13, killing two (PFC Rick Stewart and Cpl Edward Travis). Robert J. Sullivan, in the same tent where the Marines slept only several feet apart "..often wondered why fate had dealt so kindly to me."[776] Approximately 30 were wounded, including the Fire Direction Officer and the Commanding Officer of the Battery, Capt John Vincent Brennan, who, despite his wounds, immediately led the battery in counter-mortar fires, supervised evacuation of casualties, and skillfully moved non-cannoneers to replace the casualties as he moved from one gun position to another shouting the encouragement it takes to remain on the guns with mortar rounds impacting in the area, as well as assisting the men break out ammunition and fire.[777]

Alfa Company, 1/26, was decimated. The CO received his second and third Purple Hearts and was sent to Okinawa, Lt Rusty Reeves was severely wounded and evacuated. Larry Bolger, the Second Platoon Commander, was killed. Sgt. Kincaid had been held past his rotation date only to give his life.[778] The A/1/26 CO, Norm Centers, had placed the company out in the grass behind the artillery battery without digging in, and they were butchered in the attack.[779] "I was talking with my Platoon Commander, Larry Bolger, when he was killed. He called over to me and said, 'As soon as this barrage lifts, get your stuff together; we're going to move out.' One hit in front of us and I said, 'Lieutenant, you'd better jump in.' And one hit closer and I said, 'Lieutenant,' and when I said that there was an explosion and I got knocked down. A man jumped around by the name of Rodriguez; he had his face blown off and he wrapped his arms around me. I couldn't hold him, and I went down in the bottom of the foxhole. There was another kid screaming. His hand was blown off."[780]

A posting on the Virtual Wall notes: "Bolger ran like lightning. At Cardinal Dougherty High School, he ran the mile a good time for the early 1960s. Before graduating from St. Joseph's College, 1966, he led its cross country team to victory in the IC4A and Mid-Atlantic Conference Championships. Cardinal Dougherty High School sponsors the Bolger Run in his memory each year."[781]

Tom Quigley, a radioman with B/1/26, had been sent from Hill 881-South to KSCB as a nominee for demolitions school on Okinawa. When it came time to return to 881-South, he learned that the last chopper for the day had already departed; he remained overnight on the combat base with some friends with whom he had trained in the recon company area. He soon discovered it was not safer on the combat base than on the isolated and far away hill from which patrols had resulted in deadly encounters. After the mortars ceased, some of the old "salts" that had been around awhile said, "Well, that's it; they won't bother us no more tonight. If they open up again tonight they know we got them pinpointed and

[779] Conversation with John Kaheny, 04 May 1990.

[780] Conversation with Ron Gulbronson, 14 March 2004. Gulbronson relates that he was going to be promoted the next day to Corporal, but didn't get his E-4 until November. He spent 9 months in Bethesda Naval Hospital and was retired as a Corporal, having had the back of his heart torn, part of his lung blown out, lost part of his stomach, a bone was blown from his left knee, ligaments out of his right knee and shrapnel throughout his shoulder and back. He had been tossed on a pile of corpses, assumed to be dead. A Marine named Moss dragged him, and Gulbronson yelled at him, then passed in and out of consciousness. He woke up to the words, 'Hey, this guy's alive.'

[781] Posted by Robert Greer, 12 March 2001.

we'll call in an air-strike on them."[782] They were to prove to be false prophets.

At 170525H, the base received approximately 50 rounds of 120mm rockets. The Marines on Alfa Relay, Hill 950, spotted the enemy positions firing from the base of Hill 1015 (XD857445).[783] Disregarding his painful injury and lacking a FDO, Capt Brennan ran between the guns and the FDC and led his cannoncockers of A/1/13 saturated the area; the enemy fire ceased.[784] The final casualty count for the two attacks on the 27th was: 9 Americans KIA, 125 WIA.[785]

The newly-arrived Marines of 3/26 had been informed that the base was a secure area, that they needn't bother about fortifications. The 3/26 COC wasn't even underground; it was still in a tent![786] Consequently, 3/26 received many casualties since most everyone was sleeping in tents. The 3/26 BAS was especially hard hit: total 3/26 casualties included 1 USN KIA (HM3 Curtis D. Jackson), 1 ARVN KIA, 10 USN WIA, and 22 USMC WIA, one of which later died of wounds. The rounds were walked from the BAS to the 3/26 supply tent which took a direct hit, and then stopped just short of the 3/26 COC tent.[787]

At daybreak, a USAF AO spotted mortar positions near Hill 689 (XD802409) occupied by approximately 10 NVA along with bunkered positions in the vicinity of Hill 758's southern slope, and ran air strikes on both positions.[788]

A patrol from Combined Action Platoon O-3 in Ta Cong (XD842408) just outside KSCB, was dispatched at 0830H to Hill 689 to investigate. As the patrol reached the summit of Hill 689, the point man discovered a mortar storage position at XD800410, some 4000 meters due west of KSCB. By 1230H, the patrol began receiving heavy small arms fire, was pinned down in a L-shaped ambush, and took two immediate KIAs in the initial burst from well-directed, well-disciplined machinegun and automatic weapons fire. An artillery mission was called, and the patrol pulled back off the hill since the artillery was almost on top of them, carrying one wounded Marine who shortly thereafter died. Two men returned to the hill searching for the wounded and friendly dead. Two Marines and one Popular Forces MIA had been left on the hill. One returned; the other was missing.[789] A fourth CAC OSCAR Marine, CPL James Merrill Shepard, Jr., is listed as having died by circumstances unknown. His body, initially not recovered later disclosed he had died from a gunshot wound that entered his left shoulder and penetrated into his chest.[790]

Companies K and M of 3/26 along with the Alfa Command Group had been patrolling to the southeast when KSCB was mortared and rocketed, and they lifted back to KSCB.[791] Co I/3/26, having left KSCB two days earlier, was operating west of Khe Sanh. The Marines of I/3/26 had been told it was just an overnight ambush: "We only took two meals with us, two canteens of water, and just one BA [Basic Allowance] of ammo. We weren't expecting to make any kind of contact because another company of our battalion had just swept the area five days prior."[792] It was late afternoon by the time INDIA Company began its physical assault up the northern slope of Hill 689 (at 1615H) following movement through heavy vegetation and halting to permit the AO to direct air strikes on small groups of enemy observed on the hill. I/3/26 began taking very accurate sniper fire from bunkers dug into and well-placed on the military crest of Hill 689.[793]

LIMA Company was readied at KSCB for a lift to Hill 689. L/3/26 lifted into its LZ approximately 1900H, south of Hill 689. At that time they began movement up the southern slopes of Hill 689 while I/3/26 continued up the northern slope. Both units received mortar fire from the north and northwest. An AO on station observed muzzle flashes near XD785415 and counter-mortar fires were fired by 4.2" mortars on Hill 881-South silencing the NVA mortars[794] but not the enemy on the hill itself.

I-1 and I-2 proceeded up the northern slope and, upon reaching the lower ridge, I-1 was given the order to secure the uppermost ridge while I-2 was assigned the mission of assaulting the western slope. The word was passed "to fix bayonets." David Given, one of the few 3/26 Corpsmen that escaped injury during the morning mortar and rocket attack, along with the Marines he accompanied, thought it was a joke. Almost immediately, a Marine in front of Given tripped a booby-trapped grenade and received a sucking chest wound.[795] As the point element of I-1 came within 20-25 meters of the peak, the

enemy opened up, mortally wounding the Point and immediately thereafter, the Platoon Commander, Lt Allen, the Platoon Sergeant, and First Squad Leader were all killed, and the Platoon Guide seriously wounded in his leg along with a number of other men.[796] LCPL Joseph J. Bristol took charge and began directing fire on the enemy positions. Bristol's squad fired some 120 M-79 rounds, plastering the area from which the NVA was sniping at them which killed several in his squad. One of the sniper's rounds penetrated his steel helmet creating a hole about the size of a little finger. He removed the helmet, determined that his skin had not been penetrated, and replaced it. "It rattled me."[797] The man leading the squad had been shot in his thigh by a NVA sniper. Using the typical NVA tactic of creating a casualty in order to kill more men—those who came to rescue—the sniper didn't kill him. "We came to the conclusion that this was bait, that he [the enemy sniper] was trying to get other people up and drag him [the casualty] away.. This we figured out because he had a clear shot to the man he shot for bait, to kill him. He didn't... The men came up and started to drag him away, and each man came up over the small ridge line, he [the sniper] fired at them, and each one was shot in the head."[798] A total of eight Marines were killed in this contact plus ten more wounded.[799] The Marines remained pinned down by three enemy positions.

While the First and Second Platoons of Capt M.E. Coulter's I/3/26 pressed from the north, Capt Frank Bynum, commanding L/3/26, moved his troops up the southern slope of Hill 689. L-3 moved on the left flank, L-2 on the right flank, and L-1 provided security in the LZ.[800] 2/Lt Frank H. McCarthy, Platoon Commander of L-3, although exposed to heavy, devastating sniper fire which rained on the platoon, encouraged his men forward up the hill under increasing enemy fire, hand grenades, and even DH-10 anti-personnel mines.[801] Almost immediately upon reaching the top of Hill 689, Lt McCarthy was seriously wounded by an enemy sniper and the Company Commander, Capt Bynum, moved up from his position behind Third Platoon wearing his shiny Captain bars prominently glowing on his soft cover.[802] He was instantly wounded from the rear by a sniper. LCPL Andrew B. Moreno immediately moved through the mined area to the side of Capt Bynum and placed him on his back, using himself as a sled, and crawled back with Capt Bynum on top of him, carefully maneuvering around the enemy mines to a position of relative safety.[803] Capt Bynum's wounds, however, proved fatal. He had received a sucking chest wound.[804]

2/Lt Thomas Charles Biondo of Battery "C", 1/13, attached to L/3/26 as an artillery FO [Forward Observer], accompanied the lead platoon in the assault during which the L-3 Platoon Commander was hit and the platoon lost momentum in the mine field. Lt Biondo worked his way through the mine-field, and took charge of the platoon, leading the Marines through the mines and still un-cleared spider traps. In large measure due to his calm presence of mind and resolute determination under fire, his men seized the crest of Hill 689.[805] Co L/3/26 located the two Marines from CAP O-3; both were dead.[806]

India Company secured the land bridge across the slopes which lead on to Hill 758; L/3/26 secured the top of Hill 689, formed a defensive perimeter, and held for the night.[807] The troops were on 100% alert and spent most of the night "..thinking we might be hit again by people coming over and trying to take the hill again."[808]

Early in the morning of 28 June 1967, the command group of 3/26 and MIKE Company landed on Hill 689 to mop up whatever enemy troops remained in the area. It was suspected that the NVA had pulled off to the west or the southwest.[809] The enemy, however, had remained. That night, at 1940H during a staff meeting, another rocket attack was launched by the enemy against KSCB. Approximately 25 120mm rockets were fired, nearly all of which landed outside the perimeter, with 6 falling in Co K's area, but no casualties resulted.[810] The command group saw the rockets being fired from about 1500 meters from their southwest (from XD785415, XD835326, and XD853447).[811] Marine artillery silenced the NVA's rockets with 401 rounds (Battery C) and 390 rounds (Battery A). There were no casualties at KSCB.[812]

PFC Frederick Joseph Brenke was the second of five children in his family. Prior to enlisting in the Marine Corps, his sisters recalled him on an orange rug right in front of the TV spending all Saturday afternoon watch-

While visiting the Marines of D/1/26 in the trenches on Hill 861 today, the general scuttlebutt concerns Jeanne Dixon, the one who tells the future, who predicts 1200 deaths here at Khe Sanh.[819]

175mm artillery pieces were included in a convoy that moved from Camp Carroll to KSCB.[820] The convoy included trucks filled with ammunition, C-4 explosives, claymore mines, and other ordnance.[821] Just why they were about to be sent to KSCB is unclear. One explanation might be the mission assigned to 26th Marines to support the Laotian battalion, BV-33, at Ban Houei Sane, just inside the Laotian border.[822] Another explanation might be provision of artillery support to the forming FOB-3 which would dispatch patrols into eastern Laos. Another explanation might be reports of increasing NVA presence in eastern Laos along a new road referred to as the "Santa Fe Trail."

The 21st of July, 1967, was a day of heavy enemy contact in the Khe Sanh area, beginning at 0525H with ten rounds of 82mm mortar slamming into the Special Forces camp at Lang Vei. All the rounds landed between the perimeter defensive wire and trench line and

[816] Probably died from wounds received during the mortar and rocket attack of 27 June 1967

[817] Comments by the OinC at Memorial Service for Taglieber, 19 July 1967 in diary kept by Chaplain Stubbe; Conversation with William Amunson, 01 December 1990. The memorial service was attended by 30, and the OinC mentioned there had been several more near-death accidents in connection with burning. Increments are explosive charges attached to mortar rounds to push the round out of the tube as it is fired. The amount of increments to be used determines the range of the round. Increments were frequently burnt in metal ammo containers during the cold monsoon weather to keep warm.

[822] 26Mar ComdC Jun67, Encl (1), p. 4, Para A.(2), and ComdC Jul67, Encl (1), p. 3, Para A.(2).

there were no casualties.[823] Later in the morning, a recon team reported 14 NVA soldiers at XD766423 moving north toward Hill 881-South (XD778438) and then spotted an additional 15-20 moving toward the first group. The NVA disappeared into the canopy before an artillery fire mission could be called on them.[824]

The really big contact, however, was to the east of the Combat Base. Based on intelligence reports of a heavy weapons company north of Khe Sanh and increased movement along Route 9, MIKE Company, 3/26, was dispatched into an area northeast of KSCB where several base camps had been found by reconnaissance patrols. Leaving one platoon with 81mm mortars on the hill, two platoons began sweeping east.[825] The mission was to secure the road for a convoy. LCPL Eugene Weresow's squad walked flank security on the left through the hills overlooking the road; there was a river to the right.[826]

Sgt James Williams of First Squad, First Platoon, M/3/26, was leading the Company from Hill 606 (XD882496) to XD903497, across a valley of thick elephant grass dotted by tree lines when a new trail was located at XD902496 and the patrol followed the trail east to XD905493 for some two hours. At 0920H, the Point entered a tree line and discovered a bunker complex with huts on stilts in the Bru style and bunkers covered with two layers of logs and twelve inches of dirt, defensively oriented west.[827] As the point element advanced to investigate, the enemy opened up with fire from an estimated .50 cal. machinegun, two large machineguns, and 10-15 small arms on the point and on the rest of the platoon led by Lt Krangle.

Meanwhile, Gunnery Sergeant Harold E. Morrow, upon receiving the word that the Platoon Commander, Platoon Sergeant, and one squad leader had become casualties, immediately moved to take command of First Platoon. Moving forward under extremely intense enemy fire, he reached the unit and assumed command. While moving from man to man, controlling the fight, Gunnery Sergeant Morrow fell, mortally wounded.[828] William H. Mead, who had been Capt Debona's radioman for several months, suddenly had the top of his radio shot away by an automatic weapon. Although the antenna makes the radioman an especially lucrative target, the radio saved his life, absorbing the bullets that would have penetrated his back. "I was still talking on the radio. I was like in shock. I found out there was nobody at the other end! I was standing because I couldn't get reception, trying to call in a report to battalion."[829] LCPL Weresow's squad was crossing a bridge when the enemy opened up with their machineguns, "..and I could see the wood splinters flying off the bridge at my feet. The guy in front of me got hit; I remember he was a black guy, as I dove off the bridge into the gully below. I guess it was a RPG that blew the bridge. At that moment our point man, the squad leader, and the radio man came rolling down the hill, hit badly. I remember administering first aid to one man who had a nasty stomach wound. At this point there were 5 or 6 of us who were in the lead element and were pinned down by the machinegun on top of the hill. The rest of the company was on the road back around the bend. I had never called in a fire mission before, but I took a stab at it; we had no other choice. I got the radio and called in the coordinates of where I thought the machinegun position was. A smoke was sent which looked good to me. "Fire for effect." God was with me again. The far side of the river erupted. The machinegun fell silent."[830]

Lt Mazzi's Third Platoon, on the right flank of Lt Crangle's First Platoon, was in an excellent position to move into a flank and sweep across Lt Crangle's front through the built-up area from which they were taking fire. Capt Debona, Commanding M/3/26, so directed and the assault was just about to begin when word was received that B/1/26, sweeping east on Route 9, was hit. Due to lack of reserves in the area, the decision was made to disengage MIKE Company and continue the pursuit in the area of Route 9.[831] At 1145H, M/3/26 was helilifted back to KSCB and from 1300H to 1600H, air strikes (CASTOR OIL 173, CHAIN 105, and LOW GAP 20) were run on the NVA positions at XD953425 to XD956427, resulting in 32 structures destroyed, 10 secondary explosions, and 3 secondary fires. Air-strikes were also conducted against a suspected enemy mortar at XD964440 resulting in two secondary explosions.[832]

Killed from M/3/26 were: Gunnery Sergeant Harold E. Morrow, PFC Steven J. Mullet, Cpl Harold R. Nielsen, LCPL Patrick John Vasquez, Cpl Richard Sutter, and Sgt James Williams (the latter DOW 04 Aug). Cpl Sutter was the third of six children in his family, a kind of rebel—one friend likened him to James Dean, and he was into mischief so that his father sent him to a military prep school to get squared away.[833] He had attended college a year and a half before enlisting in the Marine Corps. Writing home to a friend, he noted concerning

Vietnam, "Hell isn't the word for it."[834] "And the saddest part of it all was he was killed on the 21" of July and was to be home between the 15th and the 30th. He had already done his 13 months and been wounded twice prior to that."[835] He had died instantly, shot through the left side of his forehead by a sniper.[836]

M/3/3 patrolled from Ca Lu and likewise sustained numerous KIA.

2/Lt Benjamin L. Long led First Platoon of B/1/26 which patrolled eastward on either side of Route 9. At 1035H the point squad made contact with an estimated NVA platoon (at XD951432) supported by a heavy weapons platoon. The enemy appeared to have been surprised when B-1 approached the flank of the enemy position oriented along Route 9, and opened fire when the lead elements of B-1 were within 20 meters of their position. The Marines received an estimated 46 rounds of 82mm mortar fire from Hill 214 (XD945435) and 5 rounds of 57mm recoilless rifle fire together with small arms and semi-automatic fire.[837] The Marine patrol had prematurely sprung a NVA ambush that had been laid from XD943423 to XD967432 along Route 9, consisting of 2000 meters of anti-personnel mines, 82mm mortars, .50 caliber machineguns, and NVA claymore-type mines. The 175mm guns had made it as far as Ca Lu and, due to the contacts, returned to Camp Carroll.[838]

The initial burst of NVA small arms, machineguns, and rockets caused several casualties in the point squad of B-1 led by Cpl Terry G. Henderson. Calmly he led his squad until they gained fire superiority, threw grenades at suspected enemy positions, and called in artillery support.[839] By 1125H,B-1 reported the heaviest enemy fire was coming from Hill 247 (XD951432), and at 1225H, B-1 sighted approximately 15 NVA soldiers crossing the river at XD947425.

The 81's Forward Observation team: Sgt Jose Castillo, Bruce Jones, and Gilbert Wall, proceeded down Route 9 which had steep hills covered with dense foliage on one side, steep cliffs to the other side, and followed a sinuous path, a perfect site for an ambush. In fact, that's what they entered, suddenly finding they were in a U-shaped ambush in which the NVA were getting ready to "close the back door" and annihilate them. "We had fired a spotter round, a WILLY PETER, and we had gone up to find out where the round went because we couldn't see it on the bend of the road. When we came around the bend in the road, they shot all three of us."[840] There was no place to go. The team crouched down. Sgt Jose Castillo, the 81s FO, had extended his tour, and not more than four days after returning from extension leave, now was on patrol teaching Gilbert Wall, a Black Foot Indian from Montana, to replace him. Castillo was shot in the chest and died immediately. Wall was shot through the top of his shoulder. The round penetrated the shoulder and went through his left lung, collapsing it, and broke two of his ribs before exiting his side.[841] Bruce Jones was shot through the throat.[842]

Friendly casualties as of this time included three Marines killed: PFC William A. Pollard, PFC Reginald E. Wilson, and Sgt Jose Castillo, plus six WIA. Meanwhile, the Battalion Commander and Company B(-) began moving to establish contact with B-1 at XD940426. Contact was established at 1505H and B/1/26 commenced a sweep towards the last known enemy position (XD948428).[843]

The NVA ambush site revealed that the personnel there had no identification; there were no letters or photographs. The enemy forces had completed construction of 25 bunkers and were in the process of constructing 75 more. There were five rucksacks of new equipment, including extended rations. The Commanding Officer of 1/26, LtCol James B. Wilkinson, evaluated the contact at the battalion staff and officers briefing the next morning, stating that the enemy were not there to interdict and destroy the 175s as such; they probably were unaware they were coming. They were rather there to dig in so that during the approaching monsoon season they could sever the road as a supply route at which time they might begin moving three battalions against Hills 881-South and 861 or try to take the combat base itself, or conduct small, commando-type terror attacks with satchel charges. He noted that much 782-type gear, rifles, and ammunition, had been hastily abandoned because of SPOOKY, and then concluded his briefing: "Now, let's see all of the men in church tomorrow!"[844]

On the evening of 21 July 1967 at 2045H, CAC O reported a Bru family abandoned all their personal belongings at the Village of Lang Bu (XD819380) and moved to Khe Sanh ville, expecting trouble at Lang Bu within the next few days and claimed that 30% of the population there were VC.[845]

04 AUGUST 1967

WILLIAMS, SGT James M/3/26

Sgt Williams died of wounds [DOW] from the 21 July 1967 contact.

[*Col John J. Padley was relieved by Col David E. Lownds as Commanding Officer, 26th Marine Regiment at 0900H, 12 August 1967*]

16 AUGUST 1967

HINSON, PFC John Robert C/1/26

Company C/1/26 had occupied a company-size outpost at a temporary position (XD910400) established near a bridge of Route 9 that crossed the raging Rao Quan River from which Marines patrolled eastward to ensure the NVA did not re-occupy their ambush positions along the road that had been prematurely uncovered on 21 July. Company "C" was preparing to depart and a temporary bridge had been removed. A group of Bru and lowland people including a caravan selling items were attempting to cross the river using a rope strung up by the Marines. It had been raining hard and the turgid river, in addition to rising some 3 to 4 feet, was raging. As they were crossing, one of the occasional swells of the river swept away some of the people and PFC Hinson, a non-swimmer, jumped in to rescue them. While he was coming to their aid, another swell swept him away. He came eventually came to a large rock, and it appeared that he would be safe, but then he was swept away.[846] Daniel Hobart, on one side of the river, and Sgt Chuck Meyers on the other, immediately dove into the river and was about 30 feet from Hinson when Hinson was swept away: "It was just like somebody reached down from underneath and pulled Hinson under."[847] Hobart recalls that Hinson thought himself invincible and had told Hobart and others "A bullet is never going to get me." Hobart: "He was one to be wondered about when he went out in the bush with us because he didn't think anything was going to happen to him."[848]

He was gone for three days until Lt Harry McNulty (C-2 Platoon) took a reinforced squad and finally located his body in a backwater pool at 1615H at XD850454.[849] The Marines established a check point at 1235H at the river's edge to provide security, and Captain Cloud, "C" Company Commander, had given explicit orders: "Do not help the people, just make sure that they don't intermingle or anything with our positions."[850]

Lt Epps, Hinson's Platoon Commander in Co "C," notes a religious dimension: "He appeared to the people in my platoon that night, and it took three days to find his body. People saw him walking around outside the wire. It was an amazing story. There were very few people I could talk to with any kind of—because most people would consider me crazy about it, but it actually happened. I did not personally see him; everybody in his Fire Team saw him. They talked about him coming back up the hill. He was looking for his hole again, to come back.[851] In addition, there were fish scales in his hair and a fish had eaten out one of his eyes.[852] James Epps wrote a poem about Hinson:

A Letter Not Written
By James Epps

I knew we would find him
the day the black water cobra slithered
across the roiling brown water
of the *Rao Quan* River in *Quang Tri* Province.

The sun looked him in the eye
when it came up the third day after
he was down under the flash flood that
sucked him, clinging, off the smooth rock.

The semiautomatic letters they sent you
didn't tell the story—
how he was helping civilians cross
the river—against orders—
when it exploded and left them
handing-on the frayed ends of a hemp rope.

That rushing river beat an old woman to pulp
then spit her back up.
An hour later we found a child asleep almost in a pool
and brought him back to his hysterical mother.
Your son couldn't swim when he went in that river

to help those people; he stayed down for three days
and
came up when the fish had eaten his left eye and left
the other
to identify him by.

The company commander remembered
giving specific orders to guard the river crossing
but not to help the refugees.
He was a general's son.
They relieved him and made him a Divisional phone
watch officer.
Bu custom and his own insistence
he wrote you the condolence letter.
Your son's name does not appear in his record of ser
vice.

Those letters did not tell you
how that river made a huge angry hissing sound
while we searched downstream
or how two squads found him and brought him to the
LZ
in a poncho.
His buddy zipped him up in a black plastic body bag.
I signed the identification.

The next day his buddy
told me that your son had given him
the radio that was left
but I packed it up with the other
things the two Marines in dress blues
brought to your house.
He used to listen to it a lot.

Your son's squad leader read me
the local newspaper clipping you sent him
saying you were proud
that your son died gallantly for his
country.

Not his country,.
He died because he could not watch people
die in front of his eyes
and at night the listening post hears
someone weeping
out in front of the wire.
Your son is lurching
up our steep outpost hill
brown water sloshing in his boots
trailing the river behind him
the fish have given him back his sight
scales in his hair
he turns like the leaf of a banana palm.

A Memorial Service was conducted at KSCB on 22 August in the 1/26 mess hall. A brass cross atop the serving table covered with an olive drab blanket formed an altar. About 100 Marines sat at the tables on either side. Lt Epps, Hinson's Platoon Commander mentioned that Hinson had been supporting his mother and also financed the education of a young girl in Greece, that he was a hard worker, always obedient, that he had just begun processing an extension so that his brother wouldn't have to come to Vietnam, and that he died serving the people here, thus epitomizing what we're all here for.[853]

In a newspaper article, his maternal grandmother, Mrs. Pearl M. Jones wrote:

Farewell to a Marine
By Mrs. Pearl M. Jones

My grandson, PFC J. Robert Hinson, USMC, was killed Aug. 16 in Vietnam. He was due home Sept. 10

I wrote to him every Sunday while he was in Vietnam and I would like to pay tribute to him this way:

SEMPER FIDELIS

Farewell to a gallant Marine, who died for his country, PFC JOHN ROBERT HINSON, 27 AUG. 1948 – 16 AUG 1967.

Dear Bobby:

Every Sunday while you were in Vietnam I wrote to you. Today, Sept. 10, I will write my last letter to you, hoping that somehow, you will know about it.

Always faithful, you gave your life on Aug. 16.. at the tender age of 18. You died trying to help others to have life more abundantly, people whose names you never knew.

That was your way of life, always thinking of others. Recently in a letter home you said, 'If I don't get home, don't worry, I am prepared to die.' You believed what you were taught as a child: 'God made me to know him, to love him, to serve him in this world, and to be happy with him in heaven.'

And you said you knew the good Lord was always looking after you.

Today, Sept. 10, we would have been looking for you to come home, but you won't be coming home to us. You are at home where you will be happy with God forever: where there is no fighting, no dying, no tears. And although we grieve for you, we are consoled to know, as you lived, you died, by your faith., Why? Only God knows, but like you, we trust His reason. And in our hearts we feel that in heavenly land, another Marine has landed and the situation is well in hand.

Semper Fidelis, United States Marines. Farewell Bobby, until I join you some day.

Love, Grama, Mrs. Pearl M. Jones.

20 AUGUST 1967

BAUCHERIO, LCPL Harold **HMM-164**

[853] Diary entry of Chaplain Ray W. Stubbe, 22 August 1967.

TALLENT, LCPL Garry Glenn B/3rd Recon

The 10-man reconnaissance patrol, SAMPLE CASE I (2B1) had been in trouble from the beginning. It was Sunday, 20 August 1967, as Chaplain Ray W. Stubbe led worship at 1000H in the 1/26 mess hall on KSCB. It was well-attended, and included both the Commanding Officer of 1/26, LtCol James B. Wilkinson, and the 1/26 Executive Officer, Maj R. M. Otterean. About ten minutes into the worship, about three or 4 recon Marines, their faces all painted with dark green and black variegated camouflage face-paint, walked in. The recon team had been playing cards in their hootch waiting for their insertion, and one of the Marines, LCPL Garry Tallent, had suggested that they go to church, and he brought them here.[854]

Shortly after noon (at 1340H), a CH-46 helicopter (#152536) piloted by 1/Lt J.W. Mahoney carrying the recon team attempted to insert at XD904498. The CH-46 landed and the team leader, 1/Lt Albert Ritchie Pfeltz, III, leaped out followed by his radioman, LCPL Garry Glenn Tallent. The aircraft came under heavy .30 caliber small arms and automatic weapons fire from well camouflaged positions to the east and west of the zone. Tallent was immediately killed. The gunner on the helicopter, LCPL Harold Bauchiero, returned fire and was hit, dying later. As the chopper lifted off, Pfeltz ran back on, unharmed, unscratched, as fixed wing (MISS MUFFETT 115 and 109, and CASTER OIL 175) ran air strikes.[855] There had been a 60-round artillery prep of the zone plus fixed wing prep five minutes before the team attempted to insert.[856]

Chaplain Stubbe unzipped the dark green outer body bag in Graves Registration and gazed through the clear plastic inner body bag at a face that seemed vaguely familiar. The face still had remnants of a few granules of camouflage face paint. The Commanding Officer of the recon company, Captain Williams, was very visibly shaken. All his Marines know how very deeply he cares for each one of them.

A memorial service was held the next day within the U-shaped entrance of the regimental mess hall with over a hundred in attendance, including Col Lownds, his S-2, Capt Harper L. Bohr, Jr., and the OinC of Sub Unit #5, 1/Lt Hester. At the time for the prayers, a floppy cloth bush hat worn by recon Marines in the field was brought up and laid before the cross on a small wooden table. One young Private, standing in the formation, wiped a tear from his eye in the brightly shining sunny day.[857]

SGT Steven A. Johnson recalls Tallent was on several of his patrols since Tallent was a radioman and rotated among the various patrols.[858] "Even when things got nasty, he was always smiling aobut something."[859]

23 AUGUST 1967

WILLIAMS, CAPT Derex Jr. 20th TASS

Captain Williams, a pilot of Project TIGERHOUND,[860] was taking off from the KSCB airstrip in his OE-1 (#56-2589) when, at 1945H, his engine failed and he crashed approximately 1000 meters from the western end of the runway at XD833418. Another man in the aircraft escaped with only minor injuries.[861] Another source indicates the aircraft was at 50 feet when its engine was hit by small arms fire.[862]

William Jabusch recalled a conversation with a Corpsman who related that the pilot had pushed his seat forward to permit the observer to leave the aircraft, but that his seat locked and he was unable to un-strap himself. The plane was aflame and he was literally burning to death, unable to extricate himself. The corpsman relating the account plus some Marines that were with him had tried to pry him loose; the fire singed the hair on their arms. They were unsuccessful. The pilot kept repeating: "Somebody, tell my wife that I love her. O, somebody, shoot me!" He wanted to be put out of his misery.[863] One Marine was about to shoot him when his buddy cautioned: "If they manage to put the fire out, you'll be accused of murder."

Col John Roberts, CO of the TIGERHOUND Detachment at Khe Sanh, relates an incident (which may or may not be this one, although there were only two crashes of TIGERHOUND aircraft during his command, the other being 17 January 1968) in which the pilot "..made a

[856] Comments of Capt James L. Williams, USMC Oral History Tape #1759.

[857] Diary entry for 21 August 1967 by Chaplain Ray W. Stubbe.

[858] Conversation with Steven A. Johnson, 29 Jan 2006.

[859] Steven A. Johnson, "Vietnam...the Sequel," April, 1998, p. 13.

[860] Gen Westmoreland coined the term "TIGERHOUND" coupling "tiger" for aggressiveness and "hound" for smelling out. These were O-1 aircraft that flew to a depth of 12 miles inside Laos to locate targets for fixed-wing or even B-52 strikes. [Westmoreland, Gen William C., *A Soldier Reports*, New York: Dell Publishing Co., 1980, p. 256].

[861] 26Mar 231650Z/Aug67, Opn ARDMORE SITREP #152.

[862] Hobson, Chris, *Vietnam Air Losses*, Hinkley, England: Midland Publishing, 2001, p. 115.

[863] Taped comments sent by Mr. William Jabusch, 08 March 1990. Mr. Jabusch died 08 Nov 1991 after receiving a bone marrow transplant due to his leukemia, and developing a brain fungus as a result.

right-turn out of there and piled in off the end of the runway. Sometimes the kids would get boozed up and they'd laugh about being an 'ace' and shooting down an airplane. Well this guy had a bullet hole in him and he hadn't got ten feet off the runway. Those things happen. Those kids get a few drinks down them. Sure, we had enemy down there pulling water out of the river and so forth, but we didn't have people ten feet off the end of the runway! I never filed any reports on it. I told the base Colonel about it."[864]

Chaplain Stubbe visited Graves Registration to say a prayer. A Marine there unzipped the outer body bag. "Usually the head is right at the top. They unzipped almost half-way down. One could see bumps on the bag where two legs down to the knees formed a fixed "V". The head was all I saw. It was almost half normal size, all black from being burnt. The back of the skull was gone—only a few sharply-pointed white bones were there. There were no eyes, no hair, just a mass of black, charred flesh and bones beginning to decompose and giving off a sickening, sweet odor. I said a few prayers for peace, for comfort, for the family, for forgiveness for any sins the man may have had and for our gracious Lord to accept him into His eternal habitations."[865] The small tag attached to the body bag had penciled words which read: "This pilot was coming in for a landing. The plane went out of control and crashed."

Several days later, some Birddog aircraft flew over the combat base as though an air show. I asked some of the officers why this was and was informed that they do this to pay last tribute to their comrade. The flying went on for over 45 minutes. It was very, very sad.[866]

28 AUGUST 1967

BROWN, LCPL Marcus, Jr. C/1/26

The area from which Co C/1/26 patrolled eastward along Route 9 following the contacts of 21 July was an area of high malaria risk. Several men contracted malaria including LCPL Brown, a machine-gunner with Weapons Platoon, attached to C-2. His fever became so intense that he was flown in a CH-46 helicopter far aloft to cool him, but he nevertheless died from the malaria fever. Lt James Epps recalls, "He was a nice person, one of those that are too easily forgotten."[867]

17 SEPTEMBER 1967

WITMER, PFC Omar David Jr. A/1/26

And

24 SEPTEMBER 1967

MC CLUNG, PFC Ronald Olin A/1/26

During the monsoon rains (from noon Saturday to noon Sunday, 7 inches!), 12 Marines from A/1/26, all short-timers (and thus not in the field on patrol) were inside a 26th Marines Regimental Comm bunker they were building using sandbags and locally-cut trees for reinforcement. The weight of the water-logged sandbags caused the entire structure suddenly to collapse at 0745H,[868] injuring all. PFC WITMER, a married 20 year-old, had internal bleeding and a chest drainage tube was inserted as well as head injuries. He died upon arrival at Phu Bai. All 12 were medevaced.[869] PFC McClung died of wounds received in the collapsed bunker.

Diary Entry: Sunday, 17 September 1967
By Chaplain Ray W. Stubbe

It was a Sunday, 17 September 1967. Somehow an ambulance (we called them "cracker boxes") managed to negotiate the exceedingly slippery road which had also been torn up with ruts and holes from the recent heavy rains and large truck movements, and just as I neared the C Med triage tent, was off-loading casualties. The 1/26 Battalion Surgeon, Dr. Harvey Demaagd, was already there. I helped carry one of the men into the triage tent. Blood was all over, coming out of his nose and mouth, and he was unconscious. His rain gear, shirt, and flak jacket were cut off, and Dr. Demaagd cut into the side of his chest and inserted a plastic tube to drain out blood from internal bleeding and permit him to breathe. Then a tube was inserted into his neck.

Then another Marine was brought in, in a very bad condition but still conscious and in much pain, pleading to have his head elevated. After the first man was treated, they began to work on him, cutting a hole in the side of his chest also. He screamed in extreme pain as a large quantity of blood drained into the tube.

Then they brought in the others, twelve in all, all from ALFA Company, 1/26, all short-timers and therefore not out in the bush. They had all eaten breakfast and were sitting in the new regimental communications bunker being constructed near our 1/26 COC. It collapsed very suddenly, not giving them time to escape, and the men were crushed un-

der the heavy logs and pierced steel matting—scrap from the airstrip being repaired.

One of the Marines, PFC Ronald McClure, had been practicing Taps on the battalion bugle for our memorial services. Another had received shrapnel recently from a "too close" close air support strike off the northern slope of Hill 881-South.

David Witmer's brother, Robert, was also serving in the Vietnam War aboard a Navy ship and didn't learn of his brother's death until after their parents had been notified. He recalls his brother as an athlete, very active in cross-country, javelin throwing, and other track and field events. They had grown up on a farm until their father began work as a mechanic in a garage.[870]

13 OCTOBER 1967

SINK, CPL Melvin Francis D/1/26

It was 2235H. A night ambush from Third Platoon of D/1/26 (commanded by Lt Walter F. Chapman, the Commandant's son) off Hill 881-South was set in a circular formation in a bomb crater at XD778437, with twelve o'clock being west. The ambush leader, Cpl Melvin Francis Sink, along with a dog handler, was at the six o'clock position, the sniper team at ten o'clock, and two Marines at two o'clock. The scout dog alerted and Cpl Sink left his position to direct a search using a starlight scope. Cpl Sink then went into the center of the crater to urinate. He apparently became disoriented and instead of returning to his position, walked out into the kill zone at approximately three o'clock. A Marine at the two o'clock position, a new, very young man who had just reported to Khe Sanh from the States, heard a noise. Although Cpl Sink had attempted to move without making noise, the young trooper heard him and fired three rounds, not challenging, apparently because that would have disclosed his own position were it an enemy.

Then there was a cry from Cpl Sink.

Cpl Sink was brought to the hill and waited some 15 minutes before deciding to medevac him,. The request was "priority," nor "emergency," since he only had several small holes in his shoulder and the corpsman assumed it was only a small flesh wound, nothing serious. Cpl Sink was fully conscious.

The medevac was completed at 2315H, and Cpl Sink was dead on arrival at C Med from loss of blood due to internal bleeding, the bullets having hit a large vein or artery.[871]

The young Marine who shot Cpl Sink was WIA during the siege battle on 04 March 1968 and KIA 13 June 1968.

[*Onding rainfalls beginning in September collapsed all non-concrete, underground bunkers and began to erode the soil underneath the metal airstrip, creating dangerous landing conditions as the matting buckled under the weight of incoming aircraft. Top priority was assigned to upgrading the Khe Sanh airstrip, especially due to inability to utilize the overland logistics link, Route 9, which was impassible due to washed out bridges and probable NVA ambush sites. CBMU-301, Detachment B, was assigned the mission of upgrading the airstrip. A basalt knob, one of three within 1/8-mile of the Combat Base, was chosen as a quarry, about 8 minutes distant from the perimeter, and would supply an estimated ten to fifteen thousand cubic yards of useable material. The rock produced unweathered particles which are sharp-edged, angular, hard, and durable; the weathered break down to sharp, angular, hard and durable sand. Fracture is conchoidal.*[872] *Rather than maintain it piecemeal, the decision was made to rebuild it entirely. Compacted crushed rock would replace the laterite clay under the matting to ensure optimal drainage. Closure of Route 9 meant that equipment for this purpose needed to be transported to Khe Sanh by air.*[873] *Despite the rainfall, reconstruction was commenced in earnest, including a rock quarry, rock crushers, major excavation of mud from the sub-base once the matting was removed, grading and compacting the rock, sealing it with RC-3 asphalt, and then relaying the AM-2 aluminum matting.*[874] *As Marines from B/1/26 provided security, engineers from 3rd Engineer Battalion cleared a nearby hilltop of all trees and dirt, then planted dynamite and blasted. A 27-man Navy Seabee team from Naval Support Activity, DaNang, operated two rock crushers each operated by a 125 horsepower engine, smashing 12" boulders of basalt into tiny bits in seconds, generating about 200 cubic yards of gravel per day. The Khe Sanh airstrip was not level, but rose gradually from the east end until it was 100 meters higher on the west end. It was also higher in the*

BJORKE, CAPT Erle Lawrence	**314 TAW**
HOTTENROTH, 1/Lt James Randall	**314 TAW**
MOSLEY, TSGT Edward	**314 TAW**
SNYDER, A2C John Herbert	**314 TAW**

It was a Sunday that began as a sunny, cheerful day. A Corpsman, Ebert, at C Med, was playing Vivaldi's *Gloria* on a newly-acquired tape recorder. The colorful state flags on either side of the road to "A" Battery added splashes of color to our red-mud base. Then the weather changed and became pouring rain and clouds.[877] At 1405H a USAF C-130F (#64-0548) of the 314th Tactical Air Wing, loaded with sandbags and preparing to make a ground-controlled radar approach low-level air drop, crashed into the cloud-covered eastern end of the runway (at XD853417). EO1 Gilbert Schoultz and EON2 Bone of CBMU-301 Det B were on a grader and had just scraped the shoulder from west to east, turned around, and moved east to west when they heard the crash and watched the plane slide to a halt less than 200' from them. 15-20 seconds saved their lives. Another 100 feet or so and the plane would have struck the ammo dump. The plane crashed into 400-500 barrels of RC-3 asphalt and burst into flames.[878]

The palleted load of sandbags skewed as it moved and jammed in the cargo hold. The drogue parachute which normally pulled pallets out of the low-flying aircraft, had deployed, and when the plane attempted to gain altitude it could not, and crashed.[879] The Beltmaster, who had no practical experience, only school training, panicked when the load jammed, and blew the fuse that exploded the parachute-deploying mechanism.[880]

Hundreds of people gathered.

The pilot escaped only slightly scratched. Another crewman suffered both legs broken, a broken clavicle, and skull damage. Five other men were alive inside, trapped, and pounding on the side of the plane attempting desperately to escape the flame-engulfed aircraft.[881] PFC James A. Pauley of A/1/26 immediately rushed to the blazing inferno and struggled with bare hands, fire axe, and steel rods attempting to make an opening in the aircraft to permit those trapped to escape, but to no avail. PFC Pauley had to be physically removed from the chaos when it became evident that no effort, however valiant, could succeed.[882] The crash crew arrived and began attempts to extinguish the holocaust, but it was useless. PFC Kenneth O. Meyers (A/1/26), PFC James A. Carter (A/1/26), LCPL Arthur A. Hall (A/1/26), LCPL Michael A. Woodard (A/3rd AT), CPL Pierre D. Carter (A/3rd AT), and CPL Lynn K. Chapin (A/3rd AT) all actively attempted to remove those trapped inside the burning aircraft.[883]

SP4 Charles L. Baney was killed instantaneously[884] from penetrating wounds to head and fractured skull. He also had penetrating wounds to his left elbow and both knees.[885]

Capt Lawrence Bjorke, known as "Corky," was born in Minneapolis, Minnesota and graduated from Mounds View High School in June, 1957. He attended the University of Minnesota from 1957-1960, pursuing engineering, and then entered the USAF and graduated from pilot training at Laughlin AFB, Del Rio, Texas, in February, 1967. He was married and had a daughter.[886]

Sgt Charles Baney, a soldier attached to the 109th Quartermaster Company at Cam Ranh Bay, Vietnam, was flying in the aircraft as an inspector to ensure proper

rigging.[887] The U.S. Army 109th Air Delivery had a detachment of 50 in DaNang which rigged the airdrops at Khe Sanh.[888] Born in Warsaw, Indiana, he graduated from Warsaw Community High School, attended the Methodist Church there, and entered the United States Army 7 June 1965. He completed Army Infantry Basic, Army Airborne School, and Parachute Packing, Maintenance and Air Delivery School.[889]

30 OCTOBER 1967

BENNETT, Capt James Harrell, Jr. 20thTASS

Capt Bennett died of wounds this date. At 1400H, 21 September, there was a sudden cloud of black smoke over the airstrip as the engines of an O1-E USAF spotter plane from the 20th TASS TIGERHOUND crashed. LCPL Paul Manley was at his machinegun bunker when he heard the engines stop. He turned and with fixed horror saw the plane coming directly towards his bunker on a crash course. The wingtip missed Manley by only a few scant feet.

The aircraft had lost power on take-off, lost altitude, and its wingtip caught a pile of crushed rock and tipped over. The observer in the back seat immediately freed himself and escaped. The pilot, however, was trapped inside, pinned down by a piece of twisted metal. LCPL Manley, together with four very brave Seabees of CBMU-301 Det B, feverishly worked to free the pilot despite the flames and managed to drag the pilot to safety.

Dr. Demaagd, the 1/26 Battalion Surgeon, was on the ambulance along with several corpsmen. A naked man with skin peeled off like a thin cellophane and charred legs, black and swelling, fully conscious, was crying, "O the pain! Doc, knock me out! I can't stand the pain! O shit! The plane just stopped! Doc, give me some oxygen! I can't breathe! O now it's beginning to hurt bad!" His face was all brown, skin charred. His hands were bloodied with skin scraped off and just hanging at various places. A tracheotomy was performed at C Med; he became very agitated. He was evacuated to DaNang with good prognosis.[890]

[During a visit to the construction site of the new Lang Vei Special Forces Camp (XD786456) being built by MCB-11, the Commanding Officer of A-101, Captain Frank Willoughby at the old Lang Vei camp site (XD795360) stated that they received 142,000 tons of supplies by airdrop in 2 ½ days on the smallest DZ in proportion to the amount dropped, in Viet Nam. It set an Air Force record. He remarked that the new camp is being built so that it would take at least a regiment of NVA soldiers to overrun it. Sloping, long fields of fire had been cleared, and in the new camp, only Americans will be in the inner perimeter with indigenous in an outer ring, to prevent a repetition of what happened on 4 May when the camp was overrun from within.[891]

[On 01 March 1967, the nickname SHINING BRASS was replaced by PRAIRIE FIRE to designate SOG operations into eastern Laos.[892] *In March, 1967, COMUSMACV proposed organization of a guerrilla force using hill tribes of the Annamite mountains. The basic mission was stated: "The basic purpose of PRAIRIE FIRE operations is to conduct special operations to counter enemy infiltration through Laos and into South Vietnam."*[893]

Major Fred Patton arrived at Khe Sanh village in late February, 1967, and located in a building (referred to as the "Howard Johnson's" by those who were in Khe Sanh village), directly across from the Huong Hoa District Headquarters. Working solo, he departed before Thanksgiving after bringing up half an A-team led by MSGT Charles "Skip" Minnicks.[894] *FOB-3 began to form, training Bru tribespeople. Major Patton, while evaluating the Bru as loyal and uncannily adept in patrolling, nevertheless probably would not make good soldiers, being a "joyful and passive" people.*[895] *The Wycliffe Bible Translator missionaries in Khe Sanh village recalled Maj Patton who allegedly was working on a "history project," but, as Mr. John Miller noted, "Just how many people do you need to write a history?" The American force then gathered a dozen Bru to work with them, then 20, then 40, and eventually located at the Old French Fort. They temporarily ruined the local economy, paying an extravagant rent of 20,000 to 24,000 P [Piasters, the local Vietnamese money] per month! The Bru became very disturbed; it wasn't "right." When John Miller informed the Maj Patton that this was gross in-*

flation, he was told this was what they were required to pay. Some Bru received more pay than their village chiefs, their salaries ranging from 8,000 to 18,000 P per month. In addition, some Bru received "hazardous" pay for going out on patrols, and could not understand why some should be paid more for doing that.[896] *Nevertheless, the program was started, and FOB-3 operated from an old French fortified area to the east of Khe Sanh village.*

Detail JULIETT, NMCB [Naval Mobile Construction Battalion] TEN arrived at Khe Sanh on 11 October 1967 to construct FOB #3.[897] *The Detail built eight 16 x 32-foot huts, 9 heads, a 72 x 20-ft. dispensary, and four massive 32 x 36-foot underground bunkers.*[898]

FOB-3, however, while incorporating the "Special Projects" effort to develop the guerrilla force in Laos, had as its principle objective, the western anchor of the Electronic Barrier (known as the "McNamara Line" or "Dyemarker" or "Project 792"): "The reason that FOB-3 was established was primarily not strategic reconnaissance in a third country; it was to put McNamara's Wall in; it was our charter to support the construction of that electronic barrier."[899]]

[*Operation ARDMORE terminated at 2369H, 31 October 1967; Operation SCOTLAND commenced with the same mission.*[900] *The TAOR was defined: From DMZ south along GL 85 to GL48, east to GL 90, south to GL 43, east along GL to GL 95, south on GL 95 to Da Krong River, southeast along Da Krong River to YD004302 then south to Laotian border at YD004234. Boundary then follows Laotian border on the south and west to the DMZ and east along DMZ to point of origin. The area encompassed approximately 403 square miles.*[901]]

01 NOVEMBER 1967

HAWKINS, SGT Don Albert	**FOB-1**
WOODS, SFC David Alexander	**FOB-1**

The SOG team was inserted into Laos from the Khe Sanh launch site. While on their patrol, the team discovered and reported a gray land line communications wire, and were instructed to place one of their wire tap devices [Surveillance System 4-114A Wire Tap Kit] on it.[902] **Since the area was saturated with NVA and the SOG team determined it unwise to remain in the area, they cut the wire. The NVA had teams that followed their land lines, located the SOG team, and a fierce firefight ensued. They were on a high ridge between SOG Targets GOLF-6 and GOLF-8, about 19 kilometers from Khe Sanh at 160 radial.**[903]

SFC Woods was the ONE-ZERO [Team Leader], getting ready to rotate home.[904] **Sgt Don Hawkins arrived in Vietnam 17 September**[905] **and went to the ONE-ZERO School in Kham Duc with Pat Johnston before reporting to FOB-1 at Phu Bai. He was killed on his 23rd birthday, probably unaware that his wife was pregnant 8 weeks with a daughter (Dawn). It was his first SOG patrol and WOODS was breaking him in as a replacement.**[906]

Philip Montaldo, the only American survivor, recalls that Woods had given him money to buy an ocelot in DaNang to eradicate the rats. Unbeknown to Montaldo, the ocelot was a "pussy cat," that had even been tattooed. Woods had packed all his gear getting ready to rotate from Vietnam.[907]

"There were three dead bodies at Graves Registration on Thursday, 02 November: two U.S. SOG soldiers (E-5 Don A. Hawkins and E-7 David Alexander Woods) and one Nung, unidentified. They all looked so very young! Blood covered their naked bodies. One had a large, gaping hole below his ear where he had been shot; the other was shot in his thigh and evidently died from loss of blood."[908]

[909] ARRS=Aerospace Rescue & Recovery Squadron

MSGT Baxter was the Team Leader and Sgt Kusick was the radio operator for a SOG patrol of Phu Bai-based FOB #1 which launched out of KSCB Launch Site[910] to operate at YC012973, an area with geologic formations that rose as spires and sheer cliffs from rather flat land, known as karst.[911] The patrol required emergency extraction and two USAF "Jolly Green Giant" helicopters (H3s) were launched from the DaNang AB at 1505H.[912]

Col Jack Roberts from the TIGERHOUND detachment at Khe Sanh (20th TASS), flying over the area advised the Jolly Greens to hold while three US Army UH-1E helicopters ran air-strikes. A C-130 flare ship provided illumination. At 1630H, "Jolly Green 29" rescued three indigenous members of the patrol before being driven off by hostile fire. The pilot radioed Captain Gerald Young, flying the second H-3 helicopter, that he had received major damage and was heading for KSCB airstrip; he advised Capt Young to abort due to the heavy ground fire.[913] Captain Young replied that he would make an attempt. Twenty minutes later, as he and his co-pilot, Captain Ralph Brower, hovered their helicopter, "Jolly Green 26" against the side of the cliff, additional members of the SOG patrol were lifted into the helicopter, including Baxter and Kusick. As the last soldier came aboard, Captain Young attempted to lift, but NVA machineguns raked the bird causing it to crash in a burst of flames as it hit ground. Flames burnt most of Captain Young's clothing, but he managed to kick out a window and escape. Over 20% of his body sustained second and third degree burns. Despite his pain, he searched for other survivors, but spotted approaching NVA and hid. As the NVA set up their machineguns to kill any who would come to rescue, Captain Young got on his radio and warned, "It's a trap. Forget about me. I'll signal you."[914]

MSGT Bruce Baxter's dead body slid out of the H-3 onto the soft, muddy dirt at the top of the hill, and down until his combat boots caught in a tree coming out of the side of the cliff;[915] he hung by one foot from a tree root, and it was impossible to get to him. The NVA moved three or four 37mm guns into the area as though to say, "Come on! We want you to come in here with all those aircraft you have and all these bad troops you have, and we'll teach you something."[916]

Captain Young crawled off, evading searching NVA soldiers, going in and out of shock for some 17 hours[917]. Convinced he had lost the pursing NVA and locating a suitable area, he radioed and was rescued.[918]

On 10 November, a Special Forces group searched the charred aircraft, finding three bodies, two with identification tags which identified them as members of the aircrew; the third had no tags, but was identified as Sgt Kusick by the long antenna from his AN/PRC-25. About 34 meters downhill from the wreckage, another body was located, identified as a member of the recon team. No trace was found of the third aircrew member.[919]

Capt Gerald Young's heroic action was recognized with the Medal of Honor.

The USAF H-3 made an emergency landing on the KSCB airstrip at 0110H from low fuel and being shot up while making the emergency recon extraction in the southern part of our TAOR.[920]

[On 09 November 1967, word was received on Hill 881-South that a Huey was arriving with several "CODE FOURS and CODE FIVES and CODE SIXES" or something like that; it was four Generals, including Lieutenant General Alfred D. Starbird, an elderly-looking gent who headed the DCPG [Defense Communications Planning Group], a CIA-project to develop electronic sensors to detect enemy presence. The others in the party included General Antonelly, Brigadier General Caruthers, and the Commanding General of III MAF. They all walked over to the north side of the hill along with Capt Bruce Greene, commanding B/1/26, and gazed towards 881-North, pointing out there several times.[921]

The next day was hazy, rainy, cold, damp, and horrible for those atop Hill 881-South on the 192nd Anniversary of Marine Corps Birthday. Somehow a chopper penetrated the fog and landed with Colonel Lownds, Lieutenant Colonel James B. Wilkinson, and the CO of 1/13, along with a cake, sodas and beer. 2/Lt Don Jacques was leading his platoon patrol through the mud at the time, having departed 881-South earlier. While LtCol Wilkinson mentioned that this hill had a deep significance for the NVA and that they would probably attempt to recapture it, the most chilling comments came from Colonel Lownds who broke the formation into an informal gathering around him and said: "We here at Khe Sanh are going to be remembered in our American

history books!" That statement, coupled with the recent arrival of the signal intelligence Marines on this hill and the visit by General Starbird yesterday, and the always ominous warnings from the S-2, was almost as scary as the Marines talking a month ago on this very hill of Jeanne Dixon's prophecy of "1200 dead at Khe Sanh!"[922]]

16 NOVEMBER 1967

CHILDRESS, CPL Lewis Clayton	**FLC**
JENKINS, CPL Earl Dale Jr.	**FLC**
MEGGS, LCPL Marion Lee	**B/3rd Recon**

Thursday, 16 November 1967, was a day of rain, as have been most of the recent days, necessitating air drops of supplies by the Air Delivery Platoon, 1st Service Regiment, Force Logistics Command (FLC). There were about 3-4 drops a day involving more than 100,000 pounds of supplies daily. The parachutes were prized by the troops at KSCB who gleefully retrieved them and covered their tents externally as well as internally. To retrieve the expensive chutes and replenish a diminishing stock of them, some of the Para Delivery Marines jumped with the supplies. The drops are made from 800 feet which means the 60-foot diameter, 200-pound parachute is only in the air a few seconds, restricting lateral movement away from the drop zone. The plane approaches the DZ and then noses up about 15 – 20 and an extraction parachute (known as a "drogue") pulls out the load.[923]

Marines on the KSCB almost always looked at the colorful spectacle as various colored parachutes descended, in rapt peace, frequently snapping photos. Today, it was a spectacle of horror when, at 1115H, two Marines were killed as they jumped with the air-drop and their parachutes failed to deploy fully.[924]

James Dawdy took a dump truck through the wire and, with a Navy Corpsman, was first on the scene. The Corpsman performed CPR on one, but it was hopeless. "I'll always remember how surreal it was to hold a man's hand as he died."[925] **"It was, for me, the time when I felt the most helpless, the greatest despair that I'd felt in my life. And at that time, it occurred to me that somewhere, there was a mother or father, sister or brother, good friend, girlfriend, that in just a few hours or a day would hear that their loved one had died."**[926] **Grady L. Branch (C/1/13) recalls: "That boy died in my arms, and I couldn't do a thing for him. He struggled so hard to live. I can still see the look on his face today... Me and doc both cried for the both of them."**[927] **2/Lt Nick Romanetz of C/1/26 had just arrived on KSCB when Co "C" rotated from Hill 861 to become the KSCB base security/reaction force. "I think we just walked through the drop zone, returning from a patrol. I watched the aircraft pass over the drop zone and saw both Marines fall to the earth. That incident was my first experience with death. I had only been in country and at KSCB for just over a month."**[928]

"The operation went like this. A 5-man recovery team parachuted in with the first air drop and remained on the ground 'to man the drop zone' and receive the daily—sometimes several a day—air drops. Aside from recovering the supplies, we salvaged all useable slings, containers, parachutes, etc., to be sent back to DaNang on space available on any aircraft that left Khe Sanh. When possible, I would send a man back to escort the gear. Back in DaNang the gear would be repaired and re-used. What made this operation noteworthy was that of using every parachute and every container that we rated by T/E and we were far from 100% T/E. The maximum weight capability of a reinforced Air Delivery Platoon is 110,000 pounds. In Khe Sanh, over less than a five week period, we air dropped just short of 1,000,000 pounds of supplies. This was made possible by using recovery teams.. retrieving the gear."[929]

What happened today was that the two who died were told to walk off the rear ramp as in marching, a step at a time, and allow for an interval of one full second between jumpers, but these two jumped off together at the same time and their parachutes became tangled. One of the Air Delivery Marines inside the aircraft had a

[929] Ojars Jurjans letter of 01 July 1989. The Air Delivery Plt had about 110-130 troops. "It was a total team effort." Jurjans was born in Latvia. "When the Russians in the early part of World War II started to invade the country, we took the last ship out to Germany, as refugees, and spent the whole World War II in Germany... I even stayed overnight in a concentration camp one time until they realized we were refugees and not a shipment of Jews, and then they allowed us to leave... I came to America at the age of 11, and joined the Marine Corps in 1956. [Conversation with Ojars Jurjans, 06 August 1994]. T/E=Table of Equipment (*i.e.*, the amount of gear permitted).

8mm camera and recorded the entire incident, exonerating the riggers and everyone else involved in the drop.[930]

The head of Cpl Earl Dale Jenkins, Jr., was split open, and the body of Cpl Lewis Clayton Childress was very badly bruised. It was the 8th jump for one of the Marines, the 29th for the other.[931]

From Chaplain Ray W. Stubbe's Diary entry for 16 November 1967:

"We departed about 1530H in a 6-by and almost arrived at the IP [Insertion Point] when our radioman received word that there had been a drowning. It was "M221." (Marines used the first letter of the man's last name plus the last three numbers of his service number so the enemy, if listening to radio traffic, would not know the identity of the casualty. Meggs' service number was 223221). Everyone in the truck immediately said, "It's Meggs," and then expressed an immediate barrage of hostile feelings against those in charge.

"We speeded back to the base where everyone was furious—the men at those in charge, Colonel Lownds that we now had two Marines drowned, both non-swimmers. Everyone had been especially close to "Muggs" as he was known—a short, fun-loving kid who could make everybody laugh at his antics. One evening he acted out a parody on military ceremony marching with his pipe in what he called "The Manual of the Pipe," presenting the pipe as one would a sword, and making exaggerated movements with his pipe. He liked the date pudding in the C-rations, something most others didn't, and I saved any date puddings I received, to give to him. Now, I would not be giving any to him. He only had a few days left to do in Viet Nam. He always brought freshness of life to those around him.

"Back at the tent that billeted his team, the men who had been with Meggs during his last moments were especially furious. They had been told to cross at a point where the Grunts recently had declared the Riviere de Rao Quan impassible, apparently just to prove that recon could do it if the Grunts could not. Furthermore, the rains had caused the river to become a swollen rapids. 'When we said the river was impossible to ford, the reply came back, "Nothing is impossible".' [apparently confusing "impassible" with "impossible"] The team said that yesterday the skies cleared about 1730H and they were in an immense area, about nine football fields large, and requested to be helo-evaced. BRAVO SIX ACTUAL radioed 'Negative.'

"The men were gathering Meggs' things. 'Better clean his boots so the next man that get 'em doesn't know he's wearing dead man's boots,' said one of the recon Marines. 'You mean you're that low on supplies?' I asked, astonished. 'Yes Sir!'"

Team 2B2, FROSTBURG, consisting of 6 Marines and one Navy Corpsman was assigned to patrol the area bounded by N-S lines 87 and 90 and E-W lines 45 and 47 during the period 10-16 November. This is the northwest section of the mountain ridge overlooking the combat base to the north.[932]

Another team, 4B2, SPEEDING HOME was assigned to patrol the area bounded by N-S lines 82 and 85 and E-W lines 48 and 50 during the period 12-16 November. This was the base of Hill 1371, the big mountain north of Hills 950 and 1015. In addition, they were to select a suitable fording point on the Rao Quan River and provide security for 2B2's crossing.

SPEEDING HOME was the first to reach the river, arriving 1300H on the 15th. A crossing was chosen that appeared passable from their vantage point, about 100 meters above a waterfall and 50 meters wide with three or four small islands.

FROSTBURG arrived at the river 1130H on the 16th, a little further downstream from SPEEDING HOME where the river did not appear to be moving too swiftly. LCPL Dennis L. Newton crossed the river at this point with safety line and six empty canteens on his belt for buoyancy, and experienced little difficulty in crossing. The river, in fact, was moving in a manner to push a swimmer to the other bank. While a double line was being rigged by LCPL Newton and HM3 Charles W. Miller, and the team was preparing to pull its gear across, they were suddenly ordered to proceed to SPEEDING HOME's position. The team radioed that they were at a good crossing and already had one man across. Furthermore, as Cpl David L. Jones noted, "It was impossible for us to move along the stream toward the other team due to a steep cliff that came out to the edge of the stream. We called back and said that due to the terrain it was practically impossible to move toward SPEEDING HOME. The reply was that nothing was impossible, that we were to comply with orders."[933]

FROSTBURG proceeded as ordered. When it arrived, they said the river was far too swift and deep from their vantage point. SPEEDING HOME couldn't see this from where they were. Both teams then moved about 75 feet upstream to what they thought was a large, slow-moving pool. Sgt Nicholas F. Micke entered the river about 8-12 feet and was immediately swept downstream about 25 feet, pulled under by the water, and only

Schlack, CJS:cc, 5800, 22 Nov 1967, to CO, 3rd ReconBn, 3rd MarDiv (rein), FMF, Subj: Informal investigation to inquire into the circumstances surrounding the missing in action report on Lance Corporal Marion L. Meggs, 2236221/0311/8651, U.S. Marine Corps, which occurred on 16 November 1967 while on patrol in the vicinity of Khe Sanh, Republic of Vietnam, and 23 enclosures thereto; 26Mar 161005Z/Nov 1967, Opn SCOTLAND SITREP #63.

[933] Encl (17) to Investigation cited, Statement of Sgt Nicholas F. Micke.

accidentally managed to grasp weeds and pull himself to an island, loosing his rifle in the process. PFC Richard C. Noyes attempted to heave a line across to him, but even after tying a full canteen on the end, was unable to get the rope to him. Sgt Micke managed to swim upstream a short way and the team was able to get a line to him. Eventually a double line was rigged and all the packs, belts, weapons, and men were hauled across to the island where Sgt. Micke was.[934]

Meggs, followed by LCPL Daniel F. Velardi, started across the rock ledge. When Sgt Micke saw them, he called them back, having been unaware they had started to cross the second half of the river, a rapids of large, smooth, slippery rocks. Meggs seemed intent on crossing. Velardi started back, but Meggs slipped and went backwards into the downstream. he resurfaced, appeared to be having trouble, so Micke yelled to him to throw off his pack. As he attempted to do this, he was again pulled down, swept down the rapids, caught a rock, slipped off, resurfaced still attempting to remove his pack, and was then again swept under.[935]

PFC Noyes, a former life guard before entering the Marine Corps, athletic (having played football and participated in gymnastics for four years in high school) immediately jumped in to rescue Meggs.[936] "I swam towards the pack and then saw Meggs about ten feet to my right." Noyes attempted to swim to Meggs, but was caught in the current which kept pushing him further away. "No matter how hard I tried the current kept pushing me down. Soon I became exhausted and went under again." Noyes was pulled back in, barely making it back alive. Sgt Micke later wrote that PFC Noyes acted with complete disregard for his own safety, "..knowing well that he too could be swept under by the strong undertow. He was pulled under twice but both times miraculously fought his way to the surface."

The Marines of FROSTBURG eventually were extracted, one at a time. The Marines of SPEEDING HOME, all suffering painful "immersion foot" walked back to the combat base, arriving 1900H.

Sgt William F. Blum led a 7-man recon team to the place where Meggs drowned, XD843437, at 1130H on 17 November. He, together with Sgt Hargraves, combed the entire area, crossing the river 24 times at various places, but could not locate Meggs. The body was found on Monday, 20 November by Cpl Robert E. Skinner near XD842438 at approximately 1030H. The river, at this point, was approximately 45 yards from bank to bank and full of numerous rock islands, some large, some small, some long and thin, some of which were covered with grass from two to three feet tall. The river was calm to still where the body was found. The depth of the river was 10-15 feet. The body was laying on side facing the south side of the bank in approximately 5 ½ feet to six feet of water.[937]

A memorial service was conducted at 1800H. The gunny of the recon company, Mitchell J. Sutherland, (the "Rock") had taken some parachute to cover a desk as an altar. Col Lownds, LtCol Rann (Regimental XO), Majors Harper L. Bohr, Jr. (Regimental S-2) and Beall were present along with so many men from the recon company that one remarked, "I haven't seen so many of B Company together at one time."[938]

Interestingly, Meggs and Tallent (KIA 20 Aug 1967) had been the best of friends.[939] Meggs used to sing the song, "Miles and Miles and Miles and Miles," and was within five days of his flight date. "Every time that song 'Miles and Miles' comes on, it brings it all back [to me]."[940]

[*The approaching Khe Sanh siege battle approaches along with the darkness and misery of the monsoon weather. Plan "X" was issued in October 1967.[945] *At the end of October, 1967, B5 [the NVA tactical area of northern Quang Tri Province] and the High Command's forces prepared to enter the battlefield by road construction, organizing reserve depots and development of roads capable of conveying motor transport.*[946] *Artillery preparations for the battlefield began on the 20th of October 1967.*[947]

On 15 November 1967, the lead elements of the Front Rear Services [i.e., headquarters for the Front, the transportation, road building, medical, etc.] reached Commo Liaison Station 53.[948] *On 19 November 1967, directives arrived from the Politburo together with orders from the Joint High Command regarding the General Offensive and Uprising ["Tet Offensive"] throughout the south and the historic mission of the Tri-Thien Hue Battlefield in this new phase.*[949]

"On 6 December 1967, in accordance with the order of the Central Military Party Committee, the [B5-Highway 9] Party Committee and Campaign Command Headquarters for Highway 9 and Khe Sanh were established under the command of Major General and Deputy Chief of Staff [of the High Command] Tran Quy Hai, with Comrade Le Quang Dao, the Deputy Director of the General Political Department as Campaign Political Officer. The forces operating in the Highway 9 area all came under the command of the Highway 9—Khe Sanh Campaign Headquarters[950] *[B5-T8, located in Laos at Sap Lit, XD6266, a little west of the western edge of the DMZ].*[951] *From the 25th to the 30th of December 1967, the lead elements of the 325th Infantry Division entered the battlefield.*[952] *On 28 December 1967, the Campaign Party Committee met for the first time to discuss and to ratify the campaign order. The Khe Sanh area is to be the principle area; the eastern Quang Tri Province area is an important area.*[953]

Concerning what <u>we</u> knew and what we did: A small group of Marines who analyzed North Vietnamese signal intercepts concluded by November, 1967, that Khe Sanh would be attacked. At the time, the Commanding General of 3rd Marine Division, General Westmoreland's J-2 (LtGen Philip Davidson), the Central Intelligence Agency, the Defense Intelligence Agency, and the National Security Agency, all had concluded that the impending North Vietnamese battle would focus on Camp Carroll. On Thanksgiving Day, 1967, an intercepted message indicated the 29th Regiment "was down by the river and have linked up with the 304th Division." Major Alfred M. Gray, Jr.'s Marines of the Radio Company of III MAF analyzed the 1967 Hill Battles in terms of patterns of radio intercepts and concluded that the attack would be against Khe Sanh.[954] *"General Westmoreland sent everybody, regardless of rank, and from any Service, [who had studied this matter] to Phu Bai. They argued all day long. About ten minutes to five on the 27th [of November, 1967] this little group of Marines won the argument. Colonel Houghton, G-2 of III Marine Amphibious Force, went back to DaNang, saw [Lieutenant] General Cushman at about ten o'clock in the evening, and that's when he made the decision to reinforce Khe Sanh with four battalions."*[955] *However, caution in reinforcement of Khe Sanh needed to be observed lest the NVA observe that we knew of their intentions. Thus, the sudden, abrupt arrival of 3/26, with no advance warning for KSCB to provide increased mess facilities, tents and bunkering materials, etc., and the rather late, but still in*

[954] National Security Agency msg 140615Z/Dec67 [source of message not declassified], SECRET SAVIN, Part 1 of a 2 part message: "In retrospect, indicators of the alignment of forces within DMZ area/Khe Sanh area was apparent. However, unit identification was not revealed until SIGINT could be collated with collateral material which became available during and after the Khe Sanh battle. Patterns noted prior to April/May Khe Sanh [1967] offensive.. form basis for analysis of present and future intelligence indicators concerning this area." The message giving Part II: The first indications of one of the divisions involved at Khe Sanh was in late October, 1967, by the loss in communications of one of its battalions on 30 Oct 1967 and two terminals of regimental echelon on 31 October and 10 November. On 12 November a communications watch facility was first observed, suspected of serving the Division. The Division was deploying in radio silence [one of the NVA's tactics prior to an attack] and there was a split in Division headquarters. Aerial Radio Direction Finding (ARDF) located 8 separate radio terminals just to the west of Khe Sanh.

time, arrival of 2/26 on 17 January, reinforced Khe Sanh, but not in a way to disclose our awareness of the NVA intentions and still served the function of drawing-in the NVA forces to attack a lucrative target so that, in fact, we could fix them in place and annihilate large numbers through B-52 strikes and hold large numbers of NVA in place that otherwise might have needed to be fought in urban areas.

General Gray states, "we knew all about Tet except for the hour.. we knew the whole plan," and that Tet destroyed the VC infrastructure in the South: "It was all over. It broke their back. There was no more leadership."[956] In response to the criticism of those who regard Tet as an intelligence failure on our part, General Gray quips, "Everyone who should have known knew it was coming; it was no surprise at all."[957]]

22 DECEMBER 1967

STICKEL, PFC Gary Stephen B/3rd Recon
SUNIGA, LCPL Michael Edward K/3/26

On 13 December 1967, Major General Tompkins (CG, 3rd MarDiv) received a call on the secure voice phone from Lieutenant General Cushman (CG, III MAF) who expressed concern over NVA buildup at Khe Sanh. General Cushman said he had better intelligence than General Tompkins and wanted more troops at Khe Sanh.[958] So, on the evening of Wednesday, 13 December 1967, LtCol Rann, the 26th Marines Executive Officer asked the 1/13 XO if he could feed 250 more men that evening, that 3/26 was arriving tonight—a whole battalion—on forty minutes' notice. Of course, there were no prepared positions for 3/26 to occupy as CH-53 after CH-53 arrived with more and more men.[959]

No place to go, that is, other than to Hill 918 (XD726444), some 5100 meters west of Hill 881-South. At 0700H, 21 December 1967, 3/26 commended a battalion (minus one line co.) search and destroy mission to Hill 918 (XD726445). The battalion was heli-lifted to Hill 881S with arriving units immediately dispersed to avoid being a lucrative target.

Hill 918 had, for many months, been a symbol of NVA luring in the area, a stronghold against which we had insufficient strength to investigate. As early as 14 July 1967, when two Marines temporarily waiting at the DaNang Air Base for transportation back to the recon unit at Khe Sanh stated they were eager to return to Khe Sanh so they could be part of a planned operation to assault Hill 918,[960] probing of the hill by recon teams always disclosed NVA presence—trails, bivouac sites, discarded equipment, etc.

On 27 June 1967, a B/1/26(-) patrol scoured Hill 778 (XD745411) on the eastern slope of Hill 918 and destroyed 26 bunkers with demolitions and noted 10 others destroyed by recent air strikes.[961] On 29 July, the AO spotted extensive enemy activity in the Hill 918 (XD725444) to Hill 862 (XD716447) area, locating 2 large craters used as a storage area. The AO received heavy small arms fire from XD718468 and heavy .50 cal. fire from other locations.[962] Fixed wing air strikes by JERSEY DAY 182 resulted in 5 large secondary explosions and 20 enemy soldiers KBA.[963]

A letter from a Marine from Bravo Company, 3rd Recon Bn, the recon unit at Khe Sanh, dated 01 December 1967, reflects the apprehension:

"I think all hell is going to break loose around Khe Sanh. There has been a big buildup in an area west of Hill 881S where the Marines had that big battle last spring. I think there will be an operation to take Hill 918 and this will be even bloodier than 881, 881N, and 861. We took close to 1000 casualties then and now because of the weather jets won't be able to fly. It will be the individual grunt who has to take that hill and I am glad I am in recon because as soon as the grunts move in our job is done. We found the gooks on 918 and now it is the infantry's job to take it... I was on top of it once and saw the fortifications the gooks have on it. We were there for 3 minutes and then all hell broke loose and we had to fight our way off. Like I said, it will be costly."[964]

As the Marines of K/3/26 were eating their C-ration breakfast, folding ponchos and poncho liners (for those lucky to have one!) and packing their haversacks and repacking the C-ration cans back into their black boot sox, an abrupt explosion at 0630H shattered an otherwise sunny, beautiful morning.[965]

PFC Daniel G. Allen, a S-2 scout sitting next to Captain Jaspers (CO, K/3/26) recalls: "All of a sudden there was a heck of an explosion on the other side of the little knoll. What happened—this guy [Suniga] had been putting down his own booby-traps with grenades, and he put it [the grenade] back on his belt, and it blew up... We thought it was a mortar round. We didn't know—what in the world! Captain Jaspers went running back over

*

At 0905H, Lance Corporal Ronald E. Clark was leading the 7 Marines comprising Recon Team 3B3, SEVEN UP, near Hill 557 (XD763411). It was PFC Ray Milligan's first recon patrol as assistant patrol leader and it was PFC Gary Stickel's first recon patrol, having transferred from the Grunts. The Marines of SEVEN UP woke up the next morning and decided to remain where they were, as an ambush. They were informed, however, to pack up and move. They removed their claymores and were preparing to move from their harbor site when they received automatic weapons fire and semi-automatic fire from approximately 12 NVA in camouflaged utilities and bush covers. The radioman, Cpl Edward C. Pooley, was making "a call of mother nature" within eyesight of the others. "And then all of a sudden a company or so of them walked right up on us. Stickel was right next to me [and was seriously wounded]. I was standing up; the other guys were sitting down, and Pooley ran back across our firing line, was hit in the chest and had his tit shot off. They came around the back and just opened fire on us. We called in artillery on top of ourselves, stayed back, threw some grenades, and then made our way up the mountain. The rounds came in so low and close that shrapnel was flying over us. We then called in more. We were told that Stickel would be medevaced but to keep moving once he was out. Then we told headquarters that we had a second WIA. We were informed to move to a hilltop for extraction. Stickel was able to run up the mountain under his own power. We grabbed his gear, but he was able to run."[967]

SEVEN UP returned fire and moved to a HLZ at XD768414, receiving and returning fire as they ran. SEVEN UP was extracted at 0950H.[968]

PFC Stickel was hit in his liver and died later that morning.[969]

30 December 1967

JONES, PFC Terry Agusta B/3rd Recon
TINGLEY, LCPL Thomas James B/3rd Recon

The account of this contact began three days earlier with another recon patrol in the same area, three miles directly west of Hill 689, as recon team 1B2, CLEMSON SONG, observed some 40 or more NVA moving from XD748408 to XD741405 at 1130H on 27 December 1967. The NVA wore green camouflaged utilities and were equipped with AK47s, heavy packs, and had three rockets per man tied to their packs.[970]

The vegetation was so thick, the team opted to follow a trail. Following a trail was not usual or prudent procedure if one wished to remain undetected. The terrain beside the trail was so dense, however, that if they used it, anyone using the trail would hear them hack through the jungle. So they used the trail, the lesser of the two evils, that they could move more quietly and furtively along the trail, and figuring that if they had to, they could scamper off the trail when necessary. CLEMSON SONG paused at a point where the trail split into a "Y" and then rejoined, forming a little island of extremely dense green brush. The recon Marines decided to go into this, and paused to eat chow. After eating, some pulled out mirrors to check their face camouflage and applied more where required. They finished that task. Everyone stood. The point moved three or four feet—and froze. He reached down and began to unfasten the straps on his demo pouch where he carried grenades. Then he brought his rifle to his shoulder, flicked the selector on automatic, and was quietly looking down the trail.[971] At this point, everyone in CLEMSON SONG realized that whatever it was, it was big and dangerous. Ernie Husted, the radioman for CLEMSON SONG, peered through the foliage at the NVA: "They were no longer muzzle flashes in a tree line or shadows glimpsed at night. They were young men. The gear they carried was of a different design but it served the same purpose as our own. They were soldiers, but they were also people."[972] The NVA column bifurcated at the "Y" as CLEMSON SONG was surrounded, but the NVA patrol, only 15 feet away, had not detected the presence of the Marines. One of the NVA pulled a cigarette; perhaps he could catch an undetected smoke. Pungent smells, however, are easily detected, and the cigarette was promptly yanked out of his mouth. The soldier appeared ashamed to Husted, but as the column proceeded, a man behind pushed his hat over his eyes and everyone was laughing. Husted could never again regard the NVA as mere "enemy;" they were, indeed, people.

Radio communications to this point had been sporadic at best. The PRC-25 broadcasted "line of sight" and some of the hills blocked transmissions. After the NVA rocket patrol had passed, CLEMSON SONG backed up, Husted attached his big whip antenna, and the patrol called the COC to relate all the details. The response from the base: they were to follow the NVA! The

Marines of CLEMSON SONG could not believe what they heard, being so vastly outnumbered and if they moved in most any direction, they'd loose radio communications with the base. "There's no way you can tail somebody for any period of time without them spotting you. It's just unwise." The Recon CO asked the team to "ROGER" the order. But Husted was more creative: "I looked over to the team leader and he shook his head, and I shook my head that I understood. I had found out—purely by accident one day (because I wasn't a school-trained radio operator)—a control plug on the top right corner of the radio that you put a jeep plug into when it's on a jeep for external power so you don't run your batteries down. If this plug is loose or out, it cuts off the power supply. So I started calling back to the base asking for clarification on the message, and the whole time I was loosening and playing with the plug. You could hear by the crackling that the radio was going out. The other radio was normally kept on a secondary frequency. It seemed to have the same trouble, only it had it quicker because we didn't have anyone on the net talking to us on it. We just pulled that plug right out. And then we backed up and stayed for quite a few hours."[973] After reconnecting the radio, comm. was instantly restored and the CO wanted to know if they had followed the NVA force. The team replied, "Negative. We didn't understand the message—radio problems." The CO wanted the old battery brought back so he could inspect it, but Husted responded that it had been cut open and the individual cells destroyed and buried, a standard operating procedure. There was no doubt in Husted's mind that had they followed orders, they would all have been killed and no further information would have been gained.

The CO was unsatisfied; another recon patrol would be inserted into the same area to investigate the sightings. Eight more Marines would be sent to where over 40—Husted says "over 100"—NVA were spotted. That job fell to team BARKWOOD.

On 30 December 1967 at 1045H, Recon team 1B3, BARKWOOD, at XD761409[974] (4 Km directly west of Hill 689) had reached a fork in the trail where TINGLEY, the Point man for the patrol, looked back for directions. He was shot in the back of his head, instantly killing him. The next man, PFC JONES, was shot in his thigh and stomach.[975] The two, TINGLEY and JONES, were dragged by the other Marines in great haste.

Although TINGLEY was dead, under the confusion and anxiety of the moment, and reflecting an inherent care for others especially after loosing his friend a month before in the raging Rao Quan River (Meggs), Rick Noyes, in horror, saw Tingley's head being dragged in a river they had to cross. Concerned that the water would get into the bullet holes in his head, Noyes rushed and tenderly picked up Tingley's head.[976]

Gunships (SCARFACE, CYCLONE LEAD, and CYCLONE-2) arrived on station and the team was extracted at 1220H.[977]

CPL Lionel Guerra recalls PFC Jones: "He was always smiling and we called him 'Smiley'. He was my roommate in the tent, and I wanted to run Point on that particular patrol, but was told I couldn't, and I was disappointed, upset. I was the one that helped him [Jones] from the helicopter along with two others. I remember someone saying, 'Grab his head,' because it's dangling. I remember picking up his head with my two hands, and he was smiling. He got hit in the groin area and a couple of places, and he died."[978]

When the bodies arrived at Graves Registration on KSCB, the running stretcher-bearers dropped Tingley's corpse and he went face-down in a culvert. The Corpsmen attempted to stop Jones' bleeding, but he was already dead. Hit in the groin area, his scrotum was the size of a football.[979]

[*A CIA report dated 10 January 1968, summarized the situation at Khe Sanh: "In the past several weeks there have been a number of indications that the enemy is building up its forces in the Laotian panhandle west of the Demilitarized Zone. The target primarily threatened by these forces appeared to be the allied base at Khe Sanh.. Enemy reconnaissance and probing activity near Khe Sanh has increased markedly in the last few weeks."*[980] *"Their primary objective in attacking Khe Sanh would be to draw US reinforcements into the area, tie them down to static defensive positions, and to inflict maximum casualties on US forces over a period of time."*[981] *"The Communists have long regarded Khe Sanh, located near the infiltration corridors in Laos, as a thorn in their side."*[982] *The CIA argued that the size of the enemy force, upwards of 22,000 men, that was surrounding Khe Sanh was much greater than necessary to take Khe Sanh and Lang Vei, and therefore the strategy seemed to be the same as that of the 1967 strategy: "lure US units away from populated areas, disperse them, and inflict a maximum number of casualties in the process."*[983] *The CIA summarized: "the enemy's objectives in any sustained offensive in the Khe Sanh area would be, at the mini-*

mum, to force the abandonment of the Khe Sanh base and the Lang Vei CIDG camp and to inflict heavy casualties. At the maximum, the Communists would hope to draw substantial US reinforcements from other areas in South Vietnam and tie them down in the Khe Sanh area."[984]

The CIA analysts did not count on the tenacity and resolve of the Marines, nor the confidence of General Westmoreland's estimation that they could hold their ground, and thus General Westmoreland did not dispatch ground reinforcements to Khe Sanh until April, 1968, well after most of the NVA forces engaged in the encirclement of KSCB had departed, so that the strategy of luring in Americans to annihilate them was rendered nugatory.

MACV saw through the NVA intentions and stated: Khe Sanh "..was another move to draw-off and destroy a US unit and seize western Quang Tri Province for use as a major base from which to support his next campaign toward Quang Tri City. Evidence suggested that Khe Sanh was staged as another spectacular battle for propaganda as well as military purpose,"[985] *and added: "Khe Sanh.. guarded the approaches from the west to Quang Tri City and Dong Ha and with them the two northern provinces of Quang Tri and Thua Thien; loss of Khe Sanh would provide the enemy with a base from which to strike out during the bad weather and seize these areas, outflank the forces defending along the DMZ and bombard the installations with artillery, rocket, and mortar fire from both the west and the north; and the seizure of the two northern provinces was a long-term aim of Hanoi, one to be exploited at any future negotiating table where battlefield possession would be a telling point of strength."*[986]]

[*On 02 Jan 1968, a Co L (DUNBAR COUNTY LIMA) LP (XD842421), set approximately 400 meters from where the western (or RED) sector of the KSCB perimeter tied in with the BLUE sector (manned by C/1/26, BLACKBUD CHARLIE), observed 6 persons dressed in what appeared to be USMC uniforms. After checking to ensure that BLACKBUD CHARLIE had no men in the area, a squad dispatched to investigate received small arms fire. Fire was returned and the area swept.*[987] *At 030630H, a patrol from L/3/26 checked out the area of contact and found 5 NVA KIA.*[988] *Along with photographs, plaster face masks were made of the NVA for identification.*[989] *"Three of the officers were found to be a NVA regimental commander, an operations officer, and a communications officer. That the North Vietnamese would commit such key men to an extremely dangerous personal reconnaissance indicated that Khe Sanh was a priority."*[990] *The regimental S-2, Maj Harper L. Bohr, Jr., noted "..one of the KIA was Chinese. He was just too big and too non-Vietnamese-looking, to be a Vietnamese. My interpreter was also certain it was a non-Vietnamese."*[991] *The battalion S-3, Major Matt Caulfield recalls: "One of them was very tall. He was about six-foot, well-manicured, very good haircut, clean clothes. The weapons they had indicated that they were officers."*[992] *Ens Martin Kux, the OinC of the Seabee detachment repairing the runway, wrote in his diary: "One of the dead was over 6' tall—probably Chinese. Quite a bit of a stir! They were probably a recon element attempting to find access to the base... Something big will happen within the next 10 days, while the moon is dark."*[993]]

05 JANUARY 1968

BRIGGS, SFC Ernest Frank	**176 Av Co**
GALLAGHER, SFC John Theodore	**FOB-3**
HAMILTON, CWO Dennis Clark	**176 Av Co**
SCHULTZ, WO1 Sheldon Duane	**176 Av Co**
WILLIAMSON, SFC James D	**176 Av Co**

WO-1 Hamilton, Aircraft Commander, XO-1 Schultz, Pilot, SP-4 Williamson, Crewman, and SSG Gallagher, passenger, were aboard a UH-1D aircraft (#66-1172) on a mission to infiltrate an indigenous recon patrol into Laos. It was FOB-3's first mission.

"On the 5th of January we were supposed to go in for a wire-tap [mission] We got briefed and got loaded on the helicopters and were going off. We were riding in American Hueys and as we were on our way in, at least 15 minutes or maybe even half an hour out of the landing zone of the area we were going to infiltrate, all of a sudden there was a lot of conversation [in the aircraft]. I couldn't figure exactly what was going on. People were talking and shouting at each other—big eyed. Then the Crew Chief came in and said, 'Mission's aborted; we're going back.' And I said, 'Why?' And he said, 'They shot down the other chopper.' We were at 3,000, 3,500 feet above ground level, and they apparently shot him with a 37mm or 57mm anti-aircraft gun, and the whole helicopter went down. It was spinning down. [The NVA] shot the tail rotor off. It hit the ground and it exploded.

[993] Ens Martin J. Kux, Diary entry for 04 Jan 1968.

There was no fire on the way down, and nobody that I talked to saw any bodies fall out, although spinning end around end there should have been one or two bodies come out of the thing. It hit the ground and just exploded in a fire ball."[994]

The pilot had been told not to descend below 4,000—feet, but for whatever reason dropped altitude and was within anti-aircraft range, and was shot out of the sky.[995] SFC Donald E. Ross, flying as Forward Air Controller saw the troop helicopters at 2,000 feet take 37mm anti-aircraft fire from an area 400 meters.[996] At that height AGL[997], Hamilton's aircraft came under heavy 37mm AA fire, immediately entered a vertical nosedive, plummeted and crashed at XD701021. Upon impact the aircraft burst into flames that were 10 to 20 feet high. No radio transmissions were heard during the helicopter's descent, nor were radio or beeper signals heard after impact. Four attempts to enter the area of the downed helicopter failed due to intense ground fire. The pilot who saw the wreckage stated that the crashed helicopter was a mass of burned metal and that there was no part of the aircraft that could be recognized. No signs of life were seen in the crash area..[998]

Harlan Van Winckle's Hatchett Force DENVER at FOB-3 was alerted to attempt the rescue mission, even rigging up a 55-gallon drum of CS powder [tear gas] and dropped it up-wind of the crash site without success. The enemy fire was just too heavy.[999] After the weather improved, the successful insertion of a ground team was made east of the crash site to avoid enemy fire. After searching for two days, the team was extracted, having found nothing.[1000]

A MIA Board was convened nine days into the Siege battle, on 30 January, concluding "..there is no doubt that all persons aboard the helicopter were killed," and recommended that Staff Sergeant John T. Gallagher be declared as killed in action.[1001]

SFC Ernest F. Briggs, CWO Dennis C. Hamilton, WO1 Sheldon D. Schultz, and SFC James D. Williamson, were also aboard the helicopter that crashed.

09 JANUARY 1968

GREEN, LtCol Norman Morgan	497 TFS, 8 TFW[1002]
IRSCH, 1/Lt Wayne Charles	497 TFS, 8 TFW

On 09 January 1968, LtCol Green, Aircraft Commander, and 1/Lt Irsch, Systems Operator, were aboard the number 2 aircraft (#66-8729), in a flight of two F4Ds which departed Ubon Airfield, Thailand, at 0945H on a night armed recon mission, call sign CROW. During the mission, the lead aircraft began to receive enemy ground fire while attacking trucks along a road, and number 2 aircraft was cleared to attack the active gun positions. As lead pulled up, he noticed a large explosion and fire about one mile from his target in the vicinity of XD234537, approximately 8 Km northwest of Tchepone.[1003]

[*Beginning on 11 January, patrols from FOB-3 scoured Co Roc Mountain. (See entry for 21 February)*]

[*On 12 January, Sub Unit #5, 3rd Marine Division (which included within its ranks CAC OSCAR, communicators, those who manned the post office, PX, and Division photo and ISO) was disbanded.*[1004] It had been established on 01 February 1967.[1005]]

12 JANUARY 1968

COHRON, SFC James Derwin ST INDIANA

Strike Team INDIANA was inserted at 111255H and the first 24 hours were without incident. At 0930, 12 January, SFC Cohron suspected trackers and placed two mines on the back trail of the team. The team proceeded in a zig-zag course, stopping irregularly for listening and observing. At about 1300H came under attack from a hostile force in the vicinity of XD929208. Cohron was the second man from the rear of the team formation. The decision was made to break contact and pull back to a predetermined Rally Point [using the "scatter tactics" commonly used by Morgan's Rangers], and by hand and arm signal, the team dispersed. Sgt Cohron did not arrive at the Rally Point. None of the patrol members recalled seeing him after the initial engagement.[1006]

1/Lt Gamble C. Dick infiltrated Hatchet Force SANTE FE into the general area where ST INDIANA was ambushed. The HF with SFC Robinson, the ONE ZERO of INDIANA as a guide, reached the actual ambush site approximately one hour later. The location was on the side of a steep hill with fairly thick vegetation. Visibility was limited to a maximum of 15 meters because of the terrain and vegetation. The exact impact point of one of the grenades that was thrown at ST INDIANA was located with a small splattering of blood. There were no recognizable trails, blood or otherwise, leading from the area. The team later located Sgt Cohron's chow which was identified by an empty Winston pack in it (Sgt Cohron was the only member of the team who smoked this brand).[1007]

According to a PAVN officer who helped interrogate a captured American that possibly was Sgt Cohron, two platoons from the 3rd Company, 7th Bn, Dong Ngai Regiment, conducted the attack on the reconnaissance team. An interpreter from a regiment of the PAVN 304th Infantry Division also assisted in the interrogation. Although he did not report the ultimate fate of the American prisoner, it was customary for PAVN units in this area, such as the Dong Ngai Regiment and elements of the 304th Division, to deliver American prisoners to appropriate representatives of Binh Tram 41 for transfer to a prisoner of war camp. If the prisoner died, it was customary to bury him in a marked grave and send a full report along with the prisoner's identification media to central authorities.[1008]

14 JANUARY 1968

HEALY, CPL Richard John	**B/3rd Recon**
YEARY, 2/Lt Randall Douglas	**B/3rd Recon**

PFC James E. Schemelia (2nd Squad, I-2) on Hill 881-South was standing in a "warming tent" on Hill 881-South heating some tea he had received from home. Marines from a recon team were also there, preparing to walk off into their RZ [Recon Zone]. It was very early ("O dark thirty" as we called the time before dawn); the crowds of other Marines on the hill had not yet arrived to heat their C-ration breakfast. "I didn't realize it at the time, but when I spoke to those men, I would be the last to speak to them."[1009]

The Patrol Leader of DOCKLEAF, 2/Lt Randall Yeary, was a young officer many in the recon company at Khe Sanh had come to know and respect. He, along with 2/Lt Waddell and PFC David Doehrman, all of Co B, 3rd Recon Bn, had attended Recon School together in Camp Pendleton, California, at 5th Recon Bn, Camp Horno. The staff there had requested volunteers for recon; only one volunteered. The requirement was 31, so the staff then asked for all First Class Swimmers to sign a list, which they did. Then, at the top of the sheet, the staff added the words, "and volunteer for recon." Thus, the requirement of 31 "volunteers" was met![1010]

PFC Doehrman was scheduled to be on this patrol, but he had "obtained" two cases of steaks from a locked freezer at the KSCB messhall a few days earlier. The recon Marines gorged themselves and then flounced on their racks and slept in sheer, contented delight. David Doehrman's hand dangled into the metal tray containing the steaks, and he was bit by a rat. On medical hold to receive rabies shots, he was unable to accompany DOCKLEAF.[1011]

Lt Randall Yeary had been out on three or four patrols previously; in every one of them, the team was shot out. The Marines joked with him "because he had never made one day out in the field. They told him, 'Why don't you go with us, this [patrol] is going to be a cakewalk.'"[1012]

The patrol was composed of members of various teams, and Lt Yeary was along to observe.

The remainder of DOCKLEAF, recon team 2B1, flew to Hill 881-South and were to become the ones who triggered-off the famous 1968 siege battle at Khe Sanh. The patrol "..indicated for the first time that the North Vietnamese Army was in strength in close proximity to the combat base, and that he was preparing.. fortified positions."[1013]

On its first day, the patrol moved from Hill 881-South and advanced about half-way to Hill 881-North with LCPL Richard C. Noyes running point. The second man in the patrol, LCPL Ulis Murray, Jr., a black Marine who had served previously in infantry, spotted footprints. Noyes regarded these as coming from a prior Marine patrol, but Murray insisted, "I smell Gooks." "Rich Healy came to me and said, 'Murray says he smells Gooks,' and I thought, 'Baloney! You can't smell them.'"[1014] Noyes spotted an ambush, and Lt Yeary stopped the patrol; all waited, silently, cautiously, as they set into a 360 defense and called back to Hill 881-South to inform them of their sighting. After a few moments, the patrol was ordered to return to Hill 881-South. During the return, PFC Edward L. Mertens saw one of the

[1014] Conversation with Richard C. Noyes, 20 November 1989.

enemy soldiers prepare to open up on the recon team. Mertens opened up on him, and the team returned to 881-South. That night, one of the patrol members, LCPL Gregory Popowitz, was bit by a rat, and the next day the patrol departed with seven Marines.[1015]

They had been out three days, and on the afternoon of the 4th, Sunday the 14th of January, they were returning to 881-South to complete their mission.

> "We didn't see anything, any signs of the Gooks, and it was fairly quiet. We hadn't heard anything, didn't see any signs or anything. About eleven o'clock we were moving up the north slope of Hill 881-North, heading back to 881-South for our extraction. I faced the top of the hill. I was the point man."[1016]

Being in a fairly open area, Noyes was about 50-75 feet ahead of Healy to avoid being too close to each other, "and I simply stumbled onto the NVA, and at that time I was the only one being shot at. I recall laying on the ground, changing my rifle magazine, when a NVA stood up in front of me, up the hill, and tossed a hand grenade at me, but I couldn't shoot him as I was changing magazines.. Rich at this point could not see where I was, as I had gotten pretty far up ahead of him, but I could hear him talking and saying I* was hit. I then crawled back to Rich and told him I was OK and what I had seen, and that's when I made the mistake of telling Rich, 'Let's go get em,' which was exactly the wrong thing to do. I truly believe if I had told Rich I think we should get the H out of there, he would have agreed, but then I'll never know. I went back up the hill to where I had been and within no time we started receiving heavy fire."[1017]

> "And the Gooks opened up from our left. I guess they were ten, maybe fifteen, meters away. They opened up with small arms fire and everybody hit the deck. And we returned fire. And they called up and asked me if I was hit. They thought I had been hit for some reason, but I wasn't hit and nobody else was hit at that time. So we pulled back down, about 15, 20 meters, and got into a 360.
>
> "Everyone was in a 360. We couldn't see the Gooks. I don't know if they were dug-in or what, but we couldn't see them. And Corporal [Richard J.] Healy crawled out of our 360 and went looking for them to see if he could see them."[1018]

It was now 141417H, January 1968; DOCKLEAF was at XD777455.[1019] As Cpl Healy (Assistant Patrol Leader) moved forward to an exposed position attempting to fix the NVA's position, he was forced to return to the 360 by incoming grenades.[1020]

> "We were doing real good, holding off the Gooks and everything. Then the Gooks opened up from our rear. It was the north side, the side we'd come up, from our rear. And they were giving us quite a bit of small arms fire, and [Second] Lieutenant [Randall] Yeary was standing up on his knees returning fire and he got hit in the left leg, pretty close to the groin, and Healy ran down to him and was giving him first aid and took over as Patrol Leader, and he was giving commands to the radioman.. he had pinpointed some positions and we were shooting at them and all of a sudden the Gooks hit us with a RPG, and it hit right on top of Corporal Healy and Lieutenant Yeary, and there were three more men that were wounded from that. The RPG round landed right on top of them, just tore them all to hell. When it hit, everything was red, just like somebody popped a red smoke in the middle of us—blood all over and pieces of meat all over you and everything. It was really bad. And everyone was stunned from the shock and, like I said, three more men were hurt, and one of them was hurt real bad, [PFC Edward L.] Mertens."[1021]

The RPG instantly killed both Cpl Healy and Lt Yeary, and wounded all but one of the team (PFCs Kenneth R. Martin, Edward L. Mertens, Andrew T. Miceli, Santos R. Morales, and LCPLs Ulis Murray, Jr. and Richard C. Noyes).[1022]

The recon team was immediately fragmented: two men crawled off to the right, the opposite direction from where the RPG had been fired; two more crawled into a bomb crater; two more held up about 10 meters away. All were dazed; all were in shock. LCPL Noyes was attempting to assemble everybody together, but was unable to locate Murray and Martin. Steve Morales said they had lost communications. Noyes began to move to Yeary and Healy to grab their radio.

> "I turned around; there wasn't anybody there. And then, about half-way there I heard Murray and Martin yell that they had a radio—from the bomb crater, they yelled. I wasn't sure whether Rich and the Lieutenant were dead. I guess I was just stunned or something, like everybody else."[1023]
>
> "I took a count and saw the Lieutenant and Rich weren't there. I asked them, 'Does anybody know the story on them?' They said, 'Yeah, they were dead; they had been all blown away.' So we sat in a bomb crater in a 360, and a grenade hit right up on top.

[1022] NAVPERS 1650/6 in BSM file on Cpl Richard J. Healy.
[1023] Comments of Noyes on Tape 2621, cited.

The Gooks were moving in on us again. I changed the magazines. And Murray said, 'We gotta get out of here; they're coming at us again.' And Steve Morales said, 'Look, we can't leave those bodies back there.' I told him, 'Don't worry; we aren't leaving anybody.'

"Finally everybody was gone, except for Steve, and the Gooks moved in. And I didn't know what to do. I didn't know whether to get those two bodies or move with the other guys. But I went after the four guys. I don't know if I did right or not, but that's what I did. And Murray was leading them away. He was in shock... We were in bad shape. When the round hit, guys left their rifles and everything, cause they were so messed up. We only had three rifles between us... They were moving north again, and I caught up with them, carrying Mertens for awhile. And I yelled to Murray to stop. He wouldn't. He didn't hear me. I went up to him. I grabbed him. I said, 'Hey, you carry Mertens.' He carried Mertens, and I took them to a little place about 5000 meters northwest of 881-South. And we stayed there.. in some kind of 360. On the way, Morales picked up rear security, and I was taking point. We got there... I called up choppers and had choppers on the way. And the guys were in pretty bad shape. Steve [Morales] and I were putting first aid on them—on Mertens; he had blood all over his head and his neck was covered real bad. I didn't think he was going to make it, for sure. I wasn't really sure, but it turned out he did."[1024]

Three UH-1E CADAVER gunships[1025] from VMO-6 came on station led by CADAVER 4-23 and, although receiving heavy automatic weapons fire and despite lowering clouds and deteriorating weather, provided DOCKLEAF with sufficient suppressive fire to enable them to break contact. Although the devastating barrage of suppressive fire from these three CADAVERs upon the NVA force which was about to overrun DOCKLEAF enabled the team to break contact and move down the hill into defilade, their hasty movement required them to leave behind their two dead. After about 20 minutes, two CH-46 helicopters (FROSTY GOLD 1-1 and 1-2) arrived and retrieved the surviving members of the recon team.[1026] Location of the team was difficult since the team didn't have any smoke other than one carried by Noyes, which, when thrown, didn't ignite. The team was finally spotted after they spotted Morales and Noyes waving an air panel.

A platoon from I/3/26 on Hill 881-South had been dispatched to assist DOCKLEAF and the team returned to KSCB.

"We got back to the heliport.. on the strip, and it seemed like everybody in the company were there. Got off the chopper and I guess it looked like something out of a horror strip: everybody was all covered with blood and our clothes all ripped and everything, pretty bad, I guess. And I remember Captain Reynolds asked, 'What happened?' because we had lost radio communications.. He asked me where Rich and the Lieutenant were, and I told him that they were both dead."[1027]

Capt DuPont (CADAVER 4-23), upon learning that two of the Marines had not been recovered, returned to the scene; LCPL Noyes went along. About 1715H, the Hueys spotted the bodies of 2/Lt Yeary and Cpl Healy and directed the platoon from I/3/26 to the area. The infantry patrol located them at 1730H. "It was right on the top of the hill, and as soon as we got over the crest of the hill we could see the bodies... I remember one body was split in two. I think he took a direct hit from a RPG. I can remember he had blue eyes and I could see on one hand he had a wedding ring."[1028] As CADAVER 4-23 made continuous low passes and low level gun runs suppressing enemy fire, CH-46s entered the hot zone and retrieved the reaction force and the two bodies.

David Doehrman rushed to the helicopter. He and another man carried the stretcher containing the remains of Lt Yeary. Everything from his abdomen on down was missing; his intestines were dangling; grenades on his cartridge belt were half-exploded. Suddenly Doehrman was jolted by the reality of the insecurity of life. He now seriously faced his own possible death.[1029] He had aged decades in minutes.

"When we came in for debriefing, everybody was looking at me like: What the hell happened out there? Like it was my fault or something. And I kept thinking: Goddamn man, I did everything I could to get the bodies and to get these guys out; it was either stay there and we all die, or try to save these guys. I can remember Bob Skinner looking at me. He came up to me and said, 'Where's Rich Healy?' And I said, 'He's dead.' And he just totally lost it. That affected a lot of people. It really affected me... If we'd of listened to Murray, none of that would have happened."[1030]

SSGT Mitchell J. Sutherland (of B/3rd Recon) was sent by Capt P.F. Reynolds to identify the bodies of Lt Yeary and Cpl Healy and recover their weapons and

equipment. "Upon arriving at Graves [Registration], I found Lt. Yeary's body laying out back, behind a GP tent. He lay on his back with all his 782 gear on with legs and arms spread. Cpl Healy lay next to him but on his side, his eyes wide open and they cut through me like a knife. For some strange reason pictures of dead Marines laying in the volcanic ash of Iwo Jima flashed through my mind... They were so real. When I tried to remove Lt. Yeary's pack, his arm came off and lay there in the orange soil all white and the arm was still in the sleeve of Lt. Yeary's utility jacket. I began to talk to Lt. Yeary although I knew he was dead. I told him what I was doing. His K-Bar was still in its sheath and I drew his K-Bar and cut the other pack strap. When I did this the pack came open and spilled out C Rations and several M79 rounds, 3 of which had been damaged by the RPG that killed Lt. Yeary and Cpl Healy. The two corpsmen watching me saw the damaged M79 rounds and decided to watch from a safer distance. I recovered all the equipment from the bodies and took the gear back to my hard back and lay it in the floor. That evening I went back to my hard back to find the whole place smelled of blood and flesh. That is when I discovered that both M16s were drenched in dried blood.. I knew then that there was something I could still do for Lt. Yeary and Cpl Healy and that was to turn those two weapons in the next morning to the company armory in spit shine condition. I cleaned those M16s boot camp clean and when I lay down to sleep that evening I certainly didn't know that the North Vietnamese Army was marching on Khe Sanh and I would see many more dead Marines in the days ahead."[1031]

Cpl Richard Healy had thought of becoming a minister upon leaving the Marine Corps.[1032] Rich Healy was Rich Noyes' best friend in Khe Sanh: "Our cots were right next to one another. We were both from Ohio, both played 4 years of high school football, and when I went to see his family when getting back home, his mom told me how Rich often wrote home about me."[1033]

Lt Yeary had been in Vietnam 6 weeks when he was killed. He had graduated in 1961 from Ketron High School in his native Surgoinsville, Tennessee, where he avidly played football and lifted weights, and from East Tennessee State University in 1965. He had his black belt in Karate.[1034] Randal Yeary's father had always wanted to farm, bought one and worked it for about 7 or 8 years until he became financially well enough to move to Kingsport from their home in Natural Tunnel, Virginia, and build a house on it. Randall, just completing high school, went on to college and never moved with the rest of the family to Kingsport, Tennessee.[1035] He planned to be a teacher, but first wanted to serve his country and joined the Marine Corps. Around home, he was very much of a joker, mischievous.[1036] He was married (to Louise Carty) and had a three-year old daughter, Laura Lee.[1037] His comrades from The Basic School in Quantico remember him as having "a natural ability as a woodsman and found the Land Navigation Course at Quantico a breeze."[1038]

Lt Yeary "..was such a well-respecte3d individual. The only way I could describe him was, 'a gentleman.' He never had a bad word for anybody. You could take him at his word, and all of the guys respected him. When I carried him off the helicopter, I couldn't comprehend that this is what happened when you went into battle. Always before, it was: people would shoot at you and it would be all over, and everybody would go home. I couldn't really comprehend what it was about until I carried him."[1039]

In their haste, DOCKLEAF had left behind a PRC-25 radio.[1040] Co I was later dispatched on the 19th, and thus began the siege of Khe Sanh battle.

On Friday, 19 January 1968, "Little Rich"[1041] said he had a large recon patch he wanted to give to Chaplain Ray W. Stubbe. "When I walked over to the recon area later on to visit him he was very drunk and was vomiting at the entrance to his hootch. When I entered he recognized me and made some remark, '..unless I get them that got the young Lieutenant Yeary and Healy—,' and then he plopped into his sleeping bag and slept. This is what had been on his mind—and probably forever would be. The horrible and violent death of friends tended to drive us all crazy."[1042]

17 JANUARY 1968

BEACH, CAPT Sam Festis, Jr. 20th TASS
CHANEY, SFC Donald Lee FOB-3

Shortly after noon (at 1205H), an Air Force O-2A aircraft crashed southeast of the Khe Sanh runway (at XD853418). Although the Marines of B/1/26 attempted to rescue the pilot and passenger, they were unsuccessful due to the intense fire that ensued.[1044] Killed in the crash was Capt Sam F. Beach[1045] and the passenger, SFC Donald Lee Chaney.

The Marine Corps Spot Report indicates it was "not due to enemy fire,"[1046] while the official USAF history attributes "His death..to hostile action."[1047] Hobson's account indicates "his aircraft was hit by small arms fire and crashed."[1048]

Gene Patterson, a radio operator with 15th Aerial Port Squadron at KSCB recalls that "..he got shot down on take-off. He just barely got off the ground. He called me and said, 'I'm airborne, Pat.' And that was it. Next thing I know everybody was running around yelling. I was down in the bunker. Everybody was telling me he just got shot down after he took off, by ground fire."[1049]

19 JANUARY 1968

NEWTON, PFC Leonard Lee I/3/26

On 17 January, Capt William H. Dabney (CO, I/3/26) on Hill 881-South dispatched 2/Lt Thomas Brindley's Third Platoon to Hill 881-North. An 8-man reconnaissance patrol accompanied I-3 and was to drop off clandestinely enroute. There was no contact. Then, on 18 January, Capt Dabney dispatched 2/Lt Michael Thomas' I-2 towards Hill 881-North to patrol an area about a kilometer south of I-3. Again, there was no contact or sighting of enemy. About 1400H on the 18th, the recon team that had been inserted on the 17th reported contact with NVA on the north slope of Hill 881-North; they had wounded and needed assistance.[1050] I-2 was ordered to return expeditiously, which it did as I-3 "shucked its packs, flak jackets, and all except weapons, ammo and water, and literally double-timed to 881-North in three squad columns.. In less than two hours, about 1600, the platoon found the recon team, set up an LZ to evac the wounded, and returned to Hill 881-South, arriving about 1900 with the six uninjured recon team members in tow. There was no contact. Upon debriefing the recon team, we discovered that during the contact they had abandoned a radio and some shackle sheets. We so reported to battalion, and in due course, we were directed to recover them the next day. I directed Lieutenant Rick Fromme to take his 1st Platoon and do so. They jumped off about dawn on the 19th, reinforced with a section of M-60 [machineguns], a section of 60mm mortars and the 81 FO."[1051]

At approximately 1100H as I-1 maneuvered to about 500 meters short of the crest of hill 881-North (on the south slope), it made point-to-point contact with an estimated NVA platoon which was maneuvering south along the same finger.[1052] In the ensuing fire fight the Marines of I-1 sustained several casualties and were pinned-down. PFC Leonard L. Newton, carrying a M-60 machinegun continuously stood up in the tall elephant grass to fix the location of the NVA and deliver bursts with his M-60 to enable the Marines to pull into covered positions. After a few bursts, his gun jammed; he repaired it twice and put it back into action and suppressed the fire from at least three automatic weapons as he fired from his shoulder.[1053] The fifth or sixth time he stood up,

he took one round through the head, dying immediately.[1054] The NVA had shot him through the eye.[1055]

"I remember him. He was a new guy. He was a pretty good-sized fellow. I remember him having the M-60 because I was a machine-gunner before I became a scout, and I remember them go out. Of course they all had that look. They had that false look of bravado. I was really worried about him. Sure enough, he got killed."[1056]

The radio and the shackle sheets were not recovered.[1057]

20 JANUARY 1968

BRINDLEY, 2/Lt Thomas Drew	I/3/26
BRYAN, CPL Charles William	B/3rd Recon
COLLINS, PFC James Alfred	I/3/26
THOMAS, 2/Lt Michael Howard	I/3/26

The recon contact of 14 January and the platoon contact of 19 January now made apparent, through aggressive patrolling, the threatening NVA presence close to Hill 881-South. The shroud of jungle and terrain could no longer hide the extent of the NVA presence at Khe Sanh.

On 19 January 1968, a 7-man team, "BARKWOOD," arrived on Hill 881-South under the leadership of Cpl Charles W. Bryan with the mission of patrolling the west flank of Hill 881-North and retrieving the shackle sheets.[1058] In order to get into their RZ [recon zone] unobserved, they would walk off 881-South as the rear security for a company-size patrol by INDIA Company, 3/26 and slip off unnoticed while enroute.[1059] Capt William H. Dabney (CO, I/3/26) and Cpl Bryan discussed the mission at length the evening of 19 January. Cpl Bryan was instructed by his CO that if Co I made contact, to return to Hill 881-South. BARKWOOD was not under the operational control of INDIA Company.

BARKWOOD consisted of CPL William Bryan, Patrol Leader; CPL Lionel Guerra, APL (Assistant Patrol Leader), LCPL Robert "P.J." Pagano, radioman; LCPL Thomas Hollis, PFC Paul Beddoe, PFC Ron Parr, riflemen, and another PFC on his first patrol.[1060] CPL Kevin Macaulay, who had been the recon radioman on top of Hill 950 in November, 1967, was due for this patrol, but since there were "too many Corporals," PJ Pagano was assigned instead.[1061] CPL Lionel Guerra was suddenly struck with apprehension about the patrol when he realized he didn't have a pocket New Testament. "I always carried it with me in my left pocket. My uncle had given it to me after he had carried it in the Korean War when he was a soldier. By the time I realized I didn't have it, it was too late; we were moving out. I never saw it again, and years later I would have to apologize to my uncle for losing his New Testament."[1062]

The weather on Saturday, 20 January, was fair with good visibility during the day (although not so visible when Co I departed 881-South at 0600H!)[1063] The temperature was 75° as Capt Dabney led Co I towards Hill 881-North to investigate the enemy force encountered by the recon team on the 14th and the platoon patrol of the 19th. Two platoons and company command group of M/3/26 led by Capt John J. Gilece, Jr., had been lifted to Hill 881-South the afternoon of 19 January to man the lines while Co I patrolled. (The other platoon of Co. M was in reserve on KSCB).[1064]

Co I divided into two elements moving about 500 meters apart: I-3 (led by 2/Lt Thomas D. Brindley) together with the CP group and recon team BARKWOOD (1B3) moved on the east (right, looking north from 881-S); I-1 (led by 2/Lt Harry F. Fromme, Jr.) and I-2 (led by 2/Lt Michael H. Thomas together with the CO, moved on the west (left, looking north from 881-S).[1065] Hill 881-N had two protruding fingers forming its southern slope, a perfect avenue to approach to its summit, two axis mutually supporting.

The columns proceeded abreast through dense fog until 0930H when they reached a point about 500 meters south of 881-North. At this point, I-3 was 100 meters south of Objective #2, a steep nose of 881N (XD775455), and INDIA-6 with I-1 leading, about 100 meters south of Objective #5, a similar nose about 400 meters to the west. The Marines moved circumspectly. Contact was imminent. I-1 had received heavy NVA fire from Objective #5 while patrolling there the previous day.[1066] Lt. Harry Fromme led I-1 on Objective #5 with two squads up (3rd and 2nd) with the Lieutenant and Cpl George T. Barczay between them. They were only 20-30 meters from the

[1066] Statement of Capt William H. Dabney, 21 January 1968, in Navy Cross file of 2/Lt Thomas D. Brindley.

crest when they came under heavy RPG and automatic weapons fire including .50 caliber. The volley of fire cut through the Marine ranks like a giant scythe and within 30 seconds, 20 men were down and out of action, most with severe leg wounds. The NVA were well dug in and camouflaged. "We never did see them."[1067]

"We were in very tall elephant grass, taller than we were, and that's where we first made contact with the enemy. All of a sudden it seemed like the fog lifted and they started firing at us, but in that thick elephant grass, and our team being in the rear of the column, we couldn't tell where it was coming from. Bullets were whizzing by through the grass. The company point man, Jim Collins, was the first man killed. He was supposed to leave for home the next day. He had walked directly into the NVA position surprising them as well as him... There was a lot of confusion and one guy was on the ground in a state of hysteria. I grabbed him by his back and encouraged him to get up, at which time he did and went on about his job."[1068]

The recon radioman, "PJ" Pagano, recalls the scene prior to the firefight: "We were walking in elephant grass that was about five to six feet tall. Being in the rear of the grunts, I could see just their helmets above the grass, and I remember thinking how funny that looked, like a bunch of turtles floating along in a sea of grass. All of a sudden the sound of a heavy machine gun broke the silence. Seven shots. I remember it like it was two seconds ago, three shots, a pause, and then four. All those turtles slowly submerged and it was just grass again. I was so enthralled with that visual that I suddenly thought to myself, 'get down, stupid.'"[1069]

Capt Dabney ordered them to pull back, enabling friendly artillery and mortars to fire on Objective #5. Lt. Fromme directed their withdrawal as each squad supported the other with supporting fire while they carried their wounded down the hill.

Chester W. Wilson, Jr., suddenly found himself alone: "I was with Lt Fromme and my squad was advancing up the hill on line when we got hit by fire from the crest of the hill.. I was busy loading and firing, when I hear some movement behind me and I thought to myself, Charlie got behind us. What had happened was both of the guys to either side of me had been hit, and when the word was passed to pull back, I didn't get it. Here I am all alone one the side of the hill fighting a one-man war! The noise to my rear was [LCPL P.] Provenzano coming back to tell me they had all pulled back. He asked me if I was trying to win the battle all alone, so I hauled my rear out of there, back to the others. After we got back that afternoon I thought about that and it scared the beans out of me. It still does."[1070]

Pinned down on a slope, 2/Lt Fromme called up his M-60 machinegun crew to provide covering fire to enable withdrawal of the wounded and to continue the assault to the high ground. The M-60 crew suffered an immediate RPG hit wounding all but two members of the crew.[1071] Continuously changing positions to avoid being a target, Sgt. James L. Moore from the crew nevertheless was wounded his leg by a RPG. He shouted: "I'm hit in the leg, but I'm OK; I can keep shooting. Don't waste a Corpsman on me. Keep giving these Marines cover."[1072]

James E. Schemelia suddenly heard the peculiar sounds of rounds being fired at him as he dove for cover: "..you hear just like you were taking a leather belt and snapping it, and that's all you could hear, just hundreds of these snapping sounds over your head and a lot of screaming. Seconds later, most of First Platoon came crawling down the hill. I didn't see any of them come down walking. They were all crawling. Many of them were soaked in blood. There was a bomb crater near me, and the corpsman was pulling them into the bomb crater and trying to do the best to bandage them up and try to keep them calm."[1073]

"FROSTY GOLD," a CH-46 helicopter of HMM-262 piloted by 1/Lt R.R. Ropelewski (Co-pilot, Capt S.R. Stegich) was diverted from a re-supply mission to retrieve the wounded from I-1. The LZ (XD777438) was a slope: "The slope was so steep that we couldn't land. We had to back into the hill and hover above the ground."[1074] PFC James E. Schemelia ("little one" of 2nd Squad, I-2) put PVT Richard R. Darling's arm over his shoulder and walked him up the ramp of the helicopter. "No sooner did I get to the front of the helicopter when machinegun rounds came ripping through the walls of the helicopter severing the electrical wires and hitting one of the fuel lines and aviation fuel came pumping out of the line and burst into flames, splashed onto the crew chief and he ripped off his flak jacket and threw it out of the helicopter. At that time the helicopter was waving uncontrollably, trying to hold its position, but it couldn't. I realized we were headed down, down into the valley. I looked over to the Marine that I had taken into the helicopter and I said, 'Come on, we're getting out of here.' I picked him back up and it was like trying to climb back up a mountain because the helicopter was headed down into

the valley and it was hard trying to walk to the rear of the helicopter. The ramp was still down. We were about 30 feet from the side of the hill and I just pushed him out. By the time that I jumped, it was a lot further down the hill and when I jumped out I landed into some brush which broke my fall, and I climbed back up the hill about another 50 feet from where the Marine was, and I picked him up. I took him back and put him back in the bomb crater. There was nothing else that could be done."[1075]

The entire rear section of the CH-46 burst into flames so intense the crew chief and gunner leaped out of the bird.[1076] Lt Ropelewski succeeded in landing ET-35 (#152544) and both he and his co-pilot jumped to safety as the entire chopper became engulfed in flames. A UH-34D of HMM-262 successfully rescued the crew.[1077]

I-3, 2/Lt Thomas C. Brindley

At 0930H, the fog lifted as I-3 at XD773451 deployed and immediately came under moderate automatic fire and semi-automatic weapons fire from Objective #2 killing the point man and sustaining three serious casualties. Cpl Robert W. ("Skip") Unangst had noticed the Point Man, PFC James A. Collins, getting ready before they departed 881-South. "He was just a super Marine. He was on his second tour and this was his last day in the field. He said he wanted to be the Point because he felt the rest of us needed a good Point. He could have gotten out of it, because it was his last day."[1078] Collins had entered the NVA perimeter unaware and was stuck inside as the NVA fired. "He was shot in the back because he was inside the perimeter, and the man behind Collins shot the NVA who shot him, and then all hell broke loose. We started to pull back a little bit. There was a Sgt Powell. He came down and his jaw was shot off. I remember him trying to talk with his tongue against his pallet: 'Help me! Help me! Help me!' His jaw was hanging down. That was the first squad; there wasn't much left of them."[1079] Second squad went up as PFC John Barrett rushed right into the NVA perimeter while PFC Reece A. Critchfield, Jr., a machine-gunner (KIA the next day, 21 January) and others laid down a base of fire. Cpl Unangst tossed a grenade at a NVA: "it exploded and a chunk of arm and shoulder came out...Barrett got to Collins and he just said to him, 'Leave me alone. I'm dying.' Well, we pulled him back anyway. The Doc tried to save him, but couldn't.[1080]

Tall elephant grass kept Lt Brindley from determining a definite fix on the NVA positions and he joined his Second Squad and maneuvered this squad in order to extricate his lead squad and recover casualties while directing a heavy volume of M-60 and M-79 grenade launcher fire against the enemy.

Rather than returning to Hill 881-South, Cpl Bryan, the Patrol Leader of BARKWOOD, moved up to 1/Lt Richard M. Foley, Jr., the INDIA Co XO, requesting instructions. Lt Foley asked him if he could use his team to select and secure a LZ to the rear. Cpl Bryan immediately did this as I-3 extracted their casualties and pulled back to the LZ while supporting artillery fire rained on the NVA positions.

Lt Brindley's 3rd Squad only had four "effectives" and one of the M-60 machineguns had jammed and was inoperable. The order came for I-3 to resume its attack on Objective #2 so that I-1 and I-2 could seize Objective #5. Cpl Bryan, after consulting with his team and receiving permission from his headquarters, volunteered BARKWOOD to assist in the attack. Lt Brindley combined what remained of his 3rd Squad (4 men) with Cpl Bryan's team and made Cpl Bryan the Squad Leader. Lt Brindley yelled, "Squad Leaders up! He said, 'We're going to get on line. Fix bayonets! And I said, 'O shit!' So we got on line and started firing."[1081] "They told us to fix bayonets! And I said, 'These people are crazy!'"[1082] Using the supporting fires of artillery and mortars together with I-1's M-60 machineguns for target preparation, 2/Lt Brindley led his platoon in the attack using his 2nd Squad and BARKWOOD on line on the right flank with 1st Squad back as Lt Foley established a base of fire with the one M-60 and several walking wounded.

Although the fire support was excellent, the NVA were well fortified, entrenched, and reinforced with .50 caliber machineguns. The assault was about 75 meters up a 30 slope,[1083] and the entire line came under heavy fire from small arms and grenades immediately upon beginning the assault.

Capt Dabney, from his position with I-1, watched the movement and saw 2/Lt Brindley prominently in the lead, leading his platoon up and over the objective by sheer force of example. "It was right out of the pages of Chesty Puller. He went from flank to flank, knocking each one of his Marines on the back, and up he went."[1084]

BARKWOOD

Simultaneously, at 1435H, BARKWOOD proceeded around the right flank of the objective and successfully

halted the advance of the enemy who were in the process of enveloping that portion of the objective.

For the radioman of BARKWOOD, LCPL Robert E. Pagano, an intuitive sense of urgency to escape the craziness of battle preparations on the combat base motivated him to accompany this patrol:

"The funny thing about that patrol for me was that that wasn't my regular team. It was Bryan's team. He had just come to the team from infantry. He was a Corporal and a seasoned infantry Corporal, but he hadn't taken out a recon team before. And he was taking out this new team made up of people from here and there. They didn't have anybody seasoned on it. For some reason, I had this tremendously strange feeling that I had to get off the base. I'd just come in from patrol with [Cpl Julian] Kalama's team and was due for 2, 3, 4 days' rest, but I just couldn't abide it; I just had to get off the base. I'd never had that feeling before.

"So I pulled strings. I went to our platoon commander and asked if I could volunteer for this patrol that Bryan was taking out, and his radio operator could stay and cool his heels. So the Lieutenant said, 'If Bryan doesn't have any problem, I don't have any problem.' And Bryan welcomed it because he wanted somebody seasoned. That was my 15th patrol.[1085]

With CPL Lionel Guerra, the Assistant Patrol Leader on the extreme right and LCPL Robert E. Pagano, the radioman, on the left with Cpl Bryan, BARKWOOD soon began receiving fire, perhaps from nearby friendly squads which had become disoriented in the tall elephant grass. "It was just chaos. As we were going up I got hit from the left arm to the shoulder, and Pagano was hit. He was a few feet ahead of me and was yelling, 'My leg! My leg! My leg!' And I said, 'Just a moment.' I could see Charles Bryan behind me, to the left. At that time I could hear voices because to this day I still think that there was enemy and at the same time there was cross-fire. And I said [to Pagano], 'You got to call in to have them stop fire.'"[1086] Guerra's backpack was cut by the fire, "And my rifle—I didn't know where it was. And then I saw my hand, all distorted. Then I went up and I looked up and I saw my arm was twisted and I said, 'Oh, my God, I lost my arm!' Then I remember looking at my fingers to see if they moved, and they did move. And I remember saying, 'Come on, babies!' I rolled to my back because I was bleeding profusely because the bullet went through my humerus and went back through the scapula. Pagano was screaming, 'My leg! My leg! My leg!' I said, 'Hold on, I'll help you. I'll be right there.' I remember Bryan calling Pagano to call in Cease Fire! I turned around to get my tourniquet and I got hit by a grenade, like a slap. Just about that time Charles Bryan gets up to go to Pagano, and that's when he gets shot. He falls close to me, to the left, and I remember he looked up. He just went down. About this time a black Sergeant crawled up and asked how I was. I asked, 'How's Bryan?' 'He's dead.' And I asked, 'How about him (Pagano)?' He said, 'He's all right; we're going to get him, too. And I remember crawling down, and then there's another Marine next to me, and we're getting fire from the top, and we're being fired from the back. And so I'll always wonder in my heart: was it NVA? Because you know how that is—with the elephant grass, you couldn't see."[1087]

Pagano recalls: "Bryan died coming over to save me. I had been hit in the right leg and he came over and was actually attending to my wounds when he was shot by a fellow who was about six feet away from us, but we couldn't see him in the elephant grass. This fellow shot—the bullet went by my ear and got Bryan in the armpit. I went back on the radio and was talking and Bryan didn't move. I asked him if he was OK, and he looked upset and said, 'No—hit bad—going to die,' and then gave what sounded like a death rattle.... And when I was taken from the hill, we left him there. And when I met 'Twiggy' [LCPL Timothy J.] Dwyer years later he said, 'O, no, they had gotten to Bryan's body a few hours later, and he was blue, but he was still alive. They got him to the bottom of the hill, and then he died.'... When these infantry fellows volunteered to come up and get me—they located me by rifle shots—he asked me, (indicating Bryan's body), 'What about him?' And I said, 'He's dead.' And I felt like this tremendous scream—that's as close as I can come to describing it. I thought to myself, 'I guess it must just be the realization that Bryan's dead sinking into me.' It was a scream within me; it sounded like it was all around me, but I knew, of course, that nobody else heard it. And I was terribly afraid. We were still pinned down and the North Vietnamese hadn't gone away. And these guys crawled to where I was, grabbed me, and dragged me back down."[1088]

BARKWOOD had effectively eliminated any resistance from the flank they secured, including destruction of a NVA .50 caliber position. It was obvious from the manner in which BARKWOOD was deployed and from its fire discipline, that Cpl Bryan had led the assault with unusual professional skill. There was a cost: the enemy fire had been so intense that all but six men from the assaulting unit were killed or wounded. All but one man of BARKWOOD were killed or wounded. Cpl Bryan died a few hours later from his wounds.[1089]

Thomas D. Brindley

I-3 encountered heavy small arms fire from the reverse slope as it went over the top of the hill, and Capt Dabney saw 2/Lt Brindley running back and forth along the line, urging his Marines forward and directing their

fire, all the while exposed to fierce fire in his attempt to fix the origin of the hostile fire. The North Vietnamese position was overrun. But there were other enemy positions. About this time, Lt Brindley's radio operator informed Capt Dabney that the platoon was running out of ammunition and that all the "actuals" (the squad leaders and platoon sergeants) were hit. Capt Dabney saw Lt Brindley for a moment after that, and then was informed by the radio operator, 'There is nobody left in charge up here. What should I do?"[1090] 2/Lt Brindley was hit by a burst of automatic fire and tumbled forward on the reverse slope, mortally wounded.[1091] Lt Brindley screamed as he grabbed his shoulder and rolled away. His last words and thoughts were of his men: "Keep low, keep going, and stay on line."[1092]

Capt Dabney told the radioman to get down and hold what he had. He then directed I-5, 1/Lt Richard M. Foley, Jr., who was at that time on a hill 400 meters behind I-3 with I-3's base of fire, to advance and take over the platoon. Lt Foley later wrote: "I find it hard to say it all in words. I only know that Tom Brindley led an attack that was in the tradition of Iwo, Tarawa, and all the others. They never stopped until they took that hill."[1093]

2/Lt Michael H. Thomas

Along with 2/Lt Michael H. Thomas, commanding I-2, Capt. Dabney gathered 22 Marines from the element on the left and set out from his position 100 meters south of Objective #5 to reinforce I-3. The Marines dashed down the ridgeline to the south until they were protected from enemy fire, then darted 500 meters through open terrain to the other ridgeline and headed north, joining the remnants of I-3 from the rear. After having skillfully maneuvering his platoon to the rear of I-3, 2/Lt Thomas then began to lead I-2 up the hill where I-3 was pinned down by four .50 caliber machineguns and deadly accurate small arms fire.[1094] Lt Thomas, ignoring the enemy fire, linked up with the remnants of I-3 and immediately consolidated the position and organized a rescue party to evacuate the wounded. "We entered the tree line and all hell broke loose"[1095] as I-2 encountered heavy fire. Lt Thomas was constantly moving among his Marines, ordering them to get down on their bellies and keep low, attempting to determine the enemy's location.

As Lt Thomas led the assault, it was determined that eight Marines were missing. Lt Thomas organized and personally led a search party which rescued five Marines in separate locations under enemy fire. He located a sixth Marine and was carrying him back when he was painfully hit in the face by enemy fire. Lt Thomas refused medical attention and continued his rescue operation. A report was received that two wounded Marines were located forward of the objective and in an area under direct enemy observation and machinegun fire. By this time, Lt Thomas was physically exhausted, wounded, and appeared to faint. His radio operator shed his radio and said, "Sir, I'll go after the next one." Lt Thomas replied, "No, it's my job. I'm a Lieutenant." He began inching forward to the wounded Marine, and was again shot—in the head and back.[1096]

Other Marines observing Lt Thomas and inspired by his example rescued the wounded Marines and carried Lt Thomas to the Landing Zone.

LtCol Harry L. Alderman, who had flown to the top of Hill 881-South about 1400H along with some of his battalion staff, saw that Capt Dabney had cracked the center of the NVA defenses, and "I notified the regimental commander and said that if he wanted to get on top of 881-North and see what was up there, he would have to reinforce."[1097] The reinforcements would apply the *coup de grace*. The request was denied; INDIA Company was to withdraw. (A NVA Lieutenant, La Than Tonc, had surrendered at KSCB, providing the NVA's plan of attack, which was imminent). By 1800H, Co I had returned to Hill 881-South.[1098]

"A silence came over the hill and it lasted several days. It was very difficult to explain the mood. The men were very quiet, sort of in mourning for the buddies that didn't come back that day."[1099]

The dead were brought to KSCB. Captain Reynolds (CO, Co B, 3rd Recon Bn) was there when Cpl Bryan arrived.

"Reynolds [had taken] an immediate liking to Bryan because he was a good Marine. He was a good squad leader. He had a damn good record coming over from the grunts. And he was dead.. And I could see Reynolds was visibly affected."[1100] "Pagano, the radio operator who replaced me, was wounded badly and never returned to the company. My good friend, the little Mexican kid, Lionel Guerra, was wounded also and never came back to us. Weeks later when I was hit by shrapnel and thrown thirty feet by a rocket blast as I filled sandbags, I ripped the medical entry out of my service record book to avoid

the presentation of a Purple Heart. I hadn't suffered enough. I still hold those feelings today."[1101]

Bryan grew up in McKinney, Texas and graduated from high school in May, 1966, with no plans for the future. While in high school he gathered an extensive collection of comedy records and was learning to play the guitar.[1102] He frequently visited his good friend, Ronnie D. Foster, "..two blocks away, where we'd sit out in the back yard and sing songs by Hank Williams, the Kingston Trio, and the Hot Nuts 'Get em from your peanut man.' We loved to recite Redd Foxx jokes."[1103] He was active in Boy Scouts and, for two years, played center on his football team (number 53) which lost less than six games in five years. He also enjoyed the outdoors and was an avid fisher and hunter, skills which undoubtedly contributed to his subsequent life in the jungles of Vietnam. His parents were hard-working. His mother worked in the high school cafeteria and his father worked long hours in a local cotton mill. While in school, he and his friend, Ronnie D. Foster, read the book, *The Green* Berets by Robin Moore, along with *Guadalcanal* Diary and *Battle Cry*, and listened with rapt attention to a Marine Sergeant recruiter along with others from the senior high school class. "Bill Bryan was in. There was no doubt left in his mind. Marine Corps here we come."[1104] While on leave, in May of 1967, he returned home to marry Deidra Simpson. He was 18, she was 19, and within four months, she would become a widow.[1105]

PFC Daniel G. Allen recalls that "..everybody liked Lieutenant Thomas and everybody liked Lieutenant Brindley. They were two of the—you know how sometimes you have a rapport with some officers over others? or just natural leaders? He [Thomas] was the kind—he didn't have to say anything; you just got it done."[1106]

LCPL Thomas F. Peavey remembers Lieutenant Thomas as his Platoon Commander before Khe Sanh: "We were on an operation out of Camp Evans and I got malaria and I started throwing-up. He picked me up—with all my gear and his gear and my rifle and his rifle, and he carried me for about half an hour! I was throwing up. I was out of it, fever and everything. He was a strong man. That guy should of got the Medal of Honor. I really feel sorry that I wasn't there, because if I was there I might of kept him from getting killed."[1107]

On the patrol to Hill 918 in December, 1967, INDIA Company had the point, and Lt Brindley was the point platoon. While moving through the ridgeline to the south of Hill 881-South that ran into Laos, the point man hacked a bees nest with his machete. Both the Point and Lt Brindley were stung so badly that their faces swelled up and their eyes swelled shut and they needed to be medevaced. But, recalls Capt Dabney, "Brindley was a tough boy and he was back in three of four days."[1108]

Thomas Drew Brindley grew up in St. Paul, Minnesota and was a very good student and good athlete, playing football and hockey. While in high school, he pumped gas at his father's Brindley Oil Co. station. He received a hockey scholarship to play at Colorado College in Colorado Springs and played for three years. When he transferred to the University of Minnesota he was caught between quarters and was drafted. He chose to enlist in the Marine Corps, and following boot camp went to OCS and the Basic School. He left for Vietnam in October, 1967.[1109]

[The North Vietnamese Army launched the 1968 "siege" battle at Khe Sanh with two factors that negatively impinged on them. The first was an abrupt advancement of their "N-Day" [their parlance for the American "D-Day," the date in which a battle commences]. For example, in the Medical Section of their secret account of the battle: "One aspect of our operations had an impact on the military medical activities and that was that we [launched the offensive] in advance of the time [originally] decided upon. Day N was decided to occur in early February, 1968, after that it was changed to 20 January 1968. At this point the effort to conduct battlefield reconnaissance was still incomplete, the military medical detachments had just arrived [on the battlefield] and had to work quickly as they received wounded. Routes used to evacuate the wounded had still not been established. Because of the frantic activity the military and rear service conferences and the military medical conferences had still not been carried out."[1110] In the section providing analysis of support given to the Khe Sanh battle, it was noted that

support bases A2 and A3 "..arrived slowly including both the headquarters element and the depot resources. There were elements that after fire had commenced were still unable to begin to carry out their mission and therefore they were not able to provide appropriate support in a timely manner."[1111] *In the general history of the Khe Sanh battle, the North Vietnamese Army stated: "First, there was insufficient time to prepare the battlefield, and therefore many forces could not be employed, particularly many combat support forces, such as there being no road for the mechanized vehicles; there was no reserve ammunition, and for these reasons even if one had wanted to concentrate forces, it could not have been accomplished."*[1112] *Just why their N-Day was advanced from early February to 20 January while unknown and not discussed in their printed histories of Khe Sanh, certainly crippled their efforts.*

A second negative factor was the location of the controlling headquarters for the Khe Sanh campaign (B5-T8), located west of the western edge of the DMZ, in Laos (at Sar Lit, XD6266), "..a distance of approximately 30 kilometers from the campaign Command Headquarters to the headquarters of the 304th Division (to the south of Khe Sanh) and approximately 45 kilometers to the command headquarters of the 320th Division (to the north of the district seat of Cam Lo). Much time was expended when employing runners or delegated representatives from the Front down to the division level. The command headquarters equipment was rudimentary and compromised. Therefore at the outset the campaign headquarters was attacked by B-52s and had to move; the divisions in the forward area lost contact with the Campaign Command Headquarters for a period of time and the lack of command had an impact on the campaign areas."[1113] *On 30 January 1968, "..the largest B-52 strike of the war to that date was flown against a command and control center in eastern Laos, 36 sorties in the morning and 9 at night. There were 85 secondary explosions and numerous cave-ins."*[1114] *Presidential advisor, Dr. Walt Rostow wrote a memo to President Johnson (concerning this strike), "Herewith Westy reports an extremely successful use of intelligence to identify and attack with B-52s the new, recently established senior headquarters west of the DMZ."*[1115] *General Westmoreland cautioned, "Any public statement about successful B-52 attacks on the major enemy headquarters would certainly compromise the source of the information, enemy corrective action could diminish our intelligence effort country-wide. No valid cover story can be developed. We have no ground reconnaissance resources which could be admitted to be in that area. While photographic interpretation could confirm a possible logistics complex, it would not support identification of a major headquarters."*[1116]]

[Hill 861 – 0330H]

"..in the mid afternoon [of the 20th] we spotted 5 or 6 gooks on a hill 500 yards to the west of 861. I worked up a fast fire mission, and our Captain asked for a platoon to check for results. I went too. I was so at ease I even wore my Converse Black Low sneakers! We had just reached the top of the ridge, when the word on the radio came to us to get back now! Our Lt asked for permission to stay another ten minutes as we were just getting to the impact area from the 105s. Our CO came on the air personally and said, 'Get the @uck back now, 6 out!' It was only months later did I learn that the moment out there was about the time that the NVA trooper gave up at the base and had said that 861 was due to get hit that night. I shudder to think of what lay on the other side of that ridgeline, because it was

only 8 or 9 hours later that we got attacked—and from that very location."[1118]

During the late afternoon of 20 January, the officers and NCOs on Hill 861[1119] had been briefed to expect an attack on their position, and as the sun set, everyone went on 100% alert. But as the night progressed, there was relative peace, no indication of anything out of the ordinary. There were a few probes, but this caused no concern; they had been probed on previous nights as well,[1120] and the probe seemed to be one more "Cry Wolf."

For the most part, everything was mysteriously shrouded in a dense ground fog in the low-lying areas around the hill, severely limiting visibility.[1121] Cpl Victor Martinez was on LP (XD801441) and at 2305H heard some movement. "At first we thought they were probing or something."[1122] 60mm mortars on 861 fired a mission and the LP threw one hand grenade and heard some enemy moaning outside the wires.[1123] The plan was for the LP to sweep the area at first light—a plan which would not be executed.[1124]

All was quite until 0030H when sounds of people in the outer wire were certain. At this time the Marines of K/3/26, manning Hill 861, threw grenades and fired M-79s to preclude breaching of the wire in front of First Platoon. Moaning and movement sounds emerged from the fog and darkness shrouding the hill as the soldiers of the 6th Battalion, 2nd Regiment, 325C Division[1125] invested the outpost, assuming assault positions.

Cpl Dennis Mannion, an artillery FO, made several trips down the trenches on the northwest corner of the hill to listen to the noises: "They were operating in the fog and dark and didn't even practice much noise discipline! It was an unsettling feeling to hear people go about the business of trying to penetrate the wire oblivious to the hand grenades that were thrown out into the dark at them. At some points, they were even laughing among themselves."[1126]

"Doc" (HM3) Malcolm Mole crept up to the top of the darkened hill 861 to relieve himself at the piss tube. Cpl Dennis Mannion and his radioman, PFC David J. Kron (C/13th Mar), heard him approach through the darkness and challenged him. Mole, who aspired to be a disc jockey and was from Miami, responded, "O, this is KWN in Miami, Florida! Weather 71 degrees!" Mannion responded, "O, Doc, come on! Give us a break!" After the Doc relieved himself and as he walked back down the crest of the exposed northern side, the enemy opened up, and he was instantly killed by a Rocket Propelled Grenade.[1127]

About 0330H[1128] the NVA force popped two red star cluster flares. LCPL Dale R. Flaharty, manning the .50 caliber machinegun at First Platoon assumed one of the Marines made a mistake. Then everything broke loose—RPGs, mortars, small arms fire,[1129] from XD798442, XD800446, XD798447, XD801443, and XD805445.[1130] The NVA force opened up with a base of fire from the ridgeline immediately west of Hill 861, a position actually higher by about ten meters which provided a view of the entire top of the hill and the western slope. The Marines fired at this base of fire with 106 recoilless rifles and .50 caliber. Sgt Michael H. Lyons and LCPL Flaherty, manning the .50 caliber on the top of the hill cut loose with about 50 rounds and then his gun jammed and he then ran down to augment the lines. About five minutes later, the 106, about ten yards to his left, took a direct hit, destroying all the ammo.[1131]

Meanwhile, Mannion and Kron had been sent by Captain Jasper (CO, K/3/26) to the lower, southern tip of 861 after the Marines there reported spotting 25-30 NVA outside the wire, in order to direct artillery on them. Just as he reached the bottom of the steep hill, the NVA opened up. Since nothing could be seen there, he dashed back up the hill to the CP bunker.[1132] The CP was devastated. The Company radio operator was blinded, the Company Gunny, Melvin Rimmel, died in Mannion's arms as he bled to death. Mannion recalls Gunny Rimmel:

"About five or six days before the shit hit the fan, we had a rare day off from running the patrols. Instead, the Company Gunny asked for volunteers to go down into the deep ravine that lined the western side of 861. Mission: to locate the burnt out wreckage of a H-34 helicopter that had crashed some months back, and to

[1132] Letter of Dennis Mannion, 20 August 1984.

retrieve (if possible) the M-60 machineguns... Gunny Rimmel and I were pretty close. He was a big bear of a guy. I think I kinda took him for a father figure. About eight of us went, slipped out of the wire after sun up and worked our way into the ravine. We found the wreckage after about an hour, spent a leisurely time sifting around the wreckage, had lunch, and hiked out. Yes, we did find the M-60s. It was like a bunch of campers exploring the ruins of some historic event. One of the things we talked about (the burnt wreckage brought up the topic) while we ate lunch was a Marine Corps helicopter crash at Camp LeJeune earlier that year.. A number of Marines were killed. Sergeant Rimmel was supposed to have been on that flight, but a problem at home with one of his kids getting seriously sick, forced him to change places with another sergeant. He talked about fate and being in the wrong place at the right time. I've never forgotten the conversation, the locale, or the fact that five days later [Gunnery] Sergeant Rimmel was dead, one of the first to die when the NVA attacked us on the 21".[1133]

Gunny Rimel enlisted in the Marine Corps during the Korean War. Dennis Mannion remembers that he was, like most Marine Corps Gunnies, "big;" he was well over 6'4" and over 245 pounds "with a voice to match." He was married and had four children.[1134]

The S-3 of 3/26, Maj Matthew P. Caulfield, after receiving the word that Capt Jasper had been badly wounded, asked that the next senior officer, 1/Lt Jerry N. Saulsbury, assume command.[1135] When Caulfield got Saulsbury on the horn, "I asked him to get his gunny, who was a very strong one, and I said, 'Make sure you rely on him,' and he immediately answered, 'The gunny is dead.' Then I told him to get hold of his First Sergeant.. who was a real legend in the battalion and a tremendous Marine. I was told that he was over on the side of the CP, and he was dying."[1136] "I had a couple of holes in me and one real bad one in the neck, which later on they told me here in the hospital that I had a carotid artery severed and they don't know how I'm with it right now, but, well, thank God, I came through."[1137] "First Sergeant Goddard, who was running around with a finger on the artery on his neck to hold the blood in, told me later in a letter that he was looking for the gunny who was killed.. and he couldn't find him. He heard somebody singing; someone was singing the Marine Corps Hymn. He went over to the position. It was the 81mm mortar section. These kids had two mortars, and they were firing the mortars just as fast as they could get them into the tubes, and on top of everything else, the ammo people and the mortar people were screaming at the top of their lungs the Marine Corps Hymn."[1138]

The brunt of the attack burst against the lines manned by K-1 on the northwest corner of the hill. The NVA force penetrated their lines and in the chaos of battle, it became imperative to close the lines with the ever-present threat of enemy not only firing from the front, but also the rear—and within the trench-perimeter itself!

PFC Michael Douglas Cruitt was killed manning his machinegun. (One of his friends, with whom he had gone through machine-gun school, recalls that while they were in Okinawa to be processed for Vietnam and no liberty was allowed. "He was tall and slender, had a 'book wormish' look about him. He was a great guy. We went AWOL in Okinawa. We were going to Vietnam and they said: You're confined to the base. We said: O great! We're going to Vietnam and you're not going to let us go into town! Well, they had this hold in the fence, and we went into town and half the unit was in town! And I was glad for that memory of Cruitt."[1139])

2/Lt Linn Oehling's Second Platoon covered the lower part of the hill—the LZ area with the point, an area that was not overrun, nor did a single enemy soldier set foot on it.[1140] K-2 was augmented by a detachment of four deuce mortars from WHISKY Battery, 1/13 consisting of two M30 base plate 4.2" mortars and one HOWTAR (which is actually a 107mm pack howitzer) under the leadership of 1/Lt Erich E. Gabrys. The 4.2 was especially good for providing illumination because of its high trajectory and slow-moving round. "You can crank that tube up, put it up to ten-sixty-five elevation, which is a thousand sixty-five, almost pointing straight up. You put a real light charge, just one little powder bag, and set a real close time on your time fuse for your illumination, and it does a beautiful job of illuminating your own position."[1141]

When the break in K-1's lines was realized, four Marines of Lt Oehling's K-2 (LCPL William Edward Huff (later KIA on 25 Feb 68), LCPL Wheeler, PFC Lonza, and PFC Harold W. Pagel) together with two men from

[1140] Letter of Dennis Mannion, 27 August 1985.
[1141] Conversation with Gary O'Neal, 11 July 1993. W/1/13 was split with 3 tubes on 861 and 3 on KSCB.

the 4.2 tubes (LCPL David L. King and LCPL Ronald G. Wasielewski) were sent up the hill to close the lines.[1142]

K-2's lines held in large part due to two machine-gunners, Curtis B. Bugger and LCPL Billy R. Moffett: "We were being hit very hard.. and when they started opening up with this .50, they started drawing all the NVA fire to their particular position. They were getting hit with RPGs and also a .50 caliber operating on the far ridgeline [to the west]. Nevertheless, the people in this position just continued to fire. [The enemy] slipped in behind our .50 position and opened up on our .50 caliber position from the rear. Almost immediately our A-Gunner [PFC Curtis B. Bugger] was shot through the head and fell dead. LCPL Moffett, the gunner, fell and pretended to be dead, as he could not get to his weapon at this time. The NVA stood over the trench with his weapon down into Moffett as he pretended to be dead for maybe five or six seconds before turning to leave. When he turned to leave, Moffett grabbed his rifle and opened up on him."[1143]

A NVA who had penetrated the wire at the top of the hill had followed a little path down to the bottom of the hill, about ten feet from PFC Gerald F. O'Neal. Training at Camp Pendleton had ingrained the image of the enemy as one wearing black pajamas with little rice hats. "I sincerely thought this guy was a Marine. He had on utilities, a helmet, web belt. After he passed me, Sgt [Bobby J.] Barrickman, across from me in the doorway of our FDC bunker, was upset, and said, 'Why didn't you kill that man?' And I said, 'God, Sergeant Barrickman, it was a Marine!' He said, 'No. It was a NVA!'"[1144]

PFC O'Neal was called up by Billy Moffett to become his A-gunner, feeding the belt of .50 cal ammunition as Moffett continued to fire his machinegun. "Moffett fired the .50 cal. continuously, never letting up to cool the barrel. The incoming fire he was drawing was tremendous. There were 82mm mortars dropping all around us and what seemed like a steady stream of RPG fire. I could see green tracers from heavy machine guns coming into our little area from two different directions... The NVA fire he drew was so heavy it was impossible to move. I looked up and over my shoulder and saw the barrel of his .50 glowing bright red. I hoped it would melt, so he would have to stop firing."[1145] O'Neal, who eventually retired as a First Sergeant in the U.S. Army in 1989, "..stuck to Billy Moffett like glue after that night. In my 21 years as a Marine and a professional soldier, I never saw a man so calm under fire... Billy, you are the finest combat Marine I ever knew."[1146] Courageously continuing to fight, the soft-spoken Moffett said, the very next day, "On the 21st, I was scared shitless. It was hell."[1147] From his machine-gun he looked down on the 4.2 Sergeant's bunker: "..he went into his bunker and didn't come out.. He was in his own bunker all the time."[1148]

PFC Curtis Bugger "..was our youngest trooper. He was just barely 18, and we had just sent him up to the hill as a replacement barely 3 weeks before everything started."[1149]

Technicians at FOB-3 who monitored the NVA's radio transmissions throughout the siege battle, heard the North Vietnamese assault commander screaming for his reserves. He never received an answer. The reserves were annihilated by friendly artillery while the assault troops died on the wire.[1150] Marines on Hill 881-South fired 680 81mm mortars in support of the Co K Marines on 861 throughout the night. The 81mm tubes became so hot that juice was used to cool the tubes and after that was expended, the Marines urinated on the tubes to cool them.[1151]

The battle raged throughout the night until about 0630H as everyone prayed for light: "..It seemed like endless hours. That last hour between six o'clock and seven o'clock, waiting for the light, was a long hour, but when it came it was greatly appreciated."[1152] The NVA popped a green star cluster and retreated.[1153] Dawn disclosed the specter of battle: unexploded Bangalore torpedoes and satchel charges, dead enemy bodies strewn in trenches and all over the hill. "We tossed them outside. They hung up in the barbed wire—sorry about that. We went outside, got their weapons. They drug off a lot of them. We found a lot of drag marks."[1154] There were 4 KIA, 11 WIA, 45 NVA KIA and one NVA POW.[1155]

LCPL Clifton Randall Jones played football in high school and was an only child and adopted.[1156]

[1155] 3/26 ComdC January 1968.

[1156] Letter from James Fowler, 2 June 2002.

Later in the afternoon (at 1400H), K/3/26 was reinforced by a reinforced platoon of Co A/1/26.[1157] When 1/Lt Geoffrey L. Stack led his platoon of A/1/26 to Hill 861 he was assigned the same area that had bourn the brunt of the attack—the northwest and west side. All the bunkers that had been on the hill before the attack on the 21st were destroyed and Co K, now reinforced with a platoon of Co A, rebuilt the entire hill position. Nothing new was now above ground.[1158]

Even after several weeks, the stench of decaying NVA bodies was so intense, the Marines of Co K had to wear gas masks on the western slope. Yet, every time the Marines attempted to bury the bodies, they encountered sniper fire. The best they could do was to toss the bodies into a deep ravine near the hill. "We had no way of getting out to these bodies to dig a mass grave or burn them, so all we could do was let them decay out there."[1159]

[Hill 881-South – 0500H]

At 0500H, Hill 881-South received small arms and RPG fire.[1160] Several rounds of 120mm mortar struck the hill wounding four. As they were being evacuated, additional rounds impacted, killing several Marines.[1161] PFC Terry Melvin Johnson, the INDIA Co., 3/26, supply clerk was standing next to Captain Dabney as the rounds started to impact. "We both jumped into holes, He jumped into the left one and I jumped into the right one, and a round landed in the hole with him. What was left we just wrapped up in a poncho and stuck on a helicopter. And I heard a few months later from his mother to the effect that the remains that were received were not her son's because there was a birth mark. And I wrote her back at the time and several times since. I explained the circumstances of his death. But for several years thereafter I would hear pretty regularly that she felt he was a POW and could I help. I kept writing back, No, I know he's dead. I was standing right beside him just before he died. He was my supply clerk. There wasn't much to put on the helicopter. Those were the days before DNA."[1162]

LCPL Thomas Lloyd Kingston was a cartoonist, carpenter, Shakespearean devotee, entertainer, who loved to play baseball and golf, camping, fishing, and swimming.[1163] A newspaper reporter wrote of how Kingston delivered papers, in the dark and cold of winter and the heat of summer, how he helped as an altar boy in their church, and wondered if the other people in the worshipping congregation that day, when the priest announced Kingston's death, really cared.[1164] A few days later, he wrote, "They Really Do Care!" and noted an overwhelming outpouring of letters and telephone calls in support of the Kingston family.[1165] So many responded, that Kingston's mother noted, "On the night last January when the men came to the door with the telegram, I felt along in the world. And now I know that I am surrounded by compassion.. as if the whole world were looking over my shoulder." One person cared so much he sent 5,000 green scapulars from the Shrine of Our Lady of the Immaculate Heart to the 26th Marines at Khe Sanh.[1166]

[Khe Sanh Combat Base – 0545H]

When the main ammo dump (ASP#1) on KSCB was hit at 0545H, the exploding dump spewed rounds to the degree that it became impossible to determine incoming from shells exploding from the dump as numerous duds and enemy fire covered the base.[1167]

Artillery on the base had been busy, supporting Hill 861 as well as boxing in recon team NURSE (3D1) at XD823403 who had observed NVA in green uniforms at XD825404 wearing packs and carrying rifles.[1168] By 2045H on 20 Jan, NURSE boxed themselves with arty as an enemy force of 75-100 moved within 30 meters of them. Flareships and SPOOKY were on station throughout the night. At 210800H, the team broke contact and moved to friendly position.[1169]

Only three guns of Battery "C", 1/13, operated on KSCB when the attack began; the other 3 tubes were located on Hill 881-South. The 3 on KSCB were located only about 25 meters from the base perimeter and only 50-75 meters from the now exploding ammunition dump which contained some 11,000 artillery rounds.[1170] So many rounds cooked-off from the ammo dump that it became impossible to distinguish them from those fired by the NVA. Gun #2 was out of action for approximately 15 minutes due to dud mortar rounds having

landed within the parapet which were removed by the battery Executive Officer, 1/Lt William L. Eberhardtt and the battery's supply chief, Sgt Ronnie D. Whitenight.[1171] Gun #5 took a direct hit with a "willy peter" [white phosphorus] round which exploded out of the dump and hit the gun's ready ammunition bunker which started burning. The section chief cleared the crew from the gun as he put out the fire; he was hit with an incoming round and wounded in his leg and arm, but the fires were extinguished.[1172] The three guns of the battery on the base continued to fire until about 0800H by which time all land lines to the guns (to communicate firing data) had been severed and all aiming stakes destroyed, and there was no means to return fire. The guns had fired approximately 3,000 rounds, during which time "..the troops were very calm and went about their job in a professional manner, stayed out in the parapets, exposing themselves to great hazard from incoming rounds."[1173]

When the initial barrage struck the base, PFC Glenn E. Prentice was walking to the 1/26 messhall to begin his mess duty, scrubbing pots and pans. The first incoming round impacted on the road, the second struck the messhall. "I'm jumping for joy because I don't have to scrub any pots, and the next second it hits the ammunition dump, and all hell breaks out. I jumped in a hole, and I remember jumping in the hole with a guy named [LCPL Jerry Oscar] Stenberg. And it's really coming down fast, and I said, 'Let's go to the FDC bunker,' which is an old concrete bunker. And Stenberg goes, 'I don't want to go.' I said, 'Well, I'm going out of here!' About ten seconds after I got out, a big round hits, hits Stenberg in his head."[1174] The round destroyed Stenberg's body: "I knew it was Stenberg because he was the only blonde haired Marine in the Battery at the time. From the middle of his chest up was gone. I found only some blonde hair around the fox hole."[1175]

Death of a Cannoncocker[1176]
By Raymond C. Nicol

He did not hear them coming,
With the shrieks of death they made.
He was busy on the gun.
Sending out his own fusillade.

The last thing he remembered
Was sailing high up off the ground.
Landing face up with eyes wide open,
He couldn't hear or make a sound.

As he lay there bleeding,
He wanted very much to say
'Please Lord, I'm too yo0ung to die this way.'
He passed on, bled his life out,
On Khe Sanh's blood red clay.

The quantity of strewn ordnance, duds and semi-cooked-off rounds from the dump, in the battery area was so great that the two remaining good 105mm howitzers were temporarily located at ALFA Battery's position at the western end of the combat base while the area was policed by a working party to remove the shell casings and canisters and a team from EOD removed the dangerous duds out of the area. The area was re-occupied by "C" Battery along with a newly-arrived "B" Battery and a replaced Gun #5 on the morning of 23 January.[1177]

BRAVO Company, 1/26, occupied the perimeter lines (The GRAY Sector) protecting the eastern side of Khe Sanh Combat Base, augmented by three Ontos from A/3rd ATs, and 106s, two .50 caliber machineguns, and a 3.5-inch rocket team along with a 60mm mortar from H&S/1/26. Platoon B-2, on the forward edge of ASP #1 (about 25-30 meters from them), bore the brunt of the ammo dump's explosion.[1178] In addition to the ordnance, large quantities of CS powder had been stored in ASP #1 and the eruption from that area spread the acrid fumes throughout the area; many of the Marines had neglected to keep their gas masks with them, causing some to return to their tents. The tear gas "..was so heavy that even gas masks were marginally effective. Through all of his hell the 2nd Platoon remained in position, returning 60 mortar fire and retained the ability to fire the FPL. Also, the 81mm platoon in its entirety, were located near the dump and during this time continued to return counter-mortar fire."[1179] Captain Pipes displaced his CP three times during the five hours that the ammo dump exploded because exploding ammunition made his position untenable.[1180] The area also was strewn with flechettes, the little darts about one-inch long, contained in some 106mm rounds (9,000 in each round). "Many

men in the 2nd platoon had 106mm flechettes stuck in their flak jackets and clothing. The ground, in certain areas, was thick with these deadly arrows."[1181] Chaplain Ray W. Stubbe gathered several dozen and formed a large cross in the front of his helmet as a reminder of the participation and presence of God within the pain, suffering, and death in which we now were.

Captain Kenneth W. Pipes, commanding BRAVO Company, 1/26, recalls: "We made it down into that Bravo command bunker behind Dillon's platoon, within yards of the ammo dump, and the attack started. We got our gas masks, but Steve [Hellwig] didn't have his, and he went back up to those tents that were beside the bunkers to get his, got it and was headed back down and a 122mm rocket must of hit just behind him. We're missing him, and don't know what happened to him. The attack had blown the lights out, the generators [were out]. So I went back up the steps, and I felt something and I turned my flashlight on and I put my hand clear through his chest. He'd taken just a massive hit. He was cut in half."[1182] He had instantly died: "It just cut him right in half. I mean he didn't know what hit him."[1183]

(Hellwig's brother, Ray, later joined the Marine Corps and served with C/1/26 during 1969. "My oldest brother, Gary, went in before Steve, and he ended up getting a medical discharge, being injured in training. Then Steve went in to follow my brother Gary. He was a really motivated Marine. He was gung-ho. He believed in it and excelled in boot camp. He came out a PFC.. I went in—I just needed to see the place where he died. [Steve] played basketball, ran cross-country, and was a very popular guy; he had that kind of personality that people like. I think he was made for the Marine Corps. He was a kid who won 'inspiration trophies' when he was on sports teams. He was enthusiastic and passionate about life and the things he believed in. He was my big brother. I idolized him, and there's not a day goes by that I don't think of him."[1184])

Steve Hellwig's parents, Bud and Verly, met at a USO dance in Bremerton, Washington on 2 Dec 1944 when he was a 19 year-old sailor in the US Navy. He had run away from his home in Arizona to join the Navy in WW II and survived the sinking of a ship by a German submarine. He recalls that when Steve was killed, they received telephone calls from strangers, "Your baby killer got killed." He also remembers how their two other sons were jeered whenever they wore their uniforms in public, meeting only criticism and scorn, kicked off airplanes when trying to get home to make room for late arriving civilians. No media welcomed them.[1185]

PFC Paul Melvin Beddoe, Jr., of BRAVO Company, 3rd Reconnaissance Battalion, had been wounded on the patrol on 20 January to Hill 881-North, and died of wounds.[1186] CPL Lionel Guerra, one of the gravely wounded from that patrol, was at DaNang when a hospital bus met the plane carrying the casualties on the runway. "It was set up for stacking stretchers on racks, and on the way to the hospital I heard someone saying, 'I'm gonna die. I'm gonna die.' I couldn't see him, but recognized the voice. It was my buddy, Paul Beddoe from BARKWOOD. I got mad at him and told him he wasn't going to die. He died the next day."[1187]

[District Headquarters, Khe Sanh village – 0640H]

At noon on 20 January, the 7th Battalion, 66th Regiment, 304th Division of the NVA began to move out along a path that had just been bombed by B52s. The trees had been knocked down and units moved slowly with some units becoming lost. It was not until 0400 on the 21st that the major force reached its grouping point, just in time to execute the regimental orders to commence their offensive at 0445.[1188]

On 20 January, Capt Clarke was on a patrol 6-7 kilometers south of the village when he received a rather cryptic message from the Special Forces to depart the area immediately because there would soon be a lot of action there. Some three hours later, a B-52 Arc light struck the area.[1189]

At 210640H, the Huong Hoa District Headquarters, (XD858386), two miles south of Khe Sanh Combat Base and seat of the local government under the leadership of Captain Nhi came under mortar and ground attack. The position was manned by the 915th RF [Regional Forces] Company and two PF [Popular Forces] platoons.[1190] The American advisory team (MACV Advisory Team #4 under the leadership of Capt Bruce B.G. Clarke) had intercepted a radio message the night before indicating a regiment was assembling across the river.[1191] The two Vietnamese PF platoons were under the leadership of a 1/Lt who would be killed during the attack. The position was also the headquarters for Combined Action Com-

pany (CAC) Oscar (radio call sign, MUTTER) and contained its First Platoon, O-1. Platoon O-2, located at the western edge of Khe Sanh village (XD842380) had plans to re-locate southwest of Lang Vei a few hundred meters north of Lang Con (1) and (2), but had abandoned at the direction of Col Lownds who told Stamper, "I can't tell you why."[1192] Stamper also recalls that around the 15th or 18th of January, Stamper was sent an abnormally large quantity of ammunition—small arms, mortars, and frag grenades and the men complained as they attempted to find places to store it. During this time, CAC OSCAR constructed an extensive trench system.[1193] Platoon O-3 was located at the village of Ta Cong just west of the main gate of the combat base. The position was also the location of the small Joint Technical Advisory Detachment (JTAD), which operated an agent net reporting NVA forces in the area. The JTAD had departed the Huong Hoa District site a day or two earlier. "It's almost as though they knew it was coming."[1194]

Capt Thomas Burton Stamper had assumed command of CAC OSCAR on 27 December 1967, replacing 1/Lt Elmore who had been at Khe Sanh only a short time because, although sent to Khe Sanh since it was relatively quiet and he already had two Purple Hearts, soon after he arrived he received his third "Heart" which meant automatic rotation back to the States.

Stamper suggested to one of his Marines that they walk to the small messhall for some coffee. "It was lucky we hadn't left a few seconds before. I just started getting out of the trench by the COC when AK-47 fire began cracking all over the perimeter. We were completely surrounded, 360-degrees." The messhall received a direct hit. The assaulting NVA force commenced fighting in the streets of Khe Sanh village and took over the dispensary, located about a click east of the barricaded headquarters compound.

In the ensuing battle, the District Chief, Capt Nhi, called in mission "BA-911" VT fuse 105s, a ring of steel. Over 1,000 of these variable-timed rounds (set to explode just above ground) showered air bursts of steel over the wire.[1195] The Marines fired over 500 rounds of 81mm mortars, all without increments, which landed and exploded just outside the wires. During this time, Sgt John James Balanco, the senior advisor and squad leader of O-1, courageously moved through the intense fire to each fighting position to redistribute dwindling ammunition, bolster the morale of he Marines and PF soldiers, replace casualties, and reassign sectors of fire.[1196] When a machinegun position was disabled, Cpl Verner Ray Russell immediately moved to the weapon, repaired it, and began to deliver a heavy volume of suppressive fire and continued to do so for 36 hours even after being wounded in his leg and stunned by the concussion of a RPG round.[1197]

At 0811H the NVA assaulting force broke contact and dispersed to the north.[1198] 43 enemy bodies were left laying in the wire with numerous additional bodies outside the wire. The temporary relief from enemy pressure was the result of the devastating VT artillery as well as one single A-6 from Marine All Weather Attack Squadron 533 [VMA(AW)-533] which dropped 28 MK-82 500-pound general purpose bombs causing at least 100 NVA KBA [Killed by air] in this one air-strike.[1199]

About 1100H, Col Lownds dispatched Co D/1/26 to rescue the trapped men in Khe Sanh village. Capt Stamper radioed BLACKBUD DELTA [D/1/26] to use extreme caution since it appeared as though every house in the village was occupied by NVA, but that when they arrived, the CAC Marines would guide them into the perimeter. After awhile, INTRIGUE [26th Marines Regiment] advised Stamper that BLACKBUD DELTA could not pursue their rescue attempt at this time. LtCol James B. Wilkinson had, with Col. Lownds' approval, recalled them.

> "Regiment told me to send a company down into the village. It was Lieutenant [Walt] Chapman because he was the company that was not in the perimeter. He got up on the high ground [of Hill 471] and had a Vietnamese scout with him. They checked out the village and detected heavy VC in the village. At that time I immediately halted him where he was. I said, 'Don't go; don't pursue.' I contacted Colonel Lownds and said, 'Col Lownds, I recommend that we not send Lt. Chapman and his company any further than they are. I feel it's a trap in waiting and I don't feel it would be militarily wise to do that. He agreed, and we brought them back—probably saved the company."[1200]

PFC Sidonio Patricio recalls: "We could see the airstrikes coming down. Then we went over Hill 471 and through one of those little Bru villages there [ville Breh]. We went through there and right up into Khe Sanh. Just before we got [to the District compound] we got the word to get the hell out of there, and I mean we came back

fast! Fast! There was a short guy who passed out due to heat exhaustion."[1201]

The Joint Technical Advisory Detachment later reported "..that the attack on the Huong Hoa District Headquarters was conducted by only a battalion. However, three regiments assumed ambush positions around the area.. to keep American reinforcements from reaching the besieged post,"[1202] implementing their common tactic of causing a battle (or a WIA) in order to lure and kill those who would come to the rescue.

Meanwhile, Mr. Robert B. Brewer, the Quang Tri Province Senior Advisor (PSA) and senior CIA man in the area, saw the strategic necessity of preventing the fall of a seat of government. "Colonel Lownds and I had an agreement that the Combat Base would come to the aid of the Khe Sanh District if the District got in trouble."[1203] During a visit to the Huong Hoa District Headquarters on New Year's, 1968, Mr. Brewer said that he would try to reinforce the headquarters, should it be necessary, by way of the coffee plantation just to the south of the headquarters complex. The trees there were only7 to 8 feet tall and could be easily leveled by preliminary airstrikes.[1204] Brewer assembled a "Council of War" and his Deputy Province Senior Advisor, LtCol Joseph Seymoe, volunteered to lead the rescue force[1205] consisting of the 256th RF Company[1206] transported by the 282nd Assault Helicopter Company. At 1710H, this force consisting of 50 PFs in 9 UH-1E helicopters, the BLACK CAT Company,[1207] landed atop a position known as the "Old French Fort" (XD863385, approximately a click east of Khe Sanh village) because, according to Mr. Brewer, LtCol Seymoe, a West Point graduate (same class as the astronaut Col Frank Borman and General Fidel "Eddie" V. Ramos of the Philippines) and former USAF pilot who had been awarded a DFC for his flying exploits in the Korean War, had developed defective hearing and so was transferred to the U.S. Army infantry.[1208] The chopper armada was delayed due to a FAC flying the area that could not be contacted by radio, causing the helicopters to fly and become low on fuel. A USAF FAC, Captain Cooper, flying with the armada radioed to Seymoe to hold off landing, that "..the planned air strike couldn't be pulled off yet." "Apparently Seymoe didn't hear the 'yet,' and decided, directly counter to my orders before he left the ground in Quang Tri City, that he'd put the RF Company on the Old French Fort."[1209]

The pilot in charge from the 282nd Assault Helicopter Company, Major Tommy Stiner, had earlier been celebrating his 30th birthday in a surprise party given by his men in the operations building when the call came for him to fly the mission.[1210]

The NVA 7th Battalion, 66th Regiment, 304th Division, fighting in this Huong Hoa District battle, had lost their commander, Nguyen Van Thieng, in the fighting and nearly all from the battalion were wounded. Most of the Regiment, however, was displaced in various ambush positions. "Just as we had planned when we opened fire attacking Huong Hoa, the enemy sent [a force] to land by air at Ku Boc, the 11th Company, 9th Battalion, was waiting for them there. Because of our diversionary organization and our effective maintenance of secrecy, our troops waited until the enemy had landed before opening fire and eliminating nearly the entire company.. During this engagement, Comrade Tran Dinh Ky, a squad leader, fired a B40 round to knock out a helicopter and 12 of the enemy. After that he led troops in his squad to knock out another helicopter."[1211]

Within days of the incident, Major Stiner testified before a Board of Inquiry:

> "Khe Sanh, the town itself and the MACV compound of Khe Sanh.. reportedly were surrounded by a regiment and had .50 caliber positions on a 360° from at least 4 positions. It was decided that it probably would be impossible to get the troops into Khe Sanh which was their final destination. We were given an alternate landing site, an old fort called the Old French Fort, about 1200 meters due east of the city of Khe Sanh. Mr. McKinsey had been operating in that area all morning. He had flown over this old French Fort for approximately 2 hours at various altitudes. He further had operated up there for the past 11 months. With his knowledge of the area, having already been in there the same day, he volunteered to fly in the lead aircraft with me.. LTC Seymoe wanted to ride on the lead aircraft also since there were no American advisors to go with this unit he wanted to see where they went and coordinate. We loaded without incident, took off [at 1500H], flew directly to Khe Sanh... We circled this old French fort 360 degrees at a mean altitude of approximately 800 to

1000 feet. Looked perfectly harmless. We determined to make the landing there, informed the MACV American advisor who was in Khe Sanh [village] itself. He agreed that that's where he wanted them and that there should be no activity there... Just as my skids touched down the NVA stood up all around us... The ARVN troops had begun to off load. We, McKinsey was flying to the ground and still on the controls at this time... I instructed SGT Billy Hill, who was the gunner, SP5 Howington, who was the crew chief that as soon as we picked up over the edge of the ARVN for them to start shooting. I know Sgt Hill was in the aircraft at this time because I looked back. We picked up to approximately 8 feet, 8 to 10 feet of altitude, nosed the aircraft forward to get out of the area, at that time we were hit with what could have been any large caliber weapon, I suspect maybe a 57mm recoilless rifle... Chopper took a hit in the right side approximately where the engine and transmission run up through the fuselage. The blast or hit or subsequent explosion that it caused knocked all the glass out of the helicopter. It appeared to have buckled in the middle with the tail and nose both falling down. Rotor blades stopped. We just had enough forward momentum to pitch on over the hill.. over the embankment.. as much as 30 feet to fall. The aircraft was in flames at this time. It crashed into the ground about maybe 35 to 40 meters north of the perimeter that was occupied by the NVA [and] came to rest inverted. McKinsey and I crawled out through the windshield. At this point Warrant Officer Gerald McKinsey appeared to have sustained no injuries.. He took his carbine and started firing up the hill.. The NVA troops were storming down this position. He took up a firing position, prone position, facing up the hill and commenced delivering fire. I saw the Colonel [Seymoe] lying on his back, pinned under the aircraft, flames had not yet reached him. I ran to the Col's aid and attempted to free him. LTC was still alive at this time or at least he blinked his eyes a couple of times. He didn't make a sound.. I tried to free him by lifting his arms tugging at his belt, free one leg at a time—had no luck. A rescue aircraft, the second aircraft in formation saw that we had crashed, did a 360 and was at the crash site seconds after we had crawled out of the airplane. SP5 Danny Williams hopped out of this aircraft to help us. When he arrived he came straight to me; he and I both tried to free the Col. He got one leg and I got the other leg, [but] we couldn't free him. I had determined by this time that Col Seymoe was dead. His eyes were wide open and rolled back up into his head and there was no apparent breathing. The flames had gotten to his feet at this time. We left him. I crawled to McKinsey and just got maybe 3 feet from McKinsey and started to take up a firing position with him. At that time he was struck in the back of the head by a bullet... He fell over, tumbling slightly down hill... I have no doubt that Gerald McKinsey died instantly at approximately 1745... PVT Jerry Elliott was in the second helicopter that attempted to come in for rescue after the first helicopter had to depart. The helicopter was flown by Warrant Officer Lee.. Elliott jumped out of his aircraft approximately 60 meters from where my aircraft had crashed. He attempted to reach us."[1212]

Warrant Officer Lenny S. Lee (W1) reported:

"PVT Elliott was riding with myself on my ship as gunner. He was sitting on the right hand side of the aircraft in the gunner's slot... Elliott jumped out the right side and the last time I saw him he was going by the rear of the aircraft that was in front of us.. We were receiving so much fire we had to take off. We did just a fast 360 around the hill in hopes that if he had gotten anybody, he had got them and got right back at the spot he knew he would be picked up at. And I called the gun ships and told them that I'd left him in and we would try to get him out and anybody else."[1213]

Warrant Officer Lee testified that Elliott was unarmed, that the helicopter touched down looking for him, and that he saw what he believed to be Elliott's body while aloft at about 100-150 feet, seeing blood on his trousers. He believed it was Elliott because he didn't have on a chest protector but a flak vest, and while Sgt Hill also had a flak vest, it had a huge ugly face drawn on its back with bright ink, so this flak vest wasn't Hill's. He had no doubt whatever that this was Elliott.[1214]

Results of the debacle: From the lead ship: LtCol Seymoe, WO McKinsey were KIA, Sgt Hill was MIA, and Capt Stiner and SP4 Howlington made their way to Khe Sanh Combat Base. SP4 Elliott from the second ship is MIA.[1215] Stiner had made it to CAP O-3 where the Marines opened fire on him, assuming he was the enemy; it took some time to convince them he was American![1216]

Jerry Elliott's sister, Donna, made several trips back to the Khe Sanh area, focused on finding anything she could regarding her missing brother. Finally, in April

[1216] Gloria Emerson, article in the NY *Times*, cited.

2004, after several days of digging at the old French Fort position, remains were recovered, but Donna, looking on, immediately realized it could not be her brother's remains due to the size of the combat boot.[1217]

POW/MIA—Who Can Say?
By Donna Elliott

In my dreams I can clearly see Jerry's face,
But harsh reality reveals only an empty space.
To Vietnam, Mike, his Army buddy, and I, his sister came,
Searching for something, anything to ease the pain.

The last Elliott alive, I am eternally duty bound,
To question until my big brother is someday found.
My worn body aches, heart and mind so very tired,
Yet questions unanswered still burn like fire!

My Father, my friend, my rock, my guide,
Does he perhaps in Your heavenly house abide?
With Mama, Daddy, and little sister Cindy Ann,
Or does he somehow, somewhere, survive in some foreign land?

No sure answer, no piece of bone have we found,
Walking over the crash site's hallowed ground.
Only half the chopper's blade, a cornerpost in a cowpen,
Surely, Lord, this cannot be the final end!

We and the 55th JTF Team traveled far to find my brother,
All clues end in Khe Sanh, at this time we can go no further.
Now, in the rainy darkness of a Vietnam morning I pray,
Please, Lord; give us all word of Jerry some day.

During Operation PEGASUS, the old French Fort area was searched with the result of finding the body of Gerald L. McKinsey. Identification was based on personal property found on his remains.[1218]

Donna Elliott recalls that her brother "..was born a 'bluebaby,' an old Southern term used in 1948 Mississippi to describe a newborn infant that was born blue from lack of oxygen. The doctor left the delivery room of the tiny rural hospital, giving him up for dead. But his mama and the nurse didn't stop until he came to life and began to breathe on his own. Bill and Mary named their firstborn, Jerry William Elliott; he would be their only son. A miracle boy.. He was proud of his accomplishments, of being a Paratrooper and a Pathfinder... He was a man of action."[1219]

The much smaller platoon-size CAP O-2 on the western edge of Khe Sanh village faced the attack isolated, completely vulnerable.

> "We could not go to the aid of our sister unit nor could she to ours. Both compounds were surrounded and cut off. It was still dark. A RPG slammed into our front observation bunker. LCPL Sergeant and Sgt. Harper were in the top of the tower. Sgt Harper was hit in the face with shrapnel... As the sun began to rise the NVA pulled back. Lt Stamper radioed the base commander requesting air support. In a short while, the jets came in dropping napalm so close we could feel the intense heat as though we were in an oven. Later in the day we had helicopter gunships in our support as well. They were great. The base notified us that a rifle company was on its way to dislodge the enemy.. Later we were told that our relief column was ordered back to the base. A superior size force was waiting for them in ambush near a bridge they must cross. We were told we would have to hold for the night. We were afforded excellent artillery support throughout the evening and the night. To us the prospect of being alive the next morning seemed remote. All of us were determined that if the enemy did overrun our position they would pay a very heavy price for it. Throughout the night no man slept and each time the enemy was spotted, pre-plotted artillery allowed us to call in a ring of steel. At daybreak the next morning [22 Jan] all gunfire stopped. It had been a soul-searching night for us all. Two hours passed and nothing happened... We thought it was all over. Artillery came screaming into both compounds... We called the base to see if they had fired on us by mistake. They had fired none... Round after round landed in and near us smashing bunkers and tearing down nearby trees. It was about noon when we were ordered to make a run for it to the other compound to consolidate our forces. Carrying nothing but our flak gear and weapons we ran down Route 9 in a staggered column and made it to the other unit... The whole village was on fire. Many were wounded. Women were screaming for those they had lost. All was chaos! The entire village was in shambles. A half an hour after joining forces we learned that

[1217] Letter from Donna Elliott, 15 May 2004.
[1218] DD form 896, Field Search Record, date of recovery 8 April 1968, reported by Sgt Jackie Farmer, 625th S&S Co.
[1219] Biography of Jerry W. Elliott, by Donna Elliott, 28 June 2004.

evacuation choppers were on the way in for us... The whole engagement lasted 31 hours."[1220]

Back at Quang Tri, Mr. Robert Brewer informed Gen Truong [Commander, 1st ARVN Division] who was adamantly opposed to vacating the Huong Hoa District seat of government. "I well remember sitting with Gen Truoung in the Quang Tri TOC for more than 30 minutes. Neither of us said anything. Radios chattered in the background. The ball was in Truoung's court. Finally he said, 'All right, try to get them out.'"[1221]

Colonel Lownds had made the tactical decision: "..the terrain within the town of Khe Sanh where the CAP was located was really not defensible terrain since although it was on fairly high ground, it was right in the middle of a village and almost impossible to get any fields of fire. As a matter of fact, within 25 meters or perhaps even closer, there was a Buddhist temple, which made it almost impossible to fight from that position.. After long consideration and proper evaluation of the facts, it appeared that this unit should be withdrawn, and that the seat of the district government be moved within the perimeter of the Khe Sanh Combat Base. After checking with appropriate echelons, this was done."[1222]

Captains Glenn Wayne Russell, Jr. and Russell Edward Hohman of HMM-362, assigned as the "working birds" at Khe Sanh [a section of two UH-34s] and had been doing emergency re-supply to Hill 861 (which had been so heavily attacked, to deliver munitions as well as the reinforcing platoon from Co A/1/26) and also Hill 881-South when they were diverted to a mission of emergency medevac pickup in Khe Sanh village. Landing in the very small LZ, surrounded by tall trees, and while taking enemy fire, they successfully evacuated 38 WIA in seven trips. Some of the WIA were serious and attended by HM1 Craig, part of the crew while Cpl Funderburk (crew chief) and Cpl Jogodka (gunner) assisted. Following this, they resumed their emergency re-supply missions to 861 and 881-South. They were again diverted by INTRIGUE-14 [26th Marines Regimental Air Officer] to evacuate CAC OSCAR. In their excitement, too many attempted to board the helicopters at once, and all 26 Marines were evacuated. The aircraft flew 8.8 hours, rescued 44 medevacs, 26 CAC Marines, and delivered 19,650 pounds of desperately needed cargo while subject to enemy fire on 14 occasions.[1223]

The third platoon of CAC OSCAR, CAP O-3, located at Ta Cong ville just outside the main gate of the combat base, received the radio call: "MUTTER 3, MUTTER 3, draw back to the FOB camp immediately. Approximately 8 to 9 thousand moving toward your position." "We had 41 men, 11 Americans and the rest P.F.s Then the radio operator said, 'Don't take time to get clean underwear, just get the hell out now!' We dumped 55 gallons of gas on the hootch with a C-4 charge and put C-4 in all the bunkers, took our fighting gear and what we had on our backs, got the villagers away, and blew CAP-2 off the map with all of everyone's gear and everything."[1224]

By 221249H, CAC OSCAR evacuated Khe Sanh village by helicopters[1225] while the District Chief, RF forces, and the 4 soldiers of MACV Detachment 4 walked to Khe Sanh Combat Base (because the 2 small H-34 choppers, the only working birds, could only manage to transport Americans due to their other tactical emergency missions, and the Americans of the Advisory Detachment did not want to abandon their Vietnamese counterparts.

The senior NCO at Lang Vei, Bill Craig, notes: "They let Khe Sanh city go, and that killed us. We [at Lang Vei Special Forces Camp] were now cut off. We had to get everything by air. I even offered to give him one MIKE force company to hang on, because they already kicked the hell out of the NVA. I even had a company on the way. He [Lownds] said, 'No, we're going to let it go.' We was finished."[1226]

[*Thus began the famous "siege battle of Khe Sanh." According to American reckoning, the "siege" part of the battle lasted until 8 April 1968 when Co D, 2-7 Cav, entered the combat base to link-up forces and formalize the "relief." In subsequent multi-battalion operations, American forces scoured the area until they finally abandoned the combat base 12 July to adopt a more mobile posture. According to North Vietnamese reckoning, the entire battle consisted of four phases: Phase I (20 Jan – 7 Feb) with the mission of eliminating Hill 832 [Hill 861], to draw in 2 to 3 American divisions, pin them down and destroy them, destroy the Laotian BV-33 position at Ban Houei Sane and Lang Vay [Vei]; Phase II (10 Feb – 31 Mar) with the mission of encircling Ta Con [Khe Sanh Combat Base]; Phase III (1 Apr – 7 May) with the mission of attacking those relieving the siege; and Phase IV (8 May – 15 July) with the mission of re-encircling Ta Con [Khe Sanh Combat Base] and attacking the withdrawing American forces.*[1227] *The battlefield included 3*

districts of Laos and extended to the Cua Viet. The Khe Sanh portion of the battlefield, designated "B5-T8" was the primary part of the battlefield.[1228] *Reflecting this primary focus, in their secret (classified "Mat") history of the Ho Chi Minh Trail, the amount of materiel that had to be provided to B5-T8 was more than twice as much as that provided to Tri Thien [the rest of the I Corps battlefield], two-and-a-half times that provided to Region V [all of I Corps], and 24.5 times that provided to southern South Vietnam [the rest of the country for Tet].*[1229]

They admit the failure of their mission of drawing-in American forces to tie them down and eliminate them. They attribute this because "..we had made note of the enemy's old practices, but had not seen their new method of operations. We continued to believe that: wherever our main forces appeared, the enemy would move in, in response immediately into that area such as during 1965-1966 and early 1967. Therefore, our intention was to avoid large scale attacks conducting only some small attacks on small positions, surrounding them, waiting for reinforcements to come, and then attacking the reinforcing forces. Our intentions were not appropriate to the objective situation at that period of time after the enemy had been defeated.. after we had opened fire in the cities, it became increasingly difficult to draw the enemy out... in order actively draw in enemy reinforcements we had to attack strongly to the point that the enemy sensed a dangerous condition so that if they did not send in reinforcements then those on site would be eliminated. Specifically during the Highway 9-Khe Sanh campaign if we had attacked continuously the positions on the perimeter and after that had encircled and laid siege to the base at Ta Con immediately then certainly the enemy would have sent in reinforcements early."[1230]

Thus, the 26th Marines at Khe Sanh were allowed to fight the battle without reinforcement [other than the arrival of battalion 1/9 on 23 January and the 37th ARVN Ranger battalion]. Confidence placed in them by senior military staffs (to include a memo from the Joint Chiefs of Staff to President Johnson that Khe Sanh could be held) resisted falling into the traps of ambushes that the North Vietnamese Army had set up at Khe Sanh to lure (by attacking Khe Sanh) reinforcements into the area in order that they could be annihilated. The massive reinforcements that had been anticipated did not materialize until early April, by which time Tet was over and the NVA forces in the Khe Sanh area had been rendered combat-ineffective due to massive B-52 strikes.]

22 JANUARY 1968

COTTRELL, LCPL Thomas Lee	B/1/26
JOHNSON, CPL Howard Leon	Hq26Mar
SAXTON, LCPL Gary Lee	Hq26Mar
WICKLIFFE, HM3 Robert Logan	H&S/3/26

During the day, KSCB and its outposts received 50 rounds of 122mm rocket, 5 rounds 120mm mortar, and 27 rounds 82mm mortar, killing 4 Marines and wounding 12 (6 evacuated). CPL Johnson was killed by an incoming round that landed just outside the regimental COC at 1000H.

At 1340H, Hill 881-South received five rounds of 120mm mortar fire killing HM3 Wickliffe, a Naval Reservist from Louisiana, who was killed in the LZ while assisting in the evacuation of a casualty.[1231] **PFC Daniel G. Allen (H&S/3/26) recalls that Doc Wickliffe had lanced a boil on his back "because we couldn't bathe or we couldn't clean ourselves because we didn't have any water up on the hill.. I asked him where he was from, and of course he heard my accent. He told me he's from Louisiana. I couldn't believe it!"**[1232]

Cpl Walter B. Nickerson recalls the circumstances of LCPL Gary Lee Saxton's death. He, LCPL Saxton, and LCPL Murphy, has been on Hill 881-South prior to the siege. On 20 January, when INDIA Company patrolled to Hill 881-North, Captain Dabney asked Nickerson if he could provide his team members not actually on radio watch to help man the perimeter. The 106mm recoilless rifle crew, located just below his bunker, was moving to the north side of the hill to provide direct fire support. "Gary [Saxton] and I spent the day humping and loading ammo for the 106 crews.. Gary and I were making our way over the hill past the LZ to help the 106 guys move their guns back to the south side. A CH-34 was coming into the LZ and I told Gary 'Why don't you go up there and give them a hand and I'll meet you at the gun.' For the past 33 years, I've asked myself why I did that. Why did I send him? Why didn't I go too? You know the drill. Anyway the LZ took two, just two, 120mm mortar

[1231] 26Mar 221235Z/Jan68, Opn SCOTLAND SITREP #331; Maj Walter L. Whitesides letter of May, 1989. Originally 4 KIA were reported [3rd MarDiv COC 221720H/Jan68, Resume of Telephone Call to III MAF COC in III MAF COC Journal and File #199].

[1232] Conversation with Daniel G. Allen, 25 October 1990.

rounds blowing the CH-34 off the hill and killing and wounding many Marines. I ran to the top of the hill and bodies were everywhere. While looking for Gary I did what I could for one seriously wounded guy who had his jaw blown off. About this time one of the LTs was yelling for someone to get some smoke grenades as we had a CH-46 coming in and had to mark an alternate LZ. We had some in our bunker so I was running there, jumped a trench just above our generator pit and there was Gary. LCPL Murphy, another one of my team members was holding him. He looked like he was just unconscious but Murphy told me he thought he was dead. I told Murph to take care of him and headed for the bunker and got the smoke grenades. We picked a spot between the trench and the wire on the south side of the hill to mark the spot and brought the CH-46 in there. The bird would not land as the hill was too steep there so I stayed in front where the pilots could see me and guided them in and held them there until they loaded everyone on board. I kept watching for Murph Whalen to bring Gary down but they didn't. Gary was in fact already dead. When we looked him over all we could find was a hole about the size of your little finger right in the center of his chest, almost no blood. He always wore his flak jacket unzipped, as a lot of us did."[1233]

CPL Johnson was killed when an artillery round landed just outside the Tech Shop of the regimental Comm Section. Sgt David A. Gidlof recalls: "The communications area was right in the center of the base, right around the COC, and on the second day of the attack we were working in our Tech Shop. We had a lot of gear to get up [that] was destroyed during the attack the day before. We were trying to get this all fixed up, get the new circuits that we had to get up, and there was an artillery round landed right outside the Tech Shop and killed two people inside the Tech Shop."[1234]

LCPL Michael J. Archer (of the 26th Marines Comm Section) had been with CAC OSCAR in the District complex when it came under siege. Just before he returned to the combat base, the rocket had killed CPL Johnson and he learned that the previous night the Marines in the comm. section had played a poker game in the old bunker, a game that lasted well into the evening. Johnson got a full house of aces and eights and LCPL Morley R. Sweet, IV, (of the Message Center of Regiment) kibitzed him to fold because it was "The Dead Man's Hand," the same hand Wild Bill Hickock allegedly held when he was murdered. Johnson, gazing at the rather sizeable pot of $2.00, chose to ignore his buddy's advice, and the next day he was killed. "There was not a Marine in that company.. who would doubt that playing that poker hand had as much to do with his death as the rocket."[1235]

[From Diary of Chaplain Ray W. Stubbe for this date: The regiment is located in the area of the combat base that Chaplain Walt Driscoll, the Roman Catholic Chaplain here, calls 'the downtown.' It is really our own 'Street Without Joy.' Actually it is a street with a deep, ominous and foreboding fear that pervades the place and which one immediately feels upon entering the area. It is the center of focus of enemy rounds. The enemy FOs on the ridge overlooking the combat base evidently direct strikes in an attempt to knock out the nerve center for the entire area. It is not a good place to be. Just a few feet north is the recon area. The row of plywood hardbacks in the recon area is completely demolished, including the base PX and Post Office. One of the men along the lines asked me whether the PX were open. 'Why yes,' I exclaimed with a smile, 'It's completely open!' This 'downtown' is ominously devoid of all people, except for an occasional man nervously running from one place to another. Flechettes scatter the ground. The men in the S-1/S-4 regiment bunker are digging in the dirt deck within their bunker in order to build a bunker within a bunker. Everything proclaims a past that foretells the future.]

[Also on 22 January: Co E/2/26 (radio call-sign HASTY FOOT ECHO) moved by foot and occupied Hill 861-Alfa after traveling all day from a patrol north of Hill 558, and without any prior prep; positions at 861-A were unprepared. In a FLASH priority message, CG, III MAF stated: "Situation Khe Sanh requires immediate rein[forcement] by one battalion. I desire to deploy 1/9 from Camp Evans to Khe Sanh."[1236] At about 1700H, 22 January 1968, battalion 1/9 (Radio call-sign: GARDEN VALLEY) arrived on KSCB with Co "C" and the rear command group arriving 1500H, 23 January. Eventually the battalion occupied a position southwest of the combat base, near the tiny drop zone and near FOB-3's perimeter, a position which had been the quarry from which basalt rock was obtained to refurbish the airstrip. Counter-mortar radar arrives.

Basically the total Vietnamese population in the area was evacuated from Khe Sanh Combat Base on aircraft which brought in munitions to re-stock the dangerously low supplies on hand expended in boxing in recon team NURSE, providing artillery support for Hill 861 and Khe Sanh village, and destroyed in the explosion of the main ammo dump. Rather than return empty, the planes were

loaded with the Vietnamese. By mid-afternoon on 23 January, 1,156 refugees had been evacuated from Khe Sanh to refugee centers at DaNang and Phu Bai.[1237] *The I Corps Commander, General Xuan Lam, expressly prohibited evacuation of Bru Montagnards.*[1238] *He supposedly declared that there was no place in Vietnam for Montagnards. Neither did the NVA permit their departure. In early February, 2,000 to 3,000 attempted to migrate by foot to Ca Lu and were intercepted by the NVA at XD852399 and turned back.*[1239] *The total civilian population of the area was 10,195 civilians according to a census of 31 Dec 1967.*[1240] *The Bronze Star Medal Citation for Captain Henry Lebaron Preston (S-5, Civil Affairs, of 26th Marines) indicates a population of Huong Hoa District of 21,500 people. Since only about 7,000 made it to the refugee center at Mai Loc, south of Cam Lo, following the siege battle (by October, 1968)*[1241] *and since many of the Bru that made it to the refugee center were those who had not resettled in the strategic hamlets near KSCB in 1962 but had opted to remain in distant hills, it may safely be conjectured that at least 5,000 Bru perished during the first three months of 1968 at Khe Sanh during the battle. "Behold, the Lord maketh the earth empty and maketh it waste, and turneth it upside down, and scattereth abroad the inhabitants thereof...The earth shall be utterly emptied, and clean despoiled." (Isa 24.1, 3).*]

CASTILLO, CPL George Ralph	**L/3/26**
GOODMAN, PFC Kenneth Virgil	**K/3/26**
KENT, CPL Daniel Wilder	**B/3rd Tk**
MILLER, HN Charles Wayne	**B/3rd Recon**
PENNETTI, LCPL Francis	**K/3/26**
POPOWITZ, LCPL Gregory Francis	**B/3rd Recon**
ROSA, LCPL Juan Antonio	**B/3rd Recon**
SCRIBNER, LCPL Gary David	**B/3rd Recon**

Today, a C-123 Loadmaster landed on Khe Sanh Combat Base with pallets of 155mm artillery ammunition, "..and then .. four large wooden crates addressed to 'Fifth Graves Registration Team, Khesanh.' The crates contained 4,000 pounds of 'body bags'—rubberized, zipped sacks for transporting the dead."[1242]

At 1324H, Co. K/3/26 on Hill 861 received 2 rounds of 82mm mortar from XD 801446.[1243] **The official SITREP, however, records no KIA from this, the only reported incoming for the hill on this date. Cpl Cecil R. Young recalls the death of LCPL Pennetti: "He was a rocket team leader, under my squad at the time he died. His whole team got it. In fact, Pennetti's brains was on the back of the bunker. There was all four of them there in a group, and I come up and down through there several times, and I kept telling Pennetti to break it up, a RPG was going to come in. 'You know, Pennetti, the RPG's going to come in and kill every damn one of you.' I took one step. The trench turned, and when I turned, the RPG got them."**[1244]

According to (then PFC) Boysie Price (H&S/3/26, CPL George Castillo's eyes were blood red when he was awakened by Price on the morning of 24 January. Castillo had set a case of hand grenades five to six inches from his back and was leaning back towards the case of grenades when a rocket hit the foxhole and detonated the grenades, killing Castillo, wounding LCPL John N. Prather, and throwing Price against the trench call, knocking him out.[1245] **Price recalls that Castillo related how he pleaded with his father, then a Master Sergeant in the US Air Force saying, "Dad, you could have done something else for a living," "meaning his father forced him into military service, or that he was walking in his father's footsteps."**[1246]

Between 1730H and 1800H, Khe Sanh Combat Base received approximately 150 rounds of 100mm or larger artillery.[1247] **One of these rounds struck a bunker in the BRAVO Company, 3rd Reconnaissance Bn, area containing 22 men, killing four. "I remember pulling a fellow by**

the name of Painter out. He was covered with blood from the top of his head to the bottom of his feet, and he was in bad shape. But poor Scribner, of them, well, Doc Miller was in bad shape also. But Scribner looked like the rocket went off right in his lap. There was nothing left of him below the knee, nothing left of him above the shoulder, and the entire front of his body was gone. He was married to an airline stewardess."[1248] When PFC Robert C. Painter threw up his arms as he was being pulled out, Sergeant Delbert G. Weidler, the Company Gunny, was startled and jumped back. "You're alive!"[1249] "Gunny was the one who pulled my ass out of the bunker. He was the very first face I saw, and I scarred him. I looked up and he was the first face I saw. He's looking down at me, and I went, 'Gunny!' And I reached for him, and it startled him. He thought I was a dead man."[1250] Painter's back was peppered with innumerable, black spots where small pieces of shrapnel burned into it, along with his legs.

Robert C. Painter recalls the sequence of events beginning with recon team DOCKLEAF out on patrol as KSCB was hit.

> "We were trying to get water for ourselves because they wanted us left out there. We were spotting artillery. We got the word on the 20th [of January], 'We need you guys to stay.' At that point we had already been four days without food and two days without water. And then they extended us to the 20th and then the 23rd we were hallucinating for lack of water. We crawled on our hands and knees everywhere we went. We didn't dare stand up in the daylight. When the sun went down, we were standing up and trying to spot gun flashes and rocket flashes and trying to direct. We had two different fire missions going on at once.
>
> "[Eventually] they just sent the choppers out because they said we were hallucinating. We seen the bad guys everywhere. I was second point, because I was the grenadier. Rick Noyes was point. And they pulled us in on the 23rd and we spent the night down in that big Air Force bunker where the dentists were. We spent the night down there, and they kept hydrating us. They were feeding us water loaded with electrolytes and they sent us back on light duty. Gunny says, 'There ain't no damn light duty! You gotta dig holes!' So the morning of the 24th we were digging holes and eating C-rats. It was real strange day. All day long we were digging, and then they started hammering at us. And we're diving into different bunkers along the runway there. That whole day I just had this feeling, 'Man, I'm going to get it!'
>
> "And they went, 'Painter, how come you ain't jumping? [at the incoming] And I go, 'I don't know, I guess I'm just used to it by now.' I mean, there ain't nothing you can do about it. All we can do is just lay here in the hole and wait!
>
> "It was towards the end of the day. We secured from work detail, and I was walking back with a bunch of stuff, and they started right in on us again. I'm caught out in the open! And everywhere I turn, something's going off—over there, something's going off over here. And Scribner yells, 'Hey Painter! Get your ass over here! And I ran over and got past Scribner, and I went—three, four more guys into the bunker. Now Scribner was at the far end, close to the runway. And I went down a little bit. And I said, 'Wait a second. I got something here for us.' Aha! And I had my little stash up there. And we fired one up. We were laughing and giggling. And the stuff was hitting around us, and we're going: Whew! That was close! [*pause*] And [*pause*] we heard a loud THUMP! And zzzzt! [*pause*]. That was a delayed fuse in that. It came in the door, hit the deck, went zzzzzt! At that same time Scribner goes, Shit! [*very loud*]. And then it was like a fly—you know how that fly feels or that mosquito that you slap between your hands? Everything went *black*. It just went black. And I—heard it go off. I actually heard the blast! So for me, the one that got me, I heard it; I heard it go off. Knocked my ass right out—knocked me cold with the concussion. Then some time passed. I have no idea, and I had a conscious thought: So this is what it's like to be dead? It's not so bad. And then, slowly, sounds started coming to my ears—screaming. And I realized it was me doing the screaming. I was screaming real loud. And I stopped, and said to myself, I'm screaming! I'm alive! And at that point, then I actually stopped. I was pushed down, the roofing, sandbags, just sandwiched me down. I was ninety degrees to the blast, and I was facing the blast when it went off. And it turned, it spun me.
>
> "Some of the guys started settling down. I could hear someone coughing, 'I can't breathe! I can't breathe!' Later on I found out it was Ken Martin. He was alone, full of cordite, on the far end. His ears were gone. My ears were bleeding, too. I think I was bleeding from my eyes, my ears. Then somebody said, 'They're coming to get us; they're going to get us out of here.
>
> "They evacuated me the next morning. I spent the night in Charlie Med. I don't know whose care I was under, but I remember waking up during the night—O, the pain! In my back and my neck! Just constantly ached—for months after that...
>
> "As they were pulling me out, they go, 'Damn, Painter!' And I go, 'All these months in the bush.

[1248] Conversation with Kevin Macaulay, 22 August 1984.
[1249] Conversations with Robert C. Painter, 01 February 1992 and 20 April 1993.
[1250] Conversation with Robert C. Painter, 26 August 1990.

43 days left to do in country, and they had to bang my ass in the hole!'...

"Scribner was one of my best friends. I didn't have a whole lot of real, close friends."[1251]

The Recon company Top recalls: "As soon as that rocket hit there we rushed over there and started pulling them out. There was one of the men had his scalp—was all down, hanging over his face. He really looked bad. He was still alive. So we got him in a stretcher and I helped with another man, took him over to the aid station, and I didn't see him any more. Months later, Corporal Corsetti—we got to talking about that and he started talking about one of his friends that was hit pretty bad. It was this same man... Doc Miller: he had been hit before. He had been out on patrol and they got pinned down. They called in close air support, and he got hit by one of our own planes, strafing the area close to them, in December [1967],[1252]

Kevin Macaulay recalls:

"When Rosa and Popowitz and Miller and Scribner were killed, I went over and I started working on the bunker after it was hit; we were going to destroy the bunker because nobody wanted to stay in it. And I think we found Popowitz' body and part of his boot and part of his foot was still inside. And we found Scribner's helmet with part of his head still inside. And I started to shake, and he [1/Lt Carl J. Schlack, the XO of the recon company] grabbed me by the stock and swivel and pulled me over and said, 'I don't want you to go near there again, you can't handle it.' I said, 'Pappy, I can handle it; I've got to handle it. If I don't handle it I won't be able to handle anything.' And he respected me and said, 'All right, Just go over and sit by the side. There's no reason why you have to wade about through the gore of battle.' He said, 'You just sit there for awhile and reflect on these four men and think about these four men.' And he snapped me out of it...

"Miller—he had been wounded out on patrol two weeks before Christmas or a week before Christmas in '67, and he went down, I guess, to DaNang, and they operated on him there. He wasn't that seriously wounded; he took a round through the scrotum—and he came back about a week before we were hit in January..

"We had so little over there, but the little that we had we shared with everybody. We were rough son-of-bitches; I remember that. A fellow would show us a picture of his wife and we'd look at it and say, 'Boy, is she a dog, how did you ever marry such a beast?'... We would joke back and forth, but the joking meant so much to us. It would take the edge off. Sitting in the bunkers, listening to the rounds impact—maybe three, four, maybe five minutes before a bunker took a direct hit we had four guys killed and—we were terrified, but the way we showed our terror: we would joke back and forth: 'O listen to that one, that sounded pretty! Listen to that one coming in!' And then somebody would say that a bunker got hit. And we'd run over, and all the joking would stop, and we'd rip the bunker that had taken us five days to build in 30 seconds to get out the guys who were inside...

"We shared, and I live better because we shared."[1253]

Gary Scribner "..was the type of guy that could lighten things up and make you laugh."[1254] Richard Noyes recalls: "..the second time I went out on patrol, I still had stateside boots, and they were terrible. I mean they got wet and they stayed wet and they were very uncomfortable. And a guy that I had known from the States was there; his name was Scribner. He gave me a pair of boots that he had, that were like brand-new, jungle boots. And I became more aware of the fact that you had to rely on your friends than the Marine Corps or the 'system.' The supply system didn't work, but your friends took care of friends."[1255] Gary was ten when his father died when a building fell on him. Gary liked sports and history and told his mother that he planned to go to college. As he held his infant nephew, he said, "Mom, the only thing I want out of life is to come home, go to school, have a family, and hold a little baby like this."[1256]

"One of the guys trying to dig the wounded Marines out of the bunker said later that all they found of Scribner was his helmet with part of his skull still inside."[1257]

"There were six dead bodies [in Graves Registration], four from the collapsed bunker at recon last afternoon. I went from body bag to body bag, looking at the tags, praying. The second tag—I didn't believe it—Popowitz! I had just talked with him yesterday. I was with a group and asked, 'Where's Popowitz?' 'Here,' he said; he was standing right in front of me! I examined his head after partly unzipping the bag—a small hole in his cheek, about ½-inch diameter. I wept. I had baptized him the morning of 23 December 1967 after his recon team, Dockleaf, had been shot out four times and his face was all camouflaged. Now I baptized him with my tears. I

still had a few left. He was only 18, born 30 January 1949."[1258]

Kevin Macaulay and Gregory Popowitz raced for cover as the rockets hit. "Greg was in front of me and ran to one bunker that was just about filled with Marines. He directed me to another bunker about 20 feet away. As I ran to it, a rocket went through the door of the bunker Greg had just entered. He, Gary Scribner, Juan Rosa, and Doc Miller were killed instantly."[1259]

CPL Rick Noyes, also in the struck bunker, recalls: "We had all Ijust sat down to eat our daily C-rations and we started receiving incoming mortars in the Recon area. They landed one right after the other and just kept coming closer to us. Since they were so close and coming so fast, about 20 of us dove into a bunker. This bunker is the one I usually slept in and had a hole at each end to crawl into then about a 30-foot trench covered in sandbags. We were packed in really tight as the incoming mortars kept some of the guys, including Greg, from going to his usual bunker. Greg was sitting right nexdt to one of the holes at one end of this bunker and a rocket came right in the hole. The explosion instantly killed Greg and three other guys and wounded all the rest of us. Everyone was torn up from shrapnel and the concussion caused us to bleed out of our ears and noses. The other guys from B Company came over immediately and dug us out, one at a time, but there was no hope for Greg and the other 3 guys as the explosion was something you just couldn't imagine."[1260]

"Last night Velardi, Noyes, and others came to my bunker at C Med, for safety to wait in case we had another barrage of incoming. Five recon Marines in all. Then an Air Force LtCol who had minor shrapnel in his lower buttocks hobbled into my bunker. He removed his flak jacket and we all immediately noticed a tiny piece of shrapnel just below the neck, in the middle, where his spine was. Then a postal clerk came, shell-shocked. These seven, in addition to Dr. King who had just moved in, the corpsman who has been staying with me the last several nights ("Goober" Heath) and myself. It is now 2125H as I write this in my diary. No one talks; everyone just sits, silent. Five of these men are sitting side by side on my metal frame rack in my bunker. I'm curled on top of my field desk, which will be my bed for the night. Rick Noyes dabs his head every now and then with a roll of toilet paper, causing a pile of crumbled white paper died red in blood to accumulate on the deck."[1261]

Noyes, who wrote on his helmet, "God walks with me,"[1262] had always gone in the bunker at one particular end and looked out. "But there was so much coming in. It was coming in so fast, I didn't have time to go down the far end. I just jumped down by the nearest hole. And gosh, we'd only been sitting in there maybe a few minutes, and a rocket came right in the opening where I had usually sat. It just came right in. I mean, it should have killed—that's where I should have been. That's where I'd always been before. The worse thing I remember—I remember sitting there and the guys were screaming, and I'm covered with meat! It was just like somebody had thrown hamburger on you, and it was pieces of these guys! And I went to your place. You said I kept dabbing my head; it was pieces of these people. Somebody came in and got us out and Ulysses Murray—he was with me and Lieutenant Yeary and Rich Healy got killed. They couldn't get him out of the bunker. He wouldn't come out. They came and said, 'We can't get Murray out of the bunker, would you talk to him?' So I had to go back in there and he was just sitting there in a little ball, holding on to his knees. All I could see was pieces of people. It was a nightmare down in there. It was just like a solid wall where it had caved in. Everything had collapsed, and there was just pieces of people everywhere. It was just unbelievable!"[1263]

> "Dear Ray: Here is my diary recollection of the day the bunker was hit (1/24/68)... The innocence of my youth died as quickly as did Scribner, Popowitz, Rosa and Doc Miller... The bunker's destruction marked the beginning of the deaths in Bravo Recon on the base. Those deaths took the heart out of us. We pulled ourselves into a shell that some of us still haven't broken out of... I am now Kevin Macaulay but parts of me are Gary Scribner, Greg Popowitz, Doc Miller, Junior Reather. In my accomplishments, I accomplish things for them. They look over my shoulder as I experience joy and happiness, and pain and sorrow."[1264]

[1264] Letter from Kevin Macaulay, 5 October 1989

Where's the next bunker? Please God, not me, not me. Where's the bunker?

"Conversation: Over here, Mac, over here, get in here, buddy...

"Thoughts: Dive, you silly bastard, you're not going to make it. Shit, that stuff burns, goddam shrapnel is still hot. God, thank you for...

"Conversation: CORPSMAN, CORPSMAN, SOMEBODY GET A @UCKING CORPSMAN!!! MAC, GO TELL THE SKIPPER A BUNKER'S BEEN HIT. GUYS #UCKED UP BAD; BUNKER'S COLLAPSED.

"Thoughts: I knew those rockets were hitting in the company area. I hope Junior wasn't in that bunker.

"Conversation: Skipper, a bunker's been hit. I don't know how many guys were hit, but Sgt. Herb said some of the guys are &ucked up bad. I'll send a runner over to COC as soon as I find out.

"Thoughts: O, sweet Jesus, where the @uck is his head...and his legs...and his arms? Who is it? Scribner? How can you tell? The rocket must have gone off in his lap. There's nothing left of him. God, what a horrible smell—burnt flesh.

"Conversation: Rip the top of this bunker, this end is collapsed. O shit, here's another one.

"Thoughts: It's Doc Miller and he's blown in half—poor little guy, he don't even belong here. Another one, it's Popowitz. Not him too...Who's that over there? Rosa? Shit, man, there's so much blood.

"Conversation: Hey, watch where you're throwing that stuff, this @ucking boot still has got a foot in it. Who do we put it with, Scribner or Rosa? Maybe it belongs to Popowitz. How the @uck should I know? Here's Scribner's helmet. Part of his head and his brains are still in it. I've got them all over me.

"Thoughts: I think I'm going to be sick. Help me hold it in, there's still people trapped in there. Be sick later on.... Take it easy, Painter, the Docs'll help you....

"Conversation: Give me a hand with this body bag, Little Rich [Cpl Lawrence D. Richards], we've got to get these bodies over to Graves. Come on, Rich, it's the last thing that we can do for our friends. Lift him gently now.

"Thoughts: God, what a place to work, Graves. How in the world do these guys keep their sanity. Must be fifteen twenty bodies in here.. Let me get out of this place.....

"Thoughts:... Sweet Jesus, I've got Scribner's brains under my fingernails...

"Conversation: Hey, Big Rich [Cpl Scott W. Richardson], sit down and take a load off. What's the report on the wounded? How's Painter?.... I almost jumped into that bunker myself but it was full. I pushed a guy in and ran to the next one. Oh my God, the guy that I pushed in was Scribner. What if he was heading someplace else? I was diving for the bunker when I bumped into Scrib. He was trying to get Doc Miller moving. Little guy was frozen in his tracks. Rich, why them and not me? It don't make no sense...

"Thoughts: Shit, four guys dead and eighteen wounded.... Sure wish I could be back in Niagara now. I'd be the best student the place had ever seen. I'd look forward to mandatory study. Be nice to be able to read a book again. After study, I'd go over to the Student Center for a soda and a hamburger. Just sit there and watch all the girls heading off to classes or coming in to have lunch. I'd get into a conversation about this place and what the hell we are doing here. Pretty soon I'd notice everyone staring at my hands and my face, what with all the blood that is all over me. Yeah, mostly at my hands because I've got Scribner's brains under my fingernails. God, am I ever going to be able to get clean? How much washing will it take to wash the blood and body parts off? How am I going to clean the blood and gore out of my mind?.... Up until this past week, I thought that I would live forever. I was Mac Marine, the terror from Recon, the best radio man in the battalion, shit, in the whole Marine Corps. I was invincible. Now I'm not so sure.... I feel so old. I don't know whether or not I'm going to get much older.. Scribner, Popowitz, Rosa and Doc Miller. All their hopes and dreams, gone in a split second. What time is it now? Almost 2200. I'm exhausted—just wish I had someplace to go to get all of this blood off me. Man shouldn't have to sleep covered with his friends' blood. Gotta get some sleep, gotta rest, how knows what the hell tomorrow will bring. Jesus, let me sleep!"[1265]

The mother of Gregory Popowitz was particularly devastated: she had lost her husband in World War II, and, when she had become incapable of raising her sons, still mourning the loss of her husband, Gregory, at the age of 16, decided to enlist in the Marine Corps to escape a chaotic household. Legal guardianship had been turned over to Gregory's grandmother due to the home situation. Gregory's mother protested: "No way! That's how your father got killed," and so on. His grandmother signed the papers for a minor to enlist, and his mother "went out of her mind." When his remains arrived, she refused to permit the casket to be opened, and the grandmother "insisted to her last breath, that Greg made it out of the war, deserted, was safe, but couldn't contact our family for fear of prosecution. I never bought that, but there was always that lingering doubt handing around our

[1265] Kevin Macaulay, Diary entry for 24 January 1968.

family. Since nobody did see his remains, she said, 'It's probably a box full of sandbags.' Now, with the emails those in his unit have been sending me, we don't have to wonder any more."[1266]

[*Portending an ominous situation in store for Lang Vei (and Khe Sanh generally), at 0700H, 24 January 1968, the 1st Battalion, 24th Regiment, 304th Division, augmented by one company of amphibious tanks (8 PT-76s) attacked and overran the 33rd Royal Laotian Elephant Battalion (FAR BV-33) at the abandoned airstrip of Ban Houei Sane (XD625379).*[1267] *According to the NVA history (which refers to the position as "Houei San"), the 33rd BV consisted of 6 infantry companies and a number of civilian defense platoons, totaling 730 with defenses organized at 13 large and small locations and the command headquarters at Ta May. "The enemy had organized this defensive position in order to tie-off Highway 9 and block our transportation on it. In order to carry out the next mission of the campaign we had to wipe out the enemy here and open a road so that the engineers and technical support units could move in and prepare and attack Lang Vay and Khe Sanh."*[1268] *BV-33 (known as "Elephant") had occupied its position for over seven years with no serious effort to dislodge it.*[1269] *It "..had controlled the Ban Houei Sane area and blocked the use of Route 9 to the Communists since mid-1961."*[1270]

A USAF FAC reported 5 NVA tanks at XD653374,[1271] *as well as possible MIG aircraft 10-15 miles west of Khe Sanh.*[1272]

The refugee situation at Lang Vei now became a matter of serious concern. The 519 military and 2270 Lao civilians of BV33 crowded into the Lang Vei area swelling the total civilian refugee population there to 6,000. Approximately one out of four refugees were children. The refugees reported that they were warned by the enemy force to evacuate the area or be killed, that the VC would annihilate Camp Lang Vei. An unreported source stated a Three Star General flag was flying outside the Khe Sanh District Headquarters.[1273]]

25 JANUARY 1968

FEIT, HN Cristian Franz III	**H&S/3/26**
HEIFNER, PFC Edward William	**F/2/26**

Company F/2/26, "HASTY FOOT FOXTROT," departed on 24 Jan 1968 on a company-minus patrol to an area known as Hill 516, approximately 1800 meters northwest of Hill 558 (the 2/26 Bn position) with the mission: to determine whether or not there were any enemy forces located in the high ground at XD804458 and XD799460.[1274] The battalion S-2, 1/Lt Edwin R. Matthews, suspected that is was from this position that 2/26 had been mortared the morning of 23 January. Furthermore, the area had possible military significance as a perfect assembly area and attack position for an assault on Hill 861 and possibly 881-South; it could protect rocket positions behind it in the vicinity of Hill 516 and west to Hill 881-North; both the 2/26 CP and Hill 861 were within 60mm and 81/82mm mortar range of this position; and KSCB was within rocket range of this position.[1275] Co F was briefed that if contact were made with enemy units, they were to fall back and employ supporting arms to destroy the enemy position prior to continued movement against the objective.

"Our platoon [F-3] in which I was the machinegun squad leader, was given Hill 516 as our objective. We left our perimeter during the morning. We ran into sniper fire... I took over the point. After rounding the bend, I saw the back of a Marine and was relieved to make contact again. About half-way up the hill we were hit with small arms fire from several bunkers. The point man was hit.. and was down in front. The point fire team got on line and called for the gun (M-60). My first gun team was ready except for the gunner; he was in shock and could not move. I ran down to get the gun. Me and the assistant gunner got on line with the fire team. Our target was only the muzzle flashes from the bunkers. The NVA threw several grenades down at us. There was plenty of confusion and several of our men

were down."[1276] Contact had been made with an estimated NVA company at XD800460 and XD804458. F-3 was upon the bunkers before they were aware of them. The bunkers were well-camouflaged and the enemy force employed many automatic weapons and exercised good fire discipline. After about two hours of prep fires, Co F resumed its movement toward the top of the objective.[1277] Co F withdrew to permit 81mm mortars, artillery, fixed wing air, and 106s to strike the area for three more hours.

On 25 January, Co F departed for the objective at XD804458 to determine if any enemy remained. The Marines proceeded very cautiously, and at 1015H spotted two figures. The patrol continued forward under cover of supporting arms and just prior to reaching the topographical crest of the hill, came under heavy small arms fire, grenades, and mortars fired from the reverse (north) slope of the hill. The enemy soldiers, wearing helmets and flak jackets, made identification of friend and foe difficult for the jet pilots providing close air support. The NVA force was determined to hold and defend this hill. At 1700H, with darkness approaching, the Marines were ordered to disengage and return to Hill 558. The action had cost the lives of 17 NVA soldiers confirmed killed, and the death of PFC Edward Heifner, ten Marines wounded (5 medevaced, 5 minor).[1278]

PFC Heifner had been shot in his shoulder, got up, was shot in his leg, again got up, and was then shot in his chest and died.[1279] Heifner, a fire-team leader, was "..a German kid from Ohio, a super nice guy... When they opened up, we all hit the ground, and he just wasn't quick enough. Four or five rounds hit [him] real quick, walked right down his chest and throat. I was watching him. It was horrifying. I was 18, and this was the first realization of—you're going to die."[1280] "He always took more of a load on himself. He was a nice guy and he had a good sense of humor. From walking through all this elephant grass and stuff, the crotch of his pants had been torn, and everything was just handing out. We were carrying supplies to 558 a few days after we had been there, and he had put leaves to cover that! He had a good sense of humor."[1281]

26 JANUARY 1968

DEARING, PFC Jerry Wayne	**H&S/3/26**
DENNING, PFC Dwight Thomas	**A/1/26**

A-2 was patrolling the area around Hill 861 to secure the terrain and make contact with any NVA present. At approximately 0900H, the patrol made contact and the fire was intense.[1282] A-2 was making slow progress due to the enemy fire with both A-2 and the NVA force at XD800445. A-2 pulled back and the AO called in artillery after which the patrol returned to the area of contact and came under intense automatic weapons fire.[1283] PFC Dwight Denning, a grenadier [M-79 man] with Third Squad of A-2 fired rounds into the entrance of one of three bunkers from which approximately 10-15 NVA were firing.[1284] He rushed to the enemy fusillade, firing two of his M-79 rounds to silence the enemy. The bunkered NVA force now directed its fury onto the rushing PFC Denning who was drawing fire to himself, enabling the rest of his unit to move forward.[1285] Standing to fire his rounds, he was struck by the enemy fire and fell mortally wounded. "Inspired by his selfless devotion to duty at great personal risk, his companions aggressively continued their assault and quickly destroyed the enemy force."[1286]

During a re-supply of Hill 881-South yesterday, at 251400H, a CH-46 helicopter was damaged and forced to land. At 261030H, the helicopter was lifted out safely, but the recovery helicopter received sniper fire from XD775445 and Hill 881-South received two 82mm mortar rounds from XD782443. The suspected mortar position was taken under fire with unknown results and the sniper, after taken under fire by .50 caliber and M-60 machinegun, was seen falling from a tree.[1287] An evacuated wounded Marine, PFC Jerry Wayne Dearing, was brought into the newly-constructed OR [operating room] bunker of C-Med. Half his left forearm and all of his right hand were missing; he had multiple holes all over his head, and died from his wounds.[1288]

[Although Gen Tompkins had restricted patrolling, Col. Lownds asked FOB-3 whether they might be willing to do some local patrolling. As a result, Maj Lucius Campbell, the CO of FOB-3, dispatched HF [Hatchett Force] DENVER to determine the status of civilians in Khe Sanh village and whether it was occupied by the NVA. Captain "Rip" Van Winckle led the patrol (six other Americans and 24 Bru) on the south side of Route 9 to the east side of the village until they were approximately

150 meters east of the MACV compound.[1289] *At 1400H, a patrol from FOB-3 to Khe Sanh village received heavy automatic and small arms fire from an estimated platoon. There are no civilians remaining in the area.*[1290] *Captain Lee Dunlap, the OinC of Operational Detachment 221 (of which HF DENVER was a part), rushed to the 26th Marines COC to request artillery support for the engaged patrol in which several Bru had been killed, the medic [Crone] shot in the leg, and a Weapons Sergeant [Fusco]shot—had an AK-47 bullet sticking out in the bump behind his ear. There were, quite obviously, no "friendly civilians" in Khe Sanh town! A Marine Major replied, "I can't fire any artillery in there." [Note: many, many rounds of artillery had already been fired into Khe Sanh ville in support of the District/CAC OSCAR fight of 21/22 January]. "My people are under fire!" exclaimed the astonished Dunlap. "I'm not going to help," replied the Major. Dunlap walked over to the USAF TIGER-HOUND shop, and within a few minutes Dunlap had declared a "PRAIRIE FIRE ALERT" [the SOG call for the highest priority for air in Vietnam] and within minutes "..had more jets than I could handle and they went down there and just blew the hell out of the place." A Marine FAC reported all that was happening to the Marine COC and Dunlap was summoned to report ASAP. He expected to be met by Col Lownds, ripped, and would say, "Well, Sir, I just used my best judgment." Instead, he encountered the same Major—Col Lownds was not yet aware of what had happened. The Major declared, "That was dereliction of duty. Consider yourself under arrest!" Dunlap replied, "Well, Sir, fine, we will sort this thing out later, but now I have to get my men out." The Marine Major, livid, shouted, "Marine! Restrain that man!" The Major's voice had become so loud as to arouse the temporarily sleeping Lownds. "What's going on?" asked the Colonel. When all was explained, Lownds said, "Captain, check on your men and I'll take care of this."*[1291] *SP5 John Frescura, directing his men to fighting positions along the road as they were savagely attacked, shielded a wounded soldier with his own body, treated his wounds and then aided another casualty, sprinting through a hail of bullets and then maneuvered the patrol to break contact as he remained behind to deliver suppressive fire. He moved into the open and silenced NVA snipers from positions around the LZ.*[1292] *Medic, SFC Robert L. Scully, leaped 15 feet from a rescuing helicopter which could not land due to intense small arms fire directed at it, immediately moved to the wounded and began to aid them. At times, he shielded them with his own body. He treated all the wounded, moved them to a nearby building and returned to the LZ to guide-in the rescuing helicopters which successfully evacuated 6 badly wounded soldiers.*[1293] *Grenville Sutcliffe jokingly recalls that one of the reasons he specifically went on this patrol to Khe Sanh village was to retrieve some bagpipes left there by PFC Taylor of the Marine CAC OSCAR Platoon O-2;*[1294] *Taylor's Scottish flag had been rescued and was atop one of the main bunkers at the FOB until it became a NVA aiming stake, but his bagpipes had been left in the ville. (Actually, they had been retrieved!). The pandemonium of the tense withdrawal included going house to house to destroy rice and other things beneficial to the NVA who started returning in heavy numbers. F-4s were dropping cluster bombs; green NVA tracers ripped through the air. NVA artillery began to pound the area. After returning to FOB-3, an intercepted NVA radio transmission indicated they were concerned about holding the village and were dispatching a larger force to reinforce. Rip commented, "They're welcome to it. My mission was to confirm they were there. They are."]*

27 JANUARY 1968

[At 270010H there were 30 large secondary explosions at XD843385 (500 meters directly north of the former CAP O-2 position) and at XD847369 (about 1000 meters directly south of Khe Sanh Village). The latter was reported to be an artillery headquarters.[1295]

UZZELL, PVT Frank Nelson	D/1/26
WEED, CPL Donald Edmond	B/1/9

During the period 1200H to 1700H, the KSCB and surrounding hill positions received medium to heavy incoming mortar fire—120mm, 60mm, and 82mm. Three of the incoming mortars were duds.[1296] **The incoming was particularly destructive in the area containing the 1/9 battalion command group and Companies B and D (located at XD830415) which received approximately 30 rounds of mixed artillery and rocket fire, 1300H – 1315H, killing three and wounding 14.**[1297] **"Most of those were in D Company area. They had had several days to dig in under cloud and fog cover but had not done**

enough. It was rough digging with those little e-tool shovels in hard red clay and rock, but it had to be done. We had to dig deep enough to allow movement in the trenches to have all heads below ground level while in a standingt position. That was the guidance. D Company was not to that point when we were hit and suffered from it. After the attack we had new reason to dig, dig, and dig more."[1298] "Joe Hunt was a 'lankey' Marine from Situate, Mass, a real 'easy to get along with kind of guy.' Don Weed was a 'laid back' southern Californian who carried around a picture of his '57 Chevy and was more than glad to tell anyone that would listen all about it. Mike Coleman was a nice kid from the Chicago area, very unselfish, caring, 'eager to please' Marine. Joe and Don joined us in July of '67, right after the July 2 battle that started Operation Buffalo. Mike came during our 'second time around at Con Thien (around October)."[1299]

Two 82mm mortar rounds exploded in the Co "B," 3rd Recon, area at 1430H,[1300] killing PFC Reather. "I saw him standing right in front of his bunker. He'd come up out of his bunker for a few minutes and he was standing right in the doorway. I happened to see him, and I turned around or something, and a mortar round went off, came in, and a piece went right into his windpipe. I remember that very well."[1301]

> "..I was no more than 15 to 20 feet from Reather when he was killed. I heard the shrapnel go past me and into him. We were in the company area. We were filling sandbags. And the day before, I was the company radioman and asked for Reather to come over to help me fill sandbags, to help with the bunker that I was staying in. It was a two-man bunker, old, concrete. I was sandbagging it to protect myself and the company gunnery sergeant, Delbert Weidler.
>
> "At the time Reather was over filling sandbags for his bunker. And we got into an argument that day. He says, 'What the heck am I filling sandbags to protect you, when I should be over there filling sandbags to protect myself.' But then we sat down. We had a good conversation. He told me about his wife and his daughter. Chewed the fat for awhile while we were filling sandbags.
>
> "The next day, Weidler, the gunny, came up to me. He says, 'You got to fill sandbags again.' I said, 'All right, let me have Reather again.' He said, 'No, no, Reather's going to fill for his own, and you're going to fill for your own.' I said, 'All right, fine.' There was no big deal."[1302]

JUNIOR
By Kevin Macaulay

Thoughts: ***Gotta get up, gotta fill more sand bags. Has it really been three days since the bunker got hit? It feels like a lifetime. This shelling is really getting me down. I think the gooks are just throwing some of these rounds in to demoralize us. I wish they would let us do something other than fill these sandbags. I'd even go on a working party today just to get out of the company area. It's starting to look like a garbage dump around here. All the god-damn tents are blown to shit. All my gear is gone from that last rocket attack yesterday afternoon. Shit, I've only got this one set of utilities left that I am wearing. I'll be pretty ripe soon.***

Spoken: ***Hey, Lt. Nosal, we get any mail yet? Didn't think so. The stuff that I brought up to the Post Office two days ago is still sitting there, Nothing in and nothing out. Hey, Lt. do you think that we'll be put on the lines with 1/9 today? Shit, yeah, I'd go. Anything is better than this place. Holy shit, that sounds like a mortar! Incoming, incoming!***

Thoughts: ***Those landed just the other side of the bunkers, where the guys are filling sandbags...***

Spoken: ***Hey, Purefoy, get over here, come here man, come here, stop running around. O shit, look at his fingers. They're all blown to shit. Corpsman! Lay down, Purefoy; I'll patch you up. Hey, Sgt. Weidler, throw me my first aid kit. No, he's not too bad, just lost the tips of his fingers. All of them! Both hands. OK, Purefoy, you can get over to the BAS by yourself, someone is calling for stretcher bearers.***

Thoughts: ***Oh, shit, more wounded, when the @uck is this shit going to stop? There's Doc Turner and he looks like he's hit. His knee is all blood. Who is he working on? That looks like—.***

Conversation: ***Junior? No! Please good Christ, don't let it be Junior! Hey, Doc, how is he? How bad is he hurt? He ain't breathing! O @uck, come on Junior, breathe, come on Buddy, you've gotta***

breathe! Get your goddamn hands offa me, I gotta help Junior, he's going home in a few weeks. Let me carry the stretcher. I'll get him over there. I'll carry him myself. Stop holding me back, you assholes, can't you see that I've gotta help Junior. I'm all right, I just gotta help Junior. OK, I've got this end of the stretcher. Come on, Doc, keep working on him. Where is he hit? I don't see any blood. Come on, let's get him to Charlie Med. BAS is closer? What do you mean, it don't make any difference? Come on, Preacher [Ernie Husted], *give me a hand. Move, let's go, the doctors will help him.*

Thoughts: *Come on, Junior, just hand on for a little while longer. Why does it seem so far? Hang on Junior, I'll take care of you, just hang on. OK, Junior, we're almost there. Just around the corner. Pretty soon they'll have you all patched up. Just a few more feet. Hang on, Junior, please hang on. Jesus, let him live! He's got a wife and a little girl back home, you've got to let him be able to go back there. I'm going to visit him when I get out of here. Please, God, please!*

Conversation: *Hey, Doc, we've got a wounded man here. He ain't breathing. Help him please. Doc, there ain't much blood, just a little bit on his forehead. Come on, Doc, please keep trying. No! Don't put him in the corner to die. He can't be hurt that bad. Doc, it was just a lousy mortar. Please, Doc, he's got a wife and a daughter at home who need him. He's got a mom and dad waiting for him. Doc! I need him! Shit, Junior, what did they do to you? Doc, let me stay a little while longer. I'll just sit with him until he's gone. I'll be good, Doc, you won't even know that I'm here.*

Thoughts: *O, Junior, what's going to happen to us? I can't think of this place without you. We've been together too long for me to leave you here alone. Let me hold your hand for a while. You taught me what I was supposed to do. I wouldn't have made it this far without you. You kept picking me up when I kept falling on my first patrol. You covered for me the night I fell asleep on the radio out in the bush. You came back for me when the gooks separated me from the team on that patrol in Laos. Junior, you saved my life too many times, and now I can't do anything for you except hold your hand and watch you die. Junior, you never gave me the chance to save you. Junior, you're beginning to turn cold already. This ain't the way that I figured it. I wanted to kick you in the ass as you got on the plane to the "world." Junior, talk to me. Say something. I can't hold back the tears any longer. I got too close to you, Junior, just like they say that we shouldn't. I never expected this. It don't make no sense. Junior, I've got to go now. They say that I'm in the way. I love you, Buddy. I can say it but you can't hear me. Goodbye, Junior. Our Father, who art in heaven, hallowed be thy name. Thy kingdom come. Thy will be done, on earth as it is in heaven. Give us this day our daily bread and forgive us our trespasses as we forgive those who trespass against us. Lead us not into temptation, and deliver us from evil. Amen.....*

Can't let anybody see me like this. I'm supposed to be a hard-assed Marine. Let me just get into my bunker. I'll be safe in my bunker—yeah, real safe, asshole, just as safe as Scribner and the other guys were. No safe place in Khe Sanh, no safe place at all. God, I'm so tired! Tired of all this shit. What time is it? Doesn't matter, anyway. OK, here's my little bunker...

What am I going to do now? I can't seem to think... I want to go home. I want to see my mom and dad again. I want to see Ann. I want to get married and have fourteen hundred kids... I want to see you again, Junior, but now I can't because of a lousy piss ant mortar....

Thoughts: *God, please take care of my friend, Junior. He took care of me for so long and for that smile at him and keep him safe with you. As for me, help me keep from losing the little bit of sanity I have left. Some day, let me see the why for what has happened today. God help me, for I can't make any sense out of it."*[1303]

LETTER TO THE EDITOR
Kevin C. Macaulay

"..my thoughts go back 15 years.. I am again sitting with buddies, hurriedly filling sandbags, reinforcing bunkers and moving our lives underground. Fifteen years ago, I was a

[1303] Kevin Macaulay, Diary entry for 27 January 1968.

member of Bravo Company, 3rd Recon Battalion, at Khe Sanh..

"Many changes have been noted since January 24, 1968. My body has softened and thickened; my hair has thinned and grayed. Yet, in my mind's eye, I still see the bunkers that replaced our strongbacks and tents on January 21, 1968, the day the 'siege' of Khe Sanh began. The bad times have been, for the most part, buried in my subconscious mind; the good times, the laughs, friendships and camaraderie we all experienced are looked back upon with a certain yearning. We experienced the fullness of life in those days, and we learned the finality of death.

"On January 29, 1983, my good friend 'Junior' (known officially as Pfc Wallace Lee Reather, Jr.) will be dead 15 years. This anniversary, for the most part, will go unrecognized. However, one of the greatest strengths of the Marine Corps has been its ability to honor its fallen members.

"The purpose of my writing is to personally renew that tradition. To this day, I still cherish the friendship 'Junior' and I shared. Unfortunately, I have never been able to duplicate this friendship. Perhaps it is better that way, for we shared far too much for this type of friendship to happen again.

"Fifteen years have passed. I still miss him and mourn his passing."[1304]

[*During the first two weeks of the Siege at Khe Sanh, Co B, 3rd Reconnaissance Battalion lost 60% of its personnel. Oddly, they were taking more casualties than had been in the uncertain and vulnerable territory outside the base, patrolling. It is as incomprehensible as it would be for someone to say that the most unhealthy place to be is in the hospital or the most spiritually dangerous place to be is in a church. The Marines of recon are now engaged in duties of being the Base Reaction Force, and work daily in working parties for C Med as stretcher bearers, moving ammunition in the Ammunition Supply Points, or work in the Fuel Dump and Drop Zone moving supplies, as well as stand watch on the lines.*[1305]

At 1430H, Platoon D-2 of 1/26, under the leadership of 1/Lt Daniel L. McGravey, departed from the northern sector (the BLUE Sector) of KSCB, a small parcel of land sandwiched between the perimeter and the Rao Quan River into which NVA soldiers had crept. The water point for the base was located here, outside the wires. An hour later, D-2 made contact at XD857423 with an enemy recon or OP element and received 82mm mortar from XD860429.[1306] The NVA unit, estimated to be seven soldiers, fired from well-concealed spider trap holes pouring heavy automatic machinegun fire on the Marines.[1307] Suddenly, a RPG went over everybody, but caught the point, PVT Frank N. Uzzell, who was down on one knee, in the groin and chest.[1308] PFC Henry R. Gagne, who normally walked point, had been hit the previous day by a mortar round, and Uzzell, who was his good friend, was on his first point.[1309] Lt McGravey immediately requested a helicopter medevac, but the calm voice of the DELTA Company Commander, Capt. Ernest E. Spencer, radioed McGravey to carry him in since the patrol was just outside the wire.[1310] After the Marines in the patrol had aggressively attacked the enemy force with small arms and grenades with support from 81mm mortars of 1/26,[1311] D-2 returned to the base.

Concerning PFC Golz, the official Operation SCOTLAND SITREP indicates that Co K/3/26 (defending Hill 861) reported receiving 4 incoming 82mm mortars at 1320H[1312] and a subsequent SITREP indicates the results as one friendly KIA.[1313] No KIAs for K/3/26 are indicated for this date, and PFC GOLZ is listed as a member of INDIA Company. No KIAs from INDIA Company are reflected as casualties in the SITREPs, however. How a Marine from INDIA Company (which defended Hill 881-South) is reflected as KIA on Hill 861 remains unexplained.[1314]

[1314] He may have been a passenger on a helicopter going to or from 881-South which landed at 861 due to mortars and small arms fire; he may have been temporarily assigned to Co "K," or in the process of reporting to Co "K" (since, in military accounting, one belongs to the unit from which he was transferred until he actually is "received" by the new command); or some other explanation.

[1315] 26Mar 271135Z/Jan68, Opn SCOTLAND SITREP #351.

Advisor, Captain Walter Gunn, the unit located in a separate perimeter line ahead of the lines manned by B/1/26 on the eastern side of KSCB. The NVA officer who surrendered 20 January, Lt La Thanh Tonc, had revealed that the NVA plan was to seize Hills 861 and 881-South as fire support bases from which troops would push against the northern and western sections of the perimeter—as a diversion. The main assault would be a regimental-size thrust against the eastern sector, and thus collapse the entire defense.[1316] *Col. Lownds was therefore concerned about that section, especially since it did not enclose the eastern end of the runway, and had planned positions 200 yards further out from the combat base than existing lines. The 37th, 318 men strong (some 100 to 150 people short of full strength) were therefore placed here.*[1317]]

28 JANUARY 1968

FIGUEROA, CPL Javier Puentes	**H&S/3/26**
HOLLIS, LCPL Thomas William	**B/3rd Recon**

The recon area, sandwiched between the regimental COC and the airstrip, as the last defensive line for the regimental command center should the base be overrun, is the bulls-eye of the target for NVA gunners. The Company Executive Officer, a "mustang," 1/Lt Carl J. Slack, says "When I get back to California, I'm going to open a bar especially for the survivors of Khe Sanh. And any time it gets two deep at that bar, I'll know someone is lying."[1318]

At 1130H, Co B, 3rd Recon Bn, took 3 incoming rockets resulting in the death of LCPL HOLLIS.[1319] **James Walsh recalls the incident: "We sent Hollis out—he was on the perimeter just to the west, facing the airstrip on our perimeter out there. They started taking incoming and he stuck his head up out of his bunker for just a minute and just about that time a round came in and he got it right through the head."**[1320] **Bessie Hollis, Thomas' mother, wrote: "I miss my son so much. I wish this war would end."**[1321]

Hollis' older brother, Nicholas, recalls that while growing up, Tom "..was real fragile, he was real little, and everyone thought he was a sissy. So when he gets in 7th, 8th grade, he starts pumping iron. After that' there's a complete transformation of this guy. They called him 'skull;' that was his nickname ast home. He'd taken a lot of crap from my brother next to me. My other brother used to pick on him. One time they went to the theater in Gillespie [Illinois], and he was picking on my little brother, Tommy. Tommy said he had enough of it, so he went outside and punched my brother out and gave him a black eye in goth of his eyes. When he came home, he looked like a raccoon. Dad said, 'See, I told you; you mess with that kid long enough, he's going to get back at you.' Tom was the kind of a kid that would smile, and then punch somebody. He'd just smile, and then God help anybody around him that he was mad at. Later, while in high school, the team was 'All Conference' in 1964. They never lost—a perfect season in football. He and my brother played on that team and they were caqlled 'ram' and 'jam.' My brother Ronnie was 'ram; and T?ommy was 'jam.'"[1322]

"He was married a week before he went off and she was fooling around while he was overseas and she ended up marrying this guy she was fooling around with. My brother had just finished changing the insurance over from my mother to her. They went through that like you wouldn't believe."[1323]

TREDINNICK, SFC Charles Nichol FOB-3

On 29 January, SFC William WOOD led his team from FOB-3 (team TIGER) to Hill 471, departing later than he had planned due to small, annoying delays, such as turning in emergency radios since they were in short supply. He was irritated as he departed about 0830H; he wanted to reach 471 before the heavy fog that blanketed the area burned off. (This usually happened about 0900). TIGER moved directly to 471 across a shallow valley that extended west and southwest from the FOB-3 perimeter, and the movement was slow. The fog lifted while the patrol was in the middle of an open area, still some 900 meters from 471.

Upon reaching the saddle between Hill 471 and the small "pimple" hill southeast of 471, the Bru component of the patrol became agitated, saying there "were beaucoup VC!" As they advanced, the patrol took fire from a range of about 5 meters. Wood returned two magazines as well as several M-79 rounds and discovered he was alone. "Crone lay face-up some 3-4 meters behind me and I could hear a lot of firing back about where we had stopped.. I scrambled back to Crone to find he'd been shot in the right cheek, the right eye, and the right forearm, which was broken. He may have had other wounds, too. I tried to find signs of life. The bullets hadn't exited although there was a large pool of blood under the back of his head... While trying to get Crone up into a fireman's carry his .45 fell out onto the ground. I picked it up, finding I couldn't carry him: he was a big man, 6'1" or 2" and 200 lb or more... [I] started to drag Crone back to the rest of the team, but a grenade came in and knocked me loose. I scuttled back to where the rest of the team was, to find Xon wounded in the ankle, one Bru dead (the M-79 gunner) and only Voorhees and 3 Bru firing at the top of 471... I told Voorhees that Crone was dead and asked after Mahoney and the rest of the Bru. He replied while changing magazines that he didn't know. They had disappeared when the shooting started, presumably downhill... After a hurried scan of the area (during which I spotted not less than 4 auto weapons on the military crest of 471) without sign of Mahoney or the other Bru, I was gone too."[1325]

Eventually Wood and the remainder of his team were retrieved by choppers and flown to FOB-3.

A notice concerning Michael Mahoney relates that he positioned himself in front of his team in order to lay down a heavy volume of automatic weapons fire while his team was moving to a more secure area. After the team reached it, Mahoney attempted to withdraw but was killed while he left his position.[1326] Mahoney liked football, skydiving, and hunting and had joined the Army on 20 Sep 1965.[1327]

At about 1000H, the helicopter had picked up and delivered Bill Wood to FOB-3. He had been shot through both knees and reported that one American had been killed and another captured, and that he was the only one of his team to escape. Hatchett Force DENVER was selected to recover the body and locate/rescue the missing American, and Captain Harlan E. Van Winkle, the Executive Officer of A-221, was selected to lead the team. 1/Lt Granville Sutcliffe, who was being groomed to replace Van Winkle, along with SFC Robert Scully (senior medic of FOB-3), SFC Charles N. Tredinnick (senior combat engineer of A-221), Sgt Dennis C. Lansing (junior communications NCO, A-221), Sgt Donald R. Rumph (junior medic of A-221), SP5 John L. Frescura (junior combat engineer of A-221), and PFC James Taylor (CAC OSCAR), along with 16 Bru, composed the rescue force.[1328]

SP5 John L. Frescura suggested that SFC Tredinnick accompany the patrol.[1329] The CO of A-221, Lee Dunlap, recalls Tredinnick as "one of the best Special Forces soldiers that I've ever met because he had a willingness and a tendency and a patience to teach the officers, and that was a little tough. He was so well respected, and he taught the whole team."[1330] SFC Charles Tredennick had wanted to be a Marine, but was turned-down because he was flat-footed. He joined the Army and then completed Ranger training and joined the Special Forces.[1331]

"PFC Taylor happened to be in the area where we were preparing for the mission, stated he was familiar with the area where the ambush occurred and volunteered his services. I was never one to question why someone volunteers to perform a dirty job; all I asked was, could he operate a radio? He said he could, and that was all I needed to hear."[1332]

At 1135H, the 24 men (8 Americans and 16 Bru) flew to Hill 471 with 2 Americans and 4 indigenous Bru per helicopter with the mission to recover one known American KIA, two indig. KIA, and one American MIA. Cover on the hill was non-existent; there was only elephant grass to a height of less than three feet and a few bushes. Tredinnick took three Bru and moved about 150-175 meters to another peak of the hill, remaining within

sight of Van Winkle, but was unable to locate any bodies and didn't make any contact. He did spot, however, a large force of NVA ground troops attempting to encircle the team. Van Winkle instructed him to return to the rest of the team and, upon returning to Van Winkle to plan their next movement, spotted movement in a small bush directly to their front, less than 6 feet away. As he asked, "What was that?" the NVA opened fire, initiating a brutal fire-fight.

Tredinnick ran to Sutcliffe screaming, "Sir, we can't hold the hilltop. We gotta get out." The NVA had set up a .51 caliber machinegun on one of the hilltops and Sutcliffe got up on one knee to shoot an azimuth to get the gunships a fix on its position, to hit it. "And I presented a rather good target; unfortunately they hit me with a grenade. And I remember the explosion to my left, this tremendous impact. And I thought, 'No, Sutcliffe, you're not going to do it!' As I was falling down, I said, 'Help! Medic!'"[1333]

1/Lt Grenville Sutcliffe received a wound in his throat. "I remember a big flash of light. Impact. It went through my throat and shoulder. I put my leg up in the air in the elephant grass so they could see where I'd fallen. One of our medics came over. I opened my eyes, and all I could see was this bloody hand in my face. The medic rolled me over and said, 'Sir, can you breathe?' And he and I had just trached a guy two nights before—one of our 'yards' got hit with an artillery round and he'd been buried and mud had impacted down his throat and the medic and I trached him—got him breathing. So I responded, 'I can breathe quite well, thank you!'"[1334] Tredinnick and Van Winkle rushed to him: "He was such a mess that I sensed it was a mortal wound. SFC Scully was already working on him and Tredinnick started back to his position in the perimeter and I turned my attention to getting us some type of fire support.. What occurred next could only be called a thunderstorm of enemy hand grenades being thrown into our position."[1335] PFC Taylor, the Marine accompanying the patrol, "..happened to glance up and saw what appeared to be a black thunderstorm. I then realized I was seeing a great number of ChiCom grenades, and yelled to the Captain, 'Down, Sir!' and pushed him down. I reflected that it wasn't every day one got to knock an officer on his ass."[1336] As with so many in combat situations, Taylor saw the grenades seeming to descend in slow motion as they exploded among the team. Van Winkle caught a piece in his leg and Taylor noticed he received some splintered fragments in his knuckles and joints. "I pulled a few out with my teeth and checked Rip, who said he'd make it, and then we became too busy to sweat a few pieces of shrapnel."[1337]

Van Winkle heard the distinctive sound of a bullet strike someone behind him, turned, and saw Tredinnick lying still on the ground. Sgt Rumph, PFC Taylor, and Van Winkle ran to him. "He had been wounded low down on the left side of his chest. The entrance wound was very small but the exit wound was massive. His last words to me were, 'It hurts real bad, Sir!'"[1338] Sgt Donald A. Rumph found SFC Tredinnick unconscious, breathing very irregularly. "I cut off his web gear and shirt and finished applying the dressing. His pulse was very weak, and 4 or 5 times stopped breathing. Captain Van Winkle called for a medevac for Lt Sutcliffe and SFC Tredinnick, which arrived about 15 minutes later."[1339] Sutcliffe and Tredinnick had been wounded within three to five minutes of the team's landing on Hill 471.[1340]

Sutcliffe remembers the medevac helicopters arriving. "Another medic was working on Tredinnick and shouted out, 'We got to get the medevacs in or we're going to loose this one.' And I couldn't talk very well by that time. My medic yells, 'Yeah, we're going to loose this one, too!' Well, I knew he was wrong. There wasn't a chance in the world that I was going to die on that hill!"[1341] (Choppers came and evacuated Sutcliffe and took him to C Med. "I always carried a compass around my neck, a pistol in my pocket and grenades, so when I threw away everything else and ran, I'd have some way to defend. Well, the Marine doctors weren't quite used to that, so they started cutting off my uniform and a grenade falls out of one pocket, a pistol out of another, so they ran out of the tent!"[1342])

The team, still on 471, received fire support from helicopter gunships which was limited due to the close proximity of the team to the NVA. During one gunship runs, the door gunner missed Taylor and Van Winckle by less than six inches and shot one of the Bru in both legs, shattering both of them. Another Bru soldier was shot dead. The SOG team managed to move to the north side of the hill and a Marine Corps FAC, "American Beauty Delta," coordinated air-strikes to protect the team while also directing strikes against a 2-battalion size NVA force. Gunship runs, 250-pound bombs, CBUs, and finally napalm strikes managed to disengage the NVA from the SOG team. After a medevac chopper evacuated the wounded, the remainder of the patrol walked back to FOB-3. Crone's body had not been located and Ma-

honey's whereabouts remained unknown. It had been a classic NVA ambush "designed to take advantage of our desire to recover the bodies of Americans killed in action."[1343]

SFC Charles Nichol Tredennick's nickname growing up was "Sonny." He loved animals and the family always had dogs and cats. He had a pet spider monkey, "Chico." He worked in a hardware store in Dallas, PA, (a little town east of Wilkes-Barre) while in school and played the clarinet and guitar. He also was good at basketball and enjoyed horseback riding with his sister, Jean.

His last letter home, to his wife Joy, dated 27 Jan 1968, noted that news of Khe Sanh must be painting a grim picture, but he emphasized things were really not that bad. "We must be in all the papers and on the news and I know they make it sound real bad... The reason why I am telling you this is because I don't want you worrying. I am alright... The good only die young... a guy came in from Co C Det to give us a hand got a quart of I.W. Harper so that helps... I just wanted you to know what's going on so you won't worry as much. You know how those newspaper people are plus we haven't had one man killed so it can't be too bad, and the Marines had only 11 killed in one week out of about 5,000."

His wife, Joy (died in 2005) posted the following on the Virtual Wall website:

07 Jul 2002

They say that time heals all wounds, so why won't this one heal?

It's been over 34 years now and you are still in my dreams all the time. I still miss you so much. We used to talk about growing old together, sitting on the front porch in our rockers and watching the rest of the world go by. It's not much fun sitting there alone.

Love, Joy

"My Green Beret"

"Don't worry 'bout me," he writes, "I'm fine."
In the thick of the fighting in Vietnam
From his bunker at Khe Sanh.
"Don't worry 'bout me, I'll be okay
Only the good die young. Ha ha"

But, who's that knocking on my door?
Two men in uniform.
It must be a mistake, I tell myself.
But already I feel so forlorn.

There's silence for a moment
When I open the door.
Then... "I'm Lieutenant Greene."
"Oh, no" I cry, "Please tell me you're not here for that!"
But the look on his face is my answer
For silence reigns supreme.

They are both so kind, and want to help
But there is no consolation,
When you lose the one love of your life,
There is nothing but desolation!

So, as the lonely days and nights pass,
And I re-read that letter... his last,
I tell him, "You're right as always, my darling...
Only the very best die young."

After being in the camp for only a few minutes, the Americans of HF DENVER were notified to pack up their gear and get ready to depart from FOB-3 for DaNang.[1344]

In early April, 1968, after 1/9 had taken Hill 471, FOB-3 was notified of several bodies believed to be FOB-3 members found on the hill. LtCol Roy Bahr, the CO of FOB-3, sent Hammond M. Salley and one of their medics, Denis Chericone, to retrieve them. Five or six Marines met them and escorted them to two bodies, one American and one Bru Montagnard but wouldn't come near the bodies. The stench was terrible.[1345] "We walked over and we turned one guy over. And I remember turning him over, and he was a friend of mine. And the flies all flew in my face, and the smell got on me, and I peuked really quick."[1346] The bodies had been virtually untouched by the NVA. Personal effects and most of their military gear was still in place. A radio with several bullet holes in it was still on the American's back. There was a sheath knife that Denis recognized as belonging to Sgt Crone; the knife had Crone's name on it. There was no evidence of molestation.[1347] As Salley and Chericone picked up Crone's body, his body was so deteriorated that his head fell off and rolled down the slope. Salley retrieved it and placed it back in the body bag.

Upon return to FOB-3, "We stank so much that Chericone burned his clothes. I had to take a shower and change clothes before I was allowed back into our TOC."[1348] After burning his clothes in the trash burner, Chericone "went down in the medical bunker and drank. I drank a half a bottle of whisky straight down—Bourbon. It didn't even touch me. Stone-sober. I remember one of the Sergeants standing there and going, Wow, kid, what happened to you? He was amazed a 21

year-old kid poured this bottle of liquor straight down."[1349]

COLONEL DAVID EDWARD LOWNDS

[On 29 January 1968, President Johnson has the Joint Chiefs of Staff sign a statement that Khe Sanh would be held. The statement,[1350] concludes: "The Joint Chiefs of Staff have reviewed the situation at Khe Sanh and concur with General Westmoreland's assessment of the situation. They recommend that we maintain our position at Khe Sanh."

LtCol Louis Rann, the Executive Officer of Regiment recalls the radioman leaning over and saying: "Colonel, the President wants to talk with you! The President's on the other end of the phone!" Rann notes, "I won't tell you what Colonel Lownds said—you're a minister!" "Shit?" "Well, a few other choice words!" "The next thing I know, Colonel Lownds picked up that phone [and was saying], 'Yes, Sir!.. No, Sir!' He's standing at attention!" Rann thought, "My God, it is the President!" Afterwards, Rann asked, "What did he say?" Lownds: "He said, 'I made the Joint Chiefs of Staff sign a paper that we're not going to make you guys surrender!'"[1351]

During the months prior to the Siege, Colonel Lownds frequently wandered about the area, getting the lay of the land—noting possible routes the enemy might take, timing movement from one point to another, observing possible Ops and assembly areas, and so on. "I went out all the time. I was out most of the time. As a matter of face, at one point when it [the siege] first started, I went out towards the water point—before General Tompkins ordered me not to go out. I got three-quarters of the way there, heard something in the brush, so I headed back. Somebody was there. From time to time I'd go out; sometimes I'd even go out by myself [without a radioman]. Nobody knew it. I didn't want to jeopardize anybody else. I went out quite frequently. A commander needs to know the terrain he's fighting in; if he doesn't, he's in trouble. I was able to pinpoint in my own mind the likely places of attack and also where the lines of departure would be. As a matter of fact, when we had that B-52 strike that came as a result—nobody wanted to give it to me—General Tompkins did, but Westmoreland and nobody else did. I told them, 'That's where they are and that's their Line of Departure, and if they're going to attack, they're going to attack from there. They said, 'That's too close to your lines.' I said, 'I don't give a damn how close they [the B-52 strikes] are. It all paid off in the long run."[1352]

LtCol Frederick McEwan, the S-4 of Regiment during the Siege, recalls: "Around December [1967], the North Vietnamese Army blew a French bridge across Highway 9. Well, Uncle Dave, who was Colonel Lownds, and the Engineer Officer and myself went to a steel bridge over the river at Route 9, and we swam across that river to check out that area, see if the bridge could be rebuilt. It couldn't. So we got out of there hastily. It was a precarious situation."[1353]

Thomas Buono was assigned to Colonel Lownds when the Siege began as his driver and to accompany him during his rounds of the base: "The morning the Siege started, Col Lownds was out, and I had a hard time keeping up with him. As a matter of fact, we had mortars walking up main street right in front of Regimental Headquarters and we had two guys hit, and he went after them, and I followed him. The mortars were still walking towards us. He grabbed one guy, and the other guy was limping towards him, and the other guy made it around the side of regimental headquarters, along the wall. Luckily it stopped about 5 or 6 feet short of the edge of that wall, or else we would all have been fragmented that day. He was out moving around the base that morning and the rest of that day, and the following two weeks that I was driving, he was out and about. We were dodging sniper fire.. so at one point we just abandoned the jeep, crawled from bunker to bunker... He had a way of motivating you without actually having to give you the boot in the rear end—his comments, or the way he would say something, or his mannerisms. You knew exactly what he meant. We were getting ready to go out

[1349] Conversation with Denis Chericone, 25 July 1993.

[1350] JCSM-63-68, 29 Jan 1968, Memorandum for the President, Subj: The Situation at Khe Sanh, LBJ Library. The memorandum begins: "You will recall that on 12 January 1968 General Westmoreland informed me that the Khe Sanh position is important to us for the following reasons: (a) it is the western anchor of our defense of the DMZ area against enemy incursions into the northern portion of South Vietnam; (b) its abandonment would bring enemy forces into areas contiguous to the heavily populated and important coastal area; and (c) its abandonment would constitute a major propaganda victory for the enemy which would seriously affect Vietnamese and US morale. In summary, General Westmoreland declared that withdrawal from Khe Sanh would be a tremendous step backwards. At 0910 hours this morning I discussed the Khe Sanh situation by telephone with General Westmoreland... General Westmoreland stated to me that, in his judgment, we can hold Khe Sanh and we should hold Khe Sanh. He reports that everyone is confident. He believes that this is an opportunity to inflict a severe defeat upon the enemy. Further, General Westmoreland considers that all preparatory and precautionary measures have been taken, both in South Vietnam and here, to conduct a successful defense in the Khe Sanh area."

[1351] Conversation with Louis Rann, 30 Oct 1994. Capt Earle G. Breeding recalls, "The President talked to him on the telephone. When a President calls a Regimental Commander on the telephone, every subordinate person—subordinate to the President—is kissing butt. Nobody's going to stand up to him and say, 'Hey! That's stupid!'" [Conversation with Earle G. Breeding, 29 Oct 1994].

[1352] Conversation with David E. Lownds, 2 December 1994.

[1353] Comments of Frederick McEwan at Khe Sanh Reunion, Nashville, Tn, 21 July 1990.

and he asked me, 'Corporal, how come you haven't shaved yet?' And I said, 'Colonel, I don't have a razor.' He opened up his desk drawer and pulled out one of those disposable razors and said, 'Here, shave!' 'Right here, Sir?' He said, 'Yep, go ahead, you've dry-shaved before haven't you?' He said, 'I want you to look like a Marine.' And I said, 'OK,' and proceeded to dry-shave. We checked on some of the different Commanding Officers, checked casualty reports, made it to the runway, checked the status there. It was a daily routine... Most of Colonel Lownds' time was spent above-ground... He stayed away from the media. His time was too valuable. He knew what the situation was. There was a possibility of nuclear intervention. I had a Top Secret clearance, perhaps one of the reasons they sent me over to the Colonel's bunker... I remember laying in a slit trench next to Colonel Lownds right outside headquarters. We had dug [it] the first day as quickly as we could; it was only about 10 inches deep. And incoming came in, and the two of us are laying there, side by side, facing one another. After the incoming subsided, he just literally stood up and picked me up with one hand and said, 'Come on, we have work to do.'... [He avoided "salty" language]. He expressed himself with the education and the intelligence that he had. He was able to stay away from vulgarity. There were times when his language might have been a little strong, but very seldom, very seldom, like the average Marine, like myself. He didn't express himself in that way at all. Even when the situations seemed like they were taking a turn for the worse, he still had an inner character and a strength about him that I saw him display, that really kinda gave everybody around him not only hope, leadership that he displayed... He was like a "shadow" the way he moved around the base, like the "Phantom" movie that just came out. He moved. Sometimes he moved very openly. He very seldom had me stop the jeep, even for incoming rounds. There were only one or two situations that I can remember where he actually said, 'You'd better stop and take cover in the ditch."[1354]

PFC Craig W. Tourte (HQ/1/13) in 2004, 36 years after the siege battle, wrote: "I was manning the line .. just a hundred yards or so south of the main gate. It was one of those dark dreary nights when you just stand there looking straight ahead at nothing. Exhausted from lack of sleep, C rats, rain and cold, digging and just plain being there, I turned towards a voice behind me who said, 'How is it going, Marine?' I looked up and saw..a Marine.. who had a big broad mustache and was accompanied by another Marine with a radio... He introduced himself as Colonel Lownds. He said he was just seeing how things were going and asked how we were getting along... He smiled, turned away, and continued walking down the trench line... I never expected a colonel to express concern for a lowly PFC... That simple act lifted my spirits and for some reason I felt a lot more secure knowing that the commanding officer was in this with us and was exposing himself to the same dangers the rest of us faced... I am proud of all who served—and of Colonel Lownds, who shared the danger and the pain, and made one lowly PFC feel as if his life was worth something."[1355]

Capt H.J.M. ("Mac") Radcliffe (CO, A/1/9) recalls that after the Alpha Outpost (Hill 64) had been attacked and A/1/9 lost over 30% of its company on 8 February, he had told his troops, "Nobody gets into the Company perimeter I don't know about it." "They called down and said, 'We got somebody coming into your area.' I said, 'Stop him! We had a lot of press people and others coming in. I said, 'Who is it?' They said, 'I don't know who he is, Sir. He has a moustache and cigar and has his radio operator with him.' Well, I knew right away that was Colonel Lownds. He looked at me and said, 'How you doing, Captain?' I said, 'Fine, Colonel.' He said, 'No.' He pulled me aside, away from the radio operator, and said, 'Mac, how you doing?' And I said, 'I'm hanging in there.' And he said, 'I know you will.' And he gave me a cigar. Just that touch. I knew what I'd known before, but reinforced the fact that we had a caring, concerned, intelligent, super Regimental Commander, who knew what the hell it was to 'take it,' 'take it,' 'take it' and bounce back to be a Marine!"[1356]

On one of his walks through the KSCB during the Siege, Colonel Lownds came into the Ponderosa area containing D/1/26 and noticed the men's clothing was getting raggedy. He told George E. Myrick, "Corporal, you get clothes anyway you can get 'em!" "I said, 'Yes, Sir! We stole them off the comm. lines. So I got his shirt. A day or so later, Lownds was again visiting the area, walking around. He saw his shirt, but said nothing at the time. Returning, he simply said, 'Nice shirt, Corporal! You got my sox, too?' and he walked away."[1357]

John Hargesheimer (A/3rd AT Bn) remembers that during the Siege, "I was sent to deliver a message to Col. Lownds. I had to go to the concrete bunker that was his headquarters and was led through the maze to where he was. He was sitting in a chair and he looked exhausted. He didn't look up when I delivered the envelope, but he did thank me. I immediately turned around and left, but it left a lasting impression on me of the enormous responsibility that this one man had to carry and I was humbled. After that experience I prayed every night dur-

ing the siege for Col Lownds. If anyone needed God's help and strength it was Col. Lownds during the siege."[1358]

While histories of Khe Sanh generally focus on General Giap and General Westmoreland, neither had much to do with Khe Sanh other than in general, strategic ways. It was Colonel Lownds, with his staff, that targeted 95% of all B-52 strikes and generally conducted the entire course of the battle.[1359] *It was Colonel Lownds who had to make the agonizing decisions to abandon Huong Hoa District, to deny entry by the Lao refugees after Lang Vei had been overrun, to place a perimeter of KSCB with machineguns and riflemen pointed into the appended FOB-3 compound (both of the latter due to the possibility of NVA agents which could assassinate Americans as they did on 4 May 1967 when Lang Vei was attacked and the CO and XO killed, which led to the construction of the "new" Lang Vei so that no indigenous were within the inner perimeter, reserved for Americans). Colonel Lownds had very deep feelings for the local Bru (who were prohibited from leaving the Khe Sanh area by the Vietnamese ARVN I Corps Commander, General Xuan Lam). He recalls, "There was an old guy in town. I used to have a bunch of cigars. I'd take a few and put a few in my pocket and stop at his hootch and talk with him—not talk with him—I'd just give him the cigars. He was an old-timer and I took a real liking to him. I often wondered what happened to him."*[1360]

"I took the driver and radio and went back in the hills to a village and saw a little boy standing there, naked and he couldn't speak any English and I couldn't speak any Bru. But he held up something. Now this was way back in the woods. He held it up. And as you know there's plenty of clay there. He made himself a clay helicopter to proportion. He had even gone on to the point of having the machineguns come out of the helicopter at the right spots. I got a picture at home. It's always impressed me that people say they were dumb. They're not dumb; they just never had the chance to have an education."[1361]

Col Lownds was born 4 Oct 1920 in Holyoke, Massachusetts, and graduated in 1938 from Westerly High School, Westerly, Rhode Island, and earned a B.S. in agriculture in 1942 at the University of Rhode Island.[1362] *His father had served in the Army during World War I, but rarely talked about his experiences. "He was just like me: didn't want to impress people; all he would say was [I was] a good boy."*[1363] *A Marine recruiter came to college and half a dozen young men joined the Marine Corps, including Lownds,*[1364] *who was commissioned a Second Lieutenant in October, 1942 in the USMCR and shortly thereafter reported to 4th Marine Division as a Platoon Leader. He was promoted to 1/Lt in July, 1943. During World War II, he saw action as a Platoon Leader with Co. B , 1/24, 4th Marine Division, at Roi-Namur in the Marshall Islands, Saipan in the Marianas, and at Iwo Jima.*[1365] *He was wounded on Saipan and Iwo Jima; one of the wounds involved a shot through the hip*[1366] *and the other a concussion.*

From July 1953 to February, 1954, he served as the Intelligence Officer of 9th Marine Regiment. "When I went in the 9th Marines, I wanted to be the "3" but Colonel [William Kenefick] Jones [the "father of Marine Corps Corps-level amphibious reconnaissance during WW II, later LtGen, and father of James Logan Jones, who served as a Captain at Khe Sanh in May, 1968, and later was Commandant of the Marine Corps] said, 'No.' He had 'Pinky' Saunders and said, 'I'm not going to replace Pinky now, so I'll make you the '2."[1367] *It was at this time that several Privates and PFCs reported in as scouts—Harper Bohr, Jerry Hudson, and Earle Breeding—the first two the S-2 of Regiment and the latter CO of E/2/26 during the Siege.*

He served in Korea with 1st Shore Party Bn of 1st Marine Division. He served as a staff officer at the Armed Forces Special Weapons [nuclear weapons] Project in November, 1954 until October 1957. After being promoted to LtCol in July, 1958, he served as Plans Officer of the 2nd Marine Division and from September, 1964 to July, 1965, as S-3 of 4th Marine Expeditionary Brigade during the Santo Domingo involvement, Dominican Republic.[1368] *He was promoted to Col in July, 1965.*

He married the former Jean C. Bruner of Cranston, RI and had 6 daughters and a son. Mrs. Lownds recalls that while Col Lownds was at Khe Sanh during the siege, one of their daughters was in 6th Grade and taunted by her classmates who said her father was a killer—because of the TV coverage. Mrs. Lownds was unaware of this at the time.[1369] *Even high-ranking officers and their*

families were not immune from the ill-treatment of many Americans at the time!

The NPIC[1370] reported approximately 55 foxholes at XD897500, seven miles northeast of Khe Sanh. Additionally, in an area approximately one click south of this position were two possible camouflaged rocket positions, one possible rocket position under construction and three automatic weapons positions.[1371] CG, FMFPAC, noted that a bivouac area, possibly that of the 95C Regiment, 325C Division, was reported in this general area on 22 January 1968.[1372]

In other photographic reconnaissance conducted on 29 January, a possible supply and communications area containing 13 grass-covered shelters, two possible communications antennae and approximately 10 underground bunkers, was detected at XD84453876, the former old French concrete home of John and Carolyn Miller, the Wycliffe Bible Translators (who had departed Khe Sanh at the strong recommendation of Col Lownds in early January).[1373] This information reflects why the patrol to Hill 471 encountered such resistance!]

30 January 1968

BARMMER, LCPL Timothy Michael	**B/3rd Recon**
MARIZ, 1/Lt Robert J	**HQ 26 Mar**
VASQUEZ, SGT Jesus Roberto	**EOD**

At 301145H, the KSCB received one incoming 122mm rocket from the northwest[1374] killing 1/Lt Robert J. Mariz.

The Top of BRAVO Company, 3rd Recon, was in the by-now-mostly-demolished company office in a plywood hardback near the regimental COC along with a couple clerks. "We didn't spend too much time in there. A rocket came in, hit just to the west of us a little, and it threw shrapnel through that old company office. It got both clerks. It blew the fingers off one of the clerks, a red-headed man and hit the other one in the leg. I was standing right in the middle of them, and everything missed me. I don't know how that happened. Anyway, I found out that Lieutenant Mariz had just come up out of the regimental bunker and was walking right past the recon office there when that rocket hit, and that's where he was killed."[1375]

Kevin Macaulay, a radioman in BRAVO Company, 3rd Recon, recalls the incident: "This brand new Lieutenant—he'd been in country maybe two days—had just exited the [regimental] COC bunker. His utilities were perfectly clean. His flak jacket was green where the rest of ours were red because of the clay. His helmet liner and helmet cover were perfectly green. His jungle boots were the bright green and the dark black that characterizes the jungle boots. And he walked out of the COC bunker and right into the middle of this barrage. He was wounded extremely severely by this 122mm rocket that came in, and we saw him lying on the ground. One of his feet was at a totally impossible angle; his foot was almost severed, and there was a big pool of blood around him. We were already carrying our company clerk, a fellow by the name of [LCPL Ronald D.] Coleman out of the company office who had taken shrapnel from the same round. Coleman lost, I believe, the major portion of all his fingers on both hands, plus he had a gaping wound over his right kidney. It looked, as we loaded him on the stretcher, that he was in bad shape, but I believe he survived. His kidney, I think, was destroyed though; luckily we have two of them. We ran Coleman up to Charlie Med and then we came back and there was a group around this poor Lieutenant. As we were loading him onto the stretcher, Colonel Lownds came up out of the COC bunker and he spotted us there. Immediate recognition came upon his face as he saw this poor Lieutenant lying, and Colonel Lownds watched us as we picked him up and took him to the aid station. We came back with the empty stretcher which was now totally covered with blood. Colonel Lownds looked over to us and yelled, 'Hey Marine, how's he doing?' And I looked back over to Colonel Lownds and I shook my head. And you could see the look that came across Colonel Lownds' face; you could see how visibly upset he was by this man's death. It was one of the few times that I had seen Colonel Lownds and had direct conversation with him. I had seen him numerous times in the COC bunker, but it was the first time I had ever really spoken to him, and it just gave me the impression that the man really cared. Not only did he care about the entire base—the worry that he had on his mind that we had anywhere between ten to forty thousand NVA around us, but he was concerned about the individual. And he was visibly shaken by this man's death."[1376]

Robert Mariz, born 9 July 1930, had enlisted in the Marine Corps in 1948.[1377] In 2002, one of his daughters wrote: "My dad was very special to me and his memory is

very strong in my mind and in my heart. I know I am lucky to have loved him and known him for the years that I had with him. I was 13 at the time that he died. We lived in Oceanside, California. We finished out that school year and then moved to Minnesota (always considered our home state) that summer. My mom has never remarried and still loves him very much. I have a sister, Pati, who was 10 at the time... He was only at Khe Sanh about 2 days when he died. He had been a courier out of Okinawa for 6 months before going to Khe Sanh. He had traveled to Vietnam as a courier, but at Khe Sanh he would have been permanently stationed until August or September. He would have had 20 years in the Marines as of April in 1968. He had also served in Korea when he was young and was at the Chosen Reservoir. I was named after the Marine Corps although my name is spelled differently. If I'd been a boy (I was told) I would have been named Gung Ho or Semper Fi, but I think that was a joke. The Marine Corps was important to him as was his country. He believed in it."[1378]

His daughter, Maureen (Mariz) Hudak, wrote the following to the Vietnam Memorial in D.C. to be placed there as a memorial for Father's Day, 40 years later:[1379]

A 40 year Father's Day Tribute to My Dad
1st Lt. Robert J. Mariz

My dad, Robert J. Mariz, was the best dad a girl could have. I treasure the memories and the years that I was able to have with my dad, for all of the love that he gave me, and for the things that he taught me in the 12 years that we had together. I was 12 when my dad left for Vietnam. I was 13 years old when he died and my sister, Pati, was 10 years old. The love that he showed me helped me through difficult times in my life. There were many times that I made choices based on knowing that he would have been proud of me. I have so many great memories of him bike riding with me, walking on the beach looking for shells, him teaching me to body surf and to ride the waves, our family picnics, trips in the car as we were being transferred to a new place, playing cribbage together, family board games, and of him helping me with my homework.
